QUIT is both an adj. and a verb. **1.** The adj., as Skeat shows, is oldest. It comes from Old Fr. *quite* (mod. *quitte*), which is the Lat. *quietus* in its late sense of *free from obligation.* This is the meaning of the word in AV, where it occurs: Ex 21^{19} 'If he rise again, and walk abroad upon his staff, then shall he that smote him be quit' (וְנִקָּה); 21^{28}, Jos 2^{20} (both נָקִי). Cf. Udall's *Erasmus' Paraph.* ii. 279, 'But he that sticketh his brother with the darte of a venemous tongue, although he be quitte by mannes lawes from the crime of manslaughter, yet by the law of the gospel he is giltie of manslaughter'; Jer 25^{29} Cov. 'ye shall not go quyte.'

2. The verb came from Old Fr. *quiter* (mod. *quitter*), a derivative of Lat. *quietare.* In AV it is used only reflexively, 'quit yourselves like men' (1 S $4^{9\,bis}$, Heb. הֱיוּ לַאֲנָשִׁים), 'quit you like men' (1 Co 16^{13}, Gr. *ἀνδρίζεσθε*). To 'quit oneself' is to discharge one's obligations; on every man lie the obligations of a man. Cf. Milton, *Samson Agon.* i. 1709—

'Samson hath quit himself
Like Samson.'

J. HASTINGS.

QUIVER represents more than one Heb. word. **1.** Gn 27^3 for תְּלִי *tĕlî* [Samar. תלית *tĕlith* (?)], a ἅπαξ λεγ. meaning literally, if a genuine Heb. word, 'that which is hung,' either a *quiver* (LXX [φαρέτρα], pseudo-Jon.) or a *sword* or *knife* (Onk., Pesh., Abulwalid). 2. Usually for אַשְׁפָּה *'ashpāh*, perhaps a loan-word from Assyr. *išpatu*, literal meaning unknown.

The quiver was a very conspicuous part of the equipment of the Eastern warrior; on the Assyr.

---

* If the wind in this case had been anti-cyclonic (which is probable) the direction would have changed from N.E. to E. and from E. to S.E. and from this to S. and S.W., which would have driven the ship into the sea of Adria.

† The name is Quirinius, not Quirinus; see Furneaux on Tac. *Ann.* ii. 30. 4; and *ἡγεμονεύοντος* may='was commanding' an army (but cf. the use of the word in Lk 3^1).

‡ Tertullian (*adv. Marcion*, iv. 19) says that the census was taken by Saturninus; yet he himself places the birth of Christ B.C. 3 (*adv. Jud.* 8).

* Perhaps the possibility of a slip of the pen, *Κυρηνίου* for *Κουιντιλίου*, like 'Barachiah' for 'Jehoiada' (Mt 23^{35}), is just worth mentioning.

reliefs in the British Museum the Assyr. soldier is always an archer, and *Elam* his foe regularly *bears the quiver* (Is 22^{6}). The famous mounted archers of the East are perhaps alluded to in Job 39^{23} 'the quiver rattleth *upon him*' (RVm), *i.e. upon the horse*, and the terror caused by them is vividly portrayed in Jer 5^{16} 'Their quiver is as an open sepulchre'; cf. Jer 6^{23} 'They ride upon horses.' The LORD Himself has a quiver in which He hides His chosen instruments (Is 49^{2}). When the moment comes for the execution of His judgments, His arrows fly suddenly to the mark (Ps 64^{7}). There is a parallel for these metaphors in the speech of al-Hajjāj, the Khalifa Abd al-Melik's governor, to the disaffected inhabitants of Cufa (A.H. 75); 'The Prince of the Believers has spread before him the arrows of his quiver, and has tried every one of them by biting its wood. It is my wood that he has found the hardest and the bitterest, and I am the arrow which he shoots against you' (Stanislas Guyard, 'Mohammedanism,' in *Encycl. Brit.* xvi. 571). Another metaphor in the OT is that a man's home circle (?) is his quiver, and his sons, born while he himself is still young, are his arrows (Ps 127^{5}); cf. La 3^{13}, where, conversely, arrows are called 'sons of the quiver' (RVm).

3. In the Pr. Bk. version Ps 11^{2} reads '[They] make ready their arrows *within the quiver*' (עַל יֶתֶר *'al yether*). This translation, though supported by LXX (*εἰς φαρέτραν*) and Vulg., is wrong. AV and RV (so Pesh.) have rightly 'upon the string.'

4. Ancient authority is strong for translating שְׁלָטִים *shĕlāṭîm*, 'shields' (EV) as 'quivers' (2 S 8^{7} =1 Ch 18^{7}, 2 K 11^{10}=2 Ch 23^{9}, Ca 4^{4}, Jer 51^{11}, Ezk 27^{11}). The latter rendering suits Jer 51^{11} 'fill *the quivers*,' but it is more probable that in all these passages שְׁלָטִים has the more general meaning, 'arms, equipment' (cf. *Expository Times*, x. (1898) 43 ff.).

W. EMERY BARNES.

QUOTATIONS.—In OT there are few definite quotations, but the Bible writers freely introduced matter which they found ready to hand. Several books, such as those of the Hexateuch, Jg, 1 and 2 S, etc., are made up, in fact, of previously existing documents (see HEXATEUCH, etc.). Shorter extracts are also frequent, esp. poems, such as the Song of Lamech (Gn 4$^{23.\ 24}$), the Blessing of Jacob (Gn 49$^{2\text{-}27}$), the Song and the Blessing of Moses (Ex 15$^{2\text{-}18}$, Dt 33$^{2\text{-}29}$), etc.; or portions of songs, as Jos 10$^{12b\text{-}13a}$. In a few instances only is the source mentioned, as 'the Bk. of Jashar' (Jos 10^{13b}, 2 S 1^{18}, 1 K 8^{53} LXX), 'the Bk. of the Wars of J″' (Nu 21^{14}). Sometimes they were probably popular songs handed down by oral tradition (Nu 21^{17}). Often a writer incorporates the language of an earlier writer, as frequently throughout the Psalms, so much so that certain phrases came to be traditional, such as 'praise ye J″,' 'for His mercy endureth for ever.' It is not always certain whether passages common to two writers are copied from one by the other, or are both taken from one common source, as Is 2$^{2\text{-}4}$=Mic 4$^{1\text{-}3}$, which is evidently foreign to the context of Is (note the minatory tone of 2$^{5\text{-}22}$), and, if taken by Isaiah from Micah, proves Is 2 to have been written not earlier than Hezekiah's reign (cf. Jer 26^{18} with Mic 3^{12} contextually connected with Mic 4^{1}), and is therefore believed by many to belong to some earlier unknown document. It is also probable that Is 15-16^{12} is derived from an earlier source (see 16^{13}), and such passages suggest the inquiry whether the insertion of earlier material by biblical writers may not have been much more frequent than is commonly supposed.

i. QUOTATIONS FROM OT IN NT.—These are very frequent and very various in character. Turpie puts them at 275; but this does not include the very great number of passages incorporated into the language of NT writers, esp. in the Apocalypse.

A. Quotations are *usually from LXX*—(*a*) even though differing more or less considerably from MT (1) in pointing, as Ac 15^{17} [Am 9^{12}] (אָדָם 'man' for אֱדֹם 'Edom'), He 11^{21} [Gn 47^{31}] (מַטֶּה 'staff' for מִטָּה 'bed'); (2) in reading, as Ac 15^{17} (יִדְרְשׁוּ 'seek' for יִירְשׁוּ 'possess') (Ac 2^{27} [Ps 16^{10}] agrees with LXX in following Ḳerê חֲסִידְךָ 'Thy holy one' for Kethibh חֲסִידֶיךָ 'Thy holy ones'); (3) by a probably inaccurate tr. of words, as Ac 2^{27} [Ps 16^{10}] (*διαφθορά* 'destruction' for שַׁחַת 'pit'), Ro 10^{20} [Is 65^{1}] (*ἐμφανὴς ἐγενόμην* 'I was made manifest' for נִדְרַשְׁתִּי 'I was sought'); and of phrases, as He 2$^{6\text{-}8}$ [Ps 8$^{4\text{-}6}$] (*ἠλάττωσας αὐτὸν βραχύ τι παρ' ἀγγέλους* 'Thou madest him a little lower than the angels' for וַתְּחַסְּרֵהוּ מְּעַט מֵאֱלֹהִים 'Thou hast made him but little lower than God'); (4) by other differences which cannot easily be accounted for, but are probably due to various readings, as Ro 9$^{27.\ 28}$ [Is 10$^{22.\ 23}$], where, besides other variations, LXX seems to have read יִוָּשַׁע for יָשׁוּב, and דָּבָר for כִּלָּיוֹן and כָּלָה, and in He 10$^{37.\ 38}$ [Hab 2$^{3.\ 4}$], where LXX probably read עלפה (with 531 K) for עֻפְּלָה, and חָפְצָה for יָשְׁרָה. In He 10^{5} [Ps 40^{7}] it was suggested by Kennicott that אָזְנַיִם (Heb. text) is a corruption of אז גוה (LXX). If so, it would seem probable that אז itself was inserted by error from the following line, and that LXX read גוה only; but the Heb. reading with all its difficulty better suits the context, the contrast being between obedience and sacrifice (cf. 1 S 15^{22}). (*b*) Sometimes when the argument depends on LXX as distinct from Heb., as in He 1^{7} [Ps 104^{4}], where Heb.='Who maketh for his messengers winds, for his ministers a flaming fire.' Cf. also Ac 2^{27}, He 2^{7} 10^{5}. (*c*) Generally even by writers conversant with the Heb. as St. Paul and St. John (see I, *f*, *h*). (*d*) To a large extent even when the quotation points to a knowledge of Heb., showing that the writer, even though he had the Heb. before him, or in his mind, still reproduced in part the familiar language of LXX, as Mt 2^{18} [Jer 31 (38)^{15}] (*κλαυθμὸς καὶ ὀδυρμός*, LXX *κλαυθμοῦ κ. ὀδυρμοῦ*), 12$^{18\text{-}21}$ [Is 42$^{1\text{-}4}$], where after a quotation, which is an independent tr. of Heb. differing in almost every word from LXX, the last verse agrees exactly with LXX, though the latter follows a different text in all three words (*κ. ἐν* [LXX *ἐπὶ*] *τ. ὀνόματι αὐτοῦ ἔθνη ἐλπιοῦσι* 'and in his name shall the Gentiles hope' for וּלְתוֹרָתוֹ אִיִּים יְיַחֵלוּ 'and the isles shall wait for his law'). It is also possible that this may be the insertion of an early editor of Mt, or a various reading of Heb. followed also by LXX (see J, *a*; cf. Ro 9^{9}).

B. Quotations are occasionally *independent translations from the Heb.*—(*a*) because they were so found in the documents which the writer incorporates, as Lk 1^{17} [Mal 3^{1} and 4$^{5.\ 6}$] (*ἑτοιμάσαι*—פִּנָּה for LXX *ἐπιβλέψεται*; *ἐπιστρέψαι*—הֵשִׁיב for *ἀποκαταστήσει*; *πατέρων*—אָבוֹת for *πατρός*), 2^{23} (see J, *a*); (*b*) for the sake of the argument, as Jn 19^{37} [Zec 12^{10}] (*εἰς ὃν ἐξεκέντησαν*—אֵת אֲשֶׁר דָּקָרוּ for *ἀνθ' ὧν κατωρχήσαντο* from variant רָקְדוּ), Ro 9^{17} [Ex 9^{16}], where St. Paul prefers the rendering of הֶעֱמַדְתִּי by *ἐξήγειρά σε* 'did I raise thee up' to *διετηρήθης* 'thou wast preserved,' Ro 12^{19} [Dt 32^{35}] (*ἐμοὶ ἐκδίκησις*—לִי נָקָם for *ἐν ἡμέρᾳ ἐκδικήσεως*); (*c*) probably because the writer was better acquainted with the Heb. of the book quoted *memoriter*, as Ro 11^{4} etc. (see I, *h*).

C. The only quotations *in Aramaic or Hebrew-Aramaic* are the words on the Cross, Mt 27^{46}, Mk 15^{34} (see I, *a* (1), (2)), unless we include the words *μαρὰν ἀθά* 'our Lord cometh' (1 Co 16^{22}), probably a well-known Christian salutation. See MARANATHA.

D. Some few quotations are based upon *an Aramaic interpretation of the Hebrew*, and suggest the inquiry whether they and others also may not possibly be derived from some intermediate source of the nature of a Targum; or whether, on the other hand, the interpretation was merely influenced by current Aram. usage. Had an Englishman of to-day to translate Milton's 'silly sheep' into French, he would very probably give the first word its modern meaning. In 1 Co 15^{54} [Is 25^{8}] לָנֶצַח 'for ever' is translated according to the Aram. meaning of the root εἰς νῖκος 'in victory.' In 1 Co 2^{9} [Is $64^{3.\,4}$] מְחַכֵּה 'that waiteth for' is apparently read as Aram. מחבב 'that loveth' [but see J, *a*]. It is possible that Mt $2^{6.\,23}$ should be traced to some sort of Targumic influence, or at any rate some current traditional interpretation, with which the evangelist's readers were familiar. In the first the words οὐδαμῶς ἐλαχίστη seem an intentional emphatic denial of the original words [Mic 5^{2}]. Bethlehem had by the very fact of Messiah's birth become *by no means* the least. Ἡγεμόσιν is either from a variant (see J, *a*), or at any rate a less literal translation. But the substitution of γῆ Ἰούδα for 'land of Ephratah' looks like a slip of memory, and suggests that the whole is a bold paraphrase of the evangelist himself (for parallels see G). Mt 2^{23} is evidently from Is 11^{1} (נֵצֶר 'branch' being from the same root as Ναζωραῖος 'Nazarene'), and suggests a traditional interpretation of the passage in this sense.

E. Apart from B, C, and D, variations from LXX are due to (*a*) *slips of memory*, (*b*) *errors of transcription*, (*c*) *literary corrections*, (*d*) *exegetical alterations*. But it is not always easy to determine which, or in case of (*c*) and (*d*) to say how far they were intentional. In quotations from memory, and even in those copied, there is a natural tendency to correct, unconsciously, according to familiar language and familiar ideas. We should probably be right, when quotations are short, in assigning to (*a*) verbal changes, considerable perhaps in number, but unimportant in their bearing, as Jn 1^{23} [Is 40^{3}] (ἑτοιμάσατε τ. ὁδὸν Κυρίου, εὐθείας ποιεῖτε τ. τρίβους τ. θεοῦ ἡμῶν becomes the single phrase εὐθύνατε τ. ὁδὸν Κυρίου, which gives the full sense more briefly). Probably Βαβυλῶνος for Δαμάσκου in Ac 7^{43} [Am 5^{27}] is a slip of memory of either St. Stephen or his reporter, the two captivities being confused (cf. the error about the burial-places of the patriarchs in 7^{16}). We have a striking example of (*b*) in He 3^{9} [Ps 95^{9}], where ἐν δοκιμασίᾳ is read for ἐδοκίμασαν (LXX), the error being facilitated by ἐν τ. παραπικρασμῷ above (unless it is an error of a very early copyist). Under (*c*) we should class corrections of Hebraisms and other clumsy constructions, as Lk 3^{5} [Is 40^{4}], where εὐθεῖαν (ὁδόν) is altered so as to agree with ὁδούς added by St. Luke in the next phrase, and ἡ τραχεῖα into αἱ τραχεῖαι. In He 8^{10} 10^{16} [Jer 31^{33}] δώσω is omitted so as to give διδούς its proper participial construction (cf. Lk 8^{10}). To this head we might also refer rhetorical expansions, such as the insertion of λέγει ὁ θεός or the like in Ac 2^{17} 7^{49}, Ro 12^{19} (in He 10^{30} spurious) 14^{11}, 1 Co 14^{21}, 2 Co 6^{17}. To (*d*) would belong the very frequent changes of person, tense, etc., so as to make the quotation more directly applicable. Thus in 2 Co 6^{18} [2 S $7^{8.\,14}$] αὐτῷ and αὐτός become ὑμῖν and ὑμεῖς, and υἱόν is boldly changed into υἱοὺς κ. θυγατέρας, so that Nathan's words respecting David's son become a promise of God to Christians (cf. Ac 1^{20}). In Lk 23^{46} [Ps 31^{5}] the future παραθήσομαι naturally becomes the present παρατίθεμαι in the mouth of our Lord, and in Mk 14^{27} (Mt 26^{31}) [Zec 13^{7}] the imper. πατάξατε becomes the ind. 1st pers. fut. because the action is referred by Christ to God Himself. Sometimes words are added to give a special turn to the quotation, as τὸν ἄγρον in Mt 27^{10} [Zec 11^{13}] to refer to the field bought with Judas' money (unless this is a variant of Heb.; see J, *a*). In He 10^{37} [Hab 2^{3}] the insertion of ὁ converts a Hebraism into a Messianic prophecy. Sometimes words are omitted, and so the quotation gets a more general and dogmatic character, as with μοῦ in Ro 1^{17}, Gal 3^{11} [Hab 2^{4}] (in He 10^{38} it is transposed). Apparently it had already become a common doctrinal formula. In Gal 3^{13} [Dt 21^{23}] the omission of ὑπὸ θεοῦ makes the statement a general principle, or it may be due to reverence (see Lightfoot, *in loc.*). Still more frequently words were altered. In Gal 4^{30} [Gn 21^{10}] the substitution of τ. ἐλευθέρας for μου Ἰσαάκ brings out more forcibly the contrast between bondage and freedom. In 1 Co 3^{20} [Ps 94^{11}] the quotation would be far less applicable without the correction of ἀνθρώπων into σοφῶν. St. Paul, no doubt, felt the verse to imply that, however wise men might be, God saw their folly. In Eph 4^{8} [Ps 68^{18}] ἔλαβες . . . ἐν ἀνθρώπῳ is boldly altered into ἔδωκε . . . τ. ἀνθρώποις, the latter being probably regarded as an inference from the former, and the statement of v.^{11} clearly depends upon St. Paul's rendering. With this we might compare Lk 21^{20} (contrast Mk 13^{14}), where the manner of fulfilment of Christ's prophecy has been read, but probably unconsciously, into the prophecy itself. Sometimes by abbreviation the words of the original come to be differently applied. Thus in 1 Co 14^{21} [Is $28^{11.\,12}$] the words represented by κ. οὐδ' οὕτως εἰσακούσονταί μου are made to refer to 'other tongues,' etc., instead of to the refusal to listen to the words of kindness spoken by God through the prophet to which the 'other tongues' stand in direct contrast. In Ac 3^{22} the phrase κατὰ πάντα ὅσα is applied quite differently from its original in Dt 18^{16}. In 1 P $3^{14.\,15}$ [Is $8^{12.\,13}$], by changing αὐτόν to τ. Χριστόν, the words are applied to those addressed in the Epistle, but the passage is not cited as a quotation. Even supposing that such changes were to a large extent unconscious, there is enough to show that the writers of NT allowed themselves the greatest freedom in their treatment of the language of OT.

F. *Combined Quotations.*—These are far commoner than is often realized, and are of various kinds. Frequently we find several passages strung together consecutively, as Ro 3^{10-18}, where there are six separate quotations so combined; cf. He 1^{5-14} etc. In Mk 11^{17} (Mt 21^{13}, Lk 19^{46}) a direct quotation from Is 56^{7} is followed by an allusion to Jer 7^{11}. So far had they been from fulfilling Isaiah's prophecy, that they were acting in the spirit of Jeremiah's contemporaries. Still more frequently different quotations are mixed together. Thus in Ro 9^{33}, St. Paul, probably quoting from his recollection of the Heb., mixed together the sayings about the stone in Is 8^{14} and in 28^{16}, giving the latter, by so doing, a sense *contrary to the original*; or the mixture may have been intentional. However precious Christ was to those who believed, He would prove to many merely a rock of stumbling. For the somewhat similar combination of Is 28^{16}, Ps 118^{22}, and Is 8^{14} in 1 P $2^{6.\,7}$ see H, *c*. More often the combination suggests that the quotation is made from memory, as Gal 3^{8} from Gn 12^{3} 18^{18}, Ac 3^{25} from Gn 22^{18} 12^{3}, Jn 19^{36} from Ex 12^{46} and Ps 34^{20}. The seven words of Jn 6^{31} seem derived from three distinct sources (Ps 78^{24}, Ex 16^{15} 16^{4}), and Ac 13^{22} from at least four (Ps 89^{20}, 1 S 17^{58} 13^{14} 2^{35}). Very frequently a mere phrase or even a word is inserted from a similar passage. Thus in Mt 21^{5} in a quotation from Zec 9^{9} the opening words εἴπατε τ. θυγατρὶ Σιών are from Is 62^{11}. Curiously enough, in the same quotation St. John ($12^{14.\,15}$) begins with μὴ φοβοῦ, apparently from Is 40^{9} (Heb.). In Lk $4^{18.\,19}$ [Is

$42^{1.2}$] *ἀποστεῖλαι τεθραυσμένους ἐν ἀφέσει* is adapted from Is 58^{6} (LXX). In Ac $3^{22.23}$ [Dt $18^{15.16.18.19}$] *ψυχὴ . . . ἐξολοθρευθήσεται ἐκ τ. λαοῦ* is substituted from Lv 17^{4}, this and similar phrases being common and easily remembered. In Ac $7^{6.7}$ [Gn $15^{13.14}$] *ἀλλοτρίᾳ* is from Ex 2^{22}. In Ac $7^{33.34}$ [Ex $3^{5.7.8.10}$] *στεναγμοῦ* is from Ex 2^{24}. In Ro $11^{26.27}$ [Is $59^{20.21}$] *ὅταν ἀφέλωμαι τὰς ἁμαρτίας αὐτῶν* is slightly altered from Is 27^{9}.

G. *Paraphrastic Quotations* (see also D and E, *d*).—In some cases the language of a passage of OT is merely paraphrased to express some new thought, as in Ro 10^{6-8}, which is based upon Dt 30^{12-14}. Here the original *εἰς τ. πέραν τ. θαλάσσης* is changed to *εἰς τ. ἄβυσσον*, to express the contrast between the descent of Christ in the Incarnation, etc., and His Resurrection, and thus to show that the inward revelation spoken of in Deut. was made possible by Christ and through faith in Him. Certain quotations are believed to be merely references to the general tenor of Scripture, as Jn 7^{38}, which some, on the other hand, regard as a paraphrase of such passages as Is 58^{11}. Similarly, Eph 5^{14} may possibly be a paraphrase of Is $60^{1.19.20}$. Some have supposed Ja 4^{5} to be a paraphrase of some such passage as Wis $6^{11.23}$, but most commentators take the words as a rhetorical question by St. James (as RV). On Mt $2^{6.23}$ see D.

H. *Indirect Quotations* (see also D).—It is quite possible that quotations, even though avowedly from Scripture, were taken *directly* from some other source. The possibility of that in 1 Co 2^{9} being from some Aram. document has been already suggested under D. It may here be further noticed that the awkwardness of the construction, unsuited to the context, makes it likely that St. Paul is quoting it as he found it ready to hand, not himself adapting it from the original. It has been thought by some that Eph 5^{14} may be a quotation from some early Christian document, but the words *διὸ λέγει* make this improbable (see G). It is also remarkable that some quotations are made with the same variants by different writers, or by the same writer twice. (*a*) In some cases the variant may be looked upon as traditional, as the omission of *μοῦ* [Hab 2^{4}] in Ro 1^{17}, Gal 3^{11}, and probably the order of the commandments in Mk 10^{19} (?), Ro 13^{9}—adultery, murder, theft—for adultery, theft, murder of Ex $20^{13ff.}$ (LXX), or murder, adultery, theft of Dt 5^{17-19} (LXX) and of both (Hebrew). (*b*) In other cases the agreement may be a coincidence. Thus Mt 18^{16}, 2 Co 13^{1} abbreviate Dt 19^{15} (LXX) in nearly the same language. This possibly had become almost a proverb. (*c*) The agreement may point to a variant in Heb., as Ro 9^{33} (10^{11}), or in LXX, as Mk 12^{26}, Ac 7^{32} (see J, *a*, *b*). (*d*) In other cases, again, one writer has presumably copied another. Thus Mt and Lk retain many of the peculiarities of the quotations of Mk. It seems likely also that 1 P $2^{6.7}$ was influenced by Ro 9^{33}. Both agree (1) in the combination of Is 28^{16} and 8^{14}; (2) in the reading *ἰδοὺ τίθημι* (against LXX), which can hardly be an independent translation of Heb., because, whereas St. Paul's mixed quotation is from Heb. throughout (see F), St. Peter, except when he agrees with St. Paul, follows LXX. The agreement of Ro 12^{19} and He 10^{30} with MT לִי for לְיוֹם of LXX and Sam. Pent., proves that the writer of Hebrews, who shows otherwise no knowledge of Heb., must have copied the quotations either from Romans or from some intermediate source. There are no variants of LXX. Still more remarkable is the quotation of Pr 10^{12} in 1 P 4^{8} as compared with Ja 5^{20}. In 1 P it is evidently a rather curious and independent rendering of Heb. (כֹּל being translated by *πλῆθος*); the LXX is quite different. In James we have obviously a reference to this very translation. If, as is generally believed, James is earlier than 1 P, both quotations and reference are derived from some other document. (*e*) When a writer quotes a passage twice with the same variant, as in Ro 9^{33} 10^{11}, He 8^{10} 10^{16} (omission of *δώσω*), the most probable explanation is that he consciously or unconsciously copied his own correction.

I. *Manner of quotation in different books* (*or sources*) *of NT.*—(*a*) *Synoptic Tradition.* (1) In Mk out of 20 quotations (excluding reference in 12^{19}), of which all but one are sayings of our Lord, 16 are either exact, or very slightly altered, quotations of LXX. Of the remaining four 1^{2b} is probably an early interpolation into Synoptic tradition, not being in the corresponding place in either Mt or Lk, and breaking the obvious connexion between 1^{2a} and 1^{3}; Mk $12^{29.30}$ [Dt $6^{4.5}$] is the great שְׁמַע, which from its frequent use in devotion was probably known to Greek Jews in its Heb. form, and was hence independently translated; 14^{27} contains words of Christ which, if quoted as in LXX, would have lost all point; in 15^{34} we have words of Christ in their original Hebrew-Aramaic form. The following translation, though influenced by LXX, aims at greater literalness (*εἰς τί* for *ἵνα τί*, repetition of *μου*, non-addition of the curious *πρόσχες μοι*). It seems that the writer, while he had received and retained a few sayings of our Lord as actually uttered, generally used LXX as a matter of course. (2) Mt reproduces *all* the Synoptic quotations, except the doubtful Mk 1^{2b}, and very nearly as he finds them, but with a slight tendency (perhaps unconscious) to assimilate to LXX, Heb., or Aram., as perhaps in 19^{18} (order of LXX in Dt, of LXX and Heb. in Ex and Dt), 22^{32} (+ *εἰμι* LXX), 22^{37} (*ἐν* = Heb. ב for *ἐξ*; *διανοίᾳ*, a LXX transl. of לֵבָב for *ἰσχύος*), 22^{44} (*κάθου* LXX), 27^{46} (אֵלִי (?) Heb. and Aram. for אֱלֹהַי; לְמָה (?) Aram. for Heb. לָמָּה). The following translation is a little less bold, as also the reference to Dt 25^{5} in 22^{24}. (3) Lk out of 19 Synoptic quotations (excluding Mk 1^{2b}, which Lk has in quite a different connexion) omits 8 and treats the rest with greater freedom, chiefly for literary reasons, as 3^{4-6} (where the continuation of the quotation increases the rhetorical effect. See also E, *c*). For the same purpose he abridges in 8^{10} 10^{27} 20^{17} 18^{20} 19^{46}. In the last he, *so far only*, agrees with Mt. In 10^{27} he apparently combines Mk $12^{29.30}$ and Mt 22^{37}, reading *ἐξ . . . καρδίας* and *ἐν . . . ψυχῇ*, etc., and both *ἰσχύϊ* and *διανοίᾳ*. 20^{17} is altered so as to agree exactly with LXX. The word *κάθου* in 20^{43}, though also in Mt, probably comes therefore from the same source. (*b*) *The portions common to Mt and Lk and not to Mk.* Quotations are found only in the account of the Temptation (Mt $4^{4.6.7.10}$, Lk $4^{4.10.11.12.8}$), and are based in both on LXX. The 1st quotation is exact in Lk, in Mt longer, and *part only*, that not common with Lk, varies from LXX; the 2nd is abbreviated in both, but esp. Mt, which omits the whole clause *τοῦ διαφυλάξαι σε—ὁδοῖς σοῦ*, Lk retaining the first three words. Both split up the quotation into two parts, Mt adding *καὶ* before *ἐπὶ*, Lk *καὶ ὅτι*. The third is exact in both. In the fourth *both* substitute *προσκυνήσεις* for *φοβηθήσῃ*. The kind of assimilation thus exhibited, in connexion with the difference in the order of the temptations, suggests that in both the quotations were taken, not from LXX, but from some other common source, probably preserved by oral tradition. (*c*) *Original quotations of Mt.* These exhibit considerable variety of character, 3 only (27^{35b} is an interpolation from Jn 19^{24}) being derived from LXX, 21^{16} [Ps 8^{2}] exactly, where Heb. עֹז was inappropriate, or at least ambiguous; 1^{23} [Is 7^{14}] (notice, besides the doubtful *παρθένος*, *ἐν γαστρί*, *Ἐμμανουήλ* so spelt) with several alterations, probably through fault of memory; 18^{16} (adds *πᾶν* before *ῥῆμα*) much abridged. The rest are from the Heb., as 2^{15} 8^{17}, though often showing the influence of LXX (see A, *d*), as 2^{18} 11^{10} 12^{18-21} 13^{35} 21^{5}; and often very singularly paraphrased, as 2^{6} 2^{23} $27^{9.10}$ (see D; E, *d*). (*d*) *Quotations of a 'Gospel of the Infancy'* (originally Aramaic?). Lk 2^{24} is, curiously enough, an exact quotation from LXX, though from Lv 5^{11}, not Lv 12^{8}, the passage actually referred to, and is probably an insertion by St. Luke into the earlier translation of an original Aram. document; 1^{17} is a paraphrastic reference to Mal $4^{5.6}$ 3^{1}, based on Heb. (see B); 2^{23} depends apparently on a variant of Heb. (see J, *a*). (*e*) *The Original quotations of Lk*, 4^{18} and 23^{46}, are both from LXX; the first a combination of Is $61^{1.2}$ 58^{6}, with a slight change of order and construction, the second with necessary alteration of the text. (*f*) *St. John's Gospel.* Quotations are marked by brevity and freedom, with a tendency to attach more importance to mystical and hidden meanings than to the literal sense of the words; usually from LXX, as $10^{3.4}$ 12^{38}, but occasionally from Heb., as 13^{18} 19^{37} (see B), in both of which differences between LXX and Heb. are very great; but often so unlike either as to make it uncertain which the writer had in his mind, as 12^{40} (*ἰάσομαι* LXX, but see J, *a*). On 7^{38} see G. Combined quotations are frequent (see F), as 6^{31} $12^{14.15}$ 15^{25} [Ps 35^{19} or 69^{4} and 109^{3}] 19^{36}. There are only 4 quotations common to any of the Synoptists, 1^{23} 8^{17} 12^{15} 12^{40} (Mt 27^{35} is spurious); of these the second and third to Mt only. In all there is an independent rendering, and in 12^{15} a different combination. (*g*) *The Acts.* Quotations are all from LXX, often quite exact, as in the long quotations, 2^{25-28} $2^{34.35}$; though differing greatly from Heb., as $7^{42.43}$; sometimes following a different text, as $15^{16.17}$ (see A, *a* (1) (2)); frequently abbreviated, as 1^{20} $3^{22.23}$ 7^{40} 13^{34} 13^{41} $15^{16.17}$; sometimes expanded, as 2^{17-21} (for literary effect), and often combined, as 3^{25} 13^{22} etc. (see F). On $7^{42.43}$ see E, *a*. (*h*) *St. Paul's Epistles.* Quotations are usually from LXX, as Ro $9^{27.28}$, but knowledge is shown of Heb., as Ro 9^{17} (see B, *b*) 10^{15} (*ὡραῖοι*) 11^{4} 12^{19}. In Ro, and to a less extent in 1 Co, the quotations from Pent. and Ps are very largely exact from LXX; those from the prophetical and historical books vary considerably from LXX, are usually free, but often contain elements from Hebrew. It would seem probable that the former are usually *copied* from LXX, the rest *quoted memoriter*. In Ro, out of 31 quotations from Pent. and Ps, only 9 are not practically exact, and of those 10^{6-8} is a mere paraphrase, and Ro 9^{17} 12^{19} are intentionally taken from Heb.; out of 22 quotations from hist. and proph. books only 3 are exact. In 1 Co, out of 9 quotations from Pent. and Ps, 4 are exact; out of 9 from hist. and proph. books, only one. The change of *ἀνθρώπων* to *σοφῶν* in 3^{20} [Ps 94^{11}], though difficult, is probably intentional (see E, *d*). The distinction here pointed out is remarkably illustrated in Ro 3^{10-18}, where the single quotation from Is ($59^{7.8}$, Pr 1^{16} is not in LXX) has 2 important variants from LXX, *ὀξεῖς* (LXX *ταχινοί*) and *ἔγνωσαν* (LXX *οἴδασιν*), suggesting a *memoriter* quotation, whereas the 5 quotations from Ps are practically exact from LXX. In Ro 3^{10}, Ec 7^{20} is combined, by probably a slip of memory, with the phrase *οὐδὲ εἷς* from Ps 14^{3} or 53^{3} (Heb. LXX has *οὐκ ἔστιν ἕως ἑνός*). Of the other Hagiographa, Pr $25^{21.22a}$ is quoted from LXX exactly in Ro 12^{20}, Job 5^{13} from Heb. in 1 Co 3^{19}. For the remarkable quotation in 1 Co 2^{9} see H. In the other Epistles the quotations are too few to make any satisfactory generalizations possible. On Eph 4^{8} 5^{14} see E, *d*, and G, H. (*i*) *Epistle to the Hebrews.* With the exception of 10^{30} (see H), quotations are all from LXX, very numerous and generally exact, suggesting that variations are either intentional alterations, as 8^{10} (10^{16}) 10^{38} (see E, *c*, *d*), or errors of transcription, as 3^{9} (see E, *b*). We have, however, most probably memoriter quotations in 9^{20}, where *τοῦτο* for *ἰδού* looks like an unconscious imitation of the words of institution (cf. Mk 14^{24} etc.), and 12^{20}, where *θηρίον* for *κτῆνος* can hardly be regarded as an independent translation of בְּהֵמָה. (*j*) *St. James.* Of six possible quotations, three, 2^{8} 2^{23} 4^{6}, are certainly from LXX, and nearly exact; 2^{11} may possibly be an independent translation of Heb.; 5^{20} is certainly so, but is probably from some intermediate source (see H); 4^{5}, if a quotation at all, is from an unknown source (see G). (*k*) *First Ep. of St. Peter.* Though quotations are taken partly, but seldom very exactly, from LXX, as 2^{9} 3^{10-12} $3^{14.15}$ (see E, *d*), the influence of the Heb. is frequently apparent, as $1^{24.25}$ [Is 40^{6-8}] (*αὐτῆς* for *ἀνθρώπου* of LXX), 2^{22} [Is 53^{9}] (*εὑρέθη δόλος* for *δόλον*), 4^{8} (where LXX is quite different, but see H). $2^{6.7}$ is probably connected, directly or indirectly, with Ro 9^{33}, and proves little (see H). (*l*) *Second Ep. of St. Peter.* The only quotation, 2^{22}, is from Heb., nearly every word differing from LXX. (*m*) *The Apocalypse* contains no definite quotations, but is full of the thoughts and ideas and even language of OT. This last seems in general to point to Heb. rather than to LXX, as in 1^{6}, where *βασιλείαν, ἱερεῖς* is evidently a translation of מַמְלֶכֶת כֹּהֲנִים Ex 19^{6} (LXX has *βασίλειον ἱεράτευμα*), 1^{7} (*μετά*, with Aram. of Dn 7^{13}, for LXX *ἐπί*; *οἵτινες αὐτὸν ἐξεκέντησαν*, from Zec 12^{10}, for *ἀνθ' ὧν κατωρχήσαντο*, cf. Jn 19^{37}), 1^{15} (suggested by Dn 10^{6}) which has no special LXX word. So 11^{4} (cf. Zec $4^{2.3.14}$) 14^{8} [cf. Is 21^{9}] 14^{8} [cf. Jl 3^{13}]. In 6^{15} we find the phrase *πᾶς δοῦλος καὶ ἐλεύθερος* instead of *συνεχόμενος κ. ἐγκαταλελειμμένος* of 1 K 21^{21} (LXX 20^{21}). On the other hand, there are some signs of direct or indirect LXX influence, as in 2^{7} (*παραδείσῳ*, Gn 2^{8} etc.) 6^{14} (*βιβλίον*, cf. Is 34^{4} LXX) 18^{2} (*δαιμονίων*, cf. Is 13^{21} LXX), etc.

J. *The bearing of NT quotations on textual criticism.*—(*a*) When a quotation agrees with Heb. but has a single word or phrase agreeing with LXX, this may have come, not from LXX itself, but *from a various reading of Heb.*, followed also by LXX. Thus in Jn 12^{40} *ἰάσωμαι* may point to a variant אֶרְפָּא for רָפָא. In Mt 12^{21} the words *κ. ἐν τ. ὀνόματι αὐτοῦ ἔθνη ἐλπιοῦσι*, agreeing exactly with LXX (though so different from Heb.), whereas all the earlier part of the quotation follows a totally different rendering of Heb., may point to בִּשְׁמוֹ גּוֹיִם יְיַחֵלוּ; but see A, *d*. Even where a quotation differs more or less from both LXX and Heb. the difference may have arisen from a various readiug of the latter. Thus in Mt 2^{6} *ἡγεμόσιν* is often referred to a reading אַלּוּפֵי for אַלְפֵי (see D). Lk 2^{23} points to a reading יְקֻדַּשׁ לִי כָּל־זָכָר for קַדֶּשׁ־לִי כָל־בְּכוֹר; Ro 9^{33} [Is 28^{16}] (10^{11}) to הַמַּאֲמִין לוֹ לֹא יֵבוֹשׁ for הַמַּאֲמִין לֹא יָחִישׁ. Even if the insertion of לוֹ is merely a mental error, it shows that St. Paul had the Hebrew in his mind, and therefore got *καταισχυνθήσεται*, not from LXX *καταισχυνθῇ*, but from יֵבוֹשׁ, which LXX also reads. Mt $27^{9.10}$ may have been based on a text reading אֶל בֵּית הַיֹּצֵר, with 590, 168, 251, K 2, R, for אֶל הַיּוֹצֵר (but see E, *d*), and possibly " כִּדְבַר for " בֵּית. It is important also to notice that Mt does not support the otherwise probable reading of אוֹצָר 'treasury' for יֹצֵר 'potter.' 1 Co 2^{9} seems originally due to a difference of text, שָׁמְעָה הָאֹזֶן for שָׁמְעוּ לֹא הֶאֱזִינוּ, זוּ עָשָׂה אֱלֹהִים for אֱלֹהִים זוּלָתְךָ יַעֲשֶׂה, and לְמַחֲבַב for לִמְחַכֵּה (see D) (on Mt 2^{6} see D, and on Mt 12^{21} see A, *d*). (*b*) When a quotation follows LXX almost exactly, but agrees with Heb. in a word or phrase, it raises the suspicion that it follows *a different reading of LXX*, as in Ac 13^{47} [Is 49^{6}] (*τέθεικα* for *δέδωκα* of LXX, and omission of εἰς διαθήκην γένους, which is apparently an interpolation from Is 49[8]); in Mk 12[26], Ac 7[32] (omission of εἰμι; the ultra-Hellenistic speech of St. Stephen is the last place to suspect the influence of Heb. text). The mere fact of a certain number of MSS of LXX agreeing with a quotation is of practically no importance, because they were so frequently altered into agreement with NT quotations. We have the most striking example in Ps 14[3] (13[3] LXX), where the whole cento of quotations in Ro 3[13-18] has found its way into B and some other MSS of LXX, and hence through the Vulg. into the English Prayer-Book Psalter. (*c*) It is just possible that quotations may throw light on questions connected with the text of NT itself, as He 3[9]; see E, *b*.

ii. QUOTATIONS IN NT FROM THE APOCRYPHA AND PSEUDEPIGRAPHICAL JEWISH LITERATURE.—These are not cited as Scripture, and with the exception of Jude [14] [*Bk. of Enoch* i. 9, tr. by R. H. Charles, Oxford] are not directly cited at all; but there are several references, such as in Lk 12[16-20] (cf. Sir 11[18. 19]) 14[7-10] (cf. Sir 13[9. 10]), Jn 6[35] (cf. Sir 24[21]), Ro 12[15] (cf. Sir 7[34]), He 1[3] (Wis 7[26]) 4[12. 13] (cf. Wis 7[22-29]), Ja 1[19] (Sir 5[11]).

iii. QUOTATIONS FROM PAGAN WRITERS.—These are very few, and not always easily recognized. Thus that of Ac 17[28b] is found both in Aratus, *Phænom.* 5, and in the *hymn* of Cleanthes *to Zeus*, 5. The quotation in 1 Co 15[33] is mentioned by Lucian, *Am.* 43, as a saying of Menander from his *Thais*. The quotation of Tit 1[12] is said by early Christian writers to come from a lost work of Epimenides, called περὶ χρησμῶν, but is now found in the *hymn* of Callimachus (an Alexandrian poet of 3rd cent. B.C.) *to Zeus*, 8. In 1 Co 12[12-27] we have probably a reference to the fable of Menenius Agrippa. But it is very uncertain whether these quotations, etc., point to a wide knowledge of pagan literature on St. Paul's part, or would not rather from their proverbial character have been generally known by men of very moderate culture (see Farrar's *Life of St. Paul*, vol. i. Exc. iii.).

LITERATURE.—Turpie, *The OT in the New* is, in spite of the one-sided aims of the writer and many inaccuracies, a very useful book when used with proper reference to good critical editions and commentaries, and has been of great service in writing this article. The quotations of OT are taken from *OT in Greek*, edited by H. B. Swete, Cambridge, those of NT usually from the revised text of Greek Test., Oxford. See also L. Cappellus, *Quæst. de loc. parall. Vet. et Nov. Test.* 1650; Surenhusius, ספר המשיר *sive* βίβλος καταλλαγῆς, 1713; Roepe, *de Vet. Test. Loc. in apost. libr. allegatione*, 1827; Tholuck, *Das Alt. Test. i. NT*³, 1849; Kautzsch, *de Vet. Test. loc. a Paulo allegatis*, 1869; C. Taylor, *The Gospel in the Law*, 1869; Monnet, *Les citations de l'anc. test. d. les ép. de S. Paul*, 1874; Böhl, *AT Citate in NT*, 1878; Toy, *Quotations in the NT*, 1884; Vollmer, *Die AT Citate bei Paulus*, 1895; Johnson, *The Quotations of the New Test. from the Old*, 1896; Dittmar, *Vetus Test. in Novo*, i. 1899; cf. also Jowett, *St. Paul's Epistles*³, 1894, vol. i. 185 ff.; Swete, *Introd. to Old Test. in Greek*, 1900, p. 381 ff.; and Thackeray, *St. Paul and Contemp. Jewish Thought*, 1900, p. 181 ff.; and for special NT books, Allen, 'The OT Quotations in St. Mark' in *Expos. Times*, Jan. 1901 (xii. 187), and 'The OT Quotations in St. Matthew,' *Expos. Times*, March 1901 (xii. 281); Lightfoot, *Notes on Epistles of St. Paul*, pp. 176 ff., 216 f.; Westcott, *Hebrews*, p. 67 ff.; Mayor, *James*, p. lxix ff. The subject is dealt with in all the Manuals for Bible study.

F. H. WOODS.

R

RAAMA (רַעְמָא only 1 Ch 1[9]) or **RAAMAH** (רַעְמָה).—Son of Cush and father of Sheba (Saba) and Dedan (Gn 10[7], 1 Ch 1[9]), also mentioned by Ezekiel (27[22]) as a trading community by the side of Sheba. The LXX (in Gn A Ῥεγχμά; in 1 Ch BA Ῥεγμά; in Ezk B Ῥαμά, AQ Ῥαγμά) identified the word with *Regma*, mentioned as a *city* by Ptolemy (vi. 7, 14) on the Persian Gulf, which is probably identical with Regma, which Steph. Byz. (ed. Westermann, p. 242) describes as a city or a *gulf* in the Persian Gulf. This latter form of the word (in most MSS practically indistinguishable from the other) may very well be Greek, meaning 'breach.' The above identification is accepted by most authorities, including Glaser (*Skizze*, ii. 325), who adds, however (p. 252), that the name is spelt in inscriptions with a *jim*. It is at present impossible to say whether there is any connexion between the place mentioned by the Greek geographers and the tribe mentioned in Genesis or not. Dillmann thinks Raama may be the Ῥαμμανῖται of Strabo (XVI. iv. 24), in S. Arabia, N.W. of *Chatramotitæ* (=Ḥaḍramaut; see HAZARMAVETH).

D. S. MARGOLIOUTH.

RAAMIAH (רַעַמְיָה; B Νααμιά, A Ῥεελμά).—One of the twelve chiefs who returned with Zerubbabel, Neh 7[7]. In the parallel passage, Ezr 2[2], the name is Reelaiah (רְעֵלָיָה, B Ῥεελειά, A Ῥεελίας), and in 1 Es 5[8] RESAIAS (which see). It is impossible to decide with certainty what was the original reading, although רעליה probably represents it more nearly than רעמיה.

RAAMSES, RAMESES (רַעַמְסֵס Ex 1[11]; רַעְמְסֵס Gn 47[11], Ex 12[37]; LXX Ῥαμεσσή [D om. in Gn 47[11]]).—The city of Raamses was, like Pithom, built by the Israelites for the Pharaoh of the Oppression (Ex 1[11]), who has been shown by Dr. Naville's discovery of the site of Pithom to have been Ramses II. of the 19th dynasty (see PITHOM). It was from Raamses or Rameses that the Israelites started when they fled from Egypt; and as the next stage in their journey was Succoth (Ex 12[37]), Raamses could not have been far from Pithom. It must also have been in the land of Goshen, as is indeed expressly stated in Gn 47[11], where Goshen is called proleptically 'the land of Rameses.' According to LXX of Gn 46[28] 'the land of Rameses' [D om.] included also Heroopolis or Pithom.

Qosem or Goshen was the capital of the 20th nome of Lower Egypt, and is now represented by Saft el-Henna, at the western end of the Wady Tumilât, north of Belbês, and a little to the east of Zagazig. The 8th nome, of which Pithom was the capital, adjoined the 20th to the east. We should therefore probably look for the site of Raamses somewhere between Belbês and Tel el-Maskhûta. The latter was identified with Raamses by Lepsius, and the identification was perpetuated for a time in the name of Ramses given to the place by the French engineers during the construction of the Fresh-water Canal. Dr. Naville's excavations proved, however, that Tel el-Maskhûta is Pithom, and consequently the site of Raamses must be sought elsewhere.

The city is mentioned in the Egyptian texts. We learn from them that it was built, like Pithom, by Ramses II., from whom it derived its name; and a letter of the scribe Panbesa, translated by Brugsch (*History of Egypt*, Eng. tr. ii. pp. 96–98) and Goodwin (*RP*, 1st ser. vi. p. 11 ff.), gives a long and glowing description of it. Its canals are said to be 'rich in fish, its lakes swarm with birds, its meadows are green with vegetables.' The canal on the banks of which it stood communicated with the sea, and was called Pa-shet-Hor, 'the mere of Horns.' Brugsch at one time wished to identify it with Tanis (Zoan), where there seems to have been a Pi-Ramessu or 'temple of Ramses,' erected by Ramses II., but the discovery of the position of Pithom obliged him to change his mind. An unedited papyrus in the possession of M. Golénischeff, moreover, distinguishes it from Tanis, and places it between Tanis and Zaru (on the eastern frontier) in a list of the towns of the Delta. 'The land of Rameses' seems to have taken its name from the city.

LITERATURE.—Jacques de Rougé, *Géographie ancienne de la Basse-Égypte*, 1891; H. Brugsch, *Dictionnaire géographique de l'ancienne Égypte*, 1879; Dillmann-Ryssel on Ex 1^{11}; Driver in Hogarth's *Authority and Archæology*, 1899, p. 55; Ball, *Light from the East*, p. 109 f. A. H. SAYCE.

RABBAH.—1. (רַבָּה; Jos 13^{25} B Ἀράδ, A Ῥαββά; 2 S 11^{1} $12^{27.29}$ Ῥαββάθ; 1 Ch 20^{1} Ῥαββάν; Am 1^{14} Ῥαββά; Jer 49[30]^{3} Ῥαββάθ; Ezk 25^{5} *τὴν πόλιν τοῦ* Ἀμμών), or more fully **Rabbath-benē-Ammon** = 'Rabbah of the children of Ammon' (רַבַּת בְּנֵי עַמּוֹן; Dt 3^{11} *ἡ ἄκρα τῶν υἱῶν* Ἀμμών; 2 S 12^{26} 17^{27}, Ezk 21^{20} Ῥα(β)βὰθ *υἱῶν* Ἀμμών, Jer 49[30]^{2} Ῥαββάθ). The chief and, in fact, the only city of the Ammonites mentioned in the OT. It was situated about 25 miles N.E. of the north end of the Dead Sea, in the fruitful valley which forms the upper course of the Jabbok (*ez-Zerḳa*), now called the *Wādy 'Ammān* (Buhl, *GAP* 48, 260 f.). Under Ptolemy II. (Philadelphus) the city was rebuilt and called Philadelphia, but the original name seems never to have been completely lost, and is still preserved in the modern *'Ammān*.

Apart from the isolated notice in Dt 3^{11}, where a passing reference is made to it as the site of the bed or sarcophagus of Og king of Bashan, and the statement in Jos 13^{25} that it lay outside the eastern border of the tribe of Gad on the east of Jordan, no allusion is made in the OT to the capital of the Ammonites until the reign of David. According to the narrative of 2 S 10^{1}–11^{1} 12^{26-31} (which appears in a condensed and less accurate form in $8^{2\text{f.}}$, see SAMUEL, BOOKS OF) an embassy was sent by David to condole with Hanun king of Ammon on the death of his father Nahash. The envoys, however, were grossly insulted by the Ammonite king and his servants, who, in view of the growing power of the Israelite monarch, were inclined, perhaps not unnaturally, to suspect the motives of his embassy. This treatment of the envoys could have but one result, and the Ammonites therefore at once summoned to their aid those southern tribes of the Aramæans who were their more immediate neighbours on the east of Jordan. Meantime the Israelite army, under the command of Joab, had lost no time in invading the country of the Ammonites. Their intention, doubtless, was to lay siege to Rabbah itself; for though he was aware (2 S 10^{7}) of the alliance between the Ammonites and Aramæans, Joab does not appear to have realized either the strength or the position of the Aramæan force that was opposed to him, until he had actually come within striking distance of the Ammonite capital (vv.$^{8.9}$). The Aramæans, however, as we learn from the Chronicler (1 Ch 19^{7}), had penetrated as far south as Medeba, and now threatened to cut off his retreat across the Jordan. Thus hemmed in 'before and behind,' Joab perceived that his only hope of safety lay in assuming the offensive. He therefore divided his army into two, and, having entrusted Abishai with the task of holding the Ammonites in check, himself led 'all the picked men of Israel' in an attack on the more powerful Aramæans. The combined movement was completely successful: the Aramæans fled discomfited, and their example was soon followed by the Ammonites, who took refuge in Rabbah. Joab, however, did not follow up his advantage, but retired with the army to Jerusalem. In the following year David took the field in person against the Aramæans, who had reassembled under Shobach, captain of the host of Hadadezer, at Helam (probably not far from Damascus), and defeated them with great slaughter (vv.$^{15-19}$). The way was now clear for the renewal of the war with the Ammonites, and Joab, with the whole army and the ark (11^{11}), was despatched across the Jordan to ravage the land of the Ammonites, and to lay siege to Rabbah (11^{1}). If, as the biblical narrative seems to imply, both the sons of Bathsheba were born during this period, the siege of Rabbah must have lasted nearly two years. The aim of the besiegers was doubtless to starve out the city, rather than to take it by storm ($11^{20.21}$): the actual fighting was probably confined to the occasions on which the beleaguered garrison attempted a sortie. It was by exposing Uriah the Hittite to one of these sallies that Joab was able to effect David's plan for getting rid of the former (vv.$^{15-17}$).

The fate of the city was finally sealed by the capture of the spring of water from which the inhabitants derived their water supply (12^{27} reading עֵין הַמַּיִם 'spring of waters' for עִיר הַמַּיִם 'city of waters,' so Klostermann; but see Cheyne [*Expos. Times*, vol. ix. p. 143 f.], who would read here and in the preceding verse עִיר מִלְכֹּם 'the city of Milcom'): only in this way can we harmonize Joab's message (v.$^{27\text{f.}}$) with the phrase 'the royal city' (עִיר הַמְּלוּכָה) in v.^{26}. By the latter phrase is probably meant the royal castle or citadel, situated at the apex of the lofty triangular plateau, which seems to have formed the site of the ancient Rabbah. 'The two sides are bounded by wādies which diverge from the apex, where they are divided by a low neck of land, and thence separating, fall into the valley of the Jabbok, which forms the base of the triangle' (Oliphant, *The Land of Gilead*, p. 259 f.). The precipitous character of the wādis—on the one side there is a drop of 300 ft., on the other of 400 ft.—precluded any access to the streams below, save at the (? artificial) depression which separated the citadel from the rest of the city. Hence the capture of the latter virtually placed the city at the mercy of Joab, and assured him of its speedy downfall.* He thereupon despatched messengers to David, bidding him collect the rest of his forces, and superintend the final assault of the city, 'lest,' he adds, 'I take the city, and my name be called upon it'—in token, namely, of its conquest by him. (See, further, on this passage, vol. i. p. 344^{a}). David at once responded to Joab's appeal, and shortly after his arrival the city was taken, together with much spoil, including the crown of Milcom (LXX), the god of the Ammonites. (For a full discussion of the treatment of the inhabitants of Rabbah by David, see Driver, *Notes on Samuel*, pp. 226–229).

From the few scattered notices of Rabbah in the writings of the prophets from the 8th cent. onwards, we gather that the city once more reverted to the possession of the Ammonites. Thus Amos, in his denunciation of Ammon ($1^{14\text{f.}}$), prophesies the destruction of the wall and palaces of Rabbah, while similar language is used by Jeremiah ($49^{2.3}$) shortly before the siege of Jerusalem, and by Ezekiel (25^{5}). It is noticeable that the latter regards Rabbah as no less important politically than Jerusalem itself (21^{20} [Heb.^{25}]).

---

* The reading of the Hebrew text 'city of waters' is usually explained as referring to the lower town. But (1) the phrase itself is an unlikely one to be applied to a *part* of the city, (2) there is no reference elsewhere to a division of the city, and (3) the explanation seems due to the present condition of the ruins of *'Ammān*, which date, at earliest, from Roman times.

In the 3rd cent. B.C. Rabbah was still a place of considerable importance. After its capture by Ptolemy Philadelphus (B.C. 285–247) it was called Philadelphia, and the surrounding district Philadelphene or Arabia Philadelphensis (Ritter, *Die Erdkunde*, xv. pt. ii. p. 1154 f.). According to Polybius (v. 71), the city underwent a severe and protracted siege under Antiochus the Great, who succeeded in capturing it only through the agency of a captive. The latter revealed the existence of the subterranean passage by which the garrison of the citadel obtained their water supply: the passage was accordingly blocked up, and the garrison forced to surrender. The same authority makes use of the old name *Rabbatamana* (Ῥαββατάμανα), while Stephen of Byzantium states that it was formerly called *Amana*, and afterwards *Astarte*. Josephus describes it as the most easterly border-town of Peræa (*BJ* III. iii. 3), and Strabo especially notes it as one of the localities inhabited by a mixed population. It formed one of the cities of the Decapolis, and in the middle of the 4th cent. Ammianus Marcellinus classes it with Bostra and Gerasa as one of the fortified great cities of Cœle-Syria (Ritter, *l.c.*). Philadelphia, later, became the seat of a Christian bishop, forming one of the nineteen sees of 'Palæstina tertia' (Reland, *Pal.* 228). Of the Arabic geographers, Mukaddasi (A.D. 985) describes 'Ammān as the capital of the Belkā district, lying on the border of the desert. He mentions the castle of Goliath as situated on the hill overhanging the city, and containing the tomb of Uriah, over which is built a mosque. Yâkût (iii. 719), in A.D. 1225, mentions it as the city of the emperor Dakiyânûs (Decius): he further relates the Moslem legend, according to which 'Ammān, the founder of the city, was the son of Lot's brother ('Ammān = 'he who is of the uncle'). Abulfeda (A.D. 1321) also assigns the founding of the city to Lot (Guy le Strange, *Pal. under the Moslems*, p. 391 f.). Coins of the city exist with the head of Marcus Aurelius (A.D. 161–180) and the legend 'Philadelphia of Hercules of Cœle-Syria'; but, save for a few rude stone monuments, nothing remains in the way of architecture 'which can be referred with any certitude to a pre-Roman period' (see *Survey of E. Pal.* pp. 19–64, where a full description is given of the present site; see also Baedeker^{3} pp. 170–172; Merrill, *East of Jordan*, p. 398 f.).

2. (Jos 15^{60} הָרַבָּה; B Σωθηβά, A Ἀρεββά; *Arebba*). A city of Judah, apparently near Kiriath-jearim.

J. F. STENNING.

RABBI, RABBONI.—From רַב, primarily 'master' in contrast with slave (*Aboth* i. 3; *Sukka* ii. 9; *et al.*), was formed, by the addition of the pronominal suffix, רַבִּי (Ῥαββί, Ῥαββεί WH), 'my master,' the use of which as a title of respect by which teachers were addressed occurs first within the last century before the destruction of Jerusalem. The Mishna contains several instances of this mode of address (*Nedarim* ix. 5; *Rosh hashana* ii. 9; *Berachoth* ii. 5, 7; *et al.*). In a similar way was formed Rabboni (Ῥαββονί Mk 10^{51}, Ῥαββουνί Jn 20^{16}, Ῥαββουνεί WH) from רַבָּן or רִבּוֹן (used of God in *Taanith* iii. 8), an Aramaic form of the title used almost exclusively to designate the president of the Sanhedrin, if a descendant of Hillel, from the time of Gamaliel I. (*Aboth* i. 17). In later times the title of Rabbi appears to have been conferred officially upon such as were authorized in Palestine to decide ritual or legal questions (*Baba mezia* 86*a*; *Sanhedrin* 13*b*), the corresponding Babylonian title being Rab or Mar; but there is no evidence of its use in this sense before or in the time of Christ. Its suffix, however, quickly lost its specific force by a process of which parallels are afforded in several languages; and in the NT the word occurs simply as a courteous title of address. Rabboni is even more respectful; and in the two passages where it is used of Christ (Mk 10^{51} and Jn 20^{16}) the pronominal force may not have entirely disappeared. Neither word occurs in classical use, in the LXX or other Gr. version of the OT, or in the Apocrypha. In the NT the shorter title is applied to Christ in Mt $26^{25.49}$, Mk 9^{5} 11^{21} 14^{45}, Jn $1^{38.49}$ 3^{2} 4^{31} 6^{25} 9^{2} 11^{8}; to John Baptist in Jn 3^{26}; whilst in Mt $23^{7.8}$ Christ forbids His disciples to covet or use it. In Jn 1^{38} a parenthesis states its equivalence in meaning with διδάσκαλε, which is in turn cited in Jn 20^{16} as a synonym of Rabboni. RVm implicitly supports this explanation in Mt 23^{8}, where, however, the text reads καθηγητής, a word whose primary meaning of 'guide' naturally suggests that of 'teacher.' See, for further details and for literature, Schürer, *HJP* II. i. 315 ff., and cf. Dalman, *Worte Jesu*, 267, 272 ff.

R. W. MOSS.

RABBITH (הָרַבִּית with art.; B Δαβειρών, A Ῥαββώθ).—A town of Issachar (Jos 19^{20}), probably the modern *Râba*, on the south part of the range of Gilboa. See *SWP* vol. ii. sheet ix.; Mühlau in Riehm's *HWB* 1252; Guérin, *Samarie*, i. 336; Buhl, *GAP* 204.

C. R. CONDER.

RABBONI.—See RABBI.

RAB-MAG (רַב־מָג; B Ῥαβαμάθ, ℵ* Ῥα'μάτ, ℵ$^{c.a.(?)}$ Βαμάτ, A Ῥαβαμάκ, Q Ῥαβαμάγ [in Jer 39 $(46)^{13}$ Q^{mg} Ῥοβομόγ]; Vulg. *Rebmag*).—The title (as is now generally admitted) of a Babylonian official, apparently Nergal-sharezer, who was present at the taking of Jerusalem by Nebuchadnezzar in the 11th year of Zedekiah king of Judah, together with all the rest of the princes (Jer 39 [Gr. 46]^{3}) and all the chief officers (v.^{13}) of the king of Babylon. Whether the Nergal-sharezer who is here mentioned, and who apparently bears the title, be the Neriglissar of the Greeks, who came to the throne of Babylon in the year B.C. 560 (16 years later), is uncertain, but not by any means improbable. The explanation of the title Rab-mag is a matter of considerable uncertainty. Gesenius explains מָג as *magian*, 'the name of the priests and wise men among the Medes, Persians, and Babylonians' [the inclusion of the Babylonians was pardonable before the inscriptions were made out]. G. Rawlinson and others have compared the title Rab-mag with the Babylonian *Rubû êmga*, or, more correctly, *Rubû êmqu*; but this, apart from its improbability in consequence of the difference of form, cannot be the original of the term, as it is not a title in the true sense of the word—it simply means 'the deeply-wise prince.' Another etymology for the second element is that of Fried. Delitzsch (cf. also Siegfried-Stade and *Oxf. Heb. Lex.*), who suggests that it is the same as the Assyr. *maḫḫû*, 'soothsayer'; but the objections to this are the differing double consonant, and the absence of the compound *rab-maḫḫû*. The most probable of the proposed originals appears to the present writer and others to be the title *rab-mugi* (see Pinches in S. A. Smith's *Keilschrifttexte Asurbanipals*, Heft ii. 1887, p. 67, note to l. 89; Sayce, *HCM* p. 456; Winckler, *Orient. Litteraturztg.* 1898, p. 40). This word occurs in the text translated by Pinches (K 824, edge, 9) in the accusative (*muga*), and also in the oracles to Esarhaddon (*WAI* 61. l. 26*a*) in the phrase *atta ina libbi mugi*, 'thou (art) in the midst of the princes (?),' the two lines which follow being 'I (the goddess Ištar) in the midst of my flock (?) advance (and) rest.' A nasalized form, *rab mungi*, also occurs.

T. G. PINCHES.

RAB-SARIS (רַב־סָרִיס; B Ῥαφεὶς, A Ῥαβσαρεὶς, in 2 K 18^{17}; BA Ναβουσαρεὶς, ℵ* Ναβουσεεὶς, ℵ^{1}Q Ναβουσαρὶς, Q^{mg} Ῥαβσαρὶς, in Jer 39 [46]$^{3. 13}$; Vulg. *Rabsaris, Rabsares*).—This, like RAB-MAG, is now generally and rightly held to be a title, and not a name (see RV). **1.** An Assyrian officer who went with the Tartan and the Rab-shakeh, whilst Sennacherib was at Lachish, to demand on behalf of his royal master the surrender of Jerusalem, which was at the time besieged by the Assyrian forces (2 K 18^{17}). **2.** A Babylonian named Sarsechim [?; see art. NERGAL-SHAREZER], who, with 'all the princes' of Nebuchadnezzar, was present at the taking of Jerusalem by that king in the 11th year of Zedekiah king of Judah (Jer 39^{3}). **3.** A Babylonian named Nebushazban, who, after the taking of the city, gave authority, with other of the princes of Babylon who are mentioned, for the release and return of Jeremiah, thus enabling him to be taken home and to dwell with his own people (Jer 39^{13}).

The usual biblical explanation of the word is 'chief of the eunuchs,' or, perhaps with greater probability, 'chief eunuch,' an explanation that agrees with the information yielded by the other Semitic languages, Arabic and Aramaic having practically the same word with this meaning, and also verbs derived therefrom. The word סָרִיס, with its plural סָרִיסִים, is of frequent occurrence in the Hebrew, and not only means 'a eunuch,' but also 'courtier' in general, 'chamberlain.' In 2 K 25^{19} it indicates an officer who commanded a division of the army, and POTIPHAR, who was certainly a married man, is called the סָרִיס of Pharaoh in Gn 39^{1}. The Assyro-Babylonian inscriptions, however, do not furnish us with any word that contains this idea. A רבסרס, Rabsaris, named Nabû-šarra-uṣur, eponym for the year B.C. 683, is named on the tablet 81-2-4. 147 (Berger, *Comptes rendus de l'Acad. des Inscr. et Belles Lettres*, 1886, p. 201; *CIS* tom. i. fasc. 1, pp. 43, 44), but this title is not rendered in the Assyrian text which accompanies the Aramaic inscription. Winckler (in *Unters. z. altor. Gesch.* 1889, Exkurs v. p. 138) gave the explanation that this word was simply a transcription of the Assyro-Babylonian *rabû-ša-rêši*, a suggestion that was afterwards confirmed by the discovery of the title in question on the British Museum tablet 82-7-14, 3570, written *rubû-ša-ri-e-šu* (read *-rêšu*); cf. *Academy*, June 25, 1892. This expression means 'chief of the heads' or principal men,[*] and being apparently not a usual title, we may perhaps conclude that it was not often given, and may have been one of great honour. Of its age nothing can be said,—the earliest date known is B.C. 683,—and how long it had been in use before then cannot even be guessed. As to the etymology, that is very simple. The first component part is the common Assyro-Babylonian word *rabû*, meaning, in compounds, 'chief,' equivalent to the Heb. רַב. The second word is the particle *ša*, meaning 'of,' and the third is *rêšu* 'head' (the Heb. ראשׁ), seemingly one of the numerous short words of masculine form which were the same in the plural as in the singular. Whether the Heb. סָרִיס is derived from *ša-rêšu*, without the *rab*, and obtained the meaning of 'eunuch' from the circumstance that many of those who bore the title Rab-saris had authority over the eunuchs, or whether the Hebrews assimilated this Assyro-Babylonian title to a word already well known in their language, and common Semitic property, is unknown; but the former would seem to be the more probable. In any case the word as used in 2 K 18^{17} and Jer 39$^{3. 13}$ must be held to represent the Assyro-Babylonian *rabû-ša-rêšu*, whatever opinion be held with regard to the other passages where it occurs. It is noteworthy that the sibilants are in both cases ס, for which the Assyro-Babylonian has *š*, affording another proof that the sound transcribed by the latter was often not *sh*, but simply *s*, in later times, in Assyria and Babylonia.

T. G. PINCHES.

RAB-SHAKEH (רַבְשָׁקֵה; Ῥαψάκης, Ῥαβσάκης; *Rabsaces*).—The title of the officer sent by Sennacherib with the Tartan and the Rab-saris to demand the surrender of Jerusalem, at that time besieged by the Assyrian forces (2 K 18$^{17. 19. 26-28. 37}$ 19$^{4. 8}$, Is 36$^{2. 4. 11-13. 22}$ 37$^{4. 8}$). He came, with a great army, accompanied by the other dignitaries who are mentioned, from Lachish, and 'called to the king.' In response to the summons, the officials of Hezekiah's court replied, and the Rab-shakeh pronounced to them a long and insolent message to their royal master, increasing the violence of his tone when requested to speak in Aramaic, and not in Hebrew 'in the ears of all the people that are on the wall.' From this it will be seen that this official was one of some attainments, as, besides his native Assyrian, he must have known Hebrew very well; and the remonstrance of the Jewish representatives of the king who were parleying with him implies that he knew Aramaic also, probably because it was the language of a large section of the Assyrian people, and therefore, in a sense, a second mother-tongue to him. The first opinion of scholars concerning the title Rab-shakeh was that it meant 'chief of the cupbearers';[*] but there must have been considerable doubt as to the correctness of this rendering, as such an official would hardly have been sent on an errand of this kind. When, therefore, the cuneiform inscriptions began to be more thoroughly studied, the suggestion was made that the Rab-shakeh of the passages quoted was the same as the *rab-saki* of the texts. This word is a compound, consisting of *rab*, const. case of *rabû*, 'chief,'=the Heb. רַב, and *saki*, plural of *saku*, from the Akkad. *saga*, 'head,' the whole meaning 'chief of the heads,' or 'captains' (cf. RAB-SARIS). The list of names of officials printed in *WAI* ii. pl. 31, No. 2, mentions the *rab-saki* between the *rab-šumgar* or *rab-segar* ('chief of the supply?') and the *saki* or *rêšē*, 'officers' or 'captains.' In the time of Tiglath-pileser the Šut-saki who was sent to Tyre as *rab-saki* received tribute from Mētenna of that city, from which it may be concluded that the Rab-shakeh or Rab-saki was a military officer of high rank, regarded as possessing some ability as a diplomat. The *Rab-kiṣir*, 'chief of a force,' also often bore this title (tablet K 1359, col. i. 36, ii. 7, 10, iii. 1, iv. 11). See Schrader, *KAT*^{2} 319, 320 [*COT* ii. 3, 4]; Sayce, *HCM* 441, 442.

T. G. PINCHES.

RACA occurs Mt 5^{22} only, and in its Greek form is variously spelt—*ῥακά* (WH, with cod. B), *ῥαχά* (Tisch. with codd. ℵ*D). It is the Aramaic, רֵיקָא, a form of רֵיקָן 'empty' (Heb. רֵיק), the first *a* in the Greek being due to a Galilæan change. The χ in Tischendorf's spelling is, like the first χ in Ἀχελδαμάχ (Ac 1^{19}, codd. ℵA), due to the assimilation in the pronunciation of *Koph* to the aspirated *Kaph* (Dalman, *Gramm. des Jüd.-Pal. Aramäisch*, pp. 66, 138, 304). *Raca* appears to be a word of contempt, 'empty,' so 'worthless,' intellectually rather than morally, like the worthless (רֵיק), empty-headed fellows whom Abimelech at Shechem hired to be his followers, Jg 9^{4}; like the κενός, Ja 2^{20}, the empty-head, who boasts of a faith which is intellectual only; or like the 'ignorant,' called by the Rabbis רֵיקָא, because, for example, they could not conceive how God could build the gates of Jerusalem of gems 30 cubits high and 30 cubits broad (Edersheim, *Life and Times of Jesus*, i. 538). Obviously, as rebuked by Christ, it is an advance upon mere angry feeling (ὀργιζόμενος), in proportion as utterance is less self-controlled than silence; and, on the other hand, it does not betray so complete a loss of self-control as the word of climax, the more positive μωρέ, 'fool,' *i.e.* godless, good-despising fool, moral reprobate.*

---

[*] Cf. Dn 1^{3}, where the 'master of his eunuchs' (רַב־סָרִיסָיו, LXX and Theod. ἀρχιευνοῦχος) seems to have had charge of 'the seed royal and the nobles.'

[*] See Gesenius (Tregelles' tr.), *s.v.* Luther's translation is generally, in accordance with this, *Erzschenke*.

But the precise force of *Raca*, as compared with that of repressed anger and of 'fool,' cannot be estimated apart from the gradations of court or penalty from which Christ draws His analogical illustrations; and these gradations are too readily taken for granted as historical and intelligible, even by some of the foremost commentators in England and in Germany. It is quite commonly assumed (1) that Christ uses κρίσις for the local or provincial court in a Jewish town or village; (2) that such a court could try cases of murder; (3) that it could punish the murderer, but only with the sword; (4) that the Sanhedrin (συνέδριον) alone could inflict 'the more painful and degrading punishment of stoning'; (5) that γέεννα τοῦ πυρός was the valley of Hinnom, and that in it the corpses of criminals were burned, the most degrading and most abhorred punishment of all. But, as a matter of fact, there is, outside this passage itself, no trustworthy evidence for any of these assumptions (see, for instance, GEHENNA, vol. ii. p. 119^b). It is true that the Talmud may be quoted for the second assumption (cf. *Sanhedrin* i. 4, as referred to in Schürer, *HJP* II. i. 154); but this evidence is shaken, first, by the extreme improbability of the statement in the light of the fact that no execution was permitted, even to the Sanhedrin, except by consent of the Procurator (cf. Jn 18^{31}); and secondly, by the important qualification that the Talmud is often purely academic, speaking of things that ought to be as though they were. The Talmudic passage just cited was not written down till the 2nd cent. A.D., and represents what, in the opinion of the Rabbis, ought to be the procedure, and what would be in an ideal Judah under Rabbinical rule. The same statement is made by Maimonides 1000 years later, when it could not be historically true.† Accordingly, it appears impossible to estimate, with any confidence, the exact relations of 'the judgment,' 'the council,' 'the gehenna of fire,' in our Lord's picture, and therefore, so far, the exact relations of the three stages of anger. Two salient points, however, emerge like headlands out of the mist. (1) Christ hands over all anger, even silent anger, to be tried as a murderous act, to be tried (it should be added) on its merits (cf. ἔνοχος τῇ κρίσει), and not *ipso facto* and at once condemned. (2) Christ is no verbal Pharisee. That it is not the utterance of a word, but the spirit of the utterance, that is reprehended, is plain from the fact that He can use ἀνόητοι, a word, like St. James's κενέ, practically identical with *Raca*, when rebuking the spiritual dulness of two of His immediate followers (Lk 24^{25}).

J. MASSIE.

RACAL.—Amongst those to whom David is said (1 S 30^{29}) to have sent a share of the spoil after his return to Ziklag, are mentioned 'they that were בְּרָכָל'; but probably the last word ought to be corrected, after the LXX (ἐν Καρμήλῳ), to בְּכַרְמֶל, 'in Carmel' (of Judah, Jos 15^{55}, 1 S 25^2). So Wellhausen, Driver, Budde, Löhr, H. P. Smith, *et al.*

RACE.—See GAMES in vol. ii. p. 108.

RACHEL, once (Jer 31^{15} AV) Rahel* (רָחֵל 'a ewe,' Gn 31^{38} *al.*; Ῥαχήλ; *Rachel*).—The younger daughter of Laban, whom Jacob, arriving at Ḥaran (Gn 29^{1-8}), meets, as she comes to water her father's sheep (v.$^{9ff.}$), at a well in the open country (v.^{2}). Impressed by her beauty, and deeply in love with her (29^{17-20}), Jacob agrees to serve Laban for seven years, if he may then have her for his wife; but Laban, at the end of the stipulated time, fraudulently substitutes his elder daughter, Leah, and only consents to give him Rachel as well upon his agreeing to serve him seven years more (29^{21-30}). Leah, though less loved by her husband than Rachel, is blessed with four children; this arouses in her younger sister feelings of discontent and envy, and petulantly reproaching Jacob she bids him take her handmaid, Bilhah, as a concubine (cf. $16^{2f.}$), that she may be 'built up'—*i.e.* (16^2) obtain a family—from her (30^{1-4}). Two sons, Dan and Naphtali, are born accordingly to Bilhah: the explanations given of their names ($30^{6.8}$) are meant to indicate Rachel's recognition that God had now, at least in a measure, granted her her due, and that she had won, after her long 'wrestlings' with her sister, His favour and blessing. 'The struggle of these two women for their husband gives us a strange picture of manners and morals, but must not be judged by our standard' (Payne Smith): at the same time, so far as the temper and attitude of Rachel are concerned, it is only fair to remember that Leah was not the wife of Jacob's choice, but had been forced by fraud into what was really Rachel's own rightful place in his house. Rachel's anxiety to have a son of her own is, however, evinced before long in her eagerness to obtain some of the youthful Reuben's mandrakes, or love-apples ($30^{14f.}$). At last, the long-delayed hopes are accomplished, and Joseph is born (30^{22-24}).

Six years later (31^{41}), when Jacob meditates quitting the service of Laban (31^{1-3}), both wives endorse cordially his reasons for doing so ($31^{4ff.\ 14-16}$), and accompany him. Rachel, at once unscrupulous and superstitious, steals her father's teraphim (31^{19}), hoping, no doubt, that they would bring her and her husband prosperity; 31^{33-35} describes the ready wit by which she conceals the theft from her indignant father. Rachel is next mentioned on the occasion of Jacob's meeting with his brother Esau (33^{1-15}), when the superior affection which he still felt for her is shown by the position assigned to her and Joseph ($33^{1.2.7}$). Her death, shortly afterwards, at the time of Benjamin's birth, soon after Jacob left Bethel, is recorded in 35^{16-20} (cf. 48^7). She and her sister Leah are alluded to in Ru 4^{11} as foundresses of the house of Israel, and types of wedded happiness and prosperity. Like Rebekah (Gn 24), Rachel at first (Gn 29) produces a favourable impression upon the reader: she is attractive, not only in person, but also evidently in manner and address; she stirs Jacob's deepest affections; their long and patient waiting, followed by a cruel disappointment, enlists our sympathies; but the sequel shows that, like her aunt, she is not exempt from the family failings of acquisitiveness and duplicity.

The Isr. tribes are grouped around Leah and Rachel; so it is evident that they both possess a *tribal* as well as a personal significance. For speculations as to what historical facts may, from this point of view, be supposed to be represented by them —*e.g.* the growth of 'Israel' out of elements more or less originally distinct—see Ewald, *Hist.* i. 371-6; Stade, *GVI* i. 145 ff.; Wellh. *Hist.* 432; Guthe, *GVI* (1899), pp. 5 f., 40-42; and cf. BENJAMIN, vol. i. p. 272^{b}, JACOB, vol. ii. p. 533 f.

---

* It seems better to take this word as the voc. of μωρός, one of the LXX translations of *nābāl*, 'fool' (cf. the practical atheist of Is 32^6), than as a transliteration of the ptcp. מֹרֶה 'murmuring,' 'refractory,' Nu 20^{10} (LXX ἀπειθεῖς), there being no evidence that the latter was a common Heb. word of opprobrium. (See FOOL).

† On this particular point the present writer is indebted to a private letter from Dr. Neubauer.

* As regularly in the 'Great Bible' (1539-41) and the Geneva Version (1560); Coverdale (1535) and the 'Bishops' Bible' (1568), however, have regularly 'Rachel.'

Rachel's grave.—In Gn 35^{16} it is said that Rachel died when there was yet 'a distance (?) of land' (כִּבְרַת הָאָרֶץ) to go to Ephrath; and in v.^{19} (cf. 48^{7}) Jacob is said to have buried her 'in the way to Ephrath (that is Beth-lehem),' and (v.^{20}) to have 'set up a pillar' (*maẓẓēbāh*)—*i.e.* here, as often in Phœn. (*CIS* I. i. 44, 46, 57, etc.), a sepulchral monument—'upon her grave: that is the pillar of Rachel's grave unto this day.' The locality must consequently have been well known when the narrative (E) was written; and, in fact, it is mentioned as a well-known spot in 1 S 10^{2}, and also alluded to in Jer 31^{15} (where the prophet poetically imagines Rachel, the mother of Joseph and Benjamin, as weeping over the captivity of the last remnants of her nation, as on their way to exile they passed near her tomb; cf. 40^{1}).* The spot which, from at least the 4th cent.,† has been shown traditionally as the site of Rachel's grave, is about four miles S. of Jerusalem and one mile N. of Beth-lehem; here there is now the *Ḳubbet Rāḥēl* or 'dome of Rachel,' a stone structure, of comparatively modern date, exactly like an ordinary Moslem 'wely,' or tomb of a holy person, about 23 ft. square, surmounted by a dome, and containing an apparently modern sarcophagus; on the E. an oblong chamber and court have been recently added.‡

A serious difficulty, however, arises in this connexion. In 1 S 10^{2} Rachel's tomb is described quite clearly as being on the 'border of Benjamin,' *i.e.*, obviously, the N. border between Benjamin and Ephraim, not far from § *Bethel* (v.^{3}), which was 10 miles N. of Jerusalem; and a site in the same neighbourhood is strongly favoured by Jer 31^{15}, where Rachel is represented as weeping at (or near) *Ramah*, 5 miles N. of Jerusalem.‖ The distance which כברת הארץ was understood to express is uncertain; but it can hardly (cf. 2 K 5^{19}) have been as much as 15 or 16 miles. We seem, therefore, reduced to one of two conclusions: either (Knob., Graf, Stade, *ZATW*, 1883, pp. 5-8; Riehm, *HWB*^{2}, 1281 f.; Holzinger, *al.*) Ephrath, though elsewhere identified with Beth-lehem (Ru 1^{2} 4^{11}, Mic 5^{2}), is here the name of a place near Ramah (in which case the words 'that is Beth-lehem' in 35^{19} 48^{7} will be an incorrect gloss); or (Nöld., Del., Dillm.) there were two different traditions as to the site of Rachel's grave—one tradition (1 S 10^{2}, Jer 31^{15}) placing it near Ramah, the other (Gn 35^{19} 48^{7}) placing it near Beth-lehem. As Rachel has otherwise no connexion with Judah, while she is connected closely with Joseph and Benjamin, the former alternative is perhaps the more probable (Buhl, *Geogr.* 159, does not decide between them).

S. R. DRIVER.

RADDAI (רַדַּי; B *Ζαδδαί*, B^{ab} *Ζαβδαί*, A *'Ραδδαί*).—The fifth son of Jesse, 1 Ch 2^{14}.

RAG, RAGGED.—The words properly translated 'rag' are (1) קְרָעִים, pieces torn off, from קָרַע to rend, which is tr^{d} 'rags' in Pr 23^{21}, but in 1 K 11$^{30. 31}$, 2 K 2^{12} simply 'pieces,' being preceded by the verb; (2) מְלָחִים, worn-out clothes, from [מָלַח] to wear out, tr^{d} 'rotten rags' in Jer 38$^{11. 12}$, the only place where it occurs; (3) *ῥάκος*, tr^{d} 'rag' in Ad. Est 14^{16}. In Is 64^{6} 'All our righteousnesses are as filthy rags' (כְּבֶגֶד עִדִּים), the word tr^{d} 'rags' (בֶּגֶד) is simply 'clothing,' 'a garment' ('from the filthy clothing of the leper to the holy robes of the high priest'—*Oxf. Heb. Lex.*); RV 'as a polluted garment.' The specific allusion here is to a *vestis menstruis polluta*; cf. Is 30^{22}.

The root meaning of the Eng. word 'rag' is neither 'torn' nor 'worn,' but *rough, shaggy* (Swed. *ragg* or *rugg*, rough hair), whence the adj. **ragged** was used as we now use 'rugged' in the sense of jagged, applied to rocks, etc. So in AV Is 2^{21} 'the tops of the ragged rocks'; and Sir 32 $^{\text{heading}}$ 'Of a ragged and a smooth way.' Cf. Shaks. *Rich. II.* v. v. 21—

> 'How these vain weak nails
> May tear a passage through the flinty ribs
> Of this hard world, my ragged prison walls.

And Milton, *L'Allegro*, 9—

> 'There, under ebon shades and low-browed rocks,
> As ragged as thy locks.'

J. HASTINGS.

RAGAU.—See following article.

RAGES (*'Ράγοι* [ℵ in To 9$^{2. 5}$ *'Ράγαι*] *τῆς Μηδίας*).—Now *Rai* near Teheran. The city, whose ruins occupy a space about 4500 yards long by 3500 broad, gave its name to Media Ragiana, and commanded the approach to the Caspian Gates. The size and thickness of its walls, and the number of towers with which they are flanked, must have made it one of the strongest fortresses of the Persian empire. According to the Vendidad it was colonized by the advancing Aryans after they had left Hyrcania and before they reached Khorassan, and it was there that they were mingled with two other races and so first came into contact with heretics. An old tradition asserted that Zoroaster was born there (see de Harlez, *Introduction à l'étude de l'Avesta*, Paris, 1882). In the Behistun Inscription Darius calls it Ragâ in Media, and states that the Median pretender Frawartish or Phraortes fled to it after his defeat; he was, however, captured, and after being tortured was sent to Ecbatana to be impaled. At a later date Alexander passed through it in pursuit of Darius Codomannus, eleven days after leaving Ecbatana. It was rebuilt or enlarged by Seleucus I., who gave it the name of Europus (Strabo, XI. xiii. 6), which was supplanted by that of Arsacia after the Parthian conquest. In the age of Isidorus (§ 7) it was still 'the greatest city in Media.' In Strabo and Arrian the name appears as *Ragæ*; Ptolemy (vi. 5) makes it *Ragæa*.

Rages is often mentioned in the Bk. of Tobit. Tobit left there ten talents of silver (1^{14} 4^{1}), and Tobias, accompanied by the angel Raphael, started for Rages in quest of this deposit, which was finally recovered by the angel (5^{5} 6$^{9. 12}$ 9^{2}). According to Jth 1$^{5. 15}$ **Ragau** (*'Ραγαύ*, evidently another form of *Rages*) was the scene of the decisive battle in which Nebuchadnezzar 'king of the Assyrians' defeated and slew Arphaxad the Median prince. It is possible that in the story of Arphaxad we have a distorted reminiscence of the overthrow and capture of Frawartish.

A. H. SAYCE.

RAGUEL.—1. The AV form (LXX *'Ραγουήλ*), in Nu 10^{29}, of REUEL. See HOBAB and JETHRO. 2. The father of Sarah, the wife of Tobias, To 3$^{7. 17. 18}$ 14^{12}. The name, which is the same as the Heb. *Reuel*, occurs as that of an angel in Enoch xx. 4.

RAHAB (רָחָב, *'Ραάβ*).—The heroine of the adventure of the spies sent by Joshua to ascertain the strength of Jericho and the feeling of the people there. The story of her reception of the two young men, and the clever devices by which she hides them, contrives their escape, and baffles the pursuit ordered by the king of Jericho, is told in Jos 2, assigned by critics to JE (vv.[10. 11] D[2]), and exhibiting all the ease and grace of that narrative, all its power of delineating life and character. A few lively touches bring the whole scene vividly before us, and suggest much that is not told in detail. We see the house on the wall, probably near the gate of the city, and convenient for resort, certainly convenient for escape. On the roof are drying stalks of flax, an indication of the inmate's busy toil, possibly of a particular trade. Here she dwells alone, but she has a father and mother, and brothers and sisters residing in the town. She is a harlot, for the word זֹנָה applied to her (LXX πόρνη; Vulg. *meretrix*) refuses to be softened down to 'innkeeper' (Josephus, Chrys., Chald. VS), but she may have combined with this unhappy calling the more honourable occupation of weaving and dyeing. She had evidently been brought into communication with the outside world, and had heard of events going on beyond the Jordan, which had caused the terror of Israel to fall upon the inhabitants of Canaan. She was convinced that the God of the Hebrews would open a way for His people into Jericho. In this belief she obtained a promise from the spies of protection for herself and family in return for her help. A scarlet line hanging from the window by which they had escaped was to be the sign that the house, with all its inmates for the time, should be spared. The Israelites would be guiltless of the blood of any member of Raḥab's family caught outside the house.

---

* Mt 2$^{17f.}$ is, of course, an *application*, not an interpretation, of the prophecy.

† See the Itinerary of the Bordeaux Pilgrim, A.D. 333 (in the series of the *Pal. Pilgrims' Text Soc.* i. 26 f.), and the Pilgrimage of Paula (*ib.* p. 6, at the end of the vol.) in Jerome's *Ep. ad Eustochium* (ed. Bened. iv. 2, 674; ed. Vallarsi, i. 692).

‡ See, further, Robinson, *BRP* i. 218, iii. 273; Bäd.^{2} 129 f.; *PEF Mem.* iii. 129 f. (with a view).

§ The terms of 1 S 10$^{2-5}$ hardly enable us to fix its site more specifically: see an attempt by Schick, *ZDPV* iv. (1881) p. 248 f. (=*PEFSt*, 1883, p. 111); abandoned *PEFSt*, 1898, p. 19.

‖ It may be worth observing that, though Jos 18^{13} (P) makes the N. border of Benjamin pass close to the S. of Bethel, 1 K 15^{17} seems to imply that the S. border of the N. kingdom was at Ramah; see also Jg 4^{5}.

Joshua kept the agreement to the letter (Jos 6[17. 22. 23-25]), and the narrative states 'and she dwelt in the midst of Israel unto this day.'

'A nation's gratitude long preserves the names of those who by opportune information open for a besieging host the path to victory' (Ewald, who cites a parallel instance soon to follow, Jg 1[22-26], and illustrates from profane history, *HI* ii. 247, Eng. tr.). In fact the conduct of Raḥab was recognized with gratitude and kept long in memory by Jew and Christian alike. According to a rabbinical tradition she married Joshua himself, and became the ancestress of seven prophets (Lightfoot, *Horæ Heb. ad Mt* 1[5]). Christian estimates of her worth are even more remarkable. One NT writer places her in the roll of the heroes of faith (He 11[31]), another quotes her as justified by works (Ja 2[25]). Clement of Rome declares she was saved through her faith and her hospitality, and claims for her the gift of prophecy, since the scarlet line foretold redemption by the blood of Christ (*ad Cor.* i. 12). The same allegorical interpretation is assumed by all ancient ecclesiastical writers (see Jacobson, *Pat. Ap.*, who cites Just. Mar. *Tryph.* cxi.; Iren. iv. 20. 12; Origen, Ambrose, Jerome, Augustine, and Theodoret). None of these writers, any more than the NT, think it necessary to change 'harlot' into 'innkeeper' with Josephus and Chrysostom. Irenæus, in his reference to her, recalls how publicans and harlots were admitted into the kingdom of heaven. We know nothing of her after-conduct, but we may well believe that the faith which an apostle could praise was accompanied by a true conversion.

As to Raḥab's lie to the king, and her betrayal of her own countrymen, all that need be said is, that while neither can be approved, both may be extenuated by her situation.

The most interesting question in connexion with this woman arises from the mention of a *Raḥab* (Ῥαχάβ) in the genealogy of Mt 1[5] 'And Salmon begat Boaz of Rahab' (RV), which thus makes her an ancestress of our Lord. The patristic age seems to have taken the identification with Raḥab of Jericho for granted. But in the 11th cent. Theophylact could write, 'There are some who think Rachab to be that Rahab the harlot who received the spies of Joshua the son of Nave.' A Dutch professor, G. Outhov, urged difficulties in the way of identification (in the *Biblioth. Brem. hist. philol. Theol.* ch. iii. p. 438), and was answered by Wolf (*Cur. philol. et crit. in Mt* 1[5]). That the Ῥαάβ of the LXX and of Hebrews and James should be Ῥαχάβ in Matthew appears at first improbable. But the latter has the support of Josephus, who always speaks of Raḥab as ἡ Ῥαχάβη. A second objection would be more serious if it rested on the mention of Raḥab alone, but it is a chronological difficulty not affected by the question of her identity, and may therefore be dismissed here. There is no improbability in the marriage of Raḥab to Salmon son of Nahshon (Nu 7[12], 1 Ch 2[10]) (see Alford on Mt 1[5]). The difficulty arises from the names Boaz, Obed, Jesse being made to bridge the interval between Raḥab and David.

LITERATURE.—In addition to authorities already cited, see Bengel, Lightfoot, and Olshausen on Mt 1[5]; Mill, *Descent and Parentage of the Saviour*; Patrick, Grotius, Hitzig, Keil, Dillmann, and Steuernagel on Jos 2 and 6; Schleusner, *Lex. NT*, *s.v.* πόρνη.

A. S. AGLEN.

RAHAB (רַהַב).—A mythological and symbolical term meaning 'the raging monster,' 'the impetuous one,' which occurs 6 times in OT (RV).

As a verb, רהב is found twice in Qal: Pr 6[3] 'importune thy friend' (AV 'make sure' [Toy remarks that '*importune* is hardly strong enough; *beset*, *besiege*, *assail* better express the impetuosity involved in the Heb. term']; LXX παρόξυνε τὸν φίλον σου); Is 3[5] 'the child shall behave himself proudly' (Cheyne, *PB*, 'the boy shall be insolent'; LXX προσκόψει τὸ παιδίον); and twice in Hiphil: Ca 6[5] 'thine eyes have overcome me' (RVm 'make me afraid' [so Budde, *setzen mich in Schrecken*]; AVm 'have puffed me up'; Duhm, *regen mich auf* [so Siegfried-Stade, *erregen* (*geschlechtlich*)]; LXX ἀνεπτέρωσάν με; but it is very doubtful whether these last three renderings are possible; probably 'confuse' or 'perturb' [Syr. ܪܗܒ] is the meaning, see Driver, *LOT*[6] 446 n.); Ps 138[3] 'Thou didst encourage me' (Driver, *Par. Psalter*, 'Thou makest me proud'; LXX πολυωρήσεις με).—The noun רֹהַב is used in Ps 90[10] [only] 'their pride' (AV, following Kimchi, interprets the root here falsely in the sense of 'strength' [so in Is 30[7] and Ps 138[3]]; LXX τὸ πλεῖον αὐτῶν [by confusion with רֻבָּם]), and the adjective רָהָב (in plur.) in Ps 40[(4) 5] [only] 'the proud' (LXX ματαιότητας).

1. The first occurrence of רַהַב we shall examine is Job 9[13] אֱלוֹהַּ לֹא־יָשִׁיב אַפּוֹ תַּחְתָּיו שָׁחֲחוּ עֹזְרֵי רָהַב; LXX B αὐτὸς γὰρ ἀπέστραπται ὀργήν, ὑπ' αὐτοῦ ἐκάμφθησαν κήτη τὰ ὑπ' οὐρανόν; RV 'God will not withdraw his anger, the helpers of Rahab [m. 'or *arrogancy*, see Is 30[7]'] do [m. 'or *did*'] stoop under him'; AV '(If) God will not withdraw his anger, the proud helpers [m. 'Heb. *helpers of pride* or *strength*'] do stoop under him.' The meaning distinctly appears to be, 'God withdraws not his anger (till it has accomplished its purpose); even the helpers of Rahab bowed [note the perf. שָׁחֲחוּ, referring to some definite occasion] under him; how much less can I (Job) stand before him.' What now is the allusion? There can be little doubt that it is to the mythical conflict in which the Creator was said to have vanquished the supposed primeval dragon of the deep. This myth is most familiar to us in the Babylonian Creation-epos, where there is a very detailed account of the victory of Marduk over Tiâmat (cf. *tĕhôm*, Gn 1[2]) and her eleven 'helpers' (see art. BABYLONIA in vol. i. p. 220[b] f.; Sayce, *HCM* 63 ff.; Ball, *Light from the East*, 2 ff.).

From the use of *Rahab* for the raging sea monster (who appears, in certain forms of the myth current amongst the Jews, to have been thought of not as finally destroyed, but as imprisoned in the sea, and destined to be slain at last by Jahweh's sword, Is 27[1]; cf. the Egyptian myth of the defeat of the serpent Apopi) the transition is easy to the application of the term to the sea itself. So in **2.** Job 26[12], where, however, the same mythological allusion underlies the two parallel clauses, 'He quelleth the sea with his power, and by his understanding he smiteth through Rahab' (בְּכֹחוֹ רָגַע הַיָּם וּבִתְבוּנָתוֹ מָחַץ רָהַב; LXX B ἰσχύι κατέπαυσεν τὴν θάλασσαν, ἐπιστήμῃ δὲ ἔστρωται τὸ κῆτος); RV 'He stirreth up [m. 'or *stilleth*'] the sea with his power, and by his understanding he smiteth through Rahab'; AV (wrongly)

'He divideth the sea with his power, and by his understanding he smiteth through the proud' [m. 'Heb. *pride*']. Cf. Ps 74^{12-15}. **3.** Very similar is Is 51^9 הֲלוֹא אַתְּ־הִיא הַמַּחְצֶבֶת רַהַב מְחֹלֶלֶת תַּנִּין ; LXX B *οὐ σὺ εἶ ἡ ἐρημοῦσα θάλασσαν, ὕδωρ ἀβύσσου πλῆθος*; RV 'art thou (*sc.* the arm of the LORD) not it that cut Rahab in pieces, that pierced the dragon?'; AV 'art thou not it that hath cut Rahab and wounded the dragon?' The reference here appears to be to the destruction of the Egyptians, under the figure of a monster (see SEA MONSTER), at the Red Sea (cf. v.^{10} 'art thou not it which dried up the sea, the waters of the great deep; that made the depths of the sea a way for the redeemed to pass over?'). **4.** One other parallel to this is Ps $89^{10(11)}$ אַתָּה דִכִּאתָ כֶחָלָל רָהַב ; LXX *σὺ ἐταπείνωσας ὡς τραυματίαν ὑπερήφανον*; AV and RV 'Thou hast broken Rahab [m. 'or *Egypt*'] in pieces, as one that is slain.' The meaning of this clause is interpreted by what follows, 'Thou hast scattered thine enemies with the arm of thy strength,' and this again by the preceding verse, 'Thou rulest the pride of the sea; when the waves thereof arise, thou stillest them.' There *may* be a veiled allusion to Egypt here, as in Is 51^9, but such a conclusion is not necessary.

5. In our next example the epithet *Rahab* is applied to Egypt, Is 30^7 וּמִצְרַיִם הֶבֶל וָרִיק יַעְזֹרוּ לָכֵן קָרָאתִי לָזֹאת רַהַב הֵם שָׁבֶת ; LXX *Αἰγύπτιοι μάταια καὶ κενὰ ὠφελήσουσιν ὑμᾶς· ἀπάγγειλον αὐτοῖς ὅτι ματαία ἡ παράκλησις ὑμῶν αὕτη*: RV 'for Egypt helpeth in vain and to no purpose; therefore have I called her Rahab that sitteth still' [lit. (Ges. § 141 *c*) 'Rahab, they are a sitting still']. Driver (*Isaiah*², 'Men of the Bible' series, p. 59 n.) takes *Rahab* as a poetical title expressing 'the idea of inflation and pride.' So Cheyne (*Prophecies of Isaiah*², i. p. 172) speaks of it as expressing the 'boisterousness' or 'arrogance' of the Egyptians as a people; he cites Pliny's description of them as 'ventosa et insolens natio.' Isaiah declares that the name *Rahab* had better be changed to *Shébeth* ('sitting still,' 'inaction'); Egypt is a blustering do-nothing, prompt with high-sounding promises, but utterly incapable of carrying these out. If this passage belongs to Isaiah, and if the MT be correct (but see Cheyne, *SBOT*, 'Isaiah' *ad loc.*, and *Intro. to Is.* p. 253; Budde on Job 9^{13}; and Gunkel, *Schöpfung und Chaos*, p. 39), it is probable that no mythological allusion underlies the passage, but that רַהַב simply means 'boastfulness' though with allusion to *Rahab* as a name of Egypt. **6.** Either through the influence of this passage, or more probably owing to a conception of Egypt as akin to the mythological sea monster, because lying ensconced amidst its rivers and canals (cf. Ezk 29^3), *Rahab* appears as a designation of Egypt in Ps 87^4 אַזְכִּיר רַהַב וּבָבֶל ; LXX *μνησθήσομαι Ῥαὰβ καὶ Βαβυλῶνος*; AV and RV 'I will make mention of Rahab (RVm 'or *Egypt*') and Babylon as those that know me.'

Gunkel (*Schöpf. u. Chaos*, 40) finds an allusion to Rahab also in Ps $40^{5\,(4)}$ 'Happy is the man that maketh the LORD his trust, and respecteth not the proud (*rĕhābîm*).'

LITERATURE.—The Comm. on the above cited Scripture passages, esp. Dillmann, Davidson, Budde, and Duhm on *Job*, Dillmann, Delitzsch, and Cheyne on *Isaiah*, and Delitzsch and Duhm on *Psalms*; Cheyne, *Job and Solomon*, p. 75 f., 'Isaiah' in *SBOT*, 102 f., *PB* 156 f., 205 f., and his art. 'Dragon' in *Encyc. Bibl.*; Gunkel, *Schöpfung und Chaos*, *passim*, esp. p. 30 ff.

J. A. SELBIE.

RAHAM (רָחַם; B Ῥάμεε, A Ῥάεμ, Luc. Ῥάαμ).—A descendant of Caleb, 1 Ch 2^{44}.

RAHEL.—See RACHEL.

RAIMENT.—The early subst. 'arrayment' was often in middle Eng. spelt 'araiment,' and the *a* dropping off left 'raiment,' which is found as early as *Piers Plowman*. Raiment, being treated as a mere synonym of 'apparel,'* is used in AV to translate many Heb. and Gr. words, which are often plu. (as *τὰ ἱμάτια*, Mt 17^2 27^{31}, Mk 9^3, Lk 7^{25} 23^{34}, Jn 19^{24} etc.), the word having a collective force. Occasionally, however, it was used in the singular and in the plural: thus, Ezk 9^2 Cov. 'There was one amongst them, that had on him a lynninge rayment'; Ps 109^{17} Pr. Bk. 'He clothed him self with cursyng lyke as with a rayment.' Also Ex 39^{41} Tind. 'His sonnes raymentes to ministre in'; Hall, *Works*, i. 818, 'He sends varietie of costly rayments to his Father.' See DRESS.

J. HASTINGS.

RAIN (מָטָר is the usual Heb. term. יוֹרֶה [in Jl 2^{23} Ps 84^7 מוֹרֶה] 'the early rain,' falling Oct.–Nov., is opposed to מַלְקוֹשׁ 'the latter rain,' from March to April, Dt 11^{14}, Jer 5^{24}, Hos 6^3. גֶּשֶׁם, a *burst of rain*, is sometimes used, esp. of the heavy winter rains [cf. Driver on Am 4^7; G. A. Smith, *HGHL* 64]. The NT terms are *ὑετός* and *βροχή* [only Mt $7^{25.\,27}$]).—In the beautiful passage Is $55^{10.\,11}$ we have an expression of the blessing accompanying rain in Eastern countries, not so much appreciated in our own humid climes. In Palestine the fruitfulness of the soil, the supply of the springs and rivers, the pasturage for the flocks and herds, indeed life itself, is dependent on the fall of the 'former and the latter' rain. The descent of rain is used as an illustration of the blessings following upon the spread of the kingdom of Christ (Ps $72^{6.\,7}$); while the presence of clouds and wind without rain is likened to a man 'who boasteth himself of his gifts falsely' (Pr 25^{14} RV). Rain in harvest time was regarded as phenomenal and portentous (1 S 12^{17}, Pr 26^1).

In Palestine nearly the whole of the rainfall of the year occurs in the winter months, or from November to March inclusive; during the remaining months the rain is slight and intermittent. In the rainy season the falls are usually heavy, and are accompanied by thunder and lightning, while the wind comes from the W. or S.W. Northerly and easterly winds are generally dry.† Snow falls on the tableland of western Palestine and of Moab, and to a greater depth in the Lebanon, but is almost unknown along the seaboard of Philistia and the plain of Sharon; on Sunday night, 20th January 1884, snow fell to a depth of 2 ft. and upwards around Jerusalem;‡ this is mentioned only in order to dispel the general belief that snow never falls on the Holy City.

Conder disputes the view that the seasons in Palestine have changed since OT times.§ He says, 'As regards the seasons and the character and distribution of the water-supply, natural or artificial, there is, apparently, no reason to suppose that any change has occurred; and with respect to the annual rainfall (as observed for the last ten years‖) it is only necessary to note that, were the old cisterns cleaned and mended, and the beautiful tanks and aqueducts repaired, the ordinary fall would be quite sufficient for the wants of the inhabitants and for irrigation.'¶ While this is doubtless true, there can be no question that during the 'Pluvial period,' which extended from the Pliocene down through the Glacial into the commencement of the present or 'Recent' epoch, the rainfall must have been greater and the climate colder and more humid than at the present day. Snow now falls on the summits of Jebel Mûsa and Jebel Katarina in the Sinaitic peninsula, giving rise to the perennial streams which descend from the former of these mountains.* The following is a table of the rainfall at Jerusalem during 20 years:—

---

* As the AV translators varied their language as much as possible, we find three different renderings of the one word *ἐσθής* in Ja $2^{2.\,3}$: 'in goodly apparel' (*ἐν ἐσθῆτι λαμπρᾷ*), 'in vile raiment' (*ἐν ῥυπαρᾷ ἐσθῆτι*), and 'the gay clothing' (*τὴν ἐσθῆτα τὴν λαμπρὰν*). RV has 'clothing' throughout here.

† The connexion of the rainfall and direction of the wind is not very well known, though undoubtedly the S.W. wind is the most humid.

‡ *Mount Seir, Sinai*, etc. 170 (1885).

§ *Tent-Work in Palestine*, ch. xxiv. 334.

‖ From 1870–1880.

¶ *Ib.* p. 366. On the other hand, Tristram appears to consider that the rainfall has diminished since the time of the Crusaders. *Land of Israel*², 319.

TABLE OF THE RAINFALL AT JERUSALEM FROM 1861 TO 1880.

Year.	Fall in Inches.	Year.	Fall in Inches.
1861	27·30	1871	23·57
1862	21·86	1872	22·26
1863	26·54	1873	22·72
1864	15·51	1874	29·75
1865	18·19	1875	27·01
1866	18·55	1876	14·41
1867	29·42	1877	26·00
1868	29·10	1878	32·21
1869	18·61	1879	18·04
1870	13·39	1880	32·11

The above observations, taken by Chaplin, show how extremely variable is the rainfall in this part of Palestine; † the amount varying between 13·39 inches in 1870 and 32·21 inches in 1878; the average for these 20 years is about 20 inches; and the number of days on which rain fell varied from 36 in 1864 to 68 in 1868. The results are not dissimilar to those of the eastern counties of England north of the Thames. These results may be considered as the mean between those of the Lebanon on the north and of the Sinaitic peninsula on the south, the rainfall being greater in the former region than in the latter. Between these two Jerusalem occupies a nearly central position; and the amount of rain is consequently of an intermediate character. E. HULL.

RAINBOW (קֶשֶׁת, τόξον, ἶρις).—No definition is needed of this familiar phenomenon, which Ezekiel describes (1^{28}) as 'the bow that is in the cloud in the day of rain'; and no explanation is called for of the optical laws according to which it is produced. The Scripture references to the rainbow are few, and, with one exception, comparatively unimportant. They allude, as a rule, to its brightness, or to the brilliance of its colours. In Ezekiel's vision (*l.c.*) it is the glory of God that is likened to the appearance of the rainbow. In Sir 43$^{11.12}$ the beauty of the rainbow is given as a reason for praising God who has made it, and whose hands have stretched it out. In Sir 50^{7} the high priest Simon, the son of Onias, is compared to the rainbow among other glorious objects. In one of the visions of the Apocalypse (Rev 4^{3}) there is 'a rainbow round about the throne, like an emerald to look upon,' and in another (10^{1}) there is an angel with 'the rainbow upon his head.'

The most important of the Scripture allusions to the rainbow is that in Gn 9$^{13ff.}$, where it is introduced at the close of the story of the Deluge as a token of the covenant in which God promised that He would never again destroy the world by a flood. The passage as it stands is capable of two interpretations. It may convey either (*a*) the unscientific idea that the rainbow was *created* after the Flood, or (*b*) the idea that the rainbow, already created, was then *appointed* to have a new significance as a symbol of mercy. Those who regard the narrative as strictly historical, can of course adopt only the latter of these views. But when we take into account such considerations as those given under FLOOD (which see), it seems best to regard the whole story of the Deluge, including that of the rainbow, as a piece of Semitic folk-lore, which, under the guidance of Divine inspiration, 'assumed a Hebrew complexion, being adapted to the spirit of Hebrew monotheism, and made a vehicle for the higher teaching of the Hebrew religion' (Driver in Hogarth's *Authority and Archæology*, p. 27). In an early Sumerian hymn the rainbow is said by Sayce (*Expos. Times*, vii. 308) to be called 'the arc which draws nigh to man, the bow (*qastu*) of the deluge,' and the Chaldæan account of the Flood tells how—

> 'Already at the moment of her coming the great goddess (Istar)
> Lifted up the mighty bow * which Anu had made according to his wish.'

The significance of the rainbow as a token of God's covenant with men may be variously viewed. קֶשֶׁת and τόξον (Sir 43^{11} 50^{7}) are the regular words for the bow as a weapon of war, and the rainbow may have been regarded as God's bow, formerly used in hostility (as in Ps 7^{12}, Hab 3$^{9.11}$), and now laid aside. Or it may have appeared to be a link between heaven and earth; or, more probably, its suggestiveness as an emblem of hope may have arisen simply from the contrast between its beauty and brightness and the forbidding gloom of the rain-clouds. In any case, the story of the rainbow is worthy of its place in Scripture. Though poetic rather than literal, it was a beautiful and fitting vehicle for conveying to men in the childhood of the world the truth that God's mercy glories against judgment, and is the ground of all human hope.

Though the Babylonian Flood legend affords the closest parallel to the biblical story of the Deluge and the rainbow, some interesting correspondences may be gathered from the mythology of other nations. In the *Iliad* we find (*a*) the simple view of 'rainbows that the son of Kronos hath set in the clouds' (xi. 27), and (*b*) the conception of Iris as the personified messenger of the gods (iii. 121). In the Lithuanian account of the Flood the rainbow is sent as a comforter and counsellor to the surviving couple. In the Edda the rainbow (*Asbrû, Bif-röst*) is conceived of as a heavenly bridge which is to break at the end of the world. Akin to this, but with a biblical colouring, was the German belief of the Middle Ages, that for a number of years before the day of judgment the rainbow will no longer be seen.

'So the rainbow appear
The world hath no fear
Until thereafter forty year.'

The popular tendency to connect Christian and mythological conceptions is seen in the fact that in Zante the rainbow is called 'the girdle, or bow, of the virgin.'

The extravagant theory of Goldziher, that the history of Joseph is a solar myth, is fittingly crowned by the supposition that the 'bow' of Joseph (Gn 49^{24}) is the rainbow (*Mythology among the Hebrews*, 169–70).

* The elevation of Jebel Mûsa is 7373 feet; that of Jebel Katarina 8551 feet.

† 'On the Fall of Rain at Jerusalem,' by J. Glaisher, *PEFSt*, Jan. 1894, p. 39.

* The word rendered 'bow' by Sayce (*l.c.* 463) is, however, very uncertain, other Assyriologists, as Zimmern (*ap.* Gunkel, *Schöpf. u. Chaos*, 427), Jensen (*Kosmol.* 381; *KIB* vi. 241), rendering 'Geschmeide,' 'Intaglio.' Still, this may possibly *denote* the rainbow (Ball, *Light from the East*, 40 n.).

RAKKATH (רַקַּת; B Ὠμαθαδακέθ, the -δακέθ representing רקת by confusion of ר with ד, and the first part of the compound standing for חמת 'Hammath'; A Ῥεκκάθ).—A 'fenced city' of Naphtali, Jos 19^{35}. The later Rabbis placed it at or near Tiberias (see Neubauer, *Géog. du Talm.* 208 f.).

C. R. CONDER.

RAKKON.—See ME-JARKON.

RAM (רָם 'lofty,' 'exalted').—1. An ancestor of David, Ru 4^{19} (Ἀρράν), Mt 1$^{3.4}$ (Ἀράμ, hence AV ARAM, as in Lk 3^{33}, where RV, following WH Ἀρνεί, has ARNI). In 1 Ch 2^{9} (Ῥάμ) ^{10} (B Ἀρράν, A Ἀράμ) he is called the *brother*, but in vv.^{25} (B Ῥάν, A Ῥάμ) ^{27} (B Ἀράμ, A Ῥάμ) the *son* of Jerahmeel. See GENEALOGY, IV. 5. 2. The name of the family (מִשְׁפָּחָה) to which Elihu belonged, Job 32^{2} (B Ῥάμ, A Ῥαμά, C Ἀράμ). It is quite uncertain whether *Ram* should be taken as a purely fictitious name, coined by the author of the Elihu speeches, or whether it is that of an unknown Arab (?) tribe. In Gn 22^{21} Aram is a nephew of BUZ (cf. 'Elihu the Buzite'), and some (*e.g.* Wetzstein, Knobel, Ewald) have supposed that *Ram* is a contraction for *Aram*, in support of which 2 Ch 22^{5} is appealed to, where *Ramites* (הָרַמִּים) is supposed to be shortened from *Aramites* (אֲרַמִּים, the reading of 2 K 8^{28}); but this seems hardly likely. In the passage just referred to, it is more probable that the initial א has been changed by a scribal error into ה, as has happened in several other instances in the OT. Rashi, by a Rabbinical conceit, makes Ram = Abraham.

J. A. SELBIE.

RAM.—See BATTERING-RAM, and SHEEP.

RAMS' HORNS.—See MUSIC in vol. iii. p. 462^{a}.

RAMS' SKINS.—See DYEING.

RAMAH (הָרָמָה, always with definite art. except in Neh 11^{33} and Jer 31^{15}).—This word, with its various modifications and compounds Ram, Ramah, Ramoth, Ramathaim, Arimathæa, is derived from the root רום 'to be lofty.' It appears as a 'high place' four times (Ezk 16$^{24.25.31.39}$). As a proper name it is used of—

1. (B Αραηλ, A Ῥαμα) One of the fenced cities of the tribe of Naphtali (Jos 19^{36}). It is not otherwise mentioned in OT. Robinson (iii. 79) has identified it as *Râmeh*, a village on the great route between *'Akka* and Damascus, and about 8 miles W.S.W. of *Safed*. The village lies upon the southern lower cultivated slope of the mountain whose ridge forms a boundary between Upper and Lower Galilee, but still several hundred feet above the plain. It is a large village, surrounded by extensive olive groves, and has no traces of antiquity within or around. It is mentioned by Eusebius (*Onom.* 288, 9) and Jerome (*ib.* 146, 19), Brocardus (c. 6) and Adrichomius (p. 123).

2. (Ῥαμα) One of the cities on the boundary of the tribe of Asher near Tyre (Jos 19^{29}). 'And the border turned to Ramah, and to the fenced city of Tyre.' Robinson (iii. 64) considers there is no question (and in this he is followed by Guérin, *Galilée*, ii. 125 f., and *SWP*) that Ramah of Asher is represented by the modern village of *Râmia*. It is situated about 12 miles due east of the Ladder of Tyre, as the crow flies. It stands upon an isolated hill, in the midst of a basin with green fields, surrounded by higher hills. The south-western portion of the basin has no outlet for its waters; which therefore collect in a shallow, marshy lake, which dries up in summer. It is a small stone village with a few figs and olives: there are cisterns and a large *birket* for water-supply. There are many sarcophagi about the hillside, some of unusual size. One of the lids measured 7½ feet long and 2 feet broad. Robinson considered the remains generally 'a striking monument of antiquity.' West of *Râmia* is a lofty hill called *Belât*, on which are extensive ruins, and remains of a temple of which ten columns are still standing. There is no trace of Ramah of Asher in any historical records except the bare mention of the name by Eusebius and Jerome. Cf. Buhl, p. 231 n.

3. (Ῥεμμωθ, Ῥαμα) 2 K 8^{29} = 2 Ch 22^{6}. In this case *Ramah* is an abbreviation of RAMOTH-GILEAD (which see).

4. (Ῥαμα, in Hos 5^{8} τὰ ὑψηλά) A city of Benjamin which is possibly (see below) also identical with No. 6, the birthplace and home of Samuel, but for convenience of consideration it is taken separately. It is given in the list of 14 cities and their villages allotted to Benjamin (Jos 18^{25}), the greater number of which have been identified north of Jerusalem. The first three are Gibeon (*el-Jib*, 5 miles N.N.W. of Jerusalem and 3 miles west of *er-Râm*), Ramah (*er-Râm*, 2600 feet, 5 miles due north of Jerusalem and near the main road to north), Beeroth (*el-Bîreh*, 10 miles north of Jerusalem near main road to north). Isaiah (10^{29}) enumerates the positions that will be successively taken up by the king of Assyria as he approaches Jerusalem after laying up his carriages (*i.e.* baggage) at Michmash: 'They are gone over the pass: they have taken up their lodging at Geba; Ramah trembleth; Gibeah of Saul is fled.' The Levite (Jg 19^{13}), passing Jerusalem with his concubine when the day was far spent, passed on to Gibeah (*Tell el-Fûl*, 2 miles south of *er-Râm*), which was short of Ramah. The Palm-tree of Deborah was between Ramah and Bethel in the hill-country of Ephraim (Jg 4^{5}). *Beitîn* (Bethel) is 5 miles N. of *er-Râm*.

From these notices it seems to follow that *er-Râm* is the modern equivalent of Ramah. The distance from Jerusalem (5 miles as the crow flies) accords with the account of Eusebius and Jerome (*Onomast.* 287, 1; 146, 9: 6 m. N. of Jerusalem) and of Josephus (*Ant.* VIII. xii. 3).

After the separation of the kingdoms, Baasha king of Israel (1 K 15$^{17f.}$) went up against Judah and built (fortified) Ramah, 'that he might not suffer any one to go out or come in to Asa king of Judah,' showing that Ramah commanded the high road leading to Jerusalem; but Asa secured the assistance of Benhadad king of Syria, who smote the northern cities of Israel, so that Baasha desisted from building Ramah, and Asa took away the stones and the timber and built with them Geba of Benjamin and Mizpah (2 Ch 16$^{1-6}$). From this it would appear that Ramah was more suitable for defence towards the south than towards the north. After the destruction of Jerusalem, Ramah is mentioned as the place (Jer 40^{1}) where the captain of the guard over those who were carried away captive from Jerusalem loosed Jeremiah from his chains. Ramah was very near to Geba and Gibeah: see Is 10^{29} cited above, and cf. 'Blow ye the cornet in Gibeah and the trumpet in Ramah' (Hos 5^{8});* 'The children of Ramah and Geba' (Ezr 2^{26}, Neh 7^{30} [LXX Αραμα]).† It was also the traditional site of Rachel's tomb: 'A voice was heard in Ramah . . . Rachel weeping for her children' (Jer 31^{15}: cf. above, p. 193^{a}). The Ramah of Neh 11^{33} is, in all probability, the same place.

Er-Râm is a small village in a conspicuous position on the top of a high white hill, with olives: it has a well to the south; west of the village is a good *birket* with a pointed vault; on the hill are cisterns. At *Khân er-Râm*, by the main road, is a quarry; and drafted stones are used up in the village walls (*SWP* iii. 155). The height of the village is about 2600 feet.

---

* But in 1 S 22^{6} 'Saul was sitting in Gibeah . . . in Ramah' render 'in Gibeah . . . *on the height*' (Keil, Kirkp., etc., RVm), even, indeed, if we should not read, with LXX (ἐν Βαμα) and H. P. Smith, 'on the *high place*.'—S. R. D.

† In 1 Es 5^{20} we find *Kirama* (K(ε)ιραμά) instead of *Ramah*.

C. WARREN.

5. Ramah of the South (רָאמַת נֶגֶב; Βαμεθ (A Ιαμεθ) κατὰ λίβα).—'Height of the south,' a city of Simeon (Jos 19[8]), at its extreme southern limit, apparently another name for BAALATH-BEER, with which it is in apposition in this passage. It appears to be the same as Ramoth of the South (1 S 30[27], LXX here also has the singular, Ῥαμα νότου). The verse is not contained in the parallel list (in the description of Judah), Jos 15[26-32] (after v.[32]); and in the transcript in 1 Ch 4[28-33], though (v.[33]) Baal (=Baalath-beer: LXX Βαλατ) is mentioned, the alternative name 'Ramah of the South' is not given. Nor is it mentioned by Eusebius or Jerome. Its situation is quite uncertain. It has been placed on a low ridge called Ḳubbet el-Baul, about 35 m. S. of Hebron, on the main route from Hebron to Petra; or (Tristram, *Bible Places*, 23) at Kurnub, a little further to the S. (see Rob. ii. 197, 198, 202); but either identification rests upon slight grounds (cf. Dillm. on Jos 15[24]; Buhl, 184).

6. 1 S 1[19] 2[11] 7[17] 8[4] 15[34] 16[13] 19[17f. 22f.] 20[1] 25[1] 28[3]; in 1 S 1[1], also, Ramathaim,* 'the double eminence,' or 'the two Ramahs' (הָרָמָתַיִם: LXX in all the passages quoted (+19[22a]), except 19[19. 22b. 23] 20[1], has Αρμαθαιμ, which it also inserts in 1 S 1[3] after 'his city': comp. 1 Mac 11[34] Ῥαμαθεμ [so MSS; Aℵ corruptly Ῥαθαμειν], Pesh. ܪܡܬܝܡ). The birth-place, residence, and burial-place of Samuel (1 S 1[1] 7[17] 28[3]). The question of its site is difficult; and there have been many claimants for it. All that we definitely know about it is that it was on an eminence, as its name 'Ramah' implies, and that it was in the hill-country of Ephraim, not too far either from Shiloh, the sanctuary to which the parents of Samuel went up yearly to sacrifice (1 S 1), or from Bethel, Gilgal, and Mizpah (Neby Samwîl), the places visited by Samuel in his annual circuits as judge (1 S 7[16. 17]). Although this has been doubted, it is also extremely difficult to avoid identifying it with the unnamed city where Saul found Samuel (1 S 9), and which is spoken of as if it were the seer's habitual residence (vv.[6. 18]).

As regards antiquity, Eusebius writes (*Onom.* 225, 11 ff.): 'Αρμαθεμ Σειφα [as LXX]. The city of Elkana and Samuel. It lies near Diospolis [Jerome, *ib.* 96, 18, adds, 'in the district of Timnah' (in regione Thamnitica)]; thence came Joseph, said in the Gospels to be from Arimathea.' And in 1 Mac 11[34] Ramathem is mentioned, together with Aphærema (Ephraim, 5 m. N.E. of Bethel) and Lydda (=Diospolis), as three toparchies which had belonged to Samaria, but were in B.C. 145 transferred to Judæa. These notices would agree with a site *Beit-Rima*, a village on a hill 13 m. E.N.E. of Lydda (Diospolis), and 2 m. N. of Timnah (Tibneh), proposed originally by Furrer in Schenkel's *Bibellexicon* (cf. Schürer, i. 183), and adopted by G. A. Smith, *HGHL* 254, and Buhl, 170. It is true, Eus. says '*near* Diospolis': but the word need not be understood too strictly;* and there are other passages in which the 'district of Timnah' is reckoned by him as belonging to the ὅριον Διοσπόλεως (219, 84=Jerome 92, 4; 239, 93-4=Jerome 107, 12-14: so Timnah itself, 260, 4 =156, 7). Beit-Rima is 12 m. W. of Shiloh, and 12 m. N.W. of Bethel, on the W. edge of the hill-country of Ephraim.†

Another possible site for Ramah would be *Râm-allah*, 3 m. S.W. of Bethel, and 12 m. S.W. of Shiloh, now a large Christian village, standing on a high ridge, with rock-cut tombs, and overlooking the whole country towards the W. as far as the sea (*BRP* i. 453 f.; *PEF Mem.* iii. 13). This was suggested by Ewald (*Hist.* ii. 421), with the remark that its present name, 'the high place of God,' seems still to mark it as a place of ancient sanctity. Râm-allah has not the same support of tradition that Beit-Rima enjoys; but (if Ramah be the city of Samuel of 1 S 9) it seems to agree better with the terms of 1 S 9[4end. 5]; for Râm-allah, though, if it were Ramathaim, it would be in 'the hill-country of Ephraim' (1 S 1[1]), might also, as seems to be implied of the city in 1 S 9 (vv.[4end. 5]), be regarded as being in Benjamin (cf. Jg 4[5]). Saul would probably, on his route home to Gibeah, pass naturally near Rachel's sepulchre, on the (N.) 'border' of Benjamin (1 S 10[2]), somewhere near er-Râm (No. 4), and might also 'meet' naturally men 'going up' to Bethel (v.[3]), whether his starting-point were Beit-Rima or Râm-allah.

Of other, less probable identifications, the following may be mentioned:—

(1) Ramleh. The traveller of to-day, as he journeys through the Maritime Plain from Joppa to Jerusalem, is assured by his dragoman, when he reaches Ramleh (12 m. S.E. of Joppa, 2 m. S.W. of Lydda), that this is the Arimathæa of the Gospels. As Robinson (*BRP* ii. 234–41) shows at length, there is no ground for this identification. Ramleh is no ancient city; it was built by Suleimân, after he had destroyed Lydda, in the 8th cent. A.D.; and it is first mentioned (acc. to Robinson, p. 234) in 870 (under the form *Ramula*) by the monk Bernard. The name Ramleh signifies *sand*; and has no etymological connexion whatever with Ramah, *high*. Ramleh is also in the Maritime Plain, not, like Ramathaim, in the 'hill-country' of Ephraim.

(2) Neby Samwîl, the commanding and conspicuous eminence (2935 ft.) above Gibeon, 4½ m. N.W. of Jerusalem. Procopius (*c.* 560) mentions a monastery of 'St. Samuel' in Palestine (though without indicating its site); and in the Crusaders' time a church of 'St. Samuel' was built (A.D. 1157) at Neby Samwîl, which, with Moslem additions (including a minaret), remains, though partly in a ruined state, to the present day; close by, and once probably in the nave of the church, is the cenotaph of the prophet, now a Moslem wely (cf. Robinson, *BRP* i. 459 f.; *SP* 214 f.; *Tent-Work*, 258 f.; *PEF Mem.* iii. 12 f., 149–152, with views). The Ramah of Samuel was identified, at least provisionally, with Neby Samwîl by Mr. (afterwards Sir G.) Grove (in Smith's *DB*). The tradition connecting the place with Samuel is, however, very late; and Neby Samwîl is much more probably Mizpeh (Rob. i. 460; *HGHL* 120; Buhl, 167 f.).

(3) Other identifications that have been proposed are Sôba, on an elevated conical hill, 5 m. W. of Jerusalem (Robinson, ii. 7–10); the Frankenberg, or Jebel Fureidis, the ancient Herodium, 4 m. S.E. of Bethlehem (Ges. *Thes.* 1276[a]); er-Râm, said

---

* '**Ramathaim-zophim**' (הָרָמָתַיִם צוֹפִים) is grammatically impossible. Of course the expression cannot mean 'the heights of the views' (!), as the reader of *Tent-Work* (p. 257) is gravely informed. LXX for צוֹפִים has Σειφα, showing that the final ם has arisen by dittography from the following word. Read either 'a man of Ramathaim, a Zuphite (צוּפִי; see 1 S 9[5]) of the hill-country of Ephraim' (Wellh., Driver, Löhr); or (though this is not the usual way of designating a person's native place in the OT) 'a man of the Ramathites (מִן־הָרָמָתִים: 1 Ch 27[27]), a Zuphite,' etc. (Klost., Budde, H. P. Smith). The dual 'Ramathaim,' though by no means unparalleled (cf. *Kiriathaim*, *Gederothaim*), is remarkable, in view of the sing. *hā-Rāmāh* in v.[19] and everywhere else.

* Lydda, as Robinson, *BRP* ii. 240, observes, though 11 miles from Joppa, is said in Ac 9[38] to be 'near' to it.

† Elsewhere, however (146, 25 f.; 288, 11 f.), Eus. and Jerome identify Arimathæa with a Ῥεμφις or Remfthis, also ἐν ὁρίοις Διοσπόλεως,—supposed to be the village of Rantieh, 6 m. N of Lydda.

to be a little N. of Beth-lehem, and E. of the so-called 'Rachel's tomb,' but not known to Rob. (ii. 8 *n.*) or marked on the *PEF* map (Bonar, *Land of Promise*, 114); Ramet el-Khalîl, 1 m. N. of Hebron (van de Velde, *Syr. and Pal.* ii. 50); and the two heights ('Ramathaim') of 'Alfa (2960 ft.) and Bireh (2980 ft.), 3 m. W.S.W. of Beth-lehem—the latter ½ m. S. of the former, but without a name on the *PEF* map (Schick, *PEFSt*, 1898, p. 16 f., with map). But it is incredible that any of these places can have been regarded as being in *Ephraim* (1 S 1^{1}); and, except the first, they are all connected with the identification of 'Rachel's sepulchre' in 1 S 10^{2} with the place now shown as 'Rachel's tomb,' 1 m. N. of Beth-lehem, which (see p. 193^{a}) seems impossible.
S. R. DRIVER.

RAMATHAIM, RAMATHAIM-ZOPHIM.—See RAMAH, No. 6.

RAMATHITE (הָֽרָמָתִי; B ὁ ἐκ Ῥαήλ, A ὁ Ῥαμαθαῖος).—Shimei the Ramathite was over the vineyards of king David, 1 Ch 27^{27}. Which of the Ramahs enumerated in art. RAMAH is in view here, must remain uncertain.

RAMATH-LEHI.—See LEHI.

RAMATH-MIZPEH (רָמַת הַמִּצְפֶּה; B Ἀραβὼθ κατὰ τὴν Μασσηφά, A Ῥαμὼθ . . . Μασφά).—Mentioned in Jos 13^{26} only as one of the limits of the tribe of Gad to the north, Heshbon being the limit to the south. It may be identical with Mizpah (and Mizpeh) of Gilead (see MIZPAH, No. 1).
C. WARREN.

RAMESES.—See RAAMSES.

RAMIAH (רַמְיָה 'Jah is high'; Ῥαμιά).—One of the sons of Parosh who had married a foreign wife, Ezr 10^{25}, called in 1 Es 9^{26} HIERMAS.

RAMOTH.—1. In Ezr 10^{29} AV and RVm read 'and Ramoth' (*i.e.* וְרָמוֹת; B καὶ Μημών, A καὶ Ῥημώθ) for JEREMOTH (*i.e.* יְרֵמוֹת) of RV. In 1 Es 9^{30} the name is HIEREMOTH. Jeremoth or Ramoth was one of the sons of Bani who had married a foreign wife.

2. (רָאמוֹת, BA om.) A Gershonite Levitical city in Issachar, 1 Ch $6^{58\,(73)}$, apparently = REMETH of Jos 19^{21} and JARMUTH of Jos 21^{29} (see artt. on these names). 3. For 'Ramoth of the south' (רָמוֹת נֶגֶב) see RAMAH, No. 5. 4. For 'Ramoth in Gilead' (Dt 4^{43}, Jos 20^{8} 21^{38}, 1 Ch $6^{65\,(80)}$) see RAMOTH-GILEAD.
J. A. SELBIE.

RAMOTH-GILEAD.—A prominent city east of the Jordan belonging to the tribe of Gad, and first brought to our notice in the assignment of the Cities of Refuge, Dt 4^{43}, Jos 20^{8}. It was also a Levitical city, Jos 21^{38}. In four passages, the three just mentioned and 1 Ch 6^{80} [Heb.^{65}], all referring to this assignment, the form 'Ramoth in Gilead' (רָמוֹת בַּגִּלְעָד [in Dt 4^{43}, Jos 20^{8}, 1 Ch 6^{65} רָאמוֹת]) is used, but elsewhere it is simply Ramoth-gilead (רָמוֹת גל׳). Another early notice of this place belongs to the time of Solomon, and makes it the headquarters of one of the commissariat officers of that king, 1 K 4^{13}. See, also, RAMAH, No. 3.

Although it is mentioned as a well-known city, we have no account, in the Bible or elsewhere, of its origin. The greater its importance the more conspicuous it would naturally be; and this we find was the case, in the wars between the Syrian kings of Damascus and the Hebrews. Of these wars we have the fullest account of those occurring between B.C. 900 and B.C. 800, particularly during the reigns of Ahab, Ahaziah, Jehoram, and Jehu, kings of Israel. Although the southern kingdom sometimes acted as an ally, the brunt of these wars fell upon the Northern kingdom, since from its nearer position it was more especially interested in them than the kingdom of Judah. In one of these wars Ahab, king of Israel, was killed, 1 K 22^{34-37}, and at a later time his son Jehoram (Joram) was wounded, and was carried to Jezreel, 2 K $8^{28.\,29}$, in the neighbourhood of which he was shortly afterwards murdered by Jehu, who, by the directions of Elisha, had been anointed king of Israel.

In Hos 6^{8}[*] there is mentioned a city named Gilead, about whose identity there has been difficulty; but the probability is that Ramoth-gilead[†] is meant, the first word having been dropped, a thing well known in the history of OT double names.

The Babylonian Talmud (*Makkoth* 9*b*) places the Cities of Refuge in pairs, so that those on the east of the Jordan are opposite those on the west of that river. Shechem, being the middle one of the three west of the Jordan, should have Ramoth-gilead nearly opposite it on the east of the Jordan, and this would place its site at Gerasa, the modern *Gerash.* There is no reason for supposing that the Talmud in this case went out of its way to state something that was contrary to fact, especially at a time when the misstatement could so readily have been pointed out.

The main route from Shechem to the country east of the Jordan and on to Damascus is by the Damieh ford and Wâdy Ajlun. A carriage road with a very easy grade could be made along this valley, and this was the route by which the kings of Israel went back and forth with their chariots to fight the Syrians.

The attempt of Ewald and Conder to locate Ramoth-gilead at *Reimun* in the Gilead hills has little in its favour. This place has neither water nor ancient ruins, it is not a point where a prominent city would be built, it is not on or near the road from Shechem to the east, and the military operations carried on at Ramoth-gilead could never have taken place here. Nearly the same can be said of *eṣ-Salt*, another rival for the site of Ramoth-gilead. It has no ruins, and only a spring for water-supply, while Gerash has a large living stream running directly through the town. It ought to be stated that both these places were suggested for the site in question before the east Jordan country had been thoroughly explored. It seems now, however, that the results of modern research should have weight above the casual observations of a former period.

The testimony of Eusebius and Jerome, which frequently is of great service in determining topographical questions, is in this case conflicting, for one places Ramoth-gilead 15 miles west, and the other the same distance east of Philadelphia. (1) Ramoth-gilead, if placed at Gerash, where the writer is fully convinced it should be placed, would be suitable for a City of Refuge, because it would be on the main road of that part of the country. (2) For the same reason, and, moreover, because it was a central and wealthy city, it would be a suitable station for a commissariat officer. (3) Here chariots could be used freely, which is not true of eṣ-Ṣalt. (4) This identification confirms Jewish testimony that Ramoth-gilead was opposite Shechem. (5) It would confirm Jewish tradition that Gerash was identical with Ramoth-gilead. See a full discussion of this question in the writer's *East of the Jordan*, pp. 284–290.

LITERATURE.—Dillmann, *Genesis*, ii. 269; Buhl, *GAP* 262 (both locate Ramoth-gilead in the ruins of *el-Jal'ud*, some 6 miles N. of eṣ-Salt); Neubauer, *Géog. du Talm.* 55, 250 (inclines to identify with eṣ-Salt); Baedeker, *Pal.* 287; G. A. Smith, *HGHL* 586 ff. (would locate near the Yarmuk, farther north than the usual sites); Merrill, *East of the Jordan*, 284 ff.; Tristram, *Land of Israel*, 477, 552; Oliphant, *Land of Gilead*, 212; Conder, *Heth and Moab*³, 179 ff., *Bible Places*, ed. 1897, 394 f.; G. A. Cooke, *ap.* Driver, *Deut.* 'Addenda,' p. xx.
SELAH MERRILL.

RANGE.—To 'range' is to 'set in ranks' (the words are cognate: Fr. *rang*, Old Fr. *reng*, a row, of German origin), and a 'range' is a 'rank' or 'row.' When ranges or ranks of men scoured a country they were said to 'range' the country. That is the only use of the verb in AV, viz. in Pr 28^{15} 'As a roaring lion and a ranging bear.' Cf. Barnes, *Sonnets*, li.—

---

[*] Possibly also in Jg 10^{17}.

[†] Some MSS of Luc. recension have Γάλγαλα (Gilgal). See Nowack, *ad loc.*

> 'Who, like a rangying lyon, with his pawes
> Thy little flocke with daily dread adawes';

Golding, *Calvin's Job*, p. 579, 'It is a pity to see what man is; for he is so fraught with evill, that assoone as he hath a litle libertie given him, by and by he raungeth out on the one side or on the other, and will not hold the right way, but gaddeth astray, ye even or ever he thinke it.'

The subst. signifies: (1) files or rows of soldiers, 2 K $11^{8.15}$, 2 Ch 23^{14} ('Have her forth of the ranges,' Heb. שְׂדֵרוֹת); (2) the extent of one's ranging or roaming, Job 39^{8} 'The range of the mountains is his pasture' (יְתוּר); and (3) a grate or stove with rows of openings on the top for carrying on several processes at once, Lv 11^{35} 'ranges for pots' (כִּירַיִם, RV 'range,' RVm 'stewpan'). Cf. Spenser, *FQ*. II. ix. 29—

> 'It was a vaut ybuilt for great dispence,
> With many raunges reard along the wall,
> And one great chimney, whose long tonnell thence
> The smoke forth threw.'

J. HASTINGS.

RANSOM is the tr. in OT of the Heb. words כֹּפֶר, from כִּפֶּר 'to cover,' hence 'to propitiate,' 'to appease' (so AV and RV in Ex 30^{12}, Job 33^{24} 36^{18}, Ps 49^{7}, Pr 6^{35} 13^{8} 21^{18}, Is 43^{3}; and RV alone in Ex 21^{30}, Nu $35^{31.32}$, 1 S 12^{3}, where AV renders respectively 'sum of money,' 'satisfaction,' and 'bribe'); and פִּדְיוֹן, from פָּדָה 'to redeem' (so AV in Ex 21^{30}, RV 'redemption').* The verbal form פָּדָה is also occasionally rendered by 'ransom' instead of by the more usual 'redeem' (so AV and RV in Is 35^{10}, Hos 13^{14}, and RV in Ps 69^{18}, Is 51^{11}, Jer 31^{11}), and the same is true in two cases (AV in Is 51^{10}, Jer 31^{11}) of the parallel term גָּאַל.

In NT the word occurs only in Mt 20^{28}=Mk 10^{45} (where it renders the Gr. λύτρον), and 1 Ti 2^{6} (where it takes the place of the rare word ἀντίλυτρον). In both cases it is used of Christ's gift of Himself for the redemption of men. 'The Son of Man came not to be ministered unto, but to minister, and to give his life a ransom for many.' 'There is . . . one Mediator between God and men, *himself* man, Christ Jesus, who gave himself a ransom for all.'

For the understanding of these NT passages the OT offers us two possible conceptions, corresponding in general to the different Heb. equivalents of the Gr. λύτρον.† On the one hand, if regarded as taking the place of some word from the stems פדה or גאל, it may refer to the money payments required under the law to secure the release of persons from slavery (*e.g.* Ex 21^{8}, Lv 25^{47-49}; cf. 1 P $1^{18.19}$, Gal 3^{13}, and the passages cited under REDEMPTION). On the other hand, if taken as the equivalent of כֹּפֶר (lit. 'covering,' hence 'propitiatory gift'—restricted, however, by usage to a gift offered as a satisfaction for a life; see art. PROPITIATION, § 6), it may denote the ransom paid by an offender either to man (Ex 21^{30}, Nu $35^{30.32}$, Pr 6^{35}) or to God (Ex 30^{12}, Ps 49^{7}) in order to save the life which he has forfeited by his wrongdoing.‡

Those exegetes who regard λύτρον as suggesting פדה or גאל, interpret Mk 10^{45} after the analogy of 1 P $1^{18.19}$, and understand Jesus as teaching that His life is the ransom price by which He redeems His disciples from bondage (so Wendt [*Teaching of Jesus*, ii. p. 226 ff.], who thinks of deliverance from suffering and death; Beyschlag [*NT Theol.* i. p. 153], who thinks of freedom from sin). This view is possible even if we take λύτρον as the tr. of כֹּפֶר (so Briggs [*Mess. Gosp.* p. 111], who cites Is 43^{3} 'I have given Egypt as thy ransom,' where the context makes it clear that the thought is of deliverance from captivity. The כֹּפֶר paid by J" to Cyrus releases Israel; cf. the parallel 'Seba *instead of* thee'). In this case we must regard the ransom as paid to the one who holds the prisoners captive. The older interpreters, taking the figure literally, taught that Christ's death was a ransom paid to Satan. Modern exegetes either think of the recipient as an impersonal power, such as death (Wendt), 'sin and evil' (Briggs), or 'that ultimate necessity which has made the whole course of things what it has been' (Sanday, *Romans*, p. 86), or else, relying on the figurative character of the language, refuse to raise the question at all (cf. Westcott, *Hebrews*, p. 296).

The other interpretation, starting with כֹּפֶר as a propitiatory gift offered in satisfaction for a life, makes God the recipient of the ransom. Thus Ritschl, following Ps 49^{7} and Mk 8^{37}, thinks of the life of Jesus as a precious gift, offered to God in order to ransom from death those who were unable to provide a sufficiently valuable כֹּפֶר for themselves (so Weiss, *Bibl. Theol.* p. 101; Runze, *ZWTh*, 1889, p. 148 ff.; Cremer, *Bib.-Theol. Wörterb.* p. 594). In this case the thought is clearly of deliverance from penalty; and the nearest parallel is to be found in Mt 26^{28}, where Jesus compares His death to a covenant sacrifice, offered for the remission of sins upon the occasion of the establishment of the new covenant between God and the disciples. (Cf. Tit 2^{14}, He 9^{12}, 1 P $1^{18.19}$, where the combination between the ransom and the sacrificial figures is clearly found). The exact meaning will vary according as we associate ἀντί with λύτρον alone (Cremer), or with the whole clause (Ritschl, Weiss). In the first case the comparison will be between the life of Jesus and that of the many whose place it takes; in the latter it will merely express the fact that, in laying down His life, Jesus takes the place of the disciples in doing that which they ought to do for themselves.

Whichever interpretation we take, it is important not to isolate the death of Jesus from the life which precedes it. It is not the death as such which is a ransom, but the death considered as the culmination and completion of a previous career of ministry. This is clearly shown by the preceding context, 'The Son of Man came not to be ministered unto, but to minister, and to give His life a ransom for many.' We have here the same combination of suffering and service which meets us in the OT in the Suffering Servant of Is 53. It is clear, therefore, that the gift of which our Lord speaks should not be confined to the death on the cross, but includes also His 'entire Person and service which He gives in ministry' (Briggs, p. 111; so Weiss, Wendt).

It is to be noted that while Mk 10^{45} speaks of the life of Christ as given for many, 1 Ti 2^{6} gives the ransom a universal significance: 'Christ Jesus . . . who gave himself a ransom for all.'

See, further, under REDEMPTION, SALVATION.

LITERATURE.—Ritschl, *Rechtf. und Vers.* ii. pp. 68-88; Runze, *ZWTh*, 1889, p. 148 ff.; Weiss, *Bibl. Theol.* p. 74 [Eng. tr. p. 101]; Beyschlag, *Neutest. Theol.* i. p. 149 [Eng. tr. i. p. 152]; Wendt, *Lehre Jesu*, ii. p. 509 ff. [Eng. tr. ii. p. 226 ff.]; Cremer, *Bibl.-*

---

* Elsewhere only Ps 49^{8} (AV and RV 'the redemption of their soul [life]'); cf. כֶּסֶף פִּדְיוֹם Nu $3^{49.51}$ (*Kethibh*) [all], RV 'redemption-money.'

† This word stands in the LXX for derivatives of פדה in Ex 21^{30b}, Lv 19^{20}, Nu $3^{46.48.49.51}$ (cf. v.^{12}) 18^{15}; of גאל in Lv $25^{24.26.51.52}$ 27^{31}; for כֹּפֶר in Ex 21^{30a} 30^{12}, Nu $35^{31.32}$, Pr 6^{35} 13^{8}; and for מְחִיר 'price' in Is 45^{13}.

‡ The distinction between the Heb. terms is not always maintained, for פִּדְיוֹן נֶפֶשׁ is virtually=כֹּפֶר; see Ex 21^{30}, Ps $49^{7.8}$, also Job 33^{24} if (as is probable) פדעהו is an error for פְּדָהוּ.

Theol. Wörterb. s. λύτρον; Westcott, *Hebrews*, 229 ff.; Briggs, *Mess. Gosp.* p. 110 ff. For similar ideas among the later Jews, cf. Weber, *Jüdische Theologie*, p. 313 ff.

W. ADAMS BROWN.

RAPE.—See art. CRIMES AND PUNISHMENTS in vol. i. p. 522^{b}.

RAPHA, RAPHAH.—1. In RVm these names are substituted for 'the giant' in 1 Ch 20$^{4.6.8}$ (הָרָפָא) and in 2 S 21$^{16.18.20.22}$ (הָרָפָה) respectively. It is there said that certain Philistine champions, slain by David's heroes, were born to the *rāphāh* in Gath. The word is certainly a common noun, and not a proper name. If used individually, 'the giant' is probably the Goliath whom David slew. But more probably the noun is a collective, and denotes the stock of the giants, rather than any one person. The plural of this word, or at least a plural of this stem, is REPHAIM (which see).

2. For Raphah (AV Rapha), a descendant of Saul, 1 Ch 8^{37}, see REPHAIAH, No. 4.

W. J. BEECHER.

RAPHAEL (רְפָאֵל; LXX Ῥαφαήλ, 'El has healed') is not named in the Hebrew Scriptures, and in the LXX only in Tobit. His functions may best be learned from his own words in To 12$^{12-15}$, where, combining the different versions, we read, 'I am Raphael, one of the seven angels who stand and serve before the throne of God's glory, presenting the prayers of saints. I brought the memorial of your prayers and tears before the Holy One. When thou didst bury the slain, I was with thee; and now God hath sent me to heal thee.' On this passage we would observe: (1) The 'seven angels,' of whom Raphael declares himself one, were probably Raphael, Gabriel, Uriel, Michael, Izidkiel, Hanael, and Kepharel. We read in Rev 8^{2} of 'the seven angels who stand before God'; and in 1^{4} of 'the seven spirits who are before the throne' (but this passage is understood by most expositors to refer to the Holy Spirit, cf. 5^{6}); and 'which are sent forth into all the earth,' 5^{6}. (2) These seven are the archangels, the princes of the angelic host. They stand near the throne of glory, and were conceived to be the only angels who are permitted to enter within the radiance. Gabriel describes himself (Lk 1^{19}) as one that 'stands in the presence of God.' (3) The doctrine of Divine aloofness, which was pushed to extreme lengths in late Judaism, has, here in Tobit, reached thus far, that God does not Himself hear prayer. He was thought, as Epicurus also taught, to be engaged in higher pursuits. Prayers which by their importunity or worth reach heaven, are heard by the angels of the Presence, and are carried to the throne by them, and then they are commissioned to execute the answer. There is no clear evidence in Tobit that prayer was presented *to* the angels; though Cod. B in To 3^{16} almost implies this, where we read, 'The prayer of both was heard before the glory *of the great Raphael.*' All the other versions read 'before the glory *of God.*' The Book of Tobit does not assign to Raphael any intercessory mediation. He is simply a messenger, reporting to the Ineffable man's prayers and tears, cf. Ae 10^{4}, Rev. 8^{3}. (4) Raphael served holy men as a *guardian angel.* When Tobias was in danger of losing his life for burying Jews who had been massacred in Nineveh, Raphael 'was with him,' protecting him. But the unique feature of the Book of Tobit is that Raphael is said to have assumed a human form, claiming to be a kinsman of Tobit, and travelling as guide with him from Nineveh to Ecbatana. While the wedding festivities of Tobit and Sarah were being celebrated, Raphael went forward to Rages in Media, for the money which Tobias had, years before, deposited with his friend Gabael, and eventually Raphael brought the bridal pair safe home. Before taking his leave Raphael assures Tobias that when he seemed to them to eat and drink, they were under an illusion, To 12^{19}. (5) The chief characteristic of Raphael was as a *healer of men's maladies.* Tobias, the father of Tobit, was afflicted with *leucoma* in the eyes; and Sarah was possessed by the demon Asmodæus, who had, on the first night of marriage, slain seven husbands who had been married to Sarah. By the fumes of the heart and liver of a fish burnt on embers, Raphael instructed Tobit how to expel the demon, and to use the gall of the same fish to cure Tobias' blindness.

In Enoch 10 Raphael and Michael both receive a commission from God to punish the fallen angels, who had married human wives. The reason why Raphael was bidden to cast the angels into cavities, and cover them for ever with rugged stones, was, that he might *heal* the earth, which had been defiled by the enormities of the 'watchers.' Jewish tradition names Raphael as the third of the angels who appeared to Abraham in Gn 18, his duty being to impart to Sarah 'strength to conceive seed,' cf. He 11^{11}, Ro 4^{19}. The Midrash speaks of a *Book of Noah* (see vol. iii. p. 557^{a}), which was one of the earliest treatises on medicine. The origin of this book is said to have been that after the Flood men were afflicted with various diseases, and God sent the angel Raphael to disclose to Noah the use of curative plants and roots (Rönsch, *Buch der Jubiläen*, 385 f.). Thus was Raphael true to his name, 'El has healed.'

J. T. MARSHALL.

RAPHAIM (A Ῥαφαΐν, ℵ Ῥαφαεΐν, B om.).—An ancestor of Judith, Jth 8^{1}.

RAPHON (Ῥαφών).—A city in Bashan, 'beyond the wādy' (*πέραν τοῦ χειμάρρου*), near which Timotheus sustained a defeat at the hands of Judas Maccabæus (1 Mac 5^{37}). It is no doubt the *Raphana* of Pliny (*HN* v. 16), but the site has not yet been identified.

C. R. CONDER.

RAPHU (רָפוּא 'healed'; Ῥαφού).—The father of Palti, the spy selected from the tribe of Benjamin, Nu 13^{9}.

RASSES (BA Ῥασσεις, ℵ Ῥαασσεις, Lat. *Cod. corb.* and Vulg. *Tharsis* [=Tarsus], Old Lat. *Tyras et Rasis*, Syr. *Thiras* (Gn 10^{2}) *and Raamses* (Ex 1^{11})).—Among the peoples which Holofernes subdued are mentioned 'the children of Rasses' (Jth 2^{23}). Some think the Vulg. *Tarsus* is original, the Greek a corruption, the Old Lat. and Syr. a union of the two. Fritzsche suggested *Rhosos*, a mountain chain and city south of Amanos, on the Gulf of Issus. Ball adds the possibility of *Rosh* (Ezk 38$^{2.3}$ 39^{1}). Eastern Asia Minor seems to be the general region which the connexion suggests.

F. C. PORTER.

RATHUMUS (Ῥάθυμος), 'the story-writer' or 'recorder,' 1 Es 2$^{16.17.25.30}$, is the same as 'Rehum the chancellor' of Ezr 4$^{8.9.17.23}$. The LXX of Ezra has merely transliterated the Aramaic title; 1 Es has either taken it as a proper name (*καὶ Βεέλτεθμος*, ^{16}), or tr^{d} it as a title (*ὁ [γράφων] τὰ προσπίπτοντα* ^{17}), or combined both these renderings (^{25}). See BEELTETHMUS, CHANCELLOR.

RAVEN (עֹרֵב *'ōrēbh*, *κόραξ*, *corvus*, Arab. *ghurâb*).—Both the Heb. and Arab. roots mean 'to be black.' The Arab. root also contains the idea of *leaving home.* From these two meanings the raven has come to be a bird of specially evil omen to the Arabs, who attribute to his presence the worst of presages of death and disaster. They are especially superstitious about the *ghurâb el-bên*, which they say is marked with white on his black coat, or has a red beak and legs. What bird is meant by these descriptions is not quite clear. It is probably fabulous.

The raven is the first bird mentioned by name in the Bible (Gn 8^{7}). The Heb. implies that the raven went out and stayed, probably feeding on carcases. The LXX and Vulg. seem to imply that it went out and stayed until the waters were dried up, and then returned. But there would have been no reason for its returning then. The raven was unclean (Lv 11^{15}, Dt 14^{14}). It is in part a carrion bird, and therefore uneatable. Ravens were commanded to feed Elijah, and did so (1 K 17$^{4-6}$). See article ELIJAH in vol. i. p. 688^{b}. God is twice said to provide for young ravens (Job 38^{41}, Ps 147^{9}). There is nothing especially significant in this. It is implied in the previous and succeeding verses that God provides for other wild animals. The stories that ravens neglect their young are fabulous. The allusion to the carrion-eating propensities of ravens (Pr 30^{17}) is true to nature. They are always found among the birds and animals which assemble around a carcass in Palestine. They, however, capture and eat lizards, hares, mice, etc. Their black colour is compared with that of the hair of the Shulammite's lover (Ca 5^{11}). They are among the ill-omened creatures which symbolize the desolation of Edom (Is 34^{11}). Ravens are not wholly flesh-eaters. On the contrary, they are very fond of chick peas and other grains, by devouring which they do vast damage to the farmers.

The term *'ōrēbh*, as well as *κόραξ*, is not confined to the raven. It doubtless includes all birds after its kind (Lv 11^{15}). Of these, besides *Corvus corax*, L., the raven, there are in Palestine *C. affinis*, Rüpp., the Fantail Raven; *C. cornix*, L., the Hooded Crow (Arab. *zâgh*); *C. agricola*, Trist., the Syrian Rook; *C. monedula*, L., the Jackdaw (Arab. *ḳâḳ*); *Garrulus atricapillus*, St. H., the Syrian Jay or Garrulous Roller (Arab. *'aḳâḳ*); and *Pyrrhocorax alpinus*, Koch, the Alpine Chough. Most of these eat vegetable food as well as animal, including grubs, worms, etc. To all would apply the words of Christ (Lk 12^{24}) in regard to God's provision for them, although they neither sow nor gather into storehouses. G. E. POST.

RAVEN, RAVIN.—To 'raven' is to seize with violence, to prey upon with greed or rapacity, and so 'raven' or 'ravin' is plunder or prey. The word comes from Lat. *rapina* plunder, through Old Fr. *ravine*, whence also Eng. 'ravine' a mountain gorge, and 'rapine' plunder. There is no connexion with the bird, the raven, whose name is of native origin, Anglo-Sax. *hrefn*.

The verb occurs in AV in Gn 49^{27} ('ravin,' intrans.), Ezk 22$^{25.27}$ ('ravening,' trans.), the Heb. being טָרַף to *tear as prey*. As a subst. 'ravin' is found in Nah 2^{12} 'The lion . . . filled his holes with prey, and his dens with ravin' (טְרֵפָה); and 'ravening' in Lk 11^{39} 'Your inward part is full of ravening and wickedness' (ἁρπαγή, RV 'extortion'). The adj. is either 'ravening' (Ps 22^{13}, Mt 7^{15}) or 'ravenous' (Is 35^{9} 46^{11}, Ezk 39^{4}).

An example of 'ravin' in the sense of 'plundering' is Udall, *Erasmus' Paraph.* i. 17—'Mekenesse obteyneth more of them that geve wyllyngly and of theyr owne accorde, then violence and ravine can purchase or obtayne by hooke and croke'; and in the sense of 'plunder,' 'booty,' Spenser, *FQ* I. xi. 12—

> 'His deepe devouring jawes
> Wide gaped, like the griesly mouth of hell,
> Through which into his darke abysse all ravin fell.'

J. HASTINGS.

RAZIZ (Ῥαζείς).—The hero of a narrative in 2 Mac 14$^{37ff.}$. Nicanor, having been informed against Razis (who is described as 'an elder of Jerusalem, a lover of his countrymen, and a man of very good report, and one called "father of the Jews" for his goodwill towards them'), sent a band of soldiers to apprehend him. He escaped arrest by committing suicide, the circumstances of which are described in revolting detail in 2 Mac. His conduct is criticised adversely by Augustine (*Ep.* civ. 6) in opposition to the Donatists, who admired it, as the author of 2 Mac. evidently did.

RAZOR (תַּעַר 'knife,' Nu 6^{5} 8^{7}, Ps 52^{2}, Is 7^{20}, Ezk 5^{1}; מוֹרָה 'razor,' Jg 13^{5} 16^{17}, 1 S 1^{11}).—It is not likely that originally there was any distinction between razors and knives, the same word תַּעַר being used in many passages for both, but a special word for razor (מוֹרָה, Arab. *mûs*) is used in the stories of Samson and Samuel. In the above passages the LXX uniformly tr. תַּעַר by *ξυρόν*, and מוֹרָה by *σίδηρος* except in Jg 16^{17} where B has *σίδηρος* but A *ξυρόν*. In early times razors were probably made of bronze, as other cutting instruments were. In Wilkinson's *Anc. Egypt.* 1878, vol. ii. p. 333 note, it is said of the barber, 'his instruments and razors varied at different times, being sometimes in shape of a small short hatchet with recurved handle; other instruments knife-shaped were also employed.' Forty years ago a peculiarly shaped razor, with a straight fixed handle, was in use in Syria; now European razors are universally used. W. CARSLAW.

REAIAH (רְאָיָה 'Jah hath seen').—**1.** The eponym of a Calebite family, 1 Ch 4^{2} (B Ῥαδά, A Ῥειά), probably to be preferred (so Bertheau and Kittel; Gray [*HPN* 236] is more doubtful) to HAROEH, 1 Ch 2^{52} (הָרֹאֶה 'the seer,' B Αἰώ, A Ἀραά). **2.** The eponym of a Benjamite family, 1 Ch 5^{5} (AV Reaia; BA Ῥηχά, Luc. Ῥαιά). **3.** A Nethinim family name, Ezr 2^{47} (B Ῥεήλ, A Ῥαιά)=Neh 7^{50} (B Ῥαεά, A Ῥααιά)=1 Es 5^{31} JAIRUS.

REAPING.—See AGRICULTURE.

REBA (רֶבַע).—One of the five kinglets of Midian who were slain by the Israelites, under Moses, Nu 31^{8} (Ῥόβοκ), Jos 13^{21} (B Ῥόβε, A Ῥέβεκ). Like his companions, he is called in Numbers a מֶלֶךְ ('king'), but in Joshua a נָשִׂיא ('prince,' 'chieftain').

REBECCA.—The NT and modern spelling (from the Gr. Ῥεβέκκα) of the name which is spelt in OT REBEKAH. The only occurrence of 'Rebecca' is in Ro 9^{10} (both AV and RV).

REBEKAH, in Ro 9^{10} REBECCA (רִבְקָה, *i.e. Ribhḳāh*; in Arab. *a cord with loops for tying lambs* or *kids*, from *rabaḳa, to tie* or *bind fast*; LXX and NT Ῥεβεκκα, Vulg. *Rebecca*).—Daughter of Bethuel, the son of Naḥor and Milcah, and consequently great-niece of Abraham (Gn 22$^{20.23}$); sister of Laban, and subsequently wife of Isaac. The idyllic story of the circumstances through which Rebekah became Isaac's wife is told by J, in his usual picturesque style, and at the same time with stress on the providence which overruled them (vv.$^{7b.12}$ [lit. 'cause it to meet—*i.e.* happen successfully—before me,' so 27^{20}]$^{14.27.48.50.51.56}$), in Gn 24. In accordance with Eastern custom (MARRIAGE, vol. iii. p. 270), the betrothal is arranged without Isaac's own personal intervention: Abraham sends his principal and confidential servant (v.^{2})—called in E (15$^{2f.}$) Eliezer—to find a wife for his son, not from among the Canaanites around him, but from his own relations in 'the land of his nativity': the servant proceeds accordingly to Aram-naharaim, to the 'city of Naḥor' (*i.e.* Ḥaran: cf. LABAN, vol. iii. p. 13^{b}); as he reaches the well outside the city (v.^{11}), he prays for a sign by which he may know Isaac's destined bride; and the damsel who fulfils it proves to be Rebekah. Laban and Bethuel, satisfied by the evidence of their uncle's prosperity (vv.$^{22. 30. 35}$; cf. v.^{10} [RV], v.^{53}), and of Isaac's prospective wealth (v.^{36b}), and recognizing in what had happened the hand of Providence (vv.$^{50. 51\ end}$, — 'spoken,' viz. by the facts), agree to the servant's proposal; Rebekah herself consents to return with him (v.$^{57f.}$), and so she becomes Isaac's wife, consoling him after his mother's death (v.^{67}).*

Like Sarah, Rachel, and Hannah, Rebekah was at first barren; and her barrenness ceased only after Isaac's entreaty (25^{21}),—according to the chronology of P (25$^{20. 26}$),—20 years after her marriage. On the oracle, received by her (25^{23}), shortly before the birth of her twin sons, see JACOB, vol. ii. p. 526. The next incident in Rebekah's life that we read of is on the occasion of Isaac's visit to Gerar (26$^{6-11}$), when, fearing lest her beauty (cf. 24^{16}) might attract admirers, and his own life be endangered in consequence, he passed her off as his sister (cf. Gn 20; and ISAAC, vol. ii. p. 484^{b}). Jacob was Rebekah's favourite son (25^{28}); and Gn 27 (JE) tells of the deed of treachery by which the ambitious and designing mother, 'sacrificing husband, elder son, principle, her own soul, for an idolized person,' secured for him his father's blessing (see more fully, on this narrative, JACOB, vol. ii. p. 527). After this, she prompted Jacob to flee to his uncle Laban, in order to escape Esau's vengeance, vv.$^{43-45}$: in the paragraph from P which follows (27^{46}–28^{9}), however, the motive upon which she urges his visit to Ḥaran, is that he may obtain a wife, not, like Esau (cf. 26$^{34. 35}$ P), from among the natives of Canaan, but from among Laban's daughters (see, further, *ibid.*). An isolated, and very possibly misplaced, notice (35^{8}) states that Deborah, Rebekah's nurse, who had accompanied her long before from Ḥaran (24^{59}), died after Jacob's return to Canaan, and was buried below Bethel. The death of Rebekah herself is not specially mentioned; but in 49^{31} (P) she is said to have been buried in the cave of Machpelah.

S. R. DRIVER.

RECAH.—In a genealogy contained in 1 Ch 4, the sons of Eshton (v.^{12}) are described as 'the men of Recah' (אַנְשֵׁי רֵכָה), a place which is not mentioned elsewhere in the OT, and is quite unknown. The LXX has B Ῥηχάβ, A Ῥηφά.

RECEIPT OF CUSTOM (τελώνιον, RV 'place of toll'), Mt 9^{9}, Mk 2^{14}, Lk 5^{27}. See PUBLICAN, TAXES, TOLL. For 'receipt' in the sense of 'place for receiving,' see Mandeville, *Travels*, 112, 'Men have made a lityllc Resceyt, besyde a Pylere of that Chirche, for to resceyve the Offrynges of Pilgrymes'; and Shaks. *Macbeth*, I. vii. 66—

> 'Memory, the warder of the brain,
> Shall be a fume, and the receipt of reason
> A limbeck only.'

RECHAB, RECHABITES ((בְּנֵי) בֵּית הָרֵכָבִים, בֶּן ר׳, רֵכָב), אַנְשֵׁי רֵכָב; LXX Ῥηχάβ [B in 2 S 4$^{5. 6. 9}$ Ῥεκχά, in 1 Ch 2^{55} Ῥηχά]; and Ἀρχαβεὶν in B, Ἀλχαβεὶν or Χαραβεὶν in A, Ῥαχαβεὶν in Q; Vulg. *Rechab, Rechabitæ*).—*Rēkhābh* is often explained as meaning 'a rider,' on camels, *i.e.* a name for a nomadic tribe. The names ברר֯כב (of a man), רכבאל (of a god), are found in Aramaic inscriptions (Lidzbarski, *Nordsem. Epigraph.* pp. 246, 369). The biblical *Rēkhabh* may be a contraction for רכבאל.

1. Rechab (in Jos. *Ant.* VII. ii. 1, Θάννος) ben-Rimmon the Beerothite, a captain of one of the 'bands' following Ishbosheth. He and Baanah murdered Ishbosheth, carried the news to David, and were put to death by his orders; 2 S 4$^{5ff.}$ J^{1} (Budde). Cf. BAANAH, ISHBOSHETH.

2. 3. Rechab in 1 Ch 2^{55} 'Hammath, the father of the house of Rechab,' and Rechab in Neh 3^{14}, 'Malchijah ben-Rechab,' sometimes reckoned as separate individuals, are to be identified with the following—

4. Rechab, Rechabites.—A clan of the Kenites, in later times, probably after the Return from the Captivity, incorporated in the tribe of Judah, *i.e.* in the restored Jewish community in Palestine, 1 Ch 2$^{3. 55}$.

The view that the Rechabites were a religious sect, founded by Jehonadab (2 K 10$^{15-28}$, Jer 35), is improbable; although Dillmann, Oehler, Schultz, etc., speak of him as 'the founder of the Rechabites.' It is not likely that the founder of the Rechabites would himself be described as '*ben-Rechab*'; moreover, 1 Ch 2^{55} speaks of Hammath (AV Hemath) as the 'father of the house of Rechab.'

This clan is traced back (1 Ch 2^{55}) to Hammath (חַמַּת = 'hot spring,' LXX B Μεσημά, A Αἱμάθ), a descendant of Hur, the son of Caleb, *i.e.* a clan of the Calebite branch of the Kenites. The view of Bertheau (*in loco*), that Rechab was the actual father and Hammath the grandfather of the Jehonadab of 2 K 10, etc., is contrary to all analogy. Jos 19^{35} (P) mentions a town *Hammath* in Naphtali. As a settlement of Kenites under Heber and Jael existed somewhere in that district in the time of Deborah (Jg 4^{17} 5^{24}), and the Rechabites belonged to the Northern Kingdom in the time of Jehu, it is possible that the Rechabites had some connexion with this town before they migrated to Judah. It is clear, however, from Jer 35 that they were a nomad tribe up to the fall of the Southern Kingdom. Moreover, according to Kittel (*SBOT*), 1 Ch 2^{55} is part of a late addition to Chronicles.

The Rechabites appear in the OT on three occasions. First, in the person of Jehonadab ben-Rechab (*i.e.* 'the Rechabite'), in 2 K 10$^{15ff.}$. Jehonadab showed his zeal for the exclusive worship of Jehovah by associating himself with Jehu in his fierce persecution of the devotees of Baal. Josephus reproduces the biblical narrative in *Ant.* IX. vi. 6, and mentions Jehonadab, but does not say that he was a Rechabite. The second incident is narrated in Jer 35. Some time after the reign of Jehu, probably about the period of the Fall of Samaria, the Rechabites had migrated to Judah. When Nebuchadrezzar invaded Judah in the reign of Jehoiakim, the Rechabites took refuge in Jerusalem, probably encamping in some open space within the walls. Jeremiah utilized their presence to provide an object-lesson for his fellow-countrymen. Amongst other prohibitions, their clan-laws forbade them to drink wine. The prophet invited the clan under their chief, Jaazaniah ben-Jeremiah ben-Habazziniah, to meet him in a chamber attached to the temple, and offered them wine. They refused on the ground that their 'father' Jonadab ben-Rechab had forbidden them to drink wine, build houses, sow seed, or plant vineyards, and had commanded them to live in tents. They stated that they had always obeyed these commands, and had entered Jerusalem only through sheer necessity. Josephus does not reproduce this incident, nor does he anywhere mention the Rechabites.

The Rechabites therefore regarded Jonadab much as the Israelites regarded Moses. They traced to him their clan-law. It is not likely, however, that he originated the customs which he made permanently binding. In his time the Rechabites, of whom he was doubtless chief, were a nomad clan pasturing their flocks in the less occupied districts of the Northern Kingdom; they and their chief were zealous worshippers of Jehovah. In the natural course of events they would have followed the example of the Israelites, once their fellow-nomads, and settled down as farmers and townsmen. Probably the process was beginning in the time of Jonadab; but that chief nipped it in the bud, and induced his followers to make their ancient nomadic habits matters of religious obligation. He had no leanings to asceticism, and his ordinances were not intended to make his followers ascetics. He forbade wine, but the term 'wine' is to be understood strictly; there is no prohibition of any other intoxicant. His motives would be twofold. First, the nomad regards agriculture and city life as meaner, less manly, less spiritual than his own. Jonadab wished to keep his clan to the higher life. Moreover, when the Israelites surrendered nomad life to settle on the land and in towns, they corrupted their worship of Jehovah by combining it with the superstitious and immoral rites of the Canaanite baals, to whom, as they thought, they owed their corn and wine and oil, Hos 2^{8}. Recently, under Ahab and Jezebel, the worship of Baal had greatly developed. The cultivation of corn and of the vine seemed to lead directly to baal-worship; and it would seem to Jonadab that by cutting off his people from any connexion with agriculture he would preserve the purity and simplicity of their ancient worship of Jehovah.

---

* Which, however, though only according to P, had taken place three to four years previously (17^{17} 23^{1} 25^{20}).

Probably the Rechabites were still in Jerusalem when the city was taken by Nebuchadrezzar, and some of them shared the Captivity and the Return of the Israelites. Under stress of circumstances, they would be obliged to finally surrender their ancestral customs, so that in Neh 3^{14} we find Malchijah the Rechabite engaged under Nehemiah in rebuilding the walls of Jerusalem. Malchijah is styled 'ruler of the district of Beth-haccherem,' *i.e.* of the 'House of the Vineyard.' The very obscure verse 1 Ch 2^{55} describes 'The families of scribes that dwelt at Jabez'—a town in Judah—'the Tirathites, the Shimeathites, the Succathites,' as 'Kenites that came of Hammath, the father of the house of Rechab.' This points to the settlement of some Rechabites in late post-exilic times at Jabez as 'scribes.' The Vulgate regards the words rendered 'Tirathites,' etc., as titles of three classes of scribes, 'canentes atque resonantes, et in tabernaculis commorantes' = 'singers, makers of an echo or of a ringing sound [? chorus], and dwellers in tents,' but the words are proper names (so LXX), and denote three clans of the men of Jabez.

The promise of Jer $35^{18f.}$ that because the Rechabites had kept the laws of Jonadab, 'Jonadab ben-Rechab shall not want a man to stand before me for ever,' might lead some later Rechabites to revert to their ancient clan customs. It would also lead those who lived like other Jews to keep up the memory of their descent from the ancient Rechabites. Jeremiah does not expressly state that the fulfilment of his promise is dependent on the continued observance of the laws of Jonadab. But, on the other hand, this promise and its implied conditions would naturally lead communities or individuals which observed some or other of these laws to adopt the name 'Rechabite,' and to imagine a genealogy connecting them with Rechab. Thus, in modern time, a Total Abstinence Society, whose members live in houses and do not abjure corn or oil, styles itself the 'Rechabites.' Probably this is the explanation of the statement of Hegesippus (*ap.* Eus. *HE* ii. 23), that 'one of the priests of the sons of Rechab, the son of Rechabim, who are mentioned by Jeremiah the prophet,' protested against the murder of James the Just, especially as Epiphanius (*Hær.* lxxviii. 14) substitutes Symeon the brother of James for the Rechabite (so E. H. Perowne in Smith's *DB*). The name had become a term for an ascetic. A similar view explains the fact that travellers—Benjamin of Judæa, 12th cent.; Wolff, 1829; Pierotti, *c.* 1860—have found tribes in Syria and Arabia claiming the name Rechabite and professing to observe the laws of Jonadab. These tribes are probably connected with the ancient Rechabites in just the same way as the Total Abstinence Society mentioned above. Moreover, as words for 'horseman,' 'camel-rider,' in Heb., Aram., and Arab., are derived from the root *rkb*, it is easy to see how tribes might be called 'Rechabites' without any connexion, real or imaginary, with the Old Testament clan.

In Ps 71 (LXX 70) the LXX has the title *Τῷ Δαυεὶδ, υἱῶν* Ἰωναδάβ (R Ἀμιναδάμ), *καὶ τῶν πρώτων αἰχμαλωτισθέντων*, 'To David, of the Bnê Jonadab (R Aminadam, *i.e.* Aminadab) and of those first carried away captive.' This title has sometimes been adduced as evidence of the existence and importance of the Rechabites in the 3rd or 2nd cent. But the origin, text, and meaning of the title are too uncertain to warrant any such conclusion. Jonadab may be the cousin of David; or, as the reading of R suggests, a scribe's error for some other name.

The devotion of the Rechabites to Jehovah is illustrated by the zeal of Jonadab and by the fact that all the names of individual Rechabites known to us include the Divine name Jehovah, viz. Habazziniah, Jaazaniah, J(eh)onadab, Jeremiah, and Malchijah. It has generally been supposed that the Kenites were led to adopt the worship of Jehovah through their association with the Israelites; and that the zeal of Jonadab, like that of Jehu, was inspired by the teaching of Elijah and Elisha. But recent scholars, *e.g.* Budde, have pointed out the close association of Jehovah with Sinai, and of Moses with the Kenites (see JETHRO, HOBAB), and have suggested that the Israelites adopted the worship of Jehovah from the Kenites, and that the Kenites, and therefore the Rechabites, were by ancient practice and tradition the most devoted followers of Jehovah in Israel; hence the zeal of Jonadab. It should be noted, however, that the only direct evidence for the connexion of the Rechabites with the Kenites is the very late and obscure passage in Chronicles.

As the Rechabite laws are simply the ordinary customs of nomads,—for primitive nomads the regular use of wine was impossible,—it is easy to find numerous parallels to them. Probably even the prohibition of wine is not strictly and directly religious, but merely a means for preserving the nomadic life. Hence Mohammed's prohibition of wine and similar laws or taboos (cf. *RS* 484 f.) are not real parallels. Of others commonly cited is the statement of Diodorus Siculus (xix. 94, *c.* 8 B.C.), that the Nabatæan Arabs forbade sowing seed, planting fruit-trees, using or building houses, under pain of death. Cf., further, JEHONADAB, JEREMIAH, KENITES, TIRATHITES, SHIMEATHITES, SUCCATHITES.

5. In Jg 1^{19} the LXX has for 'because they had chariots (*rekhebh*) of iron,' 'because *Rechab* commanded them'; an obvious mistake.

W. H. BENNETT.

RECONCILIATION (*καταλλαγή*).—The general doctrine of the ATONEMENT has been dealt with under that title (vol. i. p. 197), and the biblical phraseology under PROPITIATION (p. 128). The present art. is concerned with the reconciliation made by Christ between God and men; and the question specially to be investigated is, whether it is subjective only, our reconciliation to God, or objective also, God's reconciliation to us. The Gr. word occurs four times in NT, Ro 5^{11} 11^{15} and 2 Co $5^{18.19}$, and in all these places it is used objectively to describe the new relation between God and humanity brought about by the work of Christ (see Cremer, *Bibl.-Theol. Lex. s.v.*). This is, perhaps, most clearly seen in Ro 5^{11} δι᾽ οὗ νῦν τὴν καταλλαγὴν ἐλάβομεν, 'through whom we have now received the reconciliation.' The reconciliation must have been already an accomplished fact before it could be received, *i.e.* before faith or feeling could have anything to do with it. So in Ro 11^{15} the κατ. κόσμου is plainly the favourable attitude of God towards the world through His turning away from Israel. In 2 Co $5^{18.19}$ the διακονία τῆς καταλλαγῆς and the λόγος τῆς καταλλαγῆς are the means appointed by God to bring men to a knowledge of what He has done for them in Christ. And what is that? What is 'the word of reconciliation'? It is 'that God was in Christ, reconciling the world unto himself.' That this refers to an objective matter of fact, not a subjective state of feeling, is plain from the exhortation based on it: 'Be ye reconciled to God.' Besides, how was God in Christ reconciling the world to Himself? By 'not imputing unto men their trespasses.' But this was only the negative side of it. The positive is reserved to clinch the argument at the close: 'For God made him to be sin for us, who knew no sin, that we might be made the righteousness of God in him' (2 Co 5^{21}). But if this is the meaning of the reconciliation in the two most important of the passages that bear on it,—the doing on God's part of all that needed to be done to make it right for Him to receive us back into favour,—the reconciliation cannot have respect to us alone, nor can the whole purpose of the work of Christ be exhausted in the moral effect it has upon us as a pathetic display of the love of God. Moreover, according to Ro 3^{22}, the primary object of the work of Christ was not to display the *love*, but the *righteousness* of God. That righteousness had been obscured by the forbearance of God in the past, and might still further be obscured in the future by His forgiving men on the ground of their faith in Jesus. They had been tempted, and might again be tempted, to doubt the reality of His wrath against sin, unless it were made clear that in forgiving it to men God had dealt seriously with it in the propitiatory work of Christ.

1. *The Need of Reconciliation on the part of God.*—The subject has already so far been discussed, and passages have been cited both from OT and NT ascribing anger, wrath, indignation, jealousy, and even hate to God (see art. ANGER OF GOD in vol. i. p. 97 ff.). But something may be added to what is there said of the reluctance theologians have long shown to take such passages seriously. In their recoil from the extreme anthropomorphism of fiery writers like Tertullian, they have, from Origen downwards, often rushed to the opposite extreme, and conceived of God not only as a Being 'without parts,' but also 'without passions.' But anthropomorphism has at the heart of it a truth of priceless worth, for man was made in the image of God (Gn 1^{26}), and therefore, spiritually considered, their natures are essentially akin. As we appreciate and apply this truth in Christology, we make it easier to see the possibility of an Incarnation. If the Divine and the human natures were disparate, it is hard to see how there could be a union of God and man; but if they are essentially akin, the difficulty is at least sensibly relieved. But if this help is available for Christology, it is available for Theology also. For then, what Edward White calls 'the Buddhism of the West,' according to which God is conceived as a Being of passionless repose, sublimely raised above all the fluctuations of feeling to which we are subject, gives place to a truer conception of God, more human and therefore more Divine. (See the Excursus on the 'Sensibility of God' in Ed. White's *Life in Christ*, p. 255, and Bushnell's Sermon on 'the Power of God in Self-Sacrifice' in *The New Life*).

We are here concerned, however, not with the Divine sensibility in general, but with that particular form of it implied in the anger or wrath of God. What is meant by that? Our answer to the question will turn in part on the view we take of the way in which God governs the world, and in part on the view we take of our own nature in comparison with God's. If we think that God administers a law above and apart from Himself, as a judge administers the law of his country, we must interpret all that Scripture says of His anger or wrath in some non-natural sense, for these are emotions which, even if he had them, a judge would not betray. The more perfect he is as a judge, the more carefully will he suppress them. His decisions will tell us nothing of his personal feelings, but only of his determination to uphold the law of the land. Now this is just how the great majority of theologians, from Origen and Augustine down to our own day, have dealt with the language of Scripture about the anger of God. They have taken it in a thoroughly non-natural sense, as if it told us nothing of the personal feeling of God, but only of His judicial determination to punish and put down wickedness (see Simon, *Redemption of Man*, pp. 223-229). But this is not how the Scriptures speak, and therefore we may be sure it is not the view they take of God's relation to the world. They give free vent to God's personal feelings regarding the character and conduct of men, from which we may safely infer that they did not regard Him primarily as our Judge, but as our Father, the Father of our spirits, and our Judge in virtue of His Fatherhood; for as every father is head over his own house, so is God Head over all (1 P 1^{17}). In other words, His relations to us are personal, and His government direct. There is no law over and above Him, or between Him and us. The law He upholds is that of His own life, and therefore of ours, for our life is but our finite share in His. Hence His Divine displeasure, when we do anything to disturb it. It is Him and not merely ourselves we grieve, when we fall out of right relations to Him; and against Him we chiefly offend, even when we do wrong to others. 'Against thee, thee only, have I sinned, and done that which is evil in thy sight' (Ps 51^{4}).

The nearest human analogue we have to the moral government of God is that of the family, and the best clue we have to the feeling of God when we deliberately do wrong is the bitter disappointment of a father who has loved and lived for his children, when they have rebelled against him, until the filial bond between them is strained almost to the breaking. And the Divine Father feels it the more, because, though we may cease in spirit to be His children, He cannot cease to be our Father. He cannot consent to stand in any lower relation to us, and can only express His astonishment that we should behave as we have done. 'Hear, O heavens, and give ear, O earth, for the Lord hath spoken: I have nourished and brought up children, and they have rebelled against me' (Is 1^{2}). That is what sin means to God. Is it any wonder that He should hate it, and plead with His rebellious children as He does: 'Oh, do not this abominable thing which I hate' (Jer 44^{4}).

But even pathos like that will be lost on us, unless we further see what the Fatherhood of God involves, namely, that His nature and ours are essentially akin, so that, allowance being made for our moral imperfection, from our own experience we may safely infer His. If man was made in the image of God, a good man must be a good guide to right thoughts about God. If a good man may be angry, so may God. A good man's anger will never be mere blind rage, nor mere personal resentment, but as moral indignation it may rise to any height; and the better he is, the higher it will rise, in the presence of deliberate wrong-doing. And that being so, it were surely strange to conclude that if he were altogether perfect, his anger would entirely disappear. There would disappear from it only what defiled it before—the smoke, but not the flame; as we see in the one perfect Man of the whole race—the Man, Christ Jesus. Was He never angry? Did not He look round on His enemies 'with anger, being grieved for the hardness of their hearts'? (Mk 3^5). And can we conceive Him denouncing the hypocrites of His day in cold, unimpassioned language? Is not His indictment against them instinct with moral indignation, the fire of which we feel as we read it still? We cannot doubt the reality of His anger. Why, then, should we doubt the reality of God's? Was not God in Christ denouncing the Pharisees, as well as reconciling the world to Himself? And does not the one fact go far to determine how the other should be understood?

2. *The Possibility of Reconciliation on the part of God.*—But many demur to a mutual reconciliation, not only because they doubt the reality of God's anger, and see no *need* of reconciliation on the part of God, but also because they doubt its *possibility*, for reconciliation implies a change of feeling, and there can be no change in God. This, however, is confusion of thought. It is to misunderstand the nature of God's unchangeableness. God is not a mere mechanical force, but a living, moral mind. It is His character that is unchangeable, not His feelings, nor His actions. These *must* change with the changing character and conduct of His creatures, just because He changeth not. In any relevant sense of the word, it is not He that changes, but we. If we obey not, He abideth faithful. He cannot deny Himself, and therefore He must deny us, when we defy Him. In fact this apparent change in God proves His real unchangeableness, just as an apparent unchangeableness would prove a real change. (See Dorner on 'the Divine Immutability' in *System of Christian Doctrine*, i. 244 ff., iv. 80).

1. But both the need and the possibility of reconciliation on the Divine side seem to many forbidden from another point of view. There seems no room for it in the Christian conception of God. God is Love, and love is incapable of anger or hostility. But if God is love, love must be more than a mere emotion. It is a character, and a character is made up of likes and dislikes, attractions and repulsions, according to its affinity for, or aversion to, the character and conduct of those with whom it comes in contact. In other words, God is a person, not a force. He can, and does, discriminate between the righteous and the wicked. 'The eyes of the Lord are upon the righteous . . . the face of the Lord is against them that do evil' (Ps $34^{15.16}$). That does not mean that He does not love even them that do evil, but it does mean that His love is capable of hostility. How, indeed, can God love us *for our good* without showing His hostility to what would do us harm? When a river is dammed back by some obstruction thrown in its way, it chafes against it, and poetically we say it is angry. But it is not mere poetry to say that when the Divine love is held back by our sin, so that it can no longer flow forth to bless us as it would, it chafes against the obstacle, and cannot bear to be balked of its benign purpose concerning us. Love is goodness in earnest to make others good, and when it cannot have its way it is grieved, when it is deliberately thwarted it is angry, and, as Coleridge says—

> 'To be wroth with one you love
> Doth work like madness in the brain.'

It is here that Simon (*Redemption of Man*, p. 216 ff.), who has done so much to define and defend the reality of God's anger, has lost his way. According to him, 'love and wrath are mutually exclusive'; that is, they cannot both be felt *for* one and the same person at one and the same time, though they may both be felt *by* one and the same person towards different persons. 'A father may become angry with one of his children, and, to that extent, cease loving him, without therefore ceasing to love the rest. At the moment of intensest indignation with the one he may turn with tenderness to the rest. Not otherwise with God.' It is true, he adds that a man who is angry because his love has been repelled, 'will also, even whilst angry, carefully search for means of vanquishing the indifference, and converting the contemptuous aversion into loving regard. This is what a *loving being*, a *loving God*, can do, but it is misleading to ascribe it to love' (*ib.* p. 261). But surely, as Scott Lidgett has pointed out (*The Spiritual Principle of the Atonement*, p. 250 f.), it is contrary to the most familiar experience of life to say that love must either be requited or withdrawn. Life is full of unrequited and even outraged love that has never been withdrawn. Witness the way in which a mother will cling to a reprobate son, and for all the wrong he has done her never give him up while she lives. Nor is the love that will not let him go love in general, but distinctively her love for him. How could her love for her other children supply the energy required to seek reconciliation with him from whom, by the supposition, it has been withdrawn? It is a moral impossibility. Simon's mistake is due to his making too much of love as a mere emotion, forgetting that in its deepest and divinest sense it is a character, a moral determination of the whole being towards another. As a character, love may survive the mere enjoyment of its own satisfaction. Satisfaction may give place to dissatisfaction and the severest displeasure. These may be the only emotions proper to it for the time being, but it cannot enjoy these, cannot even endure them, and, in its own interest as well as that of its object, it will seek their removal, and, if possible, out of its own resources provide a propitiation. That is precisely what God has done for us. 'Herein is love, not that we love God, but that God loved us, and sent his Son to be the propitiation for our sins' (1 Jn 4^{10}).

2. But this brings us, in the second place, to what seems to many the greatest difficulty of all. That God should both require and provide propitiation seems to be a contradiction, and from the fact that God did provide it they infer that *He* did not require it—that is, did not need to be propitiated. It was provided by but not for Him. God did not, and could not, propitiate Himself. So W. R. Dale puts it. 'God Himself provided the ransom; He could not pay it to Himself' (*Atonement*, p. 357). To whom, then, or to what, was it paid? To the eternal law of righteousness, says Dale, as if there could be any such law above or apart from God, or as if propitiation had anything to do with impersonal law, or could be made at all outside personal relations. The difficulty is due to the assumption that God both provided *and offered* the propitiation—an assumption very commonly made, and made decisive of the whole matter. Thus W. N. Clarke says: 'If we wish to hold a doctrine that is real, we must choose between the two directions for the action in the work of Christ; we cannot combine them. There may be action that takes effect on God to influence Him, but we may be sure that it originates somewhere else than in God Himself; and there may be action that originates in God, but we may be sure that it takes effect upon some other. God does not influence Himself. If we choose or judge between these two directions, there can be no doubt as to the result. In the work of Christ, was God the actor, or was God acted upon? For we are at war with reality if we attempt to affirm both. We cannot hesitate about our answer. God was the Actor' (*Present-Day Papers*, 1900, vol. iii. p. 238). But God was not the Actor in the *whole* transaction. God provided the propitiation, but He did not offer it to Himself. Christ offered it, *acting not as God's representative, but as ours.* (See Cremer on ἱλάσκεσθαι). God gave humanity in Him the means of making propitiation, but God

did not propitiate Himself. Nor is there any difficulty here but such as meets us everywhere in the spiritual life. It is only the supreme example of a universal spiritual law. Thus, *e.g.*, God both requires and gives repentance—or rather power to repent, for of course He does not repent for us. And so with every other grace, as the very word implies. The grace is *in* us, but it is *of* God. God worketh in us both to will and to do of His good pleasure. He neither wills nor acts for us, but enables us to will and act in the line of His own good pleasure. So in the work of reconciliation. God made it possible to humanity by the gift of Christ, but Christ as the Head and Representative of the race actually accomplished it. The principle underlying it is identical with the principle which underlies our whole religious life, and finds instinctive expression in the language of prayer, wherein we virtually ask God to fulfil His own law in us, to fulfil in us all the good pleasure of His goodness and the work of faith with power. (See, especially, Simon, *Redemption of Man*, ch. ix.). If this is a paradox, it is a paradox inherent in our very existence, as finite creatures, who have yet a certain moral independence over against God; and on its religious side it has never been better expressed than in Augustine's words: '*Da quod jubes, et jube quod vis*' (*Conf.* x. 29).

A. ADAMSON.

RECORD.—To record a thing is to call it to mind (Lat. *recordare, i.e. re* and *cor* the heart, through Old Fr. *recorder*). This primitive meaning, 'call to mind' or 'meditate on' is found, *e.g.*, in Erasmus, *Crede*, 47, 'After that thou shalte have dylygently recorded these thynges, and called them well to remembraunce, then have recourse hether agayne unto me'; Tindale, *Expositions*, 110, 'Therefore care day by day and hour by hour earnestly to keep the covenant of the Lord thy God, and to recorde therein day and night.' A similar meaning, 'bear in mind,' is common in Wyclif. Thus Gn 19^{29} 'Whan forsothe God had subvertid the citees of that regioun, he recordide of Abraham' (1388 'he hadde mynde of Abraham'); Pr 31^{7} 'Of ther sorewe recorde thei no more' (1388 'Thenke thei no more on her sorewe').

We may call a thing to mind either by speaking about it or by writing it down. The former meaning is now obsolete, but AV has preserved one example: 1 Ch 16^{4} 'He appointed certain of the Levites to minister before the ark of the Lord, and to record, and to thank and praise the Lord God of Israel' (Heb. לְהַזְכִּיר, lit. 'to cause to remember,' RV 'to celebrate'; the AV tr^{n} is as old as Wyclif; the 1388 version gives 'have mynde of the werkis of the Lord').

The phrase 'call to record' means 'cause to testify,' Dt 30^{19} 'I call heaven and earth to record this day against you' (הַעִדֹתִי בָכֶם), 31^{28}; and 'take to record' has the same meaning: Is 8^{2} '(And) I will take unto me faithful witnesses to record' (וְאָעִידָה לִּי); Ac 20^{26} 'Wherefore I take you to record this day, that I am pure from the blood of all men' (*μαρτύρομαι ὑμῖν*, which is incorrectly taken by AV, after Tindale, in the classical sense of 'call one to witness' [which would need *ὑμᾶς*], but rightly by RV, as by Wyclif, in the sense, known only to very late Greek, of 'testify').

The subst. 'record' is used in AV, usually in the sense of *witness*, whether the person who witnesses (*μάρτυς*, 2 Co 1^{23}, Ph 1^{8}) or the testimony itself (*μαρτυρία*, Jn 1^{19} $8^{13.\,14}$ 19^{35}, 1 Jn $5^{10.\,11}$, 3 Jn ^{12}). In the same sense is used the phrase 'bear record,' a frequent tr. of *μαρτυρέω* 'to give testimony.'

J. HASTINGS.

RECORDER, THE (הַמַּזְכִּיר, lit. 'the remembrancer'; LXX *ἐπὶ τῶν ὑπομνημάτων*, (ὁ) *ἀναμιμνήσκων, ὑπομιμνήσκων*, (ὁ) *ὑπομνηματογράφος*).—An officer of high rank in the Israelite kingdom. His functions are nowhere precisely defined, but the importance of his office is shown by the fact that he is mentioned along with the commander-in-chief, the chief secretary, and other leading officials at the courts of David and Solomon (2 S 20^{24} 8^{16}= 1 Ch 18^{15}, 1 K 4^{3}). In the reign of Hezekiah he appears as the king's representative together with the prefect of the palace and the chief secretary (2 K $18^{18.\,37}$=Is $36^{3.\,22}$), while the holder of the same office under Josiah formed one of the commission appointed to superintend the repairing of the temple (2 Ch 34^{8}). The 'recorder' is often supposed to have been a historiographer, but Benzinger (*Arch.* 310), Nowack (i. 308), Kittel (on 1 K 4^{3}), *et al.*, argue plausibly that his duty was to *remind* the king of important business by preparing matters for his consideration and laying them before him. Under David and Solomon the office was filled by Jehoshaphat the son of Ahilud; under Hezekiah, by Joah the son of Asaph; and under Josiah, by Joah the son of Joahaz.

J. F. STENNING.

RECOVER.—The verb 'to recover' (Old Fr. *recovrer*, Lat. *recuperare*) is still in use transitively in the sense of regaining something that has been lost, whether persons (Is 11^{11}, Jer 41^{16}), territory (as 2 S 8^{3}, 2 K 14^{28}, 1 Mac 10^{52}), or other possessions (as Hos 2^{9}, 1 Mac 2^{48}); also of regaining health (Jer 8^{22}), strength (2 Ch 13^{20}, Ps 39^{13}), sight (Lk 4^{18}). But it is no longer used with the person to be restored to health as direct object, as it is in AV, 2 K $5^{3.\,6.\,7.\,11}$, Is 38^{16} 39^{1}, Jth 14^{7}. Cf. Shaks. *Jul. Cæs.* I. i. 28, 'I am indeed, sir, a surgeon to old shoes; when they are in great danger I recover them'; Defoe, *Crusoe*, 520, 'Our men in the Pinnace followed their orders, and took up three men; one of which was just drowning, and it was a good while before we could recover him.'

The intrans. use is also found in AV, to which RV adds Jn 11^{12} 'The disciples therefore said unto him, Lord, if he is fallen asleep, he will recover,' for AV 'he shall do well'; RVm 'he shall be saved' (Gr. *σωθήσεται*, Vulg. *salvus erit*).

RED.—See COLOURS in vol. i. p. 457^{b}.

RED DRAGON.—See REVELATION (BOOK OF).

RED HEIFER.—Of the numerous forms of ceremonial uncleanness which occupy so important a place in the priestly legislation, that arising from contact with, and even proximity to, a dead body was regarded as the most grievous, requiring a specially efficacious medium of lustration for its removal. To provide such a medium is the object of the unique enactment of Nu 19—unique in its title (see below), in its provisions, and, one is tempted to add, in the amount of discussion to which it has given rise.

The precise relation to each other of the two sections of this chapter is not easy to determine. According to Wellh. (*Comp. d. Hex.*^{3} 176, approved by Kuenen, *Hex.* 96) vv.$^{14\text{-}22}$ form an appendix to vv.$^{1\text{-}13}$, giving more precise instruction regarding the application to particular cases of the general Torah embodied in the latter. The more elaborate and peculiar title of the first section, however—viz. חֻקַּת הַתּוֹרָה 'the statute of the law (*Tôrah*),' Nu 19^{2} 31^{21} only—and other indications rather suggest that this section, vv.$^{1\text{-}13}$, is the younger of the two,* and belongs to the secondary strata of P (P^s). Neither section, it should be noted, presents that historical setting which is characteristic of the legal ordinances of the main stock of P. Such a setting, however, was supplied by later Jewish tradition. The rite of the red heifer, according to Josephus, was instituted by Moses on the death of Miriam (see Nu 20^1, the chapter immediately *following* its institution in the Hebrew text), and the ashes of the first victim were used to purify the people at the expiry of the thirty days of mourning (*Ant.* IV. iv. 6).

---

* According to the authors of the *Oxford Hexateuch* (1900) vv.$^{14\text{ff.}}$ are derived from a corpus of priestly *tôrôth* or decisions

i. The preparation of the ashes of the red heifer.
ii. The purpose and manner of their application.
iii. The origin and significance of the rite.
iv. The red heifer as a type of Christ.

i. *The procedure to be followed* in the preparation of the ashes is laid down in outline in vv.$^{1-10}$. Detailed instructions—a few of the more important of which are noted in the sequel—will be found in the special treatise of the Mishna devoted to the subject (see Literature at end of art.). The ashes are to be those of a victim with special qualifications of sex, colour, and condition, the ultimate grounds for which have formed the subject of endless debate among Jewish and Christian scholars. The sacrificial victims were predominantly males, in the case of the sin-offerings for the congregation, a he-goat (Lv 9^3) or a young bullock (4^{23}); here, as in the ancient and allied rite by which the land was purified from the defilement of an untraced murder (Dt $21^{1ff.}$), a heifer or young cow was prescribed. According to a widely supported view (Bähr, Kurtz, Keil, Edersheim, etc.), the female sex, as the immediate source of new life, was chosen in order to furnish a more suggestive contrast in a rite associated with death. This and similar explanations, however, seem to us to introduce a train of thought much too advanced for ceremonies bearing such evident marks of a great antiquity (see iii. below) as do those of Nu 19 and Dt 21. We ought rather, in these cases, to see in the choice of the female sex the desire to offer the most precious and therefore the most efficacious victim, the females, as the breeders of the herd, being the more valuable in the estimation of a pastoral people —a view reflected in the composition of Jacob's present to Esau (Gn $32^{14f.}$; cf. Dillm.-Ryssel, *Ex.-Lv.*^{3} 429).*

The age, by Rabbinic prescription, might range from two to five years (*Parah* i. 1); the colour must be red (אֲדֻמָּה, cf. Zec 1^8 of horses), or rather reddish brown.† The heifer, further, had to be without spot or blemish of any kind, 'upon which never came yoke' (v.^{2}), rightly paraphrased by Josephus as 'a heifer that had never been used to the plough or to husbandry' (*Ant.* IV. iv. 6; cf. Dt 21^3, and the epithets ἄζυγες, *injuges*, applied to sacrificial victims by classical writers). The cost was defrayed from the half-shekel temple tax (*Shekāl.* iv. 2).

Not the high priest, who dared not risk the contagion of uncleanness, but his representative, Eleazar, had to bring the victim forth 'without the camp' (v.^{3})—that is, in actual practice, from the temple hill, by the so-called Red Heifer bridge, across the Kidron to the Mount of Olives. A rite so sacrosanct, and therefore entailing ceremonial defilement on the place and persons concerned, had to be performed at a distance from the sanctuary (cf. the barren valley of Dt 21^4). At a spot secure from possible contamination by graves, the heifer was slain by a second person in the presence of the priest, who, dipping his finger in the warm blood, sprinkled thereof seven times in the direction of the sanctuary, *i.e.* the temple. A pyre having been previously constructed of various fragrant woods,* the complete carcass of the heifer—'her skin, and her flesh, and her blood, with her dung' (v.^{5})—was burned thereon. At a certain stage (see *Parah* iii. 10) an interesting part of the ceremony took place. This was the casting, by the directing priest, of 'cedar wood (אֶרֶז), and hyssop, and scarlet' into the midst of the burning mass. According to later authorities, these items consisted of a thin piece of so-called 'cedar'—in reality a piece of the fragrant wood of the *Juniperus Phœnicea* (see CEDAR) or *J. Oxycedrus* (Löw, *Aram. Pflanzennamen*, p. 57)—a cubit in length, a bunch of aromatic hyssop or wild marjoram, and a strip of woollen cloth dyed scarlet, which bound the juniper and hyssop together (*Parah* iii. 10. 11, with commentaries; Maimonides, *de Vacca Rufa*).

When the whole pyre was reduced to ashes, these were collected by a third clean person—the two previous participants having been rendered unclean, in modern phrase 'taboo' (see below, iii.), by contact with the sacrosanct victim, and deposited by him 'without the camp in a clean place' (v.^{9}). The ashes (not of the red heifer alone, be it noted, but these mixed with the ashes of the fragrant woods) were now ready to be used as the law prescribed. All the three participants in the ceremony were unclean (or taboo) till sundown, after which time, having bathed their persons and washed their clothes, they were again ceremonially clean (vv.$^{7.8.10}$)—that is, they were again admitted to the society of their fellows, and to participation in the cultus.

ii. The *purpose* of the ashes prepared as above is expressly declared to be 'for (the preparation of) a water of separation' (לְמֵי נִדָּה v.^{9}; RVm 'a water of impurity'). The meaning of these words was early misunderstood. The LXX, followed by all the chief ancient versions, connecting נִדָּה *niddāh* with the Aramaic form of the Heb. נזה 'to sprinkle,' rendered the phrase by ὕδωρ ῥαντισμοῦ 'water of sprinkling,' Jerome's *aqua aspersionis*, Luther's *Sprengwasser*. In reality the verb נִדָּה (see Is 66^5) denoted in the technical language of the priests 'to exclude from the cultus,' in post-biblical Hebrew 'to excommunicate'; hence the substantive *niddāh* denotes 'that which excludes from the cultus,'† viz. ceremonial uncleanness or impurity. *Mê niddāh* (lit. 'water of exclusion') accordingly signifies *water for removing the uncleanness* which is the cause of this exclusion; in other words, as suggested by RVm, 'water [for the removal] of impurity.' The mode of preparation was of the simplest: 'for the unclean they shall take of the ashes of the burning of the sin-offering, and running water shall be put thereto in a vessel' (v.^{17} RV). This simple procedure was later elaborated with the most ingenious detail, if we are to believe the statements of the Mishna, to which the student is referred (*Parah* iii. 2–5). A clean person—according to *Parah* xii. 10, an adult male, not a female, though the latter might hold the vessel—took a bunch of hyssop, dipped it in the 'water of impurity,' and sprinkled the house in which a death had taken place, and all the persons and utensils therein, except such of the latter as were provided with lids, or were otherwise closed against the contagion of uncleanness (v.^{15}). The same lustration was required in the case of uncleanness con-

---

—hence the signature P^t—codified independently of the main stock of P (P^s). See *op. cit.* ii. 218 f., and cf. i. 152 f., and art. NUMBERS.

* For other explanations of the comparative sacredness of the cow, see W. R. Smith, *RS*^{1} 280, ^{2} 287, and reff. there.

† The later Jewish authorities by a false exegesis, which took *tĕmîmāh*, 'physically perfect,' as a qualification of the preceding adjective 'perfectly red,' considered the presence of even two hairs of another colour as disqualifying (*Parah* ii. 5; cf. Rashi and other commentators, *in loc.*).

* Four are named in *Parah* iii. 8: אֶרֶז and אֹרֶן (Assyr. *êrinu*, 'cedar'), two species of juniper (probably), בְּרוֹשׁ 'cypress,' and fig.

† Ibn Ezra appears to be the first to grasp the true connexion between the verb and the substantive. See his comm. *in loc.* Rashi kept to the traditional view למי הזייה 'for water of sprinkling.' The commentaries of both exegetes are found in the ordinary Rabbinic Bibles.

tracted by every one who had occasion to touch a dead body, whether the person had died a natural or a violent death, and by every one who had touched even a bone of the human body or a grave (v.^{10}).

By a separate enactment (Nu 31^{19-24}; note esp. חֻקַּת הַתּוֹרָה v.^{21}), which likewise bears every indication of belonging to the latest stratum of the priestly legislation, the 'water of impurity' had to be employed on the return from a campaign for the cleansing of the soldiers and their captives (31^{19}), including their clothes and *impedimenta* (v.^{20}). The spoil, also, of precious and useful metals taken from the enemy, after a preliminary purification by being passed through the fire, had to be finally purified by the application of the 'water of impurity' (v.$^{22f.}$).

In the case of unclean persons the sprinkling was performed on the third and seventh days following that on which the uncleanness had been contracted. On the seventh day 'at even' or sundown, after having bathed their persons and washed their clothes, they were once more clean. The ban of exclusion from the cultus was finally removed, and the persons affected resumed their place in the holy community of J″.

iii. *Origin and significance of the rite.*—Although the chapter before us may, or rather must, have assumed its present form at a comparatively late period, the essential part of the ceremony of lustration may be confidently affirmed to be of extreme antiquity, for the mystery attaching to the beginning and the end of life, and to the blood as the vehicle of life, has impressed mankind from the earliest days. In all forms of primitive religious thought a dead body is conceived as a source of real, if undefined, danger to all in proximity to it. Itself in the highest degree unclean, in modern phrase taboo, it becomes an active source of uncleanness, and renders taboo everyone and everything about it. These death taboos, as they may be called, were in full force among the ancient Hebrews, as among the other nations of antiquity, and the means used to remove the taboo were to a large extent identical. Primarily, as Robertson Smith has pointed out, 'purification means the application to the person of some medium which removes a taboo, and enables a person to mingle freely in the ordinary life of his fellows' (*RS*^{1} 405). The most widely distributed medium is, of course, water, but for aggravated cases of uncleanness this medium was supposed to acquire increased potency through the addition of ashes (see the reff. to ancient writers quoted by Bähr, *Symbolik*, ii. 495, and Knobel in Dillmann's commentary, *in loc.*). Here, then, we have the origin of the essential part of the Hebrew rite.

Closely connected with this circle of ideas is the universal belief of primitive man that sickness and death are caused by harmful and malevolent spirits whose anger he has incurred (cf. DEMON, vol. i. p. 590^a). An interesting survival of this primitive mode of thought may, we venture to think, be found in the ritual of the red heifer. Much laboured ingenuity has been expended in finding suitable symbolical meanings for each of the 'cedar wood, hyssop, and scarlet' which were added to the burning pyre. According to some, cedar, hastily assumed to be the majestic cedar of Lebanon, is the symbol of pride, as hyssop of humility; according to others, cedar, the incorruptible wood, was chosen 'as typical of eternity of life, hyssop of purification from the power of death, and scarlet thread to show the intensity of life in the red heifer.' The true explanation, it seems to us, is to be found in the primitive conception referred to above. We have here a meaningless survival, of which innumerable parallels will occur to students of comparative religion, from the time when the fragrant woods, such as juniper and cypress and the aromatic plants of the mint family, were supposed to act as a protection against the harmful unseen powers that were the cause of death * and hovered about the dead. The scarlet cloth is to be explained either by the fact that a special healing virtue was assigned in antiquity to the scarlet dye (Delitzsch,† art. 'Sprengwasser' in Riehm's *HWB d. bibl. Alterthums*^{2}), or by the universally prevalent idea of red, the colour of the sacred blood, as the taboo colour *par excellence* (Jevons, *Introd. to Hist. of Religion*, 67 ff.; Trumbull, *The Blood Covenant*, 236 f.).‡ The line of thought along which we have sought to explain this confessedly difficult part of the ritual, to the exclusion of the advanced symbolical interpretation hitherto current, finds further justification in the use of a sprinkler, consisting of a bunch of hyssop, tied to a handle of juniper wood by a similar strip of scarlet cloth, in sprinkling a house, as well as a person, that was to be declared free from the plague of leprosy (Lv $14^{51ff.}$).

While we have thus endeavoured to trace the origin of the ritual of the red heifer to its source in an atmosphere of primitive religious thought common to the Hebrews of the pre-Mosaic age with other races on a similar plane of development, it must not be forgotten that the rite received a higher and fuller interpretation in being admitted into the circle of the priestly legislation of the post-exilic age. Uncleanness and sin, sin and death, are now associated ideas (for the whole subject, see art. UNCLEANNESS). The red heifer has become a sin-offering (vv.$^{9.17}$) of a unique kind; part of the blood is sprinkled towards the dwelling-place of J″, from whose worship those 'unclean from the dead' are temporarily excluded, the rest is burned with the victim to heighten the expiatory efficacy of the ashes. The rite in all its details becomes a powerful object-lesson, teaching the eternal truth that a holy God can be served only by a holy people.

It is no longer possible to ascertain the extent to which the 'water of impurity' was actually used as a medium of lustration by the mass of the Jewish people. Even such sober investigators as Delitzsch and Dillmann have pointed out the difficulties in the way of an extended application of the ritual of Nu 19 in a thickly peopled country. Again, what are we to make of the statement (*Parah* iii. 5) that only seven or nine red heifers were slain in all—the first by Moses, the second by Ezra, and the rest later? The probability is that, like many other of the more stringent requirements of the Levitical code, the observance was confined to the more ardent legalists in Jerusalem. Jewish tradition represents this and other rites regarding uncleanness as ceasing to be observed about fifty years after the destruction of the temple (Hamburger, *Real-encycl. d. Judenthums*, i. 874). The red heifer, it may be remarked finally, has given her name to the second chapter of the Koran, 'the surah of the heifer,' in which, however, Mohammed in his usual fashion has confused the two heifers of Nu 19 and Dt 21 (see *sur.* ii. 63 ff.).

iv. *The red heifer as a type of Christ.*—It was natural that the early Church should see in the expiatory rite of Nu 19 a prefiguring of the atoning work of our Lord. The first to give literary expression to this idea, which has received such detailed elaboration at the hands of successive generations of typologists, is the author of the

---

* In comparatively recent times in our own country, a juniper tree planted before a house was regarded as a preventive of the plague.

† Delitzsch is apparently the only writer who has sought to assign other than a purely symbolical significance to these three elements. See, besides the above article, his commentary on He 9^{13}, and cf. Nowack, *Arch.* ii. 289, note 1.

‡ If we could be sure that the red colour of the heifer was as old as the practice of burning for the sake of the ashes, the choice would probably have to be explained by the same association of ideas. The oxen sacrificed by the ancient Egyptians had also to be red, a single black or white hair disqualifying an animal for the sacrifice (Plutarch, *Isis et Osiris*, 31; Herod. ii. 38, cited by Frazer, *Golden Bough*, i. 306, 2nd ed., 1900, ii. 312).

Epistle to the Hebrews in the familiar passage $9^{13f.}$. In the Epistle of Barnabas we find a whole chapter (ch. 8) devoted to this subject, in the course of which the writer shows an intimate acquaintance with contemporary Jewish practice as reflected in the Mishna (see esp. *Parah* iii. 2, 3). 'The calf is Jesus,' the juniper wood is His cross, while the scarlet wool, the hyssop, and other details receive a more or less appropriate interpretation.

LITERATURE.—The comm. on Nu 19, esp. Dillmann; the treatise *Parah* (Lat. tr. with commentaries in Surenhusius' Mishna, vol. vi., English in Barclay's *Talmud*, p. 300 ff.), which forms the basis of Maimonides' treatise הלכות פרה, edited with Lat. tr. and notes by A. C. Zeller, *de Vacca Rufa*, 1711; Spencer, *de legg. Heb. rit.* ii. 15, 'de vitula rufa,' etc.; Bähr, *Symbolik des Mosaischen Cultus*, 1839, i. 493–512; Kurtz in *SK*, 1846, p. 629 ff.; Edersheim, *The Temple*, etc. p. 304 ff.; works on Biblical archæology, esp. Haneberg, Keil (i. 385 ff.), and Nowack (ii. 288 ff.); art. 'Sprengwasser' by Delitzsch in Riehm's *HWB d. bibl. Alterthums*^{2}, and 'Reinigungen' by König in *PRE*^{2}.

RED HORSE.—See REVELATION (BOOK OF), p. 239.

RED SEA (יַם־סוּף Ex 10^{19} and often; also הַיָּם Ex $14^{2\,bis.\,9}$, Is $51^{10\,bis}$ 63^{11} etc.; יַם־מִצְרַיִם Is 11^{15}; LXX *ἡ ἐρυθρὰ θάλασσα*, with the equivalent amongst Latin geographers *Mare Rubrum*, also *Mare Erythræum*).—The origin of the name 'Red Sea' is uncertain, though several reasons for it have been assigned, such as the colour of the corals which cover its floor or line its shores; the tinge of the Edomite and Arabian mountains which border its coasts, and the light of an Eastern sky reflected on its waters. Dean Stanley considers that the name as applied to the Gulfs of Suez and Aḳabah is comparatively modern, as it was used to designate the waters of the Indian Ocean and the Persian Gulf before it was applied to the arm which extends northwards of the Strait of Bab-el-Mandeb;[*] and in the former application it is used by Berosus and Herodotus.[†] The Hebrew name *Yam Ṣûph* (see art. SUPH) appears to have been used from very early times. The origin of the name is not of much importance, since the name itself is in universal use.

The Red Sea is one of the most remarkable of oceanic gulfs on the globe, owing to the fact that it receives the waters of no river, while the evaporation from its surface is necessarily enormous. It must, therefore, be fed by the influx of water from the Indian Ocean through the Straits of Bab-el-Mandeb; but as such a condition of supply would long ere this have resulted in the conversion of the whole basin into a mass of solid rock-salt, it is inferred that an outward current flows into the Indian Ocean beneath the surface inward current.

The length of the Red Sea from the Straits to the head of the Gulf of Suez is about 1350 miles, and the extreme breadth in lat. 19° N. 205 miles. Towards its northern end it bifurcates into two narrow gulfs—those of Suez and Aḳabah (Ælanitic Gulf), between which rises the mountainous region of Sinai. The waters are clear and of a deep blue colour; and, as might be expected, are more saline than those of the ocean in the proportion of 4 to 3·5; the relative densities being 1·030 and 1·026 at a temperature of 60° Fahrenheit.

The waters of the Red Sea are crowded with living forms, and their high temperature (where not deep), combined with extreme purity, being favourable to polyp life, coral reefs abound, either lining the shores or rising as islands above the surface. The navigable channel from Suez to the Straits lies nearly in the centre of the basin, and in lat. 21° N., where the greatest depth is found, the bed descends to a depth of 1200 fathoms.

That the bed of the Red Sea is becoming shallower by the gradual rise of the land, admits of the clearest proof. Raised beaches containing shells and corals now living in the water are found at various levels up to many feet above the present surface; as, for example, along the cliffs of Nummulite limestone above Cairo and other parts of Lower Egypt, as well as along the shores of the Gulf of Suez and Aḳabah. The most remarkable of these beaches is that which is found at a level of 220 ft., and was first recognized by Oscar Fraas. Still more recently, and probably within the human and pre-historic period, the waters of the Red Sea stretched up the Isthmus of Suez into the great Bitter Lake, as the floor of the canal when being cut in 1867 laid open beds of rock-salt and strata, with recent shells and corals.[*] At the close of the Eocene period the whole surface of Egypt was under the waters of the ocean, and the Red Sea and Mediterranean waters were continuous. The fauna of the Red Sea and of the Mediterranean are now highly dissimilar: that of the former partaking of the character of the Indian Ocean; that of the latter, of the Atlantic. This process of differentiation has been naturally proceeding from the time when the two seas were disconnected by the uprising of the land in Miocene and Pliocene times, and the formation of the Isthmus of Suez.[†]

The biblical history of the Red Sea is chiefly connected with the Exodus (which see); but we have an interesting reference to it later in the time of Solomon and Hiram, king of Tyre, illustrating the essentially different habits of the Israelites and Phœnicians. These latter, from the time they settled on the coast of Syria, became a maritime nation, extending their trade and founding colonies all round the Mediterranean, while inland their extent of territory was extremely limited. The Israelites, on the other hand, were not a seafaring people; and consequently, when Solomon had extended his rule over Edom, and as far south as the Ælanitic Gulf, and was desirous of having a fleet, to navigate the waters of the Red Sea and to trade with Ophir for gold and other commodities; and when Elath (*Aila* of Strabo) and Ezion-geber were fortified, and the latter made a seaport town, his own subjects being ignorant of nautical affairs, he was obliged to have recourse to the assistance of Hiram, with whom he had preserved friendly relations. This appeal was not made in vain, and Hiram sent his servants, 'shipmen that had knowledge of the sea,' to man the fleet in the trade with Ophir (1 K $9^{26.\,27}$). After this event the Red Sea drops out of biblical history; Elath was for a time lost to the kingdom of Israel on the revolt of Edom against Joram (2 K 8^{20}), and, though regained by Azariah (14^{22}), it finally passed into the hands of the Syrians (*Kethîbh*) or the Edomites (*Ḳerê*) in the reign of Ahaz (16^{6}). Some ruins on an island at the head of the gulf are supposed to mark the site of this once important seaport.

E. HULL.

REDEEMER, REDEMPTION.—With two exceptions (AV in Ps 136^{24} [פָּרַק, lit. *to break* or *tear away*, a common Aram. word for *rescue, deliver*, in Heb. also La 5^{8}], RV 'delivered'; and AV and RV in Neh 5^{8} [קָנָה *to buy*, so RVm]), 'redeem' is the tr. in OT of the Heb. פָּדָה and גָּאַל, with their derivatives. פדה (better, for distinction from גאל, rendered 'to ransom') is used of the money payments required under the Law for the redemption of the firstborn (so Nu 3^{46-49} $18^{15\text{ff.}}$; cf. Ex $13^{13.\,15}$, Lv 27^{27}), or for the release of persons from slavery (so Ex 21^{8}, Lv 25^{47-49}); and גאל 'to redeem' (in a legal sense), of the recovery of property which had passed into other hands (so Lv 25^{26}, Ru $4^{4\text{ff.}}$), or of commutation of a vow (Lv $27^{13.\,15.\,19.\,20}$) or a tithe (Lv 27^{31}).

---

[*] Stanley, *Sinai and Palestine*^{5}, 5 (note).

[†] Rawlinson, *Ancient Monarchies*, i. 109. Sayce (*HCM* 255 ff.) maintains that *Yam Ṣuph* as used by Heb. writers means only the Gulf of Aḳabah, and that its application in Ex $15^{4.\,22}$ to the 'sea,' which the Israelites crossed on leaving Egypt, rests upon a mistake. This view, which the present writer is persuaded is entirely erroneous, was adopted by Sayce in order to support his theory that Mount Sinai lay amongst the Edomite mountains east of the Gulf of Aḳabah. See, further, art. SINAI.

[*] The writer considers that this was the condition of the Isthmus at the time of the Exodus. Such a view, borne out by observation, renders the account of this event intelligible, but does not necessitate the inference that the waters of the Red Sea and the Mediterranean were at that time connected.

[†] For an account of the raised beaches of the Red Sea coast and of Lower Egypt, see Hull, 'On the Physical Geology of Arabia Petræa,' *PEF Mem.* 69 ff. (1886).

In the Prophets and the Psalms both גָּאַל and פָּדָה are used figuratively, with the general meaning 'deliver,' of the saving activity of God, as shown in the history of Israel (so Is 29^{22} [פדה] 48^{20} 52^{9}, Ps 77^{15} [all גאל]) and in the experience of individual Israelites (Ps 34^{22} [פדה]). Cremer (*Wörterb.* p. 596) finds, in the use of these words rather than others which might have been chosen, a suggestion of the property relation conceived to exist between J″ and Israel. Cf. Ps 74^{2} 'Remember thy congregation, which thou hast purchased of old, which thou hast redeemed (גאל) to be the tribe of thine inheritance'; so Dt 9^{26}, 2 S 7^{23}, 1 Ch 17^{21} (all פדה), Is 52^{3} (גאל). [A similar idea appears in the NT *περιποιεῖσθαι* (Ac 20^{28}), *περιποίησις* (Eph 1^{14}, 1 P 2^{9}), and *ἀγοράζω* (1 Co 6^{20} and often); but these words correspond in the LXX to הֶחֱיָה, סְגֻלָּה, and קָנָה, never to גאל or פדה]. In the great majority of cases, however, the idea of a money payment falls altogether into the background, and the words are used in the purely general sense of 'save,' 'deliver.' To 'ransom' or 'redeem' means to deliver from any calamity or misfortune, however that deliverance may be brought about.

More specifically, redemption is thought of as deliverance from adversity (2 S 4^{9}, 1 K 1^{29}, Ps 25^{22} [all פדה]), oppression and violence (Ps 72^{14} [גאל]), captivity (Zec 10^{8-10} [פדה], Ps $107^{2.\,3}$ [גאל]), or death (Ps 49^{15} [פדה], 103^{4}, Hos 13^{14} [both גאל], Job 5^{20} [פדה]). It is specially associated with the deliverance from Egypt (Dt 7^{8} 13^{5} 24^{18}, Mic 6^{4} [all פדה]), and with the (idealized) deliverance from Babylon (Is 35^{9} 62^{12} 63^{4} [all גאל]). In a single instance only is it used of redemption from sin (Ps 130^{8} [פדה]).

The noun 'redeemer' is the tr. in OT of the part. גֹּאֵל (*gô'ēl*, properly *one who asserts a claim* or has the right of 'redemption,' esp. one who vindicates the right of a murdered man, *i.e.* the 'avenger of blood,' hence the next-of-kin, Nu 5^{8}, Ru 2^{20} *al.*, 1 K 16^{11}), and is applied in our VSS, in a figurative sense, to God only. It is a favourite term of Deutero-Isaiah, who often speaks of J″ as the *Gô'ēl* of Israel (so 41^{14} 43^{14} $44^{6.\,24}$ 47^{4} 48^{17} $49^{7.\,26}$ $54^{5.\,8}$ 59^{20} 60^{16} 63^{16}), and magnifies the freeness and the greatness of His deliverance. Cf. Is 52^{3} 'Ye were sold for nought, and ye shall be redeemed without money'; Is $54^{7.\,8}$ 'For a small moment have I forsaken thee; but with great mercies will I gather thee. In overflowing wrath I hid my face from thee for a moment; but with everlasting kindness will I have mercy upon thee, saith J″ thy redeemer.' Outside of Isaiah, the term *gô'ēl* is not applied to God except in Ps 19^{14} 78^{35}, Job 19^{25}, Pr 23^{11}, Jer 50^{34}. In the last three cases it is used in the special sense of advocate or vindicator. J″ is here represented as doing for the oppressed what the human *gô'ēl* would do, if he were living. So in the familiar passage Job 19^{25} 'I know that my redeemer liveth,' the true rendering should be, 'I know that my vindicator liveth' (so RVm), *i.e.* the one who will see that I have justice after I am gone. See, further, art. GOEL, and A. B. Davidson's note on Job 19^{25}.

In NT the words for 'redeem' are *ἀγοράζω* and λυτροῦμαι, with their derivatives. The former means lit. 'to buy,' 'to purchase,' by which terms it is uniformly rendered in RV (1 Co 6^{20} 7^{23}, 2 P 2^{1}, Rev 5^{9} $14^{3.\,4}$ [all]) and AV in all passages except Rev 5^{9} $14^{3.\,4}$. This is akin to the figurative use of קנה 'buy' or 'purchase,' in the OT, of the deliverance of Israel from bondage, Ex 15^{16}, Is 11^{11}, Ps 74^{2} (cf. 78^{54}), though קנה is not represented in the LXX of these passages by *ἀγοράζω*. In the compound form *ἐξαγοράζω*, 'to buy from or out of,' it acquires the technical meaning 'redeem,' and is so used twice by St. Paul (Gal 3^{13} 4^{5}) of Christ's deliverance of those who were under the curse of the law. 'Christ redeemed us from the curse of the law, having become a curse for us. For it is written, Cursed is every one that hangeth on a tree.' Here Christ's shameful death on the cross is regarded as the ransom price paid for the deliverance of those who were held prisoners under the law and subject to its curse. Cf. Rev 5^{9}, where the redeemed are said to be purchased unto God (not from God) with the blood of the Lamb.

The more common NT word is, however, *λυτροῦμαι* (from *λύτρον*, 'a ransom'), with its derivatives, *λυτρωτής*, *λύτρωσις*, *ἀπολύτρωσις*. These follow the usage of the OT גָּאַל and פָּדָה, being sometimes used in the technical sense of 'ransom' (*e.g.* 1 P $1^{18.\,19}$), but more frequently in the purely general sense of 'deliver.' Thus *λύτρωσις* is used in Luke of the Messianic deliverance from misfortune and sorrow. So Lk 1^{68} 2^{38}, cf. 24^{21}. More particularly of the salvation to be wrought at the Parousia, Lk 21^{28} (*ἀπολύτρωσις*, cf. Ro 8^{23} the redemption of the body; Eph 1^{14} the redemption of God's own possession. In Eph 4^{30} the phrase 'day of redemption' is used as a synonym for Parousia). In other passages which follow the thought of Ps 130^{8}, the reference is clearly to redemption from sin. So in Eph 1^{7}, Col 1^{14}, redemption is associated with forgiveness. In Ro 3^{24} it is connected with justification. In Tit 2^{14} Christ is said to have given Himself for us 'that he might redeem us from all iniquity, and purify unto himself a people for his own possession, zealous of good works.' In this narrower sense redemption is frequently connected with the death of Christ. Thus He 9^{15} speaks of 'a death having taken place for the redemption of the transgressions that were under the first covenant.' Cf. Eph 1^{7} 'redemption through his blood'; Ro $3^{24.\,25}$ 'redemption . . . through faith in his blood,' and esp. 1 P $1^{18.\,19}$ 'Knowing that ye were redeemed, not with corruptible things, as with silver or gold, from your vain manner of life handed down from your fathers; but with precious blood, as of a lamb without blemish and without spot, even the blood of Christ.' Here the technical meaning of *λυτροῦμαι* reappears. The blood of Christ is represented as the ransom price (*λύτρον*, cf. Mk 10^{45}) by which Christians are redeemed from their former sinful life. Observe that in 1 P $1^{18.\,19}$, as in Tit 2^{14} and He 9^{15}, the thought is not primarily of deliverance from punishment, but of deliverance from sin. See, further, under RANSOM.

The term 'redeemer' (*λυτρωτής*) is found in NT only in Ac 7^{35}, where it is used of Moses (so RVm; AV and RV tr. 'deliverer'). In the LXX *λυτρωτής* stands for גֹּאֵל in Ps 18 $(19)^{14}$ 77 $(78)^{35}$ [all].

For a fuller discussion of the biblical idea of redemption, see SALVATION, SAVIOUR.

Psalt.* 453 f.

W. ADAMS BROWN.

REED.—There is as much uncertainty in regard to the signification of the Heb. words used to designate the various sorts of aquatic and marsh plants, grouped under the above general term, as there is about the English term itself. Two of these, *'āḥū* and *sūph*, have already been discussed under FLAG. There remain the foll. four:—

1. אַגְמֹן, אַגְמוֹן *'agmōn*. This word seems to be derived from אֲגַם *'agam*, the same as the Arab. *'ajam*, denoting 'a troubled or muddy pool' (Is 14^{23} אַגְמֵי־מָיִם), such as reeds and rushes grow in, and thence a *reed* from such a pool (Jer 51^{32}, RVm '*marshes*, Heb. *pools*'). *'Agmōn* is tr^{d} in Job 41^{2} AV 'hook,' RV 'rope'; Job 41^{20} AV 'caldron,' RV 'burning rushes'; Is 58^{5} 'bulrush,' RV 'rush.' The word is used metaphorically for the lowly, and tr^{d} 'rush' (Is 9^{14} 19^{15}). The LXX κρίκος='ring,' ἄνθραξ='coal,' μικρός='small,' τέλος='end,' give us no clue to the signification of *'agmōn*. Unfortunately, there is nothing in the etymology which is any more helpful. The expression 'bow down his head like a bulrush' (Is 58^{5}) would exclude the true rushes, which are stiff, erect plants. There are several rush-like plants to which it would well apply, as the Twig Rush, *Cladium mariscus*, L.; *Cyperus longus*, L., and a number of the *Scirpi*, all of the order *Cyperaceæ*; the Common Reed, *Phragmites communis*, L., of the *Gramineæ*; the Flowering Rush, *Butomus umbellatus*, L., of the *Alismaceæ*; and the Bur Reed, *Sparganium ramosum*, Huds., of the *Typhaceæ*. The expression 'canst thou put an *'agmōn* (AV 'hook,' RV 'rope') into his nose?' (Job 41^{2}) may be explained as referring to the ring which is passed through the nostrils of bulls to lead them. This is usually of iron. Sometimes it is of tough, twisted withes. It may be that it was sometimes made of rushes. But this also gives no light as to the particular kind. The tr^{n} 'rush' is admissible only if we take it in its widest and most general sense.

2. גֹּמֶא *gōme'*. The Heb. root signifies 'to swallow *or* imbibe.' *Gōme'* occurs in connexion with its marshy place of growth (Job 8^{11}, LXX πάπυρος, AV and RV 'rush,' RVm 'papyrus'). The ark in which Moses was placed was made of *gōme'* (Ex 2^{3}). The LXX says only θῖβις = 'wicker basket,' without mentioning the material of which it was made; AV and RV 'bulrushes,' RVm 'papyrus.' What were the 'vessels of *gōme'*'? (Is 18^{2}, AV 'bulrushes,' RV 'papyrus'). That boats for sea voyages were made of papyrus is improbable. But the passage does not require that. The allusion in the expression 'sea' is doubtless to the Nile, the greater branches of which, as well as the main stream, are called by the Arabs *baḥr*='sea.' The Blue Nile is *el-baḥr el-azraḳ*, and the White Nile *el-baḥr el-abiaḍ*, while the united stream is called *baḥr en-Nîl* far more frequently than *nahr* (river) *en-Nîl*. This being understood, the vessels must be considered as boats or skiffs or canoes. The LXX seems to have another text, and gives ἐπιστολὰς βιβλίνας='letters on parchment.' We have profane testimony as to the use of papyrus, which is here generic for sedges, etc., for boats (Plin. *Nat. Hist.* xiii. 22; Theophrast. *Hist. Pl.* iv. 8), sails, mats, cloths, coverlets, and ropes. *Gōme'* is mentioned in one other passage along with *ḳāneh* (Is 35^{7}, LXX ἕλος='a swamp,' AV and RV 'rushes'). If we adopt 'rush' as the generic expression to represent *'agmōn*, it would be better to take 'sedge' as an equivalent generic expression for *gōme'*. This will include the papyrus, *Cyperus Papyrus*, L., the *babîr* or *bardî* of the Arabs; *C. alopecuroides*, Rotb., a species growing to the height of a man or taller, in the marshes of Egypt and the Ḥûleh, and used in making mats, etc.; the Club Rush, or Bulrush, *Scirpus maritimus*, L., which grows as large as the last, and is used for similar purposes; *S. mucronatus*, L.; *S. lacustris*, L.; and *S. littoralis*, L.; and the Twig Rush, *Cladium mariscus*, L., which has been mentioned under *'agmōn*. The papyrus is the largest and finest of all. It grows from creeping root stocks, which produce tufts of sterile, linear leaves at the surface of the mud or water. The culms are 10 to 15 ft. high, and 2 to 3 in. thick at the base, which is enclosed in imbricated, brown sheaths. These are leafless, or end in a broad, lanceolate limb. The culm is triquetrous above, and ends in an umbel 8 to 15 in. broad, subtended by an involucre of numerous lanceolate leaves. The spikelets are only a third of an inch long, of a pale fawn colour. This noble sedge is the ornament of the Ḥûleh swamps, and the finest of the *Cyperaceæ* of Bible lands, perhaps of the whole world. It used to be common in Lower Egypt, but has now disappeared.

3. קָנֶה *ḳāneh*. This is undoubtedly the equivalent, neither more nor less general, of the Eng. 'reed.' Both are generic for all tall grasses, and more or less for grass-like plants. The word *ḳăna* in Arabic came to signify a spear, from the long reed which constitutes its handle. Such reeds grow in great profusion in the cane brakes of the Lower Euphrates and Upper Nile. Egypt and the Holy Land are pre-eminently lands of tall grasses and canes. Among the most notable of the *Gramineæ* of the Holy Land are *Arundo Donax*, L., called in Arabic *ḳaṣab fârisî*=the Persian Reed. This noble grass often attains a height of 15 to 20 ft. Its silky panicle, swaying gracefully to and fro in the wind, may well have been the 'reed shaken by the wind' (Mt 11^{7}). Immense brakes of this cane are found on the borders of the streams about the Dead Sea, in the Jordan Valley, Ḥûleh, and along the irrigation canals and rivers throughout the land. Another noble grass is *Saccharum Ægyptiacum*, Willd., called in Arabic *ghazzâr*. It resembles the Pampas Grass of the Argentina in the beauty of its silky panicles, which are often borne on stalks 10 to 15 ft. high. Others are *Panicum turgidum*, Forsk.; *Erianthus Ravennæ*, L., the Woolly Beard Grass; *Ammophila aranaria*, L.; *Phragmites communis*, the true Reed, known in Arabic as *ghâb and bûs*; *Eragrostis cynosuroides*, Rœm. et Schultz, the famous *Ḥalfâ*, from which Wady Halfa in Nubia derives its name. This latter attains a height of 6 to 10 ft., and has a beautiful panicle. It forms dense brakes in marshy regions, from the latitude of Jaffa and *Ghôr eṣ-Ṣâfieh* to Egypt and the Upper Nile.

Ḳāneh is tr^{d} by various words—(1) 'Reed' (*e.g.* 1 K 14^{15}). The allusion to the 'bruised reed' (2 K 18^{21}) shows a keen insight into the facts of nature. The grasses have hollow stems. A slight force is sufficient to crush them in, and then their elasticity and strength are gone. Yet even such, by God's help, may be saved from fracture (Is 42^{3}, Mt 12^{20}). The reed is spoken of as growing in marshes (Job 40^{21}). The 'wild beast of the reeds' (Ps 68^{30} AVm and RV) is probably either the crocodile or (cf. Job 40^{21}) the hippopotamus; in either case it is a symbolical designation of Egypt (cf. Ezk 29^{3}, Ps 74^{14}). See Driver, *Parallel Psalter*, p. 190, n. 7. The stronger kinds of reeds, such as *Arundo Donax*, L., were used for walking staffs (Ezk $29^{6.7}$, Is 36^{6}). This sort was, and still is, used for measuring purposes (Ezk $40^{3.5}$ etc. [cf. Rev 11^{1} $21^{15f.}$]. This one was 6 cubits and 6 palms long. The Gr. κάλαμος was also a measure of $6\frac{2}{3}$ cubits). (2) 'Stalk (of grain)' (Gn $41^{5.22}$). (3) 'Bone' (Job 31^{22}), from the fact of this being a tube like the hollow stems of grasses. (4) 'Beam of a balance,' thence the *balance* itself (Is 46^{6}), probably because the cross beams of balances were sometimes made of reeds. (5) The 'branches of a lampstand,' probably because these were tubular (Ex $25^{31.32}$). Possibly these tubes carried oil, as in the case of the seven pipes (מוּצָקוֹת) of the lampstand in Zechariah's vision (Zec $4^{2.12f.}$). (6) 'Cane' (Is 43^{24}), RVm 'calamus.' The fuller form is קְנֵה הַטּוֹב *ḳāneh haṭṭōbh*, 'sweet cane' (Jer 6^{20} RVm 'calamus).' (7) 'Calamus' (Ca 4^{14}, Ezk 27^{19}). The fuller form is קְנֵה־בֹשֶׂם *ḳĕnēh-bōsem* = 'sweet calamus' (Ex 30^{23}). Calamus is not indigenous in Syria and Palestine. This is noted in Jer 6^{20}, where it is said that it comes 'from a far country.' Pliny (*Nat. Hist.* xii. 48) says, 'Scented calamus, also, which grows in Arabia, is common both in India and Syria, that which grows in the last country being superior to all the rest. At a distance of 150 stadia from the Mediterranean, between Mount Libanus and another mountain of no note (and not, as some have supposed, Antilibanus), there is a valley of moderate size, situate in the vicinity of a lake, the marshy swamps of which are dried up every summer. At a distance of 30 stadia from this lake grow the sweet-scented calamus and the rush.' This indication of locality would probably refer to the Lake of Ḥemṣ, and the swamps of the Upper Orontes. But no modern botanist has detected *Acorus Calamus* there. Nor have we been able to identify 'scented calamus' with any of the reeds or rushes which grow there. The precision of Jeremiah's language seems to forbid the idea that he spoke of any indigenous plant.

4. עָרוֹת *'ārōth* (Is 19^{7}) is trd in AV 'paper reeds,' RV more properly 'meadows,' see art. MEADOW in vol. ii. p. 307 note †; LXX *χλωρός*. There is no authority for identifying this with the papyrus.

G. E. POST.

REED GRASS (Gn $41^{2.18}$).—RV for אָחוּ, AV 'meadow.' The same word is trd in Job 8^{11} 'flag,' RVm 'reed grass.' See FLAG 1.

REELAIAH.—See RAAMIAH.

REELIAS (A Ῥεελίας, B Βορόλειος or -ειας, AV Reelius), 1 Es 5^{8}, corresponds in position to Bigvai in Ezr 2^{2}, Neh 7^{7}; but the form of the name is nearer to Reelaiah (A Ῥεελίας) in the same verse of Ezra, or Raamiah in that of Nehemiah.

REFINER, REFINING.—1. The verb זָקַק in Qal is used in Job 28^{1} of gold, and in 36^{27} of rain (see Dillm. *ad loc.*); in Piel it is used in 1 Ch 28^{18} of gold, in 29^{4} (cf. Ps 12^{6}) of silver; and in Pual of settled wine, Is 25^{6}. 2. The most usual word for 'refine' is צָרַף. The only occurrence in AV of 'refiner' is Mal $3^{2.3}$ (מְצָרֵף). צָרַף occurs both in a literal, Ps 66^{10}, Jer 6^{29}, Zec 13^{9}, and in a metaphorical sense, Ps 26^{2}, Is 1^{25} 48^{10}, Dn 11^{35} (cf. Driver, *Par. Psalt.* 458 f.). 3. *πυροῦσθαι* Rev 1^{15} 3^{18} (RV 'be refined'); cf. 1 P 1^{7}, with Hort's note.

The ancient Egyptians, as described by Wilkinson, purified gold by putting it into earthen crucibles with lead, salt, a little tin, and barley bran, sealing the crucibles with clay, and then exposing them to the heat of a furnace for five days and nights. Refining silver by cupellation is a very old process. The silver mixed with lead is put into a crucible made of bone-earth, and placed in a reverberatory furnace. As the oxide of lead forms, it is blown off by bellows, and towards the end of the process the thin covering of oxide becomes iridescent and soon disappears, and the pure bright surface of the silver flashes out. This process of refining silver is referred to in Jer 6^{29}. The reference in Mal 3 is to the purifying influence of affliction on the people of God; their sinful impurities gradually disappear, and at last the Divine image is reflected from the soul, as the face of the refiner from the surface of the purified silver. W. CARSLAW.

REFRAIN.—The verb 'to refrain' is now used only intransitively, to abstain from. This use is found twice in AV, Ec 3^{5} 'A time to embrace, and a time to refrain from embracing'; and Ac 5^{38} 'Refrain from these men.'* But the primitive meaning of 'refrain' is to curb or restrain (Old Fr. *refrener*, Lat. *refrenare*, from *re* back, and *frenum* a bridle, a curb), and this is the usual meaning of the word in AV. So Udall, *Erasmus Paraph.* i. 97, 'Jesus refreyned them, saying, Why be ye grieved with this woman?'; Ex 32^{14} Tind. 'And the Lorde refrayned him selfe from that evell, which he sayde he wolde do unto his people'; Ja 1^{26} Wyc. 'If ony man gessith hym silf to be relegious and refreyneth not his tunge' (AV 'bridleth not'); Elyot, *Governour*, ii. 215, 'Injurie apparaunt and with powar inforced eyther may be with lyke powar resisted, or with wisedome eschued, or with entreatie refrained.' J. HASTINGS.

REFUGE, CITIES OF (עָרֵי מִקְלָט, עָרֵי הַמּ׳, or, more fully עִיר מִקְלַט הָרֹצֵחַ; LXX (αἱ) πόλεις (τῶν) φυγαδευτηρίων, or the cities are said to be *φυγαδευτήρια* or *εἰς φυγαδευτήριον*; a fuller description (Jos $21^{21.36}$) is ἡ πόλις τοῦ φυγαδευτηρίου (ἡ) τοῦ φονεύσαντος; Vulg. *civitates confugii, civitates* (*urbes*) *ad confugiendum, urbes fugitivorum* (*in fugitivorum auxilia* or *præsidia, ad fugitivorum subsidia*).—*Names and location.*—The names and location of these cities are given with great definiteness, and their distribution was such as would best accommodate the entire country. There were three on the west of the Jordan—Hebron in the mountains of Judah, Shechem in Mount Ephraim, Kedesh in Mount Naphtali; and three on the east of the river—Bezer in the plain belonging to Reuben, Ramoth in Gilead belonging to Gad, Golan in Bashan belonging to Manasseh (Jos $20^{7.8}$). See under each of these names. There is every reason to believe that the early Jewish tradition (Neubauer, *Géog. du Talmud*, p. 55), which placed these cities in pairs nearly opposite each other on the east and on the west of the Jordan, is correct, so that Bezer should be found near Dhiban, Ramoth in Gilead at Gerasa,—the modern Jerash with which it has been identified (*East of the Jordan*, pp. 284–290),—and Golan, not yet located with certainty, about due east from Kedesh. For greater convenience there seems to have been a provision (Dt 19^{3}) that the principal roads to these cities should be kept open, and the inference is, although this is not stated, that they were likewise properly marked. The distance to be travelled could hardly have exceeded 30 miles at most, and was easily passed over in a day.

Origin and purpose.—In the state of society then existing, the appointment of such places of refuge was wise and wholly in the line of justice. If a man took the life of another, he himself must be slain by the nearest relative. No other law was known; justice could be satisfied in no other way. It was seen, however, that if this law were carried out hastily in every case, men might suffer death who were really innocent. Hence a trial must be had, and meantime asylums provided where alleged criminals would be safe until their case could be properly adjudged. The plan did not result, as might be supposed, in giving these places a bad character by filling them with murderers. On the contrary, these six cities were of the highest rank in every way: they were all Levitical cities—Shechem and Hebron being royal cities, and Hebron in addition a priestly city. Each city, according to the (ideal?) legislation of

---

* There is also a doubtful example in Sir 4^{23} 'Refrain not to speak, when there is occasion to do good' (Gr. μὴ κωλύσῃς λόγον, RV 'Refrain not speech'): cf. Job 29^{9} 'Princes refrained talking.'

P, was to have a suburb of a little more than half a mile in extent in every direction, so that the refugees might not be absolutely confined within the city's walls (Nu 35^{5}).

This privilege of asylum was evidently not designed for wilful murderers. A wilful murderer was to be put to death at once, and these cities were for those who had taken life unintentionally (בִּבְלִי־דַעַת Dt 4^{42}, Jos 20$^{3.5}$ [D^{2}], בִּשְׁגָגָה Nu 35$^{11.15}$, Jos 20$^{3.9}$ [all P]). That there was to be a strict trial (Nu 35$^{12.24}$) is sufficient proof that some persons who had committed wilful murder availed themselves of this possible chance of escaping with their lives (Nu 35^{12}). The trial took place where the accused had lived or was well known, and not necessarily in the place where he had sought refuge; and this is shown by the fact that, if proved innocent of wilful murder, the authorities were to see him safely back to the city of refuge after the trial was over. The law of murder and of unintentional killing is fully stated in Nu 35$^{16-28}$. After being taken back to the city of refuge to which he had fled at first, the offender was bound to remain there until the death of the then reigning 'high priest' (an expression which is taken by many to imply that the passage in its present form reflects the usage or the theory of a late age in Israel's history), after which he was free to return to his own home. During that period, however, if accidentally or otherwise he passed beyond the suburb limits of the city of refuge, the avenger of blood might slay him. No payment of money was ever allowed to interfere with the strict fulfilment of this penalty (Nu 35^{32}). Besides these regularly appointed cities of refuge, the temple at Jerusalem, or possibly the altar (see ALTAR) alone, enjoyed a similar prerogative, as is shown by the cases of Adonijah and Joab (1 K 1^{50} 11^{28}; cf. Ex 21$^{12ff.}$). As a ground of their action, we must presuppose a well-understood custom or sentiment, which gave to the altar the right of asylum in cases of life and death.*

It is a curious fact that in the later history of the Hebrews very little is said to show how generally homicides availed themselves of the refuge thus afforded. It may have been such a matter of course that nothing was ever said about it. The provision so carefully made by the Hebrews to shield those who had committed no intentional wrong had its counterpart among the Greeks and Romans, and may be looked upon as one of the most humane features of ancient civilization, where, in the general administration of affairs, cruelty and injustice, as we regard them, were frequently conspicuous. See, further, art. GOEL.

S. MERRILL.

REFUSE.—The verb 'to refuse' frequently has in AV its earlier meaning of 'reject,' especially *as unfit for use*, which is still retained in the subst. 'refuse.' Thus Ps 118^{22} 'The stone which the builders refused (RV 'rejected'†), is become the head stone of the corner'; Is 8^{6} 'Forasmuch as this people refuseth the waters of Shiloah that go softly.' So Knox, *Works*, iii. 210, 'He that refuseth not himself, and takis not up his croce, and followis me, is not worthie of me'; p. 317, 'Peter was permitted once to sincke, and thryse most shamefully to refuse and denye his Maister'; Tindale, *Pent.* Prologe to Exodus, 'an abjecte and a castawaye, a despised and a refused person'; *Expos.* 101, 'None of them, that refuseth not all that he possesseth, can be my disciple'; Mt 24^{40} Tind. 'Then two shalbe in the feldes, the one shalbe receaved, and the other shalbe refused.'

The origin of the word is difficult to trace. Trench (*English Past and Present*, 306) says unreservedly, 'To refuse is *recusare*, while yet it has derived the *f* of its second syllable from *refutare*; it is a medley of the two'; and perhaps he is right.

J. HASTINGS.

REGEM (רֶגֶם; B Ῥάγεμ, A Ῥέγεμ).—The eponym of a Calebite family, 1 Ch 2^{47}.

REGEM-MELECH (רֶגֶם מֶלֶךְ; B Ἀρβεσεὲρ [A Ἀρβεσεσὲρ, ℵ$^{c.a}$ Ἀρβεσὲρ, Q Ἀρβεσεὲ] ὁ βασιλεύς).—One of a deputation sent to consult the priests about the propriety of continuing to observe the fast of the fifth month in commemoration of the destruction of the temple by the Chaldæans, Zec 7^{2}. The text of this passage is dubious, especially as concerns the words *Bethel* (AV 'house of God') and SHAREZER (which see).

REGENERATION.—In the NT this subject is uniformly regarded in its concrete or experimental aspect: hence the abstract idea hardly occurs. Where it does, the term *παλινγενεσία* (so Tisch. WH, *παλιγγ.* TR) alone is employed. This word is not found in LXX, but it has a history in Classical and Hellenistic Greek, being used mainly in the figurative sense of complete *renovation* (*ἀνακαίνωσις*, cf. Ro 12^{2}, Tit 3^{5}). It is this idea of restoration to pristine state that meets us in the nearest equivalent to the term found in LXX, *ὑπομενῶ ἕως πάλιν γένωμαι*, Job 14^{14}. But in pre-Christian usage it is not the individual so much as the world, or a nation, that is generally the subject of the entire change of condition denoted by *παλινγενεσία*. Thus Basil (*Hom.* iii. *in Hexæm.*) says that the Stoics *ἀπείρους φθορὰς κόσμου κ. παλιγγενεσίας εἰσάγειν* (cf. Philo, *de Incorr. mundi*, 3. 14. 17; *de Mundo*, 15), what M. Aurel. (xi. 1) calls *ἡ περιοδικὴ π. τῶν ὅλων*. Similarly, Philo calls Noah and his sons, *παλιγγ. ἡγεμόνες κ. δευτέρας ἀρχηγέται περίοδου* (*Vit. Moys.* ii. 12; cf. 1 *Clem.* ix. 4). National restoration is a sense found in Jos. (*Ant.* XI. iii. 9, *ἡ ἀνάκτησις κ. παλιγγ. τῆς πατρίδος*); and this, in the fuller sense of the Messianic renewal of Palestine (and of the whole world, or dependent thereon, *ἀποκατάστασις πάντων*), seems to reappear in Mt 19^{28}, one of the two NT occurrences of *παλινγ.* (cf. Dalm. 145). Even in Classical usage, however, the term does sometimes refer to the lot of the individual, denoting restoration to life in a literal or a figurative sense. Plutarch uses it several times in the former sense, *i.e.* in relation to the transmigration of souls (*de Esu carn.* ii. 4. 4, *ὅτι χρῶνται κοινοῖς αἱ ψυχαὶ σώμασιν ἐν ταῖς παλιγγενεσίαις*); and Agrippa is quoted by Philo (*Leg. ad Gaium*, 41) as addressing the emperor Gaius as follows: *τὸν . . . τεθνεῶτα τῷ δέει ζωπυρήσας καθάπερ ἐκ παλιγγενεσίας ἀνήγειρας.* In more figurative wise Cicero (*ad Att.* vi. 6) calls his restoration to his lost life of dignity and honour *hanc παλιγγ. nostram*; and Olympiodorus, speaking of memory, says, *παλιγγ. τῆς γνώσεώς ἐστιν ἡ ἀνάμνησις.* Hence, on the whole, *παλιγγ.* in non-biblical usage seems to denote a restoration of a lost state of well-being, amounting to re-creation or renovation.

If we could be surer of the Rabbinic use (esp. in relation to proselytes) of such an idea in the time of Christ, we should probably get further light on the exact connotation of *παλινγ.* and kindred expressions as they emerge in the NT. Among the latter the following are prominent: *ἀνακαίνωσις* (Ro 12^{2}, and esp. Tit 3^{5}), with the verb *ἀνακαινοῦσθαι* (Col 3^{10}, 2 Co 4^{16}) and its synonym *ἀνανεοῦσθαι* (Eph 4^{23}); *ἀναγεννᾶν* (1 P $1^{3.\,23}$) [which does not occur elsewhere in extant Greek literature uninfluenced by the NT itself, though the Philonean tract, *de Incorr. mundi*, 3, has *ἀναγέννησις* as a synonym for the Stoic *παλιγγενεσία* of the world, and Porphyry has *ἀναγεννητικός* (*Ep. ad Aneb.* 24)]; *γεννηθῆναι ἄνωθεν* (Jn $3^{3.\,7}$, cf. *γενν. γέρων ὤν* or *δεύτερον*, v.^{4}); *καινὴ κτίσις* in the concrete sense (2 Co 5^{17}, Gal 6^{15}, Eph 2^{10} 4^{24}), and its practical equivalents, *καινὸς ἄνθρωπος* (Eph 2^{15} 4^{24}), *νέος ἄνθρ.* (Col 3^{10}); *τέκνα θεοῦ γενέσθαι* (Jn 1^{12}), *γεννηθῆναι ἐκ τ. θεοῦ* (Jn *passim*), *ἐκ τ. πνεύματος*, or *ἐξ ὕδατος κ. πνεύματος* (Jn $3^{5.\,6.\,8}$); and, finally, *γεννᾶν* (*τινα*) *διὰ τοῦ εὐαγγ.*, used of the preacher of the Word (1 Co 4^{15}, cf. Gal 4^{19}). A single passage from an early Christian Father may be subjoined, as showing the influence of the NT upon his language, and also the relation of the biblical idea of Regeneration to certain other cognate ideas. Clement of Alex., speaking of the restoration of a sinful woman, writes (*Strom.* ii. *ad fin.* p. 424): *ἡ δὲ μετανοήσασα, οἷον ἀναγεννηθεῖσα κατὰ τὴν ἐπιστροφὴν τοῦ βίου, παλιγγενεσίαν ἔχει ζωῆς, τεθνηκυίας μὲν τῆς πόρνης τῆς παλαίας, εἰς βίον δὲ παρελθούσης αὖθις τῆς κατὰ τὴν μετάνοιαν γεννηθείσης.* It has sometimes been thought that the idea of religious regeneration in this life was one 'in the air' in the 1st cent.; and the phrase *in æternum renatus taurobolio*, in connexion with Mithraic worship, has been cited as evidence. But Hort thinks it, as well as the *παλιγγενεσία* of the Hermetic writings, to be dependent on Christian usage. Nor can the fact that Osiris was addressed as one who 'giveth birth unto men and women a second time,' be cited to the contrary: for this clearly refers to renewed life beyond the grave, not to spiritual regeneration in this life. The origin of this latter notion and phraseology is rather to be sought in the OT and its Rabbinic developments. The phrase 'new creation,' adopted by St. Paul, occurs repeatedly in the Midrashim with various applications (see Dalm. *Worte Jesu*, 146), and a proselyte is compared to a newborn child in the Talmud (Jebamoth 62*a*; see Wünsche, *Erläut. der Evangg.* 506); cf. Hort, *First Ep. of Peter*, p. 33. The present article will deal with the following points:—

---

* As to the relation of Dt 4$^{41ff.}$ to 19$^{1ff.}$, and on the whole subject, see Driver, *Deut.* 233.

† The Gr. of the Sept. is ἀπεδοκίμασαν, the Lat. of the Vulg. *reprobaverunt*; Wyc. translates 'repreveden,' Cov. and Gen. 'refused,' Douay 'rejected,' Bish. 'refused.' The passage is quoted in Mt 21^{42}, Mk 12^{10}, Lk 20^{17} where the Gr. is always ἀπεδοκίμασαν, and the Vulg. *reprobaverunt*; Wyc. has 'repreveden' in Mt and Lk, but 'dispisid' in Mk; Tind. has always 'refused' or 'did refuse,' Rhem. and AV 'rejected.' The passage is also quoted in Ac 4^{11} and 1 P 2^{4}, but with less verbal exactness. Thus Ac 4^{11} Gr. ἐξουθενηθείς, Vulg. *qui reprobatus est*, Wyc. 'which was reproved,' Tind. 'cast a syde,' Rhem. 'rejected,' Bish. 'set nought,' AV and RV 'set at nought'; 1 P 2^{4} Gr. ἀποδεδοκιμασμένον, Vulg. *reprobatum*, Wyc. 'reproved,' Tind. 'disalowed' (so Cov., Cran., Gen., Bish., AV), Rhem. 'reprobated,' RV 'rejected.'

The idea of Regeneration belongs to the NT rather than the OT. Indeed, some would confine it, in any proper personal sense, to the former exclusively. But this would be to confuse the implicit and explicit forms of the doctrine and experience, and to break the genuine continuity of biblical religion. This continuity, along with progressive development of form, it must be our care to trace between OT and NT, as well as between the several types of presentation in the NT itself.

A. OLD TEST. ADUMBRATIONS.—i. OT religion being originally a matter of the nation rather than the individual, all the forms under which it was conceived were highly objective. Things to be done or avoided are prominent; and all as tending to avoid rupture of the normal relation or covenant between the people and J″. At first little stress is laid on the state of the inner life, on ethical as contrasted with ritual purity. But when, under the influence of the prophets of the 8th cent. and later, the ethical element in religion came fully to light, the old idea of religion, as a dutiful relation between man and God, became charged with new spiritual meaning, and afforded the deepest and most adequate notion of piety imaginable. For it went below the level of mere deeds, to the attitude of soul of which they were as the fruit.

(*a*) The stages in the process may be traced as follows. As the older notion of salvation or well-being had been largely that of external *national* prosperity, taken as the expression of the favour of J″; so the chief means of its purification and deepening was national adversity. This turned attention, first to the moral conditions of the favour of the Holy One of Israel, and then to the intrinsic blessedness of righteousness itself, apart even from its normal external concomitants of peace and prosperity. At the same time, the break-up of national welfare caused the individual to attain to a new consciousness of his personal relations to J″, and so to a more spiritual piety. These changes, as they affected both Israel and the individual Israelite, reached their crisis in the experiences of the Exile. During and after it the spiritual harvest, the first-fruits of which are to be seen even in the pre-exilic prophets, was gathered in by the sifted Church-nation. Chief among the new ideas acquired were (1) the thought of sin as a besetting power, ever apt to mar the normal relations between J″ and His people; (2) the idea that a profound change of temper or attitude in Israel as a whole was needful; (3) the conviction that an evil so inherent as the stiff-neckedness and uncircumcision of heart discovered in Israel could be met only by Divine and supernatural agency, working upon the very springs of conduct (cf. Dt 10^{16} 30^{1-6}). In fact, the vision of a renovation of feeling and will as needful to Israel, of national regeneration as the pre-requisite and the essential blessing of the longed-for Messianic age, began to possess the better minds following in the wake of Jeremiah and Ezekiel. Yet even in those great prophets the bestowal of the regenerate heart is thought of largely as a special intervention to meet an exceptional need, as it were at a stroke; and its primary reference is collective rather than personal. Ephraim is overheard acknowledging the effect of the Divine discipline as salutary, and adding, 'Turn thou me, and I will turn' (Jer 31^{18}): and then the prophet looks forward to the bright day of national restoration, when the covenant shall become 'a new covenant,' as being divinely inscribed on the heart or inner life of the people ($31^{31\text{ff.}}$). Then 'they shall be my people, and I will be their God: and I will give them one heart and one way, that they may fear me for ever' ($32^{38\text{f.}}$ 24^{7}). Similarly Ezekiel: 'And I will sprinkle clean water upon you, and ye shall be clean: from all your filthiness and from all your idols will I cleanse you. A new heart also will I give you, and a new spirit will I put within you: and I will take away the stony heart out of your flesh, and I will give you an heart of flesh. And I will put my spirit within you, and cause you to walk in my statutes' (36^{25-27} 11^{19}). Here we get, as never before, the idea of a new responsiveness of heart divinely produced—the essence of regeneration. But the regeneration is still viewed as national rather than individual (cf. the prophecy of the Valley of Dry

Bones, Ezk 37^{1-14}), though the effects on the individuals composing the nation are often clearly present to mind (Jer 31^{34}, Is 54^{13} 60^{21}). And, above all, it is felt to be still future (contrast Ezk 18^{31}), a blessing of the Messianic age.

(*b*) But while this is true of OT religion as a whole, even after the Exile, there are traces of *individual* piety going far beyond it, and virtually anticipating the NT experience of regeneration. Transferring the idea of religion, as a dutiful relation between Israel and its God, from the nation to the individual conscience, this deeper piety gave the holiness loved of J″ a most vital meaning. It saw in 'walking humbly with one's God,' the inmost secret of 'doing justly and loving mercy.' All sprang from the 'contrite and humble spirit' indwelt of the Holy One of Israel (Is 57^{15} 66^{2}). 'The sacrifices of God are a broken spirit,' a spirit broken by the sense that it was 'truth in the inward parts' that could alone satisfy the Holy One (Ps $51^{17.\,6}$). And along with this begins to appear the sense of a nature radically prone to sin, and so in need of more radical aid from the Searcher of hearts before covenant obedience could become possible (Ps 51^{5}, Job 14^{4} 'Who can bring a clean thing out of an unclean? Not one'). There arises a cry for the 'mercy' and 'lovingkindness' of God, to draw the heart to Himself, and so create the very state of spirit with which He could commune. 'A clean heart,' 'a right' (steadfast) or 'free (willing) spirit'—on which turned 'the joy of thy salvation'—are all traced to the presence of God's 'holy Spirit' at work on the soul (Ps $51^{1.\,10-12}$). Here we have the high-water mark of piety on OT lines, or rather piety under OT forms, but already outgrowing its limits. For with the emergence of the ideas of religion as primarily a state of the heart, of the radical tendency to sin native to frail human nature, and of the grace of God, in renewing and quickening power, as alone adequate to man's need,—with this the old national religion is transcended, and a new covenant becomes indispensable. Here, then, the experience, not to say the doctrine, of regeneration is already virtually present: it lacks only the objective basis furnished by the revelation in Christ, to give it that steady and assured quality which is the prerogative of NT 'faith.'

ii. As Israel's slowness to realize the idea of regeneration was in part due to its overshadowing sense of a specially favoured relation to J″ attaching to Abraham's seed, as such; so we may suppose that the accession to exilic and post-exilic Israel of a growing number of those who had no such natural advantage, must have stimulated reflexion on the subjective conditions of fitness for communion with J″. It may be true that the sense in which *proselytes* were first spoken of as 'born' to or in Messianic Zion (Is $49^{21f.}$ 44^{5}, Ps $87^{5f.}$) was mainly that of formal adhesion to the sacred people. Yet the patent greatness of the change of belief and conduct involved in the adhesion, must have tended to develop thought upon the spiritual and ethical senses in which a man might become a 'new' man, as it were by birth out of one world into another. Such reflexion would further be fostered by the rites through which the change of condition was achieved, particularly the ablution or baptism by which proselytes were admitted to Israel. And all this would easily coalesce in devout minds with the promise in Ezk $36^{25f.}$ touching the sprinkling of Israel itself with clean water, and the new heart associated therewith, as marking the piety of the great age that was to come. When, then, John the Baptist appeared, to usher in the fulfilment of Mal $3^{1ff.}$, there must have been a widespread feeling that his baptism meant a radical change of heart even in Israel (cf. Jn $1^{25ff.}$). Still, the Diviner side of Ezekiel's prophecy, the baptism with the Holy Spirit, waited upon the coming of the Mightier One, Messiah Himself (Mt 3^{11}, Lk 3^{16}, Jn 1^{33} 3^{25}). And it was the deeper experience of the Holy Spirit, in specifically Christian form, that brought regeneration to light as implicit in the contrite heart and spirit, and placed it, the Divine side of the fact of true repentance, in the centre of NT teaching (cf. Jn $3^{3.\,5}$).

B. New Test. Presentation.—i. *The Synoptics.*—In Jesus' own public teaching the idea appears only in implicit forms, chiefly that of a radical repentance or change of heart (*μετάνοια*) towards God and towards sin—the great condition, in the prophets also, of restoration to Divine fellowship. But in that teaching there are also hints that the change is more complete than anything hitherto realized, in keeping with the advance in the revelation conditioning it. Man must choose between two lives, a lower and a higher: to find or save the one, he must be ready to lose the other. And it is implied in the parable of the Prodigal Son that the spiritual life of sonship is in fact 'dead' or null (Lk 15^{24}) in every child estranged by sin and selfhood. It is needful that even honest disciples 'turn and become as little children' in order truly to enter the Kingdom, in which it is the crown of blessedness to be genuine children of the heavenly Father (Mt 18^{3} 5^{45}). The parable of the Sower implies that the specific life of the Kingdom arises in the human heart by the sinking in of the gospel, and its producing, as it were, a new root of personality; and it is intimated, though only in private to chosen disciples, that true 'faith' is dependent on a Divine factor at work behind the human (Mt 16^{17}). This latter case suggests that the merely implicit form in which the profound truth of regeneration occurs in Christ's ordinary preaching is due, partly at least, to its popular character, as adjusted to the needs of the poor and simple, in contrast to theologians like Nicodemus.

ii. *St. James.*—The exact sense of the words (1^{18}), 'of set purpose he brought us forth by the word of truth, that we should be first-fruits, as it were, of his creatures' (*βουληθεὶς ἀπεκύησεν ἡμᾶς λόγῳ ἀληθείας, εἰς τὸ εἶναι ἡμᾶς ἀπαρχήν τινα τῶν αὐτοῦ κτισμάτων*), has been much debated. St. James is addressing the Israel of God, conceived much in the way in which an ancient prophet thought of the true Israel within Israel. He thinks of all 'Israelites indeed,' though he has in mind chiefly those who already believe in Jesus as Messiah (cf. Jn 1^{47} 3^{21}); for both alike have in principle one religion, that of 'doers of the word' (the revealed will of God), of such as visit the fatherless and widows, and keep unspotted from the world (1^{22-27}). To his eye, then, this people of loving obedience is what Israel's God had meant Israel to be (Is $43^{20f.}$), 'My people, my chosen, the people which I formed for myself (LXX, *ὃν περιεποιησάμην*), that they might set forth my praise.' So, of those who fear J″ and regard His name it is said (Mal 3^{17}), 'And they shall be to me . . . in the day which I make, for a special possession' (*ἔσονταί μοι . . . εἰς περιποίησιν*). This is very much the idea on which St. Peter dwells so lovingly, of 'a people for God's own possession,' quickened into new life through the word of the living God (1 P 1^{23} 2^{9})—though he has professed Christians alone in view. Like ideas occur also in Eph 1^{10-14}, but decisively universalized as to the scope of 'God's own possession' (cf. 2 Th $2^{13f.}$, esp. if we read *ἀπαρχήν* instead of *ἀπ᾽ ἀρχῆς*, with BFG ^{gr} P minn. f. vg. syr. hl., *al.*); while the notion of God's saints being first-fruits, as it were, of His full and final possession of His creatures in general, appears quite explicitly in Ro 8^{19-23}. There creation is represented as awaiting 'the revealing of the sons of God' ('the Regeneration,' in the collective sense of Mt 19^{28}), who, as already having 'the first-fruits of the Spirit,' may themselves be styled God's first-fruits (cf. Rev 14^{4} 21^{5}). Thus spiritual Israel, now in process of rallying to Messiah Jesus, seemed to St. James 'the first-fruits' of God's final reign. As for 'the word of truth' to which this Israel owed its being, it was the revealed will of God active in conscience (='the inbred word,' 1^{21}, or simply 'the word,' $1^{22f.}$=God's 'law,' known as spirit and not as letter, 'perfect law, that of liberty,' 'royal law,' 1^{25} 2^{8-12} 4^{11}='the truth,' in an ethico-religious sense, 3^{14} 5^{19}, cf. Jn $8^{31f.}$ 17^{17}). It was the sort of 'word' that meets us in the Sermon on the Mount, the final practical issue of OT revelation for the conscience (cf. 'the word of truth' in Ps 119^{43}; also v.^{160} 'the sum of thy word is truth'). Yet it is not to be confined to the specifically Christian gospel: it denotes, rather, the element common to that and the law as it lived in the unsophisticated consciences of Jews like those who meet us in Lk 1-2.

St. James has in mind, then, not individual regeneration, but rather the collective being of a People devoted to the Divine Will, and of which believers on Jesus Messiah were the typical members—a People which thus could be styled 'first-fruits, as it were, of God's creatures.'* His argument is that God cannot stultify Himself by tempting to evil. He is the author of good, and changeth not. And since it was with full intention that He brought forth† or constituted the godly community gathering to the name of Jesus Messiah, He must not be thought of as the author of seductive temptations. The emphasis still falls, as in pre-Christian references to regeneration, on the collective quickening traceable to the Divine initiative, rather than on the individual —though this latter is implied in the exhortation to 'receive the inborn word (*ἔμφυτον λόγον*, cf. Wis 12^{10} *ἔμφυτος ἡ κακία αὐτῶν*),‡ which is able to save your souls.' Accordingly, such rudiments of our doctrine as occur in James, represent a stage midway between typical OT and typical NT statements on the subject.

iii. *St. Peter.*—The Petrine doctrine stands between that of St. James on the one hand, and that of St. Paul on the other. The OT associations of collective blessing (cf. his reference to 'seasons of recovery' or 'restoration,' *ἀνάψυξις*, *ἀποκατάστασις*, in Ac $3^{19.21.26}$) are still prominent in the language chosen (1 P 2^{9}); while yet the idea of 'regeneration,' and that of individuals, by the Divine 'seed' or 'word of God,' is firmly grasped (1^{23} cf. ^{3}, cf. parable of the Sower). The disciple seems possessed by his Master's teaching as to the child-spirit and the Divine fatherhood (2^{2} 1^{17}). The Divine parentage involved in the new life is appealed to as a reason for love of the brethren ($1^{22f.}$): being regarded as a congenital law of their new being—an idea which recurs in 2 P 1^{4}, where renewed human nature is set forth as 'in a true sense not God-like merely, but derivatively Divine' (Hort, cf. 1 Jn 3^{9}).

'The word' by which this comes about is clearly that of the gospel (1 P 1^{25}); and, answering to this, the definite act of confession in baptism is thought of as objectively sealing the salvation thus wrought (see BAPTISM in vol. i. p. 244^{a}). Water, says he, doth now, in antitype to Noah's preservation, play its part in salvation, as Christian baptism—'not the putting away of the filth of the flesh, but the appeal toward God of a good conscience, through the resurrection of Jesus Christ,' man's surety at God's right hand (1 P 3^{21}). The sense of this passage, and particularly the meaning here given to the word *ἐπερώτημα*, seems fixed by Ro $10^{9f.}$, He 10^{22}. 'For with the heart man trustfully believeth unto (the attaining of) Righteousness (*i.e.* Justification=Salvation in God's sight, *implicitè*); but with the mouth man maketh confession unto (the attaining of) Salvation' (*i.e.* formal possession of salvation, *explicitè*). 'Salvation,' in this context (Ro $10^{9f.}$), refers to objective membership of the Messianic Community or Church, the proper unit or subject of the New Covenant. Into this Body of the Christ, St. Paul says elsewhere (1 Co 12^{13}), Christians are through baptism incorporated 'by one Spirit.' 'The Spirit of adoption, whereby we cry, Abba, Father,' seals, often by objective manifestations, the sincerity of the believer's confession. Similarly He 10^{22}, 'Let us draw near (as favoured worshippers) with a true heart, in *full assurance of faith*, having our *hearts sprinkled* (by blood, $9^{13f.}$) *from an evil conscience*, and the *body washed with pure water.*' Thus every obscure element in 1 P $3^{18.21}$ is elucidated. Christ, though 'put to death in (the sphere of) flesh,' was 'quickened in (the sphere of) spirit'—and so became for others 'a quickening spirit' (*πνεῦμα ζωοποιοῦν*, 1 Co 15^{45}). Baptism, then, as the consummation of the believer's appropriation of Christ, means no mere bodily cleansing (like Levitical ablutions), but the appeal of a cleansed conscience (see 1^{2} with 3^{18}; cf. He $9^{13f.}$), directed in 'full assurance of faith' to God (cf. Eph 3^{12} *προσαγωγὴν ἐν πεποιθήσει*). It corresponds to the 'living hope' due to Christ's resurrection, spoken of in 1^{3} (cf. Col 2^{12}). 'The promise of the eternal inheritance' (He 9^{15}), for which worshipful appeal is made to God's covenant fidelity in the Mediator, was conceived to be received 'in earnest' in the manifestation of Holy Spirit power (Ac 2^{33})—'anointing' or 'sealing' the believer unto the day of perfected redemption (2 Co $1^{21f.}$, Eph $1^{13f.}$ 4^{30}). Thus 'baptism,' as a living experience, could be alluded to in Tit 3^{5} as a formal 'washing of regeneration and renovation (in virtue) of Holy Spirit,' 'poured forth richly' at the solemn crisis of confession, where 'Salvation,' as an objective state, took full effect (*ἔσωσεν ἡμᾶς διὰ λουτροῦ παλινγενεσίας καὶ ἀνακαινώσεως πν. ἁγίου*). Baptism was a rite for the Church or sacred community as such, and for the individual in relation to it and its privileges; 'by the washing of water' were its members, as 'cleansed' 'by means of the word' (cf. Jn 15^{3}), formally admitted to the sphere of consecrated life resting on Christ's sacrifice (Eph 5^{26}, Ro $10^{8f.}$).

St. Peter seems also, by the time he wrote 1 P, to have caught in his own way St. Paul's deep, mystical thought in Ro $6^{4f.}$, where identity with Christ's 'resurrection' life, on the part of the regenerate, is made to grow out of spiritual union with Him in His death to sin (consummated in His crucifixion, see 1 P 2^{24}). For 1 P $4^{1.2.6}$ contains the essential idea of spiritual quickening through judgment in the flesh. And this process is extended by him, alone among NT writers, even to certain souls in Hades, namely, those suddenly cut off in the days of Noah—a fate conceived (as it seems) to have given them less than the normal probation of mankind, and that in an age of but dim light (1 P $3^{19f.}$ 4^{6}; see, further, art. PETER, FIRST EPISTLE OF, in vol. iii. p. 795).

---

* Jer 2^{3} 'Israel (is) holiness unto the LORD, the first-fruits of his increase'—*ἀρχὴ γενημάτων αὐτοῦ*, which parallels *ἀπαρχήν τινα τῶν αὐτοῦ κτισμάτων*; and for the personal sense of *κτίσματα*, cf. Sir $36^{19f.}$, where *ὁ λαός σου* is described in the next line as *τὰ κτίσματά σου*.

† The idea occurs elsewhere, *e.g.* Sir 36^{17} (derived from Dt $32^{6.18}$, Ex 4^{22}) *Ἰσραὴλ ὃν πρωτογόνῳ ὡμοίωσας*. In Ja 1^{18} the verb *ἀπεκύησεν* is used to mark an antithesis to the thought of 1^{15}, where this metaphor was employed of sin as parent of death.

‡ Cf. Barn. i. 2, *οὕτως ἔμφυτον τῆς δωρεᾶς πνευματικῆς χάριν εἰλήφατε*, and ix. 9, *οἶδεν ὁ τὴν ἔμφυτον δωρεὰν τῆς διαθήκης αὐτοῦ θέμενος ἐν ἡμῖν*.

iv. *The Epistle to the Hebrews.*—Though this Epistle contains, as we saw, much bearing on the new consciousness, yet it has no formal doctrine of 'regeneration' as the deepest aspect of the Messianic blessing. True, it uses metaphors of life developing from infancy to maturity (5^{12-14}, with its allusions to 'milk' and 'solid food'); but there is no stress on the image involved. The categories of thought are mainly of an OT character—apart from the writer's own 'Alexandrine' strain (see below, *C, ad fin.*; cf. 'those once illumined,' 'having tasted God's word as good,' 6^{4}). Hence we get a parallel to Ja 1^{18} in the 'congregation of the firstborn (who are) enrolled in heaven.' Hence also the central place of repentance, as marking the beginning of the new relation to God—'repentance' as the negative side of the change represented on its positive side by 'faith' ($6^{1.\,6}$). 'Repentance,' however, is taken by this writer in a deep and inward sense, in which it amounts to a 'new heart' wherein the Divine Law is by Divine grace made inherent, according to Jeremiah's great prophecy of the New Covenant ($9^{6ff.}$ 10^{16-18}).

v. *St. Paul.*—The Pauline doctrine of Regeneration contains the essence of its author's unique experience of Jesus the Christ, as effecting at once revolution and renovation in his inner life. The difficulty here is to prevent this central aspect of Paulinism from involving us in an exposition of that system as a whole. We shall try, however, to indicate its place in the organism of St. Paul's soteriology as allusively as possible.

Beyond all question, 'faith' was to him the very soil or subjective condition of that new good which came through the gospel. Faith was such receptivity as enabled God to give 'his ineffable gift' to the soul. As such, it answers to 'the good ground,' the 'honest and good heart,' as the state of soul adapted to 'the word of God,' in Christ's parable. But St. Paul, viewing things in a more subjective way, proceeds to illumine the inner factors and stages of the great process from the standpoint of personal appropriation, as one who was himself the conscious soil in which it had come about. The good of which such 'faith' or vital trust is receptive in Christ, is variously set forth by St. Paul as the righteousness of a rectified relation to God, including forgiveness of sins (see JUSTIFICATION); cleansing or consecration (sanctification in principle: see SANCTIFICATION); participation in the Divine life, as the life of the Christ, or Spirit-life; and hence realized sonship to God, as embracing all else. So arranged, the series passes from the more objective to the more subjective aspects of the one simple yet complex fact, which, rooted at the heart of St. Paul's experience, had made a new man of him. And the most adequate conception of it is that which represents the new relation to God in its most inward, vital, and causal aspect—the birth of a new manhood or personality within the old individual, Saul. It is this which ever emerges in St. Paul's most spontaneous and personal utterances. Such are the great outbursts in Gal 2^{20} and 2 Co 5^{15-17}—passages familiar, yet in virtue of their experimental depth so little 'known' in the biblical sense. 'I have been crucified with Christ; yet I live; (and yet) no longer I, but Christ liveth in me: and that (life) which I now live in the flesh, I live in faith, (the faith) which is in the Son of God.' And again: 'He died for all, that they who live should no longer live unto themselves, but unto him who for their sakes died and rose again. . . . Wherefore if any man is in Christ, (he is) a new creature (*καινὴ κτίσις*): the old things are passed away; behold, they are become new.' In these and like passages St. Paul speaks as a prophet, not as a schoolman. He affirms: he has no thought of what he may seem implicitly to deny. The life in him was above all new; and it was of Divine initiation or grace. But that did not mean that there was no psychological continuity between the old Saul and his faculties, and the new Paul and his: nor did it exclude the responsible co-operation of his own volition throughout. The affirmations are experimental and unembarrassed by reflective considerations of verbal consistency. We may see, moreover, from other passages that what is here in the background was not overlooked by St. Paul, but entered into the body of his thought, coming out in turn as occasion arose. Thus when he speaks of 'a new creature' (Gal 6^{15}, 2 Co 5^{17}), or says, 'the old things are passed away; behold, they are become new,' he simply means that his experience had utterly changed in colour and perspective. No factors had been eliminated: but the resultant was new; and this by the operation of a new factor determining all afresh and in a new synthesis. The new factor was the quickening grace of God in the Christ, the Spirit of Christ, the (Holy) Spirit, or most fully 'the law of the Spirit of life in Christ Jesus.' This, by overcoming 'the law of sin and death,' naturally at work, had produced a new spiritual life in him, and so made him a 'new man' in Christ Jesus. The way by which this had come about is laid bare in Ro 7, a chapter of deep psychological and also autobiographic significance. From it we gather that even in his unregenerate state, while the law of sin operative in 'the flesh'—the sensuous and self-willed side of his nature—actually swayed his will, he was already conscious of another and deeper element in his being, protesting against the flesh and sympathizing with the claims of God's law. This 'inner man' (*ὁ ἔσω ἄνθρωπος*, 7^{22} = *ὁ νοῦς*, $7^{23.\,25}$ = *τὸ πνεῦμα τοῦ ἀνθρώπου*, 1 Co 2^{11}; cf. Ro 8^{10}), however, has only a latent or potential existence so long as it is overridden by 'the flesh'—'the law of the mind,' by the law or principle active in the fleshly members (7^{23}). The spirit is as good as dead in the man Saul as a moral personality, being outside the centre of volition as long as 'the flesh' is there enthroned in power; and so it is generally ignored in St. Paul's references to 'the natural man,' who is called summarily 'dead in trespasses and sins,' because morally 'alienated from the life of God' (Eph $2^{1.\,5}$ 4^{18}). But when the life of God succeeds in quickening this half-inanimate spiritual faculty with a kindred passion for the righteousness of God, then it springs to life (Ro 8^{10}) and gains control of the will: a new personality arises from the new union of the will and the higher element dependent on and akin to the Divine: the man lives anew with a fresh type of moral life—that being dominant which before was subject, and *vice versâ*. With this psychological reversal may be compared the earlier change from the rudimentary 'life' of irresponsible innocence to the 'death' of a divided heart, wherein the lower elements hold sway (Ro 7^{9-11}). Now, however, the man is conscious of the issues at stake and the forces of both kinds at work in and upon him: and the whole deliverance has a vividness and finality proportionate to his prior sense of the death in bondage to sin (7^{24}).

As this experience of renovation came to St. Paul under the forms of the life, death, and resurrection of Jesus the Christ, so regeneration is set forth in terms of the same. The 'new man' or 'new creature' is so 'in Christ'; and Christ is in him. Hence 'the Spirit of God' or 'Holy Spirit,' the quickener of the new life (1 Co 6^{11} 12^{3}), can also be called 'the Spirit of Christ' (Ro 8^{9}) or 'the Spirit of his Son' (Gal 4^{6}). Hence also the specific condition of the 'new man,' in contrast to the 'old' (Col $3^{9f.}$, Eph 4^{22-24}), is that of sonship and installation into sonship (*υἱοθεσία*, Ro 8^{15-29}) after the likeness of Christ's.

Still this regenerate or filial life is not complete at the time when it is given, coincidently with the self-committal of faith. It has a course of growth to go through, analogous to that of natural life. It begins with spiritual immaturity and proceeds to maturity of will and insight. The 'babe' (*νήπιος*) in Christ is one who perceives only the broadest outlines of the Father's ways and will, and may still be confused by the films of his old fleshly blindness; whereas the full-grown or 'perfect' man (*τέλειος*) is one to whom experience has brought enlightenment and discrimination of conscience (Ph $1^{9f.}$ 3^{12-16}): he is actually and not only potentially 'spiritual' (*πνευματικός*). And each stage has its own spiritual nutriment, its 'milk' or its 'solid food' (1 Co 3^{1-3}).

(vi.) *St. John.*—The term 'regeneration' does not actually occur in St. John's writings, though it does virtually in one passage of his Gospel ($3^{3.\,7}$), in the phrase *γεννηθῆναι ἄνωθεν*, which is best rendered 'born anew' (cf. v.^{4} *δεύτερον εἰσελθεῖν . . . καὶ γεννηθῆναι*). This shade of thought, while proper to the context, and while probably appropriated by St. John as the root of his own thinking on the matter, is not the one most characteristic of his own doctrine. It is not so much the fact of a new beginning in the Christian life, as the inherent nature of that life as due to its Divine origin, that occupies this apostle's mind. His favourite emphasis is seen in the phrase 'to be begotten of God' (*γεννηθῆναι ἐκ τοῦ θεοῦ*). God Himself is the veritable Father of the Christian believer, the kindred fontal source of his new life, with its inherent Divine virtue (*τὸ γεγεννημένον ἐκ τοῦ θεοῦ*). This virtue manifests itself in certain vital functions, wonderful and Divine by reason of their distinctness from the average conduct of human nature, as St. John saw it about him, radically determined by the world of sense, that source of seductive pleasures and ambitions. The world, so regarded, stood at the rival pole of being to the Father; so that 'to be of the world' and 'to be of God' were mutually exclusive states or spirits, by which the soul might be possessed and characterized (1 Jn 2^{16}).

Such birth from God is conceived by St. John as a single initial fact, carrying in itself abiding issues of a like nature. This is expressed by the use of perfects, like *γεγέννηται, ὁ γεγεννημένος* (1 Jn 2^{29} 3^{9} 4^{7} $5^{1.\,4.\,18}$, cf. Jn $3^{6.\,8}$), as distinct from aorists (*ὁ γεννηθεὶς ἐκ τοῦ θεοῦ* describes Christ in immediate contrast to the believer, *ὁ γεγεννημένος ἐκ τοῦ θεοῦ*, 1 Jn 5^{18}). The rarer cases in which the aorist occurs, are those which simply contemplate regeneration as the decisive fact constitutive of spiritual sonship in the believer (Jn $1^{12f.}$, cf. $3^{3.\,5.\,7}$). The main passage in question is Jn $1^{12f.}$: 'But as many as received him (the Logos), to them gave he prerogative to become children of God (*ἔδωκεν αὐτοῖς ἐξουσίαν τέκνα θεοῦ γενέσθαι*), even to them that were believers on his name (*τοῖς πιστεύουσιν εἰς κ.τ.λ.*); who were born, not of blood of human parents, nor of fleshly volition, nor of a human father's volition, but of God' (*οἳ οὐκ ἐξ αἱμάτων οὐδὲ ἐκ θελήματος σαρκὸς οὐδὲ ἐκ θελήματος ἀνδρὸς ἀλλ' ἐκ θεοῦ ἐγεννήθησαν*). This is, in form and in context, an absolutely general statement; so much so, that it seems impossible to refer it primarily to belief in Jesus the Christ at all, but rather to the universal approach of the Logos to the human soul, prior even to the Incarnation (see 11^{52} for a similar thought). This is a most important aspect of the Johannine doctrine of regeneration: it not only fits in with the universality of his thought, but also confirms with his authority what is urged below, namely, that 'regeneration' may properly be predicated of the experience of saints under the Old Covenant. Yet the language in which St. John states this very truth of the wider regeneration, effected wherever the Logos is welcomed by the soul, is significantly coloured by his habitual speech in terms of the final manifestation of the Logos in Jesus the Christ ('believers on his name').

As a rule, then, regeneration is, to St. John, actually conditioned by personal trust in Jesus, or, more specifically, in Him as the Christ, the Son of God ($1^{12f.}$ 20^{31}, 1 Jn 5^{1}). Further, it is assumed to take formal or consummated effect (as in the case of Jesus' own Messiahship) in the experience of baptism. Just as he says, 'This is he who came under the condition of water (*δι' ὕδατος*) . . . even Jesus Christ' (1 Jn 5^{6})—words used in close connexion with the Spirit as Messiah's endowment and witness (vv.$^{6-8}$, cf. Jn 3^{34}); so baptism is to him the normal condition under which believers come to rank as 'children of God,' in virtue of a manifest sealing by Holy Spirit power. As the Father had 'sealed' the Son (Jn 6^{27}) with the Spirit's witness, in response to His obedience of self-consecration at the Baptism (1 Jn 5^{5-9}), so, apparently, St. John thought of the Messianic gift of the Spirit, usually manifest at baptisms in the Apostolic Age, as definitively 'sealing' (cf. above, (iv.)) the believer's confession of personal trust and consecration by 'an unction from the Holy One' (*i.e.* Christ, 1 Jn $2^{20.\,27}$).* Such a reading of his Master's mind, as expressed by the reference to water in the words to Nicodemus, may be implied by St. John's return to the topic of baptism a few verses later on ($3^{22.\,25ff.}$), and certainly corresponded to the experience of the Apostolic Age—though hardly to that of later times. Naturally, the conjunction has no relation to the baptism of infants, where the essential element of belief on Christ's name is lacking. But, in relation to the conditions contemplated by the apostle, the definite line drawn by baptism between the filial status of Christian believers and what went before, is of great moment for his thought as to regeneration. It does not, indeed, annul his recognition of children of God awaiting the gospel to gather them into Christ's one flock (Jn 11^{52} *ἵνα καὶ τὰ τέκνα τοῦ θεοῦ τὰ διεσκορπισμένα συναγάγῃ εἰς ἕν*), and so of a deep dualism of moral state among mankind at large, a predisposition to accept or to reject the Light definitively revealed in Christ, according to the attitude to God implicit in each of two types of conduct (3^{18-21}). But all this, taken along with the absolute form in which the tests of kinship to God are set forth in his Epistles ('every one that doeth righteousness,' 'that loveth,' 1 Jn 2^{29} 4^{7}·, cf. 3 Jn ^{11}), suggests that St. John distinguished between a virtual, though latent, and an explicit or conscious sonship. The latter was the specific blessing brought by the gospel of Christ, the *assurance* or *knowledge* of Divine sonship, after which even the best of men had before sought in vain. In this respect the revelation in Christ was crucial. As Light, in an absolute moral sense, He brought all to a crisis or decision (*κρίσις*), forcing all hearts to reveal their inmost affinities—whether for 'the world' and self, or for God and His righteousness and love. Implicit regeneration, where it already exists, thus passes into explicit regeneration.

The more definite and psychologically mature character of the NT experience of Regeneration, as compared with that of the godly under the OT, is hinted in the words, 'I came that they may have Life, and have it in abundance' (10^{10}, cf. 4^{14}).

---

* As has been well said, 'the disciples are in a true sense *Christ's* in virtue of the life of "the Christ"' (Westcott, *The Epistles of St. John*, xlv).

It connects itself also with the Johannine emphasis on the specifically new presence of the Spirit with the Christian as such. Here two passages in the Gospel are crucial. Commenting on Christ's words, 'He that believeth on me . . . out of his belly shall flow rivers of living water,' St. John adds: 'But this spake he of the Spirit, which they that believed on him were to receive—for (the) Spirit was not yet (given), because Jesus was not yet glorified' (7$^{38f.}$). Then, in the great Farewell Discourse (Jn 14^{16}) he records his Master's promise that He would give the disciples 'another Helper' or Paraclete, to supply what would be lacking of conscious support through the removal of His own bodily presence. This implies something fresh to their experience, and yet Jesus adds: 'Ye (already) have (experimental) knowledge of him, for at your side he abideth and in you he is' (*ὑμεῖς γινώσκετε αὐτὸ, ὅτι παρ' ὑμῖν μένει καὶ ἐν ὑμῖν ἐστίν*). Here the contrast is a religious rather than a metaphysical or theological * one: it is a matter of the disciples' consciousness rather than of the Spirit's real presence. They had implicit experience of His action, in their very experience of oneness of heart with their Master: in a little while this was to blossom out into recognition of His presence and support as the very ground of their assurance of abiding spiritual union with their glorified Lord and a share in His sonship. This is the thought which St. Paul grasped so firmly and expresses in the words, 'the Spirit himself beareth witness with our spirit that we are children of God' (Ro 8^{16}, cf. $^{26f.}$). But it is also what St. John has in mind in saying that 'not yet was the Spirit,' *i.e.* the Spirit-consciousness of full sonship which marked Christians after Pentecost (7^{39}, cf. Ac 19^{2}).

St. John's doctrine of salvation, then, centres in Regeneration. In it man's true or ideal destiny is realized through the initiative of the heavenly Father or the Spirit, responded to by the moral receptivity of obedience in the human heart or will: potential sonship becomes actual in a Life of communion that is at once human and Divine (10^{35}). Every man has the potency of two diametrically opposed personalities in him, by his natural birth. The one has, as it were, the start of the other, realizing itself along the line of sensuous, egoistic tendency—the line of least resistance morally. It is thus 'of the earth' (3^{31}), 'of the world' (15^{19} 17$^{14.\ 16}$, 1 Jn 2^{16} 4^{5}), 'from below' (8^{23}), the sphere of 'the ruler of this world' (14^{30}). Those, then, in whom it reigns are morally 'children of the devil' (1 Jn 3$^{8.\ 10}$, cf. Jn 8^{44}). The other personality or character, on the contrary, owes its origin and vitality to God and that spiritual order of His which gradually dawns upon our ken with the emergence of reason and conscience. Thus it is, when produced in a man by Divine grace (6^{44})—though not without the co-operation of human volition (3$^{20f.}$ 5^{40} 8^{44})—a life 'from heaven' (3^{27}), 'not of the world' (15^{19} 17$^{14.\ 16}$), 'from above' (like the Son himself, 8^{23}), 'of God' (1 Jn 3^{9} 5$^{4.\ 18}$) or 'of the Father' (1 Jn 2^{16}). To save one of these lives is to lose the other (12^{25}): the life of the one means the death of the other (as in the Synoptics).

C. CONNECTED SUMMARY.—Regeneration is the final form in which biblical religion conceives that profound spiritual change whereby sinful man comes into real and abiding communion with God. Accordingly, one must recognize in regeneration the virtual synonym of various other soteriological terms, such as Repentance, Conversion, Justification, or Forgiveness, and even Consecration or Sanctification in that radical sense which constitutes the believer as such 'a saint.' But as 'regeneration' sets forth the change in question in a specially inward or vital way, it hardly emerges as an explicit doctrine in the OT, and does so but gradually even in the NT. We have seen that in Christ's own ordinary preaching, as given in the Synoptics, regeneration is set forth in purely religious and ethical fashion, in terms of the will rather than in a manner more abstract. This popular aspect of the matter meets us again in early Judæo-Christianity, before highly trained minds like St. Paul and the writer to 'Hebrews' had brought the categories of Rabbinic and Hellenistic psychology to bear on the data of Christian experience. Repentance, not regeneration, stands in the forefront of the early preaching in Acts, as also of that under which 'the Hebrews' had believed (He 6$^{1.\ 6}$); and thereby men were qualified for entrance into the Messianic community in baptism, in which they received the 'seal' of the Spirit's manifested gifts. The more inward and secret operation of the Spirit, implied in penitence and trust, had not as yet received due notice. This side of things, indeed, was largely hidden from those whose outlook and conception of Salvation were still primarily eschatological.

Hence St. Paul's unique experience of the gospel as power of God in the soul, and as an essentially present Salvation, marks an epoch in the NT doctrine of Regeneration. His deeply self-revealing consciousness of sin gave him to see, traced within, the process by which new moral energy was received, and to realize the Divine quickening involved in man's experience of repentance and faith. He saw that human nature embraced two principles, opposed in tendency to each other, and competing for the control of man's settled personal will. In actual human nature the lower or sensuous (*ψυχικόν*) and self-centred principle, called 'the flesh' (*σάρξ*), had the upper hand and determined the quality of man's moral life: and the outcome was 'death' towards God and His righteousness. But in Jesus Christ, who was a 'second' or new type of manhood, of heavenly origin (*ὁ δεύτερος ἄνθρωπος ἐξ οὐρανοῦ*), and 'spiritual' in contrast to the 'sensuous' or 'earthy' type of Adamic manhood (1 Co 15$^{45-47}$), a new basis was laid for humanity. To believers this Saviour became 'a quickening spirit' (*πνεῦμα ζωοποιοῦν*), turning the scale decisively against 'the flesh,' and setting free, as if by a resurrection, the enthralled higher nature (*νοῦς* or *πνεῦμα*), before as good as dead, by filling it with Divine energy or life (*πνεῦμα ἅγιον*) akin to His own, in virtue of which He rose victorious over death. A man so vivified by the Spirit of God, and after the likeness of Christ, was in very deed a new moral being (*καινὴ κτίσις*), a son of God, by Divine re-creative action and adoption. The Spirit replaced the flesh as prime determinant of will and conduct; and therewith 'the old man,' the moral state of the individual by nature, gave way to 'the new man,' the state in which the human will is in harmony with the Divine in principle, and normally so in practice likewise. 'Cleaving to the Lord,' the soul 'is one spirit' with Him (1 Co 6^{17}), animated by one and the same life that is in Christ, the Head of the new humanity, a life that is essentially of God and Divine.

This deeper idea of Salvation seems certainly to have left its trace on St. Peter's later thought, to judge by 1 P. Possibly also it affected the form in which St. John himself interpreted the new Life which had been manifested, first among the original disciples, and then in them. Yet there were elements in St. John's doctrine proper to his own experience, both of his Master's teaching and of the Light and Life in himself and others. He shared with St. Paul the idea of moral dualism as rooted in a dualism of elements in human nature. On the one hand man was related to 'the world' of sense and of self (the flesh), on the other he was akin to God, as sensitive to His word and so potentially His 'child' in deed and in truth. St. Paul thought most of the new experience in itself, speaking of the regenerate man as a 'new (moral) creature,' or as a 'son' in respect of definite status and privileges in relation to God through faith in Christ and by virtue of the Spirit (2 Co 5^{17}, Gal 3^{26} 4^{1-7}, Ro $8^{13-17.\ 29}$). Thus it is a question of a new status or condition into which a man is brought by a definite act, Adoption (*υἱοθεσία*), by which the transition is made from the opposite states of serfdom, wretchedness, alienation, death (Gal $3^{3.\ 5.\ 7}$, Ro 7^{24} $8^{6f.\ 14}$): so that the full effect of such adoption waits upon man's emancipation from 'the bondage of corruption' in 'the redemption of our body' (Ro 8^{20-23}). St. John, on the other hand, thought rather of the intrinsic nature of the 'eternal life' quickened in believers, of the wonder and glory of its origin in God—the Divine nature germinating as 'seed' in the human soul, and by a new birth begetting a new personality. Thus it is his writings which present the most classic statement of the doctrine of Regeneration, as 'that work of the Holy Spirit in a man by which a new life of holy love, like the life of God, is initiated.'

---

* The usual reading *ἔσται*, instead of *ἐστίν* (BD* 1. 22. 69. 251. 254 it$^{\text{pler}}$ syr. cur. pesh. go Tat$^{\text{arab.}}$ Lcif), is probably due to failure to see this, and the consequent attempt to harmonize the statement with the future (*δώσει*) above.

Aside from this main line of development stand St. James and the writer 'to Hebrews.'

The former thinks of the origin of the higher life in the soul in terms of the Wisdom literature of the OT and of writers like Philo.* 'The word of truth,' 'the inborn word,' or 'the wisdom from above,' is the medium of God's creative action on the soul, by 'the Spirit which he hath caused to dwell in us' ($1^{18.\ 21}$ 3^{17} 4^{5}). To the latter, men are essentially 'spirits,' placed by 'the Father of spirits' in the body, to be disciplined and purified with a view to conscious sonship, and so to the 'glory' of the spiritual and real world of which the visible is but the poor shadow ($12^{9.\ 23}$ 2^{10} 12^{5-8}). Hence the work of grace is set forth as moral enlightenment and purification of the conscience (6^{4} 10^{32} 9^{14} 10^{2}), believers being 'those who have been illumined.' The vital and dynamic aspects are not, indeed, absent (5^{11}–6^{6}); but the renewal effected in the fundamental change of heart which the NT everywhere recognizes in Repentance (6^{6}), is to him a matter of divinely-given insight into the realities of the moral and spiritual world, and a corresponding obedience. The Christian 'tastes the word of God to be good,' and as he feeds upon the oracles of God he gains an ever more refined perception of shades of moral and spiritual truth (6^{4} 5^{14}). This, the writer's own emphasis (as distinct from his readers' type of thought), is Hellenistic and 'Alexandrine,' being largely paralleled in the so-called Epistle of Barnabas, as well as in 1 Clement and a good deal of 2nd cent. Christian literature.

But differently as the NT writers do, in some respects, conceive the great experience whereby the moral centre of gravity in a man's life changes from self to God, they are unanimous on one cardinal point. And that is the constant relation of the 'word of God,' made vital to the conscience and heart, as the means, and of faith as the condition of the change.

LITERATURE.—The special literature of this subject is rather scanty. Considerable sections on it exist in the larger works on biblical theology (*e.g.* Weiss and Holtzmann in particular), as also in systems of Dogmatic (*e.g.* Rothe, Thomasius, Martensen, Dorner). But attempts at a strictly historical and genetic account of the biblical doctrine, on the basis of an adequate literary criticism, are singularly few: J. Köstlin's art. 'Wiedergeburt,' in *PRE*^{2} xvii. 75 ff., seems the best available, but is no longer sufficient. The *Angus Lecture* on 'Regeneration' (1897), so far as it deals with the biblical material, is quite uncritical and conventional. Much matter bearing on our doctrine is to be found in studies of the doctrine of the several NT writers, often under other, but kindred, headings, *e.g.* Adoption, Conversion, Faith, Justification, Repentance, Sonship. As examples may be cited, J. B. Mayor, *Epistle of James*, appended Comment on 'Regeneration,' pp. 186–189; A. B. Bruce, *St. Paul's Conception of Christianity*, chs. x.–xiii., and esp. ch. xvii., 'The Christian Life' (though it unduly minimizes St. Paul's recognition of growth in the new life); Westcott, *Epistles of St. John*, added Note on 'Children of God,' p. 122 ff.

J. V. BARTLET.

REGISTER.—See GENEALOGY, vol. ii. p. 121.

REHABIAH (רְחַבְיָה and רְחַבְיָהוּ 'Jah is wide').—The eponym of a Levitical family, said to be descended from Eliezer, one of the sons of Moses, 1 Ch 23^{17} 24^{21} (LXX Ῥααβιά) 26^{25} (B Ῥαβίας, A Ῥααβίας).

REHOB (רְחוֹב and רְחֹב).—**1.** (B Ῥαάβ [2 S Ῥοώβ], A Ῥοώβ) A town at the northern end of the valley of the Jordan, most probably the same as BETH-REHOB (which see), of which the exact site is unknown. In P's narrative of the spies Rehob is mentioned (Nu 13^{21}) as the most northerly limit of their explorations, and is further defined as 'at the entering in of Hamath,' *i.e.* at the entrance of the great depression between the mountains of Lebanon and Hermon, which connects Palestine and Cœle-Syria. P's phrase, therefore, 'from the wilderness of Zin unto Rehob,' is merely a variation of the more usual formula 'from Dan to Beersheba.' With this agrees the notice in Jg $18^{27f.}$, where the new settlement of the Danites at Laish (or Leshem, Jos 19^{47}) is described as situated 'in the valley that lieth by Beth-rehob.' In the reign of David the valley of Beth-rehob (2 S 10^{6}) or Rehob (v.^{8}) was the seat of a petty Aramæan kingdom (cf. 1 S 14^{47}, LXX Lag.), like the neighbouring Beth-maacah or Abel of Beth-maacah. Robinson (*BRP*^{2} iii. p. 371) identified the town with the ruins of *Hunîn* in the valley of Huleh; but this site is too far south. More probable is the view of Buhl (*GAP* p. 240), who suggests that it corresponded to the later *Paneas* (Bāniās). It is true that many writers have identified this town with the ancient Dan (Reland, *Palæstina*, p. 918 f.; Thomson, *Land and Book*, ii. 547; and recently G. A. Smith, *HGHL* pp. 473, 480 f.); but, in view of the explicit statement of Eusebius (*OS*^{2} 275. 33, 249. 32, cf. Jerome, *ib.* 136. 11) that Dan was four miles distant from Paneas, we should probably identify Dan with the modern Tel el-Ḳādī (*ḳadi*='judge'=*Dan*).

2. (B Ῥαάβ, A Ῥοώβ) A town belonging to the tribe of Asher, the exact site of which is unknown. It was presumably near to great Zidon (Jos 19^{28}), and was afterwards assigned, together with its suburbs, to the Gershonite Levites (Jos 21^{31}, 1 Ch 6^{75}). It is therefore to be distinguished from—

3. (B Ῥαού, A Ῥαώβ), which is also mentioned as belonging to Asher, and was apparently near the seacoast (Jos 19^{30}). According to Jg 1^{31} Rehob was one of the cities which were still retained by their Canaanite inhabitants. Very possibly it is the city referred to in the Egyptian lists cited by Müller (*Asien u. Europa*, p. 153).

LITERATURE.—Thomson, *Land and Book*, ii. 547; Robinson, *BRP*^{2} iii. p. 371; *SWP* i. p. 139 ff.; Baedeker^{3}, p. 265 f.; G. A. Smith, *HGHL*, *l.c.*; Buhl, *GAP* pp. 65 f., 112 f., 237–240; Stanley, *Sinai and Palestine*, p. 400; Moore, *Judges*, p. 389 f. and p. 51 f.

4. (Ῥαάβ) The father of Hadadezer, king of Zobah (2 S $8^{3.\ 12}$).

---

* Philo represents God and the Logos as sowing in the womb of the soul the seed of virtues, and so making it pregnant and bear: *e.g.* *Leg. alleg.* iii. 51, διαπίπτει γὰρ τότε τῇ ψυχῇ ὁ σπερματικὸς κ. γεννητικος τῶν καλῶν λογος ὀρθός.

5. (א Ῥοόβ, A Ῥοώβ, B om.) One of those who sealed the covenant (Neh 10^{11}).

J. F. STENNING.

REHOBOAM (רְחַבְעָם 'the people is enlarged,' or perhaps ''Am is wide,' cf. *Rehabiah* [see Gray, *HPN* 52, note 1, 59 f.]; Ῥοβοάμ, *Roboam*).—The narrative of this reign is contained in 1 K 11^{43}–12^{24} 14^{21-31}, 2 Ch 9^{31}–12. 'Ample in foolishness (רחב אולת) and lacking understanding, Rehoboam by [his coun]sel let loose [the peo]ple' (Sir 47^{23}, Cowley and Neubauer's translation). Such is the judgment of the son of Sirach, as he pauses in his 'praise of famous men' for the inevitable notice of the collapse of Israel as a world power, and the frustration of the proud hopes of Solomon that had found expression in the name he had bestowed on his heir. The Christian historian, who recognizes that the function of the chosen race was to be the custodian of the oracles of God and source, according to the flesh, of the Saviour of the world, can easily perceive that this *præparatio Evangelii* was, humanly speaking, rendered possible only by that checking of the material development of the nation of Israel which resulted from the disruption of Solomon's empire. But to the Jewish patriot the maiming of his country's life must always have seemed an unmixed evil. The apparent immediate cause—Rehoboam's fatuous insolence—was merely the pretext for the revolution that took place on his accession. As is the case in every other turning-point of history, the true cause of the issue must be sought for beneath the surface, in social and religious forces which had been at work long before.

There was, in the first place, the *political* question. It was the normal condition of things that Ephraim should envy Judah, and Judah vex Ephraim. From the time of the earliest settlement in Canaan the North and the South had stood apart. The Bk. of Judges exhibits the northern tribes welded together by common resistance to the various oppressors. Judah never joins them, even when the attack comes from the south. It may have been that co-operation was difficult owing to the line of Canaanitish fortresses, such as Jebus, Gezer, and Ekron, that extended across the country from east to west. It may have been that the spirit of nationality was weaker in Judah and Simeon as a consequence of their greater laxity with regard to intermarriage with and adoption of native families; if indeed we should not rather regard it as a cause of this laxity. Be that as it may, we find the distinction between Israel and Judah noted in the first army raised by Saul (1 S 11^{8}), and immediately after Saul's death an open breach occurred. David laboured hard to break down this antagonism. His transference of the seat of government from the purely Judahite Hebron to Jerusalem was a compromise with the northern tribes. Yet in his reign Israel twice rebelled. David's policy was continued by his successor; Solomon's division of the land for commissariat purposes (1 K $4^{7ff.}$) was evidently an attempt to obliterate the old tribal boundaries. That this attempt was in some degree successful may be inferred from the fact that the boundary between the dominions of Rehoboam and Jeroboam so ran as to include in the southern kingdom a portion of Benjamin, and the greater part of the southern settlement of Dan. A succession of monarchs of the commanding personality of David or Solomon might have completed the unification of the tribes, but Solomon presumed too much on his personal prestige. The odious levy of forced labour, and that, too, for the adornment of an upstart capital, and the ceaseless exactions for the supply of the royal table (LXX 1 K 12^{24p}), had long rankled in the hearts of the proud Ephraimites. Add to this that the character of Solomon's successor, as one 'not fit to be a ruler nor to be a prince' (LXX 1 K 12^{24t}), must have been well known for many years. Everything, indeed, indicates that all preparations had been made for a revolution the moment Solomon should die. The Ephraimite Jeroboam, supported by a prophet's nomination and the favour of his tribe, was biding his time in Egypt, and treated there not as a runaway official, but as an exiled prince (LXX 2 K 12^{24e}). The temper of the northern tribes was further shown in their determination to appoint Rehoboam independently, if at all, and in their selection of Shechem, the chief sanctuary of Ephraim, as the place of assembly, thus ignoring the recent centralization of civil and religious administration at Jerusalem.

This political movement was supported by a *religious* agitation in which two elements, ecclesiastical and prophetical, may be discerned: on the part of the priests of the high places jealousy of the exclusive claims of the new temple at Jerusalem, and on the part of the prophets a nobler zeal for Jehovah, called forth by the lax eclecticism of Solomon in his later years. As we see from the attitude of Nathan, the prophets had not cordially approved of the building of the temple, and they now probably thought that there was more chance of the national worship being preserved in its purity in the north. Rehoboam's subsequent conduct, indeed, quite justified these alarms. He added to his father's innovations by sanctioning the erection of pillars of Baal and the worst abominations of heathenism (1 K $14^{23.24}$), such as did not find a place in the northern kingdom until the reign of Ahab fifty years later. The Chronicler's account of Jeroboam's expulsion of priests and Levites, and of the rallying of the orthodox Israelites round Rehoboam (2 Ch 11^{13-16}), is quite unsupported by Kings, which (12^{17}) merely states that Rehoboam's subjects included some residents of northern extraction. The special animus of the revolting tribes against the temple at Jerusalem possibly underlay their parting taunt, 'Now see to thine own house, David.' Josephus (*Ant.* VIII. viii. 3) understood it thus, 'We only leave to Rehoboam the temple which his father built.' Ahijah and Shemaiah were right. 'It was a thing brought about of the LORD'; the pure monotheism of which Israel was privileged to be the exponent would have been sapped and destroyed by foreign cults, if the later Solomonic policy had received no check. In after times this was forgotten; and the later prophets, thinking solely of the political consequences of the disruption, refer to it as a supreme calamity (Is 7^{17}, Zec 11^{14}).

The most important event in this reign is the invasion of Palestine by Shishak. This was one of the direct consequences of the division of the nation. Sesonchis, as Manetho calls him, the first monarch of the 22nd dynasty, reversed the policy of his predecessor Psusennes, and displayed unfriendliness towards Solomon by sheltering his adversaries Hadad and Jeroboam. Notwithstanding the fact that Shemaiah had forbidden the employment of the huge army (reduced in LXX, B, to 120,000 men) which Rehoboam had mustered by the following year (LXX 1 K 12^{24x}) in order to recover the kingdom he had lost, yet 'there was war between Rehoboam and Jeroboam continually' (1 K 14^{30}). In all probability Jeroboam, harassed by these border forays, called in the aid of his former protector. The fifteen towns which Rehoboam is said to have fortified (2 Ch 11^{6-10}) are, with two exceptions, south of Jerusalem, as though an attack might be expected from that quarter. The invasion took place in Rehoboam's fifth year, and the prophetical historian justly sees in this humiliating calamity the scourge of God for the continued and aggravated national apostasy. The statement of the Chronicler (2 Ch 11^{17}) that Rehoboam's defection did not occur until his fourth year, and the story of his subsequent repentance (12^{6}), are obviously designed to bear out the theory of the original orthodoxy of the kingdom of Judah (see Abijah's speech, 2 Ch 13^{10}), as well as to heighten the moral and dramatic effect of the story. Jerusalem does not seem to have stood a siege. Resistance was hopeless. Shishak (herein acting treacherously, according to Josephus) utterly denuded the temple and royal palace of their treasures, including the famous golden shields of Solomon's guard, to which the LXX (2 S 8^{7}, 1 K 14^{26}) adds the golden shields taken by David from Hadadezer. Dean Stanley well points out that there is a grave irony in the historian's account (1 K 4^{28}) of how the elaborate ceremony which had been observed with regard to the golden shields was continued in the case of their brazen substitutes. We learn from the Chronicler (2 Ch 12^{3}) both the number of Shishak's host, to which Josephus adds 400,000 infantry, and also the nationalities of which it was composed—Libyans, Sukkiim (=troglodytes, LXX and Vulg.), and Ethiopians. Ewald (*HI* iv. 45) conjectures that Edom also joined in the invasion (see Jl 3^{19}). There may still be seen on the south wall of the temple of Amon at Karnak an inscription—now partially defaced—which deals with this expedition. It gives the list of towns subjugated by Shishak. Some difficulty has been caused by the inclusion in this list not only of places in the south, such as Shocoh, Gaza, Keilah, and perhaps Jerusalem, but also of many towns of Israel as far north as Megiddo. This does not contradict the biblical narrative, which confines itself to the invasion of Judah; but it seems scarcely reconcilable with the hypothesis that Shishak invaded Palestine as Jeroboam's ally. However, Maspero (*Journal of the Transactions of the Victoria Institute of Great Britain*, vol. xxvii. p. 63) points out that 'the king of Israel in imploring the aid of Shishak against his rival had thereby made himself vassal to Egypt. This would suffice to make his towns figure at Karnak among the cities subjected in the course of the campaign.' This is a more likely solution of the difficulty than Rawlinson's supposition (*Speaker's Com. in loc.*), that these were Canaanite or Levitical towns which had taken Rehoboam's side. The names on this list are engraved on cartouches, over which appear the heads of men of various types, representing the inhabitants of each town. Considerable interest was formerly excited by one of these names, which Maspero transliterates *Jaoud-ha-maluk* or *Judham-melek*. This was rendered by Rosellini 'king of Judah' (!), and the inference was a tempting one, that in the annexed figure we had a veritable portrait of Rehoboam himself. But Brugsch (*Geogr. Ins.* I. ii. p. 62), followed by Maspero, interprets it as the name of a village in Dan, Jehud, now el-Yehûdîyeh, near Jaffa. 'The name bears the sign for "country," not for "person."' See, further, *Struggle of the Nations*, 774.

Some minor matters remain to be discussed. From Kings we learn the name of Rehoboam's chief wife only, MAACAH. But the Chronicler gives details about his domestic affairs, noting the name of a second wife, MAHALATH, and perhaps of a third, ABIHAIL, who is mother of Mahalath according to the RV, but another wife of Rehoboam according to AV and RVm. Josephus reduces the number of his concubines to thirty.

The rise in Judah of the power of the queen-mother is probably to be attributed to Rehoboam's uxoriousness. His conduct towards his sons, which is praised by the Chronicler, may have rendered the accession of Abijah easier, but was not wise in the best sense of the term.

According to the MT of 1 K 14^{21} and 2 Ch 12^{13} Rehoboam was 41 years of age at his accession, and reigned 17 years. He would then have been born before Solomon came to the throne. Rawlinson would read, with some MSS, 21 in this passage, on the ground, perhaps, that the insolence of Rehoboam to the Israelites is more like the conduct of a petulant youth than of a man of mature age. More weight must be given to the second Greek account, which in 1 K 12^{24a} says that Rehoboam was 16 years of age at his accession, and that he reigned 12 years. The statement of Abijah (2 Ch 13^{7}) that Rehoboam was 'young and tender-hearted' (רַךְ־לֵבָב, *i.e.* 'fainthearted,' see Dt 20^{8}) at the time of the rebellion must not be pressed.

There is one other important chronological difference between the second Greek account and our present Hebrew text. In the latter, Jeroboam, even if he took no personal share in the negotiations with Rehoboam (1 K 12^{20}), certainly left Egypt immediately after Solomon's death; whereas in LXX 1 K $12^{24d\text{-}f}$ the marriage of Jeroboam to Shishak's sister-in-law, and the birth of his son Abijah, occur in Egypt after Rehoboam's accession. But this whole story is in a very confused condition, and is antecedently less probable than that preserved in the common text. See JEROBOAM; and cf. Swete, *Int. to OT in Gr.* 248 f.

N. J. D. WHITE.

REHOBOTH.—1. The name given by Isaac to a well of which he was allowed by Abimelech's herdmen to take peaceable possession. This was after two previous wells dug by Isaac's servants had led to strife, and the name of the third was called *Rĕḥōbōth* (רְחֹבוֹת 'wide spaces,' LXX Εὐρυχωρία) because, said Isaac, 'now the LORD hath made room (*hirḥîbh*) for us,' Gn 26^{22} (J). Palmer (*Desert of the Exodus*, 383) describes a very ancient well on the north-east side of the *Wādy es-Sa'di* (eight hours south of Beersheba), which he is inclined to identify with the Rehoboth of this passage. The name *Ruhaibeh* still lingers in the neighbourhood, being applied to a wādy close by. The objections of Robinson (*BRP*^{2} i. 197) to this identification are strangely pointless. It is not improbable (cf. König and Sayce in *Expos. Times*, xi. [1900] pp. 239, 377) that the Rehoboth of Gn 26^{22} is also the *Rubûti* or *Rubûte* of the Tel el-Amarna letters (Winckler, Nos. 183 and 239; Petrie, 256 and 260), although Sayce (in *Early Israel*, 289) and Petrie (*Syria and Egypt from the Tell el-Amarna Letters*, 180) prefer to make *Rubûti*=Rabbah of Jos 15^{60}, and Hommel (*AHT* 234 f.) identifies it with Kiriath-arba (Hebron), which he supposes to have been called *Roba'ôt*, 'the four quarters.'

2. In the list of kings of Edom contained in Gn $36^{31ff.}$ one of the names is Shaul 'from Rehoboth of the River' (מֵרְחֹבוֹת הַנָּהָר v.^{37}; LXX [A; B is defective here] ἐκ Ῥοωβὼθ τῆς παρὰ ποταμόν, and so A in the parallel passage 1 Ch 1^{48}, B om.). The situation of this Rehoboth is quite uncertain. It is not even clear whether it should be sought in Edom or elsewhere. The *Notitia Dignitatum* (c. 29) makes it Edomite, and Eusebius and Jerome (in the *Onomasticon*) locate it in Gebalene, *i.e.* Idumæa; but the analogy of other OT passages where 'the River' (הַנָּהָר) is spoken of absolutely, would lead us to think of the Euphrates, in which event Rehoboth might be *Rahaba* on the western bank of that stream, somewhat to the south of the Chaboras. Winckler (*Gesch.* i. 192) would (doubtfully) place it between Palestine and Egypt, understanding the נָהָר here to be the *Wādy el-'Arîsh*, the 'River (נַחַל wādy) of Egypt' of Nu 34^{5} etc.

The name *Rĕḥōbōth*, owing to its meaning, would be likely to be very widely diffused (see Knobel on Gn 36^{37}, and cf. W. Max Müller, *Asien u. Europa*, 134).

J. A. SELBIE.

REHOBOTH-IR (רְחֹבֹת עִיר, AV 'the city Rehoboth,' AVm 'the streets of the city'; LXX A ἡ Ῥοωβὼς πόλις, *D*^{a} Ῥοωβὸθ π., E Ῥοωβὼθ π.; Vulg. *plateæ civitatis*).—One of the four cities built by Asshur (RV by Nimrod) in Assyria, the others being Nineveh (regarded as the later capital), Resen (Rêš-êni, Sayce), and Calah, now Nimroud (Gn 10^{11}). There has been much discussion as to the identity of this site, and Assyrian literature has not furnished us with any geographical city-name with which it could be identified. Indeed it is hardly likely that we should come across it there, except under a different form, for neither of the component parts of the name is really Assyrian, *Rĕhōbōth*, as Delitzsch has shown, being *rêbitu*, 'broad, open spaces,' whilst *'ir* would be represented by the common word *âlu*, 'city.' It has been objected that the Heb. scribe would not have translated *rêbitu*, but would have transcribed it, just as he has transcribed *Resen*, without the guttural; for the Assyrians as a rule pronounced neither the soft guttural ח, nor the ע. This, however, cannot be regarded as conclusive, for the Heb. scribe has, to all appearance, translated, and not transcribed, the Assyrian *âlu* in the word *'ir*, 'city.' It would therefore seem that we must not transcribe, but translate, the Heb. *Rĕhōbōth-'ir*, and this, in Assyrian, would be *rêbet âli*, 'the broad spaces (squares) of the city,' and regard the expression, with Delitzsch, as referring to the name of Nineveh, which immediately precedes. Delitzsch compares the Heb. expression with the *rêbit Ninua*, 'broad place of Nineveh,' in Esarhaddon l. 23, and the probability is that he is right in his identification. Through this part of the city, probably a suburb, Esarhaddon caused the heads of the kings of Kundi and Sidon to be carried in procession with singing, etc.; and, as he thus specially mentions it, it must have been a sufficiently important place. It is apparently this same place of which Sargon, Esarhaddon's grandfather, speaks in his Cylinder Inscription, l. 44, in connexion with the peopling of Magganubba: 'The city Magganubba, which lay like a pillar at the foot of the mountain Musri, above the springs and the broad place of Nineveh' (*rêbit Ninâ*). This text would therefore seem to make Magganubba the old name of Dûrsargina or Khorsabad, and the *rêbit Ninâ* must have lain between that city and Nineveh, but much nearer to the latter. If the places referred to are named in the order in which they actually occurred, their relative positions would be (1) the mountain Musri, (2) the city Magganubba, (3) the springs, (4) the *rêbit Ninâ*, (5) Ninâ or Nineveh itself.

LITERATURE.—Delitzsch, *Paradies*, p. 261; Schrader, *COT* i. p. 101; Riehm, *Handwörterbuch*; and the *Calwer Bibellexikon*, *s.v.* T. G. PINCHES.

REHUM (רְחוּם).—1. One of the twelve heads of the Jewish community who are said to have returned with Zerubbabel, Ezr 2^{2} (B om., A Ἰρεούμ). In the parallel passage Neh 7^{7} the name appears, perhaps by a copyist's error, as NEHUM (LXX Ναούμ); in 1 Es 5^{8} it is ROIMUS (LXX Ῥόειμος). 2. 'The chancellor,' who, along with Shimshai the scribe and others, wrote a letter to king Artaxerxes, which had the effect of stopping for the time the rebuilding of Jerusalem, Ezr 4$^{8.\,9.\,17.\,23}$. In 1 Es 2^{16} he is called RATHUMUS. The title for CHANCELLOR (בְּעֵל־טְעֵם, lit. 'lord of judgment'), being misunderstood by the LXX, appears in the latter passage as a proper name (Ῥάθυμος καὶ Βεέλτεθμος); see BEELTETHMUS. In Ezr 4^{8} B has Ῥαοὺλ βαδαταμέν, in v.^{9} Ῥαοὺμ βάαλ, and in v.^{17} Ῥαοὺμ βαλγάμ, while A has uniformly Ῥεούμ· βααλτάμ. 3. A Levite who helped to repair the wall, Neh 3^{17} (B Βασούθ, ℵA Ῥαούμ). 4. One of those who sealed the covenant, Neh 10$^{25\,(26)}$ (Ῥαούμ). 5. (רְחֻם) The eponym of a priestly family which returned with Zerubbabel, Neh 12^{3} (BA om., ℵ$^{c.a\,(mg)}$ Ῥεούμ). The name רחם in this last instance is not improbably a textual error for חרם HARIM, cf. v.^{15}. J. A. SELBIE.

REI (Heb. רֵעִי, probably = 'the LORD is a friend'; Pesh. ܕܚܡܘ [*sic*, ܕ and ܪ being confounded]; LXX B Ῥησί, A Ῥησεί; Vulg. *Rei*, *Rhei*).—According to the MT of 1 K 1^{8} this is the name of one of the influential supporters of Solomon at the critical moment when Adonijah was preparing to dispute the succession to the throne. It is impossible to be quite certain that the reading is correct, but the balance of evidence is in its favour. Lucian's Σαμαίας καὶ οἱ ἑταῖροι αὐτοῦ οἱ ὄντες δυνατοί rests on a different division of the Hebrew letters, not a different text—רֵעָיו הַגּ׳ instead of רֵעִי וְהַגּ׳. Jos. *Ant.* VII. xiv. 4, has ὁ Δαουίδου φίλος, thus making Shimei into the 'friend,' the royal official of 2 S 15^{37} 16^{16}, and, with Lucian, getting rid of Rei altogether. But if Josephus is supposed to be following a Heb. original pretty closely, that original would here be רֵעַ הַמֶּלֶךְ or רֵעֵה הַמֶּלֶךְ, and it is not easy to believe that the much longer form of the MT, רֵעִי וְהַגִּבּוֹרִים אֲשֶׁר לְדָוִד, has grown out of this. Klostermann's conjectural emendation, שְׁלֹמֹה וְרֵעָיו (*Die Bücher Sam. u. Kön.* p. 263), scarcely commends itself (see Benzinger, *ad loc.*), nor is there sufficient support for Winckler's (*Gesch.* ii. 247) identification of Rei with 'Ira, or, as he would spell it, Ya'ir of 2 S 20^{26}.

As to the pair of names, Shimei and Rei, Ewald (*Gesch.* iii. p. 266, note) thought that they might belong to the two brothers of David, Shammah and Raddai, who are mentioned 1 S 16^{9} 17^{13}, 1 Ch 2^{14}. But the double alteration of שַׁמָּה into שִׁמְעִי and רַדַּי into רֵעִי is somewhat unlikely. Perhaps one may add that the LXX Ῥησί seems to have originated in a mistaken reading of צ for ע.

Assuming that Rei must stand in the text, it is fairly certain that the man thus designated was an officer of the royal guard. The important part played by these troops in determining the succession to the throne, as well as the mention of the *gibbôrîm* immediately after Shimei and Rei, points in this direction. J. TAYLOR.

REINS.—This name for the kidneys is now obsolete, though RV retains it in all its 18[*] occurrences in AV. It comes from Lat. *renes* the kidneys, through Old Fr. *reins*, while 'kidneys' is of Scand. origin. The word was always used with some freedom. Thus Cov. translates Ezk 29^{7} 'Yff they leaned upon the, thou brakest, and hurtdest the reynes of their backes'; and in AV it is once used for the loins (Is 11^{5}). This indefiniteness and not any sense of its becoming antiquated must have led the AV translators to use the word only figuratively, to express those feelings or emotions which were understood by the Hebrews to have their seat in the kidneys. Only in the marg. of Lv 22^{4} is the literal use found. The lit. sense is common enough in writers of the day and later. Thus Bacon, *Essays*, p. 205, 'Bowling is good for the Stone and Reines'; and Milton, *PL* vi. 346—

> 'For Spirits, that live throughout
> Vital in every part—not, as frail Man,
> In entrails, heart or head, liver or reins—
> Cannot but by annihilating die.'

'When,' says Driver (*Par. Psalter*, 454), 'it is said of God that he trieth (or seeth) the "hearts and reins" (Ps 7^{9}, Jer 11^{20} 17^{10} 20^{12}), it is implied that He is cognizant of man's emotions and affections, not less than of his thoughts.' See KIDNEYS. J. HASTINGS.

REKEM (רֶקֶם).—1. One of the five kinglets of Midian who were slain by the Israelites, under Moses, Nu 31^{8} (BA Ῥόκομ), Jos 13^{21} (B Ῥόβοκ, A Ῥόκομ). Like his companions, he is called in Numbers מֶלֶךְ ('king'), but in Joshua נָשִׂיא ('prince,' 'chieftain'). 2. Eponym of a Calebite family, 1 Ch 2^{43} (B Ῥέκομ, A Ῥόκομ) ^{44} (LXX follows a different reading, B having Ἰεκλάν and A Ἰερκαάν, a repetition of the name in the preceding clause, which appears in Heb. as *Yorḳĕ'ām*: see JORKEAM). 3. The eponym of a clan of Machir, 1 Ch 7^{16} (AV and RV Rakem, but this is simply the pausal form, רָקֶם, of the Heb.

---

[*] To the 15 in the Concordances add 2 Es 5^{34}, Wis 1^{6}, 1 Mac 2^{24}, which we have found in the Apocrypha. A new Concord. to the Apocr. is much needed. Cruden gives only one of those three. The S.P.C.K. Concord. is a reprint of Cruden.

name; LXX om.). 4. A city of Benjamin, mentioned with Irpeel and Taralah, Jos 18^{27} (B Νακάν, or perhaps om., A Ῥέκεμ). The site has not been identified.

RELIGION.—For the religion of Israel, see GOD, ISRAEL. It is referred to in AV under the name of 'the Jews' religion' (ὁ Ἰουδαϊσμός) in 2 Mac 8^{1} 14^{38} (nearer the beginning of this verse the same word is tr^{d} 'Judaism'), as well as in Gal 1$^{13.\ 14}$, but the thought is rather of the outward forms than the inner spirit. We read also in 2 Mac 6^{24} of going to a 'strange religion' (εἰς ἀλλοφυλισμόν). Elsewhere in AV the word is used generally of the outward manifestation of religious life, the Gr. words being ἁγνεία (1 Mac 14^{36} marg.), λατρεία (1 Mac 1^{43} 2$^{19.\ 22}$), and θρησκεία (Ja 1$^{26.\ 27}$). This sense of the *outward expression* attached strongly to the word throughout the time of the English translations of the Bible from Wyclif to AV (though Tind. has 'devocion' in Ja 1$^{26.\ 27}$). See Trench's remarks in *Study of Words*, p. 9 f., *English Past and Present*, p. 249 f., and *Select Glossary*, p. 183 f.; and cf. Elyot, *Governour*, ii. 191, 'He therfore nat onely increased within the citie Temples, alters, ceremonyes, preestes, and sondry religions, but also . . . he brought all the people of Rome to suche a devocion, or (as I mought saye) a superslicion, that . . . they by the space of xlii yeres (so longe reigned Numa), gave them selfe all as it were to an observaunce of religyon'; and Latimer, *Sermons*, 392, 'For religion, pure religion, I say, standeth not in wearing of a monk's cowl, but in righteousness, justice, and well doing.' J. HASTINGS.

REMALIAH (רְמַלְיָהוּ; Ῥομελίας).—The father of king PEKAH, 2 K 15$^{25\text{ff.}}$ 16$^{1.\ 5}$, 2 Ch 28^{6}, Is 7$^{1\text{ff.}}$ 8^{6}. He appears to have been of humble origin, hence the disparaging allusion to Pekah as 'the son of Remaliah' in Is 7^{4} (cf. 1 S 10^{11} 'the son of Kish'; 20$^{27.\ 30}$ 22^{13} 25^{10} 2 S 20^{1} 'the son of Jesse'; 1 S 22^{12} 'thou son of Ahitub').

REMETH (רֶמֶת; B Ῥέμμας, A Ῥαμάθ).—A town of Issachar, near En-gannim, Jos 19^{21}; called in 1 Ch 6$^{58\,(73)}$ RAMOTH, and in Jos 21^{29} (possibly by a wrong vocalization) JARMUTH. It appears to be the present village *Râmeh*, on a hill to the south of the plain of Dothan. See *SWP* vol. ii. sheet viii. C. R. CONDER.

REMISSION.—See FORGIVENESS.

REMPHAN.—See REPHAN.

RENDING OF GARMENTS.—See MOURNING.

REPENT, REPENTANCE (נִחַם, שׁוּב, μετανοεῖν, ἐπιστρέφειν, μεταμέλεσθαι; נֹחַם, μετάνοια, ἐπιστροφή).—The usual meaning of נִחַם (? from an onomatopoetic root signifying to *pant* or *groan*) is to change one's mind or purpose out of pity for those whom one's actions have affected, or because the results of an action have not fulfilled expectation. In this sense repentance is attributed not only to man, but to God (Gn 6^{6}, Ex 32^{14}). With reference to sin, נִחַם is found only in Jer 8^{6} and Job 42^{6}. The idea of repentance from sin is in other cases expressed by the verb שׁוּב 'to turn.' Though the change in the direction of the will is here in the foreground, a change in inner disposition is always presupposed. The turning from sin is emphatically a matter of conduct, but it is also a matter of the heart (Jl 2^{12}), and it has as its elements enlightenment (Jer 31^{19}), contrition (Ps 51$^{3\text{ff.}}$), longing for God's forgiveness, and trust in God (Hos 14^{2}). In their direct appeals to the people, the prophets naturally think of repentance in a purely ethical way as a function of the will: Ezekiel even calls upon them to make themselves a new heart and a new spirit (Ezk 18^{31}). But reflexion on the facts of experience quickly leads to the discovery that the will is not the only, or even the main, factor in the case. Behind the will lie the spiritual forces that move it to action, and behind these again, God. Moreover, the new life, which is the positive side of repentance, cannot be called into being by the mere fiat of the will. The spiritual facts and forces, in and through which God is working, thus advance into the foreground, and the prophets are led from the causality of the will to the causality of God, from the ethical to the religious standpoint. God Himself creates the new heart (Ps 51^{10}, Ezk 36$^{25\text{ff.}}$); His law converts the soul (Ps 19^{7}); His people turn when He turns them (Jer 31^{18}). In despair of a generation bound by the tradition and habit of evil, Jeremiah looks into the future for some new manifestation of Divine power, which shall effect a radical change in the inner disposition of the people (Jer 31^{33}).

Beyond a genuine repentance the prophets know of no other condition attaching to God's forgiveness and favour (Dt 30$^{1\text{ff.}}$, Jer 17^{8}, Ps 32^{5}). And the idea of repentance is set up in its moral purity, everything merely external and statutory being stripped away. In primitive Hebrew religion the offender brought a gift to God to appease Him; he fasted, rent his garments, and by an attitude of mourning and humiliation sought to make his prayer for pardon impressive and effectual. But of all this the prophets and psalmists will hear nothing. God does not desire such things (Hos 5^{6} 6^{6}, Is 1$^{11\text{ff.}}$, Jer 6^{20} 7$^{4\text{ff.}}$ 14^{12}, Ps 50^{10}). The sacrificial forms with which atonement was associated are ignored as worthless or condemned as noxious (Am 5^{25}, Mic 6$^{6\text{ff.}}$, Jer 7$^{21\text{ff.}}$, Ps 40^{6} 51^{16}). The sacrifice pleasing to God is that of a broken and contrite heart (Ps 51$^{17\text{f.}}$). No attempt is made by the prophets to take the sacrificial system into the service of a purer faith, whether by a process of moral reinterpretation, or by going back on an original but forgotten meaning. In process of time the system was to some extent ethicised; but its atonement (which presupposed repentance in the transgressor) was available only for sins of inadvertence (Nu 15$^{27.\ 30}$). The place of repentance as condition of forgiveness is not due to any idea of its meritorious character. The idea of merit—which never attaches itself to a genuine moral act, but always to some external form or accompaniment—is foreign to the spirit of the OT. If God forgives, it is because it is His nature and prerogative to do so (Is 43^{25}); and that He will not reject the prayer of the penitent is accepted as self-evident to the moral sense.

In the later Judaism the idea of repentance is not indeed lost sight of, but, in Pharasaic circles at least, external acts of penitence, such as fasting, have usurped the place of the inner spirit, and to these acts the idea of merit has attached itself. In the preaching of the Baptist it again emerges in its pristine moral purity, as the one condition of escape from approaching judgment (Mt 3$^{8\text{f.}}$).

There are two words in the NT which convey the idea of repentance, μετανοεῖν and ἐπιστρέφειν, though, as we shall see, the idea appears also under other forms of expression. These words derive their moral content not from Greek but from Jewish and Christian thought, nothing analogous to the biblical conception of repentance and conversion being known to the Greeks. If respect be had to their literal meaning, the first presents repentance in its negative aspect, as a change of mind, a turning from sin; the second, in its positive aspect, as a turning to God. Both have, however, much the same content of meaning. Christ began His ministry with a call to repentance (Mt 4^{17}). The call has as its motive the nearness of the kingdom, participation in which requires as its condition the new disposition (Mt 18^{3}). It is addressed, not as in the OT to the nation, but to the individual; and not merely to those guilty of flagrant sin, but to all (Lk 13^{3}). The inner and radical character of the change required is illustrated by the figure of the tree and its fruits. The first four Beatitudes may be taken as descriptive of elements in a true repentance. Poverty of spirit, sorrow for sin, meekness, hunger and thirst for righteousness, are all characteristics of the soul that is turning from sin to God. In the parable of the Prodigal Son, Jesus draws a picture of the true penitent. Such is assured of the forgiveness and welcome of the Father, whose love, indeed, has anticipated his return, and gone out to seek and save (Lk 15^{4}). That God accepts the penitent follows at once from His own nature, and from the moral appropriateness of a humble and contrite spirit. The Father cannot but rejoice over the recovery of a lost son (Lk 15^{24}); and the spirit of the publican in the temple as plainly carries with it justification as the spirit of the Pharisee condemnation (Lk 18^{14}). Of fasting or other external accompaniments Christ knows nothing.

Although Christ began His ministry with the call to repentance, it cannot be said that it appears in His teaching as the fundamental requirement. Exhibiting the righteousness of the kingdom of God, and revealing the love of the heavenly Father, He requires rather *faith* in His message, leaving the particular form of the response to be determined in correspondence with each man's character and history. Repentance accordingly falls into the background before the wider idea of faith (Lk 7^{50}). In the apostolic speeches in Acts, and in the Apocalypse, repentance most frequently appears in its ethical sense; but side by side with this use we have that which treats it as a result of Divine activity—an experience rather than an act (Ac 3^{19}). In the latter case the idea of repentance passes into that of conversion (*ἐπιστρέφεσθαι*, the *conversio intransitiva* of theologians as distinguished from *conversio transitiva*), the ethical activity of the individual being subordinated to the Divine causality. The problem of the relation of the two sides, which exercised the Church later, giving rise to such conceptions as *virtus indeclinabiliter et insuperabiliter*, *gratia cooperans*, etc., is not raised in the New Testament.

In the Pauline Epistles repentance is considered more as an experience than as an act, and this experience is described in a manner peculiar to the apostle as a death and resurrection with Christ, or as a putting off of the old man and a putting on of the new. The believer is buried with Christ in baptism, and raised with Him into a new life in the Spirit (Ro 6$^{2ff.}$, Col 2^{12}). The result of this new creation is a new walk and conversation; sin is in its principle destroyed. In this profound conception, which also gives its content to the apostle's idea of faith, the place of Christ in the experience of conversion, together with a certain mystical element in that experience, comes to expression.

The word 'repent' does not once occur in the Johannine writings, having dropped even from the Baptist's preaching. The idea is not, however, absent, but appears under the form of the new birth, which takes the place of the Synoptic *μετάνοια* as the condition of entrance into the kingdom (Jn 3^{3}). The causality of the will here wholly disappears, together with those psychological elements characteristic of repentance as a process of turning, and the new life stands out as the result of a transcendent and mysterious act of God's creative power (Jn 3^{8}). The natural and the supernatural, the fleshly and the spiritual, are opposed in a way that excludes all mere renewal, or any *transition* from the old life to the new. The human and ethical side, however, finds expression in the idea of faith, which here, as in the NT in general, implies an active turning from sin to God (Jn 4$^{7ff.}$ 9^{38}, 1 Jn 1^{8}).

W. MORGAN.

REPHAEL (רְפָאֵל 'El has healed'; LXX Ῥαφαήλ, cf. RAPHAEL of To 3^{17} 5$^{4ff.}$).—The eponym of a family of gatekeepers, 1 Ch 26^{7}. The name belongs to a class of late formations; see Gray, *HPN* 225, 311.

REPHAH (רֶפַח; Ῥάφη).—The eponym of an Ephraimite family, 1 Ch 7^{25}.

REPHAIAH (רְפָיָה 'Jah has healed,' cf. *Rephael*).—**1.** A Judahite mentioned in the royal genealogy, 1 Ch 3^{21} (B Ῥαφάλ, A Ῥαφαιά). **2.** One of the chiefs of the 500 Simeonites who went on the expedition to Mt. Seir, 1 Ch 4^{42} (Ῥαφαιά). **3.** A descendant of Issachar, 1 Ch 7^{2} (B Ῥαφαρά, A Ῥαφαιά). **4.** A descendant of Saul, 1 Ch 9^{43} (Ῥαφαιά), called in 8^{37} RAPHAH (B Ῥαφαί, A Ῥαφαιά). **5.** One of those who helped to repair the wall, Neh 3^{9} (Ῥαφαιά).

REPHAIM (רְפָאִים; *γίγαντες*, Ραφαείμ, Ῥαφαείν [Dt 2$^{11.20}$, Jos 15^{8}, 2 K 23^{23}]).—The word used in Hebrew to describe the early giant peoples of Palestine. Many regard *rāphā'* as a proper name, forming the gentilic adjective *rĕphā'î*, of which *rĕphā'îm* is the plural. It is more in accord with the use of the word, however, to regard *rāphā'* as a concrete noun, and *rĕphā'îm* as the direct plural either of this or of the corresponding abstract noun. It is used as the geographical name of a certain valley (see next art.). In Gn 14^{5} the syntax indicates that it is a proper name, definite without the article. The statement is strictly that 'they smote Rephaim,' that is, they smote a region of that name, the region, of course, being so named from the character of its inhabitants. Everywhere else the word is strictly a common noun, definite or indefinite as the case may be, substantially equivalent to our English word 'giants.' For the derivation of this meaning from the stem idea, and for an account of the *rĕphā'îm*, see GIANT.

The word *rĕphā'îm* is also used to denote the inhabitants of the world of the dead (Job 26^{5}, Ps 88^{10}, Pr 2^{18} 9^{18} 21^{16}, Is 14^{9} 26$^{14.19}$), being here nearly the equivalent of the English word 'ghosts,' in the popular sense of that word. *Rĕphā'îm* in the sense of ghosts is used only in the plural, and, like *rĕphā'îm* in the sense of giants, has the ordinary syntax of a common noun, definite or indefinite. The two are from the same stem. Schwally (*Leben nach dem Tode*, 64 f.) supposes a connexion between רְפָאִים 'ghosts' and רְפָאִים 'extinct giants.' W. R. Smith (quoted by Driver, *Deut.* p. 40) suggests that the 'old giants were still thought to haunt the ruins and deserts of East Canaan'; see also Schwally in *ZATW*, 1898, p. 132 ff.

W. J. BEECHER.

REPHAIM, VALE OF (עֵמֶק רְפָאִים; Κοιλὰς Ῥαφαείμ, *κ. τῶν Τιτάνων*, *κ. τῶν γιγάντων*, Ἔμεκ Ῥαφαείν, *φάραγξ στερεά*).—A locality near Jerusalem. The Hebrew word here used for valley denotes an arable valley. So we may at once dismiss all theories that would make it either a plateau or a steep-sided ravine; though it is quite possible that it may have been a system of arable valleys, rather than a single valley. Different opinions have been held concerning it, but really the evidence all bears in one direction. The northern extremity of the vale of Rephaim was just over the western ridge of the upper part of the ravine of the son of Hinnom (Jos 15$^{8.9}$ 18^{16}). Josephus (*Ant.* VII. xii. 4) says that it was 'the valley which extends to the city of Bethlehem, which is twenty furlongs from Jerusalem.' It is puzzling to know how he measures his twenty furlongs; but that Bethlehem had strategic relations with the vale of Rephaim is confirmed by 2 S 23^{13}, 1 Ch 11^{15}. This is not in contradiction with the statement that David, getting to the rear of the Philistines when they were encamped in the vale of Rephaim, 'smote them from Geba until thou come to Gezer' (2 S 5^{25}, 1 Ch 14^{16}); for the effect of his strategic movement might be to compel them to move from their camp and attack him; or, while encamped to the south-west of Jerusalem, they might have had outposts as far north as Geba or Gibeon.

But the sacred writer evidently thought of the vale of Rephaim as somewhat extensive, for he twice says that the Philistines spread themselves there (2 S 5$^{18.22}$, 1 Ch 14$^{9.13}$). Hence the locality referred to is probably the system of small valleys which supply the southern affluent of the Nahr Rûbîn, a stream which flows into the Mediterranean some distance south of Joppa. One branch of this affluent starts near Jerusalem and another near Bethlehem, the two uniting about three miles south-west of Jerusalem. The vale of Rephaim may well be these two, with their tributaries. It was natural that invading Philistine armies should march up the valley of the Nahr Rûbîn to attack Jerusalem.

The name doubtless indicates that this region had been occupied especially by *rĕphā'îm*, at some period before Joshua's conquests. Its celebrity is mainly connected with events that occurred soon after David had been made king of all Israel in Jerusalem. In two successive campaigns the Philistines attacked him here, and were defeated (2 S 5$^{17-21}$, 1 Ch 14$^{8-12}$ and 2 S 5$^{22-25}$, 1 Ch 14$^{13-16}$). The first of these two campaigns was of the most desperate character (2 S 23$^{13-17}$, 1 Ch 11$^{15-19}$). See G. A. Smith, *HGHL* p. 218. W. J. BEECHER.

REPHAN (LXX BA Ῥαιφάν, Q Ῥεφάν, in Am 5^{26}; WH Ῥομφά, variants Ῥεμφάμ, Ῥεμφάν [AV *Remphan*], Ῥαιφάν, Ῥεφάν, in Ac 7^{48}).—This word replaces the כִּיּוּן of the Heb. text, and there is much difference of opinion as to the reason of this change. Influenced by the fact that the LXX tr. was made at Alexandria in Egypt, some have contended that the translators substituted for the word *Chiun* (apparently pronounced by them, more correctly, *Kewan*), the meaning of which was probably obscure to them, an Egyptian equivalent term, viz. *repa*-[*n-neteru*], a title of the god Set, identified with Saturn; but this, besides being a hardly probable hypothesis itself, is also unlikely on account of the etymological difficulties involved. The general opinion at present is, that *Rephan* is simply a mistake for, or an alteration of, the *Kewan* (*Chiun*) of the Heb. text, *K* having been replaced by *R*, and *ph* (φ) substituted for ו, with the sound of *v*, sharpened to something resembling *f*. There is no doubt that this is the best of all the explanations proposed, for *Kewan* would seem to be nothing else but the Semitic-Babylonian *Kaawanu*, for an older *Kayawanu*, 'the planet Saturn.' That a Babylonian etymology is to be sought rather than any other, may be regarded as indicated by the fact that SICCUTH in the first part of the verse is apparently from the Akkad. *Sakkut* or *Sak-uš*, the latter being one of the non-Semitic names of Saturn, translated by *Kaawanu* in Babylonian. In addition to this, Saturn was also called *Ṣalam*, *Ṣalme*, as 'the dark star,' a name which recalls the expression צַלְמֵיכֶם, 'your images,' which, in the Heb., immediately follows *Chiun* (=*Kaawanu*=*Rephan*), and would furnish a parallel to the translation of מַלְכְּכֶם ('your king') after Siccuth, by 'Moloch' in the LXX. As has been already shown (see NIMROD, NISROCH, etc.), the Hebrew scribes were accustomed to distort the names of heathen deities, apparently to show their contempt for them, and there is but little doubt that this has been done in the present case. No name resembling Rephan or Remphan as the pronunciation of the ideographs for Saturn has as yet been found in Akkadian or Semitic-Babylonian.

LITERATURE.—Schrader in *SK*, 1874, pp. 324-335, and in Riehm's *HWB*; Delitzsch in the *Calwer Bibellexicon*, under 'Chiun,' and in *Assyr. HWB* 569^{b} (end of art. 'Salmu'); and the Comm. on Amos and Acts. T. G. PINCHES.

REPHIDIM (רְפִידִים and רְפִדִם; LXX Ῥαφιδείν, Eus. Ῥαφιδίμ; Vulg. *Raphidim*).—A station between the wilderness of Sin and the wilderness of Sinai (cf. Ex 17^{1} with 19^{2}). The same order is given in the itinerary of Nu 33; but two additional stations are there given, Dophkah and Alush (vv.$^{12-14}$), between Sin and Rephidim. These are the only passages in which the name occurs, and from them it appears that Rephidim is outside the wilderness of Sinai, and that the people, when encamped there, have not yet reached the mount of God.

The events recorded in connexion with this place are: (1) the people strive (רִיב) with Moses and 'tempt' (*i.e.* prove, נִסָּה) the LORD because there is no water to drink (Ex 17$^{1-7}$); (2) the defeat of Amalek (vv.$^{8-16}$); (3) the visit of Jethro when he counsels Moses about appointing judges (Ex 18). The first two are expressly, the third may be by inference (cf. 19^{2}), assigned to Rephidim.

Now, in the account of the first event, the smitten rock is described as being in Horeb ('I will stand before thee upon the rock in Horeb,' Ex 17^{6}). Also in 18^{5} Jethro comes to Moses 'where he was encamped at the mount of God.' According to internal evidence in both these narratives, the people are already at Horeb the mount of God, and the difficulty of harmonizing these statements with those introduced with reference to the situation of Rephidim is apparent.

The first of these events has been discussed in the art. MERIBAH, where the similarity between it and another event (Nu 20$^{1-13}$) assigned to a period after leaving Sinai is pointed out. In the account of the third event, the description of the persons appointed, on Jethro's advice, to assist Moses in judging the people, resembles that in Dt 1$^{9-17}$ (note especially the verbal coincidences of Ex 18^{21} with Dt 1^{15}). In Deuteronomy the appointment is said to have been made at the departure from Sinai—at which time the reference to ordinances and laws (Ex 18^{20}) would be appropriate, and it has been suggested that Ex 18 was at one time read in connexion with Nu 10$^{29-32}$ (see Driver on Dt 1, at p. 15 of *Intern. Crit. Comm.*, and Dillmann on Ex 18). These remarks illustrate what has been said in art. EXODUS AND JOURNEY TO CANAAN, vol. i. p. 804^{b} and 805^{a}.

The foe which Israel encounters in Rephidim is Amalek, a tribe which is generally described in Scripture as dwelling on the southern border of Palestine though occasionally found farther north (see AMALEK). Supposing that the Israelites on leaving Egypt went eastwards, they would pass by the territory which is ordinarily assigned to Amalek, whereas if they made the detour to the south, involved in visiting the traditional Sinai, the Amalekites must have wandered much farther to the south. A question here arises similar to that suggested by the mention of Midian, in connexion with Sinai, and considerably strengthens the argument in the note on the art. MIDIAN. Comparing that note with what is here said, it follows that the acceptance of the traditional site of Sinai involves *two* hypotheses of migration (one for Amalek as well as one for Midian), while the site there suggested for Sinai assigns a uniform geographical position for both. See also art. PARAN.

A. T. CHAPMAN.

REPROBATE.—The word 'reprobate' occurs only once in AV of OT, viz. Jer 6³⁰ (RV 'refuse'). It there represents the Heb. נִמְאָס, and is used in connexion with the figure of smelting or refining metal. People who are incurably bad, from whom no discipline, however severe, can smelt out the badness, are compared to base metal which can only be thrown away. The assonance of the Heb. (נִמְאָס . . . כִּי מָאַס) is preserved in LXX (*ἀργύριον ἀποδεδοκιμασμένον . . . ὅτι ἀπεδοκίμασεν αὐτοὺς κύριος*), but lost in Vulg. (argentum *reprobum* . . . quia *projecit*). It is from the Vulg. that the rendering 'reprobate' comes, the Greek equivalent of which is found in a similar passage in Is 1²², describing the degeneracy of Israel: *τὸ ἀργύριον ὑμῶν ἀδόκιμον*='your silver is not proof,' cannot stand the test (AV 'is become dross,' which exactly reproduces Heb.). In this place Vulg. also gives *argentum tuum versum est in scoriam.* In both cases people are regarded as 'reprobate,' or unable to pass muster in God's judgment, not in virtue of an eternal decree of reprobation, but as having reached a last and hopeless degree of moral debasement. It is the same with the use of *ἀδόκιμος* in NT. This is usually rendered 'reprobate,' and is always passive. The most instructive instance is perhaps Ro 1²⁸ 'As they did not think fit on trial made (*οὐκ ἐδοκίμασαν*) to keep God in their knowledge, God gave them up to a reprobate mind' (*εἰς νοῦν ἀδόκιμον*). This means a mind of which God can by no means approve, one which can only be rejected when it comes into judgment. The marg. of AV ('void of judgment') brings out in accordance with the context *why* the *νοῦς* is *ἀδόκιμος*: the mind which God rejects is one whose moral instincts are perverted, and which does not serve the purpose of a moral intelligence any longer; but this is not what the term *ἀδόκιμος* itself expresses. It might be thought that there was here a more active relation of God to the state in question than is found in Isaiah and Jeremiah, but that is doubtful. There is no dooming of men *ab initio* to reprobation; under God's government, and in the carrying out of His sentence on sin, evil works itself out to this hopeless end. The simple passive sense of the word is apparent also in the three instances in 2 Co 13⁵⁻⁷. The test of true Christianity is that Christ is in men; those who can stand this are *δόκιμοι* ('approved'); those who cannot are *ἀδόκιμοι* ('reprobate'). Here the test is to be applied by Christians to themselves; in 1 Co 9²⁷ (where AV renders *ἀδόκιμος* 'castaway' and RV 'rejected') the final judgment by God is in view; St. Paul subjects himself to the severest discipline that he may not at the last day be unable to stand trial. It would have been an advantage for some reasons to keep the rendering 'reprobate' here also.

The relations in which one is *ἀδόκιμος*, or the trials which he cannot stand, may be variously conceived. Thus in 2 Ti 3⁸ we have 'reprobate concerning the faith.' The men who are thus characterized are described also as *κατεφθαρμένοι τὸν νοῦν*. This expression unites in itself what we distinguish as ethical and intellectual elements. The men in question are men whose moral sense is perverted, and whose minds are clouded with speculations of their own; when they are brought into relation to 'the faith' (which in the Pastoral Epp. includes something like the Christian creed as well as the Christian religion) they are *ἀδόκιμοι*—cannot stand the trial. Similarly in Tit 1¹⁶ when certain persons are described as *πρὸς πᾶν ἔργον ἀγαθὸν ἀδόκιμοι* the meaning is: put them to the test of any good *work* (as distinct from fine profession) and they can only be rejected. The same sense results from the only other passage in NT, He 6⁸. The soil which receives every care from God and man, and yet produces only thorns and briars, is *ἀδόκιμος*. It is rejected as useless for cultivation.

Taken together, these passages support the idea that men may sink into a condition in which even God despairs of them—a condition in which He can do nothing but reprobate or reject them. But they do not support the conception of an eternal decree of reprobation in which the destiny of man is related solely to the will of God. No one who claims to hold this view will ever admit that another can state it without caricature, but it may be given in Calvin's words (*Inst.* III. xxii. 11): 'Si non possumus rationem assignare cur suos misericordia dignetur, nisi quoniam ita illi placet, neque etiam in aliis reprobandis aliud habebimus quam ejus voluntatem.' Apart from the speculative objection that if salvation and reprobation are related in exactly the same way to the will of God there is no difference between them, all the distinctions of the human world being lost in the identity of the Divine, it is obvious that this presents a conception of reprobation remote from that suggested by Scripture. Nor can it be said that the Calvinistic doctrine of reprobation is a necessary inference from the true doctrine of election. The true doctrine of election is experimental. It expresses the truth (which every Christian knows to be true) that it is God who saves, and that when He saves it is not by accident, or to reward human merit, but in virtue of His being what He is—a God who is eternally and unchangeably Redeemer. But while the Christian can say out of his experience that God in His infinite love has come to him, and made sure to him a redeeming mercy that is older than the world, faithful and eternal as God Himself, no one can say out of his experience that God has come to him and made sure to him that in that love he has neither part nor lot. In other words, election has an experimental basis, but reprobation has not. It is true that men are saved because God saves them—true to experience as to Scripture; but it is not true to experience that men are lost because God ignores or rejects them. The form in which the truth is put may be inadequate even in the case of election; but in the case of what is called reprobation there is no verifiable truth at all. For older theological opinion on this subject see Calvin, *Inst.* III. chs. xxi.–xxiii.; Hill, *Lectures in Divinity*, iii. 41 f.; Hodge, *Systematic Theology*, ii. 320 f. See also ELECTION, PREDESTINATION.

J. DENNEY.

REPROOF, REPROVE.—The verb (from Lat. *reprobare* through Old Fr. *reprover*) means—**1.** *To disapprove of, reject*, as in Ps 118²² Wyc. (1388) 'The stoon which the bilderis repreueden'; Mk 8³¹ Tind. 'And he beganne to teache them, how that the sonne of man must suffre many thinges, and shuld be reproved of the elders, and of the hye prestes and scribes.' There is no example of this meaning in AV. **2.** *To disprove, refute*, as Shaks. *Venus*, 787—

> 'What have you urged that I cannot reprove?

and *II Henry VI.* III. i. 40—

> 'Reprove my allegation, if you can;
> Or else conclude my words effectual.'

Of this meaning there are probably some examples in AV, as Job 6²⁵ 'How forcible are right words!

but what doth your arguing reprove?' Is 37^4 'It may be the Lord thy God will hear the words of Rabshakeh . . . and will reprove the words which the Lord thy God hath heard,' though in these and other like places *Oxf. Heb. Lex.* takes the meaning to be simply 'rebuke.' **3.** *To convict*, as Jer. Taylor, *Great Exemplar*, Pref. p. 14, 'God hath never been deficient, but hath to all men that believe him given sufficient to confirm them; to those few that believed not, sufficient to reprove them.' So in AV, Jn 16^8 'He will reprove the world of sin' (Wyc. 'repreuve,' Tind. 'rebuke,' Gen. 'reprove,' Gen. marg. 'convince,' AVm 'convince,' RV 'convict'); cf. Jn 8^{46} Wyc. 'Who of you schal repreuve me of synne?' (Tind. 'can rebuke,' AV 'convinceth,' RV 'convicteth'); 2 Ti 4^2 'Reprove, rebuke, exhort with all long-suffering and doctrine.' **4.** *To chide, rebuke*, the mod. meaning, as Pr 9^8 'Reprove not a scorner, lest he hate thee: rebuke a wise man, and he will love thee.'

Reproof is used mostly in the sense of *rebuke*, but there is a possible example of *conviction* in 2 Ti 3^{16} ('profitable for doctrine, for reproof [πρὸς ἐλεγμόν], for correction, for instruction in righteousness'); and a probable example of *disproof, refutation* in Ps 38^{14} ('Thus I was as a man that heareth not, and in whose mouth are no reproofs'; RVm 'arguments'). J. HASTINGS.

REPTILE.—See NATURAL HISTORY in vol. iii. p. 492^a.

REQUIRE.—Sometimes in AV as in mod. English to 'require' is to *demand*, as 1 S 21^8 'The king's business required haste': cf. Mk 5^7 Tind. 'I requyre the in the name of God that thou torment me not.' This is especially the case in the freq. phrase of requiring one, or one's blood, at another's hand; cf. Bar 6^{35} Cov. 'Though a man make a vow unto them [the idols] and kepe it not, they will not requyre it.' But the sense of *demand* does not lie, as now, in the verb itself, but in the context. To require (from Lat. *requirere* through Old Fr. *requerir*) is first to seek after, and then to request or entreat. It may be used to translate a verb of demanding, as Driver (*Par. Psalter*, 480) suggests that in Ps 40^6 51^6 it may perhaps correspond to Münster's *postulavi* and *exigis*,* but of all the Heb. and Gr. words it is used to tr. in AV there is none that means more than *seek after* or *ask*. That it means no more than ask or entreat in some places is evident, as Ezr 8^{22} 'I was ashamed to require of the king a band of soldiers' (RV 'ask'). Cf. Tindale, *Expos.* 151, 'He giveth abundantly unto them that require it [mercy] with a faithful heart.' Cov. after rendering 'Gedeon sayde unto them, One thinge I desyre of you, every man geve me the earinge that he hath spoyled' (Jg 8^{24}), adds, 'And the golden earynges which he requyred' (8^{26}). Cf. Berners, *Froissart*, ch. ix. 'Then the queen was greatly abashed, and required him all weeping of his good counsel,' and Chapman, *Odysseys*, xx. 215—

> 'For she required
> His wants, and will'd him all things he desired.'

Knox frequently speaks of requiring a thing *humbly*, as *Hist.* 199, 'We required your Highnesse in most humble manner'; so Calderwood, *Hist.* 145, 'I protest and most humbly require,' and *Psalms in Metre*, Ps 143^1—

> 'O hear my prayer, Lord,
> And unto my desire
> To bow thine ear accord,
> I humbly thee require';

and the end of *A Dialog betweene Christ and a Sinner*, by William Hunnis—

> '*Sinner*—Through this sweet grace thy mercie, Lord,
> We humblie doo require.
> *Christ*—By mercie mine I you forgive,
> And grant this your desire.'

J. HASTINGS.

REREWARD.—The 'rereward,' *i.e.* rearguard, was the last of the three main divisions of an army, the 'vanguard' (=*avant-ward*) or 'forefront' being the first. The word comes from Old Fr. *arerewarde, i.e. arere* (mod. *arrière*) 'behind' (from Lat. *ad-retro*) and *warde*, a variety of Old Fr. *garde* (which came from Old High Ger. *warten* to watch over). RV retains the word in all its occurrences (Nu 10^{25}, Jos $6^{9.13}$, 1 S 29^2, Is 52^{12} 58^8) but spells it 'rearward.' It is always spelt 'rereward' (sometimes with a hyphen) in AV, and it is always a substantive. Cf. Hakluyt, *Voyages*, ii. 20, 'Because . . . it was bootlesse for them to assaile the forefront of our battell . . . they determined to set upon our rereward.' Berners (*Froissart*, p. 376, Globe ed.) uses 'rearband' in the same sense: 'The Bishop of Durham with the rearband came to Newcastle and supped.' J. HASTINGS.

RESAIAS (Ῥησαίας, AV Reesaias), 1 Es 5^8, corresponds to Reelaiah, Ezr 2^2, or Raamiah, Neh 7^7. ΡЄЄΛΙΑ has apparently been read as ΡЄCΑΙΑ.

RESEN (רֶסֶן; *AD* Δάσεμ, E Δάσεν; Vulg. *Resen*).—The last of the four cities built by Asshur (RV by Nimrod), between Nineveh and Calah (the modern Nimroud), and further described in Gn 10^{12} as 'the great city' (RV). Various conjectures have been made as to the position of this settlement. The Byzantine authors and Ptolemy identified it with Rhesina or Rhesaina on the Khabour, probably the Arab. *Ras el-'Ain*—an impossible identification, this site being 200 miles W. of the two cities between which Resen is said to have lain. A better identification is that of Bochart, which makes Resen to be the Larissa of Xenophon (*Anab.* iii. 4), though whether, as he argues, 'Larissa' be an adaptation of 'Laresen,' *i.e.* 'Resen's (ruins),' is a matter of doubt. It is worthy of note that Xenophon describes Larissa, like Resen in Gn 10^{12}, as 'a great city.' The identification of the name, however, and that of the site, are two different things. On the one hand, there is the possibility, maintained by some, that Larissa may be Nimroud (Calah), and, on the other, the probability that the ruins described by Xenophon—and the city Resen—may be represented by the remains known as Selamîeh, an ancient site situated about three miles N. of Nimroud, and between that city and the mounds of Nineveh (Kouyunjik). These remains have the advantage of being situated in the tract where, according to Gn 10^{12}, Resen really lay. As Sayce has pointed out, the name of Resen occurs, under the form Rêš-êni, in a list of 18 cities or small towns from which Sennacherib dug canals communicating with the river Khouser or Khosr, in order to supply them with drinking-water. Whether this be the Resen of Genesis or not is uncertain,—in all probability it was a comparatively unimportant place, and situated too far north. Moreover, such a name as Rêš-êni, 'fountain-head,' must have been far from rare in ancient Assyria, as is Ras el-'ain in countries where Arabic is spoken at the present day. The Greek forms are apparently corrupt, and due to the likeness between ר and ד.

LITERATURE.—Bochart, *Geograph. Sacr.* iv. 23; Delitzsch, *Paradies* 261; Schrader, *COT* i. 83; Sayce in the *Academy* for 1st May 1880.

T. G. PINCHES.

---

* Only once is *exigere* used in Vulg. (Gn 31^{39}) to express 'require at the hand of,' elsewhere *quærere* or *requirere* nearly always.

RESH (ר).—The twentieth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 20th part, each verse of which begins with this letter. It is transliterated in this Dictionary by *r*.

RESHEPH (רֶשֶׁף: B Σάραφ, A Ῥάσεφ).—The eponym of an Ephraimite family, 1 Ch 7^{25}.

RESPECT OF PERSONS.—See ACCEPT, vol. i. p. 21.

REST.—In the Scriptures rest is ascribed to God, and also to man in a variety of aspects; and the underlying conception in each case is the necessary relation of the rest of man to that of God.

1. At the close of His creative activity God rested, it is said, from all His work which He had made (Gn 2^2 שָׁבַת [see SABBATH, *ad init.*], usually rendered in LXX by *καταπαύειν*, but sometimes by *ἀναπαύειν*). This implies the twofold thought that creation, with all that the creative process involved, was completed once for all, and that God was satisfied with the work at that stage accomplished. But this assertion of rest on the part of God contains no denial of subsequent action, no theory as to such action, and is consistent with ceaseless activity (Jn 5^{17}, cf. Th. Aquin. *Summ. Theol.* Qu. 73. 2). The apparent silence or inactivity (שָׁקַט) on the part of God in presence of the impiety of men is the rest of One who is watchful and will strike at the fitting time (Is 18^4).

2. The rest (נוּחַ, מְנוּחָה) promised by J″ the covenant-God to the people of Israel is the rest of a settled dwelling-place. But the rest of the people in this case is coincident with the rest of God; for with the permanent settlement of the ark by a man of rest (1 Ch 22^9) God is represented as entering into His rest and the people into theirs, which is also His (2 Ch 6^{41}, Ps $132^{8.14}$). Into this rest some did not enter because of disobedience (Ps 95^{11}, He 4^6).

3. In addition to this national rest, a rest of a more spiritual and individual character is spoken of. To Moses the promise of the Divine presence with a settled abode as a goal is the guarantee of rest (Ex 33^{14}). Jeremiah offers it (מַרְגּוֹעַ) to his countrymen on condition of their walking in the eternal paths (Jer 6^{16}), in harmony with the will of God given of old (cf. Is 28^{12}, where we find מְנוּחָה ‖ מַרְגֵּעָה). Those who do so are by a kindred word described as the quiet or restful ones (Ps 35^{20}). Because obedience to the will of God is the secret of rest, it cannot be possessed by the unrighteous, whose normal condition is a restlessness like that of the waves of the sea (Is 57^{20}).

4. To men worn out with worrying toils and struggling under burdens too heavy for them (the immediate reference being probably to the Pharisaic burdens), Christ promised rest (Mt 11^{28-30}). It is His own rest that He offers to those who with a meek and lowly heart recognize the will of His Father as the law of the inner life, and take His yoke upon themselves. It is not a rest *from* toil but *in* toil (Jn 5^{17}), not the rest of inactivity but of the harmonious working of all faculties and affections—of will, heart, imagination, conscience—because each has found in God the ideal sphere for its satisfaction and development.

5. The teaching of Scripture as to future rest is most explicitly set forth in He 4^{1-11} and Rev 14^{13}. Taking up the creative rest of God (שָׁבַת) along with the rest referred to in Ps 95^{11} (מְנוּחָה) (both words being rendered in LXX *καταπαύειν*), the author of the Ep. to the Hebrews argues thus: God rested at the creation of the world, and subsequently promised to Israel the rest of a settled abode. That something more than an external rest was, however, implied, is proved by the fact that at a later period He swore that they should not enter into His rest. As that promise still held good and was yet unfulfilled, a Sabbath rest (*σαββατισμός*) to the people of God remained (He 4^9), which had been unappropriated or only partially appropriated by the past. Into that rest believers now enter (He 4^3); but because it is the very rest of God Himself (He 4^{10}), its full fruition is yet to come. The rest of the blessed dead is not merely the rest of the grave (Job $3^{13.17}$), it is a rest from toils (*ἐκ τῶν κόπων*, Rev 14^{13}), but not from work, a rest only 'from sorrow and trouble and hard service' (Is 14^3). In all these forms of rest God and man are indissolubly related. The rest of God the Creator is set forth as the condition and type of the rest of man. The rest of J″ is one with that of His people. The rest offered to men by Christ is His own rest, which is also that of His Father. The blessed rest of man is rest in God, with God, nay, the very rest of God. See, also, SABBATH, p 317.

JOHN PATRICK.

RESTITUTION.—See CRIMES and next article.

RESTORATION in RV corresponds to 'restitution' in AV, as rendering of the noun *apokatastasis*, which occurs but once in the NT, Ac 3^{21} *ἀποκατάστασις τῶν πάντων*. The times spoken of by the prophets are here described as times of restoration, when Christ shall reign over a kingdom in which none of the consequences of sin will any longer appear. The same word in its verbal form occurs in Mt 17^{11} and in the LXX of Mal 4^6 of the moral restoration or spiritual revolution inaugurated or attempted by John the Baptist. This restoration was a foreshadowing of the true *apokatastasis*, which is to be realized in the case of all who will recognize the authority of the Messiah and become members of His kingdom. The word *palingenesia* (*παλινγενεσία*) is used by our Lord, Mt 19^{28}, in precisely the same sense of the restoration of the whole creation. The subject of the new genesis comes under the influence of the transforming power of the Holy Spirit by which he is renewed day by day. See Trench, *Synonyms of the NT*^{10}, p. 65. The word is also used by Josephus, *Ant.* XI. iii. 9, of the restoration of the country of the Jews under Zerubbabel. It became a favourite term in later Jewish Apocalyptic writings, and was no doubt in common use in the Jewish Apocalypses current in the time of our Lord. That the word should be employed in the Hebrew Gospel of Matthew and not in the writings of the other evangelists is natural enough, so that there is no need of the hypothesis of interpolation, nor yet of the assumption of any particular Jewish-Christian sources. The prophecy of Caiaphas (Jn 11^{52}) supposes the offer of the Saviour's salvation to all,—it may be in another state of existence to those who have not had it here,—but not necessarily its acceptance by all. Among the words of Jesus which seem to favour the restorationist view may be mentioned Jn 12^{32}, where, however, the lifting up, like that of Jn 3^{14}, effects a *drawing*, which secures salvation only for those who look or believe. It has been maintained, *e.g.* by Pfleiderer (*Paulinism*, i. 274–276), that the idea of a restitution in the sense of a literal restoration of all things is taught by St. Paul in Ro 11^{32} and 1 Co 15^{22}. But in these passages St. Paul simply insists upon this, that only believers shall share in that perfected kingdom of God in which God is all in all. It might, of course, be argued, if the general scope of Divine revelation would allow of it, that the believers who shall share in those blessings will at last be found to embrace all mankind. But it cannot be said that these passages contribute any evidence for or against that view. See Weiss, *Biblical Theology of NT*, ii. 73. Such biblical passages were understood by Clement of Alexandria, Origen, Gregory Nazianzen, Gregory of Nyssa, even by Chrysostom (see *Homily* on 1 Co 15^{28}) and other Fathers, by Erigena, most of the mystics and theosophists, as they have been in modern times by Schleiermacher, Erskine of Linlathen, Maurice, Farrar, etc., not as teaching absolutely the final salvation of all men, but as pointing to the ultimate restoration of all as at least a possibility.

In the Pastoral Epistles there are three very interesting passages, 1 Ti 2^4 4^{10}, Tit 2^{10}, in which God's saving will is described as universal. This, however, is the will of God concerning men who are themselves possessors of a will, which may resist and reject as well as accept what the gracious will of God has designed for them. The same explanation must be given of Eph $1^{9.10}$, Col 1^{20}, which represent the gathering into one and reconciling of all as the purpose and good pleasure of God. This Divine plan is realized only in Christ, and applies therefore only to those who are in Christ. What is taken into account here is only God's purpose, and not what is actually realized in the world of human freedom. The whole scope of Scripture shows that the realization of the Divine will regarding man is conditioned by man's voluntary acceptance of the terms proposed. The universal purpose of God is well described by Martensen as 'an *ἀποκατάστασις a parte ante*' which has its development as an *ἀποκατάστασις a parte post*, under condition of man's free will, only when the *possibility* of eternal condemnation has been confessed. He would regard the opposition of biblical passages, on the one hand seemingly universalist, on the other hand seemingly in favour of eternal retribution, as an antinomy like that of freedom and predestination.

It is now generally admitted by the best exegetes of all schools that the doctrine of the restoration of all cannot be supported by NT texts. The ablest and most candid advocates of this theory seek to ground their position on what they regard as necessary conclusions as to the nature and character of God, or on psychological and ethical doctrines of the constitution and destiny of man.

J. MACPHERSON.

RESURRECTION.—*Introductory.*—The NT subst. ἀνάστασις from which, through Vulg., we obtain the term 'resurrection,' gives, so far as its strict sense goes, an incomplete account of the Biblical doctrine. The essential idea is restoration of life in its fulness to a person whose existence has not been absolutely cut off, but so mutilated and attenuated as to be unworthy to be described as life. The name 'resurrection' given to this act of God is drawn from the fact which immediately struck the eye in cases where renewal of life took place. The rising up of the body (ἀνέστη, 2 K 13^{21} LXX) is taken as the symbol of the whole fact. But the essential matter is the renewal of life, hence in Rabbinic תְּחִיָּה (revival) is more frequent than תְּקוּמָה (resurrection). See Buxtorf, *s.v.*, who says that some distinguished the former as the proper word to be used of the resurrection of the righteous. Delitzsch in his Hebrew NT frequently renders ἀνάστασις by תְּחִיָּה. Cf. the use of ζωοποιεῖν in Jn 5^{21} and elsewhere. In LXX cf. ζωοποίησις (only in Ezr $9^{8.9}$) used of revival of the nation.

The development of the Biblical doctrine of resurrection starts from a previous belief that death was not the end of existence but was the end of life, a distinction which it is difficult for modern thought to apprehend. This was itself the result of the fusion of two opposing beliefs, as has been ably shown by Charles (*Eschatology*, chs. i.–iii.). On the one side there were survivals of a primitive belief, common to the Hebrews with other nations, according to which the dead were not mere shades, but still active and powerful. On the other side was the teaching of Gn 2^7, that the soul was but the result of the indwelling of the Divine Spirit in the earthly body; leading logically to the conclusion that the withdrawal of the spirit at death must involve the break up of the existence of the individual. But this latter conclusion was not generally adopted, and with certain exceptions (Ec $3^{20.21}$) the soul was believed to persist or subsist after the breath of life had been withdrawn. The question before us, therefore, is not that of the immortality of the soul, which in some form or other is the starting-point, not the subject, of the present inquiry. The advances made by the two peoples, Hebrew and Greek, in the doctrine of a future life show a strong contrast. The Greek advance, represented in Biblical literature by the Bk. of Wisdom only, was due mainly, though not entirely, in the limited circle affected by it, to the consciousness of intellectual vigour and the difficulty of conceiving intellectual activity arrested and annihilated, as in the belief of the Homeric age it undoubtedly was. In the Hebrew advance, it was the development of religious vigour and experience which made men feel that existence in Sheol, as generally understood, could not be their final lot. Again, to the Greek it appeared that the body was in some respects a hindrance to the intellectual life, and that the serenity needed for reflexion was disturbed by bodily passions; hence the resumption of the body presented no attractions. The Hebrew, from his less intellectual point of view, felt nothing of this, and was therefore able to retain his instinctive perception that the body was essential to the life of man, and to require that, if life was to be restored, the body should be restored also. The history of the doctrine of the resurrection in the OT is that of a slow hesitating development. In the NT there is undoubtedly development, but the doctrine is not merely developed within human thought, but revealed to it from without by a fact which assured it—the resurrection of Jesus Christ. In the present article that event will not be dealt with in its historical aspect, nor with regard to its place in Christology and in Christian evidences (see art. JESUS CHRIST), but only in its relation to the doctrine of the resurrection of mankind. The order of treatment will therefore be—(i.) the expectation of resurrection as developed in the OT and Apocrypha; (ii.) the effect on this expectation of (A) the teaching, (B) the resurrection of Jesus; (iii.) the place thenceforward assigned to the doctrine in apostolic teaching.

i. THE EXPECTATION OF RESURRECTION AS DEVELOPED IN THE OT AND APOCRYPHA.—Martha's words, 'I know that he shall rise again in the resurrection in the last day' (Jn 11^{24}), set before us the general belief of the Jews (excluding Sadducees) in the time of Christ.* But how had this belief been arrived at? Its development in OT has been so often and so fully dealt with (*e.g.* Schultz, *OT Theology*, II. ch. xxii.; Salmond, *Chr. Doct. Immortality*, bk. ii.), that only an outline will be necessary.

---

* The disciples' inability to understand 'what the rising again from the dead should mean' (Mk 9^{10}) does not controvert the statement above. It arose from their unwillingness to conceive a suffering Messiah, and so to expect His death, which was the necessary preliminary to His rising again.

A. *OLD TESTAMENT.*—1. *Stages of development.*—(*a*) The religious life of the individual Hebrew was subordinate to that of the nation. It is in the sphere of national life that we first find those religious conceptions which ultimately come to be appropriated by the individual, *e.g.* Justification (see Is 45^{25}). This holds good of the expectation of resurrection, and Hos 6^{2} may be taken as a typical passage. Ezk 37 belongs to the same class. One prophecy of national resurrection is of a special and peculiar character, viz. Is 53^{10}. While granting that the Servant of the LORD is primarily Israel idealized, we have here the prolongation of life after death described in so individual a way, that when once the thought is admitted that the Servant is a Person representing the nation, the prophecy becomes a prophecy of individual resurrection. It will be observed that in Hosea and Ezekiel it is a figurative resurrection, namely, the recovery of national life, which is spoken of, and not a literal one, and the whole conception depends on the nation being considered as a person capable of life and death. But it thus becomes clear that the notion of literal resurrection as a possible thing was a very early one, inasmuch as the literal conception of an event must precede its figurative application. The miracles of Elijah and Elisha (1 K 17, 2 K 4), even for those who refuse to accept them as facts, testify to the notion of resurrection being in men's minds. (*b*) The second stage of thought, later in logical if not in chronological order, is a transitional one. In it the notions of individual and national resurrection appear side by side—Is 26^{19}. Compared with 26^{14}, this verse must be understood as a prayer for the resurrection of individuals. See Dillmann, *ad loc.* (*c*) In Dn 12^{2} the resurrection of individuals stands out alone and clear. The passage probably refers to the faithful and the apostates of Maccabæan times (cf. 11$^{32\text{ff.}}$), and resurrection is predicted for both classes, without, however, any implication of resurrection for Gentiles. The form of expression and its connexion with a time of trouble and deliverance seem to show dependence on Is 26^{16}. The passage likewise introduces for the first time the resurrection of sinful Israelites with a view to retribution.

2. By the side of these stages of thought shown in prophetic utterances we must place the reflexions of psalmists and wise men. They will best be considered under the head of *lines of thought*, in which the doctrine of resurrection was developed. In every case it must be borne in mind that it is not the renewal of an existence which has been cut off, nor merely the restoration of a body which is aspired to, but the deliverance of an existent personality from Sheol, and its re-endowment with life in all its powers and activities. (*a*) *Communion with God.* Of this the psalmists were conscious, yet before them lay Sheol with the entire cessation, according to the popular belief, of any such relation to Him (Ps 6^{5} 30^{9}). Some of them surmount the barrier. Such a communion must partake of the nature of Him who admits it, and therefore be eternal. Two of the psalms which express most strongly the delight of fellowship with God, viz. 16 and 17, are those in which the hope of life after death reaches its least ambiguous expression (16^{10} 17^{15})—least ambiguous, because here and everywhere in similar passages in the Psalms it may possibly be temporary preservation from literal and physical death which is intended, as is certainly the case in Ps 68^{20}. But very widely in the Psalter there exists the feeling that life means more than the continuance of the soul in the body. And this fact should be taken into account in interpreting all Psalm passages in which life and death are referred to. (*b*) *Need of retribution.* Under this head we must consider not only the Psalms but also the Prophets and Job. It makes itself felt in various ways. (1) In connexion with Messianic hopes. The more vivid and glorious these become, the more needful is it that the dead Israelites should not be thought to be debarred from partaking in their fulfilment. The idea of the dispersed who are alive being gathered to partake in the great restoration is abundantly expressed (Is 60 and elsewhere); and it is only a step further to gather them from the underworld for the same purpose. That is indeed the connexion of the prayer and promise in Is 26^{19} and Dn 12^{2}, already cited. The thought comes out much more clearly in Eth. Enoch 51; and when the doctrine of a temporary Messianic reign on earth grows into shape, the resurrection of the righteous to share in it is usually placed at its beginning. Hence arises the expectation of two distinct resurrections, which will be examined below. (2) Besides retribution of blessing for the righteous, retribution for the wicked came also to be felt as a necessity. For the Psalmist it had been enough to pray for vengeance on them in this life, or to think of them as shut up for ever in Sheol (Ps 49^{14}); and for the Prophets it was enough to expect a 'day of the LORD,' in which they would receive their punishment here, and be swept away. But in Dn 12^{2} resurrection for unfaithful Israelites with a view to their punishment appears for the first time, and it is obvious that from this starting-point an expectation of resurrection and judgment for mankind generally would naturally proceed. (*c*) There is another aspect of retribution, which does not look at reward or punishment, but rather at the reversal of mistaken human judgments. There must be a higher tribunal to appeal to, and to reach it man must be brought out of Sheol. Further, the dealings of God Himself require a justification which He cannot fail to give. This is in the main the line of expectation in Job. The sufferer is dying with an unjust condemnation upon him, and with no sign of regard from God. In Sheol he will still be cut off from God. He rises to the thought, and throws out the wish (14$^{13\text{ff.}}$), that there may be release from Sheol, and later on is assured that 'his redeemer (*gō'ēl*) lives,' and that he himself will see God (19^{25}). All this implies, first of all, literal death, and then restoration to life after death, *i.e.* resurrection in the proper sense of the word.*

These three tendencies of thought which were at work in the mind of Israel during and after the Exile seem to spring naturally out of the previous OT religion, and not to require any extraneous influence to account for the shape which they took. No doubt, such a passage as *Yasna* lx. 11, 12 is sufficient proof of a clear and lofty doctrine of resurrection in Persian religious thought.† But at the most such belief among their foreign rulers did no more than stimulate the home-born expectation of resurrection in the breast of Israel.

B. *APOCRYPHA.*—The variations which the doctrine of resurrection underwent in the inter-Testamental period are various and complicated. Their inconsistencies may be gathered from the brief summary of them in art. ESCHATOLOGY, vol. i. p. 748^b : for a full account of their phases, Charles, *Eschatology* (Jowett Lecture), chs. v.–viii., should of course be studied. See especially an admirable summary in *Book of Enoch*, ed. Charles, ch. 51, note.

---

* It must be confessed that both the text and the exegesis of this passage are still involved in considerable obscurity. See the *Comm.*, especially those of Dillmann, A. B. Davidson, and Duhm.

† 'In order that our minds may be delighted and our souls the best, let our bodies be glorified as well, and let them, O Mazda, go likewise openly (to Heaven) as the best world of the saints devoted to Ahura, and accompanied by Asha Vahista, who is righteousness the best and most beautiful, and may we see thee and may we approaching come round about thee, and attain to entire companionship with thee.'—*Sacred Bks. of the East*, vol. xxxi. p. 312.

Three of the deutero-canonical books require a few words, viz. Sirach, Wisdom, 2 Maccabees, as representatives of widely divergent views. The earliest of these (Sirach) is on the lines of Ecclesiastes, not rising beyond the old popular conception of Sheol. The immortality of man is distinctly denied in Sir 17^{30}. The contrary statement in 19^{19} is omitted in BℵAC (followed by RV). It is found, however, in the Complutensian text, and in the very important MS, Ho 248. Apparently, the only immortality expected is (1) that of the nation, and (2) for the individual a good name, 37^{26}. The three passages which appear to imply a better hope (46^{12} 48^{11} 49^{10}) are capable of being otherwise interpreted; cf. Schwally, *Das Leben nach dem Tode*, § 40.—In direct opposition to Sirach is Wisdom, see Wis 2^{23} $3^{1ff.}$. But the expectation of immortality in this book is probably drawn from Greek philosophy much more than from Psalms or Prophets. A belief in the pre-existence of souls is held to be involved in it (Wis 8^{20}), and resurrection of the body is nowhere contemplated.*—On the other hand, 2 Mac. expresses the assurance of such a resurrection not only as an opinion, but as the motive and support of martyrdom. The persecutor can mutilate the body, but God will restore it intact (2 Mac 7^{9} $11^{14.36}$ 14^{46}). And 12^{44} shows that the author had a Sadducean denial of resurrection confronting him, such as is implied by the silence of 1 Mac. in regard to everything relating to a future life. Thus we have in these three books severally (1) the ancient view of Sheol as the end of man, (2) the expectation of immortality for the soul alone, (3) belief in the resurrection of the body. It may be added that in 2 Mac. for the first time ἀνάστασις occurs in the Gr. Bible in the sense of 'resurrection' (but cf. Ps 65 title).—2 Es. need not be discussed here, as it is entirely post-Christian. For the pseudepigraphic literature the reader has already been referred to ESCHATOLOGY.

ii. EFFECT OF THE TEACHING AND RESURRECTION OF JESUS ON THE EXPECTATION OF RESURRECTION IN ISRAEL.—In the first place there may be room for doubt as to the precise character of this expectation. May 2 Mac. be taken as the expression of it? Was it regarded as a return to life under previous physical conditions in order to partake in a Messianic kingdom upon the present earth subjugated and renewed? It is to this that a survey of OT prophecy seems to lead, and it is this which seems to be in the minds of the apostles so far as we can judge by their utterances in the Gospels. It has indeed been shown by Charles (*Eschatology*, Jowett Lect. p. 238) that such a view is more properly characteristic of the 2nd cent. B.C. than of the 1st. The portions of Eth. Enoch which belong to the 1st cent. B.C. declare that the Messianic kingdom is of only temporary duration, and that the goal of the risen righteous is not this transitory kingdom, but heaven itself (*op. cit.* p. 201 ff.). Yet the literature of a period is not decisive as to popular belief, and the expectation of the kingdom of God in the Gospels appears to be more in harmony with the earlier eschatology. Even if 'the doctrine of the resurrection current among the cultured Pharisees in the century preceding the Christian era was of a truly spiritual nature,' it had not laid hold of the mass of the people. The character of the resurrection belief to be gathered from the Mishna (for which see Weber, *Jüd. Theol.*^{2} pp. 369, 370) is probably better evidence of Jewish popular opinion in the time of Christ than any portion of Eth. Enoch, though it seems too much to say with Weber, that Enoch cannot in any case serve as authority for the exhibition of Jewish theology (*op. cit.* p. xv). Assuming, then, that the popular conception of resurrection was return to life under previous physical conditions in order to participate in a Messianic kingdom, we have to observe how this would be affected by the teaching and resurrection of Jesus.

A. *TEACHING OF JESUS.*—In the Synoptics the resurrection is taken for granted. There the discourses of Jesus seldom if ever communicate doctrine. Doctrine is presupposed. The discourses are practical, and it is in connexion with conduct, and judgment upon conduct, that the resurrection comes before us. However, a new view of life and death is implied in Mt 9^{24} 'the damsel is not dead, but sleepeth,' and to enforce this teaching may have been in part the object of the three miracles of raising the dead. There is another more important exception to the absence of direct teaching, the answer to the Sadducees (Mt 22^{23-32}, Mk 12^{18-27}, Lk 20^{27-38}), which was evidently felt by those who recorded it to be of the highest importance. As an answer to the difficulty raised by the Sadducees, the words of the Lord are in a measure confirmatory of Eth. Enoch 51^{4} ('they, *i.e.* the righteous, will all become angels in heaven'). But the Lord goes on to attack the position of His adversaries, and to prove, not indeed that there will be a resurrection, but that the conditions of it exist. The souls of the patriarchs are still truly alive, because acknowledged by God Himself (Ex 3^{6}) to be in relation to Him; cf. Lk $1^{54.55.72}$. Their resurrection in the body is indeed a further step, but follows inevitably from the love of God (see Swete on Mk 12^{26}). The narrative of Luke extends the thought of this relation of man to God from the souls of the patriarchs to all men, and to this striking utterance St. Paul probably refers in Ro $14^{7.8}$.—In the Fourth Gospel the treatment of the doctrine of resurrection is different. There it forms part of Christ's doctrinal system, both as to the spiritual revival which is its necessary condition (Jn $5^{24.25}$), and as to His own share in effecting it ($5^{28.29}$ $6^{39.40.44.54}$). In this latter particular we may compare the expectation of Eth. Enoch, which had connected the resurrection with the coming of the Son of Man (Eth. Enoch 51^{1} 61^{5}). This claim of Christ is concentrated in the words, 'I am the resurrection and the life,' Jn 11^{25}. In Martha's words and Christ's reply the old and the new doctrines meet, and the old is taken up and transformed into the new, losing nothing and gaining much. A serious difficulty, however, arises on this teaching. If resurrection is presented (Jn 6^{40}) as the necessary ultimate result of believing on the Son of God, the resurrection of unbelievers must, it is evident, stand on some other footing. To deny it altogether would be to fall into the fallacy of arguing from denial of the antecedent to denial of the consequent. But it must clearly be different in character. What is the difference? The question will recur below in considering St. Paul's presentation of the doctrine in Ro 8^{11}. A resurrection of the wicked is plainly presupposed in Christ's teaching as to the Judgment, Mt $25^{32ff.}$,

---

* Teichmann (*Die Paulinischen Vorstellungen von Auferstehung und Gericht*) endeavours to show that in 2 Co 5 St. Paul has abandoned his early Judaic belief in a literal resurrection, under the influence of Hellenic thought, and especially of the Book of Wisdom, cf. 9^{15}. See pp. 11–75 for the whole argument, which, though ingeniously worked out, is nevertheless unconvincing.

It is, moreover, distinctly affirmed in Jn $5^{28.\,29}$. The excision of these verses as proposed by some critics (Charles, *Eschatology*, p. 371) is an arbitrary method of getting rid of the difficulty. The solution seems to lie in the doctrine of two resurrections different in nature if not in date, which is implied in Lk 14^{14} 20^{35}, where see Plummer's notes (*Internat. Crit. Comm.* on Luke). The causation, so to speak, of the resurrection of the righteous from the dead (ἡ ἐκ νεκρῶν ἀνάστασις) will be different from that of the rising of the wicked, though in both cases it proceeds from Christ as its author.

B. *RESURRECTION OF JESUS, AND ITS EFFECT ON THE DOCTRINE OF RESURRECTION.*—Of greater moment than any result of verbal teaching was the change in the doctrine produced by the resurrection of Jesus. The Jewish expectation, if it has been rightly estimated above (i. A.), would have been fulfilled by a return to life such as that of Lazarus, with a body subject to all its previous conditions. This and the two preceding raisings from the dead had appeared to confirm the popular view. And the Lord Himself had accommodated His teaching to the same expectation in Mt 18^{8}, though, as we have seen, He had incidentally rebuked it in Lk 20^{35}. But when He had risen, it was clear that the body with which He had risen was in some ways released from previous material conditions. He could pass through a closed sepulchre (implied by Mt 28^{2}), and closed doors (Jn 20^{26}), and be present at no great interval in different and distant places (cf. Lk 24^{15} and 24^{34}). It was the same and yet with a certain difference which was enough in some cases to delay or hinder recognition (Mk 16^{12}, Jn 20^{14} 21^{4}). As against this alteration in the character of His risen body, it might be urged that He asked for and received food (Lk $24^{41\text{ff.}}$, Ac 10^{41}). But in these cases the purpose of the moment was to convince the disciples that what they saw was not a phantom; cf. Mt 14^{26}. This, with a view to the persons dealt with, could best be done by taking food. If there be resurrection of the body, there is no reason why such a body should not have the power of taking food without depending on it. Once cross the boundary of the present sphere of existence, and we are in a realm where we can no longer say 'this is impossible.' Indeed it was the reality and identity of His risen body which the Lord had to insist on; the difference was evident, and spoke for itself. To sum up, the effects of His resurrection were these—(1) It assured men of what till then had been a hope imperfectly supported by Scripture warrant, and therefore contested by an influential school of thought (the Sadducees). (2) It raised and enlarged that hope; cf. 1 P 1^{3}. Whatever influence the lofty predictions of Eth. Enoch (*Similitudes*) may have had among the studious and learned, it is probable that the people generally had interpreted resurrection as a renewal of this present life under its previous conditions. Christ's resurrection showed that it meant entry into an entirely new phase of existence. (3) It brought the doctrine of resurrection from the background of religious thought to the very front. The gospel of Jesus Christ demanded acceptance on the ground of His resurrection. It was that which declared (ὁρίζειν) Him to be the Son of God (Ro 1^{4}), and set the final seal of Divine acceptance on His teaching and life; and, as was afterwards realized, on the sacrifice of His death. The gospel which the apostles preached was the gospel of the resurrection (cf. Ac 4^{2}), though this combination of words does not actually occur. Confession of Jesus as Lord, and belief in His resurrection, are the only things necessary for salvation, Ro 10^{9}.

iii. THE PLACE THEREAFTER ASSIGNED TO THE DOCTRINE OF THE RESURRECTION OF THE DEAD IN APOSTOLIC TEACHING.—To this the preceding remarks naturally lead us on. In two respects the doctrine presented itself to men of the apostolic age differently from the way in which we regard it. (1) To the apostles the expectation of the Second Coming in their own lifetime, arising from such sayings as Mt 24^{34}, superseded in some measure the expectation of resurrection for themselves and for those whom they addressed, yet the strong Sadducean opposition to the gospel is expressly attributed to the apostles' teaching as to the resurrection (Ac 4^{2}). (2) On the other hand, the sense of the new life imparted to them by the words of Christ and the gift of the Spirit, with the example before them in the Person of Christ of how this life could triumph over death, made the resurrection in its aspect of quickening (ζωοποιεῖσθαι) an already present fact. They were already risen with Christ, death was brought to nought (2 Ti 1^{10}), and the subject of their preaching was 'this life' (ἡ ζωὴ αὕτη, Ac 5^{20}). But for later ages of the Church the literal resurrection has appeared to be the important thought, and the mystical resurrection has lost the freshness which it had when grown men entered by baptism into the new life, from the bondage of Judaism or the superstition and vice of heathenism (Ro $6^{4.\,5}$). But the question as to apostolic teaching is really not a general one, but special, and to be answered almost entirely from the Pauline Epistles. The Catholic Epistles and Hebrews contribute very little. It is when St. Paul turns to the Gentiles that the doctrine of the resurrection assumes a fresh prominence. It is not merely, as in Judæa, that witness must be given that Jesus is risen, to men who expect already resurrection for themselves; but the idea of resurrection is here a new one, and there is no previous belief in which the resurrection of the Lord can find its place. Popular Hellenic thought on the subject was vague, and apparently but little influenced by the doctrine of retribution taught in the mysteries (Salmond, *Chr. Doct. Immortality*, p. 135 note). Philosophic thought was simply concerned with the possible immortality of the soul, and uniformly discarded the prospect of a renewed existence in the body except by way of transmigration, a totally different conception from that of resurrection. In his discourse at Athens, St. Paul carried the Stoics with him throughout, until he came to the words 'in that he raised him from the dead,' Ac 17^{31}. Then some mocked, and Paul departed from among them. Hence in both his Epistles to the most distinctly Greek of the Churches which he addresses (Corinth), St. Paul enters fully on the question of resurrection. It was apparently at Corinth, first of all, that the mystical sense of resurrection, described above, usurped the place of the literal sense. It is to St. Paul that we owe the clear presentation of both the literal and the mystical views of resurrection as truly compatible. As examples of the mystical sense, besides Ro $6^{4.\,5}$ (already referred to), we have Col 2^{12} 3^{1}, Eph $2^{5\text{f.}}$. The last-named passage carries the mystical union with Christ beyond His resurrection to His ascension. And it is in reference to the mystical resurrection that we are to understand the baptismal hymn, 'Awake thou that sleepest, and arise from the dead, and Christ shall shine upon thee,' Eph 5^{14}. It is easy to see how such language, if it stood alone and without its complement, might give occasion to the teaching of Hymenæus and Philetus that the resurrection was past already, 2 Ti 2^{18}. It was therefore absolutely necessary for St. Paul to emphasize also the literal sense of the doctrine, which he does in 1 Th 4^{16}, 2 Co 5, Ph 3^{21}, but especially in 1 Co $15^{12\text{-}58}$. In the latter passage he first shows that faith in the resurrection of the dead is vital to the gospel, because the resurrection of Christ is vital to it, and that cannot be maintained if the resurrection of those who are in Christ is denied. Then he meets the difficulties which Greek thought, more subtle and critical than Jewish, felt so strongly—'How are the dead raised, and with what manner of body do they come?'

In further examination of the Pauline doctrine, three questions will present themselves, which must be dealt with successively—(1) In what respects, if at all, does the teaching of St. Paul on the subject go beyond the teaching of Christ? (2) Is his teaching consistent with itself? (3) Does it include a doctrine of two resurrections?

(1) The principal thought which we owe to 1 Co 15 is that of a spiritual (πνευματικόν) as distinguished from a natural (ψυχικόν) body, namely, a body which is adapted to be the organ of a personality in which it is no longer the soul (ψυχή) but the spirit (πνεῦμα), which is supreme. This is in full correspondence with the account given in the Gospels of the risen Christ, but needed to be definitely stated (cf. 1 P 3^{18} RV). The analogies by which the possibility of such a body is indicated (vv.$^{39-41}$) are to be regarded as (*a*) popular illustrations, (*b*) examples of the inexhaustible resources of God, and are not adduced as arguments. The crux of the doctrine is, 'What continuity is there between the natural body resigned at death, and the spiritual body received at the resurrection?' For this, another analogy is brought forward—that of the seed and the wheat plant; and here again we have an illustration which must not be pressed too closely. It does not imply that the writer believed that there really is as it were a seed in the dead body out of which the new body will be developed (cf. Weber, *Jüd. Theol.*^{2} p. 369; Hughes, *Dict. Islam*, art. 'Resurrection'). Nor do St. Paul's words necessarily imply that view of the doctrine which from the Apologists onwards was general in the Catholic Church, namely, that the matter which constituted the former body at the time of death will be collected, and that the former body will thus be reproduced in all its members. The passage lends itself quite as readily to Origen's suggestion of a 'ratio quæ salva est' (Or. *de Principiis*, II. x. 3); see Westcott, *Gospel of Resurrection*, ii. § 7. In considering the difficulties attending the idea of the preservation of identity in the body, it must not be forgotten that difficulties also attend the conception of a continuous identity of the soul.

(2) *Is St. Paul's teaching consistent with itself?*—It is urged by Teichmann (*op. cit.*) that St. Paul's view in 1 Thess. is purely Judaic (*echt Jüdische*). It is true that he says nothing in 1 Thess. of the 'change' which is so prominent in the teaching of 1 Co 15, but this is no proof that it did not then form part of his expectation. 1 Co 15 is described by the same writer as 'a compromise'; and strongly contrasted with 2 Co 5, a contrast which must now be examined. (*a*) In 2 Co 5^{2} the resurrection body is described as 'our habitation which is from heaven,' an expression which is not strictly consistent with the resurrection or retention of the former body as in 1 Co 15. But the inconsistency is no more than is allowable in speaking of a really indescribable event. The notion of a previously prepared body brought to the soul to be animated by it surely could not have definitely presented itself to the apostle's mind without being at once discarded. And it is further to be observed that vv.$^{1.2}$ have verbal coincidences with Mk 14^{58}, which, although a partly inaccurate statement of Christ's words, may very well have been known to St. Paul and have influenced his choice of expressions. (*b*) 2 Co 5^{1} has been held to imply that St. Paul expected the resurrection body immediately upon his death. But this is not proved by his use of the present tense (ἔχομεν), which only expresses the certainty of his hope. Nor is it proved by ἐὰν καταλυθῇ, for ἐάν need not here, as in some cases, be rendered 'whenever,' but may retain its strictly conditional force, and so express the doubt which St. Paul still felt as to whether his 'earthly house' will really be dissolved by death, or be changed at the Lord's coming without dissolution. Nor, again, does his expectation of being with the Lord as soon as he leaves the body (5^{8}) imply that his resurrection would then take place (if indeed the term 'resurrection' be applicable to such a view, which is hardly the case), for, in another Epistle in which he expresses the same expectation of being immediately with Christ in case of death (Ph 1^{23}), he makes it perfectly clear that the change of the body of humiliation into the body of glory does not occur until the Second Coming (Ph $3^{20f.}$). It may be replied that the change described in Ph $3^{20f.}$ refers only to those who shall be alive at the Coming, among whom St. Paul has again begun to include himself (cf. Ph 1^{25}). But this can hardly be pressed in face of his definite expectation for himself of resurrection from the dead in Ph 3^{11}. We therefore conclude that he expects to be with the Lord before the Parousia in a disembodied state. Teichmann's arguments are largely based on a detached note on 2 Co 5 in Schmiedel's *Hand-Commentar*, pp. 200–202, and on Schmiedel's exegesis generally. It should be added as a supplementary consideration that the supposed abandonment by St. Paul of belief in an intermediate state would present a serious difficulty in view of the miracles of raising the dead recorded in NT. It is surely inconceivable that a soul already invested with a glorified body should be recalled to exchange it for an earthly one.

(3) *The two resurrections.*—We have already seen under OT that this expectation belongs to the earlier stages of the doctrine. First came the hope of resurrection for righteous Israelites, and it was only by degrees that the expectation was extended to wicked Israelites, and afterwards to the Gentiles. In Lk 14^{14} we have perhaps some sanction given to a distinction between the resurrection of the righteous and that of the wicked, and in Lk 20^{35} they that are accounted worthy to attain that world and the 'resurrection from the dead' are spoken of as (all of them) 'sons of God.' The conclusion to be drawn is, not that Christ taught that only the righteous will be raised, but that their resurrection is to be thought of as separate from that of the wicked. This distinction seems to be confirmed by Jn 5^{29}, and to be followed by St. Paul in Ac 24^{15}. With this clue we can scarcely fail to see the same thought in 1 Th 4^{16}, where the resurrection of the dead in Christ is spoken of quite without reference to any general resurrection, though this must not be inferred from the word 'first.' This word is correlative to 'then' (ἔπειτα), which introduces as the second event the 'rapture' of the living. Again, in 1 Co $15^{23.24}$ there seems to be a distinction between the phrases 'they that are Christ's' and 'the end,' which latter expression may cover the general resurrection and the judgment. Lightfoot (on Ph 3^{11}) distinguishes firmly between ἡ ἐξανάστασις ἡ ἐκ νεκρῶν, ἀνάστασις ἐκ νεκρῶν on the one side, and ἡ ἀνάστασις τῶν νεκρῶν on the other; the former two phrases being equivalent to ἀνάστασις ζωῆς, and the latter phrase to ἀνάστασις κρίσεως, Jn 5^{29}. And indeed it would be hard to explain St. Paul's words, Ph 3^{11} 'if by any means I may attain,' if we suppose that what he desired to attain to was merely that resurrection which is certain for all. The only other explanation of such an aspiration

is that he had given up belief in a resurrection of the wicked. On the whole, it appears that there must be some distinctive character in the resurrection to life, both as to causation and nature, which has not yet been brought out adequately in theology. Thus we are led to return to the difficulty stated above (ii. A) as arising from the teaching of the Lord in Jn 5 and 6. Christ's promise to raise His hearers in the last day is conditioned by belief on the Son (Jn 6^{40}), and their resurrection is represented as an act of grace extended to them by Christ (Jn 5^{21} $6^{44, 54}$), although it is also said that 'all who are in the tombs shall hear his voice and shall come forth' (5^{29}). Now St. Paul's teaching distinctly follows the same line: 'He that raised up Christ Jesus from the dead shall quicken also your mortal bodies through (or because of) his Spirit which dwelleth in you' (Ro 8^{11}), which limits this Divine operation to those in whom the Holy Spirit dwells. 1 Co 15^{44-46} is a fuller statement of the same thought. The body there spoken of is spiritual, ***i.e.*** a fit organ for the spirit, a description which cannot refer to any but the saved. 1 Co 15^{22} has been quoted on the other side as proving that all (both righteous and wicked) shall be made alive in Christ. But 'all' probably means all who are already in relation to Christ as believers. See Meyer, *Kommentar*^{6}, ed. Heinrici, on the verse. It must be acknowledged that the line of teaching in the above passages makes strongly at first sight for a resurrection of the righteous only, and, in short, for the doctrine of conditional immortality. But inasmuch as this view can be carried through only by dint of very rough dealing with the text of the NT in several passages, *e.g.* Jn 5^{29}, it may be concluded that while 'life' (Jn 6^{40}) and its equivalent, the indwelling Spirit (Ro 8^{11}), are both the cause and the earnest of resurrection for believers, they are nevertheless not indispensable to such a resurrection as is involved in the presentation of the rest of mankind in an embodied state before their Judge.

(4) From the doctrine of two resurrections, in whatever form it be accepted, arises the question, Will there be an interval between them, and if so what occurs in it? 1 Co 15^{24-26}, arguing from Ps 110^{1}, seems to imply that there is an interval during which Christ subdues all His enemies. A much more definite statement occurs in Rev 20^{4-6}, where the interval is a thousand years—'the rest of the dead lived not till the thousand years should be finished.' In this passage the first resurrection is placed at the beginning of the millennium, and at the end of it follows not a second resurrection but the 'second death.' It is beyond the scope of this article to show that in the first three centuries belief in a millennial reign of Christ on earth was generally accepted in the Church. See esp. Justin, *Dial.* lxxx. 1; Iren. v. 33 ff. The interpretation given by Augustine* to Rev 20^{1} is that the first resurrection is the spiritual awakening which began to work in mankind after the coming of Christ, *i.e.* the resurrection in its mystical aspect; and that the millennium of Rev 20 is the period from that awakening onwards. He supports this explanation of the reign of the saints by the constant use in NT of 'kingdom' as equivalent to the Church militant. This is hardly satisfactory as an exposition of the passage in question. It is rather an exposition of passages in the Prophets and the sayings of Christ which underlie Rev 20; and as such it has real value. The history of the Church has been a history of the subjugation of the world to Christ, slow but progressive. Such a view, however, if adopted in reference to Rev 20, would contradict the identification of 'the first resurrection' with 'the resurrection of the just,' which must, so far as we can see, be taken in other passages to mean a literal resurrection. The interpretation of Rev 20 is beset with difficulties and contradictions, which are well stated by Milligan, *Lectures on Apoc.*, Lect. vi. The suggestion of a considerable interval of time between the resurrection of the just and that of the unjust has therefore no secure basis. The significant contribution of the Apocalypse is the clearness with which the resurrection of the wicked for judgment appears in it, which can hardly be dismissed on the ground that the book is ultra-Judaic. See, further, art. MILLENNIUM.

There remains to be dealt with in a few words what is probably the latest book in the Canon (1 Jn 3^{2}). St. John first disclaims knowledge of the nature and conditions of our future state, and then in three words, *ὅμοιοι αὐτῷ ἐσόμεθα* ('we shall be like him'), gives the substance of the Christian doctrine of the resurrection of the dead. Our resurrection will be on the pattern, so to speak, of His. Not only does His resurrection answer all doubts as to the possibility of resurrection for us, but it also answers sufficiently the questions in which those doubts express themselves, namely, as to 'how' and 'wherewith.' In one respect the parallel between His resurrection and ours appears to fail. But a little reflexion will show that the difference involved in the reanimation of a body not yet decayed, as was the case in His resurrection, and the clothing of the soul with a body which has to be reconstituted, is of no great weight, inasmuch as the change which passed on the Lord's human body at resurrection must have been of so fundamental a character, that although outward identity was preserved, yet the natural body had given place to something wholly different.

The extenuation of the Christian doctrine of the resurrection of the dead into a natural or conferred immortality of the soul to avoid perplexities arising from the limitation of our knowledge, evacuates the force of St. Paul's teaching as to the ideal sanctity of the human body, *e.g.* 1 Co 6^{14}, and sacrifices the moral value of a sense of its high destiny. Again, it breaks up the Pauline conception of man as body, soul, and spirit, all capable of being preserved entire without blame (1 Th 5^{23}). Even if we hesitate to accept St. Paul's psychology, we must confess that the only self which we know is a self constituted of body as well as soul. St. Paul's expression of Christian hope is not deliverance from the body, but redemption of the body. The redemption of the body is the last stage in the great process of adoption (*υἱοθεσία*) by which we are made 'sons of God' (Ro 8^{23}).

LITERATURE.—W. R. Alger, *Critical History of the Doctrine of a Future Life*, with Bibliography by Ezra Abbott (the latter also pub. separately); Schultz, *OT Theology* (Eng. tr.), vol. ii. pp. 382–393; Beyschlag, *NT Theology* (Eng. tr.); Schürer, *HJP* § 29, 'Messianic Hope'; Schwally, *Das Leben nach dem Tode*; Teichmann, *Die Paulinischen Vorstellungen von Auferstehung und Gericht*; Cheyne, *Origin of the Psalter*, Lect. viii. part ii.; Commentaries on 1 and 2 Co, especially Meyer's *Kommentar*, ed. Heinrici, Schmiedel's *Hand-Commentar*, and Klöpper's *Second Corinthians*; articles in Herzog, *PRE*^{2}, by Kübel, and in Hauck, *PRE*^{3}, by Schaeder; articles on ESCHATOLOGY in present work; Westcott, *The Gospel of the Resurrection*; Sir G. G. Stokes, *Immortality of the Soul* (a short pamphlet). By far the most important modern works are Salmond's *Christian Doctrine of Immortality*; and, on different lines, Charles' *Eschatology, Hebrew, Jewish, and Christian*, with which should be read the same author's *Book of Enoch*. See also Thackeray's *Relation of St. Paul to Contemp. Jewish Thought*, ch. v. (published after the foregoing art. was in type). Fuller accounts of the literature will be found at the end of the three articles on ESCHATOLOGY.

REU (רְעוּ; LXX and NT Ῥαγαύ, hence AV in Lk

---

* 'De hoc ergo regno militiæ, in quo adhuc cum hoste confligitur, et aliquando repugnatur pugnantibus vitiis, aliquando et cedentibus imperatur, donec veniatur ad illum pacatissimum regnum, ubi sine hoste regnabitur; et *de hac prima resurrectione quæ nunc est*, liber iste (*sc.* Apoc.) sic loquitur.'—Aug. *de Civ. Dei*, xx. 9; and see also vi.–x., which are full of interest throughout.

3^{35} Ragau).—The son of Peleg, Gn 11^{18-21}, 1 Ch 1^{25}, Lk 3^{35}. The ethnological signification of the name is uncertain. Von Bohlen has even suggested its identity with *Rhages* in Media; Ewald (*Hist.* i. 268, Eng. tr.) conjectures *Arghana* at the sources of the Tigris; some think of *Rughwa* in the Shammar mountains in Arabia (see Sprenger, *Geog. Arab.* 233, 294), others of the Aramæan *Ru'ua* in S. Babylonia, often mentioned in the Assyrian inscriptions from the time of Tiglath-pileser II. onwards (see Delitzsch, *Paradies*, 238 ff.; Schrader, *KAT*² 117 [*COT* i. 102]). Mez (*Gesch. der Stadt Ḥarrân*, 23) makes Reu the name of a god; but see Dillm. *Genesis, ad loc.* J. A. SELBIE.

REUBEN (רְאוּבֵן; LXX Ῥουβήν [E in Gn 30^{14} Ῥουβίμ]; but Jos. *Ant.* I. xix. 7, etc. Ῥούβηλος, Syr. [Lee] ܪܘܒܝܠ *Rûbîl*, and similarly [so Dillmann on Gn 29^{32}] in Arab. and Eth. Versions and some Gr. MSS Ῥουβίλ, Ῥουβήλ).—The etymology is quite uncertain; MT spelling makes the name = 'Behold a son.' Gn 29^{32}, playing upon the form of the word, finds in it a suggestion of 'He hath looked upon my distress' (*rā'ā bᵉ'onyî*), and possibly also of 'He will love me' (*ye'ĕhābhanî*). Josephus (*l.c.*) states that the word meant, 'It had happened to her according to the compassion of God,' *i.e. El.* None of these derivations are probable. Baethgen (*Beiträge*, p. 159) prefers the reading Reuben, and sees in it a strengthened form of the Arabic proper name *Ru'ba*, found in an African inscription as the name (in the form *Rubatis*) of a Palmyrene. If *Reubel* is read, he would explain it as *re'u-bel* or *re'u-b-el*, 'seen by [cared for by] Bel or El,' and not, as some have taken it (with Gad and Asher), as the name of a god. Dillmann (on Gn 29^{32}) prefers the reading *Reubel*, and connects it with Arab. *ri'bâl*, 'wolf'; Ball (on Gn 29^{32}, *SBOT*) suggests a connexion with the Egyptian *ra-uban*, but prefers to derive from Arab. *ra'ûb*, 'a chief who mends matters, a big, portly chief,' from *ra'ba*, 'to mend.' The form רב־אל occurs as a proper name in Aramaic inscriptions (Lidzbars , p. 367); and it seems possible that, whichever reading is preferred, the root רב 'great' underlies the word (note Reuben's position as firstborn). Cf. Lagarde, *Onom. Sacra, s.v.*; Gray, *HPN* pp. 65, 124.

In J, Reuben is the firstborn of Jacob, and the son of Leah, Gn 29^{32}; he finds mandrakes for her, 30^{14}; and lies with Bilhah, the slave-girl whom Rachel gave to Jacob as a concubine, 35^{22}. Perhaps in the original narrative of J this episode was placed after Jacob's death, and was a legitimate incident of Reuben's succession to his father (Addis, but cf. below). In the Blessing of Jacob (possibly incorporated by J in his work), Gn $49^{3f.}$, in the text as it stands, Reuben is the firstborn, and is denounced for the act of incest.

In E, Reuben appears only in the story of Joseph, as making an unsuccessful attempt to save him from his other brothers, $37^{22. 29}$,* and as offering his sons as pledges for the safety of Benjamin.

In P, Reuben is Leah's son and Jacob's firstborn, 35^{23}, $46^{8. 9}$ = R, etc., 1 Ch 2^{1}. Gn 48^{5} apparently implies that the birthright was transferred from Reuben and Simeon to Ephraim and Manasseh. This is expressly stated of Reuben in 1 Ch 5^{1}, and his incest is given as the reason.

Reuben is often regarded as merely the eponymous ancestor of the tribe, and the primitive traditions as tribal history cast in the form of personal narrative. See next article.

W. H. BENNETT.

REUBEN (Tribe), **REUBENITES, CHILDREN OF REUBEN,** derivatives, etc., of *Reuben*, *Roubel*, etc.—(Cf., throughout, GAD for the treatment of matters common to the two tribes, which is not, as a rule, repeated here).

i. EARLY HISTORY.—The relation of Reuben to the other tribes is indicated genealogically by the statement that Reuben was the firstborn, the son of Leah, that he committed incest with Bilhah, and that the birthright was transferred to Ephraim and Manasseh; *i.e.* in early times Reuben was the most powerful tribe and enjoyed the hegemony, which passed at a later period to Ephraim and Manasseh. The incest incident is variously interpreted. Either the tribe retained a lax sexual morality abandoned by its fellows; or it in some way assailed the rights of the Bilhah tribes, Dan and Naphtali. If the latter view is taken, the reference must be to events before the Exodus; otherwise it is impossible to determine whether these traditions refer to events before or after the Conquest. In the narrative of the rebellion of the Reubenite chiefs Dathan and Abiram against Moses (Nu 16, JE), we may have a reminiscence of an attempt of Reuben to assert its ancient rights as premier tribe.

As a 'son' of Leah, Reuben is grouped with Simeon, Levi, Judah, Issachar, Zebulun, and Dinah. This arrangement does not agree with any known geographical or political conditions, and may be a reminiscence of the state of affairs before the Exodus.

In P, etc. (Gn 46^{9}, Ex 6^{14}, Nu 26^{5}, 1 Ch 5^{3}), the sons or clans of Reuben are Hanoch, Pallu, Hezron, and Carmi; and, at the Exodus, the prince of Reuben is Elizur ben-Shedeur (Nu 1^{5} 2^{10} 7^{30} 10^{18}), and the Reubenite spy is Shammua ben-Zaccur (Nu 13^{4}). Buchanan Gray (*HPN* p. 197) is inclined to regard Shaddaiur [Shedeur] as one of a set of names which are 'archaic artificial formations,' not improbably created by the author of P, rather than 'names actually current at any period.' He seems to favour a similar view as to Elizur (p. 199). P also tells us that Reuben numbered 46,500 (Nu 1^{21} 2^{11}) at the first census, and at the second 43,730 (Nu 26^{7}). Reuben occupies the first place in Nu $1^{5. 20}$ 26^{5}, but the fourth place in 2^{10} 7^{30} 10^{18}. In the order of marching in the wilderness, Reuben headed the 'camp of Reuben,' which was on the south side, and also included Gad and Simeon, Nu 2^{10}.

ii. THE CONQUEST.—Reuben was associated with Gad in the occupation of Eastern Palestine, in co-operation with the other tribes in the Conquest of the West, and in the return across the Jordan, and the various incidents connected with the erection of a great altar (see GAD ii.).

iii. THE TERRITORY OF REUBEN; cf. GAD iii., *Map* and *Table of Cities.*—Besides minor references, we have two main accounts of the territory: (*a*) Nu $32^{37. 38}$ (JE) 'The Reubenites built Heshbon, Elealeh, Kiriathaim, Nebo, Baal-meon (their names being changed), and Sibmah: and gave other names* unto the cities which they builded.' These cities lie in a district about midway between the Jabbok and the Arnon, but nearer to the southern stream. Dibon and Aroer, given to Gad in the preceding paragraph, are to the south of the Reubenite cities; so that the territory of Reuben seems to have been an *enclave* in that of Gad. There is no trace of these cities being called by different names either before or after—*Beth-baal-meon* is only a variant of *Baal-meon*. The writer cannot intend to tell us that the Reubenites gave to their cities the names of foreign gods, Nebo and Baal; so that those given are the ancient names, and the new names are not mentioned here or anywhere else. Perhaps, as Dillmann suggests, the writer meant that the Reubenites did not use such names, but substituted others unconnected with the worship of false gods. This list may indicate the geographical relations of Gad and Reuben at some flourishing period of the Israelite monarchy. (*b*) Jos 13, P (using earlier sources?). The northern boundary of Reuben is a line drawn about E.N.E. eastwards from the northern end of the Dead Sea, or due E. from some point on the Jordan a little farther north. The line passed a little north of Heshbon. The W. boundary is the Dead Sea and the Jordan, the S. boundary is the Arnon, the E. boundary is not defined. As far as they have been identified, the cities assigned to Reuben elsewhere in P (Jos 20. 21) and in 1 Ch 6 fall in this district. The statements of P may not rest upon any actual knowledge of historical geography, but state a theory as to the legitimate claims of Reuben. (*c*) In 1 Ch $5^{8.12}$ the Chronicler (so Kittel, *SBOT*) tells us that a Reubenite clan Joel (so apparently) occupied Aroer, as far as Nebo and Baal-meon; but also mentions a Gadite clan Joel. If these statements rest on ancient tradition, we have a trace of the confusion arising from the close association of the two tribes: clans and territories were reckoned sometimes to the one, sometimes to the other.

---

* In 37^{21} *Reuben* has been substituted for *Judah* by an editor.

* 'Gave other names' often omitted by critics as a gloss.

The district assigned to Reuben is described under MOAB.

iv. HISTORY AFTER THE CONQUEST.—It is difficult to determine how far Reuben had a history separate from that of Gad. In Nu 32 and in the narratives in Joshua, Reuben and Gad are constantly associated, and, as we have seen, were somewhat intermingled in their territorial settlements. This relationship probably arose out of the arrangements made during the period of the Conquest, and were not due to any previous special connexion between the two tribes; Reuben is a 'son' of Leah, Gad of Zilpah, Rachel's slave. P's usual grouping (Nu 2^{10} etc.) — Reuben, Simeon, Gad—in the history of the Exodus is a reflexion of later conditions. Reuben and Gad [Gilead] are mentioned consecutively in the Song of Deborah as having both held aloof from the war against Sisera. The two tribes are also associated in 2 K 10^{33} as 'smitten' by Hazael, and in 1 Ch 5^{26} as carried captive by Tiglath-pileser. On the other hand, they are kept quite separate in the Blessing of Jacob (Gn 49) and the Blessing of Moses (Dt 33); and the latter document shows us that Gad was flourishing when Reuben had been reduced to insignificance. Probably Gad and Reuben were associated at the Conquest, and through the proximity of their territories; but, after the Conquest, the prevailing tendency to lapse from national unity to tribal isolation loosened the ties between the two eastern tribes, till Reuben was overwhelmed by some catastrophe, and its remnants became absorbed in Gad.

Apparently, at and immediately after the Conquest, Reuben was still an important tribe. In the Song of Deborah it is referred to before Gad, and at greater length—

'By the watercourses of Reuben
There were great resolves of heart.
Why satest thou among the sheepfolds,
To hear the pipings for the flocks?
At the watercourses of Reuben
There were great searchings of heart.
Gilead abode beyond Jordan' (Jg 5^{15-17}).*

Thus, at this time, Reuben was still much occupied with flocks and herds, perhaps altogether a pastoral, semi-nomadic people; and was too little interested in its western kinsfolk to join the muster against Sisera.

In Jg 20. 21 (R^{Px} on JE) the eastern tribes take part in the war against Benjamin. The Blessing of Jacob, a document of the early monarchy (B.C. 1000–850), opens by referring to Reuben; thus, according to MT—

'Reuben, thou art my firstborn, my might, and the beginning of my strength;
The pre-eminence of dignity, and the pre-eminence of power.
Uncontained as water, thou shalt not have the pre-eminence;
Because thou wentest up to thy father's bed:
Then defiledst thou it: he went up to my couch.'

The sense is obscure, and the text doubtful; but the lines seem to suggest that at this time Reuben was still powerful; but in bad odour with the

'Great were the dissensions in the divisions of Reuben.
Why didst thou remain amid ash-heaps,
Listening to pipings at sheepfolds?
Gilead sat still beyond Jordan.'

other tribes, possibly on account of lax sexual morality (Dillmann), or for political reasons, or because the tribe had in some way violated some Israelite tradition as to religious observances. Jos 22 may be based on some such reminiscences.

Another view is that these lines are an explanation, after the event, of the ruin of the tribe; but, if this were the case, we should expect some more definite and circumstantial reference to the calamity.

In 1 Ch $5^{9f.\ 18-22}$, according to Kittel (*SBOT*), part of the material added by the Chronicler to his sources, we read that, in the time of Saul, the Reubenites had much cattle, and in conjunction with Gad and Eastern Manasseh possessed themselves of the cattle and conquered the territory of the Hagrites, and 'dwelt in their stead till the Captivity' (see HAGRITES). The same stratum of Chronicles (so Kittel) makes the following statements as to the Reubenites in the reign of David. In 1 Ch $12^{23.\ 37}$ amongst the Israelites who came to David at Hebron to make him king were 120,000 from the Eastern tribes; and, according to 1 Ch 26^{32}, David appointed 2700 Levites of Hebron as ecclesiastical and civil officials over these tribes; and 1 Ch 27^{16} states that the chief of the Reubenites in his reign was Eliezer ben-Zichri. No doubt the Reubenites often engaged, with varying success, in border warfare with the neighbouring tribes; and tradition may have preserved reminiscences of a victory over the Hagrites. The statistics are probably obtained by the Chronicler's familiar conjectural reconstruction of history.

Kittel, however, considers that the statement of 1 Ch 11^{42}, that among David's mighty men was the Reubenite chief Adina ben-Shiza with thirty followers, is derived from some ancient source no longer extant.

According to an ancient source preserved in 1 K 4^{7-19}, Solomon divided the country into twelve districts, three of which lay east of Jordan. The southernmost is described as 'the land of Gad (so Benzinger with LXX [B]; MT has 'Gilead'), the country of Sihon';* Reuben, in common with the majority of the tribes, is not mentioned. At the disruption Reuben fell to the Northern kingdom, 1 K 11^{31}.

In the Blessing of Moses (Dt 33), a document composed in the Northern kingdom under either Jeroboam I. or II., Reuben is still mentioned first; perhaps, however, only through the influence of the earlier Blessing of Jacob. The verse runs—

> 'Let Reuben live, and not die;
> Yet let his men be few' (RV).†

This verse implies that Reuben had become altogether insignificant. So, too, the Moabite Stone mentions most of the Reubenite cities as occupied or conquered by Moab; it speaks of the Gadites, but does not name Reuben. Hence before the time of Mesha (a younger contemporary of Ahab), Reuben had long lost the country to the east of the Dead Sea, if it ever held it, and was merged in Gad. When or how Reuben lost its power and prosperity we do not know; the change may have been gradual. On the one hand, Reuben was the outpost of Israel towards the S.E. deserts, it was exposed to hostile neighbours on both its southern and eastern frontiers, and constantly bore the brunt of the predatory habits of the Bedawîn; on the other, it was largely isolated from the other tribes geographically, and, according to the 'Blessings,' had alienated their sympathies. Reuben may have suffered through the weakening of the power of Israel in the latter part of the reign of Solomon, and at the time of the disruption.

The Chronicler (1 Ch $5^{6.\ 22.\ 26}$) associates the Reubenites with Gad and E. Manasseh, as occupying E. Palestine, till the two and a half tribes were carried captive by Tiglath-pileser, and mentions Beerah ben-Baal of the clan Joel as chief of the Reubenites at that time. No doubt a remnant of Reuben remained amongst the Gadites up to this captivity.

Certain indications suggest that other Reubenite clans took refuge in Judah, and became merged in that tribe. Two of the clans of Reuben as given in P and Chron. bear the same names as two clans of Judah, viz. Hezron and Carmi,* Gn $46^{9.\ 12}$, 1 Ch 4^{1}; and P also mentions (Jos 15^{6} 18^{17}) the stone of Bohan the Reubenite as a landmark on the boundary between Judah and Benjamin.

Ezk $48^{6.\ 31}$ makes provision for Reuben in the restored Israel; and Reuben is one of the twelve tribes enumerated in Rev 7^{5}. Besides GAD, cf. MOAB. W. H. BENNETT.

REUEL (רְעוּאֵל; LXX Ῥαγουήλ).—1. A son of Esau by Basemath, Gn $36^{4.\ 10.\ 13.\ 17}$, 1 Ch $1^{35.\ 37}$. 2. Ex 2^{18}, Nu 10^{29} (AV in the latter Raguel). See HOBAB and JETHRO. 3. The father of Eliasaph, the prince of Gad, Nu 2^{14}, called (probably by mistaking ר for ד) DEUEL in 1^{14} $7^{42.\ 47}$ 10^{20}. The LXX has everywhere Ῥαγουήλ. 4. A Benjamite, 1 Ch 9^{8}.

REUMAH (רְאוּמָה; A [B is wanting here] Ῥεηρά, *D* Ῥεημά).—The concubine of Nahor, Abraham's brother, Gn 22^{24}.

i. INTRODUCTION.—1. *Title.*—The first word of the Book of Revelation gives the current title not only to this book, but to the class of literature to which it belongs. The word 'apocalypse' does not occur again in Rev., and does not here signify a literary product. The title which the book

---

[*] 'Og,' etc., is a late gloss. The last clause of v.^{19} is obviously corrupt both in MT and LXX; Benzinger emends 'A prefect-general was appointed over all the prefects.'

[†] Improbable renderings are: 'And let *not* his men' (RVm), and 'May he not die, or his men become few' (Dillm.). See, further, on this passage, art. SIMEON (Tribe).

[*] Unless we read Chelubai in 1 Ch 4^{1}.

suggests is rather 'the words (*or* the book) of the prophecy of John' (1^{3} 22$^{7.\,10.\,18.\,19}$). Certainly the title 'Apocalypse of John' (ℵC, etc.) implies a different use of the word 'Apocalypse' from that which the NT attests. The book is introduced not as the Apocalypse of John, but as 'an apocalypse of Jesus Christ.' God is the ultimate author of the revelation. He gave it to Christ, and Christ, through His angel, to His servant John, who therefore testifies to that which is ultimately 'the word of God,' and more immediately 'the testimony of Jesus Christ,' though it can also be called 'whatsoever things he saw' (1^{2}, cf. $^{11.\,19}$). The phrase 'apocalypse of Jesus Christ' here means, not a revelation of Him (*i.e.* the Parousia, as in 1 Co 1^{7}, 2 Th 1^{7}, 1 P 1$^{7.\,13}$ 4^{13}), nor a revelation concerning Him, but a revelation by Him concerning the future (cf. Gal 1$^{12.\,16}$, where the revelation is by Christ, but also concerning Him —a self-revelation).

2. *Canonicity.*—There is probably no trace of Rev. in the Apostolic Fathers (Zahn, *Gesch. d. NT Kanons*, i. 954 f.). Ign. *ad Eph.* xv. 3 does not necessarily imply Rev 21^{3}; still less does *ad Phil.* vi. 1 require Rev 3$^{12\text{ff.}}$. Papias is the first to attest, not the apostolicity, but the credibility of Rev., according to Andreas, bishop of Cæsarea (Cappadocia), who in his commentary cites two remarks of Papias on Rev 12^{7}. Their source, however, is unknown, and Euseb. does not directly mention any reference to Rev. by Papias (*HE* III. xxxix.). He does, however, say that Papias based his chiliasm on apostolic statements, which he took literally, instead of figuratively as he should have done. It is true that when Irenæus appeals in favour of the reading 666 (13^{18}) to presbyters who had seen John (*Hær.* V. xxx. 1; Euseb. *HE* V. viii. 5), we naturally think of Polycarp or Papias as his authority. But this is not a matter about which Iren. would naturally remember what, as a boy, he had heard the aged Polycarp say; and if he had been able to appeal to Polycarp, he would have done so by name. It is probably tradition rather than recollection on which he rests.

Justin (*Dial.* lxxxi. 15) is the first to declare that Rev. is by 'John, one of the apostles of Christ' (cf. Euseb. IV. xviii. 8). Melito, bishop of Sardis (170), wrote a lost work on the 'Rev. of John' (Euseb. IV. xxvi. 2). This is important, since Sardis is one of the seven Churches. Theophilus cited Rev. (Euseb. IV. xxiv. 1), and so did Apollonius (Euseb. V. xviii.). Irenæus was a defender of the apostolic authorship of the Gospel, Epistles, and Rev. of John (for Rev. see *Hær.* IV. xx. 11, V. xxxv. 2, 'John the Lord's disciple,' elsewhere simply 'John,' I. xxvi. 3, IV. xiv. 2, etc., or without name). Iren. took his high estimation of the book with him to the West. It was regarded as 'sacred Scripture' by the Churches in Lyons and Vienne in A.D. 177 (Euseb. V. i. 10, 58; Zahn i. 201, 203 f.). Tertullian cites Rev. frequently, and attests its recognition in Africa, as by 'the Apostle John' (*c. Marcion.* iii. 14. 25). Clement of Alex. cites it and other apocalypses also, and puts value upon them. So also does Origen, in spite of his opposition to chiliasm, which he escapes by allegorical interpretation.

For the Roman Church, the eschatology of Hermas is significant for its independence of Revelation. The book stands, however, in the *Muratorian Canon* without suspicion ('John, too, in the Apocalypse, although he writes only to seven Churches, yet addresses all'); and after the elaborate defence of it by Hippolytus against Caius, its canonicity remained established for the Western Church.

But though hardly any other book in the NT is so well attested in the 2nd cent., there were already those who denied its authority, and its place in the Canon of the Eastern Church was long uncertain. The objections appear to have rested on dogmatic grounds, though they required to be maintained by a denial of the apostolic authorship of the book. Marcion, as was inevitable, rejected the book because of its strongly Jewish character (Tert. *c. Marcion.* iv. 5). On the other hand, the Montanists, with their high appreciation of the new Christian prophecy and the strongly eschatological type of their Christianity, held the book in high esteem; and it was in opposition to them that the well-known, long-remaining antipathy of the Eastern Church to Rev. was developed.

Epiphanius (*Hær.* li. 33) tells of a sect which rejected John's Gospel and Rev., and ascribed both to Cerinthus. He calls them *Alogi*, which suggests that the reason for their criticism was the Logos Christology, in which the Gospel, the First Epistle, and Rev. agree. The sect would then be anti-Gnostic, as the choice of Cerinthus for the author would indicate. Epiph. says they supported their view by the fact that there was no Christian Church at Thyatira [Rev 2^{18}], where this sect had its seat. They are further described as being averse to the sensuous and extravagant form of the apocalyptical language, the significance of angels, etc.

Irenæus (III. xi. 9) describes a certain sect which rejected John's Gospel on account of its doctrine of the Paraclete, and not only contended against false prophets, but would exclude prophecy from the Church altogether. Since this ground for the rejection of the Gospel would be even more conclusive against Rev., and since Epiph. himself says that the *Alogi* opposed the Spirit and denied its gifts, Zahn (i. 223–227, 237–262, ii. 967–973) concluded that this was the same sect that Epiph. called Alogi, and that it was an anti-Montanist, rather than an anti-Gnostic, movement. Now Epiph. probably got his information about the Alogi from Hippolytus (*c.* 190–235 A.D. at Rome), who knew a sect which rejected both books because of the support which the Gospel, in its doctrine of the Spirit, and Rev. in its prophetic character, gave to Montanism. Against these Hippolytus wrote in defence of the Gospel and Revelation. He also wrote another book against Caius, a presbyter of Rome, in defence of Revelation. This Caius, in a controversial writing against Proclus the Montanist (Euseb. II. xxv. 6, III. xxviii. xxxi. 4, VI. xx. 3), had evidently rejected Rev., ascribing it, as the Alogi did, to Cerinthus. The citation in Eusebius (III. xxviii. 2) reads: 'Cerinthus, through revelations professing to have been written by a great apostle, brings before us marvels which he falsely claims were shown to him through angels, asserting that after the resurrection there would be an earthly kingdom of Christ, and that men dwelling in Jerusalem will again be subject to desires and pleasures. And being an enemy to the Scriptures of God, he said that a period of a thousand years would be spent in nuptial festivities.' The long dispute as to whether this referred to our Rev. must be regarded as ended by the publication, by J. Gwynn (*Hermathena*, vi. 397–418), of fragments of the reply of Hippolytus to Caius, from which it is evident that Caius, who was not one of the Alogi (not a heretic), argued in detail against the harmony of Rev. with the rest of the NT, using some of the arguments of the Alogi, and in all probability ascribing it, and not some other apocalypse, to Cerinthus (so Zahn, Bousset, Holtzmann, etc., against Gwynn).

Zahn dates the writing of Caius against Proclus about A.D. 210, and the reply of Hippolytus in defence of Rev. about 215. It is evident that Caius did not question the Gospel of John. After this, no Western Church writer seriously questioned Rev. (though see Jerome's position, below).

In the East, Dionysius of Alexandria (A.D. 255), a pupil of Origen, wrote a temperate and scholarly criticism (Euseb. VII. xxv.), in which he argues that Rev. is not by John the apostle. He reviews previous criticisms, evidently among others that of Caius, mentioning the hypothesis that Cerinthus was its author. He does not reject the book out and out, since others valued it, but cannot himself understand it; and proves, by an elaborate comparison as to literary character, language, and composition, that it is not by the author of the Gospel and the First Epistle of John. It is indeed by some holy and inspired man whose name was John. There were many of that name (*e.g.* John Mark), and it is said, he adds, that there are two monuments in Ephesus, each bearing the name of John. The ground of the rejection of its apostolicity by Dionysius was probably in part a sense of its difference from John's Gospel, in part the Hellenist's aversion to sensuous hopes, and to the chiliasm which made room for such hopes.

Eusebius, who gives the argument of Dionysius at some length, evidently sympathized with his view, though his own judgment wavers. He inclines to ascribe Rev. to the Presbyter John of whom Papias wrote (Euseb. III. xxxix.: 'It is probably the second [John], if one is not willing to admit that it is the first, that saw the Apocalypse'). His doubt as to the place of the book, whether among the *Homologoumena* (accepted) or among the *Notha* (rejected), is expressed in III. xxv. 4. He emphasizes the rejection of the book by good churchmen, and does not mention the almost certain use of it by Papias, or the elaborate defence of it by Hippolytus. Yet he cites many words in its favour.

After Euseb. the opposition to Rev. was for a time general in the Syro-Palestinian Church. Cyril of Jerusalem (*Catech.* iv. 33–36) does not name it among canonical books; nor does it appear in the Canon 60 of the Synod of Laodicea (*c.* 360?), nor in Canon 85 of *Apost. Const.* viii. (Zahn, ii. 177 ff., 197 ff., 191 ff.); nor is it in the list of Gregory of Nazianzus (*ib.* 216 f.), nor in the so-called *Synopsis* of Chrysostom (*ib.* 230). Neither Chrysostom nor Theodore of Mopsuestia mentions the book, and Theodoret does not accept it. It does not appear in the *Chronography* of Nicephorus, or in the *List of 60 books* (*ib.* 298, 290 f.). The Nestorian and Jacobite Churches did not receive it (Bousset, p. 25).

The question as to the origin and significance of this attitude of the Syro-Palestinian Church leads back to the striking fact that Rev. (with 2 and 3 Jn, 2 P, Jude) did not originally stand in the Syriac NT (Peshiṭta). It has been supposed that it was still wanting in the Philoxenian version, but Gwynn argues that the version he edited belonged to that translation (*The Apocalypse of St. John in Syriac*, 1897). Was the book, then, wanting in the Canon of the Syrian Church from the beginning? An affirmative answer is made doubtful by the apparent references to Rev. in Ephraem. It is not certain, however, that Ephraem used Rev., the question being involved in questions of text and of authenticity (see Bousset, 21–23). Gwynn (pp. c–cv) believes that the book was excluded 'by ignorance rather than of set purpose' from the Peshiṭta Canon, and remained unknown to Syriac-speaking Christians for perhaps four centuries, except to the few who could read it in Greek, among whom he reckons Ephraem. Even after translation into Syriac, the book never became familiarly known in any of the Syrian Churches. Their religious thought and rich liturgical literature remained practically uninfluenced by it. Bousset thinks the dominance of another type of eschatology, the Apocalypse of Antichrist, helped to effect the exclusion of Revelation.

The Greek Church yielded only slowly to the decision of the Western, and admitted the book into its Canon. In Egypt, where the opposition first developed in orthodox circles, it was sooner overcome. Athanasius, and others after him, recognized the book. The first Eastern commentary, that of Andreas, belongs to the 5th cent., and the next, that of Arethas, to the 9th. Each begins with a defence against doubts as to the canonicity of the book.

In the West, after the elaborate defence of Hippolytus, Jerome alone shows the influence of Eastern doubts. The Eastern Church, he says, receives Hebrews; the Western, Revelation. He inclined to accept it (*Ep. ad Dardanum*, 129), but elsewhere (*in Psalm.* 149) he puts it in a middle class between canonical and apocryphal. This suggestion did not bear fruit until Carlstadt (1520), at the beginning of the Reformation, made a threefold division of NT books, corresponding to that of the OT in Hebrew, and put in the third, least authoritative, class (with the OT '*Hagiographa*'), 2 and 3 John, 2 Peter, Jude, James, Hebrews, Revelation. Of these seven, which are 'of third and lowest authority,' Rev. stands last, on the verge of being apocryphal.

Luther at first (Preface in Translation of NT, 1522) expressed a strong aversion to the book, declaring that to him it had every mark of being neither apostolic nor prophetic. Apostles spoke clearly, without figure or vision, of Christ and His deeds; and no prophet in the OT, to say nothing of the NT, deals so entirely with visions and figures. It is comparable only with 4 Ezra (2 Esdras), and he cannot see that it was the work of the Holy Spirit. Moreover, he does not like the commands and threats which the writer makes about his book ($22^{18.19}$), and the promise of blessedness to those who keep what is written in it (1^3 22^7), when no one knows what that is, to say nothing of keeping it, and there are many nobler books to be kept. Moreover, many Fathers rejected the book; and though Jerome says it is above all praise, and has as many mysteries in it as it has words, yet he cannot prove this. 'Finally, every one thinks of it whatever his spirit imparts. My spirit cannot adapt itself to the book, and a sufficient reason why I do not esteem it highly is that Christ is neither taught nor recognized in it, which is what an apostle ought before all things to do.' Later (1534), Luther finds a possibility of Christian usefulness in it, and gives its message in words well worth quoting: 'Briefly [Rev. teaches that] our holiness is in heaven where Christ is, and not in the world before our eyes, as some paltry ware in the market. Therefore let offence, factions, heresy, and wickedness be and do what they may; if only the Word of God remains pure with us, and we hold it dear and precious, we need not doubt that Christ is near and with us, even if matters go hardest: as we see in this Book that through and above all plagues, beasts, evil angels, Christ is still near and with His saints, and at last overthrows them' (translation of Westcott, *Canon*, 1889, p. 483). He still thought it a hidden, dumb prophecy, unless interpreted, and upon the interpretation no certainty had been reached after many efforts. His own interpretation of the book as anti-Papist may have led him to a more favourable opinion of it. But he remained doubtful about its apostolicity (Preface to Revelation in the edition of 1545), and printed it, with Hebrews, James, Jude, as an appendix to his New Testament, not numbered in the index. The other three doubtful books, 2 and 3 John and 2 Peter, it was not so natural to separate from 1 John and 1 Peter. In this way these four books were printed in Luther's Bible as late as the 17th cent. So also in Tindale's New Testament. 'In general the standpoint of the Reformation is marked by a return to the Canon of Eusebius, and consequently by a lower valuation of Hebrews, 2 Peter, 2 and 3 John, James, Jude, and Revelation' (Holtzmann, *Einleitung*, p. 157).

Zwingli regarded Rev. as 'not a Biblical book'; and even Calvin, with his high view of inspiration, does not comment on 2 and 3 John and Revelation. Only gradually was the effort to maintain such a deutero-canonical class of books in the NT given up, as the dogmatic displaced the freer and more historical attitude toward the Bible.

In general it may be said that Rev. has maintained its place in the Canon, in spite of doubts and assaults, not because of its extravagant claims to inspiration and authority, not because of its visionary form, and not because of its eschatology, but rather in spite of all these, which were marks also of the many apocalypses, Jewish and Christian, that the Church rejected.* Nor can it be said that belief in its apostolic authorship kept the book in the NT, for this was very early denied, and could as easily be set aside, as, for example, that of the *Apocalypse of Peter*, which the Church rejected. The real reason, for the sake of which apostolic authorship was maintained, was the consciousness that, on the whole, the religious faith and feeling of the book predominate over its apocalyptical form, and give to apocalyptical language, which the majority cannot understand or accept in its literal sense, practically the value of figure for the emotional expression of Christian faith and hope. It is really as Christian poetry, rather than as the disclosure of mysteries of the unseen world and of the future, that the book has been valued, and, because valued, preserved and canonized by the Christian Church.

A book, however, which has been canonized because of its general contents, and the spirit behind its form, will inevitably be used by many for its details literally taken. So used, Rev. has often had a harmful influence, setting thought upon useless tasks, and stimulating self-centred and morbid hopes and fears. If one puts over against this the wonderful ministry of comfort and strength in times of trial which the book has rendered, he may find justification both for the doubts and for the final decision of the Church regarding its canonicity.

3. *History of Interpretation.*—The history of the interpretation of Rev. is an interesting chapter in

---

* Christianity has been in certain sects and at certain times apocalyptical in temper, but not on the whole. Many apocalypses were treasured as sacred by sects and at times, which were left aside by the Church as a whole and in the end.

Church history;[*] but it is an inseparable part of a much larger chapter which it would be quite impossible to write here. Harnack (*Hist. of Dogma*, i. 129 ff., 167 ff.) describes the two contrasted, though not mutually exclusive, conceptions of Christianity, the eschatological and the spiritual, the relations of which make one of the chief themes in the history of Christian thought. The earlier eschatological view gave way, especially under the influence of Greek thought, to the spiritual conception of salvation. Chiliasm, of which Rev. was the one clear and authoritative source, 'is found wherever the gospel is not yet Hellenized.' It is evident that where Hellenistic views prevailed Rev. must be either rejected or spiritually interpreted.

Among chiliasts, besides Cerinthus, the heretic, are Papias, Justin, Irenæus, Hippolytus, Tertullian—the early defenders of the authority of Revelation. Origen, on the other hand, could receive the book and yet oppose a chiliastic conception of Christianity. The Eastern Church in general, as we have seen, followed the easier method of rejecting or neglecting the book. In the West, Victorinus (*c.* 303) commented on the book in a chiliastic (*i.e.* literal) sense; but a greater influence was exerted by the Commentary of Tyconius (before 380), whose interpretation is spiritualistic. Through him 'the Latin Church finally broke with all chiliastic inclinations and all realistic eschatology' (Bousset, 63). The 'thousand years' denote the present period of the Church between the First and the Second Coming of Christ. He was followed by Augustine (*de civitate Dei*, xx. 7–17) and Jerome.

The possession of world-rulership by the Church took away the ground for chiliastic hopes, and removed both the circumstances and the temper out of which Rev. came. There was, however, a revival of the prophetic spirit in the Middle Ages, in reaction against ecclesiasticism and the secular spirit.

From the protesting order of the Franciscans, who attempted to recover the character and spirit of apostolic Christianity, came a chiliastic interpretation of Rev. about A.D. 1200, by Joachim of Floris. In Commentaries on Jeremiah and Isaiah under his name the end of the world was fixed at 1240 (Rev 11^3 12^6) and then at 1290. The woman (Rev 17) was already interpreted of the Romish Church by these pre-Reformation reformers, and this, together with a like application of the beasts of ch. 13 to Rome and the Pope, inevitably became a standing feature of Protestant commentators from Luther onwards; with exceptions, such as Grotius (1644) and Hammond (1653–1659).

Over against this enticing but flagrant misuse of the book, Catholic scholars in part sought for other historical applications of these figures (Turks, Mohammed, etc.); but in part made a beginning of a more correct method of interpretation by seeking in events of the author's own time, in the Jews and the Roman empire, for the clue to his predictions.

So especially Alcazar (1614), a Spanish Jesuit of Antwerp, who maintained that Rev 1–11 was aimed against Judaism, chs. 12 ff. against Rome. This correct effort to interpret Rev. in the light of the events of its own time was carried forward by Grotius, Hammond, Clericus (1698), Wetstein (1752) and others, at first with too much reference to Judaism and the fall of Jerusalem, but finally with a growing recognition of Rome as the object of the book's denunciations (Semler (1769, etc.), Corrodi (1780), Eichhorn (1791)). The reference to Nero, in the wounded head (ch. 13), which had been found already by Victorinus (303), and again in a Jesuit commentary (Juan Mariana), was introduced into Protestant exegesis by Corrodi. This so-called *contemporary-historical* (by some called '*præterist*') method of interpretation (*i.e.* by reference to historical events of the writer's own time) was most fully carried to completion in the great works of Lücke (*Versuch einer vollstandigen Einleitung in die Offenbarung*, 1832, 2nd ed. 1852), Bleek (*Vorlesungen über die Apok.* 1862), and Ewald (Comm. in Latin, 1828, *Die Johann. Schriften*, 1862). So also Volkmar (1862), Düsterdieck (Meyer, 1859–87).[†]

In general these writers date the book before 70 (Rev 11$^{1-13}$); regard it as written chiefly against Rome; and find in it a prediction of the return of Nero. The interpretation of the number 666 as *Nero Cæsar* seems to have been made independently by several scholars (Fritzsche, Benary, Hitzig, Reuss, Ewald (?)). With this understanding and dating of Rev., Baur affirmed its apostolicity, and made it a monument of the original Jewish Christianity.

Against this method conservative theologians still attempted either new interpretations of the book as a summary of Church history (the '*Church-historical*' or '*continuously historical*' method, Hengstenberg, Ebrard, etc.), or a reference of its predictions to events still future, the end of the world (the *endgeschichtliche*, '*futurist*' method, Kliefoth, Zahn). A method which is in some sense intermediate between these is one that sees in Rev. not definite events in Church history, but symbolic representations of good and evil principles, their conflict and the coming victory of the good (Auberlen's *reichsgeschichtliche Methode*).

A similar standpoint is occupied by Milligan (*Commentary on the Apocalypse; The Rev. of St. John*, Baird Lectures, 1886; *Discussions on the Apocalypse*, 1893; *The Bk. of Rev.* [Expositor's Bible], 1899. The Apoc. embraces the whole period from the First to the Second Coming of the Lord. It sets before us within this period the action of great principles and not special incidents. We must interpret in a spiritual and universal sense that language of the Apoc. which appears at first sight to be material and local). So also Benson (*The Apocalypse*, 1900) maintains that Rev. unveils Jesus Christ as present in this world, and His enemies, Satan and his agents, who are all principles not persons or historical characters, 'the principles which maintain the self-deceiving half of human nature in its death struggles with a Divine Wisdom which slowly vanquishes it' (p. 176).

It is, of course, true that beneath every book there are certain fundamental beliefs and hopes capable of being generalized and taken out of all historical relations. It is true also, as we shall see, that the allusions, for example, to Nero are not so clear as we should expect of one who set out to describe him in symbol. But the principles which these writers look for are still less clearly symbolized, and it is a fundamental mistake to proceed upon the assumption that such principles are everywhere intended, and also that the teachings of Rev. must agree with all other teachings of the NT and with the judgment of the Christian consciousness. The history of the book in the Canon might well have kept others from the bondage of this assumption, as it kept Luther and the early Reformers. But the assumption is no longer possible for those who approach Biblical study in a historical spirit. For such, the effort to find in the book allusions to events of its author's time is natural, and this method is destined to general acceptance. Of late, however, a growing conviction has arisen that this *contemporary-historical* method is not sufficient by itself to solve all the problems of the book.

The first question to arise concerned the unity of the book. As prophetic books like Isaiah and Zechariah and apocalypses such as Enoch are composite, it was natural to raise the question with reference to Rev., and to remove by literary analysis the unevenness in structure and the want of harmony, both in historical references and in doctrinal views, that had troubled interpreters. Theories of composite origin have been advanced in two general forms: (1) The book is in its present form a unity, but its author made use of various documentary or traditional sources, of Jewish or Christian origin, incorporating them in his work. (2) The present book is the result of one or more revisions of an older Jewish or Christian apocalypse, or more than one.

Weizsäcker, who gave the impulse to this effort at literary criticism, held the former of these two views:[*] 'We have in this writing, which is as certainly pseudonymous as are all apocalypses, a compilation, which in its origin is already a compilation; and in its various strata, which certainly reach far back, it testifies in itself alone to an extensive practice of (Christian) prophecy' (*Theol. Lit.-Zeitung*, 1882). The first efforts after detail were, however, made on the basis of the second theory.—Völter, a pupil of Weizsäcker, in a series of works (*Die Entstehung der Apok.* 1882, 1885; *Das Problem der Apok.* 1893), attempted to construct a primitive apocalypse of A.D. 65–66, which the author revised after Nero's death. Three or four other revisers added to the work, to the last of whom the letters are due. Völter argues on the basis of (1) want of formal and material connexion, (2) reference to different historical situations, (3) doctrinal differences, especially as to Christology. Some of his observations are just, but his solution of the difficulties is arbitrary and unconvincing.—Vischer (*Die Offenbarung Johannis, eine jüdische Apokalypse in christlicher Bearbeitung*, 1886) put forth a simpler and more attractive hypothesis, which, appearing with Harnack's hearty approval, won many adherents. He believed Rev 4^{1}–22^{5} to be a Jewish apocalypse set in a Christian framework (1–3. $22^{6\text{-}21}$) with a slight Christian revision ($5^{9\text{-}14}$ $7^{9\text{-}17}$ 12^{11} $13^{9.\,10}$ $14^{1\text{-}5.\,12.\,13}$ 15^{3} 16^{15} 17^{14} $19^{9.\,10.\,13b}$ $20^{4\text{-}6}$ $21^{5b\text{-}8}$ and all references to the Lamb). His starting-point is Biblico-theological, the presence in the book of Jewish by the side of Christian ideas. Harnack (*Nachwort*) admits that this does not in itself involve Jewish authorship, but regards that hypothesis as necessary in this case.

---

[*] See Lücke, *Einl. in die Offenbarung*^{2}, 1853; Holtzmann, *Hand-Commentar*, iv. p. 280 ff.; Bousset, *Kommentar*, pp. 51–141.

[†] To Lücke was especially due the recognition of the fact that Rev. is not an isolated book, but is one of a class, that it belongs in kind to the Jewish apocalypses, and is to be interpreted as they are. The fact that Daniel contains allusions to the Greek empire and to Antiochus Epiphanes was a strong reason for accepting the apparent references in Rev. to Rome and Nero.

[*] The history of these efforts has been told by Holtzmann, *Jahrb. f. Prot. Theol.* 1891; Barton, *AJTh*, 1898; A. Meyer in *Theol. Rundschau*, 1897; and in fuller detail by Rauch, *Die Offenbarung des Johannes*, 1894, and Bousset, *Komm.* p. 127 ff.

Weyland (*Omwerkings en compilatie-hypothesen toegepast op de Apocalypse van Johannes*, 1888) elaborated Vischer's theory by supposing two Jewish sources. The oldest (ב) contained (omitting slight and obvious Christian words or phrases) 10. $11^{1\text{-}13}$ 12. 13. $14^{6\text{-}11}$ $15^{2\text{-}4}$ 16. (part, esp. $^{13.\,14}$) $19^{11\text{-}21}$ 20. $21^{1\text{-}8}$, *i.e.* the little book, Jerusalem and the two witnesses, the appearance of the dragon and beasts and their final overthrow, the last judgment and the new world. The later source (א) contained $1^{10.\,12\text{-}17.\,19}$ 4. $5^{1\text{-}7}$ 6. $7^{1\text{-}8.\,9\text{-}17}$ (part) 8. 9. $11^{14\text{-}18}$ $14^{2.\,3}$ 15^{5} $16^{17b.\text{-}20}$ $14^{14\text{-}20}$ 17. 18. $19^{1\text{-}6}$ $21^{9\text{-}27}$ $22^{1\text{-}11}$, *i.e.* the seven seals and trumpets, the fall of Babylon (Rome), and the new Jerusalem. These were united by a Christian redactor who added (besides occasional phrases) $1^{1\text{-}9.\,18.\,20}$ 2. 3. $14^{1\text{-}5}$ $16^{1\text{-}17a}$ $19^{7\text{-}10}$ $22^{7a.\,12.\,13.\,16\text{-}22}$.

Weizsäcker in his *Apostolic Age* rejected these and similar efforts at analysis, and held to his original suggestion that the book is a unity; but its author has made use of various older materials, apocalyptical visions, fragmentary in character, and has introduced these in such a way as often to interrupt his plan. Such pieces are $7^{1\text{-}8.\,9\text{-}17}$ $11^{1\text{-}13}$ $12^{1\text{-}11.\,12\text{-}17}$ 13. 17.

Sabatier (*Rev. de Théol. et de Phil.* 1887, and *Les origines litteraire et la composition de l'apoc. de St. Jean*, 1888) defends a similar view. The Christian writer introduced foreign oracles into his work, viz.: $11^{1\text{-}13}$ 12^{1}–13^{18} $14^{6\text{-}20}$ $16^{13\text{-}16}$ 17^{1}–19^{2} (18^{24}?) 19^{11}–20^{10} 21^{9}–22^{5}.

Very similar is the view of Schoen (*L'origine de l'Apoc.* 1887).

This view of the composition of Rev., which does justice both to its general unity of plan and style and to the breaks in its plan and the contrasts in its thought, and does not attempt the impossible task of reconstructing complete lost books, has gained the adherence of an increasing number of competent critics. It is the view of Jülicher (*Einleitung in d. NT*, 1894). It is also the view of Gunkel and of Bousset, though these two scholars have carried the problem of the interpretation of Rev. on to a new phase.

On the other hand Spitta (*Offenb. Johannis*, 1889), who had reached his main conclusions independently before the appearance of Völter's work, attempts an elaborate analysis in which every verse and word is ascribed to its source.

The basis of our present book is held by Spitta to be a primitive Christian apocalypse, containing the letters and the seals ($1^{4\text{-}6.\,9\text{-}19}$ 2–3. [omitting the conclusion of each letter, 2^{7}, etc.] 4–6. 8^{1} $7^{9\text{-}17}$ $19^{9b.\,10}$ $22^{8.\,10\text{-}13.\,16\text{-}18a.\,20b.\,21}$). He believes that this was written by John Mark, about 60 A.D. To this a later Christian added two older Jewish apocalypses; one is from the time of Caligula ($13^{3.\,14}$ refers to an illness from which he recovered; 616 [13^{18}] = Γάϊος Καῖσαρ), occasioned by his effort to erect his image in the temple ($13^{5\text{-}8.\,12\text{ff.}}$). It contains (*a*) $7^{1\text{-}8}$ $8^{2\text{-}5}$, (*b*) 8^{6}–9^{21}, (*c*) (9^{15}) $10^{1\text{-}7}$, (*d*) $11^{(15)\,19}$ $12^{1\text{-}17}$ 12^{18}–13^{18} $14^{1\text{-}11}$ $16^{13\text{-}20}$, (*e*) 19^{11}–$21^{1.\,5a.\,6a}$. The other Jewish source is put back to the time of Pompey (Israel's first conflict with Rome, and the danger of the temple). It is composed of (*a*) $10^{1b.\,2a.\,8a.\,9b\text{-}11}$, (*b*) $11^{1.\,13.\,15.\,17.\,18}$, (*c*) $14^{14.\,20}$ $15^{2\text{-}4}$, (*d*) 15^{5}–$16^{12.\,17.\,21}$, (*e*) $17^{1\text{-}5.\,6b}$ 18^{1}–19^{8}, (*f*) 21^{9}–$22^{3a.\,15}$. All other parts are from the hand of the reviser.

Spitta's work contains much that is of great value, but scholars generally agree that such minute analysis is impossible, that the book has a greater unity than this theory admits, and that in particular to ascribe the seven seals, trumpets, and bowls to three different hands is to overlook one of the unmistakable characteristics of the final writer. Yet Briggs (*Messiah of Apostles*, 1895, chs. 9–15) goes even further in this direction. His analysis but not his view as to authorship [epistles, seals, bowls, and probably trumpets being attributed by Briggs to one *author*, the Apostle John (pp. 303, 369)] is followed by Barton (*AJTh*, 1898).

It is not to be concluded that the many laborious and ingenious efforts at literary analysis have been without value, even though they have led to no agreeing result. There has been increasing agreement as to certain general points. The book, though probably the work of one writer, is not the original product of one mind or one occasion. It contains sections which appear to be foreign to the rest, and may well be of Jewish origin, though the line between Jewish and Jewish-Christian is one impossible to determine. $7^{1\text{-}8}$ $11^{1\text{-}13}$ 12. 13. 17 quite certainly belong to this category, and there are other sections which may have been taken by the writer in practically finished form from apocalyptical tradition (*e.g.* 18. 20. 21^{9}–22^{5}). This result, however, important as are its bearings on the interpretation of the book, since it relieves us of the necessity of finding one type of religious thought or one historical situation in all parts, by no means solves all or even the more important problems of historical exegesis.

Gunkel (*Schöpfung und Chaos in Urzeit und Endzeit: Eine religionsgeschichtliche Untersuchung über Gen. 1 und Apoc. Joh. 12* (1895)) sharply formulated one of these outstanding problems—that concerning the ultimate origin, the first meaning, and subsequent history of that traditional material from which apocalyptical writers drew. He criticized both the methods in which critical scholars had treated the book—that which looks everywhere for figurative references to historical events of the writer's time, and that which devotes itself to literary analysis as an end. Acknowledging that some of the apocalyptical figures are allegories of current events (Dn 7. 8, Enoch 85 ff., 4 Ezr 11 f., Rev 13. 17), and also that criticism must separate some sections from their setting, he yet urges that tradition largely fixes the form of the figures, and that the apocalyptical writer uses them not with freedom, but with reverence; not creating them as a poetical embodiment of well-known persons and events, but seeking in them for the clue to the mystery of the present and future. The history of tradition is therefore more important than the history of literary composition. Tradition is, in fact, the real author of an apocalypse, and it is this fact that gives the writer his deep conviction of the truth of his predictions. Except where it is expressly indicated, it is not to be assumed that references to historical persons and events are hidden behind the apocalyptical imagery. With reference to most of such images (*e.g.* $9^{1\text{-}11}$ $9^{13\text{-}21}$ $11^{3\text{-}13}$ $16^{13.\,14.\,16}$ $6^{9\text{-}11}$ (cf. 4 Ezr 4^{35}) $11^{1.\,2}$ $6^{1\text{-}8}$ 16. $6^{12\text{-}17}$), Gunkel declares the contemporary-historical method bankrupt. Even in ch. 13, where the first beast is the Roman empire, and in ch. 17, where the woman is the city (Rome), many details are not to be explained historically. Here Gunkel carries his opposition to the ruling method so far as to deny the almost universal opinion of critics that Nero is indicated by the beast and its number (pp. 210 ff., 336 ff.). Of Gunkel's specific argument, which is to illustrate and vindicate his method, viz. that Rev 12 is ultimately an otherwise lost Babylonian myth of the birth of Marduk, the conqueror of the Dragon, more will be said below. Other elements taken from Babylonian mythology Gunkel found, especially in chs. 13 and 17, but also in the seven angels, stars, candlesticks, eyes (p. 294 ff.), the twenty-four elders (302 ff.), Harmagedon (263 ff.), the number 3½ (266 ff.), the number 666 (374 ff.).

Bousset adopted Gunkel's method in *Der Antichrist in der Ueberlieferung des Judentums, des neuen Testaments und der neuen Kirche* (1895), and attempted to show that an essentially fixed apocalypse of Antichrist, originating in Judaism, can be traced from the New Test. down through the Middle Ages; and that this tradition is essentially independent of Rev., though Rev. at certain points shows dependence upon it. In his *Kritisch-exegetische Kommentar* (Meyer, 1896), Bousset, on the question of composition, follows the method of Weizsäcker, regarding the book as a unity, but seeing in many sections apocalyptical fragments introduced by the writer from existing tradition, in part Jewish in origin. In several of these fragments Bousset finds parts of the Antichrist-tradition (7^{1-8} 11^{1-13} 13^{11-17} 14^{14-20}); others also may well be of Jewish origin ($13^{1-10.\,18}$ 17 [with which should probably go also 16^{12-21} and 18], 21^{9}–22^{5}), while 12 is of foreign but apparently not of Jewish origin. Bousset's treatment of various matters of detail will be mentioned in the course of this article.

Holtzmann (*Einleitung in d. NT*^{3}, 1892; *Hand-Commentar*^{2}, 1893) recognizes indications of a double historical background (soon after the death of Nero, and in the reign of Domitian), but does not go beyond the recognition of two or more streams in the book, and holds chiefly to the contemporary-historical method of interpretation, though now recognizing also the importance of tradition as a source of the writer's material (*Lehrbuch der neutest. Theol.* i. 463-476).

The relative value of the three methods of interpretation last discussed—the *contemporary-historical*, the *literary-critical*, and the *tradition-historical*—is still a matter of debate (see Wellhausen, *Skizzen u. Vorarbeiten*, vi. 1899, pp. 215-249, and Gunkel, *Zeitschr. f. wissenschl. Theol.* 1899). Each in a measure limits or controls the application of the other, and the right of each, within its bounds, may fairly be said to be established. Yet they do not, taken together, wholly cover the ground. On two general lines, much work remains to be done. One is the psychological study of apocalyptical writing, the other is the historical relations of the Christianity of Rev.,—esp. the relation of its eschatology to that of Jesus and to that of St. Paul, and the relation of its Christology and Soteriology to the Pauline and the primitive apostolic. Gunkel at first put forward his tradition-historical method as also a psychological explanation of the apocalypse. The writer's belief in the truth and inviolable sanctity of his mysterious message could arise only from actual vision (which the nature of the material and the tendency of the modern mind exclude), or from the real antiquity of the material, before which the writer himself stood with awe. But Gunkel himself is now inclined to allow the actuality of visionary experiences (as psychologists recognize them) in connexion with the writing of apocalypses (see the Introduction to his translation of 4 Ezra in Kautzsch's *Pseudepigraphen d. AT*, 1900, and Preface to the 2nd ed. of his *Wirkungen des Heiligen Geistes*, 1900). The most significant effort in this direction, and the occasion of Gunkel's modification of his former position, is Weinel's *Wirkungen des Geistes und der Geister*, 1899.

On the other hand, the question so vital to an understanding of the beginnings of Christianity, whether the Christology and Soteriology of Rev. are Pauline, anti-Pauline, or independent of Paulinism, remains quite unanswered; as does the other still more vital question whether the eschatology of Rev. (given as the dictation of Jesus, 1^1 22^{16}) is based on that of the Gospels, and ultimately on the teaching of Jesus, or is the source of the eschatology which the Gospels wrongly ascribe to Him.

The final problem of the interpreter is, of course, to get back as fully as possible into the mind of the writer. Two main paths are now open that lead toward this result in the case of Revelation. (1) The study of apocalyptical literature in general; (2) the study of the contents, plan, sources (so far as known), historical situation, and teachings of the book itself. These two paths will be pursued in the following discussion. Two other paths invite exploration—(1) the psychological study of trance and ecstatic conditions and phenomena in religious history, (2) the origin and relations of the apocalyptical and the spiritual types of Christian thought in the 1st cent. These two paths must be opened by further research, in the latter case most of all in the Gospels, before results can be summarized in an article like the present.

In following the two main paths just indicated, the following presuppositions will be in part assumed as a result of the history of criticism, in part, it is hoped, proved by the discussion—(1) Rev. is an apocalypse among others, and is to be viewed and interpreted as such. (2) Rome is that embodiment of evil against which the book is chiefly directed, whose overthrow it immediately predicts. (3) The book makes use of apocalyptical materials from various (often probably from Jewish) sources, so that the question as to the place of a given section in the writer's plan, its meaning in his use of it, is to be kept distinct from the question of its original meaning and use, and the interpreter at many points has a twofold task. (4) It may not infrequently happen that the writer receives from tradition details which have no meaning at all for him, but which he retains as parts of the picture. The traditional meaning is in such cases the only one for which we need to search; and often we can only say that it belongs to tradition, since the clue to its meaning is lost. (5) In such cases, and in various others, the possibility is open that the writer uses such material for its poetic value, and not because of a reverence which prevents his altering it.

ii. THE NATURE OF APOCALYPTICAL WRITINGS.—The Book of Rev. calls itself a prophecy, and its author classes himself among prophets; but the book is called by us an apocalypse, and we have applied this title to certain other Jewish books, and some Christian adaptations and imitations of them, which we distinguish somewhat sharply from prophecy. Our interpretation and estimation of Rev. is deeply affected by this classification. What, then, is the apocalypse in its distinction from prophecy? We cannot avoid some preliminary discussion of this question (though see, further, APOCRYPHA i., APOCALYPTIC LITERATURE, PROPHECY), as it bears on the nature of our book and the way in which it should be used. There are still some who class Rev. with the prophetic rather than with the apocalyptical writings of Israel (*e.g.* Zahn), and there are some who class it with apocalypses, but regard the apocalyptic as a higher form of inspiration than the prophetic (see Terry, *Biblical Apocalyptics*, 1898, pp. 11, 12). Since such views strongly affect interpretation, it is essential to understand the historical relation of the two forms of writing and the place of Rev. in relation to them.

The transition from prophecy to apocalypse was effected in the OT itself. It was not a sudden but a gradual transition, nor is the contrast at the end an absolute one. The change is usually traced to Ezekiel for its beginning. Daniel is the oldest book which has complete apocalyptical form; and it remains the classical example and type of this kind of writing. Yet anticipations of certain marks of this literature can be found in earlier prophets, especially in Isaiah (*e.g.* Vision of God, ch. 6; description of Day of J″, ch. 2; perhaps the inviolability of Jerusalem), and genuinely prophetic traits are not wanting in Daniel (cf. 9^{1-19}), or even in other apocalypses from Bk. of Enoch to 4 Ezra. The character of the Book of Daniel deserves somewhat close attention because of its fundamental significance and many special points of contact with Revelation.

1. *Book of Daniel.*—(*a*) *Occasion and message.*—The Bk. of Daniel appeared during the religious persecution of Antiochus Epiphanes. Its aim was the encouragement of patient endurance and fidelity amid persecution. It taught this lesson in part by stories (histories) illustrating the safe-keeping by God of those who resist the temptations and endure the violence of the world-power in its hostility to God; in part by predictions of the approaching end of the power now threatening and afflicting the people of God.

Antiochus shall die by a judgment of God (8^{25} $9^{26.\ 27}$ $11^{27.\ 45}$) after about 3½ years (8^{14} 9^{27} $12^{7.\ 11.\ 12}$), and the Greek world-empire shall be overthrown ($2^{34.\ 35.\ 44.\ 45}$ $7^{11.\ 26}$). This is to be accomplished not by human effort, but by God directly ($2^{34.\ 44.\ 45}$ 8^{25} $7^{9ff.\ 22.\ 26}$), or through Gabriel and Michael, who contend with the gods of heathen nations (10^{13}–11^{1} 12^{1}). After this a time of trouble shall follow, testing the Jewish people, including some of the dead, and dividing the good from the wicked ($12^{1\text{-}4.\ 10}$). Then shall be established the kingdom of God, which is the world-kingdom of Israel, and is to endure for ever.

(*b*) *Underlying faith.*—The general foundation on which this message rests, the underlying doctrine of the book, is monotheism, the faith that all power is God's; that 'the Most High ruleth in the kingdom of men, and giveth it to whomsoever he will' ($4^{17.\ 25.\ 32}$ 5^{21}), and that times and seasons are in His hand, fixed by His purpose. This faith requires the inference that God's rule must and at last shall be recognized by all kings and nations, and that He must, in the end, take His kingdom to Himself (2^{44}), and rule it through His own people ($7^{13.\ 14.\ 22.\ 27}$). But the very fact that the realization of God's rule is future reveals the dualistic element which stands over against monotheism in the theology of the book. The contrast between the present and the future, between this age and the age to come, reaches beyond the visible into the invisible world, and is connected with contrast and conflict there, finds there, indeed, its explanation. The seer who would understand the present perverse and intolerable course of history, with heathen nations at the head and Israel at the tail, must not only have the veil lifted that hides the future developments of God's fixed plan, but must see behind the scenes those actions in the angelic world by which man's history may be influenced, in some sense, and for a time, even against God's plan.

(*c*) *Source and authority of the message.*—Whence did the writer gain his certainty of the near approach of the fall of the existing world-empire, and the realization of the kingship of God, and of the beings and actions in the angel-world which explain present evils and are to effect their end? The predictive parts of Daniel (chs. 7–12) could well be described, like Rev 1^{1}, as 'revelations of God through his angel Gabriel to his servant Daniel.' Gabriel's communications are in part in the form of interpretations of dream-visions (chs. 7. 8, cf. 2), but once he interprets an OT prediction after Daniel has studied it and prayed over it (ch. 9), and once Gabriel appears to Daniel after a three weeks' fast, and declares to him directly (not through figure) mysteries of the spirit-world and of the future (chs. 10–12).

The visions are described as real experiences, time and place being given, and the deep emotions of the seer described ($7^{15.\ 28}$ $8^{15\text{-}18.\ 27}$ $9^{3.\ 20}$ $10^{7\text{-}10.\ 15\text{-}19}$). The experiences seem to lie in the region of sleep or on its borderland ($7^{1.\ 2}$ 8^{18} 10^{9}). Their subjective reality seems to be in a measure confirmed by the intense seriousness which characterizes the book, and the writer's evident belief in the value and Divine origin of his message.

But, on the other hand, the book is unquestionably pseudonymous, and the visions contain, in the form of Gabriel's disclosures about the future, much that was to the author really, and of course consciously, history. Is this consistent with the impression that the writer is describing really visionary, ecstatic experiences, or does it compel us to assume that the vision is throughout a literary form? The problem is really a psychological one. How are we to explain the form of the book, that of visions and angelic interpretations, so as to explain both the fact that these consist largely in history disguised as prediction, and the fact of the writer's emotion and conviction as to their contents? It is evident that this form served the writer's practical purpose, for it showed that the present insupportable condition of his people was foreknown and determined by God, and it gave a ground for belief in the truth of predictions of really future events. But the emotion and conviction of the writer seem inconsistent with his use of a purely artistic, not to say artful, form of composition.

We are undoubtedly helped towards a solution of the problem by the fact, whose significance we owe to Gunkel, that the predictions of the apocalypse are not novelties, but rest in part on tradition. The foresight of Daniel comes to the writer, at least in part, through the study of the older prophets. The interpretation of the 70 weeks of Jer $25^{11f.}$ 29^{10} is certainly of central significance in the book (ch. 9). But it is probable also that symbolical figures such as those of chs. 7 and 8 (cf. 2) were not invented *de novo* by the author, but came to him from the past, and were regarded by him as mysterious types and forecasts of human history, in which he could find the future the more surely because he could find in them the past. The pseudonymous form becomes both less offensive to us and more intelligible if we suppose that the writer was actually searching in ancient prophecies, and in apocalyptical traditions to him no less ancient, for previsions of the actual course of post-exilic Jewish history, in order that he might the more firmly believe and the more surely convince others that the present crisis is not a break in the plan of God, but a necessary stage in its unfolding, and that the promised deliverance is near. It is possible also in this case to suppose that the interpretation came in connexion with deep emotional experiences.

(*d*) *Plan of the composition.*—Daniel is characterized by an unmistakable unity of tone and general teaching; but unity in plan and in detail is not obvious, and various efforts to prove composite authorship have been made. In fact the book is made up of ten quite distinct pieces, largely independent of each other (divided according to chapters, except the 10th, which includes chs. 10–12). Distinct apocalypses could easily be made of chs. 2. 7. 8. 9. 10–12. It is, however, the prevailing and probable view that the book, as we have it, comes from one author; that the enemy of God and His people is everywhere Antiochus, and the hope everywhere that of his speedy overthrow and the rulership of Israel over the nations. The book, then, has no chronological sequence throughout; it does, however, describe the present distress and the coming deliverance on the whole with increasing definiteness and detail in the successive figures. Ch. 7 is more explicit than ch. 2, while ch. 8 describes the Greek empire unmistakably, and chs. 10–12 give almost a direct history (though still in vision form) of Antiochus IV. This plan is accounted for as serving well the admonitory aim of the writer, which the stories also evidently serve. His plan is to give a clearer and fuller disclosure of the future as the book proceeds, but to enforce constantly in varied forms the lesson of the reality of God's rule and the safety of patient and enduring trust in Him amid present troubles. There is no anxiety about exact consistency throughout. The overthrow of the Greek kingdom is at first the deed of God alone, but in the last vision Michael is the deliverer. At first the consummation seems to follow directly upon the fall of Antiochus, but in ch. 12 a period of trial for Israel intervenes before its glory. The stories teach a present deliverance for the faithful, but at the end martyrdom and a deliverance only after death come into view.

2. *Characteristics of Apocalypses in comparison with Prophecy.*—On the basis of this description of Daniel we may attempt a brief discussion of the characteristics of apocalyptical literature in general in comparison with OT prophecy.

(*a*) *Situation and message.*—In the case of the apocalypse the situation is always one in which the righteous are in trouble, because of the rule of a foreign power, and usually also because in the Jewish community itself those who have power and prosperity are the wicked, not the righteous. The message is that deliverance is soon to come, and for this men are to wait in patience and trust. The pre-exilic prophets, on the contrary, spoke in times of national prosperity and confidence of a coming day of J", which would be a day of judgment on Israel at the hand of a foreign power. The message was one of repentance and righteousness that the threatened judgment might be averted, the sentence recalled. The prophets predicted primarily judgment, not deliverance; the prediction was conditional, not fixed; and the practical inference was repentance, not patience. The change of message belonged in part to the change of situation which the Exile itself effected.

(*b*) *The dualistic theology.*—Bousset rightly calls 4 Ezr 7^{50} 'The Most High has made not one world, but two,' the inner principle of the apocalypse. The sharp contrast in which the kingdom of this world, which is the kingdom of Satan, is set over against the kingdom of God, can be partly explained as a result of tendencies within Judaism; but it seems probable that the Persian dualistic religion must be taken into account in order to explain this strange departure from the otherwise strongly marked monotheism of Judaism (see esp. Stave, *Einfluss des Parsismus auf den Judentum*, 1898). In contrast to this dualistic tendency the older prophets were far more consistently, even if less theoretically and consciously, monotheistic, for they believed in the actual rule of the God of righteousness in present world-history as well as in the coming age, in the visible and not only in the invisible realm. They therefore saw evidence of the nearness and reality of God's rule in the presence and growth of the power of good; while the tendency of the apocalypse was to see in the growing power of evil the evidence that God's intervention, His reversal of human history, was at hand.

(*c*) *The element of prediction.*—Unfulfilled prophecy is the foundation upon which the whole structure of the apocalypse was built. This was both the problem and the reliance of Jewish faith and hope. What was spoken must be literally accomplished. Of conditional prediction the apocalypse knows nothing. The prophets' predictions of judgment had been fulfilled by the Exile, but their predictions with reference to the return from exile had never been fulfilled by the actual return; hence it must be that these hopes of the renewed land, the united tribes, the royal power and glory of Israel, were still to be realized. What the prophecies really meant, in view of their apparent contradiction by events, when and how their fulfilment was to come about, it was the task of the apocalyptic scribe to discover. Ezekiel took a decided step towards apocalypse when, on the basis of the words of Zephaniah and Jeremiah concerning the Scythians, he predicted the final assault of Gog and his wild hosts upon Jerusalem and their overthrow, and thus established one of the fixed elements in apocalyptical dogma (Ezk 38^{17} 39^{8}). Haggai and Zechariah still looked for a human explanation of the failure of the hopes, and found it in the delay in rebuilding the temple; Malachi, in imperfect offerings and withheld tithes. But in Daniel the reason is found no longer in the fault of man but in the plan of God. The 70 years are 70 weeks of years, and the unalterable time for the end is only just now drawing near. 4 Ezra reinterprets the fourth beast of Dn 7 to prove that Rome also was included in the predestined course of history before the end could come ($12^{11.12}$). Only in the Bk. of Jonah do we have a protest against the dominant apocalyptic by a surviving prophetic spirit. Here the prediction is of judgment, its aim to produce repentance, and the result the success of the preaching, with the failure of the prediction. Yet even a book written in part to prove that prediction is ethical in aim and conditional in result could be used by Jews as if its predictions were magical and inviolable (To $14^{4.8}$, B). The fault of the prophet Jonah, which the book uncovers and rebukes, was the fault of Judaism and its apocalypses. The Bk. of Jonah is a true utterance of the spirit of prophecy in unavailing protest against the narrowness, the jealousy, and the revenge that inspire much of the apocalyptic writing. Prophecy is fulfilled by every evidence in history of the rule of a righteous and merciful God, whether anticipated or not, whether for the benefit of Jews or of Gentiles. Apocalypse sees the hand of God and the vindication and glory of the seer only in a literal correspondence between predictions and events, and only in the fall of a Nineveh and the glory of Zion and Israel.

(*d*) *Pseudonymous authorship.*—It corresponds perfectly to the contrast just described that prophecy should be a personal and direct form of speech, the apocalypse a pseudepigraphic and mysterious form of writing. The prophet stood before his people and spoke in his own person. The authority of his speech was in no small measure that of his personality. He spoke first and wrote afterwards, but wrote as he spoke, in the first person. When, in the Exile and after it, prophets followed who repeated what others had said, or gave expression to the common faith, and had no peculiar message, their names were unimportant, and many of them wrote anonymously (Is 40–66, Malachi, Zec 9–14, etc.). Daniel is the first example of that pseudonymous prophetic writing which characterizes the whole apocalyptical group. It embodies the Jewish worship of prediction. Yet the moral earnestness and religious elevation of books like Daniel and 4 Ezra make it difficult for us to regard them as fictions, and certain considerations may help us to understand how this form of writing could be used by such men, although we must at best put their work far below the simplicity and openness of genuine prophecy. The fact that the apocalyptical writer was a serious student of ancient prophecies, whose sacredness he reverenced, and whose secrets he believed he could in a measure expound, suggests that he did not regard his thoughts as his own. The fixed and really ancient character of such apocalyptical traditions as those of the dragon of the deep, makes conceivable such a writer's evident faith in his predictions, which would be psychologically incredible if the visions were pure works of the imagination. Furthermore,—and this is an observation of great importance,—no apocalypse gives the impression of entire unity and harmony. Not only the writer's own studies of OT prophets, not only his own interpretations of apocalyptical imagery, but those of others before him are at his command, and furnish the materials of his book. Not only traditions, but writings form his sources. These materials may already have connected themselves with Enoch, or Moses, or some other great name. So that one may venture to say that the pseudonymity of these books has some basis in actuality. The hiding or sealing of the book until the end (Dn $12^{4.9}$ 8^{26} (10^{14}), Assump. Mos. 1^{16-18}) belongs to the pseudepigraphic form, accounting for the appearance of the book so long after the time of its assumed origin. Yet this may also express the actual fact of the ancient character of the writer's sources. The writers could not have put forth this material altogether in their own names, for it is not as a whole their invention. They are largely compilers and commentators, and have a deep reverence for their sources. Yet this observation, which we owe to Gunkel, must be modified in view of those figures which are unmistakably and even explicitly constructed for the purpose of setting forth in allegorical form the history of the past, especially of the recent past, as foreseen by the supposed ancient author. Dn 7 contains, no doubt, traditional material of the sort just described, but it has been freely re-shaped so as to contain the history of four successive world-empires. If the original form of the tradition contained only one dragon of the deep, how can we be sure that the description of the one like a man was not part of the writer's elaboration of his material, rather than, as Gunkel affirms, part of the tradition itself? And if so, his belief in the forecast it contains preceded his use of the tradition and determined his use of it.

(*e*) *Literary material and form.*—The apocalypse is characterized by the use of striking figures, not only strange and unnatural, but evidently mysterious in character, seen in dreams and visions, interpreted by angels, and yielding secrets of the future course of history. Although prophecy is full of figurative forms of speech, freely fashioned, or poetically and rhetorically applied, yet these figures have neither the strange unearthly character nor the mysterious value of the distinctively apocalyptical symbols. These latter, at least in part, go back to primitive mythological formations. This connexion is quite unmistakable in Zech., where a mass of this material suddenly meets us. The four winds, messengers and agents of God, and the seven planets, His eyes, which run to and fro through the whole earth, are still clearly to be perceived as the underlying foundation of figures which the prophet applies to the historical situation, and to the two men, Joshua and Zerubbabel, on whom he fixes his high hopes (2^{8-11} 6^{1-8} $4^{2-6a.\ 10b-14}$). Yet Zech. uses such material as poetry, while in Daniel it has value as mystery, containing, for one who could interpret it, the secrets of the future. The vision and its interpretation by an angel comes therefore to be of supreme value, and revelation is conceived of in this half-sensible and wholly supernaturalistic way. Ezekiel here also leads the way. His vision of God is more sensible than Isaiah's, and his inspiration more external and supernaturalistic than Jeremiah's (cf. Ezk 1 with Is 6, and Ezk 2. 3 with Jer 1).

(*f*) *Literary composition and history.*—After Daniel, the Jewish apocalypses appear to be in no case proper unities. Most of them have been adapted by revision to use in later and changed conditions, and all of them, including Daniel, appear to be based in their first writing on older materials which they embody, without serious effort to build them into a harmonious structure. The Bk. of Enoch is a compilation of Enoch literature, having indeed a certain rough plan as it now stands, but without real unity. Even chs. 1-36 contain three distinct descriptions of the Messianic consummation (chs. 5. 10. 25), which, in connexion with the description of Sheol (ch. 22), form anything but a continuous and consistent picture. Almost all forms of the Jewish hope are contained in this book: that in which the Messiah occupies the central place, that in which he is subordinate, and that in which he is wholly absent; that in which the scene and character are purely earthly, that in which they are properly heavenly (angelic); that in which the heavenly precedes the earthly and finally descends to earth (37-70), and that in which the heavenly follows after the earthly in chronological succession (91^{12-17})—the chiliastic scheme. In general the apocalypses are not characterized by a thoroughgoing unity of scheme, nor even by a consistent unity of teaching, and cannot be understood except by the recognition of independent sources, and also, in some cases, editorial revision. Here we have especially to do with the additions of Christian hands, since through them alone these books, after Daniel, have reached us. In some cases this Christian revision has gone but a little way (Enoch, Assump. Mos., Apoc. Bar); while in some cases the Jewish apocalypse is found in a radical Christian revision (Asc. of Isaiah, Test. XII. Patriarchs). The questions as to literary analysis and the presence of a considerable Christian element are still very variously answered, especially in the case of Enoch 37-70 (71) and 4 Ezra.

(*g*) *Apocalyptical dogmas.*—The religious teachings of the prophets, individual and distinct as they are, can be summarized only in some such statement of their moral and religious principles as Mic 6^{8} ('to do justly, and to love mercy, and to walk humbly with thy God'), in connexion with such a formulation of their preaching of repentance in view of the threatened judgment as Zech. gives (1^{4} $7^{9ff.}$ connecting v.^{9} with v.^{7}). But in the apocalypses not principles so much as details become fixed in dogmas. Daniel's general scheme for the future is unchanged: a coming Day of J″, which is near at hand, and comes when evil is at its height; the overthrow of the world-kingdom, the sifting of the Jewish people, and the possession by the righteous of kingship over the nations and lasting blessedness. To this were added, from Ezekiel, a final assault of the outstanding heathen upon Zion, in which they are gloriously and finally vanquished; from various prophecies, the expectation of the return of the ten tribes and the gathering of the dispersed Jews; and details regarding the renewed land and city, such as Deutero-Isaiah, Ezekiel, Haggai, and others suggested.

Within this general scheme some important differences were possible. The Messiah is sometimes conceived of as God's agent in establishing his kingdom on earth (*e.g.* Ps-Sol 17, Enoch 37-70), sometimes as king after the kingdom has been set up by God, *e.g.* Enoch 90, 4 Ezr 7^{28}, Apoc. Bar 29; and sometimes all is done by God alone, and there is no king beside him (*e.g.* Daniel, Enoch 1-36, Assump. Mos. 10).

The place of the individual in this eschatological scheme is differently estimated. Sometimes, and in general one may say in earlier times, nations are the chief actors, and it is the problem of Israel that events are to solve. Increasingly the individual claimed consideration, and the suggestions of Dn $12^{2.3.13}$ were followed and elaborated. An eschatology of the individual was developed in connexion with the national, and gradually threatened to subordinate the national to itself. At first it was enough that the righteous dead should arise to have the part they deserved in the glory of the nation. But at some time the effort to claim for the individual a more than earthly and temporary future, and perhaps also the effort to ascribe to the coming age a more than earthly glory, produced a strain and at last a break in the traditional hope. There came to be two consummations, the earthly, the world-rule of Israel, the Messianic kingdom, which would come to an end and be followed by the heavenly and eternal. Of this break of the one hope into two our earliest record is in the Apocalypse of Ten Weeks in Enoch 93^{1-10} 91^{12-17}. Cf. 4 Ezr $7^{28f.}$, Apoc. Bar 40^{3}, Secrets of Enoch 33, and see MILLENNIUM. In connexion with this scheme, the lot of the soul after death became a subject of apocalyptical research and vision by the side of the lot of Israel and Zion (4 Ezra).

The idea that the visible and human world was to be understood by the invisible and angelic that lay about and beneath and above it, led the apocalyptical writers not only to a developed angelology, in part Persian in origin, but also to researches in the mysteries of nature, especially in reference to the movements of the planets, most of all those of the moon, such as are elaborated in Enoch 72–79. 82. 41^{2-9} 43. 44. 59. 69. But while some apocalypses are concerned with such speculations, others move back in the opposite direction to an almost prophetic earnestness of moral denunciation and exhortation (*e.g.* Enoch 91–104),

(3) *Inferences as to Methods of Interpretation.*—From this brief study of the nature of the apocalypse certain inferences follow as to the method of interpretation.

(*a*) *Not 'futurist.'*—The apocalypse has to do with the present and the immediate, not the remote future. Its predictions are to be understood as referring to actual or imminent historical factors and events.

(*b*) *Contemporary-historical.*—Some of the figures of the apocalypse are invented or freely adapted in order to represent historical persons, nations, and events. These are to be explained in accordance with their origin by the events which they describe. From them we may hope to get the clearest light upon the date of the writing.

(*c*) *Tradition-historical.*—Some of the figures are borrowed from the OT or from older apocalypses or traditions. In such cases the interpreter must distinguish between the original meaning of the figure and the present author's purpose in using it. He may have used it because in the main it lent itself to his application, but he may have preferred not to change it, either from artistic instinct or from reverence. It is a mistake, then, to assume that every detail had a meaning to him, and to insist on finding it. Perhaps some features of the picture were as much a mystery to the writer of our book as they are to us. Sometimes we can guess quite plausibly what the *original* meaning was, although we cannot tell whether the writer of our book gave it a meaning or not.

(*d*) *Literary-critical.*—The unity of an apocalypse cannot be assumed. The ancient material just alluded to may be introduced almost entire from some unknown source. Later readers might weave together distinct oracles, especially if they passed under the same name; and editorial comments or changes are always possible in the effort to adapt an apocalypse to the changed conditions or the changed beliefs of a later time. Literary criticism must, however, be held in check by the fact that a writer often himself used ancient traditional materials only partly harmonious with his own time and teaching, and fitted them but imperfectly into his plan.

(*e*) *Poetical.*—The underlying religious faith and the immediate practical aim of an apocalyptical writer (to encourage faith amid trial, to recall apostates, to guard readers against the influence of foreign thought and life, etc.), must not be lost sight of in the study of the mysteries of the unseen or future world which he would unveil. The question is always to be asked how far the strange accounts of the unseen world and of coming events were of literal, and how far of figurative or poetic value to the writer himself. There was something of the poet in the apocalyptical seer. He was seldom simply a scribe and a literalist. The greater the variety and the less the outward consistency of his visions, the less probably were they regarded by him as literally true. In connexion with this the question must arise as to the psychical experience of the apocalyptical writer, the possibility of some actual visionary experiences among the many which must be regarded as fictitious, a mere literary form. Thus Gunkel believes that such genuine experiences lie behind some of the visions in 4 Ezra (2 Esdras), more in the first three visions (chs. 3^1–9^{37}) and less in the last three (11–14).

4. *Rev. as an Apocalypse.*—We may now notice certain points of likeness and of unlikeness which a general comparison of Rev. with the Jewish apocalypse suggests, and certain points of uncertainty which form the main problems in the following discussion.

(*a*) *Likeness of Rev. to Jewish apocalypses.*—The Bk. of Rev. is written to encourage faith and endurance amid trials and persecution. These trials are at least chiefly due to the rule of Rome, though within the Christian communities directly addressed there are false as well as true members. The message of the book is one of repentance only in the case of indifferent or wavering believers ($2^{5.\,16}$ $3^{3.\,14}$ [and Jews, 11^{13}?]). It is not a message of repentance for those whose sin is chiefly denounced ($9^{20.\,21}$ $16^{9.\,11}$ 22^{11}), but of deliverance and reward for those who endure a little longer; and of judgment and destruction for the evil power and its adherents. The situation and message are those of apocalypse, and not those of prophecy.

Apocalyptical, also, is the contrast between the present and the coming age; the conviction that evil must increase, and that its violence is a sign of the nearness of the end; the belief that evil has its source and strength in the world of spirits, and that angelic conflicts and triumphs precede or accompany those among men.

Rev. contains an abundance of that striking and highly wrought imagery which characterizes an apocalypse. These images are in part borrowed from Zech. and Daniel and other OT writers; in part, presumably, from the storehouse of apocalyptical traditions. That they are not used simply as poetical ornament, but have for the writer in part a mysterious value, is at all events a natural first impression. The facts that the book is so largely made up of such imagery, and that it is put in the form of vision, and is interpreted to the seer by angels, make up the most obvious resemblance between this book and the Jewish apocalypses. The literary materials and form are largely apocalyptical. That this resemblance is not merely formal but deep-going, is suggested by the extraordinary claims with which the book is sent out (1^{1-3} $22^{18.\,19}$). In its supernaturalistic conception of inspiration the book is apocalyptical rather than prophetic ($1^{10\text{ff.}}$ $4^{1\text{ff.}}$ etc.).

In its scheme of the future, the contents of its prediction, the book has an obvious likeness to the Jewish books of this class: the coming of the day of the Lord Christ, when evil is at its height; the overthrow of the world-kingdom, Rome; the sifting of the Christian people; the earthly Messianic age, in which the saints (Christian martyrs) will possess the kingdom and reign with Christ; the final assault and overthrow of the powers of evil, the Gog of Ezekiel's prediction; the general resurrection and judgment, and the new heaven and earth with individual and eternal awards: this is simply the Jewish scheme in its Messianic and chiliastic form, with Jesus as the Messiah, and His servants as the saints and heirs. Over against such likenesses in form and substance no difference can be sufficient to sever the relationship between our book and other apocalypses. Lücke was the first fully to establish the relationship. Zahn (*Einleitung in d. NT*, ii. 1899) is the last—one is tempted to say, will be the last—real scholar to deny it. He may at least teach us to be on our guard against false inferences from this undeniable literary relationship.

(*b*) *Unlikeness of Rev. and Jewish apocalypses.*—Rev. is a *Christian* apocalypse. What and how great unlikenesses does this involve? Two general considerations would lead us in opposite directions with reference to this question. The Christian religion as the Baptist prepared the way for it, as Christ founded it, and as St. Paul preached it, was undoubtedly in essential respects a return to prophecy, not only from the law, but also from the national and sensuous hopes of Judaism. The Baptist and Jesus announced not the fall of Rome, but the fall of Jerusalem, just as Amos and Hosea announced the approaching fall of Samaria, and Micah and Jeremiah that of Jerusalem; and for the same reason, in the same way, with the same motive, the call to repentance and righteousness. Jesus was a prophet in His belief in this world as God's world, and in good as already the ruling power in it, and also in the directness and personal authority of His words, the immediateness and inwardness of His relation to God, His eye for the supernatural in spiritual and not in magical manifestations. We should certainly hope that the new Christian prophecy would be truly prophetic in character, and not apocalyptical. But, on the other hand, we know that the early Christian Church found itself fully at home in Jewish apocalypses. It was the Jews who threw away their apocalypses, Christians who preserved them almost without change, applying to the second coming of the Messiah what Jews had imagined of His first coming. How early this happened the NT and even the Gospels give evidence. We cannot, therefore, assume that the Christian apocalypse is essentially unlike the Jewish. The Christian element may be an entirely superficial one, the mere identification of the coming Messiah with Jesus, and of the redeemed with the Christian Church.

Looking at the book itself, the most obvious unlikeness to the Jewish apocalypse, after the identifications just named, is the letters to the seven Churches. To be sure, they are introduced by a highly coloured Christophany, based on Zech. and Daniel, and are given in the form of a direct communication of the exalted Christ through the Spirit. Yet they have to do with actual, concrete conditions; they praise and blame, encourage and warn, with close discrimination and intense moral earnestness, so that we feel the prophetic spirit behind the partly apocalyptical form. Their warnings are aimed, not at foreign powers, but at the Christian communities; and the judgment they predict, though not itself conditional, is nevertheless the basis of a teaching of repentance. These are not like the letters of St. Paul, but they are far less like the Epistle of Baruch to the nine and a half tribes (Apoc. Bar 78–87).[*]

(*c*) *Remaining questions as to the relation of Rev. to the apocalypses.*—Certain points remain at which the question of likeness or unlikeness between Rev. and Jewish apocalypses cannot be answered by a general view, but only, if at all, by closer study.

(1) *Pseudonymity.*—The Jewish apocalypses are all pseudonymous, and contain accounts, in direct or figurative form, of the past course of history, in the form of predictions by the assumed author.

> 'Who can compare the name John [$1^{1.4.9}$ 22^{8}] with Enoch or Moses, or even with Daniel, Baruch, and Ezra? The authors of those books dated themselves centuries back, veiled themselves in the sacred names of the remote past, and turned to a credulous public of their time without even pretending any personal relation to it whatever. Here, on the contrary, a man speaks to seven Churches of the province of Asia and gives them his book, who is most accurately acquainted with their present conditions; and he speaks to them under the name, John, which was borne there about A.D. 70–100 by the most conspicuous ecclesiastical personality; and this he does according to tradition about A.D. 95, so in the lifetime of the famous John of Ephesus, or according to any conceivable hypothesis in the lifetime of the personal pupils of this John' (Zahn, *Einleit.* ii. p. 584 f.).

This is Zahn's chief objection to classing Rev. with the apocalypses, to the very essence of which, he says, belongs pseudonymity. 'The representation of the development of world-history under the form of an ante-dated prediction, if it is present at all in Rev., is a wholly subordinate element in it.' With this sentence Zahn makes his position insecure. A certain amount of antedated prediction, or at least of history in the form of vision, can hardly be excluded from the picture of the Roman empire in Rev 13 and 17; but pseudonymity has such visions for its most characteristic product and one of its reasons for being. Even as a subordinate element in the book, comparable to the place of chs. 11. 12 in the Apoc. of Ezra, such visions suggest the possibility of pseudonymous authorship, which in the case of a Christian apocalypse might well choose an apostolic name. Weizsäcker therefore thinks we should start from the fact 'that among all similar writings of Jewish and ancient Christian origin, we know not a single one which bears the name of its own author.' Even Hermas is hardly a unity, and professes a greater than its actual age. This does not make it impossible that John wrote under his own name. 'But a strong presupposition always remains that the general practice of this art-form is followed in this case also' (*Apostolic Age*, ii. p. 174).

The question of pseudonymity, and the connected question whether and how far Rev. contains history in the form of vision, remains open at this preliminary stage of our discussion.

(2) *Composite character.*—So also must the question of *composite character* be regarded as opened, and not closed, by a general comparison of Rev. with the Jewish apocalypses.

Does Rev. share this common characteristic of the apocalypse? The book has often been praised for its architectural construction, but there are various indications of seams or breaks in its structure, and neither in the historical situation which it reflects (before or after 70; soon after Nero or under Domitian) nor in the type of religious thought which it represents (Jewish or Pauline [universalistic] Christianity; primitive Jewish, or developed [Hellenistic] Christology) is unity of impression easily gained. The course of recent investigation abundantly vindicates the proposition that the question of likeness or unlikeness between Rev. and the apocalypses in the matter of unity and sources is at present an open one.

(3) *Nature of vision.*—A third uncertainty concerns the question of the nature of the visions, the narrative of which makes up the book. All apocalypses are composed largely of accounts of visions and their interpretation by angels. The question, how far this is a literary (artistic) form, and how far really ecstatic experiences were connected with their authorship, is one that should not be answered too confidently and sweepingly even with reference to the Jewish apocalypses. Zahn accepts the visions of Rev. as actual experiences literally described, while he regards the visions of other apocalypses as artistic fictions. The difference is to him that between true and false prophecy. Others, the majority, judge the vision to be everywhere, at least in this age, a literary form, and point for evidence especially to the many repetitions or imitations of OT and other traditional materials which they contain, and to the many visions which simply embody history in allegorical form, to account for which real vision is a wholly unnecessary supposition.

---

[*] Cf. the possible companion letter to the two and a half tribes in Bar 1^{1-3} 3^{9}–4^{29}.

Recent investigation, however, showing the large dependence of the visionary upon memory, does not allow us to say with confidence of the abundance of OT allusions in Rev., 'This is literary art, and not the way in which living vision in the spirit expresses itself' (Weizsäcker).

Three important questions, then, are opened by the general comparison of Rev. with Jewish apocalypses: Is it pseudonymous? Is it a literary unity, or is it composite? Are its visions actual, or a literary form? The questions converge in the effort to recover the author's personality, and the method and purpose or spirit of his work, the self-consciousness of the man. Weizsäcker, to whom the recent course of criticism is directly due, gives his answer to our questions in this summary fashion: 'The Apoc. of John was not written by the apostle. It is also not the record of a revelation or a vision which the author experienced on a day. It is, further, not the work of a homogeneous conception' (*Apostolic Age*, ii. 174).

iii. CONTENTS AND COMPOSITION OF REVELATION.—1. *Contents of the Book.*

The Book of Rev. reads briefly as follows:—An introduction, giving title, author, address, and subject (1^{1-8}), is followed by the appearance of Christ to John at Patmos, and the charge to write to the seven Churches (1^{9-20}), to each of which a letter is dictated by Christ (or His angel-spirit), in which the Church is praised or blamed with reference to past trials and heathen influences, and in view of a greater trial soon to come in connexion with the approaching coming of Christ (2. 3). The seer then sees heaven opened, and, being summoned up thither, he sees and describes the throne of God, and the twenty-four elders, seven spirits, and four living beings, who praise God the creator (4). He sees the sealed book in God's hand, and the Lamb as if slain with seven horns and seven eyes (the spirits of God) appears amid the praises of the highest angels and of all creation, as the one who alone can open the seven seals (5). He opens six seals. The first four introduce four horsemen who seem to be agents of judgment (war, famine, pestilence). The fifth reveals the prayers of martyred souls for vengeance; the sixth an earthquake, which brings destruction to nature and terror to men (6). Before the destructive powers (winds) are loosed, 12,000 from each of Israel's twelve tribes are sealed (7^{1-8}), and John sees a countless multitude of all nations who have passed through the great tribulation, in heavenly blessedness (7^{9-17}). The seventh seal brings silence in heaven (8^{1}). Then 'the seven angels' appear (8^{2}), and, after the prayers of the saints have again been offered before God (8^{3-5}), six of the angels sound their trumpets. The first four bring forth earthquake and volcanic phenomena with destructive effect upon a third of earth, sea, rivers, and heaven (8^{6-12}). The remaining three are to be three woes (8^{13}). The fifth (first woe) brings demonic locust-beings from the abyss, under their king Apollyon, who torment unsealed men five months (9^{1-12}). The sixth brings armies of cavalry from the Euphrates, destroying one-third of men (9^{13-21}). Before this second woe is declared to be past [in 11^{14}], the seer receives a new commission and message, a little book which he eats (10); and it is revealed to him that Jerusalem, except the temple and inner court, will be trodden by the Gentiles 42 months, and that 'the two witnesses' will prophesy during that time, and then be killed, and after 3½ days raised to heaven (11^{1-14}). The seventh trumpet (third woe) sounds, and heavenly voices announce the establishment of the kingdom of God and Christ (11^{15-18}). Storm and earthquake follow the opening of God's heavenly temple (11^{19}). The seer then beholds the unavailing effort of the dragon Satan to destroy the Messiah at His birth; the dragon's fall from heaven, and his persecution of the woman who bore the child, and of her other seed (12^{1-17}). Out of the sea comes a beast with ten horns and seven heads, whom the dragon equips with his own authority. He wars against the saints and is worshipped by all other men (13^{1-10}). This worship is furthered and enforced by another beast out of the earth with miraculous powers, who stamps men with the number of the beast, 666 (13^{11-18}). Over against these evil powers the Lamb is seen with the 144,000 undefiled on Mt. Zion (14^{1-5}). Angels announce the eternal gospel of the worship of God in view of judgment to come, the fall of Babylon, the punishment of the worshippers of the beast, the blessedness of martyrs (14^{6-13}). One like a son of man [Messiah or angel ?] reaps the earth with his sickle, and another angel gathers the grapes into the winepress of God's wrath (14^{14-20}). Seven angels, after the heavenly praises of the redeemed are heard, pour out seven bowls containing the seven last plagues, the sixth of which brings remote nations to the last war at Har-Magedon, and the seventh an earthquake which destroys cities, divides Babylon, destroys nature (15. 16). The city is then seen as a woman seated on a scarlet beast, at last wasted and destroyed by the beast and its 10 horns (17^{1-18}). Angels utter prophetic woes over Babylon, announcing its fall because of its persecution of prophets and saints (18). After heavenly rejoicings over the city's fall, and the readiness of the Lamb's bride (19^{1-10}), the Messiah appears as warrior and king, the two beasts are cast into the lake of fire, and their followers destroyed (19^{11-21}). Satan is bound, while Christ and the risen martyrs reign 1000 years. Satan is loosed, and brings remote peoples to a final war against Jerusalem. They are destroyed, and he is cast into the lake of fire (20^{1-10}). The general resurrection and judgment follow (20^{11-15}). The new heaven and earth, the new Jerusalem, and final blessedness in it, are described (21^{1}–22^{5}). The conclusion consists of attestations and admonitions regarding the Divine authorship and sanctity of the book (22^{6-21}).

2. *Plan of the Book.*—(*a*) *Introductory.*—There are two main methods by which plan and order are discovered in the visions of 4^{1}–22^{5}. The *recapitulation* method (from Tyconius and Augustine to recent times) finds no progress in the successive sevens (seals, trumpets, and bowls) which form the main structure of this section, but repetition under varying forms. The seals bring already the last judgment (6^{12-17}) and the final blessedness (7^{9-17}). Among more recent critics, however, the view prevails that the seventh in each series is developed in the new series of seven that follows. The seventh seal contains the remainder of the book, and is unfolded in seven trumpets, of which the seventh includes all that follows to the end (10^{7}), but is unfolded in the seven bowls (Lücke, Bleek, Ewald, etc.). In this scheme ch. 7 appears as an interlude between the sixth and seventh seals, and 10–11^{13} as a similar insertion between the sixth and seventh trumpets. The bowls are not interrupted in the same way, but before and after them are visions which give the same impression of standing outside of the writer's ruling scheme (12–14. 17–19^{10}).

Holtzmann represents the structure of the book in the following scheme (*Comm.* p. 295):—

	1^{1-8} Introduction.	
1^{9}–3^{22} The seven Letters.		
4^{1}–5^{14} Heavenly scene of the visions.		
6^{1-17} Six seals.		
		7^{1-17} The sealed and the blessed.
8^{1-5} The coming forth of the trumpets out of the 7th seal.		
8^{6}–9^{21} Six trumpets.		
		10^{1}–11^{14} Destiny of Jerusalem.
11^{15-19} Seventh trumpet.		
		12^{1}–14^{5} The great visions of the three chief foes and the Messiah-kingdom.
	14^{6-20} Return to the earlier connexion.	
15^{1}–16^{1} Transition to the bowls.		
16^{2-21} Seven bowls.		
		17^{1}–19^{10} The great Babylon.
19^{11}–20^{15} Final catastrophes.		
		21^{1}–22^{5} The new Jerusalem.
	22^{6-21} Conclusion.	

It is to be noticed that the sections at the right contain most of the material which Weizsäcker and others regard as of earlier origin, and that of which Jewish authorship can be most plausibly affirmed. The supposition that they were inserted by the writer, and that he was not able to bring them into the sevenfold scheme which he chose, is a natural one. Holtzmann, however, says that if this was the case, these sections have at all events been assimilated to the rest in style, and connected with it by various references, so that the lines of separation do not remain sharply defined.

By the side of this we may well place in bare outline the analysis of Zahn (*Einl.* ii. 587 ff.), which, as he believes, demonstrates the unity of the book 'in spite of all lack of literary art.'

Introd. (1^{1-9}). *First Vision*, 1^{10}–3^{22} (Letters). *Second Vision*, 4^{1}–8^{1} (Seals), with two Episodes, (*a*) 7^{1-8}, (*b*) 7^{9-17}, before the seventh. *Third Vision*, 8^{2}–11^{18} (Trumpets), with two Episodes, (*a*) 10^{1-11}, (*b*) 11^{1-14}, before the seventh. *Fourth Vision*, 11^{19}–14^{20}. *Fifth Vision*, 15^{1}–16^{17} (Bowls). *Sixth Vision*, 17^{1}–18^{24} (Judgment on Babylon), 16^{18-21} introduces it, and $19^{1-8.\ 9-10}$ concludes it and introduces the *Seventh Vision*, 19^{11}–21^{8} (Judgment and Awards). *Eighth Vision*, 21^{9}–22^{5} (*or* ^{15}) (a description not of the new heaven and earth of 21^{1-8}, but of the world during the 1000 years' reign of Christ, 20^{4-6}). Conclusion, 22^{6} (*or* ^{16})$^{-21}$.

(*b*) *Plan of chs.* 1–3.—The construction of these chapters gives the greatest evidence of conscious and careful literary art, and no doubt may fairly predispose the reader to look for art throughout. The introductory verses (1^{1-8}) contain a remarkably complete statement of the source, character, and contents of the entire book, and prepare us to recognize such summary, anticipatory introductions elsewhere. The ultimate author of the revelation is God, who gave it to Christ, who sent an angel to signify it to John. It can therefore be called 'the word of God,' 'the testimony of Jesus,' or 'the things which John saw.' Its contents are 'the things which must happen quickly'; that is, it is a prediction, but of the immediate not the remote future. Its readers are God's servants, who are blessed if they hear and keep what is written. More expressly 'the seven Churches in Asia' are addressed, and in saluting them the author completely sums up his theology. It is in some sense trinitarian (vv.$^{4.5}$), and the kingly exaltation of Christ through resurrection, the saving effect of His death, and the destination He made possible for believers, are described. The central message of the book, the coming of Christ, and that in its judicial aspect, is expressly announced, perhaps by God, who, at all events, as the real author of the revelation, adds in the first person His attestation. It is not, indeed, impossible to divide this introduction into independent parts (1–3. 4–6. 7. 8), and suppose them to have introduced separate apocalypses (cf. Spitta, Briggs). But it can hardly be denied that the whole is admirably adapted to introduce the book.

The vision of Christ (1^{9-20}) brings before us the priestly and kingly One, who lives amid His Churches and possesses or rules them. The letters are introduced by descriptions of Christ which are in most cases borrowed from the vision, and close with promises 'to him that overcometh,' which in most cases anticipate the fuller descriptions of chs. 19–22. The selection of descriptive features from the vision of Christ in several cases fits the special message of the letter; and this is sometimes, but not so often and clearly, the case with the selection of the reward. (1) The description, 2^{1} (from $1^{16a.\,13a}$), is referred to in 2^{5}. The reward, 2^{7b} (cf. 22^{2}), has no obvious relation to the letter. (2) The description, 2^{8} (from $1^{17b.\,18a}$), fits both the message, 2^{10b}, and the reward, 2^{11b} (cf. 20^{6}). (3) The description, 2^{12} (from 1^{16b}), is referred to in 2^{16}. The reward, 2^{17b} (only in part, if at all, parallel to 22^{4}, cf. 19^{12}), may possibly stand in contrast to the eating of things sacrificed to idols (2^{14}). (4) The description, 2^{18} (from $1^{14b.\,15a}$, but 'Son of God' is here only), prepares for 2^{23}. The reward, 2^{26-28} (in part parallel to 20^{4}, cf. 12^{5} 19^{15} 22^{16}), could relate to the letter if Jezebel's teaching included submission to Rome. (5) The description, 3^{1} (from 1^{16}, cf. 2^{1} 1^{4}), has no special relation to the letter. The reward, 3^{5} (cf. 6^{11a} $7^{9b.\,13}$ 17^{8} $20^{12.\,15}$ 21^{27}, Mt 10^{32}), is connected with v.^{4} and perhaps v.^{1}. (6) The description, 3^{7} (not from the vision, cf. Is 22^{22} [cf. 1^{18}]), is used in v.^{8}. The reward, 3^{12} (cf. 14^{1b} 22^{4} $21^{2.\,10}$ $19^{12.\,16}$), has no obvious connexion with the letter (Bousset compares v.^{12a} with v.^{7b}). (7) The description, 3^{14} (not from the vision, cf. 1^{5}, Col $1^{15\text{ff.}}$, Jn 1^{3}), may prepare for the severity of the letter (cf. v.^{19}). The reward, 3^{21} (cf. 20^{4-6} 1^{6} $2^{26\text{f.}}$ 5^{10} 22^{3}), connects with v.^{20} (cf. Lk $22^{29.\,30}$).

That the writer is working as an artist is evident, and a reason may have determined his choice of titles and promises where it is no longer evident. The last title is perhaps the highest, and the last reward also represents a climax. The first reward suggests Eden; the second, the Fall; the third, the Wilderness; the fourth, the Kingdom; but though the intention to represent the fulfilment of successive stages of OT history is wholly conceivable, the evidence for it is not convincing.* No evident reason for the changed position of the sentence, 'He that hath an ear,' etc., in the last four letters, is manifest. Of the historical conditions described in the letters something will be said further on. But, in spite of unmistakable references to local conditions, each letter is a message of the spirit to 'the Churches.' They were not sent separately or meant to be read separately, but have each a representative and all together a complete character, which the number seven itself suggests.

Chs. 1–3 show not only a conscious artistic purpose, but in more details than can here be noted and still more in total effect they show a high order of poetic instinct and skill.

(*c*) *Plan of chs.* 4–22.—The choice of three series of sevens in the representation of the coming woes and judgment shows the same mind that addressed the Churches as seven. To assign these sevens to different sources (Spitta, Briggs), is to miss one of the most evident marks of unity in the book. It is more likely, *e.g.*, that the author made seven seals out of an original four (see below) than that he found his sevens ready made. But what is to be said of the two twofold interludes inserted between the sixth and seventh seals and trumpets ($7^{1-8.\,9-17}$ 10. 11^{1-13})?

The first two of these visions not only interrupt the plan, but are apparently inharmonious with each other. In one (7^{1-8}) a definite number of Jews are sealed before the coming of evil, in order to be kept from it; in the other (7^{9-17}) a countless number from all nations have already come through trials and death to heavenly blessedness. The first could well be of Jewish origin (based on Ezk $9^{4\text{ff.}}$), and describe the literal safe-keeping of Jews in the troubles of the last days. Did our writer believe that Jews would play a distinct rôle in the end? This is possible (cf. St. Paul in Ro 9–11), but it is more probable that he adopts a Jewish apocalyptical fragment applying it to the Christian community, and understanding it not in a literal sense. This would account for the fact that the four winds (7^{1}) are never loosed. We have not a whole but a part ($9^{14\text{f.}}$ is related, but different). We have indeed an allusion to the sealing (9^{4}, cf. 14^{1}) as if to prevent our supposing the section a later insertion. But there the sealed can only be all true Christians, as in 14^{1-5} the 144,000 are. If Rev 7^{1-8} applies a Jewish oracle to the Christian community, the deliverance it assumes may well be no more literal than the rest, and its meaning in the author's intention may be wholly like the meaning of 7^{9-17}. Not deliverance from death, but deliverance through death, is, in fact, the promise of the book. These two visions, then, contrasted as they are, and of different origin, may have meant the same thing to the author. They are assurances of escape and salvation, inserted here, after the beginning of evils but before their culmination, to serve the practical purpose of encouragement. The second one seems to describe by anticipation nothing less than the final heavenly blessedness, for no such host had as yet passed through trial (martyrdom?) to heaven, and 6^{9-11} seems to prevent the supposition that those who had already died were in possession of their final glory.

Our inference in regard to ch. 7 is, then, that the writer introduces foreign (in part Jewish) fragments into his book, apparently interrupting his plan, but not without a purpose. He is writing even more to encourage true Christians than to warn apostates, and so will not let assurance and promise wait until its proper place, when judgment has run its course, but will anticipate deliverance, setting light over against dark in his picture, though dark must predominate.

---

* Trench (*Epistles to the Seven Churches*, N.Y. 1862, p. 287 f.), who proceeds with a new series, thus: fifth, individual's lot at the Day of Judgment; sixth, in companionship with the redeemed; seventh, in communion with God.

Turning to the second pair of insertions, we notice that ch. 10 seems to describe nothing less than a new beginning of the prophet's activity, a new commission and inspiration. It seems meant to explain the new and strange nature of the oracles that follow. Perhaps 10[3.4] may serve to explain the writer's departure from the plan of developing the seventh of one series of judgments in the form of a new series of seven. Instead of the seven thunders which he heard, he is charged to write the contents of the little book of prophecies over many peoples. Yet this apparent change of plan is not a real break in the order, since it is still affirmed that the seventh angel's trumpet will bring the end (10[7]).

The second section, 11[1-13], is still preliminary, as 11[14] (cf. 9[12]) clearly indicates. Its strange character is evident. Yet it may well have been meant to serve the same purpose as 7[1-17], and indeed it falls into two similar parts. 11[1.2], like 7[1-8], assures Christians, the true worshippers in the true temple of God, that they will escape from the evils of the last days. Undoubtedly in their origin these verses referred to the real temple and to Jewish worshippers. This must have been a Jewish oracle uttered some time before A.D. 70. But our author can have used it only as a figure, precisely like the sealing of the 144,000. Its unprepared and fragmentary character are explicable if it was to the writer symbol, not reality. Not otherwise must we judge 11[3-13]. In our writer's plan it must mean that those who do not in the outward sense escape the evil, but because of their testimony and work against the power of evil suffer and die, will nevertheless rise in glory and be avenged upon their enemies (not unlike 7[9-17]). Of course this does not explain the origin of the section. It is full of unexplained allusions, and is clearly part of a larger whole. Its Jewish origin is unmistakable. Bousset regards it as a part of the apocalyptical tradition of Antichrist. It suggests an elaboration of the expectation of the return of Elijah for a work of protest and reform (Mal 4[5.6], Mt 17[17] 11[14]), and the similar hope of the return of Moses based on Dt 18[15.18] (Mt 17[3]). But since our writer introduces it, not as an incident in the direct development of the drama, but in an interlude and for its general message of encouragement in faithful testimony unto death, it is natural to raise the question whether he took the details literally, and expected the two prophets and especially the conversion of the majority of the Jewish people after a partial judgment upon them (v.[13]). How, indeed, could a Christian, in view of the prediction of Christ, even before A.D. 70, have taken literally either the expectation that the temple would be exempt from desecration by the heathen, or that only a tenth of the city would fall? Still less possible would the literal sense of the oracle be after 70. It is true that a Christian hand has touched the narrative (v.[8] end), but it is not probable that the resurrection of the two witnesses is shaped after that of Christ (v.[11]). In its strongly Jewish character, its evident date (before 70), much earlier than the book as a whole, its unprepared insertion, apparently only for its general thought of faithful testimony, martyrdom, and heavenly reward, the section is very instructive regarding the literary manner of the author (see below, iii. 3).

The seventh trumpet must be the third woe (11[14]), and it must bring the consummation (10[7]). Its contents cannot therefore be given in 11[15-18], but must include the rest of the book. The third woe cannot be less than the last conflict with the powers of evil and their overthrow, which forms the theme of chs. 12–20 (see 12[12]). In 11[15-18] we have, therefore, an anticipation in a heavenly chorus of the consummation which is not yet fully come (as in 15[2-4] 19[1-7]); a superscription for chs. 12–20.

The general plan of chs. 11[15]–22[5] is clear. After an introductory anticipation of the kingdom of God and the wrath and destruction that must precede its coming (11[15-19]), Satan, the real power of evil, is introduced, and his present peculiar aggressiveness is explained in such a way as to make it a ground of special hope, not of discouragement. He has been cast down from heaven, and knows that his time on earth is short (ch. 12). The chief agents of Satan in his persecution of Christians—Rome, the empire and the religion—are then introduced (ch. 13). Before judgment against the evil powers begins, the author, according to his custom, inserts various anticipatory passages: a vision of the blessedness of the saints with Christ (vv.[1-5]); a review of the entire teaching of the book (vv.[6-13]): its gospel, the sole worship of God in view of judgment to come; its prediction, the fall of Rome, and the eternal punishment of those who yield to Roman life and cultus; the supreme Christian duty, patience, endurance in Christian life and faith, and the promises of heavenly blessedness for martyrs; then a general vision of judgment in two acts, the reaping of grain and the gathering of grapes (vv.[14-20]). The seven bowls are introduced as finishing the wrath of God (15[1], cf. 'it is done,' γέγονεν, 16[17]). They lead up to the destruction of Rome. But for this great event the writer has larger resources of description at his command. The vision of the woman seated on the dragon shows that it is her own evil demon that will turn against the city, and with its ten horns, which are ten kings, destroy her (ch. 17). Her fall will fulfil the language of prophecy against Babylon and Tyre (ch. 18). It will be finally effected—the end having been once more anticipated in heavenly praises (19[1-10])—at Christ's coming and by Him (19[11-21]). Then, the beasts having been destroyed, Satan's own judgment must come, a preliminary binding and a final destruction (ch. 20). Then at last the consummation so often anticipated will be an actuality (21–22[5]).

Although the writer connects ch. 17 and 21[9ff.] with one of the angels of the bowls, yet it must be evident that we are not to judge this section (12–22[5]) as consisting of the seven bowls (developing the seventh trumpet), and some introductory and concluding sections; for the prelude and postlude would in this case far overbalance the piece itself both in length and in interest and power. On the other hand, the theme of 12–22[5] being the fall of Rome, the present Satanic power, and with it the deliverance and blessedness of faithful Christians, it is clear that chs. 12. 13 and 17–22[5] form the solid framework of the structure. Ch. 19 brings the beasts of ch. 13 to judgment; ch. 20 brings the Satan of ch. 12 to an end; 21–22[5] brings to actuality the anticipation of 11[15-17]. To set aside the passages put in the right-hand column in Holtzmann's scheme for the sake of carrying out the plan of developing the seventh of each series by a new series of seven, would sacrifice the most important parts of the section, in which order and movement are most evident. We must conclude that the writer, in the second half of his book, renounced that plan as not adequate for his material, as ch. 10 may have been meant to suggest. The seven bowls, in fact, form the least original and impressive part of this section, being dependent on the seven trumpets and inferior to them in effectiveness (see below). The seven bowls do not furnish the plan of this section. But we may fairly ask whether we are to give to the sevens quite such significance in the earlier part of the book as is commonly done. If both the seventh seal and the seventh trumpet include all that follows in the book (as also the seventh bowl is simply more fully described in chs. 17–19), then we should not divide by sevens, since this would cut off the announcement of the seventh from its development. The seventh should open, not end, a new section, and the separation of the seventh from the sixth by passages of vital importance (not mere interludes in character) seems to indicate this intention on the part of the writer. Chs. 7 and 10 seem most evidently to mark transitions.

Some such outline as this may therefore with reserve be suggested—

I. Preliminary judgments (4–9).
  1. Visions of the actors (4–6).—
     a. God (4); *b*. Christ (5); *c*. Destructive powers (6).
  2. Promises of deliverance out of coming evils (7).
  3. The judgments (one-third, without producing repentance, 8. 9).

II. Final judgments (10–22).
  1. The prophet's new commission (10).
  2. Vision of deliverance for true worshippers of God, and esp. for martyrs (11^{1-14}).
  3. Prelude, summarizing the action (11^{15-19}).
  4. Visions of the actors (12. 13 [14^{1-5}?]).—
     a. Satan (12); *b*. Roman empire and emperor-worship (13); [*c*. The Lamb and His followers (14^{1-5})].
  5. Promises and warnings (14 [or 14^{6-20}]).
  6. The judgments (15–20).—
     a. Upon the earth, leading up to the fall of the city, Rome (15. 16. 17^{1}–18^{24} [19^{1-10}?]); *b*. Upon the demon-beasts of the Roman empire and religion and their followers (19^{11-21}); *c*. Upon Satan and all that belongs to him (20).
  7. The new world and city (21^{1-8} 21^{9}–$22^{5(9\,?)}$).*

Titles or superscriptions quite frequently summarize the contents of following visions:—1^{1-8} sums up the whole book, 8^{2} is a title, and 8^{3-5} an anticipation of the effect of the trumpets ($8^{6\text{ff.}}$), and the bowls are similarly introduced ($15^{1.\,2-4}$). 11^{15-18} is a summary title of chs. 12–22; $18^{2.\,3}$ summarizes 18^{4-24}; 19^{1-10} summarizes 19^{11}–22^{21}; 21^{1-8} summarizes 21^{9}–22^{5} ($21^{1.\,2}={}^{9-21}$, ${}^{3.\,4}={}^{22}$–22^{5}, ${}^{5-8}=22^{6-21}$).

Yet though we find evidence of a general order in the book which the artistic structure of chs. 1–3 prepares us to look for, we must take account of various departures from any strict order, if we would understand the spirit of the writer. Though the interruption of the sevens by chs. 7 and 10–11^{13} is not due to a want of plan, yet here and in various anticipatory voices, visions, and comments (*e.g.* 11^{14-18} 14^{1-5} 15^{2-4} 19^{1-10} 12^{11}) we find evidences of the practical impulse to encourage and admonish, rather than artistic reflexion. In the failure to observe strict chronological sequence the book is indeed only like Daniel and other apocalypses. There is here as in Daniel a progress towards greater concreteness and detail. In 6^{12-17} the final day of God's wrath seems already come. It is described again in 14^{14-20}. The fall of Rome is announced in 14^{8} as if accomplished; more fully described in 16^{17-21}; still predicted in 17^{16}; announced in 18^{2}, predicted still in 18^{4-24}. Again the letters seem to assume that though trials have been endured, martyrdom is almost wholly future (2^{13}); but in 5^{9-11} many souls of martyrs are seen, and $7^{9\text{ff.}}$ implies a multitude, as 20^{4-6} also does.

(*d*) *Experiences of the seer.*—We have already met with evidence that the author used some ancient materials for their general thought, and not in a literal sense. Before passing to a more detailed study of his use of material, it is important to ask whether he gives a consistent picture of his own experiences.

(1) *The position and movements of the seer.*—

He is on earth in $1^{9\text{ff.}}$; in 4^{1} he is summoned up into heaven, where he may be conceived as remaining through ch. 9 (cf. 6^{9} $8^{1.\,2}$ etc.), though earth is not out of his sight ($6^{12\text{ff.}}$ 7^{1} etc.). That he is literally in heaven is clearly implied in $5^{4\text{f.}}$ $7^{13\text{f.}}$. But in 10^{1}, without a break ('and I saw'), he appears to be on earth (so $10^{4.\,8}$). Earth appears to be the scene of the action in 11^{1-13}, but in 11^{15} voices in heaven are heard, and in v.^{19} the temple in heaven is seen to be open. In 12 the seer seems to be in heaven (?), but in 13 and probably in 14^{1-13} he is on earth. If we read ἐστάθην in 12^{18} (13^{1}), we have a definite reference to the seer's position, comparable to 1^{9}. But the judgment scene 14^{14-20} suggests heaven. Again chs. 15. 16 give a heavenly scene. In 17^{3} an angel carries John away in the spirit into a wilderness to see the woman (Rome), and in 21^{10} to a mountain to see Jerusalem descending out of heaven. $18^{1.\,4}$ indicate that the seer is on earth. In 19^{1-10} he seems to be in heaven, but in v.^{11} on earth again (for he sees heaven open, as in 4^{1}); so also in 20^{1} 21^{2}, and probably in $21^{10\text{f.}}$.

There is so little law in these movements, and so little care to make the connexion clear, that one might infer that our writer leaves such references as they stood in his different sources; but this would mean that the vision was to him a form, not a reality.

(2) *The heavenly scenes.*—

The scenery in heaven is not clearly described. Ch. 4 pictures a throne of God, with 24 elders on thrones around it, seven lamps before it which are the seven spirits of God, before it a glassy sea, and, in the midst of it and around it, four living creatures. Here in the midst of the throne stood the Lamb (ch. 5), whose seven eyes are the seven spirits of God, of which the seven lamps were already a symbol. About the throne and the elders and living beings are myriads of angels (5^{11} 7^{11}). Here also are the multitudes who have come out of great tribulation (7^{9-17}). Of them, however, it is said not only that they are before the throne of God, but that they serve Him in His temple. 3^{12} has prepared us for the conception of a temple in heaven, and in 6^{9} we have suddenly been made aware of 'the altar,' beneath which are the souls of martyrs. Now the trumpets are sounded by 'the seven angels which stand before God,' 8^{2} (cf. 1^{4-6}). These did not appear in the scene just drawn, unless they are the same as 'the seven spirits,' as 1^{4} might indicate. The altar is mentioned again, and, perhaps in distinction from it, 'the golden altar which is before the throne,' the altar of incense (8^{3-5}). From the horns of this 'golden altar which is before God' comes the voice which directs the angel of the sixth trumpet ($9^{13\text{f.}}$). The seventh trumpet reveals the original scene (the throne and elders and living beings, 11^{15-18}); but then we read, 'there was opened the temple of God that is in heaven,' and in it the ark of His covenant was seen (11^{19}). After this the 24 elders appear only in 14^{1-5} and 19^{1-8}, two somewhat similar passages, though 15^{2-4} may have the same setting (cf. 4^{6}). One of the four living creatures is mentioned in 15^{7} in connexion with the temple; but more often the temple scenery stands by itself. Out of the temple comes the angel who summons the reaper (14^{15}) and the angel who is to gather the grapes (14^{17}), whom another angel from the altar directs (14^{18}). Out of the temple come the seven angels, having the seven last plagues, and the temple is filled with smoke from the glory of God, so that it could not be entered, although open (15^{5-8}). A great voice from the temple commands them (16^{1}); 'the altar' affirms the justice of the judgment (16^{7}), and the final, 'It is done,' comes 'out of the temple and from the throne,' uniting the two (16^{17}).

It is not easy to unite in one picture the conception of God as sitting on a throne surrounded by His court, and of His dwelling, in heaven as on earth, in the temple's holiest place, from which His voice or messengers issue forth. Since the scenery of the throne is that of the seals, and the temple scenery that of the bowls, it is natural to think of this unharmonized element as due to sources. The author has mixed the scenes somewhat (15^{7} could be an insertion, as the angels came out of the temple already having seven plagues, vv.$^{1.\,6}$); but he does not harmonize them, or paint a heaven that can be imagined. The new Jerusalem must also have been in heaven (3^{12} 21^{2}), though the seer beholds it only as it descends to earth ($21^{11\text{f.}}$). The description of the new heaven and earth resolves itself into the description of a city, and in this there is no temple (21^{22}), but the throne remains the final seat of God ($20^{4.\,11}$ 21^{5} 22^{1-3}). If the writer had wished to paint a clear, consistent picture, he could easily have done so. The inference that he took his descriptions as they were, and valued them as poetical not literal accounts, is surely a natural one.

---

* It is evident that 17^{1} and 21^{9} are meant to mark the beginnings of parallel sections, and it is possible that the likewise parallel 19^{10} and 22^{9} are meant to mark their close.

(3) *Form of inspiration.*—The same freedom and disregard of formal consistency is evident in the representation of the way in which the seer received his revelations. There is no set way, no fixed medium.

The first verses seem explicit, yet leave us uncertain whether we are to conceive of the writer as receiving Christ's revelation through angel (1^{1}) or by vision ('all the things that he saw,' 1^{2}, cf. 1^{19}). The letters are given by Christ in the first person. Yet they are introduced by a description of Christ in the third person, and the expression 'hear what the spirit saith to the Churches' suggests that the letters are dictated to John by an angel-spirit in the name of Christ. The voice which John hears at first ($1^{10f.}$) must be the voice of Christ Himself (cf. 1^{19}). The same voice summons John into the open heaven (4^{1}). He is there 'in the spirit' (4^{2}, as in 1^{10}). But it does not appear to be Christ Himself who shows him what is to come. Christ appears as an actor in the drama of the future, not as the seer's interpreter. Not till 16^{15} is His voice heard again, and then not till 22^{7} (?). In 17^{1} one of the seven angels of the bowls summons John and carries him away in the spirit into a wilderness to see the judgment upon Rome. This is the sort of angel guidance that 1^{1} would lead us to expect, but which we look for thus far in vain. This angel fulfils his function as interpreter ($17^{7\text{-}18}$); but then we hear another angel announcing Babylon's fall ($18^{1\text{-}3}$); another voice from heaven pronouncing the prophetic denunciation over her ($18^{4\text{-}20}$); and still another angel predicting the fall by deed and word ($18^{21\text{-}24}$). Then are heard various voices from heaven ($19^{1\text{-}8}$); and only then, in $19^{9.\,10}$ ('and he says to me'), does the original angel-guide speak again. He then rejects John's impulse to worship him (cf. Asc. Isaiah 7^{21} $8^{4.\,5}$) with the words, 'I am a fellow-servant of thee and thy brothers who have the testimony of Jesus; worship God: for the testimony of Jesus is the spirit of prophecy' (19^{11}). The last clause is often struck out as a gloss by critics (Bousset, Hilgenfeld, etc.), but this is venturesome. 'The spirit of prophecy' should mean the spirit from God which inspires the prophet; that is, in this case, the angel himself (cf. 22^{6}). So he would say, 'I am only one of you who have the testimony of Jesus; indeed this testimony constitutes my very being.' The angel-spirit of prophecy is simply the personified testimony of Jesus, the word of Jesus Himself. As a messenger this angel is on an equality with John,—because his message is wholly and simply the message of Christ. There follow visions of the first and of the final judgments (19^{11}–20^{15}), and an introductory (summary) vision of the consummation ($21^{1\text{-}8}$), in which are heard the words of God Himself (vv.$^{5\text{-}8}$); and then 'one of the seven angels who had the seven bowls' (not the same one as before?) carried John in the spirit to a mountain to see the new Jerusalem. It is this angel who measured the city and showed John the details of the vision ($21^{15\text{-}17}$ 22^{1}), so that when 22^{6} begins 'and he said to me,' it can be only the angel that speaks (one of the 'spirits of the prophets'); but in v.^{7} his words become Christ's words, 'behold, I come quickly.' No wonder John would again worship him, but again he classes himself with the prophets. As a person he is only a revealer, a voice; but his words are those of Christ. So when he speaks again ($22^{10\text{ff.}}$) his words again become Christ's words (vv.$^{12\text{ff.}}$). Now it is to be observed that the seven angels of the bowls (ch. 15), two (?) of whom are the imparters of these last prophecies of the book, naturally lead us back to 'the seven angels which stand before God,' to whom the trumpets are given (8^{2}), and these again to the seven lamps burning before the throne, which are the seven spirits of God (4^{5}), from whom (1^{4}), as from God and Christ, John's message comes. When now Christ is described as 'he that hath the seven spirits of God' (3^{1}), and is pictured as the Lamb with seven eyes 'which are the seven spirits of God sent forth into all the earth' (5^{6}), we have certainly significant indications of what the writer meant by calling his book an 'apocalypse of Jesus Christ,' and of his idea of the inspiration of a Christian prophet. Angels, however realistically described, are hardly more than a means of expressing the fact that the writer was somehow conscious of having a message from Christ for the Churches. Any further interpretation of his consciousness must be deferred until we have studied the sources and relationships of his materials.

Any set and consistent form of representing his experiences, however, the author seems purposely to avoid. Apart from $17^{1\text{ff.}}$ $21^{9\text{ff.}}$ we have no indication of a special interpreting angel, taking the part of Gabriel in the Bk. of Daniel. The speakers in the book are very many. The underlying faith in the kingship of God and of Christ, and its ultimate triumph, are expressed in heavenly choruses, led by the twenty-four elders and the four cherubim, but joined in by multitudes of angels and of glorified men ($4^{8\text{-}11}$ $5^{9\text{-}14}$ $7^{9\text{-}12}$ $11^{15\text{-}18}$ 12^{10} $14^{2.\,3}$ $15^{2\text{-}4}$ $19^{1\text{-}7\,(8)}$). One of the elders instructs John in 5^{5} and $7^{13\text{-}17}$. Often it is simply 'a voice from heaven' that he hears ($10^{4.\,8}$ 14^{13} 18^{4} 21^{3}, cf. 16^{17}), or from the horns of the altar ($9^{13\text{f.}}$), or from the altar itself (16^{7}). He records words of God, 1^{8} $^{(7\,?)}$ $21^{5\text{-}8}$ 16^{17} (?); of Christ, $1^{11.\,19.\,20}$ 2. 3. 16^{15} $22^{7.\,12\text{ff.}}$; of the spirit, 14^{13} 22^{17}. There are beatitudes uttered by Christ (16^{15} $22^{7.\,14}$), by a voice from heaven (14^{13}), by the angel-guide (19^{9}), by John (1^{3}). Sometimes he seems to interrupt the story of what he had seen with a direct word of his own to the reader ($2^{7\text{a}}$ etc. $13^{9.\,10}$ 13^{18} 14^{12}, cf. 17^{9}?). Among the other voices that are heard are those of the souls of martyrs (6^{10}): of various angels undefined (7^{2} $14^{6.\,8.\,9.\,15.\,18}$ 19^{17} etc.); of 'the angel of the waters' ($16^{5\text{f.}}$); an eagle (8^{13}); the rod (?11^{1}). At the beginning and at the end the book is declared to be from Christ Himself, His testimony ($1^{1.\,2}$ 22^{16}). The part which the angels perform might almost be regarded as pictorial, since the writer reduces the significance of these beings, who are the uniform actors and speakers in the Jewish apocalypses, to that of messengers of Christ. He is the primary and final actor in the book (opens the seals, ch. 5 f., and executes the judgment, $19^{11\text{ff.}}$), and He is the real speaker.

Here also, as in the case of the place and movements of the seer and the heavenly scenery, a variety of sources might explain the diversity of the representation, but we must also suppose the author to be relatively indifferent to formal consistency. He must, one is forced to think, have taken the external language of apocalypses in a figurative or poetic way. The only other hypothesis would seem to be that of composite origin (as held by Völter, Spitta, etc.); but the effort to bring consistency out of the book by analysis and the reconstruction of sources out of which it was gradually and unskilfully put together, fails to do justice to the unity of style and even of plan which the book has been found to exhibit. Moreover, this effort has been made by many able men, and, according to the prevailing opinion of scholars, has failed.

In order, however, to test the possibility of a free, more or less poetic, use of traditional apocalyptical material, we must examine our author's use of tradition at various points more closely.

3. *Sources.*—(*a*) *Old Testament.*—Although Rev. contains no direct citations from the OT, it is full of OT language from the beginning to the end. An impression of its dependence on OT phraseology may be gained from the text of Westcott and Hort, or from that of Nestle, in which such allusions or reminiscences are printed in a distinct type. In the corresponding list of references in WH's Appendix, pp. 184–188, out of the total number of 404 verses in the book about 265 verses contain OT language, and about 550 references are made to OT passages.[*] The material is still more fully gathered by Hühn (*Die alttest. Citate und Reminiscenzen im NT*, 1900).

Nothing is more important for the understanding of our author's mental and literary processes than a close study of his use of OT language.

The bearing of such study upon the interpretation of our book can here only be suggested by illustrations. One of the simplest cases is the prophetic denunciation of the fall of Babylon (Rome) in ch. 18. It is composed almost wholly of material taken from the prophetic woes over Babylon (Is 13. 14, Jer 50. 51), Tyre (Is 23, Ezk 26–28), and, in a slight degree, Edom (Is 34). Even the admonition that might seem to have direct reference to the historical situation, 'Come forth, my people, out of her,' etc. (18^{4}), is directly borrowed from prophetic utterances (Jer $51^{6.\,9.\,45}$ 50^{8}, Is 48^{20} 52^{11}), and has there rather than here its historical explanation. Yet the chapter does not make the impression of being a laborious piece of patchwork. It has a unity of its own and a high degree of impressiveness, and seems to be the work of one whose mind is filled with the language of prophecy, and who draws abundantly, and of course consciously, from his storehouse, and yet writes with freedom and from a strong inner impulse of his own, and elaborates with his own conceptions the themes which the prophetic words contain. So he makes out of the old a product in a real sense new, a poetical whole. But what shall we say of his putting this product into the mouth of angels? It is easier to attribute such a literary composition to a poet than to a voice from heaven. Even the action of the angel in 18^{21} rests on the symbolic act of Jeremiah ($51^{63.64}$). And if our writer says that he hears and sees these things, must we not judge the nature of his vision by its contents? A literal voice from heaven this certainly cannot be, and we seem shut up to two possibilities regarding it: either the angels and the voice from heaven belong wholly to the poetry of the piece, its literary form, or they express the writer's own interpretation of the strong impulse, as if from without, under which he wrote.

---

[*] The allusions agree in part with the Heb., in part with the LXX. WH mark 33 references as distinctly from Heb. (and Chald.), 15 as from LXX; 5 are marked Heb. and LXX, *viz.* 4 references to Ex 19^{16} (4^{5} 8^{5} 11^{19} 16^{18}) and one to Zec $3^{1\text{f.}}$ (12^{9}). Schürer (^{3} iii. 323) cites 9^{20} 10^{5} 13^{7} 20^{4} as citations from Daniel, which follow Theodotion more closely than LXX. See Bludau, 'Die Apokalypse und Theodotions Daniel-Uebersetzung,' in *Theol. Quartalschrift*, 1897, pp. 1–26. Salmon (*Introd. to the NT*, p. 662 f.) argues that the citations in Rev. show a nearer relationship to Theod. than to LXX, referring to 9^{20} 10^{5} 12^{7} 13^{7} 19^{6} $20^{4.\,11}$; on the other side, 1^{14} 19^{16}. Cf. Swete, *Introd.* p. 48 f.

Another instructive illustration of the author's use of the OT is to be found in his description of the new Jerusalem, 21^1–22^5. This is largely taken from the anticipations of the prophets of the Exile, Ezekiel and Deutero-Isaiah, with reference to the return and the rebuilding of Jerusalem. Features are added from other sources. Here, as in ch. 18, the impression is not that of mere clipping and piecing, but rather that of the work of a mind full of the Messianic language of the prophets, writing out of a genuine and deep religious and poetic emotion, with a dependence on the OT which is free, not slavish, and yet with very little real inventiveness. Yet this also is shown to the seer by an angel, who seems to be in general the speaker (see 21^{15} ὁ λαλῶν, 22^6); and an action of his is described 21^{15-17} which is taken from Ezekiel ($40^{3ff.}$). In this case, more clearly than in ch. 18, we may suspect a certain limitation of the author's imagination by his sources, which is not inconsistent with a large measure of freedom in the use of them. He has mastered the OT material of this sort, and can use it effectively, but cannot go much beyond it. How otherwise can we explain the emphatically Jewish picture of a future which was certainly to this writer universal in scope; the presence still of thoroughly earthly features in a consummation which must surely, in the writer's view, be heavenly; the appearance still of nations and kings and their wealth after heaven and earth have passed away? He has little but the old familiar national and earthly language at command for the description of that which heaven contains for Christian hope. He can describe the Christian heaven only in Jewish language. But though bound in language he is not bound in thought. He knows no more impressive and expressive language (nor do we); but the language is poetry to him, it is figurative, not literal, chosen for its poetic worth and emotional effect, which belonged to it, indeed, partly because it was old and familiar. It must of course be recognized that the most powerful imagination comes quickly to an end if it attempts to leave the earth in its descriptions of heaven. Religious faith and hope cannot do better than take the language which the greater souls have created, which generations have shaped, which age has hallowed, and use it not for its literal but for its emotional and poetic worth, to symbolize and suggest inexpressible realities.

Jewish literature furnishes other similar collections of OT Messianic imagery (To 13, etc.); and the possibility that some earlier (Jewish) mind had already shaped the material in 21^9–22^5, and that our author, in 21^{1-8}, introduces and summarizes this section, and adds his own concluding sentences (22^{6-21}), is to be considered.

A still more striking illustration of our author's dependence on OT language, yet his freedom in the use of it, both in combination and in application, is his description of Christ in 1^{12-20}. Almost all of it is taken from Daniel, but it unites in a most surprising way features from the descriptions of the one like a son of man, and of the Ancient of Days, in Dn 7, with still more from the angel (Gabriel) in Dn 10. The seven golden candlesticks and the seven stars are without parallel in Daniel. Something can be said, however, as to their source and use. The former was of course a familiar OT symbol (Ex 25^{37} 37^{23}) which Zech. (4^2) uses in an unearthly sense, explaining that the seven lamps are the seven eyes of J″, which run to and fro through the whole earth (4^{10b} following v.^{6a}). He sees by the candlestick two olive-trees (4^3), and evidently interprets their two branches as signifying Zerubbabel and Joshua, so that the two trees are the Davidic and the Aaronic houses. These two men, Zech. would say, have the eyes of the Lord upon them in favour and blessing. But this is a free application by the prophet to the historical present and to his practical purpose of a symbol which originally, no doubt, pictured the seven planets and the way in which their light was constantly replenished by the oil from ever-growing trees. It was a mythological symbol (Gunkel, *Schöpfung*, pp. 122–131), which Zech. used as poetry, not interpreting all of the symbol (4^{2b}), and perhaps adding a feature for the sake of the interpretation (4^{12}). Now in Rev 1^{20} the writer chooses to identify the seven lamps with the seven churches among which Christ is and moves. But in 4^{5b} he sees seven lamps burning before the throne of God, which are, he explains, the seven spirits of God, affirmed in 1^{4b} to be before God's throne (cf. 8^2); and even in the letters (3^1) Christ is described as the one who has the seven spirits of God and the seven stars, so that this interpretation of the lamps was in his mind by the side of the other. When, still further, we read that the Lamb has 'seven eyes, which are the seven spirits of God sent forth into all the earth' (5^6), with evident allusion to Zec 4^{10b}, we are able to realize how far from a slavish literalness and formal consistency our author's use of OT figures is. Finally, Zech.'s figure reappears in 11^4, where the two witnesses are declared to be 'the two olive-trees and the two candlesticks [what two?] standing before the Lord of the earth,' a free identification for a purpose, similar in kind to that of Zech. himself, this time certainly made not by our author, but by some source.

Our writer cares much for OT prophetic language, and cannot easily add much to it, but he applies it freely to new uses. Note esp. that we have in Rev. no such anxious effort to interpret an OT prediction, assuming the necessity of its literal fulfilment, as Dn 9 contains. The relation of 11^4 to Zec 4, and of 20^8 to Ezk 38 f., is wholly different.

Other illustrations could readily be given,—such as the relation of ch. 4 to Is 6 and Ezk 1,—but enough has been presented to justify the following presuppositions with reference to passages in our book which contain imagery not derived from the OT—(1) that such imagery, if it is at all elaborate, is not the author's free invention, but is borrowed from some literary or oral prophetic traditions; (2) that the writer does not feel bound to leave it as it is, but is free to combine and interpret it to suit his own purpose, so that the interpreter must distinguish sharply between the present use of the symbols and their original use. If this distinction is necessary in 21–22^5 and 1^{9-20}, it will be no less necessary in 11^{1-13} 12. 13, etc.

(*b*) *Jewish apocalyptical traditions.*—The line that separates uncanonical from OT material in Rev. is not a sharp one. It would indeed be natural that Jewish apocalyptical traditions should consist largely of expositions and elaborations of OT material. The picture of the throne of God (ch. 4) is unquestionably based upon that of Ezk 1. 10 and Is 6 (cf. also the probably older passages, Ex 24^{10}, 1 K 22^{19}). The four living creatures, cherubim, are taken directly from Ezekiel, and, in spite of differences, need no other explanation. It is of course not to be assumed that they have no history before and after Ezekiel (cf. the four presences in Enoch 40 and Apoc. Bar 51^{11} 21^{6}, and the four angels in Enoch 87$^{2.3}$ 88^{1} 90^{31}). For the seven lamps which are the seven spirits of God we have already found points of connexion in the OT, but we need to adduce such passages as To 12^{15}, Enoch 90^{21}, in order to realize how fixed an element in apocalyptical imaginations these seven spirits (or angels, archangels) were. The use of the article in Rev 1^{4} 4^{5b} 8^{2} is itself proof of the familiarity of the conception. That foreign speculations, Persian or Babylonian, lie behind it is probable (see Cheyne, *OP* 281 ff., 323 ff., 334 ff. ; Gunkel, *Schöpfung*, 294–302, and *Archiv f. Religionswissensch.* 1898, 294–300 ; Stave, *Parsismus*, 216–219). It is therefore a natural inference that the twenty-four elders, clothed in white, sitting on thrones and crowned, come from tradition, and are not an invention of the author. They represent probably not the Christian Church, twelve tribes and twelve apostles (though 21^{14} may indicate the writer's desire to add the Christian to the Jewish twelve), but the glory and power, especially the reigning or judicial power of God, His heavenly court. They are associated, as are the seven spirits and the four cherubim, with God and His throne, not with the creation (see Gunkel, *Schöpfung*, 302–308). Is 24^{23} gives probable evidence of the antiquity of the conception (cf. Is 63^{9}, LXX). With the general description of God's throne should be compared, *e.g.*, Enoch 14. 71, Secrets of Enoch 29. 22.

We have already found reasons for regarding 11$^{1\text{-}13}$ as a Jewish oracle (or two fragments of a Jewish apocalypse), used by our author in a sense wholly different from its original literal meaning. It is a most convincing illustration of our author's union of dependence on traditional forms of expression, and independence of the traditional use and meaning of such forms.

The great sign in heaven which ch. 12 presents can be accounted for only in a very slight degree on the basis of the OT. Yet nowhere is the writer's dependence upon traditional material more certain. Assuming that he did not invent these figures, it is not difficult to understand what he meant to say by the use of them. The chapter contains a picture, in some sense an explanation, of Satan's present power in the world, and his fierce hostility to the Christian Church ; and at the same time the assurance that his power is soon to end. Christ escaped his hands, and is with God. Satan has already been cast down from his old place in heaven, and no longer brings accusations against the saints before God ; and, though he is now all the more determined in his assaults upon Christ's brethren on earth, his reign is doomed to a speedy end. This application of the figure, however, by no means explains its origin. Many of its details can be fitted to this use only by violence, if at all, and could not have been devised for the purpose. What then was the source, and of what sort was the writer's use of this material?

Gunkel's book must be regarded as little short of epoch-making in its significance for the interpretation of this chapter, even though serious doubt be felt regarding certain of his conclusions. He offers convincing proof of the long and widespread influence in Hebrew literature of the Babylonian myth of creation—the victory of Marduk, the god of light (the sun), over the chaos-beast Tiâmat, the dragon of the deep. He traces the transition from a cosmological to an eschatological use of the conception, on the principle, which explains many features of the Jewish hope, that God will make the last things as the first (Barn. 6^{18}) ; and the interpretation of the dragon as a historical instead of a natural power. In this way the myth becomes a poetic expression of the expectation that the hostility of the world-ruling nation against Israel will come to a supreme manifestation ; that then J″ will intervene directly, or through the angel Michael, and again, as at the beginning, the dragon will be bound or slain (cf. Is 51$^{9.10}$ 27^{1}). 'The beast that comes up out of the abyss' (Rev 11^{7}) is this well-known figure in Jewish eschatology. It could be regarded as a symbol, or representative of the hated nation, as in Dn 7 it becomes four beasts, to describe the four successive masters and enemies of the Jewish nation, and as in Rev 13 it is the Roman empire; or it could be more distinctly and personally conceived, as in Rev 12, as the Satan who gives the hostile kingdom its evil power. It could also be conceived of as a *man* in whom evil reaches its height (Antichrist, perhaps Rev 11^{7}).

Gunkel is not contented, however, with this general and probable identification of the dragon of ch. 12. He proceeds to defend two much more dubious positions. *First*, that our chapter rests ultimately upon, and follows closely, a part of the Babylonian myth of which we have no other remaining record—the account of the birth of Marduk, his escape from the dragon who knows him to be his destined destroyer, and the dragon's fierce persecution of his goddess-mother during the period of the boy's growth to maturity, 'the three and a half times,' from the winter solstice to the spring equinox [?]. *Second*, that in contrast to the free poetic use of such material in the earlier prophetic and poetic books of the OT, we find in the apocalypses an increasing tendency to look upon these ancient and mysterious figures with awe, and to believe that they really contained, and could reveal to one who had wisdom, the explanation of present evil and the secrets of its coming end. This reverence for apocalyptical traditions explains, Gunkel contended, what nothing else but literal vision could explain, the confident belief of these writers in their own predictions. He finds, therefore, in such sources as these not only an illustration of the literary method of the seer, but an explanation of his self-consciousness, a psychological account of apocalyptical writings. Both of these positions of Gunkel are insecure, and from the second one he has himself in part withdrawn. The freedom with which we have found our author combining and modifying OT materials renders it hazardous to attempt to reconstruct his sources when they are unknown, and also prevents the assumption that he looked upon such materials with awe and derived from them his revelation.

It is not probable that the material in Rev 12 stands in its original form and order. Gunkel himself recognized that v.^{6} and vv.$^{7\text{-}16}$ offer two variants. Wellhausen (*Skizzen und Vorarbeiten* 6 Heft, p. 215 ff.) regards $^{1\text{-}6}$ and $^{7\text{-}14}$ as doublets, and would distinguish two actions in the original story which are here confused. 1. In heaven, the dragon wars with the angels, or with the sun, moon, and zodiac (vv.$^{3.7.1}$), is conquered and cast down to earth with his angel host (vv.$^{8.9.4a}$). 2. On earth, he makes war with the woman who bears the son (^{4b} is already an earthly scene), the son is snatched up to heaven (^{5}), the woman flees into the wilderness, the dragon pursues her there, but must leave her ($^{6=13\text{-}16}$), and turns against those of her seed who did not escape with her. There must then have followed an account of the overthrow of the dragon by the rescued Messiah after His growth to maturity. Something like this, Wellhausen thinks, was a Jewish apocalypse of the siege of Jerusalem. It described how the remnant (the woman) had escaped out of the city and been rescued through great dangers; how the Romans (dragon) had turned against those who remained in Jerusalem, who are to be destroyed (Rev 11$^{1.2}$ is, however, a fragment of the same time which anticipates the rescue of those, the Zealots, who occupied the temple itself during the siege). The fall of the Roman power itself must follow at the hand of the Messiah, who has been born, according to prophecy, in Palestine, but was translated at once to heaven, so that He will come as a heavenly being, according to the more transcendental Messianic hope of late Judaism. So Wellh. offers a *literary-critical* and *contemporary-*

historical explanation of ch. 12 in opposition to Gunkel's *tradition-historical* explanation.

We may regard Wellhausen's analysis as plausible, for the war in heaven and the casting of the dragon down to earth must originally have preceded his persecution of the woman (vv.^{4a} and ^{13} suggest this order). But Gunkel is surely right in denying that the figure is the pure invention of the Jewish writer, whom he as well as Wellh. accepts. Its history goes further back, and its original connexion with a sun-myth is highly probable. It is a striking fact that Greek mythology in its story of the birth of Apollo, and the attempt of the dragon Pytho to kill his mother (Dieterich, *Abraxas*, p. 117 ff.), and also the Egyptian story of the birth of Horus (Bousset, p. 410 f.), contain striking points of likeness to Rev 12, so that Gunkel's resort to a postulated Babylonian story may not be necessary. In all of these sun-myths, however, the flight of the woman is before the birth of the child, and for its rescue from the dragon.

The questions left open by these recent discussions of the chapter are many, and the hypothesis of a Jewish Messianic use of a heathen sun-myth, and then a Christian adaptation of the Jewish form, leaves room for much diversity of opinion in detail; yet it is a wholly credible hypothesis, and the actual history of the tradition here embodied is probably more rather than less complex than the theory.

Heathen may well be the description of the woman (v.^{1}) and of the dragon (vv.$^{3.\,4a}$), his effort to engulf the woman, her wings, and the wilderness to which she flies ($^{14\text{-}16}$). Jewish (certainly not Christian) may be the idea of the birth and immediate translation of the Messiah to God (v.^{5}),* so also the office of Michael (^{7}), and perhaps a change of order by which the woman's flight is made to follow the birth of the child. The Hebrew language, according to Wellh. and Gunkel, lies behind the Greek of the chapter. Christian is v.^{11}, and, moreover, so plainly out of keeping with the rest, as almost to prove that the Christian writer is using material already shaped (cf. Vischer). The verse contains the message of our writer, and is one of his characteristic anticipatory sayings. Christian may also be the change of order by which Christ's birth and ascension are made to precede the casting of the dragon out of heaven (cf. Jn 12^{31} 14^{30} $16^{11.\,33}$, 1 Jn 3^{8}, Col 2^{15}). This gives Christ an earlier and higher part in the drama than the Jews ascribed to their Messiah.

In answer to the question as to the writer's use of this uncanonical material, we are bound to conclude that it was as free and poetical as his use of OT conceptions. V.^{11} gives us the clue. The victory of Christian faith over the world through martyrdom is the counterpart on earth, the interpretation for man, of the victory of Michael over the dragon in heaven. The place of Michael here, where we should expect only the direct deed of Christ, shows both the extent of the writer's dependence on tradition and the confidence with which he finds a Christian meaning behind unchanged Jewish forms.

Are we not to see, then, in ch. 12 any reference to historical factors and events? Wellhausen's exact determination of the history here symbolized is far from convincing, and, moreover, it fails to explain many features in the picture. It need not, however, be doubted that the dragon was, at some point in the genesis of the chapter, regarded as a symbol of the Roman empire. His seven crowned heads and ten horns mean world-rulership, and his persecution of the woman's seed is the same persecution with which our whole book deals. So far, indeed, even Gunkel allows the presence of contemporary history in ch. 12.

The case is a more complex one in chs. 13 and 17, but the difference is one of proportion and degree. Traditional elements are here in abundance, and beyond dispute, yet the reference to Rome is more specific and detailed. Gunkel admits the latter element here (as in Dn 7. 8, Enoch 85-90, 4 Ezr 11. 12, Apoc. Bar 53 ff.), but restricts it within narrow limits, and will by no means allow that these figures were freely invented allegories, every feature of which can be explained as a reference to contemporary history. He differs from the ruling critical opinion most radically in his refusal to recognize any allusion to Nero. Two questions must be kept quite distinct in the study of these chapters: (1) the question how much is due to apocalyptical tradition, and how much is re-shaped or invented for the sake of the application of the traditional figures to Rome; and (2) the question whether this application is made by the writer of our book, or was already present in the—possibly Jewish—sources from which he drew.

The seven heads and ten horns appear in each case (12^{3} 13^{1} 17^{3}). The Roman world-empire was meant by all. Yet the differences are so great that one must conclude that more or less independent traditions lie behind the three chapters, even if they are ultimately traced to one root. The seven heads and ten horns sum up the outfit of the four beasts in Dn 7, though they do not need that explanation. We can well suppose the numbers to have been symbolic at first, but the effort to apply them to individual kings, and so to estimate the nearness of the end, was inevitable. There is evidence in the chapters of different efforts of that kind.

In 12^{3} it is the seven heads that are kings, in 13^{1} it is the ten horns, but in 13^{3} the smitten head must mean a king. The latter is commonly interpreted (by Victorinus, and by modern scholars from Eichhorn, Lücke, Bleek, down to Holtzmann and Bousset) of Nero's death, which ended the Julian dynasty, and seemed likely for a time to bring the empire to an end in anarchy. Gunkel thinks the Hebrew original read 'the first head,' hence Julius Cæsar, whose death threatened the empire, but issued in its greater power (cf. Dn 8^{8} on Alexander's death). In $17^{10.\,11}$ the seven heads are the seven kings of Rome, and the writer feels bound by that number even when he needs to add an eighth. The ten horns, on the other hand, are apparently allied kings.

The evidence of later adaptations or interpretations of given figures is often clear. The seven mountains of 17^{9b} is so clearly such an addition for the sake of the identification of the woman with the city Rome, that one is the more inclined to find in vv.^{15} and ^{18} also allegorical interpretations, and to question whether the woman was originally invented as a figure of Rome. She is now, of course, the city Rome (vv.$^{5.\,6}$), and may have been created in that sense; but even if so, not, we may be almost certain, by our author.

The second beast in $13^{11\text{ff.}}$ is evidently now the prophet or priest (priesthood) of Roman emperor-worship (cf. 16^{13} 19^{20} 20^{10}). But here also older traditions are to be supposed. Bousset regards this as a Jewish figure of Antichrist (*Komm.* Excursus on ch. 13, *Antichrist*, p. 121), and a Jewish apocalyptical writer may very well have interpreted as Antichrist the religion of emperor-worship, and put this by the side of the beast who stood for the empire itself as its helper in evil. None of the many attempts to find a definite person in the second beast (Vespasian, Simon Magus, Paul!, etc.) have made any approach to success. The personal interpretation of the first beast, however, as signifying Nero, has become almost a fixed assumption of critics. Gunkel's attack upon this stronghold of the *contemporary-historical* method has not changed the prevailing opinion (see Bousset, Holtzmann, etc.). It has, however, served to emphasize the fact that if the beast from the abyss is here *by some one* made a symbol of Nero, yet the beast was not first *invented* for this use, and it is not certain by whom, whether by our author or by a source, the identification was made. The opinion, indeed, does not go beyond probability. In view of the embodiment of the supernatural power of evil in Antiochus Epiphanes in Daniel, it is not possible to settle the question by a general appeal to 'congruity, analogy, proportion,' and a sarcastic thrust at the famous critics who have 'placed T. Claudius Nero along with Christ, Satan, Death, Hades, the Church, and other powers and principles which constitute the *Dramatis Personæ* of the Apocalypse' (Benson, p. 159). But it must be said that the evidence is of a wholly different sort from that which Daniel furnishes, with its detailed history of Antiochus (chs. 8. 11), and is not such as we should expect if the writer had set out to indicate his belief that Nero would return from the grave, and be the demonic power of evil in the last assault of evil against good. On the origin and history of the belief in Nero's return the fullest investigation is that of Zahn (*Zeitsch. f. kirchl. Wissensch. u. k. Leben*, 1885-86). See also Bousset, *Komm.* p. 475 ff., and Charles, *Ascension of Isaiah*, pp. li–lxxv.

---

* Bousset omits the Jewish link in the chain because this feature has no parallel in the Jewish Messianic hope.

The chief evidence that Rev. refers to this expectation is in ch. 17. The return of one of the seven kings as an eighth, who is nevertheless also the beast himself ($v.^{11}$), suggests this more or less current expectation. In the ten kings of $v.^{12}$ it is possible to find the Parthian kings, with whom it was believed that Nero would return against Rome. And the idea that the city Rome would be destroyed by the very beast that represents her empire, in league with outside kings ($vv.^{16.\ 17}$), is difficult to explain at all apart from the Nero myth, which would perfectly explain it. If Nero be found here it is natural to infer that $v.^{8}$ describes in general terms his death, return, and final destruction. Yet this formula ('was, and is not; and is about to come up out of the abyss, and to go into perdition') so fully sums up the general apocalyptical theory of the power of evil (the history of the chaos-dragon, Gunkel), and seems shaped so clearly in contrast to the formula which sums up the nature of God ('who was, and who is, and who is to come'), that the reference to Nero may be, if present at all, secondary. The verse in which our author's hand is most clearly seen ($v.^{14}$) so interrupts this Nero story with an anticipation of $19^{19\text{ff.}}$ (for how are the ten kings to be overcome by the Lamb and His followers before they assist the beast in the destruction of Rome?) as to suggest that Nero was not in his mind, but here, as in 12^{11}, only the Christian conflict with evil. So also the interpretation of the slain and healed head in 13^{3} is uncertain, and even the number 666 gives no secure support to this historical reference. The Greek solution of this riddle, ΛΑΤΕΙΝΟΣ, '(THE) LATIN,' which is as old as Irenæus, though not adopted by him, is still held by many; but the Hebrew נרון קסר Nero Cæsar, — which in a Latin spelling נרו קסר would yield 616, an early variant, — has far the larger number of advocates. Yet קיסר is the proper spelling of *Cæsar*, which would make 676. And when in answer to this objection it is said that an apocalyptical writer would prefer 666 to 676, because of its symmetry, and because it corresponds to the number of the name Jesus (ΙΗΣΟΥΣ=888), it is natural to ask whether 666 might not have been chosen at first outright for its symbolic meaning, to signify the one who persistently falls short of holiness or perfection (seven), as Jesus goes beyond it in the fulness of His character and power (so Milligan, *Baird Lecture*, p. 328; Briggs, *Messiah of the Apostles*, p. 324). So the number $3\frac{1}{2}$, the length of the reign of evil (Dn 7^{25} 12^{7}, Rev $11^{2.\ 3.\ 11}$ $12^{6.\ 14}$ 13^{5}) needs no other explanation than the symbolism of the broken seven: the power of evil will be cut off in the midst and come to an untimely end. If, however, the number is to be interpreted by *gematria*, another view claims serious attention. Zahn (*Zeit. f. kirchl. Wissensch. u. k. Leben*, 1885, p. 568 ff.) argued that Irenæus opposed the reading 616 because those who held it did so for the sake of applying it to Caligula (ΓΑΙΟΣ ΚΑΙΣΑΡ=616)—an interpretation which Iren. rejected. Holtzmann (Stade's *Geschichte*, ii. 388 ff.), Spitta, and Erbes independently (as Zahn predicted) came to the conclusion that this was, in fact, the original reading and meaning of the number, and that ch. 13 is part of a Jewish oracle of Caligula's time. In fact no ruler since Antiochus Epiphanes so filled the rôle of Antichrist in the Jewish mind as he who attempted to have his image erected in the temple. To him 13^{4-6}, and to the priesthood of his worship $vv.^{14.\ 15}$, would admirably apply. Moreover, he recovered from what seemed a fatal illness at the beginning of his reign. Bousset does not wholly reject the hypothesis that a Caligula apocalypse underlies this chapter (*Komm.* pp. 433–5). Other interpretations of the number 666 must here be passed by, though Gunkel's 'the chaos of old' may be mentioned. The number does not prove, and can hardly be said to give substantial support to the identification of the beast with Nero.

Beyond the unmistakable general reference to Rome, it is hard to find history in our author's visions; and this reference had certainly been given already to the figure of the beast, and in all probability by Jews. Events during the last half of the century must have led Jewish apocalyptical writers to many more expressions of their hatred of Rome and visions of its overthrow than have survived. Indeed, Pompey is already called the dragon in Ps-Sol 2^{29} (see Assump. Mos., 4 Ezra, Apoc. Bar). Our author and the Christian communities for which he writes have reason to share the Jewish hatred of Rome, and enter into the inheritance of various Jewish expressions of it. Our author has, as it were, eaten the book of past prophecies against peoples and nations before he utters his own. The ancient language has, as we have seen, often the value of poetry to him; but it is impossible, though we might wish it, to refer the polemic against Rome only to sources used by our author, or to resolve it into a figure of the war against evil in general.

iv. Historical Situation.—We have already seen that the date of separate oracles in our book cannot be assumed to be the date of the book as a whole. 11^{1-13} is from some time before 70, but is not literally used by our author. The figurative application of this oracle to the safe keeping of the true people of God would be more natural after the event of 70 had disproved its literal sense. Ch. 13 *may* have been shaped in Caligula's reign, or soon after Nero's death. 17^{10} must have been written under the sixth emperor of Rome, *i.e.* Nero, counting from Julius Cæsar, or his successor, counting from Augustus, but Nero's successor might be regarded as Galba, or as Vespasian. That one more emperor is expected only shows that the number seven is fixed; and that he is to reign a short time could be inferred from the nearness of the end, and does not require the knowledge on the writer's part that the reign of Titus was in fact short. But if $v.^{10}$ comes from Vespasian's reign (and so is consistent with 11^{1-13}), must not $v.^{11}$ have been added by some later hand? The writer, it would seem, already lives under the eighth emperor (Domitian), and adds this verse in order to adjust what was written under Vespasian ($v.^{10}$) to his own time by so adding an eighth as not to overpass the fixed number, seven. On the basis of this verse Harnack (*Chronologie*, p. 245 f.) confidently dates the book under Domitian. Yet it is possible that the writer of $v.^{10}$, under Vespasian, expected the return of Nero, one of the seven, as an eighth, who, coming back after death out of the abyss, could be regarded as the very demon spirit of Rome, the beast itself. But even if, in this way, with Bousset, we date ch. 17 as a whole under Vespasian, this also may be the date only of a source.

Though historical allusions do not fix the date, yet, taken in connexion with other indications of age, the date ascribed to the book by Irenæus (V. xxx. 3), 'near the end of the reign of Domitian,' *i.e.* about A.D. 93–96, is to be preferred to that which was for some time the ruling view of critics, A.D. 66–69 (Lücke, Bleek, etc.). It is not in sections clearly dependent upon apocalyptical tradition, but in those more original, and especially in the letters, that we should confidently expect to find indications of the author's own time. In spite of the ideal and typical significance of the seven Churches, actual conditions unquestionably meet us here. Persecution past and future forms the background of the letters. The writer was (not *is*) in the little island of Patmos 'on account of the word of God and on account of the testimony of Jesus,' *i.e.* probably not in order to receive his revelation (cf. 1^{2}), but because of his Christian preaching (cf. 6^{9}), that is, in banishment (see 1^{9a}). But the banishment of a conspicuous Christian seems to disclose a definite movement against Christianity in Asia Minor on the part of Rome such as we do not know of before Domitian. There are persecutions already past (Ephesus, 2^{3}; Pergamum, 2^{13}, had its martyr; Philadelphia, $3^{8.10a}$; in Smyrna and Philadelphia at the hands or at the instigation of Jews, 2^{9} 3^{9}); yet this past persecution could be that under Nero. A renewed and greater trial, of world-wide scope (3^{10}), is soon to come. At present the Roman world tempts rather than compels Christians to adopt a heathen manner of life and heathen worship. (Is this present quiescence in the writer's mind when he says that the beast 'was, and is not; and is about to come up out of the abyss, and go into perdition' (17^{8})?) Imprisonment and death are anticipated for the faithful, and for this the letters, indeed the whole book, will prepare them. Its theme is the glory and reward of martyrdom. The heretical teachings which are condemned in Pergamum (the teaching of Balaam) and in Thyatira (that of Jezebel) result in heathen ways of living rather than in doctrinal errors, though they seem to have based their worldliness on some sort of gnosis (2^{24}). It is uncertain whether 'Nicolaitan' was the proper name of this sect (possibly derived from the NICOLAS of Ac 6^{5}) or only the Gr. name for Balaamites (so Schürer, who appeals to the *νίκη* of Jos. *Ant.* IV. vi. 6). Schürer argues with much force that JEZEBEL was the priestess of the Chaldean Sibyl, Sambethe, who had a sanctuary at Thyatira (*Theol. Abhandl. C. von Weizsäcker gewidmet*, 1892, pp. 37–58). To this hypothesis it has been objected (Bousset, Zahn) that the impression is given that she is directly under the discipline of Christ (vv.$^{21-23}$), that the church is at fault for allowing her (v.^{20}), and that the sphere of her activity is the Christian community (vv.$^{20.24}$), so that a false Christian prophetess rather than a heathen is indicated. The wife of the bishop (Zahn) she surely need not be. Satan's throne in PERGAMUM (2^{13}) may refer to the worship of Asklepios there, whose symbol was the serpent, or to the fact that here emperor-worship was first introduced, with temple and priesthood. The latter would better explain the martyrdom of ANTIPAS (unless he were killed by a mob), and would better fit the figure of the second beast ($13^{11ff.}$) Cæsar-worship was Rome's worst deed, and resistance to it was that overcoming even to death which our book urges by entreaty, threat, and promise (15^{2} $16^{5f.10}$ 17^{6} $19^{20f.}$ 20^{4-6}).

Although the effort to force emperor-worship upon Jews goes back to Caligula (A.D. 39–40), the total impression is that of a late, not an early time. To the actual destruction of Jerusalem there is no reference. The condition of the churches (forgetfulness, indifference, worldliness) points to a relatively late time. It seems necessary to suppose that St. Paul's position as founder and unquestioned leader of the church in Ephesus is a thing entirely past. That church has had a new founding (Weizsäcker). If 17^{8} expresses the belief in the return of Nero from hell, this is a late form of the belief in his return, after the possibility of his being alive had passed.

v. TEACHINGS OF THE BOOK.—1. *Predictions.*—The question what the author of Rev. intended to say about the future (and it was to reveal future things that he wrote, 1^{1} 4^{1} etc.) is complicated by the difficulty of distinguishing between the meaning of his sources and his meaning in the use of them, and the related difficulty of distinguishing between figure and reality in his use of language. That all is literal our discussion thus far makes it impossible to admit. Are we prepared, with the spiritual interpreters of all ages, to say that all is figure (as now Milligan, Benson, etc.)? Or shall we say, 'Rev. is not a poem, an allegory, but the figurative alternates with that which is to be taken very earnestly and literally; the latter much predominates' (Jülicher, *Einl.* 172)? Our review of the writer's use of OT and other materials must rather incline us to put the predominance on the other side.

(*a*) *General.*—The undoubtedly real elements in our writer's prediction are the speedy coming of God (1^{8} 14^{7} 21^{6}) in judgment, with or in the coming of Christ as judge and ruler of the world (1^{7} $22^{7.20}$). This coming Christ will divide true from false Christians, and reward each according to his deeds (2^{23} 22^{12}). Through Him also God will judge and destroy the tempting and oppressive power of evil dominant in the world, the Roman empire ($19^{11ff.}$), and Satan himself, whose authority Rome possesses, whose spirit Rome embodies (ch. 20). All who belong to her shall perish with her. Those who hold fast the faith during the present tribulations and the greater ones soon to come, and who endure in patience and faith even to death itself, shall be rewarded with special glory and power, and especially close association with Christ and His royalty (6^{11} 14^{1-5} 20^{4-6}). But the destination to be with Christ and God in blessed and eternal nearness and fellowship is at last for all the faithful alike ($2^{7.11.17.26-28}$ $3^{5.12.21\,(\text{cf. }20)}$ 5^{10} $7^{9ff.}$ 14^{13} 21–$22^{5.14}$).

(*b*) *Details.* — Turning to details, we have to attempt to draw the line between figure and reality, especially in reference to the fall of the power of evil, and the events that lead up to it, the saving of the faithful and the heavenly or angelic background of the action.

(1) *The fall of Rome.*—In the first half of the book six seals and six trumpets bring forth the preliminary powers and acts of the Divine judgment over evil. But neither in their special character nor in their sequence do they make the impression of describing literal events.

The first four seals introduce horsemen who are derived, one can hardly doubt, from Zec 1^{8-11} 6^{1-8}, and so ultimately from the four winds, well fitted to serve as destructive messengers of God. They are summoned forth by the four living creatures,* who were originally the four winds driving the storm-cloud, God's chariot (Ezk 1^{4} etc.). In 7^{1} the four winds are destructive forces, and since in $9^{14.15}$ four angels are loosed which then appear as hosts of cavalry (cf. 20^{8}), we may infer that the four winds symbolized the nations that are to execute the Divine judgment in some final war (cf. the use of the winds as symbols of Israel's dispersion, Ezk 5^{10} 12^{14} 17^{21}, Zec 2^{6} 7^{14}).

Of the four seals, however, two introduce warriors (Romans and Parthians?), and two famine and pestilence. A fourfold enumeration of the plagues which God will send upon His people in the last days is found in the Prophets (Jer $15^{2.3}$, Ezk 14^{21}, cf. $5^{12.17}$), and quoted in Rev 6^{8b}.†

---

* It is less natural to suppose that John is addressed, for he is already there, and needs only to look.

† It is tempting to suppose that this originally ended the description of the four horsemen, and explained that *to each of them* was given a fourth of the earth to destroy (cf. Ezk 5^{12}).

The fifth seal discloses the prayers of the martyrs for vengeance, which are a real agent of judgment in the Hebrew view (see below). The sixth is an earthquake.

Earthquake and volcanic phenomena furnish the imagery of the first four trumpets, and, in part, of the fifth and sixth.

J. T. Bent ('What St. John saw on Patmos,' *Nineteenth Century*, 1888, pp. 813–821) argues that 6^{12-17} 8^{7-12} $16^{2.7.17-21}$ describe actual phenomena seen at the eruptions of the island volcano, Santorin, within sight of Patmos; and that $9^{1\text{ff.} 17.18}$ are poetic amplifications of the same theme. Much in Bent's article is fanciful, yet the imagery, esp. of Rev 8, fits Santorin well (see Fouqué, *Santorin et ses éruptions*, 1879, esp. pp. 22–31, 38 ff.). Nothing could be more like the pit of the abyss than the crater of this volcano, and nothing better fitted to suggest demonic agency than the smoke darkening sun and air, the sulphurous vapours which killed the fish in the sea, and blinded and even killed men, the masses of molten rock cast up and falling into the sea like a great mountain or the star Wormwood, the reddening of the sea, the rise and disappearance of islands (see also B. K. Emerson, *Bulletin of the Geol. Society of America*, March 1900). But Santorin is 80 miles from Patmos. Only the highest points of the island Thera, and the smoke of the eruptions, could have been seen. Bent refers for details to reports of refugees. Eruptions took place in B.C. 197 and A.D. 46 (Fouqué, pp. 3–9).

Account must be taken of OT parallels. Hühn finds the following parallels with the Egyptian plagues:—(1) Ex 7^{17-21}, cf. Rev 8^{8-11} 16^{3-6}; (2) Ex 7^{27}–8^{2}, cf. Rev 16^{13}; (6) Ex 9^{8-11}, cf. Rev 16^{2}; (7) Ex 9^{18-26}, cf. Rev 8^{7} 11^{19} 16^{21}; (8) Ex 10^{4-15}, cf. Rev 9^{3-11}; (9) Ex 10^{21-23}, cf. Rev 8^{12} $9^{1.2}$ 16^{10}. Prophetic passages like Is 2, Am $8^{8.9}$, Jl $2^{2-10.30.31}$ $3^{15.16}$, Is 13^{10-13} $34^{4.9.10}$ etc., are to be adduced; and poetic descriptions of the coming of God, in which the imagery of storm (Ex $19^{16\text{ff.}}$) is connected with that of earthquake and volcano, Jg $5^{4.5}$, Ps 18^{7-15} etc.

Was earthquake more than a symbol in our writer's eschatology? Was it the literal power that was to overthrow Rome, and even destroy the present world (cf. 6^{14} with 21^{1})? The fifth trumpet begins with volcanic imagery ($9^{1.2}$) and passes on to locusts, which at the end seem to symbolize warriors (9^{3-11}). The sixth trumpet begins with armies of horsemen, but the powers by which the horses kill men are the volcanic powers of fire and smoke and brimstone (9^{13-21}). The bowls lead more directly to the fall of Rome. Following the same order as to place as the trumpets (1. earth; 2. sea; 3. rivers; 4. sun; 5. under-world (?); 6. Euphrates), with fewer volcanic features in the first five, and a somewhat closer relation to the Egyptian plagues, they lead up in the sixth to an invasion of distant kings, and in the seventh to an earthquake again, in which Rome's fall seems to be involved (16^{19}). Ch. 17 seems clearly to ascribe Rome's fall to an assault of kings. But when, in $19^{11\text{ff.}}$ the beasts are overthrown in an attack, with the kings of the earth as allies, upon Christ and His army, we are ready to ask whether both earthquake and invasion were not figure, while this is actuality.

Again, the final attempt of Satan is made by means of armies of distant nations, whom he brings against Zion, but they are destroyed, not by arms, but by fire from heaven (20^{7-10}).

It is to be remembered that both earthquake and the invasion of barbarian hordes were very real dangers, and the most terrible that always threatened the Mediterranean civilizations. A seer could well look for a literal overthrow of Rome from either source, especially as prophetic eschatology had already made free use of both, and that with the same blending of the two that is found here (see, *e.g.*, Zeph 1^{15-18}, Jl 2^{1-11}, Hag $2^{21.22}$, Is $13^{(10.13)}$ $34^{(4.9.10)}$), and could easily enlarge either into a world-embracing catastrophe. Yet either or both would also serve admirably as figure for events and forces supernatural (demonic and angelic) in character. And the more freely our author passes from one to the other, and even blends the two, the more probable is it that he means neither.

(2) *The saving of the faithful.*—Here also details are difficult to adjust in a literal scheme, and the acceptance of a largely poetical form of representation is almost inevitable. Twice the 'souls' of the martyred dead are spoken of (6^{9} 20^{4}), and here only in the NT do we read of the 'souls' of the dead. Once they are seen in heaven (?, see Spitta, pp. 89, 296 ff.) beneath the altar, where the blood of a sacrifice would be (Ex 29^{12}, Lv 4^{7} etc.), in which the soul was seated according to Heb. notions (Lv 17^{11}). They are praying for vengeance, and are given a white robe, and bidden to rest a little longer, since their number is not yet full. Does the writer think of the souls of martyrs as literally in this location, or does he thus vividly picture the reality and efficacy of their prayers for vengeance, pictured otherwise in 5^{8} and 8^{3-5}? (cf. 4 Ezr 4^{35}). Cf. the cry of the uncovered blood of the slain to God for vengeance (Gn 4^{10}, Ezk $24^{7\text{f.}}$, Job 16^{18}); also the effective prayers of the oppressed (Ex $22^{23\text{f.}}$, Dt 9^{9} 24^{15}, Sir $35^{13\text{ff.}}$, Ja 5^{4}); sometimes angels are the bearers of such prayers (Zec 1^{12}, To $12^{12.15}$). See esp. Enoch 9. 15^{2} 22^{5} 40^{6} $47^{1.2}$ $97^{3.5}$ 99^{3} 104^{3}. When they are seen again it is said that they *lived* and reigned with Christ for the 1000 years. As *souls*, then, they were not truly living, but this life is due to a resurrection (20^{4-6}). On the other hand, in 7^{9-17} the martyrs—or perhaps rather all who have kept the faith amid tribulation (v.^{14})—appear in their white robes in heaven, joining with angels in the worship of God, in a glory and blessedness which can be nothing less than final. And yet the description of the consummation in 21–$22^{5.14.15}$ has not this setting (the heavenly throne of God, the elders, and living beings and angels), but is simply earthly (after the OT) in its features. In the former passage the saints are with God, in this God descends to be with men ($21^{3.22\text{f.}}$). We note also that there are still 'the kings of the earth' who can bring their treasures to the new Jerusalem (21^{24-26}); and though there shall not enter into it anything unclean (21^{27}=Is 52^{1} etc.), yet outside of the city gates are the wicked (22^{14}), whose part, however, according to 21^{8}, is in the lake of fire, the second death.

The earthly features of the new Jerusalem in the new earth are especially strange in a chiliastic eschatology. We should expect the 1000-years' reign of Christ and the martyrs to fulfil the earthly Messianic hopes of prophecy, and the final consummation should be heavenly. Zahn actually holds, accordingly, that 21^{9}–$22^{5\,(15)}$ is a description not of the final blessedness, but of the condition of the world during the 1000-years' reign. There is, in fact, no escape from this violent conclusion, no way of harmonizing this picture with that of 7^{9-17}, and with the condition of things implied in 19^{19-21} 20^{11-15} 21^{1}, except by taking it throughout as poetry. It is in form an almost purely Jewish description of what is to our author a Christian and heavenly consummation. It has always been used as poetry by Christians, and, so used, has proved inspiring.

The hope of this writer has often been declared to be narrowly Jewish-Christian, and Vischer and others have felt that the only way in which justice can be done to the evident universality and spirituality of some parts of the book is by separating it into independent parts. Undoubtedly, the Jewish language is due to Jewish writers. *E.g.* 7^{1-8} suggests that Jewish Christians form the nucleus of the new community, and retain a sort of separateness and primacy, while the multitudes from other nations are added to them. So in 11^{1-13} Judaism appears to be only chastened for its sins; but the great majority repent and are saved. And, finally, the new Jerusalem remains Jewish (21^{12}). Its gates are for the tribes of Israel who enter into the city, while believing nations walk by its light, bring gifts to it, but do not dwell within its walls; are healed by the leaves of its trees of life, but do not eat their fruit (21^{24}–22^{2}).*

But in spite of the writer's high valuation of the name 'Jew' (2^{9} 3^{9}), and in spite of a certain parallel for such a doctrine of the eschatological primacy of Jews in the expectations of St. Paul (Ro 11), it appears quite certain to the present writer that Rev. knows no such distinction; that in 7^{1-8} and 11^{1-13} it is no longer Judaism, but Christianity, the true 'Jews' and heirs to Israel's promises, to whom the writer applies undoubtedly Jewish oracles, and that the Jewish language in chs. 21. 22, wholly borrowed, as it is, from the OT, is used as poetry to picture the heavenly blessedness of Christians.

(3) *The fall of Satan.*—In chs. 12–20 the distinction between fact and figure in our writer's predictions is involved especially in the question how he conceived of the angelic and demonic beings whose deeds and fortunes form the background of the action. Here we read of the birth and ascension of Christ; Satan and his angels cast out of heaven by Michael and his hosts; the persecution of Christians by Satan through the beasts who represent Rome's empire and cultus; the fall of Rome introduced by last plagues (15. 16), described in symbol (17), and in prophetic language (18); the overthrow of the two beasts and their followers by Christ; the binding of Satan; the 1000-years' reign of Christ and risen martyrs; the loosing of Satan, who with a great army (Gog and Magog) assails the holy city and is destroyed; the general resurrection and judgment, when Death and Hades, with condemned men, are cast into the lake of fire, where the beasts and Satan are.

In this outlook one thing which must be taken literally is the fall of Rome. Even if Jews in large part shaped the various oracles against the godless city, our writer could not have put chs. 17. 18 into his book if he had not meant to say what is there so unmistakably said, nor can 13. 14^{8} 16^{19} have any other meaning. But the judgment upon Rome, which forms the concrete historical contents of chs. 12–20, is set in a frame, or double frame, of deeds in the angelic world. Chs. 12 and 20 form the outside setting, or, shall we say, the underlying stratum, the real cause and end of evil. The fall of Satan from heaven, his last assaults upon men (Christians), his imprisonment in the abyss, his release and last onslaught and final overthrow, are the events that ultimately explain the evil of the present, and bring evil to its absolute end. Chs. 13 and 19^{11-21} form the inner framework about the historical reality or the upper stratum, just below the surface of observed facts. The two beasts are not identical with the Roman empire and emperor-worship, but are the representatives of these in the spirit-world; they are not an abstract symbol of Rome, but a concrete (personal) embodiment of Rome. They are demonic beings, pictures of the evil spirit-power of Rome. This is probably the correct view of the beasts in Dn 7 also, since Professor N. Schmidt (*JBL*, 1900, part i.) has made probable the identification of the 'one like a man' with the angel prince of Israel, the Michael, who is described as gaining Israel's victory over the angel representatives of the nations (chs. 10–12). That the beasts are angelic beings is suggested by the demons that come out of their mouths ($16^{13.14}$), and by the difference between their punishment and that of the armies that fight for them ($19^{20.21}$). But though distinct from Rome the beasts are not apart from it. We mistake the Jewish idea of the angelic counterpart if we give it independent significance. The beast's power is Rome's power, and Rome's fall is the fall of the beast. Yet the two are not one, and it is possible that the writer used the figure of ch. 17 to express his belief that Rome was to fall at the hand of its own evil genius, by the fruits of its own sin. It was the woman sitting on the beast, against whom the beast itself would at last turn in hatred. The demonic nature of the beast is here quite clear. The actual Satanic power in the writer's experience was Rome, and his hope was for its fall; but though it was the agent and embodiment of Satan's hatred and power against God's people, yet its fall will bring only the binding, not the destruction, of Satan. He has other resources, and will be given an opportunity to make one more effort before the end comes. The arrangement of material compels us to regard the threefold judgment upon Satan, one past (connected with Christ's birth and ascension), two future, a preliminary binding connected with the fall of Rome, and a final destruction, as expressing realities in the author's mind no less than the fall of Rome itself, to which he gives a definite place in this larger drama of the Christian conquest of evil. But reality need not mean materiality. Caution is needed in interpreting the angelology of our book. We have already observed how little actuality, apart from Christ, has the angel who speaks for him (*e.g.* $22^{6\text{ff.}}$). In the letters we have messages from Christ to the Churches, but in form they come from the angel who represents Christ, through John, to the angels who represent the Churches. In spite of the difficulty of supposing that John and his writing must mediate between two angels, it remains probable that the angel of the Church is a real angel, conceived not as ruling over the Church, not as its heavenly guardian, but as its heavenly counterpart, personating its actual character, and hence worthy of praise and blame, not different from the Church itself ideally or abstractly conceived. John's writing of the message of the Christ-angel is, of course, for the sake of the actual Church, which is really addressed (note the use of the second person singular). It can be spoken of as a writing to the angel, in accordance with the heavenly setting of the vision, only because the angel is the heavenly presence and personal representation of the actual Church in its actual character. Against the contrary arguments of Zahn and others it remains that 'angel' is used throughout the book in the literal sense, and that no human official could be so completely identified with the Church. The intervention of John's book between two angels does not prove that they were not angels, but reveals the sense in which our writer ascribes reality to them.

---

* Baur, Holtzmann, etc.

In order rightly to estimate the significance of the angelic and demonic framework or background of our writer's predictions we should study its history, for it is no free invention or original insight of his. This eschatology, with its union of earthly (political) and unearthly (angelic) beings and events has far-reaching roots, and one would need a far more complete review than can here be attempted of the angelology, demonology, and eschatology of the OT and of Judaism in order to view it in the right light. In this picture are blended many elements from originally independent sources of which the history can only imperfectly be traced. Gunkel has done a very great service in his study of the history of the Babylonian myth of the creation of the world by the slaying or binding of the chaos beast, the dragon of the deep, by the god of light. He has shown how in the OT certainly (Is $51^{9\text{f.}}$ 27^{1}, Dn 7, etc.), and not improbably in Babylonia, this cosmological myth became eschatological, the last things were to be like the first, the dragon was to rise in a new conflict against God and be again overcome before the new creation. He has also shown how this myth, though retaining features of its original sense, the conception of creation as the binding and confining of the ocean (cf. Pr. Man ^{3}, 'who has bound the sea by the word of thy commandment; who hast shut up the deep and sealed it by thy terrible and glorious name,' with Rev 9^{1} 20^{3}), became, especially in its eschatological use, a figure of the world-kingdom that oppressed the people of God. Its future assault would be literally by war, not by tempest (see the union in Dn 7^{1}). It is evident how perfect an expression of this final form of the dragon-myth is contained in the words, 'the beast that thou sawest was, and is not; and is about to come up out of the abyss, and to go into perdition' (Rev 17^{8}). But this leads us over to an idea not Babylonian in origin, that the gods of the nations are angels (demons) (Dt 4^{19} 32^{8} LXX, Sir 17^{14}), and that these angels of the nations are responsible for their sins against Israel. Daniel contains this idea in a developed form. The beasts which in ch. 7 suggest the chaos dragon in his late eschatological and political form, give place in chs. 10–12 to angel princes of the nations whom Israel's prince, Michael, is to overthrow. So also in the late apocalypse, Is 24–27, the Babylonian dragon of the deep (here three monsters probably stand for three nations) is to be slain by God in the last judgment (27^{1}); but before this (or parallel to it) is the punishing of the angelic counterparts of earthly kings, and, very significantly, their imprisonment for a time in the pit before their final punishment ($24^{21.22}$). That the coming day of J″ includes a heavenly judgment over these spiritual powers of the world-kingdoms, is seen also in Is $34^{4.5}$, Ps 82. 58 (?). Both in Is 24^{21}, cf. $^{19.20}$, and in $34^{4.5}$ earthquake phenomena are the manifest sign of this judgment upon angel beings. That Persian eschatology influenced Jewish at this point is quite beyond serious question. (See esp. Stave, *Parsismus*, p. 145 ff.). There we find the conception of a struggle between good and evil spirit powers, becoming especially severe at the end when the Satanic leader, Angra Mainyu, assails the abode of Ahura Mazda, the good god. He is overthrown, either by the god himself or by the Parsee Messiah, Soshyos, and is held in imprisonment for a time before he is destroyed. The resurrection and the creation of the new heaven and earth are additional elements in the Parsee eschatology parallel to the Jewish. The idea of the fall of Satan from heaven through an ambitious attempt to be like God is used poetically in application to the fall of Babylon in Is 14^{12-15}, with evident allusion to a myth describing the failure of the morning star to mount the eastern sky. See also Secrets of Enoch $29^{4.5}$, and cf. Enoch $68^{4.5}$.

The Bk. of Daniel introduces a further element, the essential embodiment of the demonic power of evil in a man (Antiochus IV.). This human, not simply national, incarnation of the power of Satan may have had an important history in Jewish thought before it comes to light in the early Christian expectation of Antichrist (2 Th 2^{3-12}, 1 Jn 2^{18}, Δ.δ. 16, etc.; cf. Apoc. Bar $40^{1.2}$). Bousset (*Der Antichrist*, 1895) has made probable the Jewish origin of this conception as an outgrowth or modification of the Babylonian dragon myth, probably originating with Daniel.

Another line of development connects itself with Gn $6^{1\cdot 3}$, and is found in combination with some of those already traced in Enoch 1–36. 83–90. The points of contact with Rev. here are close enough to deserve a more careful scrutiny.

The Book of Enoch (ch. 6 ff.) contains an account—probably the blending of two accounts—of the fall of angels from heaven, on the basis of Gn 6^{1-3}, and of the binding of their leader (Azazel or Semjaza) by one of the four archangels in darkness beneath rocks or under the hills of the earth, with his associates. At the last judgment they are to be taken thence and cast into the abyss of fire ($10^{4-6.\,9-13}$). If they had not been bound, man would have perished from the earth (10^{7}). But though the greater powers of evil are chained, lesser powers, the evil spirits, half human, proceeding from their sons, the giants, continue, and to them disease and all sorts of evil are ascribed. In the dream vision of chs. 83–90 the same conception is found. Here we read of the fall of a star from heaven and then of other stars ($86^{1.3}$), and of the violent deeds of their sons. Then one of the four great angels binds in an abyss the first star that fell, and his followers likewise ($88^{1.3}$). This is before the Flood. During the whole period of human history these fallen angels lie bound in the earth; but the evils under which Israel groaned are due to the misdeeds of the 'seventy shepherds.' These are angel representatives of the kingdoms to which the Jews were in subjection from the Exile onwards ($89^{59\text{ff.}}$), who transgress their commission as chasteners of Israel. At the last judgment the stars that first fell are brought before God, then the seventy shepherds, and all are cast into the same abyss of fire (90^{21-25}, so 100^{4}). Into a like abyss, but not the same one, apostate Israelites were cast (90^{26}). Then the old house (Jerusalem) was taken away, and the new house was brought and erected by God (97^{27-29}). Certain points of likeness between this apocalypse and Rev. are evident: the two sorts of angelic powers of evil, Satan and his angels accounting for the evil of the world in general, and angels of the nations explaining the particular and present sufferings of the Jews. But the binding of Satan in the abyss is at the beginning of human history, not at the beginning of the Messianic reign. The idea that evil angels are confined under the earth may well have been an inference from the phenomena of earthquake and volcano, cf. *e.g.* Enoch $67^{4\text{ff.}}$. The same conception, depending on Enoch, though with variations, is found in later parts of Enoch ($39^{1.\,2a}$ 54^{1-6} 67–69), in Bk. of Jub., ch. 5, Secrets of Enoch 18^{7} (cf. chs. 7. 18. 29), Jude ^{6}, 2 P 2^{4}. In Enoch 18^{11}–21^{10} the fallen and imprisoned angels are seven stars that transgressed the commandment of God by not rising at the appointed time; and though ch. 19 declares them to be the angels of Gn $6^{1\cdot 3}$, one suspects a different origin, namely, in planets or meteors. The possibility of Greek influence on the eschatology of Enoch is not to be denied (Dieterich, *Nekyia*, 1893).

Comparing the eschatology of Rev 12–22 with these earlier OT and Jewish conceptions, we are struck most of all by the free union of elements of an originally diverse origin. Ch. 12 stands nearest to the Babylonian myth, even though one hesitate to adopt Gunkel's bold reconstruction. The dragon is a water beast (v.^{15}). He is cast out of heaven with his host by Michael, in a war which can have been nothing but an effort to dispossess God. But his fall here follows the birth and ascension of Messiah; and by this change of order which appears to have been due to our John himself, what was a history of the world became a history of Christianity, and the fundamental victory over evil, upon which hope rests, was not that effected by God at creation, but that achieved by Christ through His resurrection. In 9^{1-11} the allusions to the demonic powers, with Apollyon at their head, who are confined in the abyss, seem to rest on a wholly different conception.

The Satan of chs. 12 and 20 is certainly more than a representative of Rome, and these two chapters must be intended to put the present evil power and its coming fall into relation to an ultimate principle of evil, which Rome only for a time embodies. Through the birth and ascension of Christ a victory has been achieved over the power of evil in heaven. After Rome's fall, there still remains a final victory to be achieved over the power of evil in the world. So much we may safely say the writer intends in a literal sense.

(4) *The thousand years.*—This leads to the question of the significance to him of the 1000-years' reign of Christ and the martyrs. It is a part of the last conflict against evil. While Satan is bound in the abyss, Christ and His saints reign over the world, subduing the remaining powers of evil. It is true that in Jewish apocalypses the idea of a temporary earthly reign of Messiah (or of Israel) arose in the effort to conceive of the final consummation in more transcendental, heavenly terms, and yet provide for the literal fulfilment of the national, earthly hopes of Israel. In Enoch 91 Messiah does not appear, but an earthly Messianic age is followed after a final judgment by a consummation of heavenly character. In 4 Ezr 7 Messiah has to do only with the earthly kingdom, not with the heavenly which follows it after 400 years. But in Rev. the 1000 years has no such significance. Our writer does not need it for the literal fulfilment of the

earthly and national features of the prophetic hope, for he uses these freely in a figurative sense of the new heaven and earth (21. 22). He does not need it in order to give Messiah His rights, for the Lamb is still on the throne in the final consummation ($21^{22.23}$ $22^{1.3}$). Holtzmann, indeed, declares that the idea that this 1000-years' reign is a period of peace and rest is the only proper enrichment of Biblical theology in our book, since in St. Paul the interval between the coming of Christ and the consummation is a period of the progressive conquest of evil (1 Co 15^{20-28}). But where in Rev. is the suggestion that peace and rest characterize the 1000 years? It is here also a reigning of Christ, and the reward of martyrs is a share in His power. St. Paul expresses the common expectation of the Christian's part in this reign of Christ in 1 Co $6^{2.3}$. There is every reason to suppose that judging and ruling characterize the 1000 years in Revelation. The difference between this first resurrection and the second is not the difference between a preliminary earthly and a final heavenly rest. For the final consummation, as we have seen, is described by our author in thoroughly earthly (Messianic) terms poetically taken. It is the difference between power and blessedness. In other words, the 1000-years' reign here corresponds closely to the Jewish expectation of the time when the sword of justice and vengeance should be in the hands of the righteous (Enoch 91^{12} $90^{19.34}$, cf. $95^{3.7}$ 96^{1} 98^{12} $99^{4.6}$ 99^{16}–100^{3} 38^{5}, Dn 7^{22}).

In Rev $2^{26.27}$ 3^{21} the rule of those who overcome is promised; but is this more literally meant than the other promises ($2^{7.17}$ etc.)? In 1^{6} 5^{10} it seems to be said that Christians are already a kingdom and priests reigning on the earth. The brief episodal treatment of the 1000 years in 20^{4-6} as part of the account of Satan's overthrow, prevents our giving it the significance in the writer's mind that has often been given to it. The possibility cannot be wholly excluded that it stands here because it stood in some account of Satan's overthrow, which our author adopted, as he did so much else, for its general meaning, not for its detail. We shall perhaps be better able to estimate its meaning to him as we turn from his predictions to his religious conceptions. It is certain that the *overcoming* with which John is most concerned is first Christ's overcoming of sin through His death and exaltation, then the Christian overcoming of the evil life and false worship of the world and its hatred and persecutions, by patience and faith even unto death. And this overcoming is so referred to in the midst of the description of Satan's fall from heaven (12^{11}), and of the fall of Rome (17^{14}), that we wonder after all at the end whether this is the reality and those the figure; whether, not of course originally but to our writer,—the one who inserted such verses as these,—this did not express their real meaning. It is certain that he believed chiefly in the triumphant vindication of Christian faith, both in the case of individuals who endured unto death, and of the world which was now in the power of evil. The conviction that death could only bring the faithful soul to its God, and that the future could only see God and Christ manifestly enthroned over the universe, our author held with all the intensity of his being, and expressed in all the variety of form with which the literature of hope furnished him, without too much anxiety about formal consistency. That Christ's conquest of evil involved the fall of Rome, but that the fall of Rome was not the end of evil itself, but the beginning and guarantee of its end, we may also regard as secure.

2. *Religious ideas* (*theology*) *of Revelation.*—The biblico-theological study of Rev. should proceed, according to the modern view of this discipline, largely by the comparative method. We are not to assume that the author had a theology of his own; and we are most concerned to know the sources and influence of the Christian ideas of the book, and how they fit into the history of Christian thought. This is far more an average book, that is, an embodiment of average beliefs and hopes, than the letters of St. Paul or the Gospel of St. John. It expresses the faith and the temper of Christianity in the early years of its conflict, its struggle for existence against a hostile world. As its message is one of a speedily coming judgment and deliverance, its underlying theology will concern the persons through whom, and the way in which, salvation is to be effected. God and Christ, redemption past and to come, are its themes. The general conception of the deliverer and the deliverance will be determined by the conception of the evil from which men desire to be delivered. The theology of our author will be fundamentally determined by the question whether he conceives of the evil chiefly as political or as religious. The answer to this question is not altogether easy. Although Rome now embodies the spirit of evil itself, and is endowed with its authority, yet on the one hand it is through its religion that its evil power is exerted (2^{13} $13^{11ff.}$), and on the other hand it is only a temporary representative of the ultimate evil power, the Devil and Satan, the destroyer (9^{11}), the deceiver of the whole world (12^{9}), the real persecutor of the saints ($12^{12.17}$). Titius is doubtless, on the whole, right in suggesting that the political view of evil and salvation seems to be offered to the writer by some of his sources, but that it is disavowed by him (*Die neutest. Lehre von der Seligkeit*, iv. 35); yet the case is not wholly clear, and the central problem in the interpretation of the Christianity of the book lies just here. The fall of Rome would seem to be a chief act in that Divine judgment which is to bring blessedness to the faithful. But this Jewish 'apocalyptical connexion of politics and religion' is not the teaching of the book as a whole, otherwise Christ's person and work, and the Christian conduct and hope, must have been determined by the goal of political world-rulership. It is not, indeed, decisive that 'the conduct of the faithful is not political, but is characterized exclusively by patience (13^{10} 14^{12})' (Titius); for this is true also in the Bk. of Daniel, the occasion of which, like that of Rev., is not war, but religious persecution. Here literal world-rulership is unquestionably hoped for, and yet the conflict with the beast, as in Rev., 'is carried on, on the one side by executions, and on the other by quiet martyrdom' (cf. Dn $11^{33ff.}$). Many Jews expected that world-rulership was to come to them through God's direct intervention, upon purely religious conditions on their part. Nor can we say with confidence that the literal world-rulership of the saints was not in our author's mind ($2^{26.27}$ 3^{21} 5^{10} 20^{4-6}). When the Roman empire is regarded as the Satanic power, it is not easy to escape the conception of a kingdom of the saints which shall literally displace it. Nevertheless, it remains true that for our author the ultimate evil power is not Rome but Satan, and that the final struggle and victory are in the spiritual realm. It is not the world-rulership of Rome, but its blasphemous claims, that made it the present agent of Satan's power. Both by temptation and by violence it endangered the Christian life and the Christian faith. Any power that opposed the sole worship of the one God, whether Jewish (2^{9} 3^{9}) or Roman (2^{13} 13^{6} etc.), is Satanic.

(*a*) *God.*—The fundamental faith of the book is, then, that God alone is to be worshipped, since He alone is eternal and all-powerful. Monotheism is the basis on which the apocalyptical hope rests, since this is always only the hope that the real kingship of God will soon become manifest and actual. God is He who was, and who is, and who is to come ($1^{4.8}$ 4^{8}, cf. 11^{17}), while the power of evil 'was, and is not; and is about to come up out of the abyss, and to go into perdition' ($17^{8.11}$). The difference between these two definitions saves the Christian faith which this book represents from dualism. The doctrine of God is Christianity's great inheritance from Judaism, and is given here not only in Jewish terms, but in the Jewish spirit. God is the Creator (4^{11} 10^{6} 14^{7}), omnipotent [*παντοκράτωρ*] (1^{8} 4^{8} 11^{17} 15^{3} $16^{7.14}$ $19^{6.15}$ 21^{22}; elsewhere in NT only 2 Co 6^{18}). Fear, not love, is the temper of worship (14^{7} 15^{4} 19^{5} 11^{18}). God is indeed described as one to be feared, one whose coming self-manifestation will be in wrath and judgment ($6^{16.17}$ 11^{18} $14^{9-11.19.20}$ $15^{7.8}$ 16^{1} 19^{15}). He is a King who is absolute in power and just in His judgments. This justice is His supreme quality, on which faith and hope rest (6^{10} 15^{3} 16^{7} $19^{1.2}$).

(*b*) *Christ.*—Christ is conceived as one equal to His task, which is threefold. (1) He is to overthrow the Roman empire (19^{11-21}) and its allies (17^{14}), and so is described as warrior and king, wholly in Jewish terms. He is the lion of the tribe of Judah (5^{5}, cf. 22^{16}), with a sword in His mouth (1^{16} 2$^{12.\,16}$ 19^{15}, Is 11^{4}), the destined ruler of the heathen (2$^{26\text{f.}}$ 12^{5} 19^{15}, Ps 2^{9}, cf. Ps-Sol 17^{26}). (2) But since the real power of evil is not Rome but Satan, Christ must be conceived not only as the greatest of kings, 'King of kings and Lord of lords' (17^{14} 19^{16} 1^{5}), as God is in the OT (Dn 2^{47}), but as one supreme in the world of spirits. So in the first vision of Him (1$^{9-20}$), He appears as an angelic being, like Gabriel in Dn 10, but above him, since He applies to Himself (1^{17} 2^{8} 22^{13}) the name 'the first and the last,' which belongs to God (1^{8} 21^{6}, Is 41^{4} 44^{6} 48^{12}). He is 'the living one' (1^{18}), as God also is (4$^{9.\,10}$ 10^{6}); the One who has already, by His resurrection, gained the mastery over those powers of evil which are the last of all to be destroyed, Death and Hades (1^{18}, cf. 20^{14}, 1 Co 15^{26}). The second vision of Christ (5$^{1-14}$) shows still more clearly His superiority to all angelic powers, even those that stand closest to the throne of God. He only of them all can open the book of the Divine purposes. The seven spirits of God are His eyes (5^{6}), or are in His hand (3^{1}). This elevation is His,—just as in Ph 2$^{5-11}$,—because of His redemptive death (5^{9}). The whole creation joins in ascribing to Him praises as to God (5$^{9-14}$, cf. 1$^{5\text{b}.\,6}$ 7^{10}).

The angel-like and God-like nature of the risen Christ is the best proof that our writer's view went beyond the political. Such a One as this was not needed for the overthrow of Rome. Yet it is a striking fact that the victory over spirit powers of evil is not, as we should expect, expressly ascribed to Christ. The demon-beasts of Rome are taken and cast into the lake of fire, but by whom is not said (19$^{19.\,20}$), though it is the sword in Christ's mouth that slays their followers (v.^{21}). The dragon recognized in Christ his deadly foe (12$^{4\text{f.}}$), but it is Michael who cast him down from heaven (12$^{7-9}$), 'an angel' who chained him in the abyss (20$^{1-3}$, cf. 9$^{1-11}$); fire from heaven devoured his hosts, and it is not said who cast him, and after him Death, into the lake of fire (20$^{10.\,14}$). So the key of the abyss is in an angel's hand (9^{1} 20^{1}) in spite of 1^{18}. Our writer does not feel the need of formally displacing the angel by Christ in these Jewish figures. Angelology had already influenced the Jewish conception of Messiah in Enoch 37 ff. (see 46^{1}) on the basis of Daniel. But in general Michael retained his place as Israel's heavenly representative, defender, priestly intercessor. Bousset suggested (*Der Antichrist*, p. 151) that Jewish speculations about Michael may have influenced early Christian ideas about Christ, and Lueken (*Michael*, Göttingen, 1898) has made the hypothesis probable. In our book, however, Michael is not displaced, but performs one of his chief functions (12$^{7\text{ff.}}$); on the other hand, the worship of angels is expressly forbidden (19^{10} 22$^{8.\,9}$); and Christ is, with God—in spite of 19^{10} 'worship God'—the object of the worship of angels and men alike. While angels are classed with men, Christ is classed with God; and various titles and expressions carry us beyond not only the Messianic but also the angelological speculations of Judaism. He is once called 'the Son of God' (2^{18}, but see also 2^{27} 3$^{5.\,21}$, cf. 1^{6} 14^{1}); once, 'the beginning of the creation of God' (3^{14}), as only the Divine wisdom is called in OT (Pr 8^{22}), and as Christ is called only by St. Paul in the NT (Col 1^{15}). He is called once also the Word of God (19^{13}), and even this Johannine (Hellenistic) title is surpassed by the title of eternity, 'the first and the last' (1^{17} 2^{8} 22^{13}). Yet one hesitates to put stress on the pre-existence which these titles imply, because the resurrection so supremely marks Christ and conditions His exaltation (1$^{5\text{a}.\,18}$ 2^{8} 5$^{9\text{ff.}}$). A cosmical significance and fitness to deal with the cosmical principle of evil the writer certainly wishes to affirm. He would seem almost to identify Christ and God if, as seems probable, he adds to Jewish sources the expressions 'and of his Christ' (11^{15}), 'and of the Lamb' (22^{3}), without feeling the need of changing the following words to plurals. Yet close as is the association, closer and more abiding than in 1 Co 15$^{20-28}$, subordination remains, and is expressed in simple and unreserved fashion (1^{1} 2$^{7.\,27}$ 3$^{2.\,12.\,14.\,21}$).—(3) But it is neither the world-empire, nor its demon-gods, nor Satan himself that furnished the chief task of Christ. The Christian community was His greatest deed. He created it by His redeeming death (1^{6} 5$^{9.\,10}$), and is first and last the Lord of the Churches, knowing them as they are (2^{2} etc.), ruling them in love, but with severity (2$^{16.\,23}$ 3^{19}), their Lord (11^{8} 14^{13} 22$^{20.\,21}$). For Him the perfected community is destined as a bride (19$^{7-9}$ 21$^{2.\,9}$). Believers are His servants (1^{1} 2^{20}), as they are the servants of God (7^{3} 10^{7} 11^{18} etc.). The name which most expresses what Christ is to the Christian is the 'Lamb,' used twenty-nine times in the book. The figure of a lamb as if slain, *i.e.* with throat cut as if about to be sacrificed, the author is able to use in such a way that it gives an impression of power and excites feelings of reverence and awe. Although the Lamb slain is a striking Christian transformation of the Lion of Judah's tribe (5$^{5.\,6}$), yet lion-like rather than lamb-like qualities remain dominant. The seven horns and the seven eyes picture kingly power and Divine knowledge. The Christian Messiah is one crucified, indeed, but nevertheless kingly and powerful, a stern warrior and righteous judge (6^{16} 14^{10} 17^{14}). His place is near the throne of God (5$^{6.\,6}$ 7$^{9.\,17}$), and at last upon it (21$^{22.\,23}$ 22$^{1-3}$). Although the name Jesus is commonly used (1^{9} 12^{17} 17^{6} 19^{10} 20^{4} 22^{16}), yet the reference is to the heavenly, not the earthly life. Neither allusions to the birth of Christ (12$^{1-5}$, cf. 5^{5} 22^{16}), nor to His death (5$^{9\text{f.}}$, cf. Is 53; 1^{7}, cf. Zec 12^{10}, Dn 7^{13}), indicate a use of the Gospel accounts. The fact of the death, however, is of vital significance. The crucifixion was the crowning sin of Jerusalem (11^{8}), but the slaying—the blood of the Lamb—is that through which He made men a kingdom, priests, unto God (1^{6} 5^{10}). This effect is explained as a purchase (redemption), 5^{9} 14$^{3.\,4}$ (cf. 1 Co 6^{20} 7^{23}), with which the reading, λύσαντι ἐκ, in 1^{5} ('loosed'), would correspond. But it is also said that the redeemed had 'washed their robes and made them white in the blood of the Lamb' (7^{14}, cf. 22^{14} ℵA, and the less probable reading, λούσαντι ἀπό, in 1^{5}).

The figure of the slain Lamb itself pictures the fact of the atoning significance of the death, but does not give us a definite theory regarding it. It is not certain whether the Paschal lamb is in mind (Ex 12$^{3\text{ff.}}$, 1 Co 5^{7}), or Is 53^{7} (as probably in Jn 1$^{29.\,36}$). The vicariousness of Christ's death is not indicated, and the contact with St. Paul's thought at this point seems formal rather than real.

(*c*) *The Christian life.*—The divergence of the thought of our book from St. Paul becomes still more evident when we note that the white garments which the redeemed wear signify moral purity (3$^{4.\,5}$). It is the duty of the Christian Church to array itself in white. The fine linen, bright and pure, is the righteous deeds of the saints (19^{8}). Such raiment can be, as it were, bought of Christ (3^{18}), or given (6^{11} 19^{8}); but its possession is evidently regarded more from the moral than from the ritual point of view. There is no such reflexion upon the relation of gift and duty in the Christian life as in St. Paul; but by the side of praise for redemption by Christ's blood, is an almost legalistic conception of salvation by works. In the letters, works are required by Christ (2$^{2.\,5.\,19.\,23.\,26}$ 3$^{1.\,2.\,8.\,15}$, cf. 14^{13} 18^{6} 20$^{6.\,12.\,13}$ 22^{12}, Holtzmann). They are *His* works (2^{26}), the keeping of His words or commands

(3^{8}), as well as God's words ($1^{2.9}$ 12^{17} 14^{12} 20^{4}), of which Jesus is a witness (1^{5} 3^{14}). To keep God's commands is to keep the testimony of Jesus ($1^{2.9}$ 12^{17} 19^{10} 20^{4}) or His faith (14^{12}). Pure morals ($2^{14.20}$ 3^{4} $14^{4.5}$) and a pure worship ($2^{14.20}$ $13^{12\text{ff.}}$ $14^{9\text{f.}}$) are enjoined, over against heathen influence ; and, to keep these in such a time, patience, endurance, fidelity were the most needed virtues. 'The patience and the faith of the saints' (13^{10}) are closely related virtues. That faith and patience alike mean fidelity is evident (2^{13} 14^{12} $2^{10\text{b}}$ $17^{14\text{b}}$). They were most manifest in martyrdom. As Christ, through the shedding of His blood, proved Himself a 'faithful witness,' and attained as a reward His place of power, so Christians gain the highest glory through a martyr death. Its power as an example is one of the clearest interpretations given by our author to Christ's death (see 7^{14} 12^{11} 3^{21} $20^{4\text{-}6}$). The point of view of reward is that from which salvation is predominantly regarded (2^{7} etc., 'to him that overcometh,' 11^{18} 22^{12} $7^{14\text{ff.}}$).

vi. RELATION OF REV. TO OTHER NT BOOKS.—1. *St. Paul.*—The question in what relation the Christology and Soteriology of Rev. stand to Paulinism is one to which a confident answer is impossible until we know better how to answer the questions both of source and of influence with reference to St. Paul's thought at these points. If St. Paul is the author of the 'higher Christology,' Rev. must be under his influence, and certainly the expression 'the firstborn from the dead' (1^{5}) suggests Col 1^{18} (cf. 1 Co 15^{20}), though Bousset believes that Ps 89^{28} (LXX) accounts for it. To the same verse, Col 1^{18} (cf. v.^{15}), the expression 'the beginning of the creation of God,' points (3^{14}). Yet these parallels are far from conclusive. Both St. Paul and Rev. exalt Christ above angels as a reward for His earthly life and death (Ph $2^{5\text{ff.}}$, Rev $5^{9\text{ff.}}$).

If St. Paul was the first to connect the forgiveness of sin with the death of Christ, the thought of Rev. is in some sense due to him ; but St. Paul's originality at this point is an open question (1 Co $15^{3.11}$), and the effect of the death of Christ is here described in a wholly un-Pauline way. Again, the universality of the gospel owed most to the championship of St. Paul, but Weizsäcker is justified in saying that in Rev. Judaism has become universalistic and free from law, not in the Pauline way, but in a way of its own. The thought of Rev 5^{9} is that of Eph 2^{13}, but dependence is not evident.

There are many points of contact between the two writers in eschatology, but none that cannot be explained from the common basis of Jewish and primitive Christian conceptions. It is not probable that we are to infer from Rev $7^{1\text{-}8}$ $11^{1\text{-}13}$ an expectation like St. Paul's of the final repentance and salvation of the Jewish people (Ro 11^{26}) ; it is, however, possible. St. Paul expects a literal renewal of the world (Ro $8^{18\text{-}22}$, cf. Rev 21^{1}) ; also (before this?) an interregnum of Christ (1 Co 15^{25}) when He and His ($6^{2.3}$) will overcome all powers hostile to God (Rev $20^{4\text{-}8}$) ; the last foe to be destroyed is death (1 Co 15^{26}, Rev 20^{14}). It is a striking fact that while the literalness of these expectations is not to be questioned in St. Paul's case, in Rev. we feel ourselves to be everywhere on the border line between fact and figure. None of these parallels is so striking as the contrast between St. Paul's attitude towards Rome and that of Revelation (Ro $13^{1\text{-}7}$, 2 Th 2^{7}). Even at this point, however, we cannot think of an intentional polemic against St. Paul. Antichrist has taken on a Roman instead of a Jewish character by the course of events. The effort of Baur and Volkmar to prove the presence of an anti-Pauline polemic in the book cannot be regarded as successful. The Christianity of the John of Rev. is neither national nor legal in a Jewish sense (*e.g.* 5^{9} $7^{9\text{ff.}}$ $21^{24\text{ff.}}$ $2^{14.20}$ 21^{22}). The absoluteness of its freedom from Judaism, *i.e.* of its conviction that Christians are the true Jews, is seen in the fact that it can adopt without change such thoroughly Jewish pictures as $7^{1\text{-}8}$ $11^{1\text{-}13}$, taking for granted their figurative application to the Christian community. Its conception of faith and of works is neither St. Paul's nor is it aimed against St. Paul's conception.

We may agree with Jülicher that the Christianity of Rev. is neither Pauline nor anti-Pauline ; and that, as far as one can speak of the religious conceptions of the book outside of the eschatological circle, they can be understood as a simple development of the primitive form in which the gospel came through Jewish believers to Jews. It must, however, be a late, not an early development.

2. *The Synoptic Gospels.*—The traditional defence of the apostolicity and truth of Rev. by the claim that it is only an elaboration of the eschatological teachings of Jesus, especially in Mt 24 [–25] =Mk 13=Lk 21+$17^{20\text{-}37}$+$12^{35\text{-}48}$, must now be reconsidered and tested in view of a growing inclination on the part of scholars to regard these chapters as due to an elaboration of the simpler teachings of Jesus regarding the future, under the influence of the eschatological conceptions, inherited from Judaism, of which Rev. is a product and record. The parallels are, of course, unmistakable ; but for the historical interpretation of them we must wait for further studies in the Gospels, and in the history of those traditions of the life and teachings of Jesus out of which the Gospels came.

Holtzmann (*Einl.* 422) adduces the following parallels: Mk $13^{7.8}$=Rev $6^{4\text{-}8.12}$, Mk 13^{10}=Rev 14^{6}, Mk 13^{13}=Rev 2^{28}, Mk 13^{19} =Rev 16^{18}, esp. Mk $13^{24.25}$=Rev $6^{12\text{-}14}$ 8^{12} $9^{1.2}$, Mk 13^{28} (still more closely Mt 27^{30})=Rev 1^{7}, Mk 13^{27}=Rev 7^{1}, Mk 13^{31}=Rev 6^{14} 17^{17} 21^{1}, and apparent contrasts between Rev 11^{1} and Mk 13^{14}, Rev $10^{5.6}$ 14^{15} and Mk 13^{32}.

Von Soden (*Abhandlungen*, p. 132), on the basis of various parallels (Rev 13^{10} Lk 21^{24}, Rev 6^{10} Lk 18^{7}, Rev 6^{16} Lk 23^{30}, Rev 3^{3} 16^{15} Lk 12^{39} [=Mt 24^{43}], Rev 3^{20} Lk 12^{36} $14^{15\text{-}24}$, Rev 1^{19} Lk 21^{36}, Rev 3^{3} $14^{7.15}$ Lk $12^{39\text{f.}46}$, Rev 1^{1} 22^{6} Lk 18^{8}, Rev 1^{3} 22^{10} Lk 21^{8}, Rev 19^{9} Lk 14^{15}, Rev 22^{7} Lk 11^{28}, Rev 16^{15} Lk 12^{37}), regards it as probable that the Christian editor of Rev. was familiar with Luke's Gospel. He thinks (p. 158 f.), on the other hand, that Matthew used Rev. in its present form because of the parallel use of words and phrases in many passages (cf. *e.g.* Mt 5^{12} Rev 19^{7}, Mt 8^{26} Rev 21^{8}, Mt 20^{16} 22^{14} Rev 17^{14}, Mt 16^{19} Rev 1^{18} 3^{7} 9^{1} 20^{1}, Mt 27^{53} Rev 11^{2} 21^{2} 22^{19}, Mt 2^{6} Rev 1^{17}, Mt 19^{17} 23^{3} 28^{20} [to keep, τηρεῖν, commands of Christ] 26^{18} Rev 1^{3} 22^{10}, Mt 16^{19} 18^{18} [λύειν] Rev 1^{5}, Mt 26^{52} Rev 13^{10}, Mt 24^{30} Rev 1^{7}, Mt 24^{12} Rev $2^{4.19}$ $3^{15\text{f.}}$, Mt 2^{2} Rev 12^{1}, Mt 2^{11} Rev 21^{24}, Mt $2^{16\text{-}18}$ Rev $12^{4.17}$). Such parallels as Holtzmann adduces between Rev. and Mk 13 are referred by von Soden and many others to common or related Jewish apocalyptical sources.

3. *The Gospel and Epistles of St. John.*—The relation between Rev. and the other Johannine writings has been obscured by critical attacks and apologetic defence. Zahn's extravagant statement, that the common use of the name Logos (Jn $1^{1.14}$, 1 Jn 1^{1}, Rev 19^{13}) outweighs all the irreconcilable contradictions which have been found between the ideas of Rev. and those of the other Johannine writings, is anything but conclusive, although the importance of this point of connexion is to be recognized. Even Zahn admits the difficulty of the problem presented by the *difference of style*, but thinks that both John and Rev. betray a Hebrew author, and that the same man might write differently as a prophet and as a historian and teacher. It is really by appeal to a supernatural agency that Zahn reconciles the books. In the Bk. of Revelation St. John is in ecstasy and receives everything in vision, the form as well as the material (p. 614 f.). So the books are not by the same real author, after all ; and how would Zahn estimate the relative value of the work of John and that of the Spirit? In regard to the peculiar style of Rev., with its departures from grammatical rules, certainly in part intentional,

perhaps in the effort to give the effect of the Hebrew prophetic style, see especially Bousset, *Komm.* pp. 183–208.

That Rev. is not by the author of the Gospel and the First Ep. of John appears to the present writer little less than a certainty. There are, indeed, ideas common to these books. We have already noticed the common use of all the Johannine writings by the Montanists because John promises the prophetic spirit, and Rev. is a product of it; and the common rejection of all by the so-called Alogi, though later opponents of Montanism were contented to reject Revelation. There are also Johannine forms of expression in Rev. (see, *e.g.*, 3^{20b}, Jn 17^{23}, Rev $2^{26.27}$ 3^{21}, Jn $15^{9f.}$ 17^{18} 20^{21}). But so there are here Pauline forms of expression. Indeed the thought-world of our author is related to one side of St. Paul's, while John and 1 John are related to another; and while it is not impossible that both Rev. and John presuppose St. Paul, between these books themselves little but contrast can be discovered, both in thought and in expression.

Bousset has sought to prove a linguistic relationship such as to justify the belief that Rev. came from the same circles in Asia Minor from which the Johannine writings came. The John of Asia Minor was, he believes, not the apostle, but the presbyter John; and though neither the Gospel nor the Apocalypse was written by him, Bousset supposes that both rest in some way upon him. That the John of Asia Minor was the apostle remains, however, still the more probable supposition (see the elaborate argument of Zahn, *Forschungen*, vi. 1900, pp. 175–217). But the inference that the John of Rev. must in that case be the apostle, is weakened by the observation that the apocalyptist does not speak with the authority of his own person. The authoritative author of his book is Christ. All that the author claims for himself is that he is a genuine prophet. The common idea 'that he appears as a special authority before his readers rests on fancy' (Jülicher, *Einl.* 176). It is not he but Christ who criticizes and commends the Churches. There remains, of course, the other possibility, that, like other apocalypses, this also is pseudonymous, issued in the apostle's name. But we should in that case confidently look for clear references to the apostle's experiences, whereas the writer regards himself everywhere as a prophet, and seems to look upon the apostles from without (21^{14}, cf. 18^{20}). That the apostle was the author of Rev., and therefore not of John (Baur, etc.), is now urged anew, chiefly on the ground of external testimony, by B. W. Bacon (*Introd. to NT*, 1900); but, though not impossible, it can never be so established as to be a weighty presupposition for the solution of the problem of the Gospel. That the writer of Rev. need not have known Jesus, remains a strong indication that he did not know Him.

In distinction from the Gospel, the Apocalypse can be historically interpreted and estimated without regard to the question of its author, *i.e.* of its final author; but a book of this class cannot be understood at all apart from the stream of apocalyptical tradition out of which it comes, of which it is in large measure a product. Of its authorship nothing more than guesses can be given. With the nature of the book itself and the resulting method of its interpretation it is possible to deal more positively.

Conclusion.—The historical value of this book as a witness to early Christianity, and the temper and expectation with which it faced its long struggle against the world, cannot be over-estimated. The religious value of apocalypses in general lies not in their form or forecast, but in the religious faith that they express. The special religious worth of Rev. lies first of all in its Christianity and then in what results from this; in the fact that though chiefly apocalyptical it is partly prophetic in character, that though largely dependent on tradition it is not wholly without the marks of a creative spirit (Bousset, p. 11). 'The book has its imperishable religious worth because of the energy of faith that finds expression in it, the splendid certainty of its conviction that God's cause remains always the best and is one with the cause of Jesus Christ; but it is unreasonable to treat the detail of its phantasies as an authentic source for a history of the past or the future' (Jülicher, p. 168).

The form of the book is uncongenial to us; but a fair historical judge will not condemn it for its form, which the age supplied, and which served the age. We shall do best justice to the form if we regard it as practically poetical. The line which must be drawn for a true appreciation of our book is not the rough line between literal and figurative speech, but the far more delicate one between pictures consciously fashioned to express spiritual realities, and visions of persons and actions literally taken, but *valued* for the spiritual realities that lie behind them. This is an important distinction, but does not involve a fundamental contrast. Our author is a poet, whether consciously or not, since, whether taken as word-pictures or as actualities his visions were to him, as they are to us, symbols of spiritual realities, of Christian faiths and hopes.—But, apart from form, are the faiths and hopes of the book fully Christian? It is hard not to judge the hatred of Rome and the desire for vengeance as in some measure a departure from Christ. The difference between His announcement of the fall of Jerusalem and this prediction of the fall of Rome is just the deeper-lying difference between prophecy and apocalypse. Christ would not allow the kingdom of God to be put into contrast and competition with the kingdom of Cæsar (Mk 12^{14-17}). St. Paul followed His contradiction of Judaism at this point (Ro 13^{1-7}, so 1 P 2^{13-17}); but the writer of Rev. seems hardly to escape altogether the Jewish confusion of religion with politics. To use the money of the realm, or rather to engage in transactions involving papers which must be attested by the official stamp (χάραγμα) of the emperor (Deissmann, *Neue Bibelstudien*, 1897, pp. 68–75), seemed to him the worship of the beast (13^{17}). With this goes also the absence of love, and with it again the absence of hope for men. The missionary spirit of Christianity is not here. Christians are to hold fast what they have, and the sinful world will be more sinful still until its speedy destruction. To the union of religion with politics belonged, in the Jewish mind, the hope that the saints would in the end rule over the world (20^{4-6}). Whether it is possible to regard this millennial reign as taken by our author from some Jewish source for its underlying idea, or whether we must regard him as adopting the reality with the form, through the influence of his attitude towards Rome, it is in either case impossible not to regret the influence of these verses upon Christian history. To this criticism, however, two things are to be said. One is that as events, especially the Exile, brought about the transition from prophecy to apocalypse in Judaism, so events put Christianity at this crisis in the attitude of self-defence against the threatened extinction of its faith at the hands of Rome. The other consideration is that it was not for its chiliastic hope, but in spite of it, that Rev. held its place in the Christian Canon; and it has not been this that has given the book its power.

It is the Christianity, not the Judaism, of the book that has made and kept for it a place in

Christian Scriptures. It aimed to put Christ at the centre of religious faith and hope. His words are the complete law of God, His testimony is the full contents and inspiration of prophecy. The Churches are under His eye, and responsible only to Him. He also opens the book of God's final purposes for mankind. His birth, death, and resurrection began that victory of good over evil, which His coming and reign will bring to a glorious completion, for His coming is the coming of God. The power and abiding worth of the book is in this splendid faith, against all appearances, in the kingship of Christ and God; in the strong hope which maintained itself amid persecution and unto death; and in the intensity of emotion through which the language, though both our ignorance and our knowledge make it in part less impressive than it was at first, has still the power, and in many passages the unimpaired power, to stir in us an answering hope and faith.

LITERATURE.—The principal books in which a historical understanding of Rev. has been furthered, and several of the important articles and discussions regarding it, have been named in the course of this article. The text may be studied with the help of Weiss (*Die Johan. Apoc.: Textkrit. Untersuchungen*, 1891), Gwynn (*The Apocalypse of St. John*, 1897), and Gregory (*Text-Kritik d. NT*, 1900); the older critical view (contemporary-historical) in the Commentaries of Lücke, Bleek, and Ewald. In America, Stuart's *Commentary* (1845) defended this general method, with some 'church-historical' features. Of recent critics the works of Vischer, Spitta, Gunkel, and Bousset are most deserving of study. The Commentaries of Bousset (Meyer's Series, 1896) and Holtzmann (2nd ed. 1893) are of the greatest value. See also the *Introductions* of Holtzmann, Jülicher, Zahn, and Bacon; also the *Histories of the Apostolic Age* by Weizsäcker (ii. 18 ff. 161–205), McGiffert, and Bartlet; the *NT Theologies* of Weiss, Beyschlag, Stevens, Holtzmann, Titius (*Die neutest. Lehre von der Seligkeit*, iv. 1900), and artt. on Apoc. by Harnack in *Encyc. Brit.*^{9} and Bousset in *Encyc. Bibl.* Of other books bearing in an important way upon the understanding of Rev., reference may be made again to Gunkel, *Schöpfung und Chaos* (1895); Bousset, *Der Antichrist* (1895, in English, *The Antichrist Legend*, 1896); Lueken, *Michael* (1898); Weinel, *Wirkungen des Geistes*, etc. (1899).

FRANK C. PORTER.

REVENGE, REVENGER.—See AVENGE, and GOEL.

REVEREND.—In earlier English there is no difference in meaning between 'reverend' (from Lat. *reverendus*, pass. ptcp. of *revereri* to fear, revere) and *reverent* (through Old Fr. *reverent*). Only the form 'reverend' occurs in AV: Ps 111^9 'Holy and reverend is his name' (קָדוֹשׁ וְנוֹרָא שְׁמוֹ; LXX *ἅγιον καὶ φοβερόν*, Vulg. *sanctum et terribile*), and 2 Mac 15^{12} 'Reverend in conversation' (*αἰδήμονα τὴν ἀπάντησιν*, Vulg. *verecundum visu*, RV 'reverend in bearing'). RV maintains the mod. distinction between 'reverend'=to be revered, and 'reverent' (as from act. ptcp.)=revering. It retains 'reverend' in Ps 111^9 and 2 Mac 15^{12} and adds Ph 4^8 marg. (Gr. *σεμνός*, RV 'honourable'); and it also introduces 'reverent' into Tit 2^3 'reverent in demeanour' (*ἐν καταστήματι ἱεροπρεπεῖς*, AV 'in behaviour as becometh holiness'). The older versions that use the word always spell it 'reverent' (Bish. in Ps 111^9, Gen. and Dou. in 2 Mac 15^{12}).

J. HASTINGS.

REVIVE.—In some of the examples of 'revive' in AV it is evident that the meaning is literally to come back to life from the dead (or transitively to bring back to life). Thus 1 K 17^{22} 'The soul of the child came into him again, and he revived'; 2 K 13^{21} 'When the man was let down and touched the bones of Elisha, he revived, and stood up on his feet'; Neh 4^2 'Will they revive the stones out of the heaps of the rubbish which are burned?'; Ro 14^9 'Christ both died, and rose, and revived.' And, even when this is not the meaning, the word carries greater force than it now bears to us. Thus Ro 7^9 'When the commandment came, sin revived, and I died.' Cf. Erasmus, *Commune Crede*, 89, 'It is more probable by the deade to understonde those that have departed from theyr bodies afore the daye of judgemente (for as sone as they shall be revived and risen agayne, they shall be judged)'; Lk 15^{24} Rhem. 'This my sonne was dead, and is revived'; and Shaks. *I Henry VI.* I. i. 18—

Henry is dead, and never shall revive.'

J. HASTINGS.

REZEPH (רֶצֶף; B *Ῥάφεις*, B^{ab} *Ῥάφες*, A *τὴν Ῥάφεθ*, 2 K 19^{12}; BQ^{mg} *Ῥάφεθ*, ℵQ* *Ῥάφες*, A *Ῥάφεις*, Is 37^{12}; Vulg. *Roseph* 2 K 19^{12}, *Reseph* Is 37^{12}).—Mentioned in the message of the Rabshakeh of Sennacherib to Hezekiah, when demanding the surrender of Jerusalem, with Gozan and Haran, and the children of Eden which were in Telassar. The district in which this town was situated belonged, for several centuries, to Assyria, and its name occurs, as was to be expected, many times in the Assyrian records, generally under the form *Raṣappa* (also *Raṣapa* and *Raṣapi*). The site is now represented by *Ruṣāfa*, between Palmyra and the Euphrates, and is thought to be the *Ῥησάφα* of Ptolemy (v. 15). The earliest mention of the place in the Assyrian records is in the Eponym Canon, where we learn that Ninip-kibsi-uṣur was the prefect in B.C. 839. From B.C. 804 to 774, the prefect was Igi-guba-êreš, or Ninip-êreš, who, judging from the length of his term, and the fact that he was twice eponym, must have enjoyed the confidence of his superiors to an unusual degree. Other prefects mentioned as having held the office of eponym were Sin-šallim-anni in 747, and Bêl-êmur-anni in B.C. 737. As all the above-named prefects of Rezeph have Assyrian names, it is very probable that they were, without exception, Assyrians. The tablet K 9921, however, mentions a governor (*bêl piḫati*) named Abda',* who seems to bear a native name, and probably held office at a later date than the eponyms whose names are given by the Assyrian Canon. The district was an important trade-centre in ancient times, as the tablets and lists from Nineveh show.

LITERATURE.—Delitzsch, *Paradies*, p. 297; Schrader in Riehm, *HWB*, *s.v.*, *COT* ii. 11.

T. G. PINCHES.

REZIN (רְצִין).—No doubt the name was originally spelled רצון, *i.e.* *Rezon* or *Razon*. The LXX *Ῥαασσών* (in Kings, but in Isaiah *Ῥασεὶν* or *Ῥασὶν* disputes the place) points to the *o* sound; so does the Assyrian *Ra-ṣun-nu* and the Pesh. ܪܨܘܢ.

1. From 2 K 16^5 and Is 7$^{1-9}$ we learn that Rezin, king of Damascus, and PEKAH, king of Israel, planned an attack on Judah. This was in the year B.C. 734. Damascus and Israel were vassal States, subject to the suzerainty of Assyria. In III Raw. 9, No. 3, Tiglath-pileser (see Winckler, *Keilinsch. Textb.* p. 17) enumerates the articles paid him in tribute by *Ra-ṣun-nu* of Damascus and Menaḥem of Samaria. The two tributaries were now anxious to throw off the yoke. Naturally they sought to enlist the aid of their neighbour Judah, which, for all that appears, was at this time nominally independent of the great king. Meeting with a refusal, the confederates moved forwards against Ahaz. We have no reliable information as to the earlier events of the campaign. The assertion in 2 K 16^6 that Rezin 'recovered Elath to Syria, and drove the Jews from Elath; and the Syrians came to Elath and dwelt there unto this day,' is obviously an error. The Syrians had nothing to do with that district, which came rather within the sphere of Edom. The original ארום (Edom) of the text has been corrupted into ארם (Aram), ארומים (Edomites) into ארומים (Aramæans, Syrians), and when once this was done the inser-

---

[*] Probably there should be a vowel at the end (*'Abda'u*, or, perhaps, *Abda'i*). Cf. עַבְדָּא and its variant עַבְדִּיָּה.

tion of the king's name, Rezin, easily followed. It should be noted that according to 2 Ch 26[17] the Edomites were actively hostile to Ahaz. All, then, that we really know of the beginning of the campaign is that the two kings, of whom Rezin was the more active and powerful, advanced with their troops against Jerusalem and besieged it. Isaiah endeavoured to allay the intense alarm which this caused amongst the citizens, but his efforts did not meet with much success. Ahaz, at all events, put more confidence in foreign intervention than in the prophet's assurance of Divine protection. He 'took the silver and the gold that was found in the house of the LORD, and in the treasures of the king's house, and sent it for a present,' *i.e.* as tribute, to Tiglath-pileser, entreating his immediate help. The Assyrian was only too delighted with the pretext for interference. His approach was the signal for the murder of Pekah by his own subjects (2 K 15[30]), who then accepted the great king's nominee, HOSHEA, as their sovereign: 'I took the land of Bit-Chumria [Beth-Omri] . . . the whole of its people. I carried away their possessions to Assyria. Pekah their king did they dethrone, and I set Hoshea to rule over them' (III Raw. 10, No. 2, in Winckler). Turning against Damascus, he encountered a more determined resistance. 2 K 16[9] states that he 'took it, and carried the people of it captive to Kir, and slew Rezin.' But the Assyrian monarch himself informs us that the siege lasted more than a year. It ended in B.C. 732. Schrader (*COT* i. 257) says that Rawlinson found the slaying of Rezin mentioned on a block, which was unfortunately left behind in Asia and has since disappeared.

Winckler (*Alttest. Untersuch.* pp. 74, 75) identifies 'the son of Ṭabeel' (Is 7[6]) with Rezin. He explains Ṭabeel (*Ṭâb-El*) as meaning 'El is wise,' and argues from the equivalent name *Eliada* (1 K 11[23]) and from the *Ṭab-rimmon* of 1 K 15[18] that such a name as *Ṭâb-El* was not uncommon amongst the kings of this dynasty. And since 'the son of Remaliah' in Is 7[6] means Pekah, he holds that 'the son of Ṭâb-El' in Is 7[7] means Rezin. Damascus, too, being the predominant partner, the chief profit of the expedition would fall to its king. The series of Damascene kings, therefore, according to him is as follows:—

Circa 950 B.C.	Rezon.
From about 885–844 . .	Bir-'idri, the Ben-hadad of the Bible.
From 844 to about 804 (?)	Hazael.
804 (?)–744 (?)	Mari'—in the Bible, Ben-hadad.
743 (?)–?	Tâb-El.
?–732	Rezin.

But the identification on which this depends is precarious. Obviously the periphrasis, 'the son of Remaliah,' is intended to be contemptuous. It recalls the fact that Pekah was a usurper, entirely unconnected with the royal family. Probably, then, 'the son of Ṭâb-El' is also a scornful title, hurled at one who was a mere puppet in the hands of the two kings. If Ṭâb-El had been a king of Damascus, it would have been no derogation to Rezin's dignity to be entitled his son.

2. In Ezr 2[48]=Neh 7[50] 'the children of Rezin' (בְּנֵי רְצִין) are mentioned amongst the Nethinim. The LXX has *υἱοὶ* 'Ρασών: the *υἱοὶ Δαισάν* of 1 Es 5[31] is evidently a mere scribe's error, resulting from the common confusion of ר and ד. Guthe, in Kautzsch's *Apokr.*, unhesitatingly restores the 'Rezin' in this passage. J. TAYLOR.

REZON (רְזוֹן 'prince'), son of Eliada, was one of the generals of that Hadadezer, king of Zobah, whom David overthrew (2 S 8[3ff.]). Falling into disfavour with his master, as David had done with Saul, he fled from him. A band of freebooters attached themselves to his standard; and, beginning in this feeble fashion, he eventually became strong enough to seize Damascus, where he founded a dynasty. During his own lifetime he proved a thorn in the side of Solomon (1 K 11[25]), and the kings who traced their descent from him were amongst the most persistent and troublesome of Israel's adversaries.

The question has been raised whether *Rezon* is the correct name. LXX A, it is true, supports that form with 'Ραζών; but B has 'Εσρώμ 1 K 11[14(23)]), which apparently corresponds to חֶצְרוֹן, to which also the Pesh. ܚܙܪܘܢ may point. Moreover, the חֶזְיוֹן of 1 K 15[18] seems to occupy much the same position in the genealogy as the רְזוֹן of 1 K 11[23]. Hence the conjecture that חֶזְרוֹן (*Hezron*) should be substituted for the רְזוֹן (*Rezon*) and the חֶזְיוֹן (*Hezion*) of these two passages respectively. On the other hand, it must be remembered that the Greek for חֶזְרוֹן would most likely have been 'Εζρώμ rather than 'Εσ.; cf. 'Αζειν for חֶזְיוֹן and 'Ρασειν for רְצִין. The three kings, Hezron (our *Rezon*), Tab-rimmon, and Ben-hadad, must also have enjoyed very long reigns if they occupied the entire interval from David to Asa. In the absence, therefore, of absolutely conclusive evidence, we are not at liberty to alter the form of the name or to assume the identity of Rezon and Hezion.

The integrity of the text and the reliableness of the statements in 1 K 11[23-25], the only passage where this prince is named, are also disputed. Internal evidence, coupled with the fact that LXX (B, Luc.) omit the words, proves that 'when David slew them of Zobah' is no part of the original text. Kittel (*Hist. of the Hebrews*, ii. 53) points out that even in the MT it looks as though vv.[23-25a] had been interpolated between v.[22] and v.[25b], and that in the LXX (B, Luc.) the whole episode is connected with v.[14]. But the connexion with v.[14] is as unsuitable as that with v.[22]. In either case it interrupts the Hadad narrative, and gives the impression of a gloss. This, however, is not to say that it is unhistorical. J. TAYLOR.

RHEGIUM ('Ρήγιον), the modern Reggio, was an important and ancient Greek colony near the south-western extremity of Italy, and close to the narrowest point of the straits separating that country from Sicily, opposite Messana (Messina) and about 6 to 7 miles distant from it. It was a much more important place in the ancient system of coasting navigation than it is in modern times. The whirlpool of Charybdis near Messana, and the rock of Scylla some miles from Rhegium round the promontory north of the town, were reckoned much more dangerous then; and ships had often to lie at Rhegium waiting for a suitable wind, and avoiding the currents which in certain circumstances run very strong in the straits. Hence the Dioscuri, the patrons and protectors of sailors, were much worshipped at Rhegium, and are represented on its coins: the mariners of the ships that put in at Rhegium would often make or discharge their vows to the 'Twin Gods' in the town.

Rhegium occupied not merely an important but also a dangerous and exposed situation. A great city in the 6th and 5th cents. B.C., it was totally destroyed, and its inhabitants sold as slaves, by Dionysius of Syracuse in 387. Again in 280–270 it was destroyed. Campanian troops, received as a garrison into the city, murdered the male population and made themselves masters of the place, till they were captured and exterminated by a Roman army, and the town was given back to the scanty remnant of its former population. Henceforth it was in alliance with Rome as a *civitas* *fœderata.* After this it is mentioned only incidentally amid the Roman wars. It narrowly escaped the forfeiture of its territory to the soldiers of the triumvirs after the battle of Philippi, being spared by Augustus probably from a desire to keep at this important harbour a population accustomed to navigation and friendly to himself; and in the Sicilian War (B.C. 38–36) it rendered good service both to his fleet and his army, and was rewarded with the title of Julium Rhegium and an increase of population (with other accompanying advantages). Strabo mentions it as a flourishing town about A.D. 20. It presented a curious mixture of Greek and Roman population and life, shown in its mixed Greek and Latin inscriptions. It was the terminus of one of the great Roman roads, a branch of the Appian Way, diverging from it at Capua, built probably by the prætor Popilius in B.C. 134 and called Via Popilia. The actual point of crossing to Sicily was at the *Columna* or *Statua*, 6 miles or more north of Rhegium.

The ship in which St. Paul sailed from Malta to Puteoli, the 'Dioscuri' * (a name of good omen), lay for a day in the harbour of Rhegium, waiting till a south wind arose, which carried it to Puteoli on the morrow after it sailed (δευτεραῖοι). Probably some of the sailors on the 'Dioscuri' took the opportunity of thanking the Twin Gods in the city for their successful voyage at that early season of the year, and praying for equal luck to their destination. The manœuvre by which the ship reached Rhegium seems quite clear; and yet has caused much trouble and variety of opinion. The ship must have had a favourable wind from Malta, otherwise it would not have attempted the crossing over the open sea so early in the year. This wind carried it to Syracuse, but there it had to lie for three days, which proves that the wind had shifted and was then against it. It then sailed to Rhegium; and, as it had to wait in Rhegium till a south wind set in, the wind with which it reached Rhegium cannot have been south. The expression περιελθόντες, which Luke uses, shows that the wind was so far unfavourable that the ship could not run a straight course (εὐθυδρομεῖν, Ac 16^{11} 21^{1}), but had to tack, running out north-eastwards towards Italy and then back to the Sicilian coast. This is the explanation of a practical yachtsman, James Smith, in his *Voyage and Shipwreck of St. Paul.* The explanation of περιελθόντες as 'sailing round the Sicilian coast' seems certainly wrong. The reading περιελόντες in ℵ* B seems to be a corruption, accepted through failure to understand the true text; it can hardly be rendered 'weighing anchor' (which is the suggested rendering), for in Ac 27^{40} it has an accusative following it in that sense, as Blass points out; moreover, it is of great consequence in Ac 27^{40} to give that information (see Smith, *op. cit.*, on the passage), but here it is unnecessary. W. M. RAMSAY.

RHEIMS VERSION.—See VERSIONS.

RHESA (Ῥησά).—A son of Zerubbabel, Lk 3^{27}.

RHODA (Ῥόδη).—The name means 'Rose.' When St. Peter was miraculously released from prison he went to the house of Mary the mother of Mark. A damsel (παιδίσκη) of the name of Rhoda came to the door, but opened not the gate for gladness, and ran in and told how Peter stood before the gate. She was accused of being mad, but persisted in her statement (Ac 12^{13-15}). Nothing further is known of her. The name is fairly common both in literature and inscriptions, and was often given to slave girls. A. C. HEADLAM.

RHODES (Ῥόδος) ranks among the most brilliant of the many brilliant cities of ancient Greece. The city was founded in B.C. 408, at the extreme north-eastern point of the island of Rhodes, when the three ancient cities, Lindus, Camirus, and Ialysus, were concentrated in the new foundation. It enjoyed an admirable situation and a splendid climate. The commercial aptitude of the population knew how to use its advantages by wise laws and just dealings with their competitors and allies in the trade of the eastern Mediterranean. Rhodes was at its highest pitch of power in the 2nd cent. B.C., having been made mistress of great part of Caria and Lycia in the settlement of 189, after the defeat and expulsion from Asia Minor of Antiochus and the Seleucid power. The city was, however, too powerful to suit the Roman policy. In B.C. 166 the Carian and Lycian cities were declared independent by Rome; and another blow was struck at Rhodian commercial supremacy by making DELOS a free port in the same year. The result of these disasters is to be observed in the diminution and alteration of Rhodian coinage about that time. But Rhodes continued to maintain its commerce. It was relieved of Delian competition by the great massacre of the Romans in Delos by Mithridates in B.C. 87; and by continuing loyal to Rome in that critical time, when almost every other Greek city joined Mithridates, it recovered favour and was permitted to regain part of its Carian possessions. In the Roman civil wars Rhodes from B.C. 47 to 43 supported the cause of Cæsar, and suffered severely in consequence. C. Cassius captured the city in 43, and exacted 4500 talents from its people; and another Cassius in 42 burned all the Rhodian ships except thirty, which he manned with crews of his own and took away. Rhodes henceforth was a city devoid of real power; and it sank practically into a common provincial town of the Roman empire, though it ranked as a free city under the early emperors (except for a short time under Claudius, who took away its freedom and afterwards restored it again). Yet Strabo mentions (p. 652) that it was the most splendid city known to him in respect of harbours, streets, walls, and other equipment. Such was its condition in the time of St. Paul. Shortly afterwards Vespasian made it a part of the province Lycia.

Rhodes is mentioned in the NT only as a point where St. Paul touched on his voyage from Troas to Cæsarea, Ac 21^{1}. The route along the coast between the ports of the province Asia on the one side and those of Syria or Egypt on the other, was probably the most frequented seaway in the whole of the Mediterranean. The voyage was marked by a number of stopping-points,—Cos, Patara, etc.,—where the ordinary ships engaged in the trade called as a matter of course; and these are mentioned in Ac 20 and 21, with the exception of MYRA (which is given in the Western Text only). Rhodes was one of them; and the ship on which St. Paul and the whole body of delegates were sailing touched there between Cos and Patara. This is all in the customary form. Hundreds of ships did the same every year. An excellent illustration is supplied by the voyage of Herod, about B.C. 14, from Palestine by Rhodes, Cos, Chios, and Mitylene, to Byzantium and Sinope (see Jos. *Ant.* XVI. ii. 2).

Rhodes was also, beyond all doubt, one of the ports of call on the voyage from Alexandria to

---

* Luke saw or heard the ship (a Roman imperial vessel) called by its Latin name *parasemo Geminis* or *Castoribus* (compare the inscription *CIL* iii. No. 3, *navis parasemo Isopharia*, *i.e.* whose sign was the Pharian Isis) in the Greek translation παρασήμῳ Διοσκούροις (where the dative represents the Latin ablat. absol., as in *consule Cicerone*, ὑπάτῳ Κικέρωνι); and the formula remains in his text to puzzle those commentators who study only literary Greek and neglect technical language.

Puteoli or to Ostia. It is, indeed, not mentioned in the voyages of that class described under MYRA, but none of those narratives gives a list of harbours, and we may assume with confidence that in each case Rhodes was a port where the ship called (unless in exceptional circumstances). That is proved by the voyage of Vespasian from Alexandria to Rome in A.D. 70, which was by way of the Lycian coast and Rhodes, as is seen by comparing Dion Cassius, lxvi. 8, with Zonaras, xi. 17, and Jos. *BJ* VII. ii. 1. The voyage of Herod the Great in B.C. 40 from Alexandria to Rome by Pamphylia and Rhodes is also a good illustration.* Herod evidently passed east and north of Cyprus, like the ship in Ac 27^{1-4}; but it was the stormy season, and the over-sea voyage, common in the summer season, could not then be risked: see MYRA, where these two voyages may be added to the examples quoted.

Rhodes is also mentioned in 1 Mac 15^{23} among the States to which the Romans sent letters on behalf of the Jews about B.C. 138 (see PHASELIS, LYCIA, DELOS, etc.). Only self-governing free States were thus addressed; and Rhodes, as almost the greatest maritime State of the eastern Mediterranean, was of course included. The ships carrying Jews from the west and from the Ægean coasts and cities to and from Jerusalem, for the Passover, would all, as we have seen, call in ordinary course at Rhodes. Such ships are implied in Ac 18^{18-22} 20^{3}. It may be taken as practically certain that in a great commercial centre like Rhodes there would be Jews resident; but hardly any memorial of them has been preserved.

In Ezk 27^{15} the Septuagint reads 'Sons of the Rhodians were thy merchants'; where AV and RV have 'The men of Dedan were thy merchants' (traffickers, RV). There can be little doubt that the Septuagint text in this passage is a change made by translators in the 3rd cent. B.C., who had no knowledge of the desert carrier tribe Dedan, but were familiar with the Rhodians as the greatest merchants of their time in the Levant (see DEDAN). In Gn 10^{4} and in 1 Ch 1^{7}, also, the Septuagint text has 'Rhodians' (Ῥόδιοι) as the fourth of the sons of Javan; but RV, following the Hebrew text, has Dodanim in the former place and Rodanim in the latter (AV Dodanim in both places). Among the sons of Javan, Rhodes, which was inhabited by Greeks (though by Dorians, not Ionians; see DODANIM), would be quite suitable; and the Septuagint text is accepted by most moderns in those two places.

The island of Rhodes is about 43 miles long from N.E. to S.W. by 20 miles where the breadth is greatest; its nearest point is about 12 miles from the mainland. The famous *colossus* was a statue of the sun-god, 105 feet in height, which stood at the harbour entrance. It was erected to commemorate the success of the Rhodians in withstanding the siege by Demetrius Poliorcetes in B.C. 280; but it fell during an earthquake in 224, and the fragments remained lying, shown as a curiosity till A.D. 672, when the Arab general who conquered Rhodes is said to have sold them to a Jew of Emesa. The island was soon afterwards reconquered by the Byzantine arms, and remained in Christian hands for many centuries. The most interesting and glorious period of Rhodian history in many respects began in 1310, when the Knights of St. John of Jerusalem took the city from the Byzantine empire, and founded a State, including several of the neighbouring small islands and some towns on the mainland, especially Halicarnassus and Smyrna (the latter being taken in 1345, and held till 1403). The Knights of Rhodes were engaged in ceaseless warfare with the Turks. The city, which was very strongly fortified by the Knights, was besieged unsuccessfully in 1440, 1444, and 1480; but at last, in 1522, the Knights surrendered on honourable terms to Sultan Suleiman, and retired to Crete, then to Sicily, and finally to Malta. The modern town of Rhodes is full of memorials of the time of the Knights, and contains hardly any apparent traces of its older history. Its harbours have been allowed to become choked with sand, and its trade is quite insignificant.

W. M. RAMSAY.

RHODOCUS (Ῥόδοκος).—A Jew who betrayed the secrets of his countrymen to Antiochus Eupator. He was detected and imprisoned, 2 Mac 13^{21}.

RIBAI (רִיבַי; LXX in 2 S Ῥειβά, in 1 Ch B Ῥεβιέ, A Ῥηβαί, א Ῥαβειαί).—The father of Ittai (1 Ch Ithai) the Benjamite, one of David's thirty heroes (2 S 23^{29}=1 Ch 11^{31}).

RIBLAH.—**1.** (רִבְלָה, once, Jer 52^{10}, רִבְלָתָה; LXX 2 K 25^{21} Ῥεβλαθά, elsewhere Δεβλαθά, and other corrupt forms).—The name of a place in the 'land of Ḥamath,' now *Ribleh*, in the Beḳā'a, or broad vale between the two ranges of Lebanon and Hermon, on the right bank of the Orontes, about 100 miles N.N.E. of Dan, 65 miles N. of Damascus, and 50 miles S.S.W. of HAMATH (which see). It was at Riblah that Pharaoh-necoh, three months after his defeat of Josiah at Megiddo (B.C. 608), in some way obtained the presence of his successor, Jehoaḥaz, and threw him into chains that he might no longer reign in Jerusalem (2 K 23^{33}). Riblah is also mentioned as the place which, at the close of the siege of Jerusalem (B.C. 586), was Nebuchadnezzar's headquarters, and to which Zedekiah, and other prisoners taken out of the captured city, were brought for punishment (2 K $25^{6f.}$= Jer $39^{5.6}$=Jer $52^{9f.}$; 2 K $25^{20.21}$=Jer $52^{26.27}$). Riblah is now nothing more than a 'miserable' village of 40–50 houses (Rob. *BRP* iii. 543); but Robinson (*ib.* p. 545) points out how, from its situation, on the banks of a mountain stream, and in the middle of a vast and fertile plain, and also on the great road leading from Egypt and Palestine to Babylon, it was a suitable resting-place, whether for the army of Necoh, who had designs on Babylon, or for Nebuch., while watching the operations that were taking place in Judah. See, further, on the modern Ribleh, Sachau, *Reise in Syrien* (1883), 55–57. 'Riblah' is likewise read by most modern scholars (Ges., Ew., Smend, Cornill, etc.), with 4 MSS, in Ezk 6^{14} for 'Diblath' (מִמִּדְבַּר רִבְלָתָה): 'I will make the land desolate from the wilderness (on the S. of Judah) to Riblah (in the far North),' the expression being regarded as a designation of the whole extent of Palestine, to its ideal limits, and Riblah being perhaps mentioned instead of the usual 'entering in of Ḥamath' (Nu 34^{8}, 2 K 14^{25}, Am 6^{14}, Ezk 47^{20} *al.*), on account of its having become prominent at the time (B.C. 592—see Ezk 1^{2}). If the 'approach to Ḥamath' is rightly placed at the *N.* end of the broad vale between Lebanon and Anti-Libanus, where, as the traveller from the S. approaches Riblah, he finds himself entering a new district, and sees the country towards Ḥamath open out before him (see esp. van de Velde, *Narrative*, 1854, ii. 470; and cf. Rob. *BRP* iii. 568; Moore, *Judges*, 80, 82; also Jos 13^{5},* Jg 3^{3}), this reading will be quite natural. Other scholars, however, doubt whether the Isr. territory can ever have been regarded as extending as far as the N.

---

[*] Jos. *Ant.* XIV. xiv. 2 f.; *BJ* I. xiv. 3.

[*] Which implies that the 'approach to Ḥamath' was at some distance from a place at the foot of Mount Hermon. The opinion (Rob. iii. 569; HAMATH, vol. ii. p. 290^{a}) that the expression denoted the approach to Ḥamath, not from the S., but from the *West*, is hardly probable (cf. Keil on Nu 34^{8}).

end of Lebanon, and think the 'approach to Ḥamath' must be supposed to have denoted, somewhat vaguely, a more S. part of the vale of Cœle-Syria (Keil and Dillm. on Nu 34[8]; Buhl, *Geogr.* 66, 110; notice Reḥōb in Nu 13[21]): in this case Riblah is certainly a more N. point than would be expected; on the other hand, if the reading be not adopted, Diblath (RV 'Diblah') must be the name of a place otherwise unknown, which is hardly likely in such a connexion.

2. Nu 34[11] (הָרִבְלָה, with the art.: LXX *ἀπὸ Σεπφαμαρ Βηλα* for מִשְּׁפָם הָרִבְלָה). One of the places mentioned on the (in parts) obscurely-defined ideal borders of the promised land, Nu 34[1-15]. It is described as being on the E. border, somewhere between Ḥaẓar-ʿēnān—which (Ezk 47[17] 48[1]) was on the 'border' of the territory of Damascus, and was to be (Nu 34[9. 10]) at the N.E. corner of Israel's territory—and the Sea of Chinnereth (*i.e.* the Sea of Galilee). There is difficulty in determining the site; for the places mentioned on the N. border of Israel, in both Nu 34[7-9] and Ezk 47[15-17], are very uncertain; and while some scholars (Robinson, Knob., Conder) think that this border may be drawn (approximately) across the *N.* extremity of Lebanon (Ḥaẓar-ʿēnān being then situated at one of the sources of the Orontes—either [Keil] the spring of Lebweh, 22 m. S.W. of Riblah 1 [Rob. iii. 532], or [Conder, *Heth and Moab*[3], 8, 11 f.] ʿAin el-ʿAsy, 11 m. S.W. of Riblah 1), others (Buhl, 66 f.; cf. RIBLAH 1) consider this to be too far N., and think that it should be drawn across the *S.* extremity of Lebanon (Ḥaẓar-ʿēnān being then either Bâniâs itself, or el-Ḥaḍr, 9 m. E. of it).* The Riblah of Nu 34[11] is, however, some place between Ḥaẓar-ʿēnān and the Sea of Galilee; so that upon none of these suppositions can it be identical with Riblah 1 (which is to the N. even of ʿAin el-ʿAsy). No Riblah in a suitable situation seems at present to be known. The suggestion (Wetzst.; see Dillm.) to read (after LXX) 'to Harbel' (הַרְבֵּלָה) for 'to Riblah,' and to identify Harbel with Harmel (or Hörmül), a place about 8 miles S.W. of Riblah (see Sachau's map, or the one in Bäd., Route 31), does not really lessen the difficulty of the verse.

S. R. DRIVER.

RICHES.—See WEALTH.

RID.—The original meaning of 'rid' is to *rescue* (Anglo-Sax. *hreddan*, cf. Dutch *redden* and Germ. *retten*), and this is its meaning in five of its six AV occurrences (Gn 37[22], Ex 6[6], Lv 26[6], Ps 82[4] 144[7. 11]). Cf. Gn 37[22] Tind. 'When Reuben herde that, he went aboute to ryd him out of their handes and sayde, let us not kyll him'; Tind. *Expos.* 77, 'Because we be ever in such peril and cumbrance that we cannot rid ourselves out, we must daily and hourly cry to God for aid and succour'; Jer 15[21] Cov. 'And I will ryd the out of the hondes of the wicked, and delyver the out of the honde of Tirauntes.' In the remaining passage the meaning is *clear out*, *drive out*, Lv 26[6] 'I will rid evil beasts out of the land' (RV 'cause evil beasts to cease out of the land'), which is the modern meaning. The process by which the word thus practically reversed its meaning (from *rescue* to *destroy*) may be illustrated from Spenser, *FQ* I. i. 36—

> 'Unto their lodgings then his guestes he riddes,'

where the meaning is neutral, *removes*. Cf. also Lv 14[36] Cov. 'The preast shall commaunde them to ryd all thinge out of the housse,' and Udall, *Erasmus' Paraph.* i. 52, 'With these men the Pharisees consulted by what meanes they might ridde Jesus out of the waye.' J. HASTINGS.

RIDDLE (חִידָה, from root חוד [*Oxf. Heb. Lex.* compares Arab. حَادَ 'decline, turn aside, avoid,' hence perhaps *riddle* as *indirect*, obscure]; verb denom. חוד 'to propose an enigma'; חוד חִידָה 'to put forth a riddle,' Ezk 17[2]: LXX *αἴνιγμα, πρόβλημα*; Vulg. *enigma, problema, propositio*) is closely related in the OT to the PROVERB (מָשָׁל), which for the most part is represented in the LXX by *παραβολή*—PARABLE. It has been suggested, indeed (Oort in Cheyne's *Job and Solomon*, p. 127), that some of the proverbs were originally current among the people as riddles, such as 'What is worse than meeting a bear? Meeting a fool in his folly' (Pr 17[12]); 'What is sweet at first, and then like gravel in the mouth? Bread of falsehood' (Pr 20[17]). Like the proverb or the parable or the allegory, the riddle served a more serious and didactic purpose than we usually associate with the word. The didactic usage is found throughout the whole of the OT. It is seen in Nu 12[8], where Jehovah chides Aaron and Miriam for their opposition to Moses, and says to the honour of the great Lawgiver, 'Mouth to mouth speak I to him, plainly and not in *riddles*' (בְּחִידֹת). In Ps 49[4] the Psalmist says, 'I will incline mine ear to a parable (לְמָשָׁל): I will propound my riddle (חִידָתִי) upon the harp,' and the subject of the psalm—the transitoriness of godless prosperity and the blessedness of a hope in God—justifies his application of the words. In Ps 78[2] the same didactic purpose is manifest. The Psalmist proposes to set forth the early history of Israel in parable and riddle for the instruction of his own age and time: 'I will open my mouth in a parable (בְמָשָׁל): I will utter riddles (חִידוֹת) from the olden time.' This parabolic use of the history of Israel by the Psalmist is taken by the evangelist (Mt 13[34. 35]) as justifying the employment of parables by Jesus to set forth the kingdom of heaven: 'All these things spake Jesus in parables to the multitudes, that the word might be fulfilled which was spoken by the prophet saying, "I will open my mouth in parables: I will declare things hidden from the foundation of the world,"' which last words are a variation from the LXX 'riddles from the beginning' (*προβλήματα ἀπ' ἀρχῆς*). This didactic purpose attributed to the riddle is well illustrated in Pr 1[6] by its association with words of like purport: 'To understand a parable (מָשָׁל), and an obscure saying (מְלִיצָה), the sayings (דְּבָרִים) of the wise and their riddles (חִידֹת).' In the Wisdom books of the Apocrypha it is perhaps natural to find examples of the didactic usage. In Wis 8[8] it is said in praise of Wisdom: 'She understandeth subtleties of speeches and interpretations of riddles' (*στροφὰς λόγων καὶ λύσεις αἰνιγμάτων*); in Sir 39[2. 8] it is said of the man who meditates in the law of the Most High, 'He will keep the discourse of the men of renown, and will enter in amid the subtleties of parables (*ἐν στροφαῖς παραβολῶν*). He will seek out the hidden meaning of proverbs (*ἀπόκρυφα παροιμιῶν*), and be conversant in the riddles of parables' (*ἐν αἰνίγμασι παραβολῶν*), these last words being inverted in 47[15], where Solomon is apostrophized as filling the earth with 'parables of *riddles*' (*ἐν παραβολαῖς αἰνιγμάτων*). The association of the *riddle* with the *parable* is found in Ezk 17[2], where the prophet is commanded 'to put forth a riddle (חוד חִידָה), and utter a parable' (מְשֹׁל מָשָׁל, LXX *παραβολήν*),—the saying being called a riddle because it requires interpretation, and a parable because of the comparison it contains of the kings of Babylon and Egypt to two great eagles, and of their treatment of Israel to the cropping of the cedar of Lebanon. There are still two occurrences of the word 'riddle' in the Prophets, where it is not so easy to say whether the didactic or the more special usage is exemplified

---

* Dillm. and Keil adopt intermediate views. Dillm. (p. 213) would not draw it N. of the present road from Bêrût to Damascus; Keil takes it as far N. as Lebweh.

In Dn 8^{23} the king of fierce countenance that is to arise, by whom Antiochus Epiphanes is meant, is credited with the gift of ‘understanding riddles’ (מֵבִין חִידוֹת); and in Hab 2^{6} the prophet, speaking of the proud and ambitious man who seeks to make nations and peoples his own, asks, ‘Shall not all these take up a parable (מָשָׁל), and an obscure saying (מְלִיצָה), riddles (חִידוֹת), against him?’

The riddle in the more special sense of a puzzle to sharpen the wits, or a paradoxical question to stimulate interest, is found in the OT, and bulks largely in the Talmud and later Jewish literature. With riddles the Jews have been wont from an early period in their history to display their intellectual ingenuity, or test the wisdom of the learned, or entertain festive occasions and hours of leisure. Deutsch (*Literary Remains*, p. 47), speaking of the Haggadah of the Talmud, refers to the *Pilgrim's Progress*, and says that Bunyan in his account of his own book unknowingly describes the Haggadah as accurately as can be—

> ‘Would'st thou divert thyself from melancholy?
> Would'st thou be pleasant, yet be far from folly?
> Would'st thou read *riddles* and their explanation?
> Or else be drowned in contemplation?
> . . . . . O then come hither
> And lay this book, thy head and heart together.’

The riddle is not, however, confined to Jewish literature. The riddle of the Sphinx is familiar from classical antiquity. It was a riddle that Tarquin the Proud acted when by striking off with a staff the heads of the tallest poppies in his garden he gave Sextus the hint to put out of the way the chief citizens of captured Gabii. The riddle as an amusement at feasts and on convivial occasions among the Greeks and Romans is mentioned in the pages of Athenæus and Aulus Gellius. (See Bochart, *Hierozoïcon*, iii. 384).

It was at his wedding feast that Samson proposed the terms of his famous riddle (Jg 14). He gave his Philistine friends seven days to find it out, promising if they should be successful thirty fine linen wrappers and thirty gala dresses (v.^{12}; Moore's *Commentary*, p. 335), and requiring from them the same if they should be unsuccessful. They accepted the terms, and Samson propounded his riddle—‘Out of the eater came something to eat, and out of the strong came something sweet?’ How far a riddle was fair, the solution of which required a knowledge of incidents so special as Samson's encounter with the lion and its sequel, need not be discussed. Their deceit and the treachery of his wife put the Philistines in possession of the secret. ‘What,’ they asked, ‘is sweeter than honey, and what is stronger than a lion?’ At once he saw he had been duped, and in a satirical vein he exclaimed, employing still the language of riddles: ‘If ye had not ploughed with my heifer, ye had not found out my riddle.’

Solomon with his high repute for wisdom in other things is credited also with skill in the solution of riddles. The Queen of Sheba on her visit to Jerusalem proved him with riddles (1 K 10^{1} =2 Ch 9^{1}). And Solomon ‘told her all her questions, there was not anything hid from the king which he told her not’ (1 K 10^{3} = 2 Ch 9^{2}). Josephus tells a similar tale of Hiram king of Tyre. Solomon and Hiram were on the most friendly terms. ‘What cemented the friendship between them,’ says Jos. (*Ant.* VIII. v. 3), ‘was the passion both had for wisdom; for they sent riddles (προβλήματα) to one another, with a desire to have them solved; and in these Solomon was superior to Hiram, as he was wiser in all other respects.’ In another passage of his writings the Jewish historian (*c. Apion.* i. 18. 17), records the testimony of Dius the historian of the Phœnicians, who says that Solomon when he was king at Jerusalem sent riddles (αἰνίγματα) for Hiram to guess, and desired that he would send others back for him to find out, the condition being that he who failed should pay a fine to him who was successful. And as Hiram was unsuccessful, he had a large amount to pay. At length he found a man of Tyre, Abdemon by name, who was able to guess the riddles proposed by Solomon, and himself propounded others which Solomon could not solve, thus recovering for his sovereign the money he had lost. None of these riddles have survived, and therefore we have no means of estimating their character as hard questions.

There are to be found, however, in the Proverbs bearing the name of Solomon, sayings that appear to be of the nature of riddles. The riddle of the insatiable things is one of these (Pr $30^{15.16}$). ‘The horse-leech (but see art. HORSE-LEECH) hath two daughters, crying, Give, give. There are three things that are never satisfied, yea, four things say not, It is enough.’ What are these? And the answer is, ‘The grave, and the barren womb, the earth that is not filled with water, and the fire that saith not, It is enough.’ This is followed by the riddles of the four mysterious things (Pr 30^{18-20}), of the four intolerable things (Pr 30^{21-23}), of the four little wise things (30^{24-28}), and of the four stately things (30^{29-31}). Riddle and interpretation alike exhibit precise observation of nature, and convey at the same time moral instruction.

To the riddles of the OT fall, perhaps, to be added the words of the mysterious writing on the wall on the night of Belshazzar's feast (Dn 5^{25-28}), MENE, MENE, TEKEL, UPHARSIN (which see). The inscription is to be read according to recent authorities, ‘A mina, a mina, a shekel and half minas.’ Vv.$^{26-28}$, says Bevan (*The Book of Daniel*, p. 106), are plays upon the words of the inscription; in v.^{28} the play is a double one. *Mina*—God hath *numbered* thy kingdom and finished it. *Shekel*—thou hast been *weighed* in the balance and hast been found wanting. *Half mina*—thy kingdom hath been *divided* and given to the Medes and *Persians*.

The parable is one of the unique features of the teaching of Christ (παραβολή in the Synoptists; παροιμία in St. John), but the riddle, except in so far as the evangelist Matthew justifies instruction by parables with a reference to Ps 78^{2}, is not expressly mentioned. Only once in the NT is the riddle expressly named, and in that instance (1 Co 13^{12}) the mention of it is obscured in EV. The meaning is—‘Now we see through a glass, in a riddle’ (ἐν αἰνίγματι), in contrast to the direct vision of spiritual realities, ‘face to face.’ In the Revelation of St. John there is a riddle which remains an enigma in spite of all attempts to solve it: ‘He that hath understanding let him count the number of the beast; for it is the number of a man, and his number is six hundred and sixty and six.’ Following the method known among the Jews as *Gematria*, by which a number is obtained from the numerical values of the letters of a name, it has been found that the Hebrew transliteration of *Neron Cesar* yields a total of 666. Although adopted by many modern interpreters, this solution of the riddle has not attained general acceptance any more than others which have been proposed from a much earlier time (see Bengel, *Gnomon*, p. 1095 ff.; Milligan, Baird Lectures on *The Revelation of St. John*, p. 321 ff., and art. REVELATION [BOOK OF] above, p. 258). In the Talmud and Rabbinical literature there is no lack of riddles. In fact the Jews exhibit a *curiosa felicitas* in this department which is unique. ‘A large number of famous sayings,’ says Abrahams

(*Jewish Life in the Middle Ages*, pp. 386, 387), 'are put in the form of riddles. Who is mighty? Who is a fool? Who is happy? A whole class of popular phrases in the Talmud and Midrash are nothing more nor less than folk-riddles, the chief exponents being women and children; but distinguished Rabbis also utilized this language of wisdom. Ethical works of the Middle Ages abound in philosophical riddles. Riddles found their way into the prayer-book for the Passover Eve. It goes without saying, therefore, that many Hebrew riddles of the Middle Ages were serious intellectual exercises.' To keep up attention and to stimulate interest while the intricate subtleties of the law are being expounded, such an assertion as this would be announced—'There was a woman in Egypt who brought forth at one birth "six hundred thousand men."' The interpretation follows: the woman was Jochebed, the mother of Moses, who was himself equal to the whole armed host of Israel who came out of Egypt. Talmudic lore records a story of Rabbi Jehuda, sage and saint, akin to that related of Tarquin the Proud. The emperor Antoninus Pius sent him a message to say the imperial exchequer was empty: how could it be replenished? The Rabbi took the messenger into the garden and tore up the big radishes and planted young ones in their place. He did the same with the turnips and the lettuces. The emperor understood the hint; he dismissed the old officials and put new in their place. Many of the riddles that thus delighted the Jewish fancy seem trivial enough. For example: 'The fish is roasted with his brother, is placed in his father, is eaten with his son, and thereafter is helped down with his father,' where his 'brother' is the salt which comes like himself from the sea, his 'father' is the water from which he is taken, and his 'son' the sauce in which he is served! Riddles whose solution depends upon the numerical values of the Hebrew letters are common. 'Take 30 from 30 and the remainder is 60.' The explanation is that 30=שְׁלשִׁים: remove ל, whose numerical value is 30, and the remainder is שִׁשִּׁים =60. The letters of the Hebrew alphabet have also a lingual meaning, and a good example of a riddle whose solution depends upon such a meaning is the following: 'There was a she-mule in my house: I opened the door and she became a heifer.' To be solved thus: From the Hebrew for 'she-mule' פִּרְדָּה take away the letter ד (Daleth=door) and there remains פָּרָה 'heifer.'

Plays upon words scarcely come under the scope of this article. They are found most abundantly in the Prophets and in the rhetorical passages of Job, but they occur also with considerable frequency in the Proverbs, and they are to be met with, though rarely, in the Psalms. In those plays upon proper names which are found in the etymological explanations of the name of the lawgiver of Israel (Ex 2^{10}; cf. Jos. *c. Apion.* i. 31), of the name of Samuel (1 S 1^{20}), and many more, the Talmud is said to be especially rich. (Upon 'Paronomasia in the OT,' see Casanowicz, *JBL* (1891), pp. 105–167).

LITERATURE.—For the usage of the Hebrew word חִידָה see *Oxf. Heb. Lex. s.v.*; Delitzsch, *Zur Geschichte der Jüdischen Poesie*; Cheyne, *Job and Solomon*; Toy, *Proverbs*. On Biblical and Talmudic riddles—Hamburger's *RE*; Löw, *Die Lebensalter*; Abrahams, *Jewish Life in the Middle Ages*; Wünsche, *Die Räthselweissheit bei den Hebräern*. T. NICOL.

RIDICULOUS.—Only Sir 34^{18} 'He that sacrificeth of a thing wrongfully gotten, his offering is ridiculous.' The meaning is active, *derisive*, *mocking* (Gr. προσφορὰ μεμωκημένη, RV 'his offering is made in mockery'). Cf. Shaks. *Love's Labour's Lost*, iii. 78, 'The heaving of my lungs provokes me to ridiculous smiling.'

RIGHTEOUSNESS IN OT.—The idea of Righteousness is one of the most complex and difficult of the ruling ideas of the OT. The subject may be introduced by one or two statements of a general nature. (1) Righteousness in the OT is strictly a personal attribute. There are a few instances where the word is used of things, but these are undoubtedly secondary (see below, p. 274^{a}). So also are the cases where it is applied to a social aggregate like the people of Israel; these arise either through personification of the community, or through the virtues of representative individuals being conceived as leavening the mass. (2) The personal relations indicated by the term are of three kinds: forensic, ethical, and religious. Righteousness, *e.g.*, may denote (*a*) a forensic right, as when Judah says of Tamar, 'she *has been in the right* against me' (Gn 38^{26}); or (*b*) a moral state, as Gn 6^{9} 'Noah was a *righteous*, blameless man in his generation'; or (*c*) a direct relation between man and God, as in Gn 15^{6} 'Abraham believed J″, and he counted it to him for *righteousness*.' But under each of these heads the notion breaks up into a great variety of distinct applications, while the figurative extensions of (*a*) into the spheres of (*b*) and (*c*) create subtle distinctions which at times defy classification. (3) It may be remarked that the history of the idea in the OT exhibits a development in almost exactly the opposite direction to that observed in the case of Holiness. Holiness (which see) is primarily a religious term, which gradually acquires ethical content under the influence of the revelation of God as a Being of perfect moral purity. Righteousness, on the contrary, belongs in the first instance to the region of moral ideas, and becomes a technical term of religion by a process whose outlines can be traced in the OT.—It will be convenient in the present art. to treat the subject under three main divisions, corresponding broadly to three stages in this development; viz. (i.) The meanings of Righteousness in ordinary popular speech; (ii.) the conception of Righteousness in the pre-exilic prophets (Amos to Jeremiah); and (iii.) the theological developments of the idea, chiefly in exilic and post-exilic writings.

The Hebrew words expressing the idea of Righteousness are the following derivatives of the root צדק:—

1. The adj. צַדִּיק; LXX δίκαιος, etc.; EV 'righteous,' more rarely 'just,' etc.

2. The abstract nouns צְדָקָה and צֶדֶק, which appear to be practically interchangeable; LXX δικαιοσύνη, etc.; EV 'righteousness,' more rarely 'justice,' etc.

[The Aram. צִדְקָה appears in Dn 4^{24}].

The verbal forms are much less frequently used, viz.:—

3. The Qal צָדַק (22 times in MT); LXX δίκαιος εἶναι, δικαιοῦν (pass.), etc.; EV 'be righteous,' 'be justified,' 'be just,' etc.

4. The Hiphil הִצְדִּיק (12 times, always in a declarative sense except Is 53^{11}, Dn 12^{3}); LXX δικαιοῦν, etc.; EV 'justify,' etc.

5. The Piel צִדֵּק (5 times, with the sense 'make out to be in the right,' or 'make to appear in the right'); LXX δικαιοῦν, etc.; EV 'justify.'

6. The Hithpael (refl.) הִצְטַדֵּק (Gn 44^{16}); LXX δικαιοῦν (pass.); EV 'clear ourselves.'

7. The Niphal נִצְדַּק (Dn 8^{14}, of the Temple); LXX καθαρίζειν (pass.); EV 'be cleansed.'

The Greek and English terms given above represent only the prevalent usage of LXX and EV respectively. With regard to the latter, it may be said that the words 'righteous' and 'righteousness' cover approximately the uses of צדק in the OT. Out of some 520 instances where the Heb. root appears, about 400 are rendered in AV by 'righteous,' 'righteousness,' or 'righteously.' In over 100 cases 'just,' 'justice,' 'justify' are employed, sometimes appropriately enough, but at other times quite arbitrarily (cf. *e.g.* Gn 6^{9} with 7^{1}, or Am 2^{6} with 5^{12}). There are, besides, a few miscellaneous renderings, which it would serve no useful purpose to tabulate. On the other side, 'righteous' stands for יָשָׁר ('upright') in Nu 23^{10}, Job 4^{7} 23^{7}, Ps 107^{42}, Pr 2^{7} 3^{32} 14^{9} 15^{19} 28^{10} (similarly the adv. Ps 67^{4} 96^{10}). RV has rectified some of those anomalies: for instance, except in Nu 23^{10}, 'righteous,' etc., never are used except for some form of צדק. The usage of the LXX is marked by somewhat greater diversity, as was to be expected from the variety of circumstances in which the different books were translated. In the great majority of cases, however, the Heb. terms are represented by δίκαιος and the cognate words, although other renderings are frequent, as ἄμεμπτος, καθαρός, πιστός, εὐσεβής, κρίσις, ἔλεος, ἐλεημοσύνη (the last two are instructive). And, conversely, δίκαιος, etc., are used for such words as יָשָׁר, נָקִי ('innocent'), חֶסֶד ('kindness'), אֱמֶת ('truth,' 'fidelity'), מִשְׁפָּט ('judicial decision,' 'judgment'), etc. A certain freedom of translation is, no doubt, permissible in view of the extreme versatility of the Heb. notion, and its association with numerous parallelisms; and these Heb. synonyms have naturally to be taken into account in forming conclusions regarding the OT idea of righteousness. Cf. Hatch, *Essays in Bibl. Gr.* 49.

i. RIGHTEOUSNESS IN COMMON LIFE.—In the earliest historical literature—the documents J and E of the Hex., and the oldest sources of the Bks. of Samuel and Kings—the words for 'righteousness' occur, not very frequently, but in connexions which convey a pretty complete idea of what they meant in everyday life. Here the most prominent aspect of the notion is the *forensic*, although this by no means excludes an ethical and religious reference. In early Israel, law, morality, and religion were closely identified, all three resting largely on traditional custom or being embodied in it. Morality consisted in conformity to the conventional usages of the society to which a man belonged (Gn 26^{9}, 2 S 13^{12} etc.); the administration of justice was the enforcement in individual cases of the acknowledged rules of social order; and, again, these rules were invested with religious sanctions as expressing the will of J″. Thus a man's legal rights were a measure of the morality of his conduct, and at the same time all rights existing between men were also rights before J″. When it is said that the forensic element preponderates, what is meant is that questions of right and wrong were habitually regarded from a legal point of view as matters to be settled by a judge, and that this point of view is emphasized in the words derived from צדק. This, indeed, is characteristic of the Heb. conception of righteousness in all its developments: whether it be a moral quality or a religious status, it is apt to be looked on as in itself controvertible and incomplete until it has been confirmed by what is equivalent to a judicial sentence. Now, within the forensic sphere we can distinguish three aspects of righteousness which are of fundamental importance for the subsequent history of the idea; and these may be illustrated from almost any period of the language.

(1) Righteousness means, in the first instance, being *in the right* in a particular case. Of the two parties in a controversy, the one who has the right on his side is designated as הַצַּדִּיק, and the one in the wrong as הָרָשָׁע: Dt 25^{1} 'If there be a quarrel between men, and they bring it to the judgment-seat, and (the judges) judge them, they shall justify the צַדִּיק and condemn the רָשָׁע'; cf. 16^{19}, Ex 23$^{7.8}$, Is 5^{23} 29^{21}, Pr 17^{15} 18$^{5.17}$ 24^{24} etc. Similarly, a person accused or suspected of wrongdoing is צַדִּיק if he is innocent and רָשָׁע if guilty (Gn 20^{4}, 2 S 4^{11}, 2 K 10^{9}, Pr 17^{26}). It makes, of course, no difference whether the case is actually submitted to a judge or not; all questions of right and wrong are conceived as capable ideally of being so settled, and the intrinsic merits of the dispute are described by the same terms; see Ex 9^{27} ('J″ is *in the right*, and I and my people are *in the wrong*'); 1 S 24^{17}, 1 K 8^{32} (cf. Ex 2^{13}). Thus צְדָקָה (צֶדֶק in this sense appears to be later) denotes the right or innocence of an incriminated person, his claim to justification, the validity of his plea (2 S 19^{29} 26^{23}, Neh 2^{20}).* In these cases righteousness is an inherent quality, not depending on the decision of the judge, but at the most demanding recognition by him. And although the conception is essentially forensic, it is obviously one to which ethical ideas readily attach themselves. Righteousness comes to mean *unimpeachable moral conduct* (Gn 30^{33}—a difficult case); and in this sense it may be predicated of a man's whole life, the righteous man being one who is blameless before an ideal tribunal; see 1 K 2^{32} 3^{6}, Gn 7^{1}, 6^{9} (P) 18$^{23ff.}$, Dt 9$^{4-6}$, La 4^{13} etc. In this application a religious reference is probably always included, the ideal tribunal being that of God.

Legal phraseology is naturally transferred to the case of mere *debate*: Job 11^{2} 33^{12}; here to 'justify' means virtually to admit the force of one's arguments (27^{5}). With this may be connected the use of the words to express correctness in prediction (Is 41^{26}), or truthfulness in speech (Is 45$^{19.23}$ 63^{1}, Ps 52^{5}, Pr 8^{8} 12^{7} 16^{13}); although other explanations are here possible (see below, p. 274).

(2) Righteousness, however, has a second sense, which is purely forensic; it means the *legal status* established by a public judgment in one's favour: Is 5^{23} 'take away the righteousness of the righteous from him' (cf. 10^{2}). Examples of this kind are rare in allusions to secular jurisprudence; but the distinction plays a very important part, as we shall see, where forensic analogies are transferred to men's standing before God; and it could hardly be drawn so clearly there unless it had some basis in ordinary judicial administration.*

(3) Lastly, righteousness is the quality expected *of the judge* in the exercise of his office. His fundamental duty is to 'justify' (הִצְדִּיק='declare in the right') him who is in the right, and to condemn (הִרְשִׁיעַ) him who is in the wrong (Dt 25^{1}, 2 S 15^{4} etc.); and, if the circumstances require it, to inflict punishment on the wrong-doer (Dt 25^{2}; cf. 2 S 12^{6} etc.). In this he is said to manifest צֶדֶק (Dt 1^{16} 16$^{18.20}$, Lv 19^{15}, Is 11$^{4.5}$ 16^{5}), or in a common phrase to execute מִשְׁפָּט וּצְדָקָה.† The temptations to which a judge was mainly exposed being bribery and 'respect of persons,' his righteousness consists essentially in his rising superior to such influences and deciding each case with absolute impartiality on its merits. Stress, however, is naturally laid on the duty of redressing the wrongs of the poor and defenceless; hence judicial righteousness is frequently equivalent to deliverance or protection. This idea lies, indeed, in the verb שָׁפַט itself, which means not only to judge, but also to vindicate or defend (1 S 24^{15}, Is 1^{17} etc.).

The forensic sense of righteousness illustrated above appears to be fundamental in Heb., and goes back to a remote period in Semitic antiquity. It is found in a phrase closely corresponding to OT usage in one of the Tel el-Amarna tablets (15th or 14th cent. B.C.), where Abdḫiba of Jerusalem says, *sa-du-uk ana ia-a-ši aš-šum amilûti Ka-ši*='I am *innocent* with respect to the Kashi' (*KIB* v. 306 f.). That a similar usage prevailed in Aramaic and Phœnician is shown by the inscriptions in both languages (see Lidzbarski, *Handbuch der nordsem. Epigraphik*, p. 357). The forensic conception of righteousness appears, therefore, to be characteristic of the northern group of Semitic dialects. In Arabic, on the other hand, the root has no forensic associations. The verb *ṣadaḳa* means to speak the truth; *ṣaddaḳa*, to attribute truth to a speaker, to accept or homologate his statement; *ṣaddîḳ* is one who is habitually veracious, and *ṣadîḳ* a true or sincere friend. All these uses embody the ethical idea of *trustworthiness* or genuineness; and a reflexion of this moral sense is probably to be recognized in some peculiar subsidiary applications, as when the verb is employed of eyes and ears that faithfully perform their functions, or of earnestness or steadiness in battle 'as opposed to a false show of bravery,' or of the desperate running of a hunted animal (see Lane, *Lexicon*). *Ṣadâḳ*, the marriage gift from husband to wife, was originally a pledge of friendship; and even the much discussed *rumḥ ṣadḳ* possibly means a *trusty* lance, and not a straight or sound or hard lance (Wellhausen, *GGN*, 1893, p. 434), though Nöldeke considers that in this case the meaning 'straight' is certain (*Fünf Mo'allaqāt*, 2, p. 40).

---

* The fem. of the adj. צַדִּיק is nowhere used; in the only instance where the right of a woman is concerned the simple verb is employed; Gn 38^{26} (צָדְקָה מִמֶּנִּי).

* It may here be pointed out that it is doubtful if the adj. צַדִּיק bears this sense of outward justification even in the religious sphere (Kautzsch). It seems confined to the inherent character on which a legal right is based, but not to include the status which results from a vindication of that right. In other words, it is used of the godly as *entitled* to Divine justification, but not as actually *justified*. Kautzsch thinks there are exceptions in Is 40–66 and 24-27; but that is not quite clear. Zec 9^{9} would be a case in point if the meaning is to be determined by the following epithet נוֹשָׁע ('*vindicated* and victorious'; G. A. Smith, *Twelve Prophets*, ii. 466). On some doubtful cases in the Psalms, see below, p. 278.

† This expression was probably used originally of judicial action (2 S 8^{15}, Jer 22^{15} 23^{5}, Ezk 45^{9}), but was extended to moral conduct in general (Gn 18^{19}, Ezk 18$^{5.19.21}$, and very often). In Dt 1^{16} etc. (above) צֶדֶק is partly the personal virtue of the judge, partly the objective right which is the result of his just action; the word appears first in Hosea and Isaiah. It is possible that this judicial sense of righteousness (3) is less primitive than that described under (1). At least the cases are few where the *adj.* is applied to a *human* judge (though often to God as the Supreme Judge of men). 2 S 23^{3} is a clear example; on Zec 9^{9} see the last note; other possible cases are Jer 23^{5}, Ezk 23^{45}.

It has commonly been held that the varied senses of righteousness can be reduced to the single idea of 'conformity to a norm,' resting ultimately on the physical analogy of *straightness*. But the notion of 'conformity to a norm' could hardly be primitive; and, even if all the uses of צדק could be brought under it, it would not thereby be proved to be fundamental, since all legal and ethical terms necessarily imply a reference to a norm. It is indeed very doubtful if straightness be the concept originally expressed by the root. Certainly, nothing of the kind can be inferred from the cases in the OT where the word is used of material objects. *Just balances*, *weights*, etc. (Lv $19^{15.36}$, Dt 25^{15}, Job 31^{6}, Ezk 45^{10}), are simply such balances, etc., as justice demands (cf. Am 8^{5}), just as *sacrifices of righteousness* (Dt 33^{19}, Ps 4^{5} 51^{19}) are sacrifices rightly offered. The phrases *paths of righteousness* (Ps 23^{3}) and *gates of righteousness* (118^{19}) are so obviously figurative that they do not fall to be considered here at all. The evidence from Arabic is equally inconclusive. Here the discussion has turned largely on the use of *ṣadḳ* as an epithet of the lance (see above). It happens, however, to be applied in particular to the *knots* of the lance reed (cf. *ṣadḳ'ul-ku'ûb*, Muall. Antara, 48), where, if the word describes any physical quality at all, it must be *hardness*; unless, indeed, *ka'b* be understood as a section of the reed between two knots (Nöldeke, *ib.*). On the whole, perhaps, the idea of hardness best accounts for the higher developments of the idea both in Arabic and Hebrew. The transition from hardness to trustworthiness is easy and natural, while the same analogy in the legal sphere might denote unimpeachableness of conduct on the part of a suitor, or steadfastness of character on the part of the judge. But these speculations are of little account; the meanings of righteousness in OT have to be ascertained from usage, and the fundamental usages appear to be those stated in the preceding paragraphs.

ii. RIGHTEOUSNESS IN THE PROPHETS.—Although the prophets were the great champions and exponents of righteousness in Israel, it is not easy to say precisely in what respect their teaching marks an advance on the current notions examined in the last section. In their use of terms they adhere closely to the common forms of speech: the צַדִּיק is still the man whose cause is just, and צְדָקָה and צֶדֶק continue to be used of forensic right or judicial rectitude. Nevertheless it is clear that the whole idea is elevated to a higher plane in the teaching of the prophets, and acquires a significance at once more ethical and more universal. The difference of standpoint is partly to be explained by the state of things which the prophets saw around them. By the 8th cent. the old consuetudinary morality had broken down under the pressure of far-reaching economic changes which had affected disastrously the life of the people. Large numbers of Israelites had been dispossessed of their holdings, and in consequence deprived of their civil and religious rights; the poor were defrauded and ground down by the rich, and even the forms of law had been turned into a powerful engine of oppression. In face of a situation like this, it is evident that the prophetic ideal of righteousness must rest on deeper foundations than mere use and wont. It rests, in fact, on the ethical character of J″. What is distinctive of the prophets is the conviction that social righteousness is the necessary and inexorable demand of J″'s moral nature. So intense is this conviction that the idea of abstract right seems to stand out before their minds as an objective reality, a power that may be resisted but can never be defeated. 'Never before,' says Wellhausen, 'had this been proclaimed with such tremendous emphasis. Morality is that through which alone all things subsist, the sole reality in the world. It is no postulate, no idea, it is at once necessity and fact,—the most living, personal energy,—Jahwe, the God of Forces.'* This is most clearly to be seen in Amos, the father of written prophecy; but all the prophets move on the lines laid down by him, and mean by righteousness substantially what he means, although they may not give it the same central position which it occupies in his book. It may suffice to note the following points. (1) The prophets are concerned in the first instance with that exercise of righteousness on which the well-being of the community most depends, *the public administration of justice*. Amos demands that right (מִשְׁפָּט) be set up in the gate (5^{15}); that right roll down like waters, and righteousness like a perennial stream (5^{24}); and complains bitterly of those who turn righteousness to wormwood, *i.e.* turn the fount of justice into a source of wrong and misery (5^{7} 6^{12}). Isaiah and Micah hurl their invectives against the ruling classes for their perversion of justice and legalized plunder of the poor (Is 1^{17} $3^{14f.}$ 5^{23} $10^{1f.}$, Mic $2^{1f. 8f.}$ $3^{1-3. 9f.}$), and Jeremiah denounces the rapacity and misgovernment of the kings ($22^{13. 15}$ $23^{1f.}$; cf. Ezk $34^{3ff.}$). Cf. further, Hos 10^{12}, Is 1^{21} 5^{7}, Jer 22^{3} etc. A well-governed State, repressing all wrong and violence, and securing to the meanest his rights as a member of J″'s kingdom, is the embodiment of the prophetic ideal of righteousness. At the same time, the spirit which ought to preside at the seat of judgment is conceived as a principle pervading the whole life of the nation, and regulating the relations of its different members and classes. Civic righteousness is perhaps more a function of the community, a sound and normal condition of the body politic, than a rule of individual conduct; although the latter is, of course, included (Hos 10^{12}, Jer 4^{2}). (2) In their conception of what constitutes righteousness, the prophets are not dependent on a written code,† and still less on the technicalities of legal procedure. Their appeal is to the moral sense, the instinctive perception of what is due to others, the recognition of the inherent rights of human personality. The idea is far broader than what we usually mean by right or justice; it includes a large-hearted construction of the claims of humanity; it is, as has been said, the humanitarian virtue *par excellence*.‡ And this is true not only in private relations, but also in the sphere of judicial action. The righteousness of the judge appears pre-eminently in his vindication of the widow, the orphan, and the stranger, the oppressed and defenceless classes generally (Is 1^{17} etc.). In Amos the צַדִּיק is always the poor man, with no influence at his back, who must therefore look to the judge to maintain his rights. This feature might be considered accidental, arising from the injustice to which the poor were subjected at that time. But it is important, nevertheless, as exhibiting an aspect of the Heb. idea of judicial righteousness which is apt to be overlooked by us. It denotes not merely the neutral impartial attitude of mind which decides fairly between rival interests, but a positive energy on the side of right, a readiness to protect and succour those who have no help in themselves. (3) Righteousness in this ethical sense is not only rooted in the moral instincts of human nature, but is a reflexion of the character of J″. It is what He requires of men, what He has looked for in vain from Israel (Is 5^{7}), that in which He delights, which He seeks to produce on earth (Jer 9^{24}). The inflexibility of this Divine demand for social righteousness is one of the most impressive things in prophecy. Ritual service is as nothing in J″'s sight; He despises and hates it when offered by men of immoral life. But the claims of righteousness are absolute, and the nation that will not yield to them, though it be the chosen people of Israel itself, must perish. Further, this righteousness, being based at once on the nature of man and the nature of God, is universal in its range. It has its witness in the human conscience everywhere (Am 3^{9}), and determines the destiny of other nations as well as of Israel (1^{3} 2^{3} etc.). It is, in short, the moral order of the universe, and the supreme law of J″'s operations in history. (4) As the lack of righteousness is the cause of Israel's destruction, so the presence of it is a constant feature of the Messianic salvation to which the prophets look forward. 'A king shall reign in righteousness, and princes decree justice' (Is $32^{1f.}$). The Messiah's kingdom shall be established in righteousness (9^{7}), and He shall judge the poor in righteousness ($11^{4.5}$), etc. Cf. Jer 22^{15} 23^{5} 33^{15}, Hos 2^{21} (?), Is 1^{26} $32^{16f.}$ 33^{5} etc. (5) Righteousness as a personal attribute of J″ is not named by the prophets so frequently as one might expect. The adj. צַדִּיק is not used in this sense till a comparatively late period (Zeph 3^{5}, Jer 12^{1}). Amos never mentions the righteousness of J″, though the image of the plumb-line in $7^{7.8}$ shows that the conception was in his mind (cf. Is 28^{17}). Isaiah speaks of a judgment 'overflowing with righteousness' (10^{22}), and of the Holy God as 'sanctifying himself by righteousness' (5^{16}), *i.e.* showing Himself to be God through the exercise of judicial righteousness. The idea is common to all the prophets. From the special circumstances in which their work was carried on, they dwell chiefly (if not exclusively) on the *punitive* side of the Divine righteousness, the side which it presents to the guilt of Israel (Hos 6^{5}* 10^{4}, Hab 1^{12}). Righteousness, in short, is here equivalent to *retribution*, although retribution is not regarded as an end in itself, but only as a step in the carrying out of a redemptive purpose.

---

* *Isr. u. jüd. Gesch.*^{3} 109.

† The idea of righteousness as obedience to the written law of God, which bulks so largely in the later writings, appears in Dt 6^{25}; cf. 24^{13}, Zeph 2^{3}.

‡ Cf. the combination of צְדָקָה with חֶסֶד ('kindness') in Hos 10^{12}, Jer 9^{23}.

These appear to be the chief features of the idea of righteousness which is characteristic of the pre-exilic prophets. It is not yet to be called strictly a religious conception, inasmuch as its human side consists of moral qualities displayed by men in their relations to one another, and the righteousness of men before God is an idea hardly represented in the prophets. But it makes the religious development possible, and some anticipations of that development in the prophetic writings will have to be considered under the next head.

iii. RIGHTEOUSNESS IN THE SPHERE OF RELIGION.—We come now to consider the different forms assumed by the idea of righteousness as expressing relations existing immediately between God and man. These are based on the monotheistic principle, interpreted by the help of the forensic categories described above (under i.). J″ is the supreme Ruler and Judge of the universe, and His judgments are seen in history or providence. But the ordinary course of providence could not always be accepted as the final expression of the mind of the Judge; it is usually in some great crisis, some decisive interposition of J″ felt to be impending, that the ultimate verdict is looked for. Meanwhile nations and men are on their trial, they are severally in the right or in the wrong before God, and in the final day of reckoning the issues will be made clear, and the justice of the Divine government fully vindicated. Although all the elements of this conception are present in pre-exilic prophecy, the special applications of it now to be dealt with belong mostly to a later period, and are the result of certain currents of thought which come to the surface in the age of the Exile. There are three things to be looked at: the righteousness of Israel; the righteousness of the individual; and the righteousness of God.

1. *THE RIGHTEOUSNESS OF ISRAEL.*—The question of Israel's right against other nations is one little considered by the earlier prophets. It was doubtless a factor in the popular religion, revealing itself in that eager longing for the day of J″ which Amos rebukes (5^{18}). From that point of view it was a matter of course that J″ should maintain the cause and right of His people, and moral considerations hardly entered into the feeling. The prophets, on the other hand, were too much concerned to impress on Israel a sense of its utter unrighteousness before God to pay much heed to the violation of right involved in its subjection to nations morally worse than itself. In the 7th cent., however, partly as a consequence of the Deuteronomic reformation, the idea of a righteous Israel begins to exert an influence on prophetic thought (cf. Dt 6^{25}). The first prophet to treat the matter expressly from this point of view is Habakkuk (the idea is latent in Nahum), who uses the technical terms צַדִּיק and רָשָׁע to designate Israel and its heathen oppressors respectively ($1^{4.13}$; cf. 2^{4}: see the Comm.), and appeals to J″ to redress the wrongs suffered by His people. But it was the Exile that brought the question to the front in the prophetic interpretation of history. The Divine sentence had gone forth confirming the moral verdict of the prophets on the nation's past, and the more spiritual part of the people acknowledged the just judgment of God in what had befallen them (La 1^{18}). But there still remained the promise of a glorious future, in which the righteousness of J″ would be displayed not less than in the judgment now past. Israel, therefore, has a right which, though obscured for the present, is recognized by J″, and will be vindicated by Him in due time. Wherein does this righteousness of Israel consist?

Deutero-Isaiah.—The answer to this question is given by the writer of Is 40–55 in a manner which went far to fix the sense of righteousness for all subsequent theology. The prophet looks to his people's restoration from exile as a final disclosure of the righteousness both of Israel and of J″, and an event fraught with the most blessed consequences for humanity. That Israel has been, and is, in the wrong before God is explicitly acknowledged in the ironical challenge of 43^{26} ('that thou mayest be in the right'), and is implied in many passages besides. But its sin has been forgiven, the punishment endured has been adequate (40^{2}), and, in spite of the unpreparedness of the people, J″ brings near His salvation (46^{13} 51^{5} 52^{10}); the hidden right of Israel, which exists amidst all its unworthiness and shortcoming, is about to be made manifest. And here, in accordance with forensic usage, the idea of righteousness is resolved into two perfectly distinct conceptions. On the one hand it denotes the inherent right of Israel's cause at the bar of the Divine judgment (as in i. (1)); and on the other hand the external vindication of that right through a judicial intervention of J″ (i. (2)). In the latter sense righteousness means justification ($54^{14.17}$ $45^{8.24}$), and is practically equivalent to salvation, the deliverance of the people being regarded as the execution of a Divine sentence in its favour.* The idea of the inherent righteousness of Israel, however, is more difficult, and several elements appear to enter into it. (*a*) Israel is in the right, first of all, as having *suffered wrong* at the hands of the world-power. The triumph of Babylon has been the triumph of brute force over helpless innocence (47^{6} 52^{3-5}), and a violation of the moral order of the world. On this ground alone Israel has a plea before the Judge of all the earth, it has a right (מִשְׁפָּט) which does not escape the notice of J″ (40^{27}; cf. Mic 7^{9}). (*b*) Righteousness includes, in the second place, a way of life in accordance with the law of God. Of the better part of the people it is said that they follow after righteousness (51^{1}) or know righteousness (51^{7}), just as it is said of another section that they are far from righteousness (46^{12}).* Similarly, in 53^{11} it is said of J‴'s righteous Servant that by his knowledge he shall make many righteous, *i.e.* bring them to a moral condition conforming to the Divine will. (*c*) There is, perhaps, yet another element to be taken into account: Israel is in the right in virtue of its being identified with the cause of J″, the only true God. Israel is J‴'s witness, His client in the great controversy between the true religion and idolatry, His servant and His messenger whom He has sent ($43^{10.\,12}$ 44^{8} $41^{8.\,9}$ 42^{19} etc.). As the organ of J‴'s self-revelation, the nation represents the cause that must ultimately triumph, and is therefore essentially in the right. This vocation of Israel is described as perfectly realized in the ideal Servant of the Lord (49^{3}), whom J″ has called in righteousness (42^{6}) and appointed for a light of the Gentiles, that His salvation might be to the ends of the earth (49^{6}; cf. $42^{1.\,4}$). The Servant's confidence that he shall be justified ($50^{8.\,9}$ 49^{4}) rests on the consciousness of his election, and the unique relation which he holds to the redemptive purpose of J″.

---

* Read ומשפטי כאור יצא.

* In 41^{2}, where it is said of Cyrus that 'right meets him at every step,' צֶדֶק bears the sense of right vindicated on the field of battle, *i.e.* 'victory' (see the Comm.).

The same distinction between inherent and external righteousness is met with in chs. 56-66, which are assigned by some scholars to a later date. Thus in the sense of justification (salvation, prosperity, etc.) the nouns occur in 56^{1b} 58^{8} 59^{9} $61^{3.\,10f.}$ $62^{1f.}$ (cf. 48^{18}, possibly an interpolated passage in the earlier part). Of inherent right, the adj. is used in 57^{1} 60^{21}; the substantives in 56^{1a} 58^{2} $64^{4f.}$; the aspect most prominent appears to be obedience to the law.—The idea of civic righteousness in the sense of the pre-exilic prophets appears in $59^{9.\,14}$.

The sense of Israel's right against the nations appears likewise in other post-exilic writings, particularly in the Psalter, where the antithesis of 'righteous' and 'wicked' sometimes denotes Israel and the heathen respectively; cf. Ps 7^{10} 14^{5} 31^{18} 33^{1} $52^{6f.}$ 75^{10} 94^{21} $97^{11f.}$ $118^{15.\,20}$ etc. etc. But here it is no longer possible to separate between the national and individual references of the idea of righteousness; and it is therefore better to deal with the subject after we have considered—

2. *THE RIGHTEOUSNESS OF THE INDIVIDUAL.*—That individual righteousness was an idea familiar in early times to the Israelites, is sufficiently clear from such passages as 1 S 26^{23}, 1 K 8^{32}, Is $3^{10.\,11}$ (?if genuine), etc.† It may be true that the individual was hardly felt to possess an independent religious status before God. His life and his interests were seen to be merged in those of his family or the community (1 S 3^{13} etc.); and it was perhaps not expected that his outward fortunes should correspond exactly with his moral condition. At all events, there is no evidence that the inequalities of providence in this sphere pressed severely on religious thought till towards the Exile, when a growing sense of personal right begins to assert itself (Dt 24^{16}, 2 K 14^{6}). In the remarkable prophetic experience of *Jeremiah*, religion appears to resolve itself into a personal relation of the individual soul to God. And it is noteworthy that immediately he is confronted by the gravest problem of Jewish theology,—Why is it that the man who is right with God has to suffer affliction and injustice in the world? 'Too righteous art thou, O J″, for me to contend with thee; yet of judgments would I speak with thee: Wherefore is the way of the wicked prosperous?' etc. (12^{1}).

Ezekiel.—Besides the general tendency of thought referred to in the last paragraph, there were two special reasons for the rapid growth of individualism in the exilic and post-exilic ages. One was the dissolution of the State, in consequence of which the principle of collective retribution was necessarily suspended, and each man became directly accountable to God for his own sins (Jer $31^{29f.}$, Ezk 18^{2-4}). But another and more permanent cause was the introduction of the written Law as the basis of religion. The Law makes its appeal in the first instance to the individual conscience, and, although the aim of the Deuteronomic covenant was to make of Israel a righteous *nation* through obedience to the Divine will (Dt 6^{25}), its immediate effect was only to set up a standard of righteousness which served as a test of the individual's relation to God. The influence of these two facts is very apparent in the conception of righteousness which meets us in the Bk. of Ezekiel. Except in a few instances ($16^{51f.}$ 23^{45} $45^{9f.}$) the words 'righteous' and 'righteousness' are there used solely to denote the religious condition of individual persons in the sight of God ($3^{20ff.}$ 13^{22} $14^{14.\,20}$ $18^{5ff.}$ $21^{3f.}$ $33^{12ff.}$). Sometimes even the plu. צְדָקוֹת is employed of the separate virtues or good deeds, which when integrated make up the religious character (3^{20} 18^{24} 33^{13}; cf. Is 33^{15} 64^{5}). In form the idea is purely legal, consisting in obedience to the precepts of the written Law; its content, as given in 18^{5-8} 33^{15} etc., is mainly but not exclusively ethical. And to this conception of righteousness there is attached a rigorous theory of individual retribution; according as a man's state is when the judgment overtakes him, so will his destiny be: the righteous shall live, and the wicked shall die.

Book of Job.—Ezekiel's doctrine of retribution was formulated with express reference to the final judgment which determines whether a man is to be admitted into the perfect kingdom of God or excluded from it. When the principle was extended to the ordinary course of providence, it was found to be contradicted at many points by experience. Hence arose the most serious stumbling-block to the faith of OT believers—the inequalities, the seeming injustice, of God's providential dealings with men. This problem emerges in many forms (see Hab $1^{2-4.\,13}$, Is 53, Mal $3^{15.\,18}$, Ps 37. 39. 49. 73, etc.), but nowhere is it treated with such penetration and such intensity of feeling as in the Bk. of Job. Job, a typically pious man, acknowledged to be such by the Almighty and the Satan, as well as by his fellow-men, is suddenly visited by a series of calamities which, on the current view of providence, could only be explained as the punishment due to heinous sins. This view is upheld, in the discussion which ensues, by the three friends, and is partly shared by Job himself. His mind is dominated by the thought of God as his adversary in a lawsuit; or rather his chief complaint is that the Almighty constitutes Himself both accuser and judge, while there is no umpire who can lay his hand upon them both ($9^{32ff.}$). He feels himself to be the victim of an accusation brought against him by an all-powerful antagonist; and his contention is that the accusation is unjust—that he is in the right and God in the wrong in this unequal quarrel. This, of course, as the other disputants are quick to point out (8^{3} 34^{17} 36^{3} 37^{23} 40^{8}), is to impugn the judicial righteousness of God; and such a position is to them simply inconceivable. 'How can a man be in the right against God?' they ask (4^{7} 5^{14} 25^{4}); and Job retorts with bitter irony, 'How indeed! seeing He is the

---

* Many commentators take the word in these passages in the sense of outward justification. But the parallelism in 51^{7} ('in whose heart is my law') strongly favours the more ethical meaning, and this ought in fairness to rule the interpretation of 51^{1}. 46^{12} is more doubtful.

† On an Aramaic inscription of the 7th cent. B.C. (Nerab ii. 2) the following words are put into the mouth of a dead priest: 'For my righteousness before him, he (the god) gave me a good name and lengthened my days' (Hoffmann, *ZA*, 1896, p. 221 f.).

Omnipotent against whom there is no redress' (9^{2}). Thus to the friends the question at issue is the righteousness of Job, which they ultimately deny; while to Job himself it is the righteousness of God in His providential dealings with men: 'he condemns God that he himself may be in the right' (40^{8}, cf. 34^{5}). Although he is forced to acknowledge that God has pronounced him guilty, he is nevertheless perfectly sure of his own righteousness (27^{6}), by which he means in the first instance his 'just cause against God' (35^{2}), his innocence of the unknown transgressions laid to his charge by his irresistible opponent. 'I am innocent—in the right' is his constant cry ($9^{20f.}$ 13^{18} 34^{5} etc.). But behind this formal and purely forensic sense of righteousness there lies a deeper question, viz. What constitutes the righteousness of a man before God, or what entitles him to a sentence of justification in the shape of temporal prosperity? On that point there does not appear to be any fundamental difference between Job and his friends. Righteousness means morality combined with piety—loyal and whole-hearted obedience to the will of God. Observance of the written Law is obviously excluded by the conditions of the poem; but it is assumed that God's will is known, and that a man may so fulfil it as to be righteous. Job is a man perfect and upright, fearing God and shunning evil (1^{1} etc.). That his outer life had been morally correct was known to all the world; what was known to himself alone and God was that there had been no hypocrisy or secret infidelity in his heart ($29^{12ff.}$ $31^{1\text{-}35}$); his morality had been inspired by religion, by reverence, and perfect allegiance to his Creator. On that point the testimony of his conscience is clear and unwavering; and it is the undoubted teaching of the book that this plea of Job's is valid, and that the real problem lies where Job's argument places it, in the mystery of the Divine government. We are not here concerned with the solution which the author intends to suggest, but it can hardly consist, as some have thought, in the undermining of Job's consciousness of innocence, and his being convicted of a subtle kind of sin in the shape of self-righteousness. It is rather to be looked for in the remarkable distinction which the patriarch is led to draw between the God of Providence who condemns and persecutes him, and the God to whom his heart bears witness, who is even now his friend, and must yet appear as his avenger, though it be after his death ($16^{19\text{-}21}$ $19^{25\text{-}27}$). Job is enabled in some degree to maintain his fellowship with God apart from outward tokens of His favour, sustained only by the witness of his conscience, and the nascent hope of seeing Him as He is, in another state of being.

It has already been pointed out that in this book the terms for righteousness are employed of *being in the right* in argument; cf. 11^{2} 27^{5} 32^{2} $33^{12.32}$. Note also the occasional use of צֶדֶק in the sense of external justification (=prosperity), 8^{6} 29^{14} [?] 33^{26} 36^{7}.

Proverbs and Ecclesiastes.—In the two remaining canonical *Ḥokhmah* books the conception of righteousness is as distinctly individualistic as in Job or Ezekiel. A very common theme in the Proverbs is the contrast between the 'righteous' (צַדִּיק—sing. or plu.) and the 'wicked' (רָשָׁע).[*] Here the righteous do not form a *party* (as often in the Psalms); they are a *class*, comprising all who follow the moral ideal taught by the wise men. All men, in short, are divided by the Proverbialists into good and bad, and 'righteous' is simply one of the commonest designations of the good part of mankind. It follows that the idea of righteousness presented in the book is essentially ethical, though no doubt with a strong dash of utilitarianism, the virtues chiefly insisted on being those which experience shows to be necessary for the welfare of society, and therefore most immediately beneficial to the individual who practises them. At the same time the moral system has a religious background. The written Law is the supreme standard of morality or righteousness. Moreover, one of the chief objects of the writers is to inculcate the doctrine of individual retribution in the ordinary course of Divine providence. However the fact may be explained, the difficulties surrounding this question are ignored in the Proverbs, and the law of retribution is regarded as fully manifested in the present life: 'The righteous shall be requited in the earth, much more the wicked and the sinner' (11^{31}). Hence the idea of righteousness appears to have lost the eschatological reference which it frequently has in other parts of OT, and (what is more remarkable) it has all but lost the sense of outward justification, such as we meet with occasionally even in the Bk. of Job. Although it is constantly asserted that righteousness is the way to honour, wealth, prosperity, etc., it does not seem ever to be *identified* with these external tokens of God's approval except in 21^{21b} 8^{18}. In Ecclesiastes the same conception of righteousness as the supreme moral category prevails; cf. 3^{17} 7^{15} 8^{14} $9^{1.2}$. The sayings most characteristic of the author are these two: 'Be not righteous overmuch' (7^{16}), and 'There is not a righteous man upon the earth that doeth good and sinneth not' (7^{20}). The latter is perhaps the only passage in OT where righteousness is treated as equivalent to sinlessness; the former exhibits a reaction against the casuistries of Pharisaic legalism. The vacillation of the book on the subject of retribution (contrast 7^{15} 8^{14} 9^{2} with 3^{17} 9^{1} etc.) raises difficult critical questions which need not be considered here.[*]

The Psalms.—It is very difficult to analyze and classify the varied aspects of human righteousness presented in the Psalter. For one thing, it is impossible (as was said above) to draw a sharp line of division between the righteousness of the nation and that of the individual. The point of view most characteristic of the Psalms is intermediate between these two. In a large number of passages the distinction of צַדִּיק and רָשָׁע is applied to two parties within the community; the 'righteous' being the religious party who have regard to the Covenant, and the 'wicked' the godless and wealthy anti-theocratic party who set religion and morality at defiance.[†] Here the idea of righteousness is partly national, since the 'righteous' represent the true ideal Israel; partly individual, inasmuch as the party is formed by those members of the nation who accept the Law as their rule of life. In some cases, indeed, it is difficult to say whether the contrast intended be one within the nation or between the nation and the rest of the world. The ungodly in Israel are animated by the same spirit as the heathen that know not God, and conversely the qualities of the righteous are the same whether the predicate be extended to the people as a whole or restricted to a portion of it.

With regard to the conception of righteousness implied by this contrast, the following points have to be noted. (*a*) The conflict of parties is, first of all, a conflict of religious first principles. The righteous are distinguished by their faith in the moral government of the universe. They trust in J″ ($16^{1}\ 26^{1}\ 22^{9}$), and consciously identify themselves with His cause in the world; they stake their existence on the conviction that 'there is a God that judgeth in the earth' (58^{11}), and that 'in the end judgment must be given for righteousness' (94^{15} Wellhausen). The wicked, on the contrary, are practical atheists. They deny, not perhaps the existence of God, but His providential action ($14^{1}\ 53^{1}$), and acknowledge no higher authority than their own lawless wills ($12^{4}\ 59^{7}\ 64^{5}\ 94^{7}$). Thus the Divine decision in their favour for which the Psalmists pray will be the vindication of that view of the world to which they have committed themselves—the proof that they are *in the right* in the fundamental beliefs on which their life is based. (*b*) The sphere in which the contrast is wrought out is that of personal and social morality; hence there is a constant reference, tacit or expressed, to the moral character of the suppliants. They are those who practise righteousness and justice ($106^{3}\ 119^{121}$); they appeal to their integrity ($7^{8}\ 25^{21}\ 41^{12}$); they claim to be upright, or upright of heart ($32^{11}\ 33^{1}\ 37^{18}\ 64^{10}\ 97^{11}\ 140^{13}$), and innocent ($94^{21}$); to have clean hands and a pure heart ($18^{20.24}\ 24^{4}$); cf. $17^{1ff.}\ 26^{1ff.}$. On the other hand, the wicked are cruel, unjust, deceitful, bloody-minded, adulterous, avaricious, etc.; men who, with no fear of God before their eyes, trample every social obligation under their feet.* (*c*) Another element in the Psalmists' sense of righteousness is the fact that they suffer wrong at the hands of their enemies ($7^{1}\ 10^{2}\ 22^{7ff.}\ 31^{15}\ 69^{26}\ 119^{86}\ 125^{3}\ 143^{3}$ etc.). The outrages perpetrated by the heathen nations on Israel, and by the rich upon the poor within Israel, are a violation of the moral order of the world which cannot pass unpunished under the just government of J″; the oppressed are, *ipso facto*, in the right against their oppressors. (*d*) Lastly (as in Deutero-Isaiah and elsewhere), righteousness bears the sense of *justification* through the judicial interposition of J″, usually in the form of a restoration of temporal prosperity. So in 24^{5} 'he shall receive blessing from J″, and *righteousness* from the God of his salvation' (cf. $17^{15}\ 35^{27}\ 37^{6}\ 112^{3.9}$ etc.); in 23^{3} 'paths of righteousness' means 'paths of prosperity' ($118^{19}\ 132^{9}$).†

---

[*] See 3^{33} 10 *pass.* (11 times), $11^{8.10.23.31}$ $12^{5.7.10.12.21.26}$ $13^{5.9.25}$ $14^{19.32}$ $15^{6.28.29}$ $21^{12.18}$ $24^{15f.}$ 25^{26} $28^{1.12.28}$ $29^{2.7.16.27}$. There are many other contrasts, as *sinner* 13^{21}, *evil-doers* 21^{5}, *fools* 10^{21} etc.; and many synonyms, as *wise* 9^{9} 11^{30} 23^{24}, *good* 2^{20}, *upright* 21^{18} etc.

[*] Both in Proverbs and Ecclesiastes there are references to the public administration of justice, where of course the idea of righteousness has the ordinary legal applications: cf. Pr $17^{15.26}$ $18^{5.17}$ 24^{24} 25^{26}, 8^{15} 16^{12} 25^{5} 31^{9}, Ec 3^{16} 5^{8}.

[†] Cf. 1^{5} 5^{12} $11^{3.5}$ 32^{11} $34^{17.20.22}$ 37 *pass.* 55^{22} 64^{10} 69^{28} 92^{12} 112^{6} 140^{13} 141^{5} etc.

Now, while all these elements may enter more or less into the Psalmists' consciousness of being in the right,—that consciousness on which they base their expectation (or explain their experience) of deliverance ($4^{1}\ 7^{9}\ 17^{1}\ 18^{20.24}$ etc.),—they are not of equal importance. The second (*b*) far outweighs the others. Righteousness is in the main an ethical word, describing the condition of those whose lives are governed by regard for the moral law. To the question in what sense morality constitutes righteousness before God, the Psalms, of course, furnish no direct answer. The chief consideration, no doubt, is that obedience to the written Law was the condition of acceptance with J″ under the Covenant. This thought is often expressed ($19^{7ff.}\ 78^{7}\ 99^{7}\ 103^{18}\ 105^{45}$ 119 *pass.*, etc.), and may be presumed to be always in the mind of the writers. At the same time it is to be observed that only the ethical (as opposed to the ceremonial) elements of the Law enter into the conception of righteousness, a fact which shows that the influence of the prophets still lives in the devotional poetry of Judaism. Nor is there anything in the Psalms that can properly be called self-righteousness or legalism in a Pharisaic sense, *i.e.* the Psalmists do not think of their good works as giving them an absolute title to justification. They do not (like Job) maintain their right *against* God—'in thy sight shall no man living be in the right,' 143^{2}—they are ever conscious of defect and sin cleaving to all they do; and merely plead the steadfast direction of their will towards the ethical ideal as evidence of their fidelity to J″. Righteousness, in fact, is a relative term, meaning *in the right* as against some other, not absolute moral perfection in the sight of God. In 106^{31}, where a single good action is said to be 'counted' for righteousness, the word has doubtless a sense approaching to *merit* (cf. Gn 15^{6}); but here the Pauline maxim has to be borne in mind that the 'reckoning' of a reward is of grace, not of debt (Ro 4^{4}). It is a manifestation of grace on the part of J″ that He renders to a man according to his works (62^{12}).

This is not the place to examine the moral ideal of the Psalmists in detail (see ETHICS); it is in all important features the common property of post-exilic Judaism, and it has its centre in the individual life. Only one point needs to be adverted to, in order to guard against a possible misconception. It is found that in connexion with the idea of righteousness considerable emphasis is laid on the humane virtues. In 112^{4} 'righteous' and 'merciful' occur together in the description of the God-fearing man; in v.^{9} of the same Psalm charity to the poor is mentioned as a condition of righteousness; in $37^{21}\ 112^{5.9}$ the righteous is characterized by willingness to lend and to give.* Now, it is a well-known fact that in later times righteousness acquired the special sense of mercy or even almsgiving (see below), and it might he supposed that in the passages just cited we have the first indication of that important change of meaning. It is very doubtful if this view be correct. In reality, the phenomenon in question is little different from a feature we have already remarked in the prophetic conception of righteousness. To say that the righteous man is merciful, etc., is not the same thing as to identify righteousness and mercy; all that is meant is that mercifulness is one feature of the ideal righteous character; and any stress laid on such virtues in particular passages is amply explained by the prominence assigned to them in the moral code of Judaism.

Some additional illustrations of the various kinds of human righteousness may here be given from the later writings of OT.—In Mal 3^{18} the two parties in the restored community are distinguished as the 'righteous' and the 'wicked' respectively (as in Psalms).—In 3^{20} righteousness means *justification* through a return of prosperity; as also Jl 2^{23}: 'the early rain *in token of justification*' (לִצְדָקָה,—less probably, *in just measure*); Dn 9^{24} ('everlasting righteousness').—In Is $24^{16}\ 26^{2}$ צַדִּיק is a predicate of the nation of Israel; in 26^{7}, perhaps of the theocratic party.—In 26^{9} the idea seems to be that when J″ rouses Himself to the exercise of His judicial functions, the inhabitants of the world will learn what true piety is.—Is 64^{5}, Dn 9^{18} express a sense of the worthlessness of the works of righteousness (צְדָקוֹת) performed by the people; the consciousness of being in the right (often so powerful in the Psalms) cannot maintain itself in the face of prolonged national misfortune. Dn 8^{14} (נִצְדַּק) is a peculiar case: the cleansing of the sanctuary is considered as a *justification*, a vindication of its rights against the heathen who had profaned it.

3. *THE RIGHTEOUSNESS OF GOD.*—In the OT righteousness is never predicated of any other deity than J″, the God of Israel.† It appears to be regarded

---

* Righteousness in judgment is emphasized, *e.g.*, in the portraits of the king, $45^{7}\ 72^{2}$ (cf. $58^{1}\ 82^{2f.}\ 99^{4}$ etc.). In $72^{3}\ 85^{10.11.13}$ the word possibly means the ideal state of a well-ordered commonwealth, bringing peace and prosperity in its train (cf. Is 45^{8}).

† As was remarked above, צַדִּיק (the adj.) does not appear to have this sense; it refers to the inherent state or character of those who are in the right, whether it has been manifested by external providential acts or not. $118^{15.20}$ are hardly exceptions.

* The same combination is met with in Proverbs (cf. $12^{10}\ 21^{21}\ 29^{7}$), and perhaps in Job (29^{14}).

† In Ps 58. 82 many commentators find the unfamiliar idea expressed that the government of the world has been delegated by J″ to inferior, semi-divine beings, the gods of the heathen. To the unrighteous judgment of these subordinate deities is ascribed the perversion of right which prevails on earth. If this view were correct (which is doubtful), it would certainly show that righteousness was *expected* of all beings to whom Divine honours were paid; but such a representation hardly conflicts with the statement made above.

not as a natural attribute inseparable from the very notion of Godhead, but as one which J″ alone has proved Himself to possess in the positive revelation of Himself through the history of Israel (see Is $45^{19ff.}$). The idea has its roots in the fundamental institutions of the Hebrew religion. From the time of Moses, J″ was regarded as the fountain of right in Israel, the King and Judge of His people, dispensing justice continuously through His accredited representatives (Dt 1^{17}).* The development of the idea is due chiefly to influences emanating from the prophets. It belongs to their view of J″ as an ethical Person having an independent character of His own, in contrast with the gods of the heathen, who were conceived even by their worshippers as arbitrary and capricious beings, subject to incalculable humours and swayed by self-interest. The righteousness of J″ is the steadfastness of His character, to be seen, first of all, in His inflexible determination to punish Israel for its sins (Is 28^{17} etc.). It comes to light in the moral order of the universe, which is just J″ Himself operating in history in a way that answers to the sense of right which He has implanted in human nature. In Zeph 3^5 His moral rule is described as having the constancy and uniformity of the natural law that brings in the dawn: 'J″ is righteous in the midst of her; he doeth no iniquity; morning by morning he bringeth his judgment to light, nothing is missing' (cf. Hos 6^5 'my judgment goeth forth as the light'). In a similar and nearly contemporary passage we read: 'The Rock, his work is perfect, for all his ways are judgment; a God of faithfulness and without iniquity; righteous and upright is he' (Dt 32^4).

This prophetic conception of the Divine righteousness receives a remarkable expansion in the hands of Deutero-Isaiah. The most suggestive passage is 45^{19-21} 'Not in secret have I spoken, in a place of the land of darkness; I have not said to the seed of Jacob, Seek me in the waste. I, J″, speak righteousness, proclaim uprightness . . . A righteous God and a Saviour (אֵל צַדִּיק וּמוֹשִׁיעַ) there is not except me' (cf. v.^{23} 'righteousness is gone forth from my mouth,—a word that shall not return'; and 63^1 'I that speak in righteousness, mighty to save'). Here two things are to be noted: first, that righteousness is a feature not merely of J″'s judicial action, but of His whole manner of revealing Himself in history; and, secondly, that beyond the universal moral order of the world it embraces a redemptive purpose, which, however, is ultimately coextensive with the destiny of mankind. The fundamental thought would seem to be the trustworthiness and self-consistency of J″'s character,—His being ever true to His own nature and purpose,—and along with that His straightforwardness in the revelation of that purpose to Israel. In the same profound ethical sense the words are used in 41^{10} 42^6 45^{13}: the upholding of Israel, the election of the ideal servant, and the raising up of Cyrus, are all moments in one comprehensive purpose of salvation which J″, in virtue of His righteousness, steadily pursues to its glorious issue.† Elsewhere than in Deutero-Isaiah, this precise sense of righteousness is rarely met with in OT (see Zec 8^8, Neh 9^8, and those passages in the Psalms where righteousness is parallel to faithfulness). Its indirect influence, however, has been very great, as appears from the remarkable way in which the Psalmists emphasize the gracious aspect of the attribute (see below).

The teaching of Deutero-Isaiah on this subject stands somewhat apart from the rest of the OT, and represents a standpoint hardly reached by subsequent writers. Righteousness appears to be conceived as a moral attribute expressing what J″'s character is in itself, apart from His legal relations with men; and it is difficult to trace a connexion between this view of righteousness and the commoner forensic conceptions about to be considered. Smend describes it as 'die Zuverlässigkeit mit der er sich als der Helfer Israels beweist' (*Rel.-gesch.*^{2} 394; cf. 1st ed. 421 ff.), and seems to derive it from the idea of J″'s being in the right in His controversy with Israel (see (*a*) below). Dalman treats it simply as a manifestation of judicial righteousness on the part of God ((*b*) below). Were it not hazardous to depart from the forensic usage which is so prevalent in Hebrew, one might be tempted to suppose that we have here to do with an independent development of the notion parallel to what is found in Arabic.

For the most part, however, the idea of Divine righteousness is based on legal analogies applied to the relation between J″ on the one hand and Israel or mankind on the other. Here, again, there are two cases to be distinguished. (*a*) Not infrequently, in the prophets and elsewhere, J″ appears as the *plaintiff* in a legal action, pressing His suit against Israel, and calling for the judgment of an ideal tribunal (Is 1^{18} 43^{26}, Mic 6^2 etc.). When in this connexion the word 'righteous' is employed of J″, it denotes that He is *in the right* and His adversary in the wrong in the controversy between them. The adj. has this sense in the mouth of Pharaoh, Ex 9^{27} ('J″ is in the right,' etc.). It is so used also in the following passages, where the righteousness of J″ is acknowledged in the punishment of Israel's sin: La 1^{18}, Ezr 9^{15}, Neh 9^{33}, 2 Ch 12^6, Dn 9^{14}. Similarly, צְדָקָה in Dn $9^{7.16}$, צְדָקוֹת in 1 S 12^7, Mic 6^5;* and the verb in Ps 51^6 ('that thou mayest be in the right in thy sentence'). By an extension of meaning parallel to what we have already noted in the secular sphere, this sense of righteousness might readily pass over into that of ethical perfection; and there are a few instances where the word is possibly to be so understood; cf. again Zeph 3^5, Dt 32^4, Zec 8^8; also Neh 9^8, Ps 145^7 etc.

(*b*) The prevalent conception of the OT is that in which J″ is represented not as one of the parties in a lawsuit, but as the supreme Judge, who sits enthroned above the confusion and strife of the world, and dispenses absolute justice in the end to all His creatures. Righteousness, accordingly, is pre-eminently the *judicial* attribute of God; it is that which pertains to Him as 'the Judge of all the earth' (Gn 18^{25}). J″ is a righteous Judge (Jer 11^{20}, Ps 7^{11}); judges the world in righteousness (Ps 9^8 96^{13} 98^9); He sits on a throne judging righteousness (9^4); righteousness is the foundation of His throne (89^{14} 97^2); cf. 11^7 36^6 48^{10} 50^6 71^{19} 97^6 111^3 etc. Hence the word may be expected to have the same range of meaning as the ordinary OT conception of judicial righteousness, which we have seen to be a somewhat wider idea than its modern equivalent. (*a*) It includes of course, first of all, the cardinal virtues of the judge: *e.g.* love of right (Jer 9^{23}, Ps 11^7 33^5 99^4); rigorous impartiality in the distribution of punishment or reward (Job 8^3 36^3 37^{23}); and unerring recognition of men's true moral condition (Jer 11^{20} 20^{12}, Ps 7^9; cf. Is 11^3 of the Messiah).† Its action is naturally two-sided:

---

* As expressions of the righteous will of J″, the precepts of the Law are sometimes spoken of as themselves 'righteous' (Dt 4^8, Ps 19^9, and often in Ps 119). So in Dt 33^{10}, and perhaps elsewhere (Ps 5^9 119^{40} etc.), the righteousness of J″ means that which He requires of man, or that which is prescribed in the Law. Some writers have thought it strange that this Divine attribute is nowhere mentioned in the Pent. in connexion with the Mosaic legislation, which, from one point of view, might seem the most signal exhibition of J″'s righteousness in the whole history of Israel. The explanation probably lies in the essentially prophetic character of the conception referred to in the text above. By the prophets the term is applied not to the legislative activity of J″, but to His dealings in providence.

† Cf. also 42^{21} 'J″ was pleased, for his righteousness' sake, to magnify revelation,' etc. Less significant, but still noteworthy, are 41^{26} 43^9, where the terms are applied to predictions as verified by the event.

* צְדָקוֹת in Jg 5^{11}, Ps 11^7 103^6 is probably different (=manifestations of judicial righteousness, in a sense favourable to Israel).

† 'Die göttliche *Zedakah* ist diejenige Gesinnung, welche in ihrer Bethätigung den wahren, d. i. sittlichen Werth oder Unwerth einer Persönlichkeit (oder einer Gemeinschaft) in absolut richtiger Weise anerkennt' (Diestel, *JDTh*, 1860, p. 179).

towards the wicked it is vengeance (Jer 11^{20} 20^{12}, Is $59^{16\text{f.}}$, Ps 129^{4} etc.), while for the righteous it means vindication and deliverance; and usually the two sides of the idea will be displayed in the same act of judgment, the deliverance of the righteous being effected through the destruction of the wicked. (*β*) But frequently the second is so emphasized that the other is almost or quite left out of view; and this tendency is so pronounced as almost to bring about a transformation of the whole idea of Divine righteousness. Thus in virtue of His righteousness J″ establishes the righteous (Ps 7^{9}), and pleads the cause of His people (Mic 7^{9}); He answers their prayer by terrible things in righteousness (Ps 65^{5}), etc. So in the many places where the righteousness of God is referred to as an object of praise (Ps 7^{17} 22^{31} 35^{28} 40^{10} 51^{15} $71^{15\text{f.}\,19}$ 89^{16} 145^{7}), it is not the abstract justice of J″'s dealings that calls forth adoration, but His proved readiness to help and bless His people. This aspect of righteousness may be defined as the *justifying activity* of God. (γ) Once more, the name righteousness is given to the *act* of justification in which the Divine attribute is manifested, and to its external consequences as seen in the lot of the justified. In other words, righteousness is synonymous with salvation (Is 46^{13} $51^{5.\,6.\,8}$ $59^{16\text{f.}}$, Ps 40^{10} 51^{16} $71^{15\text{f.}}$ 98^{2} etc.). This objective righteousness is spoken of indifferently as that of God the Justifier, or of men the justified [*] (cf. Ps 111^{3} with 112^{3}, and see the passages cited above amongst the illustrations of human righteousness). It should be added that in many cases the context hardly determines whether it be the subjective attribute in the Divine mind or the outward embodiment of it in providence which is to be understood.

It is evident that the OT writers know nothing of the sharp contrast often drawn by theologians between the righteousness and the mercy of God. Righteousness and saving activity, so far from being opposed to each other, are harmonious principles of action in the Divine nature; J″ is a righteous God *and* a Saviour (Is 45^{21}). Accordingly, the Psalmists constantly appeal to the righteousness of God, not only for judgment (22^{32} 35^{24}), but for deliverance (31^{1} 71^{2} 143^{11}), for quickening (5^{8}), for the answer to prayer (143^{1}), etc. Again, righteousness is frequently associated with other attributes expressing the gracious attitude of J″ to His people, *e.g. mercy* or *grace* (חֶסֶד Ps $36^{6.\,10}$ 89^{14} 103^{11} 145^{17}), *faithfulness* (אֱמֶת, אֱמוּנָה Zec 8^{8}, Ps 36^{6} 40^{10} 88^{12} 89^{14} 96^{13} $119^{137.\,142}$ 143^{1}), *compassion* (חַנּוּן 116^{5}), *goodness* (145^{7}), etc. These parallelisms are not to be pressed so far as to identify righteousness with grace or faithfulness; all that is implied is that in J″'s providential action various attributes meet, so that the same act may from different points of view be regarded as an exercise of righteousness, or of faithfulness, or of mercy. Still they suffice to show that in the mind of the writers there was no sense of opposition between righteousness and grace in God. How far their idea is from mere retributive justice,—the *constans et perpetua voluntas suum cuique tribuendi*,—appears with almost startling force from the singular wish of Ps 69^{27} that the wicked may not come into J″'s righteousness (*i.e.* have no share in His justifying activity), or the not less remarkable prayer of $143^{1.\,2}$ 'Answer me in thy righteousness. And enter not into judgment with thy servant: for in thy sight shall none living be in the right.' [†] Nay more, the principle of retribution is in Ps 62^{12} expressly deduced not from the righteousness of God, but from His grace: 'to thee belongeth grace: for thou requitest each man according to his works'; here the meaning must be that it is an act of condescending grace on the part of God to take cognizance of the differences in human conduct.

On the other hand, however, these examples do not justify certain extreme theories that have sometimes been built upon them. They do not, *e.g.*, warrant the definition of righteousness as God's fidelity to the Covenant (Kautzsch, Riehm, etc.). No doubt, faithfulness to covenant obligations is a part of the ethical righteousness of J″ when once a covenant has been established; but there is nothing to suggest that the attribute comes into play only with the covenant relation, or that its sphere of exercise is confined to the maintenance of the Covenant with Israel. Again, it is an exaggeration to deny that retribution is an element of the Divine righteousness. This has been done by Diestel and Ritschl, who hold that the righteousness of God has a positive reference only to the purpose of salvation, and that retribution has merely an accidental connexion with it in so far as the punishment of the wicked may be necessary for the establishing of the righteous. The distinction here attempted to be drawn is illusory. The punishment of sin is directly connected with the Divine righteousness in such passages as Is 5^{16} 10^{23} 28^{17}, Ps 7^{11} 50^{6}, 1 K 8^{32} etc.; and if this does not more frequently occur, the reasonable explanation is that the matter was too self-evident to require to be insisted on. But the mistake of both these theories, as of others that might be mentioned, is that they tend to dissociate an OT idea from the historic institutions in which it was incorporated in Hebrew thought, and try to reconstruct it on the unsafe foundation of an abstract definition. The language of the OT is not scholastic but practical; its writers do not analyze and expound ideas, but express in vivid popular speech the spiritual truths by which their religious life was sustained. That the Divine righteousness was mainly conceived by them as a judicial attribute is beyond dispute, and they must be presumed to include under it all that the term would imply if used of a human judge,—the punishment of the guilty as well as the vindication of the innocent. The prominence which is given to the latter aspect of the notion is certainly a fact of the utmost significance for theology, but it involves no departure from the analogy of secular justice as administered in ancient Israel. If it be considered that the Psalmists and other writers were accustomed to look on a judge as the natural protector and patron of the oppressed, and, further, that they were always confident in the substantial justice of their own cause before God, there need be no difficulty in recognizing the essentially judicial character of their conception of the Divine righteousness, although to their minds it presents on the whole the aspect of grace.

Another point may be referred to. The OT does not appear to teach a justification of sinners as such. In Protestant theology, according to Ritschl, justification is a *synthetic* judgment of God, expressing, that is, His resolve, for the sake of Jesus Christ, to treat as righteous those who have no righteousness in themselves. Assuming that to be a correct statement of the evangelical doctrine, we have merely to observe that the OT does not proceed quite so far. It rather leads us to think of justification as an *analytic* judgment, a declaration of righteousness by God in favour of such as are inherently in the right. Those who are justified are, in fact, sinful men,—though never, of course, 'wicked' (רְשָׁעִים),—but still, in the relative sense in which the word is used, they are the 'righteous'; and it is *quâ* righteous, not *quâ* sinners, that they are objects of the justifying decree of God. It is true that in the actual experience of OT believers this order of ideas is generally reversed. The consciousness of being in the right is seldom strong enough to be long maintained in the absence of the outward marks of God's approval in the shape of temporal good fortune; the case of Job is quite exceptional. The external justification, therefore, as a rule comes first in the thought of OT writers; and from it they derive the assurance that they are inherently righteous before God. And as the withdrawal of outward prosperity is a proof of sin in the righteous, so the act of justification is equivalent to the pardon of sin; cf. Job 33^{26}, where the conversion of a sinner under the chastening hand of the Almighty is said to be followed by the restoration of his righteousness. Thus the teaching of the OT may be said to culminate in the thought of righteousness as a gift of God, an idea appearing most clearly perhaps in Ps 24^{5} 69^{28}, Is 46^{13} $51^{5.8}$ 56^{1}. In these passages we find the nearest approximation to what we mean by 'imputed' righteousness. The idea of the righteousness of one person being imputed to another is, it need hardly be said, entirely foreign to the OT.

---

[*] 'Gottes Gerechtigkeit hat einen mehr ursächlichen, aktiven, die menschliche einen mehr sekundären und receptiven Charakter, jene ist eine Kraft, diese ein Zustand' (Duhm on Ps 112).

[†] Here 'enter into judgment' apparently means to appear as the accuser in a legal process (Wellhausen). The Psalmist does not shrink from the judgment of God, in which His צְדָקָה is operative, but only from a controversy with the Almighty, like that in which Job so recklessly engaged.

In late Hebrew the word צדקה underwent a remarkable change of meaning, for a full account of which the reader is referred to the valuable treatise of Dalman cited below (under Literature). A few points may here be noted.

(1) In the sphere of private morals צדקה became almost equivalent to the OT חֶסֶד; *i.e.* it denoted any exercise of benevolence which goes beyond a man's legal obligations. Obviously, this is a development of the humanitarian aspect of the idea which we have seen to be prominent in the prophets and the Hagiographa, and it reaches its climax in the sense of *almsgiving* (see Mt 6^{1}). Dalman considers that the word had this sense in the Aramaic dialect before its adoption by the Jews, but this is hardly proved by the examples he adduces (p. 18). It is not necessary to take the original צִדְקָה in Dn 4^{24} as anything else than right living; and the occurrence of the later sense in the Targ. (Gn 18^{19}) is no sure evidence of an independent Aramaic development. It seems more natural to suppose that the usage of the Targ. registers a change which the idea had undergone in the religious thought of later Judaism.

(2) In the judicial sphere צדקה has ceased to be a properly judicial attribute. It is a consideration which comes in to moderate the operation of strict justice (דִּין), so that the question is actually raised, and answered with much ingenuity, how, in accordance with OT injunctions, צדקה is to be exercised in judgment.* This, of course, applies equally to the Divine righteousness and to that of a human judge. Here, again, we have the one-sided exaggeration of a single element in the old Hebrew notion of judicial righteousness. Originally it included both the exercise of impartial justice and a readiness to espouse the cause of the oppressed. Eventually—partly through the parallel development in the sphere of private morals, and partly, as Dalman observes (p. 18), from a more developed sense of formal right—the two ideas proved to be incompatible, and the name צדקה was appropriated to that which, strictly speaking, has nothing to do with a judge's functions at all.

The question arises, To what time can these changes, or the beginnings of them, be traced back? Here the evidence of the LXX is of importance. Where the reference is to righteousness manifested by God to man, צדקה is not infrequently rendered by ἐλεημοσύνη (Dt 6^{25} 24^{13}, Ps 24 $(23)^{5}$ 33 $(32)^{5}$ 103 $(102)^{6}$, Is 1^{27} 28^{17} 59^{16}, Dn 9^{16}) or ἔλεος (Is 56^{1}). For human righteousness we have only ἔλεος in Ezk $18^{20.22}$ and ἐλεημοσύναις (=alms) in Dn 4^{24}. On the other hand, δικαιοσύνη stands for חֶסֶד in Gn 19^{19} 20^{13} 21^{23} 24^{27} 32^{10}, Ex 15^{13} 34^{7}, Pr 20^{28}, Is 63^{7}. These facts indicate a tendency to confuse the ideas of צדקה and חסד, though they do not show it to be far advanced; something must be allowed for the difficulty of rendering in another language the peculiar shades of meaning assumed by the Hebrew term.—In the original Hebrew of Ben Sira, the later sense of צדקה appears (3^{14} 3^{30} [cf. Pr 16^{6}] 7^{10} 40^{17}), alongside of the more general OT sense (12^{3} 16^{14} 44^{13} 51^{30}): some passages are ambiguous (40^{24} etc.).—Since the OT probably contains writings of more recent date than the Greek translation of the Pent., or even the age of Ben Sira (*c.* 200 B.C.), it would not be surprising if in some parts of the Canon the idea of righteousness were found to have undergone the transformations just described. Yet, as has been already said, it is doubtful if this is the case. The OT emphasizes humanity or mercy as an element in the ethical ideal; but it is this ethical ideal itself, and not any particular virtue, which is described by the term righteousness. So again in the administration of justice: righteousness, with whatever latitude of meaning, is always an attribute proper to the judge, never a foreign influence brought in to modify judicial action. There is no foundation in OT for the rabbinical maxim, 'Where judgment is there is no room for צדקה, and where צדקה is there is no judgment' (Dalman, p. 6).

J. SKINNER.

RIGHTEOUSNESS IN NT.—The words denoting 'righteous' and 'righteousness' in NT, *δίκαιος* and *δικαιοσύνη*, primarily signify what is conformable to an ideal or standard, agreement with what ought to be. These terms naturally take their colour from the system of morals in connexion with which they are used. Righteousness will be a very noble or a very commonplace virtue, according to the standards by which men measure character and conduct. Accordingly we find that, in profane Greek, righteousness is chiefly a social virtue. Usage and custom prescribe the standard of righteousness and measure its elevation. In NT, however, righteousness is, above all things, a religious word; it is rightness according to the Divine standard; it is conformity to the will and nature of God Himself. Since, therefore, the character of God is conceived in NT teaching as absolute moral perfection, righteousness in men becomes a name for that disposition and method of life which accord with God's holy will; in short, righteousness is Godlikeness.

The adjective *δίκαιος* occurs with nearly equal frequency in the Synoptic Gospels and in the Pauline Epistles. The noun *δικαιοσύνη* occurs seven times in Matthew, once in Luke, and not at all in Mark, and is more frequently used by St. Paul than by all the other NT writers combined. In studying the NT concept of righteousness it will be convenient to begin with the Synoptic Gospels, with special reference to the teaching of Jesus, then to consider the Pauline usage, and finally to notice that of other NT writers. We shall thus be led to a general estimate of the NT doctrine.

(*A*) RIGHTEOUSNESS IN THE SYNOPTIC GOSPELS.—We may here take as our starting-point that saying of Jesus to His disciples: 'Except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no wise enter into the kingdom of heaven' (Mt 5^{20}). The righteousness which He required was in some essential respect higher than that which was current in the life and ideals of the Jewish people of His time. We must therefore briefly describe the popular Jewish idea of righteousness. That idea grew out of the current conception of God and of His revelation. Righteousness was thought to consist in obedience to commandments, and the nature of the Divine commands was viewed quite superficially. The rich young man who came to Jesus asking what he should do to inherit eternal life, is an illustration of the view which the Jews took of the commandments (Mt $19^{16ff.}$). He said that he had kept them all. His conception evidently was that to refrain from the outward sins which they forbade—stealing, lying, Sabbath-breaking, and the like—was to keep the commandments. Only a superficial conception of the import and bearing of the commandments could have permitted him to make the claim that he had kept them all from his youth. The same faulty notion of the real moral requirements of the law lay at the root of the pride and self-righteousness of the Pharisees. They were able to think themselves righteous only because they measured themselves by an imperfect standard, an inadequate idea of the high demands which the law made upon the inner life. Religion was conceived as a legal affair, and therefore righteousness consisted primarily in the observance of all the rites and ceremonies prescribed in the law, and in refraining from all the acts which the law forbade.

---

* Some of Dalman's illustrations are very striking (p. 5 f.). *E.g.* it is said that a judge exercises 'righteousness' when he pays out of his own pocket the fine he has imposed on a poor man.

Righteousness was thus placed too much in externals and too little in the state of the heart. It exaggerated the ritual features of religion, and overlooked its deeper spiritual requirements upon conduct and life. Either of two results might flow from this externalism in religion—results which would be equally detrimental to a healthy religious life. On the one hand, if one supposed himself to have done all that was required, he would easily fall a prey to spiritual pride, for had he not achieved this lofty height of goodness by his own exertions? On the other hand, if a man felt that he had failed to do the Divine will and to win acceptance with God, he would naturally become hopeless and despondent. We accordingly find that the religious life of the Jewish people, to a great extent, oscillated between self-righteousness and despair. Jesus must therefore have demanded something vastly superior to this observance of ritual, this conformity to commandments and prohibitions, when He said, 'Seek ye first God's kingdom and righteousness' (Mt 6^{33}). What then is that true righteousness, that δικαιοσύνη θεοῦ, which Christ requires and fosters in the lives of His disciples? This question can best be answered by appeal to the Sermon on the Mount, a collection of the sayings of Jesus, some of which were uttered on various occasions. They are grouped together as illustrating chiefly the nature and demands of 'God's kingdom and righteousness.' In the 'beatitudes' are described the qualities which fit men for the kingdom of God—the characteristics which constitute true righteousness. They are such as spiritual poverty, a sense of one's weakness and sin; meekness, mercifulness, purity, and peacemaking. They are qualities which stand opposed to pride, presumption, and selfishness. They are, above all, qualities of the inner life. They describe what a man is in the secret springs of his motives and dispositions (Mt 5^{3-9}).

The true righteousness is a heroic virtue. It is founded in strong convictions of truth and duty, and is willing to suffer, if need be, for the truth (Mt 5^{10-12}). The truly righteous, the sons of the kingdom, have a saving, illuminating power. They are the world's 'salt' and 'light.' They preserve the world from moral corruption, and they shed abroad upon men the light of love and helpfulness (Mt 5^{13-16}). Again, the true righteousness is not a destructive, but a constructive principle. The righteousness of Christ's kingdom will not break with the past. It will conserve all that was true and good in OT religion, and build upon it. It requires that the earlier and imperfect system of Judaism should not be rejected, but fulfilled. Its true ideal content is to be developed out of the limited and provisional form in which it had been apprehended in earlier times, into its destined universality and spirituality. The Divine law which has been revealed is to be observed and taught in its essential spiritual content, and not merely in its outer form, and thus the righteousness of the sons of the kingdom will 'exceed the righteousness of the scribes and Pharisees' (Mt 5^{17-20}).

Then follow several illustrations of the true righteousness. The law prohibiting murder had commonly been taken merely as a prohibition of an overt act. Not to kill another was to obey it. But Jesus places right and wrong, not in overt acts, but in inner motives. He who cherishes murder and hate—the passions from which murder springs—is, morally speaking, a murderer. From hate murder would spring were there no outward constraint preventing it. But he who would commit an overt act of sin but for an outward restraint, has really committed it in his heart already (Mt 5^{21-26}). The same principle holds good respecting sensual passion. The impure thought, the carnal desire, is itself, in God's sight, the act of adultery. Every effort must be made, every necessary self-denial endured, by those who would be truly righteous, to break the power of evil thought and to exclude impurity from the heart (Mt 5^{27-32}).

Three further illustrations are given. The first concerns truthfulness. The Jews had been accustomed to make a fictitious distinction between oaths taken in J"'s name, which they had regarded as sacred, and other oaths, which they had felt at liberty to violate. Jesus discountenances not only this false distinction, but all such profane appeals to sacred names or objects. Those who confirm their assertions and promises by such oaths thereby betray the fact that their simple word is not regarded as binding, and thus show themselves not to be really truthful. The simple assertion should be enough. The honest man's word is as good as his most solemn oath. Be absolutely truthful, says Jesus, and the meaning and occasion of these irreverent oaths in common use will completely disappear (Mt 5^{33-37}). The next illustration respects revenge. The OT civil law of retaliation—which, at best, was a rude kind of justice incident to an undeveloped ethical code—was commonly construed as a permission to take private revenge. This disposition to do the offender an injury like that which he has done, Jesus discountenances. Better suffer injustice, He says, than resort to revenge, which springs from hate, and is wholly incompatible with love (Mt 5^{38-42}). The third illustration deals with the contrast of love and hate. From the OT maxim, 'Thou shalt love thy neighbour,' many had drawn the inference, 'Thou shalt hate thine enemy.' Then, by making 'neighbour' mean 'friend,' it was easy to find in the maxim a justification for hatred towards personal enemies. This inference Jesus utterly repudiates. The righteousness of the kingdom requires that we should love all men; that we should seek the good even of our enemies. We may not hate even those who injure us. The gospel has no place for hatred, because it is essentially un-Godlike. God hates no one; He blesses all, even the wicked. So must the man do who possesses God's righteousness. Love is the essential principle of moral perfection, and hatred is the opposite of love. This love which finds its perfect exemplification in the character and action of God is the law of the Christian life. The Christian ideal is completeness of love; conformity to the moral completeness of God's own perfectly loving character (Mt 5^{43-48}).

The next group of passages illustrates how men are to 'do their righteousness.' The first illustration is drawn from alms-giving. Beneficence is not to be ostentatious. Those who give alms to be seen of men must do so from selfish motives. They, indeed, obtain their appropriate reward, but it is not the Divine approval (Mt 6^{1-4}). The next example is prayer. A false righteousness leads men to perform their devotions in public that they may create the impression that they are unusually pious. The true inner righteousness dictates that men pray in secret. Nor is prayer to be based on the idea that God is a reluctant Giver whose favour is to be won by the wearisome repetition of the same wish or cry. God is, on the contrary, a willing Giver who knows all our wants in advance, and only desires that we be willing to receive His mercies. A simple sincere request is therefore enough. Then follows the model prayer illustrating the true spirit, as well as the simple form of prayer (Mt 6^{5-15}). Jesus then shows that fasting performed with a mere semblance of humility and sorrow is no part of true righteousness, but that it may be such when practised unostentatiously from real inward contrition (Mt 6^{16-18}). Then follows a series of striking contrasts between the worldly and selfish spirit and supreme concern for the spiritual life. The latter must be placed first, and must subordinate to itself all other interests. Every life must have one main direction. There can be but one supreme choice. That should be made central in life which is truly central. Other things, so far as needful, God will supply. Seek, then, first His kingdom, and His righteousness; and all those things shall be added unto you (Mt 6^{19-34}).

It is not necessary for our present purpose to follow this series of sayings further. It illustrates, better than isolated uses of the words 'righteous' and 'righteousness' could do, the real content of Jesus' doctrine of righteousness as the Synoptic tradition has preserved it. It does not, indeed, yield us any formal definition of righteousness, but it shows us what righteousness is by exhibiting its characteristics and by showing how it expresses itself in human conduct. It leaves no doubt that the righteousness of the kingdom is essentially Godlike character. If it is not precisely identical with love, it is, at any rate, absolutely inseparable from it. Love is the completeness (τελειότης) of God, and the completeness of character in men consists in love. Righteousness appears to be conceived of as the different kinds of right action which have their spring in love. Righteousness is never presented in our sources as a mere judicial principle in contrast to mercy or grace. It is right conduct and right character, both of which are grounded in love. Nor does the word bear the semi-formal sense in which we shall find it employed by St. Paul. It is not thought of under the form of a *status* or relation; it is used rather in the simple ethical sense, to include the qualities of a character which is acceptable to God.

(*B*) RIGHTEOUSNESS IN THE WRITINGS OF ST. PAUL.—In several instances the phrase δικαιοσύνη θεοῦ is used to denote an attribute of God. In Ro 3^{5} St. Paul asks the rhetorical question: 'But if our unrighteousness commendeth the righteousness of God, what shall we say?' The context shows that the 'righteousness of God' here means essentially the same as the faithfulness or truthfulness of God (cf. vv.$^{3.4}$). His righteousness is His faithfulness to His own nature and promises. If men are untrue to Him, their falseness will but set His righteousness in the stronger relief. Again, in $3^{25.26}$ St. Paul speaks of the ἔνδειξις τῆς δικαιοσύνης αὐτοῦ which God has made in the death of Christ, and which should prevent men from supposing that because God treated leniently the sins of men in past times, He is indifferent to sin or lightly regards it. Here, then, δικαιοσύνη θεοῦ must denote that self-respecting quality of holiness in God, that reaction of His nature against sin, which must find expression in condemnation of it. Righteousness in this sense is the reaction of God's holy nature against sin which expresses itself in the Divine wrath (ὀργὴ θεοῦ).

In the prevailing use of the word by St. Paul, however, righteousness means the state of acceptance with God into which one enters by faith. This is its meaning in Ro 1^{17} 'For therein (in the gospel) is revealed a righteousness of God by faith unto faith; as it is written, But the righteous shall live by faith'; also in Ro $3^{21.22}$ 'But now apart from the law a righteousness of God hath been manifested, being witnessed by the law and the prophets; even the righteousness of God through faith in Jesus Christ unto all them that believe.' We cannot accept the view of some, that in these passages also 'the righteousness of God' refers to the character of God, although we grant that between the idea of righteousness as an attribute of God and righteousness as a gift of God, a state of acceptance with God into which God introduces one, there is an essential connexion (cf. Sanday-Headlam on Ro 1^{17}). The righteousness which God confers has its ground in the righteousness of God. The state of acceptance into which the believer is represented as inducted is a state of fellowship and harmony with God. The conditions of being accounted righteous are such as God's perfect character prescribes. These conditions may be summed up in the word *faith*. Now faith is, in St. Paul's view, a personal relation with God mediated through Christ. It involves by its very nature spiritual union with God, obedience to His will, and increasing likeness of character to Him. There is thus a close connexion between the righteous character of God and the righteous *status* which He reckons as belonging to believers on condition of faith. But, formally considered, they are quite different.

The meaning of δικαιοσύνη now under consideration explains the meaning of justification (δικαίωσις), and of the reckoning of faith for righteousness (Ro 4). *To justify* means in Pauline phraseology, to regard and treat one as righteous; to confer the gift of righteousness: in other words, to declare one accepted with God. This judgment of justification God pronounces upon condition of faith. The phrase 'to reckon faith for righteousness' is a periphrasis for 'to justify.' To declare righteous upon condition of faith, means the same as to reckon faith for righteousness. In both cases the meaning, expressed in a somewhat formal and legal way, is simply this: that faith is the necessary condition of a gracious salvation. Salvation is a free gift; faith is its humble and thankful acceptance. St. Paul is fond of conceiving this process of salvation in forensic forms of thought, and of interpreting it by judicial analogies. This tendency is due to his OT and Rabbinic training. None the less does he lay stress upon its ethical and spiritual significance. If justification is a 'forensic act,' there corresponds to it and is involved in it a spiritual renewal. If righteousness is a gift or a state, it is also a character. It is an inward state as well as an outward one. It would be a great mistake to represent St. Paul's doctrine of salvation as predominantly legal or forensic. He has indeed brought over from his Jewish training the legal conception of righteousness as an acquittal before God and of justification as the decree of acquittal, but his intensely ethical principles of grace and faith put quite a different content into these thought-forms from what they have in Jewish theology. Essentially, St. Paul is far more of a mystic than of a legalist, though he still speaks, to some extent, the language of legalism in which he had been born and trained. Cf. Thackeray, *Relation of St. Paul to Contemporary Jewish Thought*, 87 ff.

The question arises: If faith is reckoned for righteousness, is it because faith is synonymous with righteousness or a substitute for it? Faith is not righteousness in the sense of being so inherently excellent that it may be regarded as equivalent to righteousness. The power and value of faith are in its object. Faith is great because it allies man with God. Faith is union with Christ, and this union involves and guarantees increasing Christlikeness, and Christlikeness *is* righteousness. The imputation of faith for righteousness involves a gracious treatment of man on the part of God; it is an anticipatory declaration of what the grace of God will increasingly realize in those who in faith open their lives to the power of the Divine life. Justification means an entire forgiveness and an increasing attainment of righteousness.

(*C*) RIGHTEOUSNESS IN THE JOHANNINE WRITINGS.—In one passage only in the Fourth Gospel is the word δίκαιος applied to God: 'O righteous Father, the world knew thee not, but I knew thee' (17^{25}). The idea of God's righteousness here appears to be that it is the quality which prevents Him from passing the same judgment upon Christ's disciples which He passes upon the sinful world. Upon this equitableness of God, Jesus bases His confidence in asking that special blessings be conferred upon His disciples. The thought is similar in 17^{11}, where the Father is designated as ἅγιος. As the One who is absolutely good,—wholly separate from all that is sinful and wrong,—God is besought to guard from evil those whom He has given to His Son. In both these cases the righteousness or holiness of God is conceived of, not as a forensic or retributive quality, but as God's own moral self-consistency, His faithfulness to His own equity.

In 1 Jn (1^{9} 2^{29}) God is described as δίκαιος, and, in both cases, in a sense closely akin to that which we have found in the Gospel. 'If we confess our sins, he is faithful and righteous (πιστὸς καὶ δίκαιος) to forgive us our sins' (1^{9}). The correlation of the word δίκαιος with the word πιστός, as well as the entire context, shows that righteousness here is that quality of God which would certainly lead Him to forgive those who repent. It would be inconsistent in God — contrary alike to His promises and to His nature—not to forgive the penitent, and to exert upon his life the purifying influences of His grace. In the remaining passage (2^{29}), the term 'righteous' has a broader meaning, and designates the moral perfection of God in general, as the type and ideal of all goodness in man: 'If ye know that he (God) is righteous, ye know that every one also that doeth righteousness is begotten of him.' Since God is essentially righteous, those who are begotten of Him must also be righteous. A similar thought is presented in 3^{7}, but in the reverse order: 'He that doeth righteousness is righteous, even as he (Christ) is righteous.' As against the Gnostic over-emphasis of knowledge, the apostle insists that the mere intellectual possession of truth is not enough. Truth, or righteousness, is not merely something to be known, but something to be done (1^{6} 3^{21}). The man is righteous who walks in the truth as his native element (2 Jn ^{4}, 3 Jn $^{3.4}$); in whom the truth dwells, controlling and guiding him (Jn 8^{44}, 1 Jn 2^{4}); who belongs to the truth and draws from it the strength and inspiration of his life (Jn 18^{37}, 1 Jn 2^{21} 3^{19}). Doctrine and life are inseparable.

(*D*) RIGHTEOUSNESS IN OTHER NT WRITINGS.—There is nothing characteristically different in the conception of righteousness in the minor types of NT teaching from what we have already found. The word is almost always used in the practical, religious sense of the good life which Christ in the gospel requires and imparts. Both James and Hebrews allude to righteousness in the sense of a gift of God on condition of faith (Ja 2^{23}, He 11^{7}), but both these Epistles generally speak of it as that good life which the Christian loves and seeks. In the Petrine Epistles righteousness is the holy life in contrast to sin, as in 1 P 2^{24} 'that we, having died unto sins, might live unto righteousness.' In Revelation righteousness is predicated of the judgment (19^{11}, cf. 15^{4}), and is said to be 'done' (cf. 1 Jn) by those who are righteous in the world to come (22^{11}).

From this sketch it appears that the NT presents the idea of righteousness mainly in two ways: (1) as a quality of God's nature and action, and (2) as the character which God requires of man. The first of these ideas is the logical basis of the second. What God requires is grounded in what God is. What, now, is the actual content of that Divine righteousness which is the test and measure of all good life in men? What is the ethical nature of God? St. John replies that it is love, and the whole NT conception of God agrees with this answer. Righteousness is an activity or aspect of love. When it is used to denote more especially the law and penalty side of God's nature, it is the self-respecting, self-preservative aspect of holy love—love as it appears in forbidding all sin and enjoining conformity to the perfect standard of uprightness. Righteousness is an element of love, without which love would be mere benevolence or good-nature. But since love is eternally holy, and is a consuming fire to all sin, justice and judgment are the foundation of God's throne. In the NT, righteousness is sometimes used more comprehensively to denote the equity or uprightness of God in general, His correspondence to what He ought to be; sometimes more narrowly to denote the judicial aspect of His nature and action. In the latter sense it may be defined as the self-respect of perfect love.

LITERATURE.—The NT idea of righteousness is more or less fully discussed in all Commentaries and Biblical Theologies. The Pauline doctrine is carefully considered in Meyer and Sanday-Headlam on *Romans*, and in Morison on *Romans Third*. The general subject receives attention in the *NT Theologies* of Baur, Weiss, Beyschlag, Bovon, and Holtzmann, and special aspects of it in Wendt's *Teaching of Jesus*, Bruce's *Kingdom of God*, and *St. Paul's Conception of Christianity*, and Stevens' *Pauline Theology*. A careful study of the words will be found in Cremer's *Bib.-Theol. Lex. of NT Greek*.

G. B. STEVENS.

RIMMON (רִמּוֹן).—The name of a Syrian deity mentioned as occupying a temple in Damascus during the activity of Elisha in Israel (2 K 5^{18}). It appears in such compound proper names as Hadad-rimmon (Zec 12^{11}) and Tab-rimmon (1 K 15^{18}). LXX reads Ῥεμμάν and the Vulg. *Remmon*. It has been interpreted as 'pomegranate' by Movers (*Die Phönizier*, i. 197 f.) and Lenormant (*Lettres assyriologiques*, ii. 215, r. 1). But the name is now identified with the Bab.-Assyr. deity *Rammân*, god of wind and weather, of the air and clouds, of thunder, lightning, and storm. He is designated in the inscriptions as AN. IM, that is, 'god of the celestial regions,' and on reliefs and seals he is figured as armed like Jove with thunderbolts. Rammân is sometimes derived from רום or רָמַם, and thus taken to mean 'the high,' 'majestic' one (cf. Baudissin, *Studien*, i. p. 307); again it is derived from the stem רעם 'thunder,' and supposed to be = 'the thunderer' (Schrader, *Jahrb. f. prot. Theol.* i. 334 ff.). The correct derivation of the word is that advocated by Pinches from a Bab.-

Assyr. root *ramâmu*, 'roar,' 'thunder' (cf. Del. *HWB* 624). For Syria and the west, in a comparative list of deities, *Hadad, Adad, Daddu, Dada, Addu* appear as special names for Rammân (Bezold, *PSBA*, June 7, 1887). The identification of *Hadad* or *Adad* of Syria with *Rammân* of Babylonia-Assyria is established by the fact that these two names are represented by one and the same ideogram in several proper names (cf. Pinches, *PSBA*, 1883, pp. 71–73). Rimmon is then a Hebraized form (the word for 'pomegranate') of the Bab.-Assyr. name *Rammân*, and is identical with the Syrian god *Hadad* or *Adad*. The importance of this deity in Syria is seen in the fact that his name heads the list of four gods of the North Syrian kingdom of *Panammû* to whom his son *Bar-Rakûb* offered prayer (cf. *Ausgrabungen in Sendschirli*, vol. i. p. 61). For a detailed description of the latest utterances on the etymology of the name, and the attributes and relations of Rammân, see Jastrow, *Religion of Babylonia and Assyria*, pp. 156–164. It may be that the compound (Heb.) form Hadad-Rimmon (in Bab.-Assyr. *Adad-Rammân*) arose, as suggested by Baethgen (*Beitr. z. sem. Relig.-Gesch.* 75), in a manner similar to Adonis-Osiris in Cyprus. Such combination would be self-explanatory to the population of all Western Asia. To this 'prince of the power of the air' was dedicated the eleventh month, the rain-month Shebat. In the Bab. pantheon, Rammân appears as the son of Anu and Anatu.

LITERATURE.—Baudissin, *Stud. z. sem. Relig.-Gesch.* i. 306–308; Tiele, *Bab.-Assyr. Gesch.* ii. 525, n. 3; Schrader, *COT* i. 196 f.; Delitzsch-Smith, *Chald. Genesis*, 269 f.; Winckler, *Gesch Bab. u. Assyr.* 164, 166; Baethgen, *Beitr. zur sem. Relig.-Gesch.* 75; Winckler, *Alttest. Untersuch.* 69; Delitzsch, *Calwer Bibellexicon*, art. 'Rimmon; Riehm, *HWB*, art. 'Rimmon'; Meyer, *Gesch.* i. 175, 182; Hilprecht, *Assyriaca*, 76 ff.

IRA M. PRICE.

RIMMON (רִמּוֹן 'pomegranate,' Ῥεμμών).—A Beerothite, the father of Baanah and Rechab, who murdered Ish-bosheth, the son and successor of Saul (2 S $4^{2.5.9}$).

RIMMON.—1. The rock (סֶלַע (הָ)רִמּוֹן, ἡ πέτρα (τοῦ) Ῥεμμών) in the eastern highlands or wilderness (*midbār*) of Benjamin, whither the remnants of the Benjamites (Jg 20^{45} 21^{13}) fled. It has been identified by Robinson (i. 440) as a lofty rock or conical chalky hill, visible in all directions, on the summit of which stands the village of *Rummôn*. It forms a remarkable object in the landscape as seen from the village of *Jibâ*, some 6 miles distant. It is about 4 miles east of *Beitîn* (Bethel) (cf. van de Velde, *Memoir*, 345; *SWP* ii. 292). A place of this name is mentioned by Eusebius and Jerome as existing in their day 15 miles north of Jerusalem (*Onomast. s.* 'Rimmon').

2. (רִמּוֹן) A city in the south of Judah, towards the border of Edom, Jos 15^{32} (Ἐρωμώθ); in 19^{7} (B Ἐρεμμών, A Ῥεμμώθ) counted to Simeon; in Zec 14^{10} (Ῥεμμών) named as lying to the far south of Jerusalem. In the first two of these passages Rimmon is coupled with Ain (in the first with, in the second without, the conjunction ו), cf. 1 Ch 4^{32}. In Neh 11^{29}, on the other hand, we read **En-rimmon** ('spring of the pomegranate'), and there are good grounds for holding that this is the correct reading in all the other passages as well. See EN-RIMMON.

Van de Velde (*Mem.* 344) has identified Rimmon and En-rimmon with *Umm er-Rumâmîn*, between Beit-Jibrîn and Bîr es-Seba, very nearly at the distance mentioned by Eusebius. He mentions that Grotius and Rosenmüller suppose, as a solution of the difficulty, that Ain and Rimmon were near together, and in later years united in one. 'Ain is probably identical with a site only half a mile north of *Umm er-Rumâmîn*, now called *Tell Khewelfeh*, and opposite another ancient site, *Tell Hora*. Between the two *tells* is a copious fountain filling a large ancient reservoir, which for miles around is the chief watering-place of the Bedawin population of this region. A city at the base of which such a remarkable fountain existed would well derive its name from "the fountain," and its vicinity to *Rimmon* would justify both its distinct enumeration and its collective appellation.' *SWP* (iii. p. 397) confirms this, stating that *Khan Khuweilfeh* is an extensive ruin near *Bir Khuweilfeh*. Caves, cisterns, broken pillars, shafts, and traces of walls are found. The ruins extend along the valley and on the higher ground. The well is large, lined with well-dressed stones, and resembling the Beersheba wells. The *tell* has an artificially-levelled platform, and seems to have formed a fortress. The water-supply is perennial. At *Khan umm er-Rumâmîn* there are heaps of well-dressed stones, many of which are drafted. There are also several large lintel stones, and part of a stone apparently representing the seven-branched candlestick. These remains probably belong to the Byzantine period (*SWP* iii. 398).

3. In Jos 19^{13} one of the boundaries of Zebulun is given as 'Rimmon that stretched to the Nē'āh' (רִמּוֹן הַמְּתֹאָר הַנֵּעָה; AV wrongly 'Remmon-methoar to Neah'). In 1 Ch $6^{77\,[\text{Heb. }62]}$ the name appears as **Rimmono** (רִמּוֹנוֹ), and in Jos 21^{35} as **Rimmonah** (for which, by a textual error, MT has **Dimnah** [which see]). See Dillm. *Joshua, ad loc.*

Robinson proposes to identify Rimmon with the village of *Rummâneh*, north of Nazareth, and this site has since been accepted. *Rummâneh* is a small village built of stone, and containing about 70 Moslems. It is situated on a low ridge above the plain, and there are a few olive trees around. The water-supply is from cisterns and a well. There are rock-cut caves, and traces of ancient remains in the village (*SWP* i. 417).

C. WARREN.

RIMMONO.—See RIMMON, No. 3.

RIMMON-PEREZ (AV Rimmon-parez, following, with LXX and Vulg., the pausal form given in the MT of Nu $33^{19.20}$ רִמֹּן פָּרֶץ; LXX Ῥεμμὼν Φάρες (also Ῥαμμὼν and Ῥεμμὼθ Φ.), Vulg. *Remmonphares*).—One of the twelve camping places of the children of Israel, mentioned only in the itinerary of Nu 33, between Hazeroth and Moseroth. Ewald identifies it with Rimmon in the south of Judah (Jos 15^{32} etc.), and some of the names following are referred by him to the same region. He thinks it probable that the Israelites made their way for some distance into the southern part of the country, afterwards allotted to Judah and Simeon, and that in this portion of the itinerary a trace may be found of such a campaign; cf. Nu 14^{45} 21^{1-3}, and HORMAH. The second part of the name may have been added in commemoration of a victory gained at this place, after the analogy of BAAL-PERAZIM.

A. T. CHAPMAN.

RING (usually טַבַּעַת *ṭabba'ath*; δακτύλιος).—The rings of the tabernacle and its furniture are spoken of as having been cast (Ex $25^{12\,al.}$), and this sense of moulding appears in the cognate Arabic *ṭaba'a* 'to print,' *maṭba'ah* 'printing press.' Rings are referred to in connexion with the boards for the corners of the tabernacle (Ex 26^{24}); there are also rings through which bars pass to keep in position the upright boards for the sides of the tabernacle (v.^{29}). Similarly, rings were attached to the ark of the covenant (25^{12}), to the brazen altar ($27^{4.7}$), to the altar of incense (30^{4}), and were used for fastening on the high priest's breastplate (28^{23}).

In Est 1^{6} and Ca 5^{14} גְּלִיל is translated 'ring' in AV and RV, but a preferable rendering would be 'cylinder' or 'rod.' The 'rings' (גַּבִּים) of Ezk 1^{18} are *felloes* (so RVm; cf. 1 K 7^{33}). In RV the more general term 'ring' is used instead of 'ear-ring' (נֶזֶם; see EAR-RING) in Gn 24^{22} 35^{4}, Job 42^{11}, Ex $32^{2. 3}$. In Ezk 16^{12}, where RV gives 'ring' for 'jewel' of AV, the allusion may be, not to a ring in the nose, but to the custom still prevailing among the Bedawin, in the case of a favourite child, of fastening an ornamental ring, jewel, or bead to a lock of hair over the brow and allowing it to dangle down as a protective charm nearly as far as the eyes. The ear-ring as worn by the Bedawin is about an inch and a half in diameter, and opens with a hinge like a bracelet, so that when closed it clasps the outer ear. The hasty removal of such ornaments is translated 'break off' (פרק) in Ex 32^{2}. The ring (*ṭabba'ath*) appears as an ornament in Is 3^{21}, and as a gift for sacred purposes in Ex 35^{22}, Nu 31^{50} (both P).

Signet-ring.—In closest connexion with the general meaning of 'ring' is the special sense of signet-ring: Gn 41^{42}, Est $3^{10. 12}$ $8^{2. 8. 10}$, in which *ṭabba'ath* is the equivalent of חוֹתָם *ḥôthām* in Gn 38^{18} (in v.^{25} חוֹתֶמֶת), Ex $28^{11. 21. 36}$ $39^{6. 14. 30}$, Jer 22^{24}, Hag 2^{23}, Job 38^{14} 41^{7}, Ca 8^{6}; עִזְקָא *'izḳā* in Dn 6^{17}; *δακτύλιος* in Lk 15^{22}, and *σφραγίς* in Ro 4^{11}, 1 Co 9^{2}, Apoc. *passim*, etc. See art. SIGNET.

Both in biblical usage and in modern custom there are several important meanings connected with the employment of signet-rings.

1. *Irrevocable testimony*, Jer 32^{44}, Ro 4^{11}, 1 Co 9^{2}.—Where the art of writing is limited to the educated few, as is the case still in the East, the difficulty of affixing the signature is got over by the use of a seal. In front of every Turkish police-court men sit with paper and ink ready to write out a statement of evidence or form of appeal, and one or two men are usually to be met with who have seals for sale and are expert in cutting monograms for brass seals. When a village is divided into two parties, as in the case of a dispute about a right of way through private property, it is customary to present to the local magistrate two papers covered with the seals of those who thus witness for and against the road.

2. *Delegated authority.*—Thus Pharaoh took off his ring and put it upon Joseph (Gn 41^{42}), and Ahasuerus gave his ring to Haman (Est 3^{10}). Hence the figurative description of Zerubbabel as a signet of the Lord (Hag 2^{23}). Thus in an Oriental custom-house a junior clerk borrows the seal of a busy higher official, and an indolently obliging censor leaves in the mission press his seal which gives to books the right of circulation in the empire.

3. *Completion.*—From its being affixed to the end of a document as a testimony to the truth of what is stated, the act of applying the seal gave a sense of finality to what was thus sealed (Dn 9^{24} 12^{4}).

4. *Inviolability* (Job 14^{17}, Eph 4^{30}, Rev 5^{2}).—A sense of sanctity was connected with anything sealed.

The veneration felt towards anything guarded by a seal was illustrated some years ago at Sidon. A coasting vessel had gone on the rocks near that town, and a few days afterwards there was washed ashore a small bag of gold coins, which the captain had received from a British merchant in Beyrout, with instructions to deliver it over to another merchant in Jaffa. The bag was found on the Sidon beach by a Syrian peasant; and though such a treasure, washed up at his feet from the sea, might in itself have been regarded as sent from God to him, he shrank from breaking the seal. He walked the intervening distance of twenty miles in order to deliver the money to its owner in Beyrout.

Arabic tales abound in accounts of things kept secret and wonders wrought by seals of power, the most celebrated being the wishing seal of king Solomon.

In the Book of Job there occur several beautiful figurative applications of the signet, such as the sealing up of the stars (9^{7}) as of something folded away and laid out of sight, the sealing of instruction in night visions (33^{16}) like the imprinting of a mould upon clay, and the sealing up of man's hand (37^{7}) as expressing the limitation of human power. See also art. SEAL, SEALING.

G. M. MACKIE.

RINGSTRAKED.—So the adj. עָקֹד *'āḳōd* is tr^{d} in all its occurrences, Gn $30^{35. 39. 40}$ $31^{8. 8. 10. 12}$. The root verb עָקַד is found once, Gn 22^{9} 'Abraham . . . *bound* Isaac his son,' so that the primary idea is 'banded' or 'striped.' The adj. is used of striped cattle, goats, or sheep. The LXX tr. *διάλευκος* except in $31^{8. 8}$ *λευκός*, and it is followed generally by the Vulg. (*albus*) and most English versions 'white'; but Tind. has 'straked' in 31^{8}, and then the Bishops' Bible gives 'ringstraked' throughout. The word does not seem to occur in Eng. literature elsewhere. See STRAKE.

J. HASTINGS.

RINNAH (רִנָּה).—A Judahite, one of the sons of Shimon, 1 Ch 4^{20}. The LXX (B *'Ανά*, A *'Ραννών*) makes him the son of Hanan, taking the following בֶּן־חָנָן thus (*υἱὸς Φανά* [*'Ανάν*]) instead of making it a proper name, BEN-HANAN, as AV and RV.

RIPHATH (רִיפַת; A *'Ριφάθ*, *D* *'Εριφάθ*).—One of the sons of Gomer, Gn 10^{3}. The parallel passage, 1 Ch 1^{6}, reads **Diphath** (דִּיפַת, so RV, but AV Riphath); but this is certainly an ancient scribal error, easily explicable as due to an interchange of ר and ד. The LXX (B *'Ερειφάθ*, A *'Ριφαέ*) and Vulgate (*Riphath*) support this view.

The ethnographical sense of Riphath is uncertain. Perhaps the view of Josephus (*Ant.* I. vi. 1) that the Riphæans (*i.e.* Paphlagonians) are meant is still the most plausible. Bochart and Lagarde think of the Bithynian river Rhebas, which falls into the Black Sea, and the district Rhebantia in the Thracian Bosporus; but, as Dillmann remarks, this appears to be too far west for the position of Riphath between ASHKENAZ (? Phrygia) and TOGARMAH (? W. Armenia). A widely-held opinion, which makes its appearance as early as the Book of Jubilees, identified Riphath with the fabulous Riphæan mountains, which were supposed to form the northern boundary of the earth.

J. A. SELBIE.

RISSAH (רִסָּה; B *Δεσσά*, AF *'Ρεσσά*).—A camping place of the children of Israel, noted only in Nu $33^{21. 22}$. It has been proposed to identify it with *Rasa* in the Peutinger Tables, on the road from the Gulf of Akabah to Jerusalem, or with *'Ρῆσα* of Jos. *Ant.* XIV. xiii. 9, xv. 2, *BJ* I. xiii. 8; but according to some MSS this place is *Θρῆσα*.

A. T. CHAPMAN.

RITHMAH (רִתְמָה; LXX *'Ραθαμά*; Vulg. *Rethma*, Nu $33^{18. 19}$).—The first of the twelve stations following Hazeroth which are given in Nu 33 only. The name seems to be connected with רֹתֶם (AV and RV 'juniper,' RVm 'broom'), and to indicate a place where that shrub was found in abundance. Such are noted by Robinson (*Wady Abu Retamât*) and Palmer (*Wady Erthâme*), but any definite identification of this or of the eleven following stations must be regarded as very uncertain.

A. T. CHAPMAN.

RIVER.—In the OT this is the AV rendering of the following words: **1.** יְאוֹר or יְאֹר, an Egyptian loan-word, which in the singular is always (except in Dn $12^{5\,bis.\,6.\,7}$, where it means the Tigris) used of the Nile: Gn $41^{1.\,2.\,3\,bis.\,17.\,18}$, Ex 1^{22} $2^{3.\,5\,bis}$ $4^{9\,bis}$ $7^{15.\,17.\,18\,ter.\,20\,bis.\,21\,ter.\,24\,bis.\,25.\,28}$ [Eng. 8^{3}] $8^{5\,(9).\,7\,(11)}$ 17^{5} [all JE], Am 8^{8} 9^{5},[*] Is $19^{7\,ter}$ $23^{3.\,10}$, Jer 46 [Gr. 26]$^{7.\,8}$, Ezk $29^{3b.\,9}$, Zec 10^{11}. In all these passages the LXX renders by *ποταμός* (in Ezk $29^{3b.\,9}$, Zec 10^{11} *ποταμοί*) except Is $23^{3.\,10}$, where a different text appears to have been followed. The plur. יְאֹרִים is used of the Nile arms or canals: Ex 7^{19} $8^{1\,(5)}$ [both

---

[*] The prophet's allusion in these two passages to the rise and the fall of the Nile (יְאֹר מִצְרַיִם) is quite obscured by the AV rendering 'flood.'

P], Is 7^{18} 19^{6} 37^{25}=2 K 19^{24}, Nah 3^{8}, Ezk 29$^{3. 4 bis.}$[*]$^{6. 10}$ 30^{12}, Ps 78^{44}. The LXX has in all these passages *ποταμοί* (in Is 7^{16}, Ezk 29$^{4 bis. 5}$ *ποταμός*) except Is 19^{6}, which reads *αἱ διώρυχες τοῦ ποταμοῦ*, and 37^{25}, where the text is mutilated. The same word יְאֹרִים is used of watercourses in general in Is 33^{21} (*διώρυχες*), and is even applied once to shafts or tunnels cut in the rock by the miner, Job 28^{10} (cf. נַחַל in v.^{4}).

2. נָהָר (LXX in the following passages *ποταμός*, unless otherwise noted), the most general term for river, occurs some 120 times in the OT. It is uncertain whether it is derived from a root נהר 'to flow,' or whether the latter is a denominative from נָהָר, which may be a loan-word (cf. Assyr. *nâru*, 'stream,' 'river'). It is used of rivers in general in Nu 24^{6} [JE], Job 14^{11} 40^{23}, Ps 74^{15} 78^{16} etc.; very frequently of particular rivers: the river of Eden and its branches Gn 2$^{10. 13. 14}$; the Nile Is 19^{5}; esp. the Euphrates (נְהַר־פְּרָת) Gn 15^{16}, Dt 1^{7}, Jos 1^{4}, which is often called הַנָּהָר as **the river** *κατ᾿ ἐξοχήν* (cf. the title 'the great river,' הַנָּהָר הַגָּדוֹל, in Gn 15^{16}, Dt 1^{7}, although this title is once, Dn 10^{4}, applied to the Tigris), Gn 31^{21}, Ex 23^{31}, Nu 22^{5}, Jos 24$^{2. 3. 14. 15}$ [all E], Ezr 8^{16}, Neh 2$^{7. 9}$ 3^{7} (and Aram. נְהַר, emphat. נַהֲרָא, Ezr 4$^{10. 11. 16. 17. 20}$ and oft.), prob. also Gn 36^{37} (P; see REHOBOTH, No. 2), without the art. (poet.) in Is 7^{20}, Jer 2^{16}, Mic 7^{12}, Zec 9^{10}, Ps 72^{6}; the river of Gozan 2 K 17^{6} 18^{11}, cf. 1 Ch 5^{26}; the rivers of Cush Zeph 3^{10}. The reference is probably to *canals* in the following: the Chebar Ezk 1$^{1. 3}$ 3$^{15. 23}$ 10$^{15. 20. 22}$ 43^{3}; the Ahava Ezr 8$^{21. 31}$; the 'rivers' of Babylon Ps 137^{1}; the gates of the 'rivers' of Nineveh Nah 2^{7} (BA *πύλαι τῶν πόλεων*, ℵ* *π. τ. ποταμῶν*), as נְהָרוֹת is used of the canals of Egypt in Ex 7^{19} 8$^{1 (5)}$ (in both ‖ יְאֹרִים). In Job 28^{11} 'he (the miner) bindeth the streams (נְהָרוֹת) that they trickle not,' the reference is to underground water which is prevented by the use of lime or clay from percolating into the mine (A. B. Davidson, *ad loc.*). The נַהֲרַיִם in **Aram-naharaim** (Gn 24^{10}, Dt 23^{4} [both *Μεσοποταμία*], Jg 3^{6} [B *ποταμοὶ Συρίας*, A Σ. *Μεσοποταμία ποταμῶν*], Ps 60 [title; *Μεσοποταμία Συρίας*]) was probably meant by the Hebrew writers to have a dual sense ('Aram *of the two rivers*,' these being probably [see Dillm. on Gn 24^{10}] the Euphrates and the Chaboras), but the original ending may have been a plural one (ם ־ַ), as would appear to be implied by the Tel el-Amarna *Na-ri-ma*, *Naḥrima*, and the Egyp. *Nhrima*.

3. נַחַל (etym. uncertain) is used either (*a*) of a torrent of rushing water or (*b*) of a valley through which a torrent flows or has flowed, a 'torrent-valley' (modern *wādy*).[†] For this latter sense cf. Gn 26$^{17. 19}$, Nu 13$^{23. 24}$ 21^{12} 32^{9}, Dt 1^{24} 2^{36a} (see Driver's note; so Jos 12^{2} 13$^{9. 16}$ [same phrases]; v.^{b} is uncertain [see Driver's note], so Jos 12$^{2 (2nd time)}$) 3$^{12. 16 (2nd time)}$ 4^{48} [as 2^{36a}], 2 K 10^{33}. For AV 'river(s)' RV substitutes the very misleading tr. 'brook(s)' in Nu 34^{5}, Dt 10^{7}, Jos 15$^{4. 47}$ 16^{6} 17^{9} 19^{11}, 1 K 8^{65}, 2 K 24^{7}, 2 Ch 7^{8}, Am 6^{14}, Ezk 47^{19} 48^{26}, and the equally misleading 'valley' in Dt 2$^{24. 36 bis}$ 3$^{8. 12}$ 4^{48}, Jos 12$^{1. 2 bis}$ 13$^{9 bis. 16 bis}$, 2 K 10^{33}. The use of נַחַל in the sense (*a*) above (reproduced by the LXX in the following passages, unless otherwise noted, by *χειμάρρους* or *χείμαρρος*) may be illustrated by its application to the Kishon Jg 4$^{7. 13}$ 5$^{21 ter}$, Ps 83$^{10 (9)}$; to Elijah's stream Cherith 1 K 17$^{3. 4. 5. 6. 7}$, which was liable to dry up in summer, cf. Sir 40^{13} (*ποταμός*); to water bursting from the rock Ps 78^{20} (‖ מַיִם). Prefixed to another word, it is often used in the sense (*b*) above: *Naḥal* Arnon Nu 21^{14} [here plur.], Dt 2^{24} (*φάραγξ*)^{36} 3$^{8. 12. 16}$ 4^{48}, Jos 12$^{1. 2}$ 13$^{9. 16}$, 2 K 10^{33}; *N.* Eshcol ('Wādy of the Cluster') Nu 32^{9}, Dt 1^{24} (both *Φάραγξ βότρυος*); *N. hashshiṭṭim*, 'Wādy of the Acacias' Jl 4 (3)^{16} (*χειμάρρος τῶν σχοίνων*); *N.* Besor 1 S 30$^{9. 10. 21}$; *N.* Gad 2 S 24^{5}; *N.* Gerar Gn 26^{17}; *N.* Zered Nu 21^{12}, Dt 2$^{13. 14}$ (LXX in last five passages *φάραγξ*); *N.* Jabboḳ Gn 32^{24}, Dt 2^{37} 3^{16}, Jos 12^{2}; *N.* Ḳidron 2 S 15^{23}, 1 K 2^{37} 15^{13} 18^{40}, 2 K 23$^{6. 12}$, 2 Ch 15^{16} 29^{16} 30^{14}, Jer 31 (38)^{40} (*νάχαλ*); *N.* Ḳanah Jos 16^{6} 17^{9} (*φάραγξ*); *N.* Soreḳ Jg 16^{4} (B *Ἀλσωρήχ*, A *ὁ χειμάρρο(υ)ς Σωρήχ*); *N. ha-'Arabah* Am 6^{14} [dub.; Wellh. would read *N. Mizraim*; LXX *ὁ χειμάρρο(υ)ς τῶν δυσμῶν*]. The familiar **river** (RV 'brook' except in Jth 1^{9} 'river') **of Egypt** is *N. Mizraim* (modern *Wādy el-'Arîsh*). See EGYPT (RIVER OF). נַחַל is once, Job 28^{4}, used of a *miner's shaft* (cf. the use of יְאֹרִים in v.^{10}).

4. 5. יוּבַל, by-form אוּבָל or אֻבָל (root יבל 'flow' [?]). The former occurs only in Jer 17^{8} 'he shall be as a tree planted by the waters (מַיִם, *ὕδατα*), and that spreadeth out his roots by the river' (עַל־יוּבַל, *ἐπὶ ἰκμάδα*, 'to moisture'); the latter only in Dn 8$^{2. 3. 6}$ (Theod. transliterates *τὸ Οὐβάλ*, LXX has *ἡ πύλη*).

6. אָפִיק, from a root אפק 'to hold,' is a poetical word, whose nearest English equivalent is perhaps 'channel,' the original idea being that of holding or confining waters.[*] It thus denotes, primarily at least, the stream-bed rather than the stream. Its occurrences are: Ps 18$^{15 (16)}$ (where for 'channels of waters,' אֲפִיקֵי מַיִם, we should read, as in 2 S 22^{16}, 'channels (*i.e.* bed) of the sea,' א׳ יָם. The LXX has in the latter *ἀφέσεις θαλάσσης*, and in the former *πηγαὶ ὑδάτων*) 41^{1} (AV and RV 'brooks,' LXX *πηγαί*) 126^{4} (AV and RV 'streams,' LXX *χειμάρρους*), Jl 1^{20} 4 (3)^{16} (in both AV 'rivers,' RV 'brooks,' LXX *ἀφέσεις*), Ca 5^{12} (AV 'rivers,' RV 'brooks,' LXX *πληρώματα*), Job 6^{15} (א׳ נְחָלִים 'channel of torrents,' LXX *χειμάρρους*), Is 8^{7} (AV and RV 'channels,' LXX *φάραγξ*), Ezk 6^{3} 31^{12} 32^{6} 34^{13} 35^{8} 36$^{4. 6}$ (AV in all the Ezekiel passages has 'rivers,' RV 'watercourses,' LXX *φάραγξ* in all except 31^{12}, where it has *πεδίον*).

7. פֶּלֶג, from root [פלג] 'divide,' cf. the proper name PELEG and the explanation of it given by J in Gn 10^{25}. This word means an artificial *watercourse*, a *canal* formed for the purpose of irrigation. Its occurrences are: Job 29^{6} ('rivers of oil,' LXX simply *γάλα*); Ps 1^{3} (AV 'rivers,' RV 'streams,' LXX *διέξοδοι*) 46^{4} ('there is a river [נָהָר] whose streams [פְּלָגִים, LXX *ὁρμήματα*, arms or branches led from the river through the surrounding land] make glad the city of our God') 65$^{10 (9)}$ (*ποταμός*, see below) 119^{136} ('mine eyes run down with rivers [LXX *διέξοδοι*] of waters'), borrowed from or quoted in La 3^{48} (LXX *ἀφέσεις*. The figure in these two passages is probably that of the tears in their flow tracing furrows on the cheek); Pr 5^{16} ('should thy springs be scattered abroad, thy streams of water [LXX *ὕδατα*] in the street?' an exhortation to conjugal fidelity, addressed probably to the husband, who is cautioned against seeking pleasure from sources outside his own house; see the various interpretations discussed in Wildeboer or Toy) 21^{1} ('the king's heart is in the hand of the LORD as the watercourses'; so RV, which brings out the meaning more clearly than the AV 'rivers'; LXX *ὁρμὴ ὑδάτων*); Is 30^{25} (LXX *ὕδωρ διαπορευόμενον*, ‖ יִבְלֵי מַיִם) 32^{2} ('as rivers of water in a dry place,' LXX *ὕδωρ φερόμενον*). There is some doubt as to Jg 5$^{15. 16}$ and Job 20^{17}. In the former of these passages AV has 'for (m. 'in') the divisions of Reuben,' RV 'by the watercourses of Reuben,' פלגות being here and in Job 20^{17} taken in both versions as the plural of פְּלַגָּה, a supposed by-form of פֶּלֶג, but it is not improbable that we should at least in Jg 5 vocalize פְּלֻגּוֹת (cf. 2 Ch 35$^{5. 12}$), giving the meaning of 'divisions' in the sense of *clans* or *families*. In Jg 5^{15} the LXX has *μερίδες*, and in v.^{16} *διαιρέσεις*, while in Job 20^{17} it reads *ἄμελξις*

---

[*] Cornill, following the LXX, deletes the last clause of the MT, in which יְאֹרִים occurs a third time.

[†] See Driver on Am 5^{24}.

[*] The word אָפִיק is used figuratively of the bones of the hippopotamus, as being hollow, Job 40^{18}, and of the furrows between the scales of the crocodile, 41$^{7 (15)}$.

νομάδων, after which Duhm emends to חֲלֵב נָוֹת 'milk of the pastures.' But Dillm., Budde, and most tr. 'streams,' viz. of honey, etc., as explained in v.^{b} (cf. 29^6). In Ps 65$^{10\,(9)}$ 'the river of God' (פֶּלֶג אֱלֹהִים) is the channel or conduit by which rain is poetically supposed to be conducted from its reservoirs in the heavens (cf. Job 38^{25} 'Who hath cleft a conduit for the rain?'). See Driver, *Par. Psalt. ad loc.*

8. תְּעָלָה. The proper meaning of this word is 'conduit' (from Hiphil of עלה), and it is so rendered by both AV and RV in 2 K 18^{17} 20^{20}, Is 7^3 36^2 (LXX, except Is 7^3, where 'conduit' is not expressed, *ὑδραγωγός*). In Job 38^{25} AV has 'water-course,' RV 'channel' (poet. for rain), LXX *ῥύσις*; in Ezk 31^4 AV 'little rivers,' RV 'channels' (for irrigation), LXX *συστέματα*. In 1 K 18$^{32.\,35.\,38}$ the same Heb. term is used for the 'trench' round Elijah's altar (LXX *θάλασσα*); but in Jer 30 [Gr. 37]^{13} 46 [Gr. 26]^{11} it (really a diff. word) means either *new flesh* or *plaister* (something *coming up*, or *placed on* the wound); LXX *ὠφελ(ε)ια*, confusing with תּוֹעָלָה from √ יעל.

In the NT 'river' occurs only in Mk 1^5, Jn 7^{38},* Ac 16^{13}, Rev 8^{10} 9^{14} 16$^{4.\,12}$ 22$^{1.\,2}$, in all of which it is the tr. of *ποταμός*. The imagery of Rev 22$^{1f.}$ is borrowed from Gn 2$^{9f.}$ and from the vision in Ezk 47.

Rivers serve in Scripture, as they have done in all ages, to fix boundaries: Gn 15^{18}, Ex 23^{31}, Nu 34^5, Dt 1^7 3$^{8.\,16}$ 11^{24}, Jos 1^4 12^1 15^4 16^8 17^9 19^{11}, Jg 4^{13}, 2 S 10^{16}, 1 K 4$^{21.\,24}$ 8^{65}, 2 K 10^{33} 24^7, Ezr 4^{10}, Neh 2^7 etc.; they are utilized for bathing Ex 2^5, for drinking 7$^{18.\,21}$, 1 K 17$^{4.\,6}$, for fishing Ex 7$^{18.\,21}$, Lv 11$^{9.\,10}$, Ec 1^7, Ezk 29$^{4.\,5}$, and for irrigation (see above); they serve as means of defence Nah 3^8, and as a highway for navigation Is 18^2; a river side appears as a place of prayer in Ac 16^{13}.

Besides the instances of figurative employment of the word 'river' which have been referred to above, the following may be noted:—In Jer 46$^{7.\,8}$ the rising of the Nile is used as a symbol of an Egyptian invasion; cf. the similar use in Is 8^7 of 'the river' to typify the invading hosts of Assyria, and the language used in Jer 47^2; in Is 43^2 (cf. Ps 66^{12}) rivers are a type of danger or affliction; in Is 59^{19} a manifestation of Jehovah is compared to a נָהָר צָר, the probable rendering being that of RV 'He shall come as a rushing stream, which the breath of the LORD driveth' (AV 'when the enemy shall come in like a flood, the spirit of the LORD shall lift up a standard against him'; see the Comm. *ad loc.*); in Ps 46$^{5\,(4)}$ a river (נָהָר) is a type of Jehovah's favour; in Job 29^6, Ps 119^{136}, La 3^{48} (all פְּלָגִים), Mic 6^7, Job 20^{17} (both נְחָלִים) 'rivers' typify abundance; in Am 5^{24} righteousness is compared to a perennial torrent (נַחַל); a well-spring of wisdom and a flowing torrent (נַחַל) are coupled in Pr 18^4; a river (נָהָר) is a symbol of peace in Is 48^{18} 66^{12}; the breath of Jehovah is compared in Is 30^{28} to an overflowing torrent, and in v.^{33} to a torrent of brimstone (both נַחַל).

The נַחֲלֵי בְלִיַּעַל, lit. 'torrents of Belial,' of 2 S 22^5 is a doubtful phrase. It is generally explained as 'torrents of worthlessness (=wickedness),' but Cheyne (*Expositor*, 1895, p. 435 ff., see also *Expos. Times*, viii. [1897], p. 423 f., and *Encyc. Bibl.* art. 'Belial') discovers a mythological allusion in the expression and renders it 'streams of the underworld,' identifying *Belial* with the Babylonian goddess *Belili*, whom he connects with the underworld. Hommel agrees with this identification, but Cheyne's interpretation is opposed by Baudissin and Jensen (see *PRE*^{3}, *s.* 'Belial,' and the articles by all four scholars in the *Expos. Times*, ix. pp. 40 ff., 91 f., 283 f., 332, 567).

For the river system of Palestine, see vol. iii. p. 642 f., and for an account of particular rivers the articles under their respective names.

J. A. SELBIE.

RIVER OF EGYPT.—See EGYPT (RIVER OF), and add that in RV of Am 8^8 9^5 the Nile is called the 'River of Egypt' (יְאֹר מִצְרַיִם, AV badly 'flood').

RIZIA (רִצְיָא; B *Ῥασειά*, A *Ῥασιά*).—An Asherite, 1 Ch 7^{39}.

RIZPAH (רִצְפָּה; LXX *Ῥεσφά*, except 2 S 21^8, where A has *Ῥεφφάθ*).—A concubine of king Saul. She is called the daughter of Aiah (2 S 3^7 21^8), which may imply that she was a descendant of that Hivite clan in the S.E. of Palestine from which Esau is said to have taken one of his wives (Gn 36$^{2.\,24}$ [R]).

When the Philistines struck down the kingdom of Saul, and David established himself in Hebron, Rizpah must have withdrawn to Mahanaim among the few who clung to the ruined house. For (2 S 3$^{6\text{-}11}$) when Abner held towards Ishbosheth the position, and was suspected of cherishing the designs, of a Mayor of the Palace, some who doubted his loyalty accused him of having entered into an intrigue with his dead master's concubine. The sting of the accusation lay in the fact that such an alliance was regarded at that period as a sure step toward claiming the throne (cf. 2 S 16^{22}, and especially 1 K 2^{22}).

At a later period in David's reign (the exact date of the incident is uncertain, since the story is found in an appendix to the history of David), a three years' famine fell upon the land (2 S 21$^{1ff.}$). The oracle, when consulted, decided that J″ was angry with His people, and that the cause of that anger was to be found in the fact that Saul, instead of remaining true to the oath of the congregation (Jos 9), had deprived the Gibeonites of the privileges which the oath secured them, and had oppressed this clan. David accordingly approached the Gibeonites with offers to stanch the feud. These rejected all money compensation, and, denying that they had any quarrel with Israel at large, demanded the blood of the guilty house. Seven descendants of Saul—five of them sons of Merab; two, Armoni and Mephibosheth, sons of Rizpah—were thereupon seized and delivered over to their vengeance. The Gibeonites brought them up to Gibeon, which, from its name 'the hill of God,' evidently bore a sacro-sanct character, and there exposed* the seven before J″. To the rock on this hill the unhappy Rizpah resorted, and, spreading her mourning cloak of sackcloth, kept dreary watch beneath her dead to scare from their prey the wheeling vultures of the daytime, the prowling jackals of the night. The judicial execution had taken place in the early days of barley harvest. It lends a sharper touch to the picture, if one can see the reapers come and go in the fields, while above them the silent woman crouched beside her dead, whose death was to avert the curse from those fields. For she must watch on the height until the merciful rain of heaven signalled the end. The fall of rain is not inserted as a mere mark of the length of her guard; it is not 'the periodic rains in October' which are referred to. Probably it is mentioned as the sign from which men concluded that the famine-drought was broken, that the sacrifice was effectual, that the anger of J″ was averted from His land, and that now at last the mother might cease from her fearful watch.

A. C. WELCH.

---

* The quotation 'Out of his belly,' etc., may represent the general sense of such OT passages as Is 44^3 55^1 58^{11}, Jer 2^{13}, Ezk 36$^{25ff.}$ 47$^{1ff.}$, Jl 2$^{18f.}$ 3$^{1f.}$, Zec 13^1 14^8—the series resting ultimately (Westcott) on Ex 17^6, Nu 20^{11}.

* The word used is rare and uncertain in its meaning. It occurs again Nu 25^4. The likeliest sense is the general one 'exposed.' Probably the method of actual execution was not mentioned, because so well known as to need no detailed explanation. See, further, art. HANGING.

ROAD (Anglo-Sax. *rad*, a journey, literally 'a riding,' from *ridan* to ride) is found in AV only once, 1 S 27^{10} 'Whither have ye made a road to-day?' The sense is a riding into a country with hostile intent, a 'raid'[*] (so RV). Cf. Calderwood, *Hist.* 143, 'All who were under the danger of the lawes for the roade of Ruthven were charged to crave pardon'; and Spenser, *FQ* VI. viii. 35—

> 'In these wylde deserts where she now abode,
> There dwelt a salvage nation, which did live
> Of stealth and spoile, and making nightly rode
> Into their neighbours borders.'

See WAY. J. HASTINGS.

ROBBER, ROBBERY.—See CRIMES AND PUNISHMENTS, vol. i. p. 522^{b}.

ROBBERS OF CHURCHES.—See CHURCHES (ROBBERS OF).

ROCK.—In the OT this is the AV tr. of the following terms:—**1.** חַלָּמִישׁ, properly 'flint.' AV renders by 'rock' only in Job 28^{9} 'he (the miner) putteth forth his hand upon the rock (RV 'flint,' AVm 'flinty rock'), he overturneth the mountains by the roots' (cf. v.^{10} 'he cutteth out channels among the rocks,' צוּרוֹת). The combination צוּר ח׳ 'rock of flint' (so AV and RV, LXX *πέτρα ἀκρότομος*, cf. Wis 11^{4}) occurs in Dt 8^{15}, and ח׳ צוּר (‖ סֶלַע), lit. 'flint of rock' (AV and RV 'flinty rock,' LXX *στερεὰ πέτρα*) in 32^{13}. In the only other two instances in which the Heb. word occurs, ח׳ stands alone: Ps 114^{6} (‖ צוּר; AV and RV 'flint,' LXX *ἀκρότομος*), Is 50^{7}, where it is used as a symbol of firmness, 'therefore have I set my face like a flint' (*στερεὰ πέτρα*; cf. Ezk 3^{9} 'as an adamant harder than flint [צֹר, *πέτρα*] have I made thy forehead'). See, further, art. FLINT.

2. [כֵּף] only in plur. כֵּפִים. This, which is perhaps an Aram. loan-word (כֵּיפָא *kêphā*, cf. the NT *Kephas*, see art. PETER in vol. iii. p. 756), occurs only in Jer 4^{29} 'they climb up upon the rocks' (for refuge; LXX *πέτραι*), and in Job 30^{6} of one of the dwelling-places of a race of outcasts (‖ חֹרִים 'caves'; on cave-dwellers or *Troglodytes*, see Driver, *Deut.* 37 f.), cf. 24^{8} 'they embrace the rock (צוּר, *πέτρα*) for want of a shelter.' In 30^{6} the LXX has a shorter text than the Hebrew, the whole verse reading *ὧν οἱ οἶκοι αὐτῶν ἦσαν τρῶγλαι πετρῶν*.

3. מָעוֹז is once rendered 'rock' by AV, namely Jg 6^{26} 'build an altar upon the top of this rock' (m. 'strong place,' RV 'strong hold,' B *τὸ Μαουέκ*, A *τὸ ὄρος Μαώχ*). The reference is probably to a natural stronghold rather than to a fortification (Moore). The word מָעוֹז 'place of refuge' (if from √ עוז) or 'strong place' (if from עזז) occurs elsewhere only in the Prophetical books (21 times) and in Proverbs (once) and Psalms (9 times). For צוּר מָעוֹז, applied to God, see below. Cf. also art. MAUZZIM.

4. סֶלַע, the nearest English equivalents of which are 'cliff' and 'crag.' The ideas of steepness and inaccessibility are connected with the word, at least in earlier passages, although in later ones it has at times a more general sense. In the following passages סֶלַע is used (LXX, wherever 'rock' is expressed, has *πέτρα*, unless otherwise noted): Nu 20$^{8\,bis.\,10\,bis.\,11}$ [all P], Neh 9^{15}, Ps 78^{16} (v.^{15} צוּר), of the rock struck by Moses; in the similar narrative, Ex 17$^{6\,bis}$ [E] צוּר is used, and so in Dt 8^{15}, Ps 78^{15} (v.^{16} סֶלַע)^{20} 105^{41} 114^{6}, Is 48$^{21\,bis}$ [on the later Jewish legends regarding this rock, see below on 1 Co 10^{4}]. In Nu 24^{21} [JE] the words of Balaam with reference to the Ḳenites, 'strong is thy dwelling-place, and thy nest (*ḳen*, a characteristic word-play) is set in the rock,' allude to the safety of birds and their nests on inaccessible cliffs, cf., for the same figure, Ca 2^{14}, Jer 48 [Gr. 28]^{26} 49 [Gr. 29]^{16}, Ob^{3}, Job 39^{28}. Dt 32^{13} [JE] 'He made him to suck honey out of the crag' (סֶלַע; ‖ 'oil out of the rock of flint,' צוּר חַלָּמִישׁ) has in view the stores of honey that are found in Palestine in the caves and fissures of the dry limestone rocks (cf. Ps 81^{16} צוּר), and the fact that the olive flourishes even in rocky soil (cf. Job 29^{6} צוּר, LXX *τὰ ὄρη*); see Driver, *Deut. ad loc.* The סֶלַע of Jg 1^{36}, 2 K 14^{7}, Is 16^{1} 42^{11} (in the first two passages with the art. in both MT and LXX) is very frequently taken to be Petra, the rock-built capital of Edom (see art. SELA). But while this might suit the two passages in Isaiah (but see Dillm. *ad loc.*), and is very appropriate to 2 K 14^{7}, it appears quite impossible to fit such an identification to the situation of Jg 1^{36}. There are strong reasons for taking '*the* cliff' in this last passage to be some prominent cliff near the south end of the Dead Sea, perhaps the modern *eṣ-Ṣafieh* (see Buhl, *Gesch. d. Edom.* 20, and Moore, *Judges, ad loc.*). In Jg 6^{20} (probably a late interpolation) סֶלַע, but in v.^{21} צוּר (and so in 13^{19} of Manoah's sacrifice), is used of the rock on which Gideon offered his sacrifice; the fissure of the cliff ETAM was one of Samson's places of refuge, Jg 15$^{8.\,11.\,13}$, cf. 20$^{45.\,47}$ 21^{13} the crag RIMMON to which the Benjamites fled, 1 S 13^{6} the crags where the Israelites took refuge from the Philistines, 23^{25} the crag in the Wilderness of Maon to which David fled from Saul [on *Sela-hammahleḳoth* of v.^{26} see art. under that name], 1 Ch 11^{15} the rock at Adullam, Is 2^{21} (‖ צוּר, and so in vv.$^{10.\,19}$) the crags to which men are to flee from before the LORD, Jer 16^{16} the refuge from which the Israelites are to be hunted, 48 [Gr. 31]^{28} the crags for which Moab is to abandon her cities (cf. 21^{13}). Crags are spoken of as the haunt of bees Is 7^{19} (cf. Dt 32^{13} above), conies (*Hyrax Syriacus*) Pr 30^{26}, wild goats Job 39^{1}, Ps 104^{18}, cf. 1 S 24^{2} (צוּר); sepulchres are hewn in rocks, Is 22^{16}; a rock is a type of hardness, Jer 5^{3} 'they have made their faces harder than a rock'; precipitation from a rock appears as a form of execution in 2 Ch 25^{12} (*κρημνός*), cf. (?) Jer 51 [Gr. 28]^{25}, and see art. HANGING in vol. ii. p. 298^{b}; the feet set upon a rock typify security, Ps 40$^{3\,(2)}$, cf. 27^{5} 61$^{3\,(2)}$ (both צוּר); crags were splintered by the storm in Elijah's vision, 1 K 19^{11}; the shadow of a great crag is grateful in a weary land, Is 32^{2}; cliffs are strong places of defence, Is 33^{16} [for the two crags of 1 S 14^{4} see BOZEZ and SENEH]; the clefts of the rocks in the wādis were the scene of the sacrifice of children, Is 57^{5}; in a hole of the rock Jeremiah was to hide his girdle, Jer 13^{4}; the word of the LORD is compared to a hammer that breaketh a crag in pieces, Jer 23^{29}; in Ezk 24^{7} the blood of Jerusalem's idolatrous sacrifices is compared to blood shed upon a bare rock (*ἐπὶ λεωπετρίαν*), which does not sink into the earth but continues to cry to heaven for vengeance, cf. the threatening in the following verse; Ezk 26$^{4.\,14}$ declare that Tyre is to become a bare rock (צְחִיחַ סֶלַע, *λεωπετρία*), there being here a punning allusion to the name of the city (Tyre = צֹר = צוּר = 'rock'); the question 'do horses run upon crags?' introduces in Am 6^{12} a reproach for conduct of a thoroughly unnatural kind.

5. צוּר is best reproduced by 'rock,' having all the senses (except, of course, the geological one) which that word bears in English. In many instances it is synonymous with סֶלַע (see the numerous parallel occurrences of the two terms quoted above), but there are some passages where צוּר occurs in which סֶלַע could not have been suitably used, at least by early writers. Besides the occurrences of the word which have been already noted, צוּר is used: of the rock where Moses had a partial vision of the glory of Jahweh, Ex 33$^{21.\,22}$

---

[*] Raid is of Scand. origin. Raid, says Skeat, was the northern Border word, 'road' being used in the south; but the first quotation above is Scottish, and yet 'road' is used.

[J]; of the rocky summit (κορυφὴ ὀρέων) from which Balaam looked down upon the camp of Israel, Nu 23^{9} [JE]; of the rock OREB where the Midianite prince Oreb was slain, Jg 7^{25} (Σούρ), Is 10^{26}; of the rock where Saul's seven sons were 'hanged' (see HANGING in vol. ii. p. 298^{b}) by the Gibeonites, and where Rizpah kept her ghastly watch, 2 S 21^{10}; in Job 14^{18} the removing of the rock out of its place is an accompaniment of the wearing down of a mountain by slow natural forces, while in 18^{4} the question 'shall the rock (τὰ ὄρη) be removed out of its place?' is tantamount to 'shall the constitution of the world be subverted?'; the custom of cutting inscriptions on rocks, of which so many examples are known, is referred to in Job 19^{24}; rocks are the shelter of a class of outcasts, Job 24^{8}, see under No. 2, above; in Pr 30^{19} the way of a serpent over a rock (*i.e.* its mysterious movements, without the aid of feet) is one of the four things which the writer cannot understand; Jehovah is to be a stone of stumbling (אֶבֶן נֶגֶף) and a rock of offence (צוּר מִכְשׁוֹל) to both the houses of Israel; in Is 51^{1} Abraham is called the rock (see vol. iii. p. 795^{b}, 'Additional Note') whence Israel was hewn; the perennial snow on the rocky summit of Lebanon is mentioned in Jer 18^{14}; the rocks are broken asunder (Nowack [emending the text] 'kindled') by the fury of the LORD, when it is poured out like fire, Nah 1^{6}.

We have reserved till now those passages in which the term 'rock' is figuratively used of God. These are the following. The word סֶלַע is used in 2 S 22^{2} [=Ps $18^{3\,(2)}$ (στερέωμα)] $31^{4\,(3)}$ (κραταίωμα) $42^{10\,(9)}$ (Ἀντιλήμπτωρ) 71^{3} (στερέωμα). The term employed is צוּר in Dt $32^{4.\,15.\,18.\,30.\,31}$ (all θεός, cf. v.^{37}), 1 S 2^{2} (? δίκαιος), 2 S 22^{3} (φύλαξ) ^{32} (κτίστης) [=Ps $18^{32\,(31)}$ (θεός)] ^{47} (φύλαξ) [=Ps $18^{47\,(46)}$ (θεός)] 23^{3} (θεός), Ps $19^{15\,(14)}$ (βοηθός) 28^{1} (θεός) $31^{3\,(2)}$ (θεὸς ὑπερασπιστής) $62^{3\,(2).\,7\,(6).\,8\,(7)}$ (all θεός) 71^{3} (θεὸς ὑπερασπιστής) 73^{26} (θεός) 78^{35} (βοηθός) $89^{27\,(26)}$ (ἀντιλήμπτωρ) $92^{16\,(15)}$ (θεός) 94^{22} (βοηθός) 95^{1} 144^{1} (both θεός), Is 17^{10} (βοηθός) 26^{4} (? μέγας) 30^{29} (θεός) 44^{8} (LXX om.), Hab 1^{12} (LXX om.). In some of these passages it has been contended that *ẓur* has the force of a proper (Divine) name. Hommel, for instance, in support of his claim that a certain class of personal names found in P, which have been widely suspected of being late and artificial, are *bona fide* ancient Hebrew survivals, brings forward two compound names to show the existence in early times of a Divine name *Ẓur*. These are *Ẓuri-'addana*, from a S. Arabian inscription not later than B.C. 800, and *Bir-* (or *Bar-*) *Ẓur*, from Zinjerli (8th cent. B.C.). But, while Hommel has rendered a service by calling attention to these names, one does well to remember that, whatever they may prove for *the period and the place to which they belong*, it is very questionable whether they justify the inference that *Ẓur* was used in a similar sense by the early Hebrews, and it remains as doubtful as before whether names like *Pedahẓur*, *Eliẓur*, *Ẓuriel*, and *Ẓuri-shaddai*, Nu $1^{5.\,6.\,10}$ 3^{35} [why are these the only instances in the OT of compounds with *ẓur*, and why are they confined to P?], were at any time, and much more in *early* times, prevalent in Israel. To the present writer the probability appears to be that, as far as the OT is concerned, Dt 32 is the source to which all the above passages may be traced back; and neither in Dt $32^{4.\,18}$ nor in Hab 1^{12}, the passages which plead most strongly in favour of Hommel's view, does it seem to be necessary to take *ẓur* as a Divine name in the proper sense. The circumstance that *ṣela'* and *ẓur* are both employed in the sense we are examining (sometimes even side by side, *e.g.* Ps $18^{3\,(2)}$ [cf. v.^{23}] 71^{3}), strengthens the conclusion that in all the instances cited we have to do simply with one of those metaphors of which Hebrew writers are so fond. 'It (*ẓur*) designates Jehovah, by a forcible and expressive figure, as the unchangeable support or refuge of His servants, and is used with evident appropriateness where the thought is of God's unvarying attitude towards His people. The figure is, no doubt, like *crag*, *stronghold*, *high place*, etc., derived from the natural scenery of Palestine' (Driver, *Deut.* 350; similarly Bertholet and Steuernagel. Hommel's contentions will be found stated in his *AHT*, pp. 300, 319 f., where he opposes the views of G. Buchanan Gray contained in *HPN*, 195 f.; Gray replies to Hommel in the *Expositor*, Sept. 1897, p. 173 ff.: cf. also Whitehouse's view, as expressed in art. PILLAR in the present work, vol. iii. p. 881^{a}).

In the NT 'rock' always represents πέτρα. Its occurrences are as follows: Mt $7^{24f.}$ ‖ Lk 6^{48} * as a type of a sure foundation, in Jesus' simile of the two buildings; Mt 16^{18} 'upon this rock I will build my church' [this passage is exhaustively discussed in art. PETER in vol. iii. p. 758]; Mt 27^{51} the rocks were rent by the earthquake at the Crucifixion; Mt 27^{60} ‖ Mk 15^{46} Joseph's tomb was hewn out in the rock, cf. Is 22^{16}; Lk $8^{6.\,13}$ part of the seed scattered by the sower fell ἐπὶ τὴν πέτραν, 'upon rock,' which is interpreted by the ἐπὶ τὰ πετρώδη of Mt $13^{5.\,20}$ [the expression means places where only a thin coating of soil covered the underlying rock, hence RV appropriately 'rocky places'; AV infelicitously 'stony places,' which suggests ground in which a number of loose stones were found]; Ro 9^{33} 'As it is written, Behold I lay in Zion a stone of stumbling (λίθον προσκόμματος) and a rock of offence (πέτραν σκανδάλου),' where Is 8^{14} and 28^{16} appear to be in view as in 1 P 2^{6-8}; in Rev $6^{15f.}$ the caves and rocks of the mountains play the same part as in Is $2^{18ff.}$ and as the mountains and hills in Hos 10^{8} (cf. Lk 23^{30}). Finally, there is 1 Co 10^{4}, where St. Paul says of the Israelites who were led by Moses through the wilderness that 'they did all drink the same spiritual drink, for they drank of a spiritual rock that followed them: and the rock was Christ' (ἔπινον γὰρ ἐκ πνευματικῆς ἀκολουθούσης πέτρας, ἡ πέτρα δὲ ἦν ὁ Χριστός). Not only does St. Paul here spiritualize the smitten rock and the water that flowed from it, giving to these a Eucharistic sense (cf. the foreshadowing of Baptism which he discovers in the Passage of the Red Sea and the Pillar of Cloud, v.^{1}, and St. Peter's treatment of the Deluge and the Ark, 1 P $3^{20.\,21}$),† but he has drawn upon later Jewish expansions of the OT story. Neither in Ex $17^{6ff.}$ nor in Nu $20^{8ff.}$ is it hinted even that the water continued to flow from the rock after the temporary occasion for it had passed (contrast the case of Jg 15^{19}). Jewish *haggāda*, however, went much beyond this, describing how the rock accompanied the Israelites all through their march (cf. St. Paul's ἀκολουθούση πέτρα), and how, wherever the Tabernacle was pitched, the princes came and sang to the rock, 'Spring up, O well, sing ye unto it,' whereupon the waters gushed forth afresh (*Bammidbar rabba* Nu $21^{17f.}$; Delitzsch in *ZKW*, 1882, p. 455 ff.; Driver, *Expos.* Jan. 1899, p. 15 ff.; Thackeray, *St. Paul and Contemp. Jew. Thought*, 204 ff.; the Comm. on 1 Corinthians; cf., for instances of similar Jewish fancies, Schürer, *GJV* ^{3} ii. 343 [*HJP* II. i. 344]).

RV substitutes 'rocky ground' for AV 'rocks' in Ac 27^{29} as tr. of τραχεῖς τόποι (lit. 'rough places'), and 'hidden rocks' for AV 'spots' (Vulg. *maculæ*) in Jude ^{12} as tr. of σπιλάδες [the AV rendering was, no doubt, influenced by the parallel passage 2 P 2^{13}; see the Comm. *ad loc.*].

J. A. SELBIE.

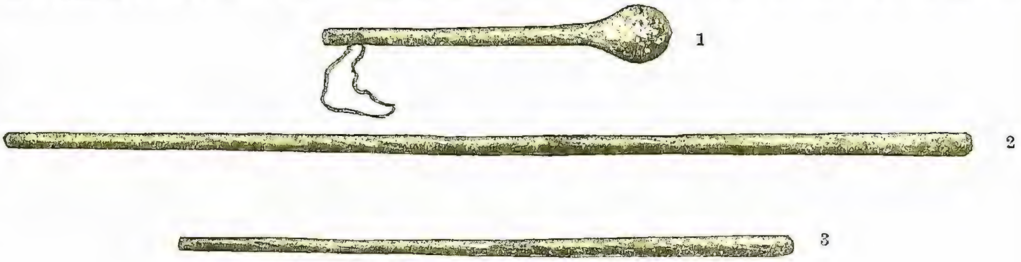
---

* In the last clause of this verse the true reading is διὰ τὸ καλῶς οἰκοδομῆσθαι αὐτήν (RV 'because it had been well builded'), not τεθεμελίωτο γὰρ ἐπὶ τὴν πέτραν (AV 'for it was founded upon a rock'), which has been introduced from Mt 7^{25}.

† St. Paul follows similar methods of interpretation and argument in Ro $10^{5ff.}$ and Gal $4^{22ff.}$

ROD (מַטֶּה *maṭṭeh*, מַקֵּל *maḳḳēl*, שֵׁבֶט *shēbeṭ*, מִשְׁעֶנֶת *mish'eneth*; ῥάβδος).—The rod or staff in the hand is the chief emblem of Oriental travel. Thus Jacob setting out for Paddan-aram left everything behind him except his *maḳḳēl* (Gn 32^{10}), the Israelites kept the first Passover feast *maḳḳēl* in hand (Ex 12^{11}), and Elisha sent his *mish'eneth*, the companion of his journeys, on before, as if it had been a living friend, to represent him in the chamber of death (2 K 4^{29}). The modern Syrian peasant when on a journey carries a staff slightly longer than that used in Europe. He invariably holds it by the thin end, with the hand an inch or two down and the thumb often resting on the top. Such a manner of grasping the stick is suggestive of defence; and by the way in which he raises himself by means of it in the steep and rough mountain path, and pushes himself along when travelling on the dusty road of the hot plain, it is evident that the walking-stick is also meant to be a support on the journey. Protection from danger and something to lean upon,—such are the two original meanings of the rod or staff.

In EV the word *maṭṭeh*, used literally, is translated 'rod' when referring to the rod of Moses (Ex 4^{2} and oft.), of Aaron (Ex $7^{10.\,12}$ and oft.), of the heads of the tribes (Nu 17^{2-10}), of Jonathan (1 S $14^{27.\,43}$), and is tr. 'staff' in Gn $38^{18.\,25}$, Is $10^{15.\,24}$ 28^{27} (as a kind of *flail*) 30^{32} (for *punishment*), Hab 3^{14}.



1. Shepherd's rod or, rather, club (*shēbeṭ*).
2. Shepherd's staff (*mish'eneth*).
3. Common staff (*maṭṭeh*, *maḳḳēl*, or *mish'eneth*).

In the Heb. *maṭṭeh* is coupled with *shēbeṭ* in Is 9^{4} (of taskmaster; fig. of oppressor; cf. $10^{5.\,24}$ 14^{5}) 10^{15} 28^{27} 36^{6}, and with *maḳḳēl* in Jer 48^{17} in such a way as to imply that the terms were practically interchangeable under ordinary circumstances.

It is in the primitive usage of the shepherd's life that a distinction is found between the 'rod' and the 'staff.' The shepherd carries both, but for different purposes. In Ps 23^{4} the 'rod' (*shēbeṭ*) is a club about 2½ ft. long, made from an oak sapling, the bulging head being shaped out of the stem at the beginning of the root.[*] The shepherd's *shēbeṭ*, frequently with large-headed nails driven into the knob, is his weapon against men and animals when in the wilderness with his flock. It is worn either suspended by a thong from the waistband or inserted in a special sheath or pocket in the outer cloak; cf. Lv 27^{32}, and Mic 7^{14}, Ezk 20^{37} (last two fig.). The *shēbeṭ* was, further, the staff of authority (not necessarily of a king), Jg 5^{14} and perhaps Gn 49^{10}. It is seen in the sculptures of Assyrian and Egyptian kings, and was the original of the military mace and the baton and truncheon of office. The Heb. word is translated 'sceptre' in Gn 49^{10}, Nu 24^{17}, Ps 45^{6}, Is 14^{5}, Ezk $19^{11.\,14}$, Am $1^{5.\,8}$, Zec 10^{11}, and in RV of Ps 125^{3}. See SCEPTRE.

These meanings of power, authority, punishment, or correction are exemplified in 2 S 7^{14}, Job 9^{34} 21^{9} 37^{13} (AVm), Ps 2^{9}, Is 11^{4}. In Is 11^{1} the expression 'a rod (חֹטֶר, of which the only other occurrence is Pr 14^{3}, where see Toy's note) out of the stem of Jesse' is more appropriately rendered in RV 'a shoot out of the stock of Jesse,' where the figure is that of a cut-down stump, which will put forth a single flourishing 'rod.' Compare, for the figure, מַטֶּה in Ezk $19^{11.\,12.\,14\,bis}$ (blooming up into a *shēbeṭ*, sceptre of rule).

Along with his 'rod' or club (*shēbeṭ*) the shepherd had also his 'staff' (*mish'eneth*), which was a straight pole about 6 ft. in length. Its service was for mountain climbing, for striking troublesome goats and sheep, beating leaves from branches beyond the reach of his flock, and especially for leaning upon. As he stood clasping the top of his stick with both hands, and leaning his head against it, his conspicuous and well-known figure gave confidence to the sheep grazing around him among the rocks and bushes of the wilderness. The *mish'eneth* is essentially something to lean upon. Thus it is the word used for Elisha's staff (2 K 4^{29}), and it indicates the untrustworthiness of Egypt as a reed of cane for Israel to lean upon (Is 36^{6}), instead of upon the strength of God. In Nu 21^{18} the *mish'eneth* is used by the nobles in digging a well (see LAWGIVER); the angel who appeared to Manoah carried a *mish'eneth* (Jg 6^{21}); in Zec 8^{4} the *mish'eneth* is characteristic of old age.

'He that leaneth upon a staff' (מחזיק בפלך, B κρατῶν σκυτάλης) of 2 S 3^{29} should probably be 'he that handleth the spindle' (see Driver, *ad loc.*), if the text be correct, which H. P. Smith (*Sam. ad loc.*) doubts. The references to *maḳḳel* are generally to the ordinary staff[*] for a journey [in Hos 4^{12} 'their staff declareth unto them,' there is reference to the practice of *rhabdomancy*], at once protective and supporting. Examples are Jacob's staff (Gn 32^{10}), the staff of the Passover feast (Ex 12^{11}), Balaam's staff (Nu 22^{27}), with which he could support himself by resting the end of it on the front of the broad Oriental saddle; also probably the staff in David's hand when he went out to meet Goliath (1 S 17^{40}), for being then on a journey he would have laid aside the more cumbrous shepherd equipment.

In NT ῥάβδος has the twofold meaning of a staff for a journey (Mt 10^{10}, Mk 6^{8}, Lk 9^{3}, He 11^{21}) and a rod for chastisement (1 Co 4^{21} [cf. the verb in 2 Co 11^{25}], Rev 2^{27} 12^{5} 19^{15}). G. M. MACKIE.

RODANIM, reading of MT in 1 Ch 1^{7} for the Dodanim of Gn 10^{4}, answering to the Ῥόδιοι of the LXX in both passages. See DODANIM.

---

[*] This manufacture of the *shēbeṭ* from a young tree might suggest that in the metaphorical use of *shēbeṭ* (Arab. *sabṭ*), 'tribe,' the reference is to various seedlings with a common origin—the tribes of the children of Israel. It is to be noted, however, that *maṭṭeh* is equally (183 t.) used for 'tribe,' and possibly the original reference in both cases is to a company led by a chief with a *staff*. See, further, on the relation between *shēbeṭ* and *maṭṭeh*, Driver in *Journ. Philol.* xi. (1882) 213 f.

[*] This is also the word used in Gn $30^{37\mathrm{ff.}}$ of the sticks employed by Jacob in his cattle-breeding artifices.

ROE.—This word occurs once in AV (Pr 5^{19}, RV ‘doe’) as the equivalent of יַעֲלָה *ya'ălāh*; see Doe. In all other places where ‘roe’ occurs in AV (2 S 2^{18}, 1 Ch 12^{8}, Pr 6^{5}, Ca 2$^{7.\,9.\,17}$ 3^{5} 4^{5} 7^{3} 8^{14}, Is 13^{14}) it is the tr^{n} of *ẓĕbî* or *ẓĕbîyyāh*, and in these RV also gives ‘roe,’ but in every passage except 2 S 2^{18} and 1 Ch 12^{8}, with marginal note, ‘gazelle,’ which is undoubtedly the correct rendering. See Gazelle.

G. E. Post.

ROEBUCK.—This word, wherever it occurs in AV (Dt 12$^{15.\,22}$ 14^{5} 15^{22}, 1 K 4^{23}), is the equivalent of צְבִי *ẓĕbî*, LXX δορκάς. RV has in all these passages consistently tr^{d} *ẓĕbî* ‘gazelle’ (see Gazelle). ‘Roebuck’ is the proper tr^{n} for יַחְמוּר *yaḥmûr*, which is rendered by AV ‘fallow deer’ (Dt 14^{5}, 1 K 4^{23}). Tristram (*Fauna and Flora*, p. 4) says that *yaḥmûr* is used by the natives of Carmel for the roebuck, which is still found there. One of the districts of Carmel is known as *Yaḥmûr*, perhaps from the former abundance of this animal. Conder says that the roebuck is called *ḥamûr* in Gilead. The people about *Ḳâna* and *'Alma*, north of Carmel, call it *wa'l*, which is one of the names of the ibex or wild goat, which animal, however, is not now found there. In N. Africa *yaḥmûr* is synonymous with *baḳar el-waḥsh*, *Alcephalus bubalus*, Pall. From these facts two things are evident—(1) That ‘fallow deer’ is not a correct tr^{n} of *yaḥmûr*. The fallow deer is אַיָּל *'ayyāl* (see Hart). The first three animals of the list (Dt 14^{5}) are *'ayyāl*, correctly tr^{d} in both AV and RV ‘hart’; *ẓĕbî*, AV incorrectly ‘roebuck,’ RV correctly ‘gazelle’; and *yaḥmûr*, AV incorrectly ‘fallow deer,’ RV correctly, as we believe, ‘roebuck.’ The LXX (B) gives us no help, as it has only ἔλαφος and δορκάς, the equivalents of *'ayyâl* and *ẓĕbî*, and drops out *yaḥmûr* from the lists. (2) That *bubale* (LXX AF βούβαλος), as proposed by some, is also not a correct tr^{n} for *yaḥmûr*. The *bubale* is not now found west of the Jordan, and only rarely east of it. The roebuck is found in considerable numbers on both sides of this river. The *bubale* is not called *yaḥmûr* where found on the confines of Palestine. The roebuck is so called both east and west of the Jordan. It is most numerous in the thickets, in the wādis of Carmel and N.W. Galilee.

The roebuck, *Cervus capreolus*, L., is shaped like a gazelle. Its full length is 3 ft. 10 in. from the tip of the nose to the end of the rump; height at shoulder 2 ft. 4 in., at rump 2 ft. 6 in. The horns are about as long as the face, on a line with it, and have three short branches. The eyes are almond-shaped, with point forward. There is no external tail. The coccyx is 2 in. long, but is covered by the rump fat. The colour is grey, with a reddish-brown shade towards the posterior part of the rump, and white between the thighs and on the belly. (See figure of a specimen in *PEFSt*, July 1890, p. 171).

G. E. Post.

ROGELIM (רֹגְלִים; Ρωγελλείμ, A in 2 S 17^{27} 'Ρωγελείμ).—The native place of Barzillai the Gileadite. The exact site is unknown; it probably lay in the north of Gilead (2 S 17^{27} 19^{31}).

ROHGAH (*Kethîbh* רוהגה, corrected by *Ḳerê* to רָהְגָה; B om., A 'Ογά).—An Asherite, 1 Ch 7^{34}.

ROIMUS ('Ρόειμος), 1 Es 5^{8}, corresponds to Rehum, Ezr 2^{2}, or Nehum, Neh 7^{7}.

ROLL.—See Writing.

ROMAMTI-EZER (רוֹמַמְתִּי עֶזֶר).—A son of Heman, 1 Ch 25$^{4.\,31}$. There is reason to believe that this and five of the names associated with it are really a fragment of a hymn or prayer (see Genealogy, III. 23 n.; and cf. Kittel in *SBOT*, and W. R. Smith, *OTJC*^{2} 143 n.).

ROMAN ('Ρωμαῖος, esp. Ac 16$^{21.\,37.\,38}$ 22$^{25\text{-}29}$ 23^{27}).—Roman citizenship (*civitas*) might be held in NT times (*a*) by birth, from two Roman citizens united in *justæ nuptiæ*. There was no *connubium*, or right of *Roman* marriage (unless specially granted), except with a Roman woman. If the union were un-Roman (with a Latin woman, a foreigner, a concubine) or unlawful (with a slave, etc.), it gave no *patria potestas*, and the children followed the mother's condition. It might also be held (*b*) by manumission in certain cases, or (*c*) by grant, either to entire cities or districts, or to individuals in reward of political or other services, as to a soldier on his discharge. Under Claudius, however, Messalina sold the *civitas*, and the price gradually fell (Dio, lx. 9) to a ridiculous figure. The chief captain (Ac 22^{28}) bought it at a high price; but if St. Paul was born free, it must have been held at least by his father (Ramsay, *St. Paul*, 30 f.). The franchise of Tarsus (Ac 21^{39} 'Ιουδαῖος, Ταρσεύς) would not imply the *civitas* as a matter of course, for Tarsus was an *urbs libera* (Pliny, *NH* v. 27).

The most practical advantage of the *civitas* in NT times was that no citizen could be scourged (lex *Valeria* B.C. 509, lex *Porcia* of uncertain date) or put to death by any provincial authority without the right of appeal to the emperor. Even the *præfectus prætorio* could not condemn him to *deportatio*, and the emperor himself commonly had him executed by the sword, reserving the cross, the fire, and the beasts for slaves and other low people. It was illegal when Paul and Silas were scourged at Philippi (Ac 16^{37}), and when Paul was to have been examined at Jerusalem by scourging (Ac 22^{24} μάστιξιν ἀνετάζεσθαι). In both cases ἀκατάκριτος is *re incognita* (Ramsay, *St. Paul*, 225), for it would not have been less illegal after condemnation. Of the other two scourgings mentioned in 2 Co 11^{25} nothing further is known.

The right of appeal to the emperor seems to continue neither the old *provocatio ad populum*, which was limited even in republican times by the *quæstiones perpetuæ*, and had now become obsolete, nor the old *intercessio* of the tribunes, which was purely negative, and limited by the first milestone from Rome. It seems rather to rest on the general authority of the emperor, under the lex *de imperio*, to do almost anything he should consider *ex usu reipublicæ*, etc. The appeal was not granted quite as a matter of course. Festus confers (Ac 25^{12}) with his assessors before deciding (v.^{25} ἔκρινα). Once granted, it stopped the case. The governor could not even release the accused (Ac 26^{32}). His only duty was to draw up a statement of the case (*apostoli*, *litteræ dimissoriæ*—Festus asks Agrippa's help in doing this) and send him to Cæsar. St. Paul is delivered to a centurion, σπείρης Σεβαστῆς—one of the legionary centurions employed on detached service at Rome, and therefore called *peregrini* from the Roman point of view, and by him handed over at Rome to his chief, the στρατοπεδάρχης (Ac 28^{16}, but om. WH) or *princeps peregrinorum* (so Mommsen: not the *præfectus prætorio*).

The accused might be kept before trial in (*a*) *custodia publica*, the common jail, though a man of high rank was frequently committed to (*b*) *custodia libera* as the guest of some citizen who would answer for his appearance. Intermediate was (*c*) *custodia militaris*, where one end of a light chain (ἅλυσις) was constantly fastened to his right wrist, the other to the left wrist of a soldier (so St. Paul, Ac 26^{29} 28^{20}, Eph 6^{20}, 2 Ti 1^{16}). In this case he might *either* be kept in strict custody (2 Ti 1^{17}, where Onesiphorus needs diligent search to find St. Paul), *or* allowed to live in his own lodgings and receive in them what company he chose (Ac 24^{23} 28^{30}). The actual trial was before the emperor (often in person) and his *consiliarii*; and each count of the indictment was separately examined. 2 Ti 4^{17} seems to say that the *prima actio* against St. Paul had been a failure, though the apostle has no hope of escape on the second.

A false claim of citizenship was a capital crime (Suet. *Claudius*, 25).

LITERATURE.—Mommsen, *Römische Staatsrecht*, 1876-77, and (for peregrini) *Berlin. Akad. Sitzungsber.* 1895, p. 501; Willems, *Droit public Romain*, 1883; Karlowa, *Römische Rechtsgeschichte*, 1885; W. M. Ramsay, *St. Paul the Traveller*, 1895.

H. M. GWATKIN.

ROMAN EMPIRE (most nearly *orbis terrarum*, *ἡ οἰκουμένη*, Lk 2^1; and its people *genus humanum*, as Tac. *Ann.* xv. 44 'odio humani generis.' *Imperium populi Romani* does not cover the free cities, and *Romania* seems first found Ath. *Hist. Ar.* 35, and Orosius, *Hist. e.g.* vii. 43).—Augustus left the Empire bounded by the Rhine and the Danube, the Euphrates, the African desert, the Atlantic, and the North Sea. These limits he recommended to his successors, and they were not seriously exceeded till Trajan's time, except that the conquest of Britain was begun by Claudius in 43, and finished as far as it ever was finished at the recall of Agricola in 85. Germany had recovered its independence in 9 A.D. by the defeat of Varus, and the conquest of Parthia was hardly within the range of practical politics.

Not Rome destroyed the ancient nations, but their own wild passions and internecine civil strife. The Greeks could make nothing of the liberty Flamininus gave them, the Gauls were no better, and even Israel—the one living nation Rome did crush—was in no very different case in Judæa. Rome came in as often as not to keep the peace; and when the Empire settled down, it seemed quite natural that 'all the world' should be subject to her. Virgil and Claudian sing with equal enthusiasm her everlasting dominion; and even the Christians firmly believed that nothing but Antichrist's coming would end it (2 Th $2^{6f.}$). So, though she had mutinies enough of armies, Israel was almost the only rebel nation. She could mass her legions on the great river frontiers, and leave a score of lictors to keep the peace of Asia, a garrison of 1200 men to answer for the threescore States of Gaul. She no more ruled the world than we rule India by a naked sword.

Hence there was a vast variety even of political *status* within the Empire. Some cities had the Roman *civitas* (see ROMAN), others only the *jus Latii*; some, like Athens, were in theory free and equal allies of Rome, while others had no voice in their own taxation. Italy had the *civitas*, and was supposed to be governed by the Senate, whereas a senator could not even set foot in Egypt without the emperor's permission. Some provinces were governed by senatorial proconsuls or proprætors, others by *legati Augusti pro prætore*, or, like Egypt or Judæa, by a *præfectus augustalis*, or a *procurator* of lower rank. Some regions, again, had client kings, like Mauretania, Judæa under the Herods, or Thrace. True, the Empire was steadily levelling all this variety. The client kingdoms disappeared—Galatia as early as B.C. 25, Chalcis (held by Agrippa II.) as late as 100. The autonomy of the *urbes liberæ* was commonly respected—Hadrian was archon twice at Athens; but the Roman *civitas* was steadily extended till Caracalla gave it in 212 to all free inhabitants of the Empire.

Broadly speaking, the Eastern half of the Empire was Greek, the Western Latin. The dividing line may run pretty straight from Sirmium to the altars of the Philæni. But Greek was dominant in parts of the West,—Massilia, Sicily, and the coasts of Southern Italy,—and was in most places the language of culture and of commerce, whereas Latin in the East was not much more than an official language. Nor was either Latin or Greek quite supreme in its own region. Latin had perhaps displaced by this time the Oscan and other dialects of Italy; but it had only well begun the conquest of Spain, Gaul, and the Danube countries. Greek was opposed by the rustic languages of Thrace and the interior of Asia Minor, such as the Lycaonian (Ac 14^{11}) and the Galatian. Further East it had tougher rivals in Aramaic and Coptic, which it was never able to overcome, though Alexandria was a Greek city, and Galilee almost bilingual in the apostolic age. The distribution of the Jews resembled that of the Greeks in being chiefly Eastern, and in following the lines of commerce westward: but their great centres were Syria and Alexandria within the Empire, Babylonia beyond it.

Rome was never able to make a solid nation of her Empire. In Republican times her aim was utterly selfish—to be a nation ruling other nations, and getting all she could out of them. The Republic broke down under the political corruption this caused, and the proscriptions completed the destruction of healthy national feeling. The Empire had higher aims from the first, and the sense of duty to the conquered world increased on it as time went on; but it could neither restore nor create the patriotism of a nation. The old Roman nation was lost in the world; and if the world was lost in Rome, it did not constitute a new Roman nation. Greeks or Gauls might call themselves Romans, and seem to forget their old people in the pride of the Roman *civitas*; but Greeks or Gauls they remained. Every province of the Empire had its own character deeply marked on the society of the apostolic age and on the Churches of the future. Galatia was not like Asia, and Pontus or Cilicia differed from both. There were peoples in great variety; but the old nations were dead, and the one new nation was never born.

Yet the memory of nations put the Empire in a false position. It belonged, like the Christian Church, to the universalism of the future; but the circumstances of its origin threw it back on the nationalism of the past. Augustus came in after the civil wars as a 'Saviour of Society,' sustained by the abiding terror of the proscriptions. Hence he was forced into a conservative policy very unlike the real tendency of the Empire to level class distinctions, to replace local customs by uniform laws and administration, and to supersede national worships by a universal religion. The Empire was hampered by Republican survivals, degraded by the false universalism of Cæsar-worship. Augustus had to conciliate Rome by respecting class-feeling, and by leaving Republican forms of government almost unaltered. He was no king, forsooth (not *rex*, though called *βασιλεύς* in the provinces, Ac 17^7, 1 P $2^{13.17}$),—only *princeps*, the first citizen of the Republic. The consuls were still the highest magistrates, though those who gave their names to the year were replaced during the year by one or more pairs of *consules suffecti*. Prætors, quæstors, etc., went on much the same, and even the anarchical power of the tribunes was not limited by law till the reign of Nero, though the popular assemblies vanished after that of Augustus. The Senate deliberated as of old under the presidency of the consuls, and the emperor himself respectfully awaited their *Nihil vos moramur* at the end of the sitting. It still governed Italy and half the provinces, and furnished governors for nearly all—deep offence would have been given if any one but a senator had been made *legatus Augusti pro prætore.* Above all, the Senate could legislate without interference from tribunes or *Comitia.* It elected all the magistrates (from the time of Tiberius), and even the emperor owed to it his constitutional appointment. So far as forms went, the State was a Republic still, and became a real one for a moment when the government lapsed to the consuls at an emperor's death. The name *respublica* lasted far past 476.

But the emperor was not only master, but fully recognized as such. The liberty of the Senate was hardly more than liberty to flatter him. The pillars of his power were three. He had (1) the *imperium proconsulare*, which gave him full military and civil power in the great frontier provinces, where most of the army lay. The rest were left to the Senate; but as his *imperium* was defined to be *majus*—superior to that of ordinary proconsuls—he practically controlled them too. The power was for life, and was not forfeited in the usual way by residence in Rome. He held also (2) the *tribunicia potestas*, also for life, and without limitation to the first milestone out of Rome. This made his person sacrosanct, and gave him the *jus auxilii*, by which he cancelled decisions of magistrates, and the *intercessio*, by which he annulled decisions of the Senate. He had also (3) other powers conferred separately on Augustus, but afterwards embodied in a *lex regia* or *de imperio* for his successors. A fragment of the law passed for Vespasian is preserved (*CIL* vi. 930), and two of its clauses run—

> '*Utique, quæcumque ex usu reipublicæ, majestate divinarum, humanarum, publicarum privatarumque rerum esse censebit, ei agere, facere jus potestasque sit, ita uti divo Augusto Tiberioque Iulio Cæsari Augusto Tiberioque Claudio Cæsari Augusto Germanico fuit; utique quibus legibus plebeive scitis scriptum fuit ne divus Augustus &c. tenerentur, iis legibus plebisque scitis imperator Cæsar Vespasianus solutus sit, quæque ex quaque lege, rogatione divum Augustum &c. facere oportuit, ea omnia imperatori Cæsari Vespasiano Augusto facere liceat.*'

Thus the emperor was not arbitrary. He was subject to law like any other citizen, unless dispensed by law. True, he could alter law by getting a *senatus consultum*, or by issuing his *edict* as a magistrate. He could also interpret it by a rescript or answer to a governor who asked directions; his *acta* were binding during his reign, though the Senate might quash them afterwards; and, as we have seen, he had large discretionary powers. But by law he was supposed to govern, and by law he commonly did govern. The excesses of a Nero must not blind us to the steady action of the great machine, which was so great a blessing to the provincials. Moreover, though the Senate was commonly servile enough, it was no cipher even in the 3rd century. It represented the tradition of the past, the society of the present; and every prudent emperor paid it scrupulous respect. If an emperor is called bad, it need not mean that he was incompetent (Tiberius was able enough), or that he oppressed the provinces (Nero did not). It means that he was on bad terms with the Senate, and, therefore, with the strong organization of society which culminated in the Senate. Nero did himself more harm by fiddling and general vulgarity than by murders and general vileness. Society was always a check on the emperor, and in the end it proved the stronger power. If Diocletian shook off the control of the army, he did it only by a capitulation to the plutocrats of society.

The religious condition of the Empire was not like anything in modern Europe. It had no established or even organized Church, for the regular worships were local, except that of the emperor. Priesthoods might run in families or be elective, or sometimes any one who knew the ritual might act as priest; but the priests were not a class. Taken as he commonly was from the higher ranks of society, the priest was first of all the great senator or local magnate, so that his priesthood was only a minor office. The priests were not a clergy, except in the irregular Mithraic and other Eastern cults, where they were not yet taken from the higher classes. Nevertheless, there were sharp limits to Roman toleration, though persecution was not always going on. Intolerance, indeed, was a principle of heathenism, laid down in the Twelve Tables, and impressed by Mæcenas on Augustus. Rome had her gods, whose favour had built up the Empire, and whose wrath might overthrow it: so no Roman citizen could be allowed to worship other gods without lawful authority, which could be given only by the Senate. Gradually all national gods obtained recognition, so that the pantheon of the Empire became a large one; but the individual was as strictly as ever forbidden to go outside it. Thus we get the anomaly of persecution without a persecuting Church.

The emperor's own position was equally unlike that of modern sovereigns. He held the office of *Pontifex Maximus* in permanence after the death of Lepidus, B.C. 12. This gave him a dignified position as head of the college of pontiffs, which superintended the State religion; and it gave him by law or usurpation the appointment of pontiffs, vestals, and flamens. But these were only local officials; with the priests in the provinces and with the irregular Eastern cults the *Pontifex Maximus* had no direct concern. Complete as was the identification of Church and State in Rome, the office gave its holder no exorbitant power over religion.

The strength of his position was not official but personal—vaguely indicated by the title *Augustus* (Σεβαστός, Ac $26^{21.\,25}$). The courtly fiction that the Julian house was descended from the gods might do service for a time; but the truth came out clear at Vespasian's elevation. If he was a tough old general with no romance about him, who died with a scoff on his lips at his own divinity, he was none the less the impersonation of the glory of the world and Rome; and this is what made the emperors divine, and kept them so in spite of absurd deifications like those of Claudius and of Poppæa's infant. Emperor-worship might be fashion; but it was also a real cult sustained by genuine belief. If courtiers placed Augustus among the household gods, courtiers did not keep Marcus there in Constantine's time. Kings were counted gods from the Pharaohs of Egypt to the Jubas of Mauretania; and the Greeks had worshipped great men from Lysander (B.C. 403) onward, till deification became a cheap compliment for kings and their favourites. Rome understood better than the Greeks the difference between gods and men—*deus* is a much more definite word than θεός; yet even she deified legendary kings. But Romulus was the last of them, and she never deified the heroes of the Republic. Flamininus was a god in Greece; but Scipio was no more than a man at Rome; and even Sulla was only *Felix*, not *Augustus.* To the last she reserved the honour for emperors and their near relations, for the worship of Hadrian's favourite Antinous was rather Eastern and Greek than Roman. Yet in the goddess Roma the spirit of the State was worshipped long before the honours of deity were pressed on the dictator Cæsar by a grateful people and a servile Senate. Cæsar's murder was a warning to Augustus; and he called himself *Divi Filius*, but not *Divus.* He allowed the Asiatic cities to build temples to him after the battle of Actium, but required them to join with him the goddess Roma. Other cities followed: first in Asia in apostolic times was

Pergamum, 'where Satan's seat is' (Rev 2^{13}). Such cities were called *νεωκόροι* or temple wardens of Augustus, as Ephesus (Ac 19^{35}) was *νεωκόρος* of Artemis. Before long a *Commune Asiæ* (*τὸ κοινὸν τῆς Ἀσίας*) was formed, with a chief priest or ASIARCH (in looser sense, as Ac 19^{31}, unless these be past Asiarchs) in each city, and over them an elected Asiarch (in the strict sense) or chief priest of the province. Other provinces did likewise, as Bithynia, Galatia, Phœnicia, etc., and in B.C. 12 the 60 States of Gaul organized a *Commune*, meeting annually at the confluence of the Rhone and the Saône. These provincial assemblies were powerful enough—the priests were always magnates—to answer some of the purposes of representative government. They could complain of a bad governor, and often obtain his recall. In Italy, and especially in Rome, the worship of the emperor was chiefly represented by that of his genius or his virtues: only at his death he was formally placed among the gods by the Senate. '*Reliquos deos accepimus*,' says Valerius Maximus, '*Cæsares dedimus*.' This deification was the rule, though emperors who displeased the Senate were not deified when the honour could safely be refused them; and it can be traced well into Christian times, certainly till Jovian (364), and perhaps as late as Theodosius, though long before that time the emperor had ceased to be a real divinity, even among the heathens.

If the Empire was the greatest of hindrances to the gospel, it was also the greatest of helps. We must look below its superficial tolerance in the Apostolic Age, below the deeper enmity proclaimed by Nero's persecution. The single fact that the Empire was universal went far to complete the fulness of time for Christ's coming. Rome put a stop to the wars of nations and the great sales of slaves resulting from them, to the civil strife of cities and their murderous revolutions. Henceforth they were glad to live quietly beneath the shelter of the Roman peace. Intercourse and trade (witness the migratory Jews) were easier and freer than ever since in Europe till quite recently. It was settled peace, too, such as never came again till after Waterloo. Whole provinces hardly saw the face of war for generations together. Roman law went with Roman citizenship; and Latin civilization overspread the West, while Greece under Roman protection completed her conquest of Asia within Mount Taurus.

Historically, the Empire is the great barrier which won for civilization a respite of centuries by checking at the Rhine the tide of Northern barbarism, and at the Euphrates the two thousand years' advance of Asiatic barbarism through Parthian and Saracen and Turkish times, beginning with Alexander's retreat from the Sutlej, B.C. 327, and ending only at the repulse of the Turks from Vienna in 1683. During that momentous respite Rome gathered into herself the failing powers of the old world, and fostered within her the nascent powers of the new. This was her work in history—to be the link between the ancient and the modern—between the heathen city-states of the ancient world and the Christian nations of the modern. Her weakness was not political. Emperors might rise and fall, but the Empire itself did not perish when emperors rose and fell no more. It was not military: generals might blunder, but nearly to the end no enemy could face a Roman legion in the shock of battle. It was partly economic, in slavery and bad taxation; partly educational, in the helpless hark back to the mere words of the past; partly also administrative. Christian thought is even now profoundly influenced by the fact that the Empire had no good police. Brigands were plenty in Judæa (ληστής 15 times in NT, of which 2 Co 11^{26} may refer to Gentile regions), and, though other provinces were better off, the evil increased as time went on, and the emperor lost control of the administration. Hence arbitrary severities and laws of atrocious cruelty against such offenders as were unlucky enough to be caught. The Empire was by far the worthiest image of the kingdom of God yet seen on earth, but its imperfections are writ large on every form of Christian thought which looks on power as the central attribute of deity. After all, the Empire was the passing of the ancient world. With all their grandeur, its rulers were only the *καταργούμενοι* (1 Co 2^{6}).

LITERATURE.—See ROMAN: and add Boissier, *Religion romaine*; Westcott's *Comm. on St. John's Epp.* ('The Two Empires'); Lightfoot, *Ignatius*, iii. 404; and authorities quoted hy them, to which add Fustel de Coulanges, *La Gaule romaine*; and E. G. Hardy, 'The Provincial Councils from Aug. to Diocl.,' in *Eng. Hist. Rev.* v. 221.

H. M. GWATKIN.

ROMANS, EPISTLE TO THE.—

i. Place of the Epistle in tradition. Genuineness.
ii. Time and Place of writing.
iii. Occasion and Purpose: (1) Jews in Rome; (2) Christians in Rome; (3) Apostolic foundation; (4) Jewish or Gentile readers? (5) Letter or Treatise? (6) Relation to other letters of the group.
iv. Sketch of main arguments, and Analytical Tahle.
v. Importance of the Epistle.
vi. Theology and characteristic ideas: (1) God, Attrihutes and Will—Law, Christ; (2) Man under sin; (3) Man under law and under grace, the Spirit; (4) Man's admission to grace, faith, justification; (5) Grace and the moral life; (6) The Christian community and its Institutions.
vii. Materials for personal history of St. Paul.
viii. Transmission of the Text. Integrity.
Literature.

i. PLACE OF THE EPISTLE IN TRADITION.—What has been remarked of 1 Corinthians applies equally to this Epistle. But definite traces of its language occur already in 1 Peter, fainter but still distinct traces in Hebrews, and probable distinct traces in James, though here the case is less clear, and Mayor, in his edition of *James*, contends for the priority of the latter (see for details, and traces in Jude, Sanday-Headlam, lxxi ff.). The Epistle was well known to Clem. Rom. (nine passages are distinctly traceable), Ignatius (twelve), Polycarp (six), Justin Martyr (seven), and apparently to Gnostic writers (Naassenes, Valentinians, and Basilides) quoted by Hippolytus. For details, see Sanday-Headlam, who add some very instructive quotations (thirteen, of which seven seem indisputable) from *Test. of xii. Patriarchs.* The first reference to our Epistle by name is that by Marcion, who included Romans in his collection of Pauline Epistles (see below, § viii.). We may safely repeat here what was said on 1 Corinthians (which see), that the Epistle to the Romans has been recognized in the Christian Church as long as any collection of St. Paul's Epistles has been extant. In the Muratorian and other early lists our Epistle stands seventh among the Pauline Epistles, *i.e.* last among the Epistles addressed to *Churches* as distinct from individuals. Its present position at the head of the list appears first in the 4th cent. (see on 1 Cor., § 1, and Sanday-Headlam, lxxxiv ff.). Another important direct quotation is in Irenæus, *Hær.* III. xvi. 3, and in IV. xxvii. 3, an 'elder,' the pupil of men who had seen the apostles, is represented as quoting Ro $11^{17. 21}$ ('Paulum dixisse') and 3^{23}. Marcion, it is true, omitted chs. 15. 16, and certain other passages; but neither he nor any other heretic impugned the authority of the Epistle, which is included in all the ancient versions. But no weight of external attestation could be more eloquent than the style and character of the Epistle itself. Its very difficulty is of a nature which raises it above the plane of arti ficiality. For this difficulty springs from no clumsiness of expression or confusion of thought, but from the depth of the questions handled and the originality of their treatment. It is the most 'Pauline' of all the writings which bear St. Paul's name. Accordingly, critics who have set down almost every other writing of the NT as anonymous, have allowed that this Epistle, along with those to the Corinthians and Galatians, is really from the hand of St. Paul. The somewhat reckless criticism of Bruno Bauer produced little or no effect upon the body of critical opinion in Germany. In more recent times the hypercriticism of the Dutch school of Loman and others, and the extreme theories of Steck (on these see 1 CORINTHIANS, § 4; also Sanday-Headlam, pp. lxxxvi–lxxxviii), have failed to shake the main body of representative critics in their estimate of our Epistle.

ii. TIME AND PLACE OF WRITING.—The ministry of St. Paul as recorded in Acts falls into three periods: (*a*) The Antiochene (Ac 13–18^{23}), when Antioch was his headquarters. Towards the end of this period (Ac 16–18) he founds the great Churches of the Ægean region. (*b*) The Ægean or Ephesian period (Ac 18^{24}–21^{10}), when he transfers his residence to Ephesus; at the end come his second visit to Corinth and his last voyage to Jerusalem. (*c*) The period of captivity (Ac 21^{11}–28) at Cæsarea and Rome. To the first period belong the Epistles to the Thessalonians, written from Corinth; to the second, the four Epistles to the Galatians, Corinthians, and Romans. The third period is that of the 'captivity group,' Philippians, Colossians, Ephesians, Philemon. Our Epistle was in all probability the last of its group,—certainly it is later than 1 and 2 Corinthians. It was written from Corinth, where (assuming that 16^{23} belongs to our Epistle, see below, § viii.) St. Paul was the guest of the Gaius of 1 Co 1^{14}.

Phœbe, possibly the bearer of the letter, was a 'deaconess' of Cenchreæ, the eastern port of Corinth. Moreover, St. Paul was on the eve of departure from Corinth with the alms collected by him in Macedonia and Achaia (15$^{25.26}$) for the 'poor saints' of Jerusalem. From the latter place he was hoping to visit Rome, and afterwards Spain (15^{28}; cf. 2 Co 8$^{1.2}$, Ac 24^{17} 20^{22} 19^{21}). It was after the winter, which St. Paul had probably spent in Corinth (1 Co 16^{6}), for he proposed *to sail* to Syria (Ac 20^{3}) and to reach Jerusalem before Pentecost (Ac 20^{16}). But Ro 15 contains no allusion to the plot of the Jews which at the last moment forced him to change his route (Ac 20^{3}). The exact year in which the Epistle was written depends upon the dates to be assigned to 1 and 2 Cor. (see 1 CORINTHIANS, § 6 and reff., and CHRONOLOGY OF NT). If, as the present writer inclines to believe, the chronology of Lightfoot, etc., is not definitely superseded, the Epistle dates from just before the Passover of the year 58. If the whole scheme has to be shifted back two years, then the corresponding date in 56 must be adopted. The point may, for the purpose of this article, be left in suspense. The relative date, *i.e.* with reference to the other Epistles, is the point of real importance for the historical explanation of our Epistle. On this point the limits of doubt are narrow. There is no question but that Romans belongs, with 1 and 2 Cor., to the Ægean period (see above), in contrast to 1 and 2 Thess., which belong to the Antiochene period, and to Philippians, Colossians, Ephesians, Philemon, which come after St. Paul's captivities had begun. There is, moreover, no doubt that Romans was written on the eve of St. Paul's departure from the Ægean region, and therefore was preceded in time by both Epistles to the Corinthians. The point which is less absolutely certain is the relation of Romans to Galatians. It is not so very important to subdivide the alternative hypotheses which agree in supposing Romans to follow Galatians. If Lightfoot's view of the close psychological relation between 2 Corinthians and Galatians remains unshaken in itself, and is not outweighed by general chronological considerations, we have a very intelligible historical situation for the origin of Romans (see below, §§ iii. v.). Even if Galatians has to be placed at the beginning of the Ephesian period (Weiss, etc.) or at the close of the Antiochene period (Ramsay, Rendall, etc.), we lose, no doubt, something of the dramatic unity of situation, but we may still regard Romans as the mature expression and expansion of the thoughts struck out at white-heat in Galatians. But the relation is wholly reversed if (with Clemen, *Chronol. der Paul. Briefe*) we regard Galatians as presupposing Romans. This view is part of a general rearrangement of Pauline chronology discussed in the art. 1 CORINTHIANS, vol. i. p. 485. Its direct proof is drawn from the relation of the treatment of circumcision, the law, etc., in our Epistle to that in Galatians, which is supposed to represent an exacerbation of the apostle's attitude. The view to be maintained below (§§ iii.–vi.) seems quite as legitimate an inference from the facts, and in itself more in accord with our general knowledge of St. Paul's thought and temper. If the reader finds it unsatisfactory, he may remember that he has the hypothesis of Clemen to fall back upon.

iii. OCCASION AND PURPOSE.—In order to estimate the occasion and purpose of our Epistle, we must *first* ask, For what readers was it meant? and, *secondly*, What was the apostle probably desirous to say to such readers at this particular time? This necessitates a glance at the antecedents of Roman Christianity.

The Christian body to which our Epistle is addressed was clearly not, like that of Thess. or even of Gal., of recent origin (1$^{8.13}$ 15^{23} 16^{7}). In view of features of the Epistle, to which attention will presently be drawn, its origin is to be sought in connexion with the existence of a Jewish community in Rome.

1. *Jews in Rome.*—The first known connexion of the Jews and Romans was in the 2nd cent. B.C., under the Maccabees (1 Mac 8$^{17\text{ff.}}$ 12$^{1\text{ff.}}$ 14$^{16.24}$ 15$^{15\text{ff.}}$). Jewish embassies had gone to Rome, and had obtained treaties of alliance (B.C. 161, 144, 141, 129). Probably their earliest settlements in Rome date from this period,—though there is no need to seek a special occasion at Rome at a period when Jews were beginning to find their way all over the civilized world. Cicero (*pro Flacco*, 59) tells us of a large Jewish community in Rome, which sent annual subsidies to Jerusalem. The captives brought by Pompey from the East (B.C. 61) swelled their numbers. Many of these gained enfranchisement (Philo, *Leg. ad Gaium*, 23), and these are probably the *Libertini* who supported a synagogue of their own at Jerusalem (Ac 6^{9}). Their worship was expressly tolerated by Julius, Augustus, and Tiberius. They occupied, according to Philo, a quarter of their own beyond the Tiber. But there is evidence of synagogues, and therefore of Jewish residents, in other parts of the city also. Josephus tells us how 8000 Jews in Rome supported the complaints against the rule of Archelaus in Judæa (A.D. 2–4; *Ant.* XVII. xi. 1; *BJ* II. vi. 1). The satires of Horace, Juvenal, and Persius show that the Jews were far from popular in Rome; while yet, partly from the attraction which foreign rites had for the superstitious, partly, no doubt (Schürer, *HJP* § 31, v.), from the more serious attraction of the fusion of a higher morality and a purer theism than were to be found elsewhere, they did not

lack very numerous adherents ('Unus multorum,' Hor. *Sat.* I. ix. 71). A temporary expulsion, A.D. 19, by Tiberius, did not long check their growing numbers and importance in the city (see, for details, Schürer, *Gemeindeverfassung*, and *HJP* § 31, i. ii.; Berliner, *Gesch. der Juden in Rom*, 1893; Sanday-Headlam, *Romans*, Introd. § 2, and authorities cited by them).

2. *Origin of Christianity in Rome.*—A movement which so profoundly stirred Judaism at its religious centre could not fail to find an early response in the Jewish community at the centre of the world's intercourse. At every great festival at Jerusalem, Roman Jews would be present (*ἐπιδημοῦντες*, Ac 2[10], *i.e. ἐν πανηγύρει*, as Demosth. *c. Mid.* p. 584). This was the case at the first Christian Pentecost. We may see in the mention of the Roman Jews of Ac 2[10] a significant hint of what may possibly have happened. 'Some who had gone forth from Rome as Jews may well have returned there as Christians' (W. H. Simcox). But we must look rather to the constant stream of movement to and fro than to the result of so momentary an impression as that of this one festival. 'It would take more than they brought away from the Day of Pentecost to lay the foundations of a church.' The origin of the Roman Church is to be looked for in the steady though obscure circulation, kept up among the Jews as among other classes, between Rome and the provinces. Aquila and Priscilla may have been Christians before their expatriation from Rome, A.D. 51, 52. It was, at any rate, in the class to which they belonged that the seed of the vast tree of Roman Christianity was first sown and grew (see also Sanday-Headlam, p. xxvii, for details from Ro 16).

3. *Apostolic foundation of the Roman Church.*—There is no need to assume that any apostle first planted the gospel in Rome, nor do the facts permit the supposition. St. Paul is not, in writing to the Romans (15[20]), building upon the foundation laid by another. He is, on the contrary, discharging an unfulfilled portion of his mission as Apostle to the Gentiles (11[13] 1[6. 14]). The Roman Church, then, had hitherto lacked apostolic leadership and, so far as our Epistle informs us, organization on any permanent basis (see below, § vi. 5, and art. 1 CORINTHIANS, vol. i. p. 490). It is true that early tradition ascribes the foundation of the Roman Church to St. Peter, and a less ancient but still somewhat early tradition ascribes to that apostle a twenty-five years' episcopate of the Roman Church. The highly contentious character of the questions here at issue, their extraordinary complexity, and their secondary bearing upon our main subject, forbid anything but the slenderest discussion of them in this article. But it may be said, with reference to the first-named tradition, that the earliest testimony on the subject ascribes the foundation of the Roman Church to St. Peter and St. Paul *jointly*; it is 'Petro-Pauline,' *i.e.* ascribes nothing to St. Peter which it does not equally ascribe to St. Paul. Moreover, it hinges primarily on the *martyrdom* of the two apostles at Rome. Clement, writing soon after 95 (5[4ff.]), couples the death of the two apostles in a context suggestive of martyrdom; he does not expressly locate their death at Rome, but speaks of it as if it were within the direct knowledge of those on whose behalf he is writing. Ignatius (*ad Rom.* iv. 3) is less explicit; he suggests that the two apostles had given instructions to the Roman Christians. His language exemplifies the habitual association of the two names. This is stronger still in Dionys. Cor. (in Eus. *HE* II. xxv. 8); he makes the two plant the Church of *Corinth* as well as that of Rome. Irenæus (and perhaps Hegesippus, *ap.* Eus. *HE* IV. xxii.) knows that the Roman Church claims the two apostles as its founders. Tertullian (*Præscr.* 36) speaks of the two apostles as having 'poured into that Church all their doctrine along with their blood.' His Roman contemporary, Caius, knows the *τρόπαια* of the two apostles on the Vatican and by the Appian Way. We must notice, lastly, the interesting statement in the *Prædicatio Pauli*, quoted by pseudo-Cyprian (*De rebapt.*, Hartel, vol. iii. p. 90), that after long separation the two apostles met and suffered together in Rome. It is a very improbable suggestion of Lipsius, that this stream of tradition owes its origin to the attempt to harmonize the relations of the two apostles, and that it presupposes the Clementine tradition in which the anti-Pauline tradition of SIMON MAGUS at Rome was incorporated. This latter tradition is closely connected with the tradition which ascribes to St. Peter a *special* connexion with the Roman Church, *i.e.* as distinct from St. Paul. Whether it is possible to separate them, so as to exhibit the story of St. Peter's twenty-five years' episcopate, without any dependence on the legend which brings Simon Magus to Rome (which in turn seems wholly due to a well-known mistake of Justin, see *Dict. Chr. Biog.* art. 'Simon Magus'), is a most intricate question. An inadequate discussion of it would be worthless, an adequate discussion would transgress the proportions of this article. Suffice it, then, to say that the question of importance for our purpose is whether St. Peter can be credibly held to have come to Rome as early as the reign of Claudius (41–54). There are two possible sources for this supposition. The one is the statement of Justin, that Simon came to Rome in this reign. But, apart from the mistake upon which Justin founded this statement, neither Justin, nor Irenæus, nor Tertullian after him, know anything of the Roman conflict of Simon with St. Peter. The other source is the idea that St. Peter, on leaving Jerusalem (Ac 12[17]), came to Rome shortly before the death of Herod Agrippa I. (*i.e.* about A.D. 42); the Lord having (*as inferred from that text*) commanded the apostles to remain twelve years in Jerusalem. Neither of these alternatives proves any foundation in fact for so early a visit of St. Peter to Rome.

On the whole, we conclude that the Petro-Pauline tradition is the only one which goes back to the 1st cent., that it is presupposed by the tradition of the Roman conflict between St. Peter and Simon, and by the tradition of St. Peter's twenty-five years' episcopate, and that its foundation in fact is the martyrdom of both apostles at Rome. This was the 'foundation' of the Roman Church in the sense in which the 'foundation-stone' of a building is often laid after the actual foundations have been long in progress. The two apostles 'consolidated the Church with their blood.' There is therefore no primitive tradition which brings St. Peter to Rome before St. Paul, or any long time before the usually accepted date of his martyrdom. (See Lipsius, *Apokr. Apostelgesch.* vol. ii., and *Quellen der röm. Petrussage*; Erbes, 'Todestage der Apostel Paul. und Pet.' in *Texte und Untersuch.* xix. 1; Lightfoot, *St. Clement*, vol. ii. p. 490 ff.; the very careful and fair discussion in Sanday-Headlam, *Intr.* § 3; and Chase in art. PETER in vol. iii. of the present work).

4. *Composition of the Body addressed by St. Paul.*—We must assume as the basis of discussion that St. Paul was not wholly ignorant of the composition and general state of the Church to which he was writing. The names and data of ch. 16, which we believe to be an original part of the Epistle (see below, § viii.), and the sureness of touch which

marks all St. Paul's references to the readers of this Epistle, are enough to carry us thus far. The Epistle, then, is certainly meant for *readers of Gentile origin*. St. Paul counts the Romans, as such, as Gentiles; see $1^{7f.}$ *ἐν οἷς ἐστε καὶ ὑμεῖς*, v.^{13} *ἐν τοῖς λοιποῖς ἔθνεσιν*, cf. $15^{15ff.}$. The readers are expressly described as Gentiles 11^{13-32}, especially *ὑμῖν λέγω τοῖς ἔθνεσιν*, while he speaks of the Jews in the third person $9^{1ff.}$ $11^{23.\,28.\,31}$. These passages are quite conclusive, and would justify a verdict if taken alone.

But there are other passages which show with equal clearness that St. Paul is contemplating *readers Jewish in their religious education and ideas.* (1) The general argument of the Epistle, levelling down the Jew, *both* under law *and* under grace, to the footing of the Gentile, is more intelligible as addressed to Christians of Jewish habits of thought. The careful discussion of Abraham's righteousness suggests a similar origin. Nor, be it observed, is there any suggestion of anti-Pauline agitators in the Roman Church to account for this line of argument (as in Galatians). Add to this the assumption of knowledge ($5^{1ff.}$) as to Adam and his heritage of death, the pains taken (3^8 6^1) to rebut the imputation of antinomianism, and to show (ch. 11) that the rejection of Israel may be but the necessary step to their eventual acceptance. (2) The dialectical form in which Jewish difficulties are carefully faced, and paradoxes especially abhorrent to the Jewish mind repelled with *μὴ γένοιτο* ($3^{1.\,3}$ 4^1 $7^{7.\,13}$ $9^{14.\,30}$ $11^{1.\,11}$, cf. Gal 2^{17}); the *προεχόμεθα* of 3^9 (cf. 4^1, and $7^{5.\,6}$ in conjunction with the expansion, vv.$^{7-25}$, also 9^{10}). (3) Here we must emphasize the express statement 7^{1-6} that the readers had lived under the Law, and in 'oldness of letter,' and that by the death of Christ they had been discharged from their allegiance to the Law. This passage was regarded by Mangold (*der R.-Brief u. s. gesch. Voraussetzungen*, 1884) as the immovable corner-stone of the Jewish-Christian character of the Roman Church. It seems to explain St. Paul's readiness throughout to make use of *Jewish* concessions ($2^{2ff.}$ $3^{2f.\,19.\,29f.}$ $4^{1ff.}$ $6^{16ff.}$) and his regard for objections natural to a Jewish mind.

In any case, there is not the smallest evidence in the Epistle that St. Paul apprehended hostility on the part of his readers (see 6^{17} 16^{17}). He writes as a Jew to Jewish, but not to inveterately prejudiced readers. The *Judaism* of the Dispersion was, in many places (*e.g.* Berœa), milder and less *pratiquant* than that of Palestine. The Jewish *Christianity* of the Diaspora may well have stood, in many cases, in an analogous relation to that of the *πτωχοὶ ἅγιοι* (Ac 21^{20c}). Evidently, the Jewish influence which had moulded the religious temper of the Roman Church was not, as in Galatia and Corinth, of a recently imported or aggressive type.

How, then, are we to combine the two classes of evidence? Partly we might explain their divergence by St. Paul's habit of treating one portion of a Church as if it represented the whole; *e.g.* at Thessalonica, Corinth, and Ephesus there were numerous Jewish Christians, but St. Paul addresses the Churches, especially the first and last named, as wholly Gentile.

But the mere assumption of a mixed composition does not quite account for the phenomena. The readers are treated by St. Paul as a homogeneous body. Even in ch. 14 the distinction between the strong and the weak is not to be simply identified with that between Gentile and Jew. The Roman community as a whole is treated as Gentile in its elements, but Jewish in its ideas and feeling. Now, a class of men corresponding to this description existed all over the Hellenistic Jewish world in the PROSELYTES, the *σεβόμενοι* of Acts, who, without as a rule accepting circumcision, frequented the synagogues, observed the moral law, worshipped the God of Israel, and were instructed in the Scriptures. It was among these, according to Acts, that the gospel everywhere made its first heathen conquests. Probably the Roman Church was no exception. If so, there would of course be, as at Corinth, etc., a nucleus of Christian Jews, and, by the time when our Epistle was written, numbers of heathen might well have become proselytes directly to the Christian body without previously passing through the intermediate stage of Jewish proselytism. Still it was the proselytes who gave the tone to the community, and they owed their all, as Christians, to the influence and training of Christian Jews. We are compelled to form hypotheses in this matter, and it is this hypothesis which best satisfies the conditions of our problem. The old Tübingen alternative of anti-Pauline Jewish, or anti-Jewish Pauline Christianity, is not imposed upon us either by the facts of history or by the internal evidence of the letter itself. (On this subject see also Hort, *Romans and Ephesians*, pp. 19–33; Beyschlag in *SK*, 1867; Schürer's art. on 'Romans' in *Encyc. Brit.*^{9}).

5. *Letter or Treatise?*—This being assumed, we may approach the question of the writer's purpose. St. Paul would not fail to see that the future of Gentile Christianity in the Roman world depended to no small extent upon the future of the Christian body in the imperial city. We accept the suggestion of Ramsay, that St. Paul had early grasped the importance of the Roman empire as a vehicle for the dissemination of the gospel. To commend his own gospel—the gospel of the Gentiles—to a community like that at Rome, was no hopeless task. To this end a *personal visit* to Rome was the obvious means, and this he had long resolved to pay (1^{11}). But a letter such as this would pave the way for a successful visit, and meanwhile it would accomplish much. Hence its reasoning conciliatory tone (12^3 $15^{5f.}$ etc.), specially characteristic of a period of reaction from a critical contest, when the apostle's own desire for peace was, moreover, finding concrete expression in the great *λογία* ($15^{25.\,30ff.}$). It was, then, no mere arbitrary choice which led St. Paul to address this, his greatest letter, to Rome. The Epistle is not a systematic treatise which might with equal appropriateness have been addressed to any Church. It has, primarily at least, in view the idiosyncrasy of the Christian community at Rome (see below, § v.).

6. *Relation to other Epistles of the group.*—Our Epistle comes at the close of a period of deep agitation, reflected in the Epp. to the Corinthians and Galatians, and summed up in 2 Co 7^5 *ἔξωθεν μάχαι, ἔσωθεν φόβοι*. Referring for details to the articles on those Epistles, it will suffice to say that many of 'the circumcision' had never in their hearts acquiesced in the recognition (Ac 15, Gal 2^3) of a Christianity emancipated from the Law, or frankly recognized the apostleship of St. Paul. At Corinth the latter question had been brought into prominence, in Galatia the former and deeper question. The Epistle to the GALATIANS stands in the closest relation to our Epistle, and its main ideas must be grasped as a preliminary to the understanding of Romans (see below, § v.). 'To the Galatians, the apostle flashes out in indignant remonstrance the first eager thoughts kindled by his zeal for the gospel, striking suddenly against a stubborn remnant of Judaism. To the Romans he writes at leisure, under no pressure of circumstances, in the face of no direct antagonism, explaining, completing, extending the teaching of the earlier Epistle, by giving it a double edge directed against Jew and Gentile alike' (Lightfoot). The agitators of Galatia had insisted upon the Law as a necessary and permanent scheme of righteousness and salvation

for mankind. Laid down by God as the condition of man's communion with Himself, it could not be set aside by any subsequent covenant. Man could only appear before God as a faithful doer of the Law. St. Paul in reply had addressed himself to two main points: (1) to prove that the Law could not, and that faith alone could, make man righteous in God's sight; (2) to show the true position of the Law in the history of God's dealings with man. Righteousness, he argues, is a free gift from God to man, and as such was accorded to Abraham on the sole condition of faith in an unconditional promise. The inheritance of this promise passes not by any earthly law of succession, but to those who resemble Abraham in his faith. The Law, being of long subsequent date to the Promise, could not be meant to affect its fulfilment. It was given for a temporary purpose, pending the fulfilment of the Promise, namely, to prepare men for the fulfilment by bringing out and making men feel their essential sinfulness and helpless inability to approach God with any claim to righteousness of their own. The righteousness which they could not earn is accorded as the fulfilment of the promise to Abraham's faith in Christ. Like the promise itself, it is unconditional, demanding nothing on our part but faith. To go back to circumcision is to abandon the attitude of faith, and to refuse to see that in Christ the Law has fulfilled its purpose, and has an end. 'Behold, I Paul say unto you, that if ye accept circumcision, Christ shall profit you nothing' (Gal 5^{2}, cf. the whole of ch. 3). This is the central thought worked out in Romans, but fortified and enlarged by a wider outlook upon history, a profound application to the principles of the moral life, and a comprehensive philosophy of the history of revelation. In this latter part of our Epistle (chs. 9–11) the school of Baur saw its principal purpose. This is a mistake. But it is essential to St. Paul's argument to show that the righteousness of faith, by excluding the Jewish 'boast,' does not involve a reversal of God's 'gifts and calling.'

iv. ARGUMENT OF THE EPISTLE, AND ANALYSIS.—The theological part of the Epistle extends from 1^{15} to the end of ch. 11. It treats successively the Theology of (1) Redemption (1^{11}–5), (2) of the Christian life (6–8), and (3) of history (9–11). The Theology of Redemption comprises two themes, summed up and contrasted in 5^{12-21}, viz. the 'wrath of God' (1^{10}–3^{20}) and the righteousness of God (3^{21}–5^{11}). The wrath of God is the correlative of man's need of redemption. 'First comes the statement that the world up to that moment had been, morally speaking, a failure' (Mozley, *Miracles*, Lect. vii., a remarkable passage on our Epistle). A moral creed was there, but not a corresponding life. Among Jews and Gentiles alike the facts are the same: 'knowledge without action.' The utmost the knowledge of right could do for man was to confound him with a sense of utter self-condemnation. And this self-condemnation was but the perception of an awfully real fact—the wrath of God revealed in all its fearful intensity, not only upon the careless Gentile, but upon the privileged Jew, whose privilege (none the less real because of his apostasy, 3^{1-8}) only heightened his personal guilt. But God's dealings with men, His self-revealed character, had not only led men to fear His holiness, but had also from the first led men to look upon Him as a Saviour. His long series of mercies to His people had led them to look forward to something in the future, some deliverance more final, more complete, more marvellous, than His mighty works of old. God was pledged to redeem, and God was righteous (see below, § vi. (1)). The OT revelation had led men to hold to the righteousness of God as containing the promise of salvation; the gospel declares it as an accomplished fact. And the universality of the wrath of God before Christ only brings out that redemption, when it came, was the sole outcome of the righteousness of God, and not in any degree the achievement of man. God's *righteousness* has as its correlative the *fact* of Redemption. The redeeming work of Christ, then, wherein God appears as 'righteous and making righteous' (3^{26}), humbles man even more completely than did the antecedent revelation of wrath—their boast is shut out, not (only) by a law of works, but (even more completely) by a law of faith. The privilege of the Israelite has no place in the sight of God.

And this strange result, so far from revoking the word of God in the OT, is really its fulfilment. This gospel of faith, this levelling of privilege, was preached before the Law, before any characteristic institute of Judaism was ordained. The whole story of Abraham—the boasted father of Jewish privilege—makes this clear (ch. 4). 'Well, then, my readers,' the apostle concludes, 'let us all make this gift of God our own' (see Beet on ἔχωμεν, 5^{1}). Peace with God is ours, founded on the certainty of God's love for us—a certainty created in our hearts by the Spirit of God Himself, but no mere subjective certainty; for actual recorded fact speaks plainly to us of that love—a love transcending all probable limits of human devotion. We can trust God to complete what He has begun, and live in joyful hope, however the appearances of life are against us.

True, the experience of history, so far, has been that of a world-wide heritage of death and sin. But the act of weakness which bequeathed that heritage to man has now been superseded by an act of Divine power fraught with the promise of Righteousness and Life to all who receive the abundance of its grace (5^{12-19}).

In this great twofold division of human history, how subordinate a part was played by Law! It forms the last episode of the heritage of death, aggravating the disease in order to intensify man's want of the Remedy (5^{20}).

St. Paul has done half his work, and what he has done is 'more than half of the whole.' He has shown that the wall of sin no longer shuts out the soul from God, that access to God is ours, that the Christian Life is made possible.

But it remains for him to place the Christian Life itself before our eyes, and this he does in the second great section. And, first of all, he takes it in the concrete (ch. 6). The twofold question, 'Shall we sin?' (vv.$^{1-15}$) at first sight answers itself—no one would say that the Christian is to sin. But the weight of the question really turns on the *reason why*? These chapters (6–8) give us the fundamental principles of Christian ethics. And, first of all, he shows us that 'the grace wherein we stand,' which he has hitherto viewed negatively as Justification, *i.e.* Forgiveness of sin, is on its positive side union with Christ. If we were united to Him by Baptism, the rite resembling His Death, we shall further be united with Him by something corresponding to His Resurrection, viz. a new vital energy—*καινότητι ζωῆς*; only, we must realize this—allow the new life of Christ to wield our limbs. For we are no longer under an external compulsion, but instinct with an indwelling Force—'not under law, but under grace.'

Our obedience to the will of God will be not *less* complete for this reason,—but *far more*. 'If,' he continues, 'you seem to take what I have said as a paradox, I will make my meaning plain by an unworthy metaphor. You have to choose between slavery and slavery—nay, you have made your choice—you have renounced slavery to sin. Well, then, you are slaves of righteousness, slaves of

God: you cannot, if you look back on the past, repent your choice. You are dead in Christ, and when a person dies, he passes out of the control of law. You then, in dying with Christ, died to the law, and are alive to Christ alone' (6^{15}–7^{4}).

St. Paul passes from the concrete picture of the Christian life to the consideration of the forces which are at work in it (7^{5}–8). He employs the method of difference, comparing the pre-Christian life *at its very best*, *i.e.* as lived under Divine law, with the Christian life; the old life under the letter with the new life in the Spirit. This contrast is tersely stated in $7^{5.\,6}$, then life under law is characterized in $7^{7\text{-}25}$, and life in the Spirit in ch. 8. In $8^{12\text{f.}}$ the question asked in 6^{1}, so far as it needs an explicit answer, is formally answered.

The connexion of 9–11 with the general argument of the Epistle may be best seen if we consider how they are anticipated in $3^{1\text{-}8}$. That this is so can be readily proved. The Rejection of Israel, then, was a fact which apparently collided with the main thought of the first section—the Righteousness of God. The Righteousness of God was apparently, to St. Paul, above all God's consistency with, or truth to, His revealed character and purpose. And the absolute levelling of Jew and Gentile—especially the *levelling down* of the Jew to the position of the Gentile as the object of God's wrath—had the look of a revocation of express promise, the going back upon God's own covenant. Was, then, God a 'covenant-breaker'?—*μὴ γένοιτο*. Yet to St. Paul the difficulty was a very real one, and had to be explained. His fundamental explanation is found in $9^{6\text{-}29}$ and $11^{1\text{-}10}$—viz. that the proper party to the Divine covenant, the true heir to the Promises, is not Israel after the flesh, but the believing few—or, rather, all who by their faith prove themselves true sons and heirs of Abraham (see ch. 4), and that this has been made plain by God all along. But there is the equally important thought that the calling in of all nations—without which the Divine promises from Abraham downwards would not be satisfied, nor the Truth of God really maintained—would have been impossible but for the rejection of the Jews. 'By their fall, salvation had come to the Gentiles,' their *un*-righteousness had *established* the Righteousness of God (3^{5}). This is the great paradox of the third section. Still, even with St. Paul, *τὸ συγγενές τοι δεινόν, ἤ θ' ὁμιλία*, blood is thicker than water, and he will not surrender the hope of the ultimate conversion of the apostate people, consecrated as they are by the root whence they had sprung ($11^{11\text{-}32}$).

The argument therefore falls into the following tabular scheme:—

- I. Epistolary Introduction, $1^{1\text{-}15}$.
  - A. *THE SALUTATION* ($^{1\text{-}7}$).—α. The writer, his gospel and apostleship ($^{1\text{-}6}$); β. the readers (^{7a}); γ. the greeting (^{7b}).
  - B. *THE ROMANS, AND THE APOSTLE'S DESIRE TO PREACH TO THEM* ($^{8\text{-}15}$).
- II. Doctrinal Part (1^{16}–11).
  - A. *THEOLOGY OF SALVATION* (1^{16}–8).
    - a. *Theology of Redemption* (1^{16}–5).
      - Preamble ($1^{16.\,17}$).
      - (1) The Wrath of God (1^{18}–3^{20}).
        - All, Gentiles ($1^{19\text{-}32}$) and Jews (2^{1}–3^{8}), alike ($3^{9\text{-}20}$) under the wrath of God against sin, and in need of redemption; ($2^{1\text{-}16}$ lay down a general principle, preparing for the direct attack ($^{17\text{-}29}$) upon Jewish self-esteem).
      - (2) The Righteousness of God (bringing redemption to all) (3^{21}–5^{21}).
        - α. The fact of Redemption ($3^{21\text{-}26}$) (vv.$^{25\text{-}26}$. *Significance of the Death of Christ*).
        - β. All men on an equality in view of this fact ($3^{27\text{-}30}$).
        - γ. The Righteousness of Faith older than that of Law (3^{31}–4^{25}).
        - δ. The Righteousness of Faith the basis of Certitude and Hope ($5^{1\text{-}11}$).
        - ε. Conclusion. The work of Christ in contrast with the failure of Adam ($5^{12\text{-}21}$).
    - b. *Theology of the Christian Life* (6^{1}–8^{39}).
      - (1) Synthetic treatment. The Christian and the pre-Christian life contrasted as—
        - α. Life and death ($6^{1\text{-}14}$).
        - β. Sin and righteousness ($6^{15\text{-}23}$).
        - γ. Law and grace (or letter and Spirit) (6^{14} $7^{1\text{-}6}$).
      - (2) Analytic treatment ($7^{5\text{-}25}$): the factors (or psychology) of the Christian life.
        - α. Under Law: flesh, will, intellect ($7^{5.\,7\text{-}25}$).
        - β. Under Grace: spirit, and the Spirit of God (7^{6} 8).
        - The Spirit of Sonship in Christ creates in us { Obedience to God's Will ($8^{1\text{-}17}$). Certitude and Hope ($8^{18\text{-}39}$).
  - B. *THEOLOGY OF HISTORY* (9–11; cf. $3^{1\text{-}8}$).
    - (The character of God as shown in the history of the People of God).
    - The problem of the rejection of Israel ($9^{1\text{-}5}$) considered in relation to—
      - a. *The Past* (the promise of God) ($9^{6\text{-}29}$).
        - (1) The promise to Israel was never, from the first, tied to fleshly descent ($^{7\text{-}13}$), but freedom was expressly reserved to God ($^{14\text{-}18}$).
        - (2) This freedom vindicated—α. *a priori* ($^{19\text{-}21}$), and β. *a posteriori* ($^{22\text{-}24}$); what has happened is the fulfilment of God's word in prophecy ($^{25\text{-}29}$).
      - b. *The Present* (9^{29}–10^{21}), the responsibility of the rejected.
        - (1) The actual error of Israel (9^{30}–10^{3}).
        - (2) Their error analyzed and defined ($10^{3\text{-}13}$).
        - (3) Its inexcusable nature shown ($10^{13\text{-}21}$).
      - c. *The Future* ($11^{1\text{-}36}$). The Rejection of Israel.
        - (1) Only partial ($11^{1\text{-}10}$).
        - (2) Only temporary ($11^{11\text{-}32}$).
      - *Doxology*, closing part II. B. and the doctrinal portion of the Epistle ($11^{33\text{-}36}$).
- III. Practical Part.
  - A. *GENERAL SOCIAL AND MORAL DUTIES* (12. 13).
    - a. *Practical Christian Conduct* ($12^{1\text{-}21}$).
    - b. *The Christian and the Civil Power* ($13^{1\text{-}7}$).
    - c. *The Law of Love* ($13^{8\text{-}10}$).
    - d. *The Approach of the Day* ($13^{11\text{-}14}$).
  - B. *MUTUAL DUTIES OF SECTIONS IN THE CHURCH* (14^{1}–15^{13}).
    - a. *The Strong and the Weak* ($14^{1\text{-}23}$).
    - b. *Gentiles and Jews* ($15^{1\text{-}13}$).
- IV. Epistolary Conclusion (15^{14}–16^{27}).

v. Importance of the Epistle.—It is evident that we have here, not exactly a systematic treatise on Christian doctrine, but a letter, held together in all its parts by a central idea, the working out of which in its presuppositions and applications is the essential purpose of the whole. This central idea is to be sought for in connexion with what the apostle calls (2^{16} 16^{25}) 'my gospel' (cf. $1^{1\text{-}6}$). This expression, understood in the light of Gal 2^{7}, points to more than a mere subdivision of labour between the apostles. Not merely the well-being, but the very existence of non-Jewish Christianity depended upon the gospel specially entrusted to St. Paul (compare Ph 2^{16} with Gal 2^{2c}). The gospel of the uncircumcision, St. Paul's gospel (Ro 16^{25}, Eph $3^{3.\,6.\,7}$), meant the levelling of Jewish privilege and self-righteousness (Ro 10^{3} 3^{30}), and this rested upon the principle of *faith* as the sole ground of righteousness in the sight of God ($3^{27.\,28}$ read *γάρ*, 4^{16} etc.).

If this view is correct,—and it seems to follow directly from St. Paul's own language,—it at once places Romans in a fundamental position among our materials for a Pauline theology, and marks the earlier chapters as fundamental in comparison with the rest of the Epistle. To take the latter point first: it was a too external view of the Epistle which led Baur to see its primary purpose in the subject of chs. 9–11. Near to the apostle's heart ($9^{1ff.}$) as that subject was, it belongs to the historical application of the fundamental idea of the Epistle rather than to the fibre and substance of that idea itself. The ideal relation between God and man holds good prior to any particular course which in God's providence the religious history of the world may have followed. Had the Jews never enjoyed the position of a chosen people, the fundamental facts of human nature in relation to God would have been the same. The Law came in as a secondary factor (3^{20}), and the historical relations of Jew and Gentile, the apostasy of the Jews, belong to the sphere not of eternal realities, but of the contingent. Therefore the first eight chapters accomplish St. Paul's primary purpose; the next three round off his fundamental thought by vindicating it in the light of religious history. And of the first eight chapters, clearly those (6–8) which deal with the principles of the Christian life presuppose and are governed by those which treat of man's fundamental relation to God (1–5). These chapters, then, which are directed to convincing all Christians, especially those of Jewish habits of thought, that man cannot become righteous by means of law, but only by faith, are the central portion of the Epistle, and it is there that its main purpose is to be found. St. Paul's main purpose was, then, to commend 'his gospel,' the principle of the righteousness of faith, to the Christians of Rome. But if so, it is a letter, not a treatise in the full sense of the word. So far from being meant as a compendium of Christian doctrine, it is not written with special reference to what was common to St. Paul and the older apostles (1 Co 15^{11}). This the Romans already know, and it is taken for granted (16^{17} 6^{17}). The apostle writes not to controvert, nor even to reconstruct *de novo*, but to complete (1^{11}). St. Paul's gospel was but the explicit formulation of what was implied in the gospel as preached by all, and from the first. If Christ, as all taught and all believed, had died not in vain, then righteousness did not come through Law (cf. Gal 2^{21}). It need not, then, surprise us that the enunciation *ex professo* of the specifically Pauline doctrines is almost confined to the Epistles of this group. In the earlier Epistles to the Thessalonians, St. Paul is at a simpler stage of his teaching. To the recent converts of Macedonia, temperance, righteousness, and the judgment that was to come (Ac 24^{25}) supply the natural heads of instruction. In Philippians we catch the last echoes of the great controversy; in Ephesians, Colossians, Philemon, and still more in Timothy and Titus, new circumstances call forth different categories of doctrine. But throughout, the principles of Romans and Galatians are presupposed and are fundamental. Lastly, as compared with Galatians itself, our Epistle is primary. Galatians (see above, § iii. 6) is addressed at a special psychological moment. Its argument from the priority in time of the covenant of faith reappears, identical in substance, but in more extended elaboration, in Ro 4. But the eternal principle which underlies this historical argument is worked out in Romans with a wider outlook and a deeper foundation in human nature. The Gentile world is included in the arraignment of human helplessness before God. The history is carried back from Abraham to Adam; the justification of man is put into relation with the righteousness of God, the inability (8^{3}) of the Law to save is grounded upon a searching psychological analysis of its exact effect (Ro $7^{5ff.}$, cf. Gal 3^{19}), and the contrasted moral renovation effected by the Spirit (Gal $5^{16ff.}$) is described at length and put into relation with a comprehensive and sublime view of the meaning and destiny of creation. No doubt, the root-ideas of Romans are those of Galatians; but in the latter Epistle St. Paul is dealing with the controversy of the hour, in Romans he is dealing with human nature itself, and with the fundamental and universal relations of man as man to God as God, as conditioned by the central fact of history—the Person and work of Christ. Our Epistle, then, is the ripe fruit of St. Paul's distinctive mission as a master-builder (1 Co 3^{10}) in the formation of the Church. In chs. 1–5, where he speaks as a Jew to Jews, we see Judaism *led out of itself* by the gospel, but by its own methods and from its own premises. This is a re-statement, but on a broader basis, of the position of Galatians. Then in chs. 6–8, speaking as a Christian to Christians, he brings out the contrast between law (and flesh) and grace (and spirit) as the respective spheres of the old and the new life. Here the Jewish point of view, its legalism and nationalism, are left far behind, and the ethical categories of the OT (even in their truest significance) have given place to those of the New (compare the deepened sense of the terms 'spirit' and 'flesh,' below, § vi.), the obedience of slaves to that of sons, the natural man to the spiritual; propitiation for sin issues in the destruction of its power ($8^{1ff.}$), the satisfaction of Law by Christ in its supersession as a factor in the spiritual life.

vi. THEOLOGY AND CHARACTERISTIC IDEAS.—An article like the present neither requires nor permits a full discussion of these; but it would be incomplete without a brief enumeration of the principal characteristic conceptions of the Epistle.

1. For his *conception of God*, St. Paul is dependent on the Old Testament. In other words, he does not so much analyze the idea of God as the absolute or perfect Being, as insist upon the character of God as it has entered into human experience in the course of God's dealings with men. This has been the case in two main ways. On the one hand, God has revealed Himself to man through nature ($1^{20ff.}$) and conscience ($2^{14f.}$). 'His eternal power and divineness' and the doom due to sin are made known to man apart from direct revelation, and moral apostasy is therefore without excuse. On the other hand, the will (2^{18}) and character of God have been specially revealed, and Divine promises have been given, to a particular nation entrusted with His 'oracles' ($9^{1ff.}$ 3^{1}). Both Jew and Gentile, in their several ways, have the terrible knowledge, antecedent to Christ, of the *wrath of God* (1^{18}). This conception is with St. Paul primarily *eschatological* (see Sanday-Headlam, *in loc.*, and on 5^{9}), but the certainty of its unveiling in the 'day of wrath' (2^{5}) is a *present* certainty. The wrath of God in our Epistle is the category which includes the sternly retributive attitude of God towards sin, His δικαιοκρισία (2^{5}). It stands in the closest relation to the OT conception of the Divine HOLINESS (see *Expositor*, March 1899, p. 193). If the Divine wrath is an experience common to Jew and Gentile alike, the Divine RIGHTEOUSNESS (see the two artt. on this subject) is one specifically related to *revealed* religion. This is, of course, true on the view very commonly taken of the phrase δικαιοσύνη θεοῦ in 1^{17} and other passages of the Epistle, viz. that it denotes, not an attribute of God Himself, but a righteousness which *man* derives from God as its source. This view, which has influenced the RV of 1^{17}, supplies an idea so obviously necessary to St. Paul's contrast between the false righteousness and the true (10^{3} etc.), and is in such close correspondence with his language in 2 Co 5^{21}, Ph 3^{9} etc., that it must, in some way or other, be *included* in any satisfactory explanation of the phrase in 1^{17} and cognate passages. But there is a marked tendency in many quarters to go back to the sense suggested by the parallelism

of *δύναμις θεοῦ* and *δικ. θεοῦ* in $1^{16.17}$ as the primary one, and to recognize the antithesis between the wrath of God as the 'revelation' antecedent to the gospel, and the 'righteousness of God' as the specific revelation of the gospel itself. The main objection to this is the presupposition that by God's 'righteousness' must be meant His stern retributive *justice*, *i.e.* His anger against sin. The result of an examination of the use of the conception of God's righteousness in the Old Testament is, however, adverse to this presupposition. The subject is *sub judice*, and it is beyond the province of this article to attempt to decide it (see above, § iv.; Sanday-Headlam, p. 24 ff.; *Expos.*, March 1893, p. 187 ff.; Häring, *δικ. θ. bei Paulus*, Tübingen, 1896; Beck in *Neue Jahrb. f. deutsche Theol.* 1895, p. 249 ff.; Kölbing in *SK*, 1895, p. 7 ff. Häring, p. 14 ff., tabulates the principal alternative views). There is, at any rate in this Epistle, the closest correlation between the righteousness of God and the justification of the believer in Christ (3^{26}).

A similar correlation exists between the final salvation of man and the *Glory of God*. By this expression St. Paul sometimes means the honour due to God from His creatures (1 Co 10^{31}, Ro 16^{27}); but there is a sense, specially characteristic of our Epistle, in which it denotes the supreme destiny of man, realized in the ultimate salvation of the redeemed (3^{23} 9^{23}, cf. $8^{19.21.30}$). The idea of the word *δόξα* here seems to be the positive counterpart of the more negative *ἀποκάλυψις*. The latter suggests the removal of something which hides, the former the shining forth of the thing previously hidden in all its sublime reality. Relatively, this is seen in any signal display of Divine power, *e.g.* in the resurrection of Christ (6^{4}). Absolutely, it is reserved for the consummation of all things, when the kingdom of God shall appear in its perfection, and the righteous shall shine forth in it as the sun. In this connexion the Divine PREDESTINATION must be taken into account. In 9^{23}, though the general context relates more especially to the Divine predestination of men to *function*, *i.e.* to the several parts they play in the providentially ordered course of history, there is in the immediate context unquestioned reference to those whom God has prepared for *glory* (see above), in contrast to those who are 'made ready' (it is not said 'by God Himself') for destruction. There is neither here nor elsewhere in the Epistle anything said of the 'double predestination.' But the predestination *of the saints* is clearly laid down in $8^{29.30}$. Only, in the latter passage *foreknowledge precedes predestination.* On the whole, while frankly recognizing the predestinarian language used, we must also recognize its limitations. The apostle does not appear to be giving expression to a systematized scheme of thought on the subject.

The will of God *for man's conduct* enters into man's experience in the form of *Law*. In the generic sense, the term is applicable to any authoritative principle of action normally issuing in human obedience (8^{2a}, cf. 3^{27b}, 1 Co 9^{21}). Such obedience may, however, be the response either to an enabling principle working from within (see passages just quoted, and $8^{14f.}$), or to a summons confronting man from without. In this, the characteristic sense of *νόμος* in our Epistle, law is a factor in the moral life fitted to acquaint the intellect with the Divine standard of conduct (7^{25} and previous context), but incapable (*ἀδύνατον*, 8^{3}) of bringing the life of man into harmony with its precepts. This result, due to the conditions of human nature (below, 2) is the more apparent the more fixed and definite the form in which law is promulgated. This appears to be the meaning of 'the letter' (*γράμμα*), in which the full moral effect of law is seen (7^{6}, cf. 2 Co 3^{6}, 1 Co 15^{56}, Ro 3^{19} 4^{15} 5^{20} 7^{7}, Gal 3^{19}). This was above all true of the one law which had conveyed to man in inexorable fixity and definiteness the Divine standard of action, the Jewish law, *ὁ νόμος*. The denotative force of the definite art. depends upon its context. In most cases, 'the law' in question is the Jewish law; on the other hand, the anarthrous *νόμος* may well be used of the Jewish law, either as *a* law or as representing the *principle* of law, or as a quasi-proper name (probably 7^{1}, possibly 3^{31} etc.). See, further, art. LAW (IN NT). The Christian is ideally free from 'law' as an external principle (6^{14}), but to be *ὑπὸ χάριν* is to be *ἔννομος Χριστοῦ* (1 Co 9^{21}, cf. Ro 8^{2}, see below, 2; on the whole subject, cf. Gifford, p. 41 ff.).

In connexion with the doctrine of God, we must, lastly, note the bearing of the Epistle on the theology of *the Person and Work of Christ.* Neither are treated of *ex professo.* But in $1^{4.5}$ and 9^{5} we have the contrast between what Christ was, *κατὰ σάρκα*, and His higher nature as Son of God (1^{6}) and as actually God (9^{5}). The difficulty of the former passage is in the exact interpretation of *κατὰ πνεῦμα ἁγιωσύνης* (see Gifford and Sanday-Headlam, *in loc.*). In the latter there is a still more difficult question of punctuation (see the Commentaries, also Ezra Abbot, *Critical Essays*, and Hort's critical note, *in loc.*). On the whole, the punctuation assumed just above appears distinctly the more probable. The principle, moreover, of *τέλος νόμου Χριστός* (10^{4}), and Christ as an object of Faith (1^{1} *δοῦλος Ἰησ. Χρ.*, contrast 1 Co 7^{23}), and 10^{13} which identifies Christ (by the context) with יהוה, make decisively in the same doctrinal direction. (On 8^{3} see below, 2).

On the Atonement, $3^{25.26}$ is a classical passage, but it leaves open most of the difficult questions which attend the theology of that mysterious subject. The reader must consult the admirable excursus of Sanday-Headlam on the subject, Lightfoot's notes, and the discussion of the passage in R. W. Dale, *The Atonement.* The key to the meaning is to be found in the words *ἱλαστήριον . . . ἐν τῷ αἵματι αὐτοῦ*, rather than in the *ἔνδειξις τῆς δικαιοσύνης αὐτοῦ*, which, taken by itself, would hardly compel us to go beyond the thought of punishment as a vindication of God's moral government, which by no means exhausts the significance of the Atonement. The doctrine is emphasized, but not explained, in 5^{6-10}.

2. St. Paul's *doctrine of man* is formulated in OT categories, but enlarged and deepened by his outlook upon life and history, and by his personal experience as a Jew and as a 'slave of Christ' (Ro 1^{1}). His comprehensive formula for human nature is 'flesh'—'all flesh' (cf. 1 Co 3^{4} *ἄνθρωποι = σάρκινοι*). From the time of Theodore of Mopsuestia to our own day the moral colour of St. Paul's conception of *σάρξ* has been matter of keen debate. The close relation between flesh and sin in his theology is obvious. But to make the connexion essential, is to mistake the entire meaning of the apostle. In Ro 8^{3} we have the crucial passage. What the law could not do—namely, liberate man from the law of sin—God did by sending His own Son, and in Him condemning sin 'in the flesh.' That is, sin was, by the mere fact (*πέμψας*) of the coming of Christ, shown to be a usurper in human nature. This was effected by the Son of God coming 'in the likeness of sinful flesh'—*ἐν ὁμοιώματι σαρκὸς ἁμαρτίας*. 'Sinful flesh' is the universal condition in which our common humanity draws its first breath (5^{14}). Christ did not enter into this condition, but into its 'likeness.' The *un*likeness certainly did not consist in 'the flesh' (1^{3} 9^{5}) which Christ took in reality, not in mere likeness. St. Paul could not have written *ἐν ὁμοιώματι σαρκός*. But neither did he write *ἐν σαρκὶ*

ἁμαρτίας, which he should have done had sin been to him part of the very meaning of 'flesh' (see Gifford's admirable discussion, Introd. p. 52, and *in loc.*). His language expresses with consummate accuracy the thought that Christ 'by taking our flesh made it sinless' (Tertull.), and so broke the empire over human nature usurped by sin. Flesh, in fact, has with St. Paul a physical (*σάρκινος*) and a moral (*σαρκικός*) sense. In the former sense, as long as this life lasts we are *ἐν σαρκί* (Gal 2^{20}), in the 'mortal body' (Ro 6^{12} 8^{11}). But ideally the Christian has left the flesh as the sphere of his *moral* life behind (Ro 7^{5} 8^{9}). But in the pre-Christian, and even in the imperfectly Christian life, the *σάρκινος* is inevitably *σαρκικός* (Ro 7^{14}, 1 Co $3^{1\text{ff.}}$). This is carried back by him to a historic beginning in the one sin of one man ($5^{12.\ 16\text{-}18}$), which left human nature under the reign of death and sin. Unquestionably, actual disobedience is to St. Paul far graver than passive or congenital sin. Before sin becomes a fact of experience, the individual is, comparatively speaking, 'alive' (7^{9}). But guilt in some sense is there already (5^{14}), and rebellion is there, though latent and 'dead' ($7^{8\text{b}}$), and it needs but the first shock of prohibition to 'revive' (v.^{9}). Under the most favourable conditions of enlightenment, with the law of God to guide it, and with complete mental assent to and enthusiasm for (7^{22}, cf. 2^{17}) that law, human nature experiences helpless failure and disaster. But, where the higher guidance is absent or lost, man becomes more and more lost to self-respect and moral conviction ($1^{18.\ 32}$). In a sense the heathen is, like the Jew, under law: apart from the ideal sense in which 'the Jewish law was a law for all men' (Hort, *Romans and Ephesians*, p. 25), his reason and conscience (2^{14}), if normal and healthy, tell him what is right. The 'natural virtue' of Aristotle is fully recognized by St. Paul, and it is, in fact, this *inward* moral law that is restored in Christ. But, in fact, the law of conscience condemned the Gentile as completely as the written law condemned the Jew (3^{9}), and not less so when its voice had ceased to be heard ($1^{28.\ 32}$).

3. *Sinful man does not*, according to St. Paul, *lack a higher nature.* The inward self (7^{22}) is *capable* of renewal (12^{2}), though in sore need of it. For the higher self St. Paul has the term *πνεῦμα* (1 Co 5^{5}, 2 Co 7^{1}), though in this sense he employs it sparingly, and not in our Epistle. More characteristic of Romans is the term *νοῦς*, which plays so prominent a part in the analysis ($7^{7\text{-}25}$). *Νοῦς* is an inalienable endowment of human nature, *i.e.* it belongs to the flesh (cf. Col 2^{18}), and may be involved in its bondage to sin (1^{28}, cf. Tit 1^{15}); but it is the highest endowment of the flesh, and is capable of conveying to the will the commandment of God (7^{23}); but there its power ceases—St. Paul would have accepted, so far as it goes, Aristotle's *dictum* that 'understanding alone moves nothing.' The understanding, the higher self, can indeed 'wish' what is right ($7^{15\text{ff.}}$), but its wish has no power in the face of the flesh wielded by sin—'to wish and to effect' (Ph 2^{12}) requires a vital energy (Ro 6^{4}) which human nature cannot originate.

This vital energy is the Spirit (see *καινότης* in 6^{4} 7^{6}, cf. 2 Co 5^{17}) which inhabits the body of Christ, and dwells in those who are in vital union with Him. The word *πνεῦμα* in this Epistle is used, now for the Spirit of God, now for the inward man (see above) *as renewed and energized* by union with Christ (see *Expositor*, May 1899, p. 350 ff.; Sanday-Headlam, pp. 162 ff., 199 f.). It is this living union with the crucified, risen, and glorified Christ that distinguishes the new self from the old self (*παλαιὸς ἄνθρωπος*, 6^{6}), the pre-Christian life *ἐν σαρκί, ἐν παλαιότητι γράμματος*, from the regenerate life *ἐν πνεύματι, ἐν Χριστῷ, ἐν καινότητι ζωῆς*, the obedience of sons from the obedience of slaves—slaves in mind possibly to a law of God, but practically to a law of sin (7^{25} $6^{16\text{ff.}}$). To make quite clear the perfection of the obedience implied in the new state, St. Paul employs, in $6^{16\text{ff.}}$, with an apology for doing so (v.^{19}), the term 'slavery' to describe it (cf. 1^{1}); but he proceeds to throw it aside (8^{15}) in completing his theology of the Christian life. The son and the slave differ above all in this, that the son's *interest* is centred on his father's will, that of the slave is elsewhere. This is expressed in the famous antithesis of the two *φρονήματα* (8^{6}, cf. Ph 2^{5} 3^{19}, Col 3^{2}), by which St. Paul sums up his fundamental distinction of human character. It must be noted here that the language of ch. 8 postulates the distinct Personality of the Spirit (v.$^{26\text{ff.}}$) not less clearly than that of 1 Co $2^{10\text{ff.}}$ implies His divinity. The Spirit dwells in the children of God in this life as an instalment (*ἀπαρχή*, 8^{23}, cf. *ἀρραβών* elsewhere) of the life which is theirs already (v.^{10}), but to be unveiled in its glory only with the consummation of God's kingdom over all His creatures ($8^{18\text{ff.}}$).

4. St. Paul's conviction of the *profound degradation of human nature* is thus at once deepened and relieved by his belief in its *lofty capacities and destiny.* The latter, though to be fully realized only in the life to come, are to be entered upon in this life. We have now to notice St. Paul's doctrine of the transition from the helpless, hopeless old life to the 'life and peace' of the new. Obviously, man cannot by himself cross so vast a chasm. But the 'good-news of Christ' comes to him as 'the power of God to his salvation' (1^{16}), if he believes it. Faith, then, presupposes that the Divine power to save has already been directed towards the believer; and it has as its immediate accompaniment the opening of a life in fellowship with God from which the sinner as such is excluded. In other words, by believing, the sinner is in God's sight as though his sin had not been,—he is 'justified by faith.' By justification, then, St. Paul primarily means the non-imputation—the forgiveness—of sin (he equates the two ideas, $4^{8.\ 9}$ etc.). Justification renders possible, for the first time, active righteousness (6^{18} $8^{1\text{ff.}}$) in God's sight, but it is not possible to confuse the two in one idea without destruction of St. Paul's most characteristic thought. If once it is grasped that justification means to St. Paul the removal of the impassable barrier set up between God and the soul by sin, and not the progressive assimilation of character to the filial type which springs from reconciliation as its root, and that faith is to the apostle not merely assent to doctrine as divinely revealed, but personal trust in God through Christ, it becomes easy to see how central a place the doctrine of justification by faith holds in St. Paul's system, how unreal is its supposed conflict with the severest standard of Christian obligation, or the most thankful use of divinely provided means of grace, and how profoundly it appeals to the most legitimate and elementary need of human nature, the longing for a gracious God (see Jn 6^{37}). The doctrine, taken by itself, does not offer an account of all that grace does for a man, but of how a man is *admitted* to grace. The two things are clearly distinguishable in St. Paul, though, of course, in practice they can never be separated (compare carefully Ro 8^{1} with context before and after). Faith, then, is to St. Paul the attitude of soul which never regards itself as righteous before God, but refers all to God's free gift. Its trust in God is absolute; but it has as its objective foundation certain definite facts ($5^{2.\ 6\text{ff.}}$) which become material for faith under the influence of the Spirit, who interprets to the soul the Death of Christ as the

outcome of God's love (5^{5}). Hence it is 'through faith' (3^{25}) that the Death of Christ reaches its effect in the justification of the sinner. It is this fact—even more than the inclusion of all alike under sin—that reduces all men to one level in God's sight (3^{27}). (On this subject see the articles on FAITH and JUSTIFICATION in the present work, and a most careful discussion in Sanday-Headlam, pp. 28–39; also *Expositor*, March 1899, p. 200 ff.; Ritschl, *Lehre d. Rechtfertigung*, vol. ii. ch. 4, § 36, and all important commentaries on Romans). Justifying faith, then, is not purely 'dogmatic,' because it is trust *in a Person.* Neither is it purely 'undogmatic,' because it rests upon, and includes the knowledge of, something *which that Person has done* (1 Co 15^{3}, the germ of an 'Apostles' Creed'). Lastly, justification, to St. Paul, is doubtless one act, the entrance once for all into the state of grace ($5^{1\text{f.}}$). But it remains as a root of character; its connexion with vital holiness is not that of mere succession in time, but as its organic beginning. Faith is the abiding sphere of all Christian life (Gal 2^{20}, 2 Co 13^{5}), not a passing emotion, evoked by a single great crisis and subsiding with it.

5. *Grace and the moral life.*—The act of faith is not meritorious in its character, for this would be open, equally with righteousness by works, to the objection of $4^{2\text{ff.}}$. It must come, that is, from God as its source; it not only *receives* God's free gift, but it *is* God's free gift. In other words, by excluding merit, we seem to deprive man of his responsibility. It may be questioned whether St. Paul had ever formulated in his own mind the problem of 'responsibility without merit,' which is the age-long *crux* of the doctrine of grace. Both from the consideration of justifying faith, and again from that of Divine predestination to glory (above, 1), the moral responsibility of man seems threatened, if St. Paul's principles are logically developed. But he neither develops them in this way himself, nor does he seem conscious of the need for a reconciliation of the opposed truths. That all human history is in God's hands, and that the sin of man, *e.g.* the apostasy of Israel in rejecting Christ, is used by God as a step to the fulfilment of His will for man, is insisted upon. But the fact is wholly disallowed as an extenuation of the sinner's responsibility; St. Paul repudiates with intense indignation ($3^{8\text{b}}$) the charge that his teaching encouraged any such view. 'Ch. 9 implies arguments which take away free will, ch. 10 is meaningless without the presupposition of free will' (Sanday-Headlam, p. 348). It is to be noted that St. Paul's entire case for the need of redemption (1–3^{20}) is an indictment of human sin, which loses all force if human responsibility is lost sight of. Although by 'works of law' no flesh shall be justified, yet God 'will render to each man according to his works' (2^{6}, cf. 14^{12}). The stress laid by St. Paul upon personal faith and individual renewal as the heart and mainspring of the moral life, gives to his theology of conduct a strongly individualistic character. But no one could be further from individualism in the sense in which that term is often used. The personal life of the Christian is one of *fellowship* with the saints through Christ. All the manifestations of the Christian life are conditioned by membership of a body ($12^{3\text{ff.}}$). And in critical questions of moral alternative (ch. 14) the sense of brotherhood is a safe guide. We are to ask not merely 'what does my liberty permit?' but 'how will my conduct help or hinder my brother?' We are to respect the liberty of others ($14^{4\text{-}6}$), but to be ready to subordinate our own (for the whole chapter, cf. 1 Co 8–10. 13).

An interesting application of St. Paul's general theory of conduct is the attitude inculcated by him towards the civil power ($13^{1\text{-}7}$). In a word, his spirit is that of good citizenship, idealizing the magistrate as 'the minister of God.' This position, natural to a born 'Roman' (Ac 22^{28}), is very much in advance of the general spirit of the apostle's compatriots, and decidedly in contrast with that of the Apocalypse. This is partly to be explained by the circumstances. When St. Paul wrote, Imperial Rome was not yet 'drunk with the blood of the saints'; on the contrary, the imperial officials had more than once protected him against Jewish fanaticism.

6. *The Church and its institutions.*—The Roman community does not seem as yet to possess a permanent organization of 'bishops' and deacons (see Sanday-Headlam, Introd. § 3 (3)). The list of ministries ($12^{7\text{ff.}}$) must be compared with others of the same kind (see the table in art. 1 CORINTHIANS, vol. i. p. 490). The *προϊστάμενος* can hardly be a permanent officer; he comes too low on the list, and is apparently on a line with the *κυβερνήσεις* of 1 Cor. There is evidence (16^{5}) that the houses of different members of the community formed scattered centres for the worshippers of the household or neighbourhood (see Sanday-Headlam, *in loc.*). Of the *sacraments*, the Eucharist is not mentioned; but upon Baptism great stress is laid ($6^{1\text{-}5}$). To St. Paul's readers, to believe and to be baptized were, probably in all cases, coincident in time. Faith issued in baptism as its concrete expression and correlative. Baptism was the external means of union with Christ, the closing of the door upon the old and lower self, the opening of the new life of grace. It does not occur to St. Paul to put faith and baptism in any sort of rivalry. Faith in Christ would involve the desire to join His body by His appointed means. In all probability, the reference to faith and its confession in $10^{9\text{f.}}$ is associated with the thought of baptism.

vii. MATERIALS FOR PERSONAL HISTORY OF ST. PAUL.—The Epistle is far less rich than those to the Corinthians and Galatians in details as to St. Paul's personal history. His long-standing desire to see Rome is mentioned in ch. 1 and in 15^{22}; the puzzling reference to his having preached *μέχρι τοῦ Ἰλλυρικοῦ* in 15^{19} (see art. 2 CORINTHIANS, vol. i. p. 495), if the words do not compel us to suppose that he had actually entered Illyricum, would be satisfied by his visit to Berœa, the last important place in Macedonia (Ac 17^{10}). His further intention to visit Spain (15^{24}) is a fact of great interest, as also is his apprehension as to his coming visit to Jerusalem with the *λογία* (vv.$^{25\text{-}33}$). The names in ch. 16 contain those of many friends of the apostle otherwise unknown to us, including his kinsmen Andronicus and Junias, Jason and Sosipater. In Tertius we have the only certain name of an amanuensis employed by the apostle. His reference to miracles worked by himself (15^{19}) should not be overlooked (cf. 2 Co 12^{12}).

Of deeper interest, though open to more doubt, is the personal bearing of the passage $7^{7\text{-}25}$. It is impossible to regard the passage as a mere *μετασχηματισμός*, describing the phenomena in the first person merely for the sake of vividness. The *ἐγώ* is too emphatic, too repeated, the feeling too deep, for a purely impersonal statement. On the other hand, the passage is universal in its reference, and supplies the argument with an indispensable piece of analysis. We may regard it as St. Paul's account, based upon reflexion as well as on experience, of the utmost that law can do for human nature. And if so, we may use it in order to understand how St. Paul may well have come to realize, even before his conversion, that *if* the preaching of the apostles (cf. 1 Co $15^{11.\,3}$) was true, *if* Christ had died 'not in vain' (Gal 2^{21}), then righteousness *did not* come by the law. It enables us to realize something of the 'kicking against the goads,' which, as we know, had preceded the scene on the road to Damascus.

viii. TRANSMISSION OF THE TEXT. INTEGRITY.—The text of our Epistle comes to us through much the same lines of transmission as that of 1 Cor. (which see). It is contained in the Peshiṭta, Old Lat., Copt., and other oldest versions of the NT, as well as in the principal Gr. MSS. Of the latter it is complete in ℵABLS (the last uncollated). C lacks 2^{5}–3^{21}, 9^{6}–10^{15}, 11^{31}–13^{10}. D$^{\mathrm{paul}}$ lacks 1^{1-7}, 1^{27-30} are supplied by a somewhat later hand (also 1^{24-27} in the Lat.); E$^{\mathrm{paul}}$ (copy of D) has these passages, but lacks 8^{21-33}, 11^{15-25}. F$^{\mathrm{paul}}$, a copy of G, is lacking in 1^{1}–3^{19}. G$^{\mathrm{paul}}$ lacks 1^{1} *ἀφωρισμ.–πίστεως* 1^{5}, also 2^{16-25}. K contains the Epistle only to 10^{17}. P lacks 2^{15}–3^{5}, 8^{33}–9^{11}, 11^{22}–12^{1}. ב contains only 13^{4}–15^{9}. (On the cursives, and on the authorities for the Old Lat., what was said on 1 Cor. may be repeated, with a further reference to Sanday-Headlam, p. lxv).

Of textual phenomena we must notice the omission in G g, supported by a note in the Bodleian cursive 47, of the words ἐν Ῥώμῃ, $1^{7.15}$. The omission tempts a comparison with the omission, by important authorities, of the analogous words in the address of EPHESIANS. But in this case there can be no question that the words ἐν Ῥώμῃ are original. The omission may, however, be due, as may also be the case with Ephesians, to the early circulation of our Epistle among other Churches with the omission of the definite references to Rome. This might be connected with the omission, in some early authorities, of chs. 15. 16 (see below). But this connexion would be much more certain if the authorities for the omission of ἐν Ῥώμῃ and of chs. 15. 16 were identical. This is not the case.

A more difficult question is that of the place of the doxology (16^{25-27}). L and many cursives, with some other ancient authorities, place it at the end of ch. 14; AP and a few authorities repeat it at the end of 16; FG g Marcion omit it wholly, but G leaves a blank space at the end of ch. 14. (On D see Sanday-Headlam, p. lxxxix). But ℵBCDE, some cursives, and most Western authorities, place it after 16 *only*. This is probably the earliest position; its omission by Marcion may be the source of all the variations, although, if there were good grounds for thinking that St. Paul himself issued two recensions of the Epistle, the resemblance of the language of the doxology to that of the captivity group of Epp. (on which, however, see Hort in Lightf. *Bibl. Essays*, p. 327) might warrant us in ascribing the doxology to his second recension. But here, again, the hypothesis in question is inadequately founded. It should be noted that G g, which omit ἐν Ῥώμῃ, should, on this supposition, *insert* the doxology, which they, on the contrary, omit.

A far more complex question is raised by the omission, in some indirect but ancient witnesses to the text, of chs. 15. 16. These witnesses consist of (1) Marcion, as quoted by Orig.$^{\mathrm{lat}}$ supported by the language of Tertull. *adv. Marc.* v. 14. (2) The absence of quotations in Tert., Iren., Cyprian. (3) The capitulation in certain MSS of the Vulgate. (4) The fact that ALP, etc. (see above), place the doxology at the end of 14. Of these, number (2) is inconclusive as a mere argument from silence. The others require explanation. A further argument from the repeated benediction $16^{20.24}$ (TR) is shown by Sanday-Headlam to rest on no solid foundation. How, then, are we to explain the facts? The supposition that chs. 15. 16 are spurious (Baur) cannot stand in face of the close connexion between chs. 14 and 15^{1-13}, a governing fact in the whole question. The chapters are omitted by no known MS, nor does the theory of their *partial* spuriousness (Lucht), *i.e.* of interpolations, find any support in the textual material. The supposition that our chapters are a combination of the endings of recensions of the Epistle addressed to several different Churches, 1–14 (or 1–11) being the part common to all recensions (Renan), offends against the governing fact mentioned above, and depends, moreover, upon an erroneous view (see above) of $16^{20.24}$. A plausible, but in reality equally untenable, modification of this view is that 16^{1-21}, or 16^{3-21}, or $^{3-16}$, originally formed part of a letter addressed to Ephesus, and became afterwards incorporated in our Epistle (first suggested in 1767 by Keggermann, substantially adopted by Ewald, Mangold, Reuss, Lucht, Holsten, Lipsius, Weiss, Weizsäcker, Farrar, etc.). Aquila and Priscilla, it is true, were last heard of in Ephesus (1 Co 16^{19}), and are there later (2 Ti 4^{19}); Epænetus is the 'first-fruits of Asia' (RV); and St. Paul must have had many friends in Ephesus, while he had never seen Rome. But the hypothesis does not account for the facts; on the contrary, it leaves ch. 15 wholly untouched. Again, considering the constant going and coming between Rome and the provinces, it would be very surprising that St. Paul should not have many acquaintances in Rome. Moreover, there is good inscriptional and other evidence connecting many of the names with Rome, and indeed with Roman Christians. (See Sanday-Headlam, notes on ch. 16). This is specially true of the households of ARISTOBULUS and NARCISSUS, of AMPLIATUS and of NEREUS (see the articles on these names). On the whole, with all deference to the distinguished scholars who have represented it, our conclusion must be that the case for transferring this section, without any textual ground, from its actual connexion to a lost Epistle to Ephesus, is not made out.

To return, then, to the general question of chs. 15. 16, and to the heads of evidence (1), (3), and (4), the questions to be considered are, *firstly*, What were Marcion's grounds for omitting the chapters? and, *secondly*, Does the fact that he did so sufficiently explain (3) and (4)? If Marcion omitted the chapters on grounds *of tradition*, the second question need not be asked, for a tradition older than Marcion would doubtless leave other traces; but if his omission was purely arbitrary, the question of his probable influence becomes important. That Marcion's text had considerable circulation and some influence in the West may be allowed. But this is hardly adequate as a hypothesis by itself to account for the facts; it does not march without a stick. The extra support required is furnished by the *assumption* that the text was adapted for Church use in certain localities by omitting the personal and less edifying conclusion. The existence of a known text—Marcion's—which lacked chs. 15. 16, *suggested* the adoption of 14^{23} as the close of the shortened Epistle, and accordingly the doxology, which it was desired to retain, was added at that point. The answer to our second question, then, may be put thus: *Given* a demand for an edition of our Epistle with the closing section, excepting the doxology, omitted, the influence of Marcion's text was likely to suggest the exact point where the omission should begin. In other words, the heads of evidence (3) and (4)—we may perhaps add (2)—*may* be explained by (1). The *first* question, then, becomes one of probability. Was Marcion *likely* to omit the chapters on doctrinal grounds, or was he, on the other hand, *unlikely* to excise any matter without documentary authority? On this question the reader is as entitled to decide as the present writer.

The connexion between the question of chs. 15. 16 and the omission of ἐν Ῥώμῃ in $1^{7.15}$ is very obscure. Sanday-Headlam conjecture that Marcion is responsible for the latter omission also; but there is no evidence that he omitted these words. But given the demand (see above) for an 'impersonal' edition, the words may have been struck out in some copies of such an edition either with or without the support of Marcion's text. That Marcion was interested in the addresses of St. Paul's Epp. we know from the case of EPHESIANS (which see, and cf. Smith's *DB*^{2} p. 947).

LITERATURE.—On the ancient commentaries, Origen, Chrysostom, Theodoret, John Damasc., Œcumenius, Theophylact, Euthemius, Ambrosiaster, Pelagius, Hugh of St. Victor, Abelard, and Aquinas, see the excellent characterizations in Sanday-Headlam. Augustine thought profoundly over the Epistle to the Romans; his anti-Pelagian writings are in effect a commentary upon its most characteristic ideas. He began a formal commentary, but only reached the salutation (*Retract.* i. 25). Of more interest is the *Expositio quarundam quæst. in Ep. ad Rom.* (Migne, *Pat. Lat.* xxxv. 2087), which is the result of his study of the Epistle as a presbyter (about A.D. 396) with some friends. We have here the transition from his earlier views of grace and free will, etc., to his more developed and characteristic conviction, formed under the influence of his studies of St. Paul (see Reuter, *August. Studien*, p. 7 ff.). The Biblical Commentary of Cornelius a Lapide (S. J., †1637) gathers up usefully much exegetical material from ancient and mediæval Latin writers, including Augustine. On the commentaries of Colet (ed. Lupton, 1873), Luther (Preface to Melanchthon's comm. 1523), Calvin (1539, 'by far the best of the commentators of the Reformation'), Beza (1594), Estius (1614–6), Hammond (1653), Locke (1705–7), Bengel (1742), Wetstein (1751–2), see Sanday-Headlam, who also give a useful list of modern commentaries. Among the more important of these are those of Fritzsche (1836-43), Meyer (indispensable; the later German ed. by Weiss), de Wette (1836 and foll.), Olshausen, Philippi (^{2}1856 and ^{4}1896), Jowett (^{2}1869, ^{3}1894, suggestive and inexact), Vaughan (^{5}1880, scholarly and admirable in illustration, less satisfactory on connexion of thought), Bisping, Maier (Roman Catholic, as also) Klofutar (Laibach, 1880, terse and sensible), Godet (1879, ^{2}1883, admirable in general exposition and in biblical theology; among the best general commentaries), Oltramare (Geneva, 1881-2), J. A. Beet (^{5}1885, able, and always worth consulting), Otto (Glauchau, 1886), Lipsius (in *Handkommentar*, 1881, able and useful), Barmby (1890, in *Pulpit Commentary*), Moule (in *Expositor's Bible*, excellent popular exegesis, and a distinct advance on that in his *Camb. Bible for Schools*), Liddon (1893, *Explanatory Analysis*). Lightfoot's posthumous *Notes on Epistles of St. Paul* contain a precious fragment on Ro 1-7. The two volumes of Gore (1898–9) are popular, but based upon thoroughly scientific criticism and exegesis. At the head of all English commentaries, and pre-eminent among those in any language, are those of Gifford (1886, reprinted from the *Speaker's Commentary*, unrivalled for accuracy, both in scholarship and theology) and Sanday-Headlam (1895). The last named is one of the most complete and satisfactory commentaries extant on any of the books of the Bible. The present article owes more to it than to any one work on this Epistle. After it, the writer would wish to acknowledge special indebtedness to Gifford, Godet, Meyer-Weiss, and Lipsius.

The standard works on Biblical Theology should be consulted on the leading ideas of the Epistle. With specific reference to St. Paul, Baur's *Paulus* (part 2, ch. iii., which incorporates the substance of his earlier essays on the subject) should still be read, also Usteri's *P. Lehrbegriff* (^{2}1854), and Pfleiderer's highly suggestive *Paulinism.* Essays and studies on the theology of the Epistle are numerous. Among the more recent may be mentioned Headlam in *Expos. Times*, 1894, 1895; Beet in *Expos.* 1898; and some studies hy the present writer, begun in *Expos.* 1899, but not as yet completed. On chs. 9-11, Beyschlag, *die Paul. Theodicee*; Morison (1849, on ch. 9. In 1866 he published an exposition of ch. 3). The integrity of the Epistle is discussed (in addition to works cited, above, § viii.) in the earlier part of Mangold's *Römerbrief, u.s.w.*, and by Lightfoot and Hort in articles reprinted in Lightfoot's *Biblical Essays.* Hort's *Lectures on Romans and Ephesians* also deal with this and other introductory matters. The Eng. tr. of Meyer's commentary, that of Godet's *Introd. to St. Paul's Epistles* (Edinb. 1894) and the end of the Introduction on his commentary, may be referred to for additions to the above brief list. Works referred to in the body of the above article are not in all cases enumerated here.

A. ROBERTSON.

ROME.—The aim of this article is (1) to give an outline of the relations between Rome and the Jews during the period covered by the Scripture history; (2) to describe the general aspects and life of the city at the time when it was first brought into contact with Christianity; (3) to touch upon its associations with the names or writings of St. Paul, St. Peter, and St. John; and (4) with some of the minor characters mentioned in the NT.

1. The first specific mention of Rome in Jewish literature occurs incidentally in 1 Mac 1^{10}, where reference is made to 'a sinful root, Antiochus Epiphanes, son of Antiochus the king, who had been an hostage at Rome.' Political relations of a somewhat indefinite character were established by Judas Maccabæus in B.C. 161. By that date Rome had gained a position of unquestioned supremacy. The power of Carthage, which carried with it the control of the West, was broken at Zama in B.C. 202; the defeat of Antiochus at Magnesia in B.C. 190 made Rome arbiter in the East. A graphic picture of the reputation which Rome had created for itself in the East is found in 1 Mac 8^{1-16}. It ascribes to the Romans some virtues in regard to which closer experience might have modified the judgment of Judas, and contains some inaccuracies in details, but is vivid and accurate in its spirit. The valour of the Romans, the terror with which they inspired their foes, the support which they gave to their allies, their victories over Spain, over Philip and Antiochus, the constitution of the Senate, the absence of all the outward insignia of royalty, their freedom from envy and emulation, are all set forth in words of laudation. On the strength of this conviction as to Roman power and policy, Judas sent Eupolemus the son of John, and Jason the son of Eleazar, to Rome with the view of establishing friendship and a treaty of alliance (1 Mac 8^{17}). The object of Judas was to get rid of the Syrian yoke, and in accordance with its traditional policy Rome readily recognized the Jewish autonomy in order to cripple Syria; but though they mutually pledged themselves to furnish a contingent if required, and not to assist any common enemy with 'victuals, weapons, money, or ships,' the treaty seems to have led to no definite action by either party. About eighteen years later, in B.C. 143, Jonathan, the brother and successor of Judas, sent representatives to Rome to renew and confirm the former alliance (1 Mac $12^{1. 3. 4}$). In B.C. 139, Simon, the brother of Jonathan, despatched an embassy, of which Numenius was the head, to Rome, with a great shield of gold, a thousand pounds in weight (1 Mac 14^{24}). The Romans graciously received the costly gift and entered into a formal treaty with Simon. They intimated the fact of that alliance to all the powers with which they themselves were friendly, and called on them to hand over to the Jews any 'pestilent fellows,' *i.e.* any political refugees who had found an asylum with them. Details of the embassy of Numenius are given by Jos. (*Ant.* XIV. viii. 5), though by a blunder he assigns it to a later date. (For the literature on this embassy see Schürer, *HJP* I. i. 268). To this date is probably to be referred the obscure statement in Valerius Maximus (i. 3. 3), the authenticity of which is now generally acknowledged, that 'Cornelius Hispalus compelled the Jews, who had been trying to corrupt the Roman morals by the worship of Jupiter Sabazius (J″ *Ẓĕbâôth?*), to go back to their own homes.' If the reference be correct, it would appear that by some of the suite of Numenius attempts at propagandism had been successfully made (see Reinach, *Textes relatifs au Judaisme*, p. 259, note 3). Though we can point to no definite statement, it is probable that after this date many Jews found their way to Rome in pursuit of business (Grätz, *History of the Jews*, ii. 67; Berliner, *Gesch. d. Jud. in Rom*, p. 5).

After his capture of Jerusalem in B.C. 63, Pompey carried many Jewish prisoners to Rome as slaves. (See LIBERTINES). The great majority of them would seem to have been voluntarily manumitted by their masters or ransomed by their fellow-countrymen, for we find but a few years later that a strong Jewish community was in existence dwelling on the other side of the Tiber in the quarter corresponding to the Trastevere of to-day. From its proximity to the wharves it was a suitable place for the trades which were carried on by the Jews, and the Jewish community rapidly increased in numbers and influence. In his defence of Valerius Flaccus—who was accused of appropriating the gold which had been sent by the Jews in Asia Minor towards the maintenance of the temple worship at Jerus.—in the year B.C. 59, Cicero makes many allusions which show that the Jews in Rome were a party worth conciliating. He speaks of their numbers, their unity, their influence in public gatherings. He pretends that he must speak in a whisper so that only the judges may hear, on the ground that there was no lack of persons ready to stir up the Jews against him and all the best men in the State (*pro Flacco*, c. 28). The very exaggeration of the scorn which he pours on their claim to be specially favoured of heaven (*ib.* c. 69) is a testimony to their growing strength, as well as an index of the alarm which the success of their proselytizing efforts had created. Julius Cæsar, perhaps from the idea that the Jews were specially fitted to be intermediaries between the East and the West (Rosenthal in Berliner, p. 17), treated the Jews throughout the empire with great generosity; and we read without astonishment that conspicuous among the foreign races in Rome in their sorrow over the death of Cæsar were the Jews, who, for nights in succession, visited his tomb (Suet. *Divus Julius*, c. 84). By the time of Augustus the Jewish population in Rome must have numbered many thousands. According to Jos. (*Ant.* XVII. ii. 1; *BJ* II. vi. 1) more than 8000 Jews supported the embassy that came to Augustus with complaints against Archelaus. For a time no repressive measures were adopted; on the contrary, the Jews in Rome received special privileges in the form of a limited jurisdiction over their own adherents. The rulers of Palestine were often brought into close relations by friendship and alliance with members of the imperial household. Herod Agrippa I., *e.g.*, was brought up at Rome along with Drusus the son of Tiberius (Jos. *Ant.* XVIII. vi. 1). From allusions in the Roman Satirists (Juv. iii. 10–15), as well as from the evidence of the cemeteries (see Schürer), it is plain that the limitation to the Trastevere was not rigidly enforced, and soon disappeared. From a story in Jos. (*Ant.* XVIII. iii. 5) it may be gathered that the success of their proselytism, especially among women in the higher classes, was the main ground for the coercive measures that were subsequently adopted. In A.D. 19, perhaps at the instigation of Sejanus, who according to Philo (*Leg. ad Gaium*, c. 24) was bitterly hostile to the Jews, 4000 Jews were banished to Sardinia under the pretext of being sent to put down brigandage there, but not without a hope that they might be cut off by the notoriously unhealthy climate (Tac. *Ann.* ii. 85; Suet. *Tib.* 66). In the account of the embassy to Caligula in A.D. 40, we have a curious light thrown on the character of the emperor as well as on the attitude of the court to Jewish customs and beliefs (Philo, *Leg. ad Gaium*, 44–46). In A.D. 49 (or 52 according to some authorities), probably on account of the tumults created by the preaching of the gospel in the Jewish quarter (Suet. *Claud.* 25), Claudius issued an edict for the banishment of all the Jews from Rome.* Among those banished were Aquila and Priscilla, who went to Corinth, where they came into contact with St. Paul (Ac 18^{2}). But the decree of banishment was futile, for the Jews had now obtained a social and political influence that made repression difficult or impossible. 'The customs of that most accursed race,' says Seneca,—perhaps with an indirect reference to the influence of Poppæa on Nero (Jos. *Vita*, 3, *Ant.* XX. viii. 11),—'have spread to such an extent that they are kept in every land; the conquered have given laws to the conqueror' (Aug. *de Civ. Dei*, vi. 11). And yet 'we may be sure that the proud patricians, who, in their walks on the Aventine cast a glance on the other side of the river, never suspected that the future was being made ready in that mass of hovels which lay at the foot of the Janiculum' (Renan, *Hibbert Lecture*, p. 53).* The destruction of Jerusalem in A.D. 70 is commemorated in the well-known Arch of Titus on the Via Sacra. The seven-branched candlestick, the golden table, and the silver trumpets, delineated on the Arch, were themselves placed in the Temple of Peace in A.D. 75, but fell a prey to Genseric, and were landed safely at Carthage in 455. In 535 Belisarius recaptured them, took them to Constantinople, and since then they have completely disappeared. But it is fairly certain that they cannot be, as is popularly imagined, in the bed of the Tiber.

2. When Christianity was first proclaimed in the Jewish quarter, Rome with its environs had far outgrown the old walls of Servius Tullius, and contained a population probably of 1½ millions (Friedländer, i. 23; Champagny, *Les Cæsars*, iv. 347–353; Renan, p. 53. Merivale, *Hist. of the Romans*, v. 58, estimates it at 700,000). Lauded by poets and orators as 'the queen of cities,' 'the home of the gods,' 'golden Rome,' 'the epitome of the world,' Rome even at the beginning of the Christian era was impressive mainly by reason of its great extent, and not in virtue of any distinctive beauty or grandeur. The movement begun by Augustus to make Rome worthy of the majesty of the empire, led to great changes, and to the building of many palatial mansions, of ornate temples (*e.g.* the Pantheon and the Temple of Apollo), and large basilicas for the transacting of banking and law, notably the Basilica Julia in the Forum commenced by Julius and completed by Augustus. Great aqueducts are associated with the names of Agrippa and the emperor Claudius, bringing the water then as now chiefly from the hills of Alba Longa, and making possible the life that centred around the *thermæ*, corresponding very closely to the club life of our own day. To what an extent this afterwards developed may be seen from the imposing remains of the Baths of Caracalla and of Diocletian. The patrician's day was divided between the forum and the *thermæ*. The Forum was now embellished on all sides; the Triumphal Arch of Tiberius spanned the lower part of the ascent to the Capitol; the palace of the Cæsars on the Palatine, 'with gilded battlements, conspicuous far,' looked worthy of an imperial city (see Merivale, v. 18–48; Conybeare and Howson, *St. Paul*, ii. 449–454). But notwithstanding all the changes that had been effected, down even to the great fire in A.D. 64, in the reign of Nero, Rome was built on no regular plan; its streets were narrow and dirty, the houses, several storeys high, were flimsily built and often tumbling down. 'The vici,' says Merivale, 'were no better than lanes or alleys, and there were only two viæ, or paved ways, fit for the transport of heavy carriages, the Sacra and the Nova, in the central parts of the city.' (For a vivid picture of the shops and streets, see Martial, vii. 61). It was desolated by frequent fires; it was subject to earthquakes and inundations; fever, as was plainly indicated by the many altars dedicated to it, was never absent; the unhealthiness of the site manifested itself in the unhealthy pallor of the inhabitants. Yet from the vastness of its extent, the density of its crowds representative of every nationality, religion, and race, from its being the natural treasure-house of all that was valuable and curious in the empire, from its being the centre of political and intellectual life, from the elaborate amusements provided gratuitously for the inhabitants, it fascinated and drew to itself patriots as well as adventurers of all types. 'The rich man went to Rome to enjoy himself, the poor to beg; the new citizen to give his vote, the citizen who had been dispossessed to reclaim his rights.' The rhetorician from Asia, the Greek philosopher, the Chaldæan astrologer, the magician from Egypt, the begging priest of Isis, all jostled each other in the struggle for existence in the metropolis (Champagny, i. 41; Strabo, v. iii. 8). The picture of Milton (*PR* iv. 36–68) furnishes a vivid if idealized representation of Rome as it would appear to St. Paul and his fellow-travellers as they came along the Via Appia from Puteoli (Pozzuoli), and passing through the Market of Appius and the Three Taverns (both as yet unidentified) entered the city through the Porta Capena, the Dripping Gate (*Madida*) of Martial and Juvenal (long since closed, but whose position was determined by the discovery in 1584 of the first milestone of the Via Appia, and since then confirmed by the discovery of the walls of the gate). These may now be seen in the cellar of the *Osteria della Porta Capena.* All Rome is historic ground and of special interest to the student of NT times, for the places associated with the names of the apostles and their friends and converts are in many instances still to be seen, in some few cases unchanged since apostolic times. They will be treated of under the respective names.

---

* The identification of the Christians with the Jews was not the result of a mistake. They *were* Jews, and the Christians were regarded simply as a sect, certainly by outsiders, and in all probability they so regarded themselves. The time of cleavage was not yet.

* Two of the catacombs are exclusively Jewish. One was discovered by Bosio on Monte Verde, and contained many slabs with the seven-branched candlestick inscribed, and one on which the word ϹΥΝΑΓωΓ was plainly legible. The other was discovered in 1859 in the Villa Randanini on the Appian Way, about 2 miles out of Rome (see *Cimitero degli antichi Ebrei*, illustrato da Raffaele Garucci, Roma, 1862). In it the candlestick, the dove, the olive branch and the dove are the favourite emblems. Many of the inscriptions have been removed to the Lateran Museum. There is no authority for the statement, sometimes made, that the Colosseum was erected by forced Jewish labour.

3. When and by whom the gospel was first proclaimed in Rome is uncertain. As sojourners from Rome were in Jerus. on the day of Pentecost, some of them may have been among the 3000 converts (Ac $2^{10.41}$). St. Paul refers to Romans who were in Christ before him (Ro 16^7). Many of the Jews who had been banished by the edict of Claudius were brought under the influence of St. Paul, and on returning to Rome swelled the ranks of the missionaries and converts there (Ac $18^{2.3.18}$, Ro $16^{3-7.9.12}$). Prisca and Aquila should be specially noted in this connexion. In A.D. 59 (or 58), when the Ep. to the Romans was written, there was in existence a strong Church, partly composed of Jews, partly of Gentiles. St. Paul had for many years cherished a strong desire and resolution to see Rome (Ac 19^{21} 25^{11}, Ro 1^{13-16}). From the time of the Second Missionary Journey it had been quite clear to him that his mission was to the Roman Empire *qua* Empire, and all his subsequent movements are governed by this dominant idea. Hence he goes to Ephesus, the door of the East toward the West, afterwards to Rome, and we find him purposing to visit Spain, the great province of the West. There is much plausibility in the view that his purpose in appealing to Cæsar was to gain recognition for Christianity as a *religio licita* (cf. Ramsay, *St. Paul the Traveller*, p. 308); and he apparently succeeded for the time being, for after his first trial the emperor left Jews and Christians in peace.

About A.D. 61 he was brought to Rome as a prisoner. Nero had already begun to disappoint the promise of the early years of his reign, and had given way to his ungovernable savagery. For two years before his trial, St. Paul lived either in the prætorian barracks attached to the palace, or in the prætorian camp (but see p. 33^a) in the N.E. of the city,—in a place in any case where, in spite of his bonds, he was brought into contact with the freedmen and slaves who formed part of the household of Nero (Ph 1^{13} 4^{22}); or in the house of the centurion, still to be seen beneath the church of S. Maria in Via Lata, at the junction of the Via Lata and the Corso (the Via Flaminia) (see Lewin, *Life and Epistles of St. Paul*, ii. 238, 239, and Appendix (I.) for a sketch and plan of the house).

There is no evidence beyond the name for the Scuola di S. Paolo underneath the church of S. Paolo alla Regola (*i.e. arenula*, from the sand deposited by the Tiber) near the modern Ghetto, but the underground chamber is unquestionably old. Neither do we know with certainty the spot where the trial of St. Paul took place. The *Prætorium* of Ph 1^{13} 'is the whole body of persons connected with the sitting in judgment, the supreme Imperial Court, doubtless in this case the Prefect or both Prefects of the Prætorian Guard, representing the emperor in his capacity as the fountain of justice, together with the assessors and high officers of the court' (see *St. Paul the Trav.* p. 35, and cf. art. PRÆTORIUM). The Mamertin dungeon or *Tullianum*, under the church of S. Giuseppe de' Falegnami, remains as it was in apostolic days, though the stairs leading to the lower dungeon are modern. The only entrance originally was through the hole in the roof. Here St. Peter and St. Paul are said to have been immured during St. Paul's second imprisonment. The outbreak of Nero's fury, which resulted in a renewal of hostilities against the Christians, led to the numerous martyrdoms in the garden of Nero (now partly covered by St. Peter's), where, amid sufferings of fiendish ingenuity, so many disciples sealed their testimony with their blood (Tac. *Ann.* xv. 44; Suet. *Nero*, 35; Renan, *Hibbert Lecture*, 70–98; Lightfoot, *St. Clement*, ii. 26, 27). This was in A.D. 64–65. About this time, or a little later, St. Paul suffered martyrdom by execution. He was led out of the city past the Pyramid of Caius Cestius, along the Via Ostiensis, thence along the Via Laurentina, to a spot near some springs, then known as Aquæ Salviæ, now called Tre Fontane, and there, being a Roman citizen, was beheaded. This fact gives point to his words in Ph 2^8 'obedient even unto death, yea, the death of the cross,' *i.e.* to a more degrading form of death than the apostle himself would have been allowed to suffer. The site is fixed partly by an unbroken tradition and partly by local evidence. It is a wild, desolate spot, almost uninhabitable through the prevalent malaria (the Trappist monks havo of recent years redeemed it by planting eucalyptus), so that there would be everything against the invention of such a site for so important an event. This factor has very frequently to be borne in mind in judging of the likelihood or the reverse of a traditional site. Over the spot a memorial oratory was erected in the 5th cent., whose 'foundations were discovered in 1867 beneath the present church of S. Paolo alle Tre Fontane, erected in the 17th cent., together with historical inscriptions in Latin and Armenian' (Lanciani, *Pagan and Christian Rome*, p. 156). Lanciani also quotes an interesting fact confirmatory of the tradition that the apostle was beheaded under a stone pine. The Trappists were excavating in 1895 for the foundation of a water-tank behind the chapel, and found a mass of coins of Nero, together with several pine cones fossilized by age and earth pressure.

There is a continuous tradition, found first in Tertullian (*Scorp.* 15; *de Præscript.* 36) and in Caius of Rome (quoted by Eus. *HE* II. xxv. 6, 7), and repeated in varying forms by later writers, to the effect that St. Paul was buried on the Via Ostia. Says Caius: 'But I can show you the trophies of the apostles. For if you will go to the Vatican, or to the Ostian road, you will find the trophies of those who have laid the foundation of this church.' So that about the beginning of the 3rd cent. the prevalent belief in Rome was that St. Paul was buried on the Via Ostia. The translation of his body, together with that of St. Peter, to the catacomb of St. Sebastian, to the spot called Platonia, occurred later, in A.D. 258, probably owing to the Valerian persecution. This seems to dispose of the ingenious theory of Mr. A. S. Barnes (*St. Peter and his Tomb in Rome*), that the apostles were buried first of all in the catacomb, and only removed to the Vatican and the Ostian Way after the persecution of Valerian had ceased, and therefore enables us to accept the earlier and more likely theory of de Rossi. The tradition is that a certain Roman matron named Lucina, a disciple of the apostle, begged the body and buried it in her own garden on the Ostian road, at the spot now marked by the basilica of S. Paolo fuori le mura. De Rossi has conjecturally identified (and the identification is accepted by Lanciani and others) Lucina with Pomponia Græcina, the wife of Aulus Plautus, the conqueror of Britain, of whom Tacitus (*Annal.* xiii. 32) records that she was accused of 'foreign superstition,' was tried by her husband, and acquitted. Recent investigations have made it very probable tbat she was a Christian. An inscription was discovered in the cemetery of St. Callixtus, ΠΟΜΠΟΝΙΟϹ ΓΡΗΚϵΙΝΟϹ. The subsequent and varied history of the famous basilica need not be detailed here. Suffice it to say that within the walls of that most glorious fane, into which the kings of the earth poured their treasure after the fire of 1825, rests all that is mortal of the great apostle. The remains were enclosed by Constantine in a bronze sarcophagus, and Lanciani (*op. cit.* p. 157) relates that in 1891 he examined the grave so far as he then could. 'I found myself on a flat surface paved with slabs of marble, on one of which (placed negligently in a slanting direction) are engraved the words, PAVLO APOSTOLO MART. . . . This inscription belongs to the 4th cent.,' and is, it will be observed, dedicatory and not declaratory. It is possible that ere long more will be known of this tomb and of the garden in which it stood. The Italian Government is constructing a sewer from Rome to Ostia, and the excavations will include the garden of Lucina. E. Stevenson (since dead) has recorded in an article full of interest, 'Osservazioni sulla topografia della via Ostiense e sul cimitero ove fu sepolto l'apostolo S. Paolo' (*Nuovo Bullettino di Archeologia Cristiana*, Anno iii. n. 3, c. 4, 1897), all that is known about the tomb up to the time of writing, and the *Bullettino* will contain an account of any discoveries that are made during the progress of the engineering works. On the possibility of the bodies of St. Peter and St. Paul having been carried off by the Saracens in A.D. 846, see Lanciani, *Destruction of Ancient Rome*, p. 129 ff.

During his imprisonment St. Paul wrote the Ep. to Philemon, and the Epp. to the Churches in Philippi, Colossæ, and Ephesus. From Rome also was written the second Ep. to Timothy shortly before his martyrdom, in A.D. 67 (?). (For a discussion of questions connected with St. Paul's imprisonment, see PAUL, and cf. Ramsay, *Church in the Roman Empire*, and *St. Paul the Trav.*; for the constitution of the early Church at Rome, see ROMANS; cf. Lightfoot, *Philippians*^{2}, 1–27, 97–102; Hort, *Christian Ecclesia*).

The relation of *St. Peter* to Rome has been a matter of keen controversy. The general questions of St. Peter's presence and martyrdom in Rome have been fully discussed in the article PETER, and there is now an almost unanimous agreement among scholars that the apostle suffered martyrdom in the eternal city, the only point of difference being as to the date, some adhering to the earlier date, simultaneously with or shortly after the death of St. Paul, some (notably W. M. Ramsay and Swete, see *Church in Roman Empire*, p. 279; *St. Mark*, p. xviii) inclining to a later date, in the persecution of Domitian, but not later than that. What has been already said about the burial-place of St. Paul applies to that of St. Peter. His tomb in the Vatican Cemetery was well known in the days of Caius of Rome, and therefore anterior to the translation of the body to the catacomb of S. Sebastiano. This has been recently questioned in an able book (cited above) by Mr. A. S. Barnes—a work full of interest, in its later parts dealing with the site of the tomb in old and new St. Peter's, but vitiated in the earlier chapters by an insufficient review of evidence and many inaccuracies (see review by Ramsay in *Bookman*, September 1900). The site of the martyrdom is sometimes stated to have been where the obelisk now stands in the centre of the piazza; but this is inaccurate. The obelisk was moved when new St. Peter's was built, and the true site is marked by a slab with an inscription (worn, neglected, and needing renewal) to be found in the pavement of the courtyard behind the sacristy on the north side of the present basilica. The sites of the supposed parting of St. Peter and St. Paul, and of the *Domine quo vadis?* story may or may not be genuine. The chapels in both instances are modern. The archæological evidence supporting the residence of St. Peter in Rome is strong. It should be borne in mind, however, that his residence there, if proved, does not carry with it the episcopate, nor, if it did, does that involve the further claims of supremacy and infallibility. If Ramsay is right and St. Peter did not die till the last quarter of the 1st cent., there is then room (though not at the period traditionally assigned to them) for the alleged twenty-five years' residence and work in Rome. Two spots are locally connected with this tradition—the house of Prisca and the house of Pudens, on which see below.

The question as to the significance of Babylon in 1 P 5^{13} and in the Apoc. has already been discussed in a separate article. (See BABYLON IN NT, and add to the literature there given, Butcher, *The Church in Egypt*). At what date the name of Babylon came to be so used cannot be definitely determined; but it was a familiar designation in the 1st cent. of the Christian era. In 2 Es. (3^1 15^{43}), which is now usually assigned to the age of Domitian, it is so used. In the *Sibylline Oracles*, v. 158—written about A.D. 80, or earlier, in the judgment of Ewald and Hilgenfeld—we find the words—

> καὶ φλέξει πόντον τε βαθὺν καὐτὴν Βαβυλῶνα
> Ἰταλίας γαῖαν θ'.

In the Jer. Talm. (*'Aboda zara*, c. 1) there is a curious passage to the effect that, on the day when Jeroboam set up the golden calves, Remus and Romulus built two huts at Rome. The story is repeated with variations in the Midrash Rabba (on Ca 1^6), and it is said that the huts repeatedly fell down, until water brought from the Euphrates was mixed with the clay, and the huts thus made stable received the name רומי בבלון. (Cf. Otho, *Lex. Rabb.*).

The general opinion even among interpreters of opposite schools is that Babylon in the Apocalypse (14^8 16^{19} 17^5 $18^{2.10.21}$) must be understood as Rome. The reference to it as the seat of universal empire (17^{18}), as the centre of a bloody persecution (17^6), above all to the seven mountains (17^9), shows that, whether we are to give a mystical sense or not to that which is signified, Babylon stands for Rome. As the city of the seven hills, Rome is lauded by Virgil, Horace, Ovid, and Claudian; it is so represented on coins; it is so designated in the *Sibyll.* (ii. 18, etc.); in the month of December it celebrated the feast of the *Septimontium*, and, if a statement of Tertullian is to be trusted, *Septimontius* was one of its many divinities (*ad Nationes*, ii. 15).

The question of the visit of *St. John* the apostle to Rome is one that is so far wrapped in obscurity. The first mention of it is in Tertullian (*de Præs. Hær.* 36), who says: 'Ubi Apostolus Joannes posteaquam, in oleum igneum demersus, nihil passus est, in insulam relegatur.' The only other early notice of this event is found in the *Fragmenta Polycarpiana* (see Lightfoot, *Ignatius*), which is, however, both of uncertain authorship and date. The catena of which it forms a part was compiled by some writer later than Victor of Capua, 480–554 (Lightfoot, *op. cit.* iii. 420 ff.). This fragment runs thus: 'Idem ad hæc verba Christi: Calicem meum bibetis, etc. [Mt 20^{23}]. Per huiusmodi potum significat passionem, et Jacobum quidem novissimum martyrio consummandum, fratrem vero eius Joannem transiturum absque martyrio, quamvis et afflictiones plurimas et exsilia tolerarit, sed præparatam martyrio mentem Christus martyrem iudicavit. Nam apostolus Paulus, Quotidie, inquit, morior: cum impossibile sit quotidie mori hominem ea morte qua semel vita hæc finitur. Sed quoniam pro evangelio ad mortem iugiter erat præparatus, se mori quotidie sub ea significatione testatus est. Legitur et in dolio ferventis olei pro nomine Christi beatus Joannes fuisse demersus.' The traditional site on which this confession of St. John took place is outside the Porta Latina (now closed). Hence the celebration in the Calendar of S. John ante Port. Latina. The church of S. Giovanni a Porta Latina was founded by Pope Adrian I. in 772, and the adjoining circular chapel of S. Giovanni in Oleo was erected so recently as 1509. But although there are no documentary records earlier than those cited, and no evidence for the existence of a shrine on this spot earlier than the 8th cent., yet it is hardly a place likely to have been chosen unless there were some reasons (lost to us now) for the selection. It is out of the way, near nowhere, and very inaccessible even to-day. So that there is no *a priori* ground for setting aside the traditional spot. Not without interest in the same connexion is the dedication of the cathedral of Rome (*omnium Urbis et Orbis Ecclesiarum mater et caput*) from about the 6th cent., 'to Christ the Saviour, and in honour of St. John the Baptist and St. John the Evangelist.' The earlier dedication was 'to Christ the Saviour' alone. It is difficult to resist the belief that probably at the time of the Neronian persecution, and for some cause and length of time as yet unknown to us, St. John did visit the city of the seven hills, and thence, perhaps, derived his conception of Nero as the Beast from (as Renan suggests, *L'Antichrist*, p. 175) seeing the emperor 'disguised as a wild beast, and in that disguise let loose from a cage, and personating the furies of a tiger or a panther.' Cf. Suet. *Nero*, 29.

4. Connected with the Apostolic Church in Rome there were many whose names are mentioned in the NT, and with whom associations remain in the city of to-day. Chief among these are PRISCA and AQUILA (which see). Plumptre claimed for them (*Biblical Studies*, p. 415 ff.) the honour of being the real founders of the Church of Rome. But certain it is that their house (Ro 16^3) was one, if not the only one or the earliest, of the meeting-places of the primitive Church; and here St. Peter is said to have stayed, for some time at least, during his residence in Rome. The church of S. Prisca on the Aventine Hill marks the spot. The dedication to Prisca is older than the saint of the same name (Virgin and Martyr, commemorated in the Calendar on January 18th), whose body was placed there by Eutychus towards the end of the 3rd century. The original designation of the church is the *Titulus Priscæ*, and even in the 12th cent. it is known as the '*titulus beatorum Aquilæ et Priscæ*.' De Rossi has published accounts of two very remarkable discoveries made in the 18th cent. The original oratory was discovered in 1776 in a garden near the church. It was decorated with frescoes in which the symbol of the fish and the figures of the apostles were clearly discernible. No attention was paid to the discovery, and the only record of it is in 'a scrap of paper in Codex 9697 of the Bibliothèque Nationale in Paris, in which a man named Carrara speaks of having found a subterranean chapel near S. Prisca, decorated with paintings of the 4th cent. A copy of the frescoes seems to have been made at the time, but no trace of it has been found' (Lanciani's *Pagan and Christian Rome*). A few years later the ruins of an old Roman house were discovered close to the church, but oratory and house have alike now disappeared. Lanciani gives an account of part of this latter excavation, which is important. 'A bronze tablet was found, which had been offered to Gaius Marcus Pudens Cornelianus by the people of Clunia as a token of gratitude. . . . The tablet, dated A.D. 222, proves that the house of Aquila and Prisca in apostolic times had subsequently passed into the hands of a Cornelius Pudens; in other words, that the relations formed between the two families during the sojourn of the apostles had been faithfully maintained by their descendants. Their intimate connexion is also proved by the fact that Pudens, Pudentiana, Praxedes, and Prisca were all buried in the cemetery of Priscilla on the Via Salaria.' So that, in all probability, beside that lonely church on the Aventine must we look for the cradle of the infant Church of Rome.

The recently excavated house of Pudens on the Viminal Hill is thus connected with that just described. Pudens, mentioned in 2 Ti 4^{21}, in company with Linus and Claudia (see PUDENS), has been the subject of many conjectures (see Lightfoot, *Clement*, i. 76 ff., ii. 464; Farrar, *St. Paul*, p. 681), upon which Roman archæology has thrown no light. The church, now called S. Pudentiana (a later ignorant change from the earlier name 'the church of Pudens'—*Ecclesia Pudentiana*), has existed in some form on the present site from very early times. Pius I. in the middle of the 2nd cent. granted to Pudentiana, Praxedes, and Timotheus, daughters and son of Pudens, the institution of a regular *titulus*, or parish, with a font for baptism. Here, too, were preserved some pieces of household furniture used by St. Peter during his stay. Part of this, the old wooden table on which the apostle is said to have celebrated the Lord's Supper, was given by Cardinal Wiseman (who was titular of the church) to St. John Lateran. If it had been a stone altar or an elaborate piece of work, doubt would easily gather round it. But there is nothing *per se* against the genuineness of the relic. The excavation of the house is still proceeding.

Together with the house of Prisca and the house of Pudens, both genuine memorials of the apostolic age and closely connected with St. Peter and St. Paul, should be mentioned the house of Clement beneath the lower church of S. Clemente near the Colosseum (see Lightfoot, *Clement*, i. 91 ff.). This has been for many years flooded with water; but one of the present writers was privileged, by the kind permission of the authorities, to inspect it so far as possible this year (1900), and it is to be hoped that ere long it may be drained and once more opened to the archæologist and the pilgrim. For its interest is that of the apostolic times, whatever view we may take of the personality of St. Clement and of his connexion with the Clement mentioned by St. Paul.

There remain to be noticed only the catacombs and other funereal memorials of Rome bearing on NT times. The inscriptions, frescoes, and monuments have been mostly removed to the Lateran and Capitoline museums, and can be there studied with the help of such works as de Rossi, Northcote (though now somewhat out of date), Withrow, *The Catacombs of Rome*, and Malleson and Tuker's *Handbook to Christian and Ecclesiastical Rome*, 3 vols. (the catacombs are dealt with in the first volume). The exploration of the columbarium of the empress Livia has led to the possible identification of some of the names in Ro 16 (see Lightfoot, *Philippians*, Excursus). See also NEREUS.

Monumental evidence also confirms the traditional friendship between Seneca and St. Paul. See Lanciani, *Pagan and Christian Rome*; Ramsay, *St. Paul the Traveller*, p. 353 ff.

Much still has to be done before our knowledge of Rome in the 1st cent. is anything like complete, and almost every day brings its news. The enthusiastic band of Italian scholars, headed by Lanciani and Marucchi and Baccelli, is working hard, and great things are expected from the newly founded British School in Rome. The *Bullettino* and the *Nuovo Bullettino* contain full records of all recent discoveries. Among the researches needing to be made are those concerning the burial of other apostles in Rome, in addition to those already named, *e.g.* St. Timothy (in St. Paul's outside the walls), St. Bartholomew, etc., and a scientific sifting of the evidence concerning many of the Eastern relics (such as the Santa Scala) and remains. In the case of the latter class the history is fairly clear from the time of Helena onwards, but before that, which is the crucial period, it is all vague and unsatisfactory.

Professor James Orr, in his *Neglected Factors in the Study of the Early Progress of Christianity* (1899), has suggested two fields of inquiry—first, into the actual numbers of Christians in the city in the 1st cent. (on this the evidence of the catacombs has yet to be examined fully, but the numbers appear to have been very much larger than is commonly supposed); and, secondly, into the social status of those who were drawn into the infant Church. He has shown very clearly that the poor were by no means the only members, and the evidence of houses like those of Pudens, Prisca, and Clement, of churches like that discovered this year (1900) on the very Palatine Hill itself (of as yet unknown date, but very early), all goes to show that then as now the gospel was universal in its power as well as in its claim, and that St. Paul's great *Apologia* in Romans for the 'wisdom' of God was addressed to the wise and learned as well as to the freedmen and slaves.

JOHN PATRICK and F. RELTON.

ROOF (גָּג, perhaps from a root meaning 'to cover,' קוֹרָה [once, Gn 19^8, tr^d 'roof,' lit. 'beam'], חֵךְ ['roof of the mouth']; στέγη).—The most convenient form of roof for domestic purposes in a dwelling-house is undoubtedly a flat one; but the form of roof from the earliest times has probably been governed by a variety of factors, of which the most important are the materials procurable near the spot and the climatic conditions.

In northern climates, where wood is plentiful and the snowfall is heavy, a high-pitched roof of thatch or shingle can be readily made, and is a necessity. All around the shores of the Mediterranean Sea, where there is no snow and slight rainfall, and where timber can be procured, the most convenient form of roof can be economically constructed, and that is a flat one of some substance impervious to water. In more tropical climates, where the rains are exceedingly heavy and sudden, and the houses are for the most part of wood, the roofs again are usually high-pitched, and of thatch or leaves. In countries, such as Chaldæa, where there is little or no wood, the storehouses and places where dryness is necessary are built with thick walls and vaults with flat roofs or masonry domes, and for the same reason the houses of modern Jerusalem are built with thick walls and domes. The houses otherwise in Assyria-Chaldæa are flat-roofed.

In Egypt, where timber is scarce, but where stone is plentiful, the roofs are usually flat, the roofs of the peasants' houses being usually lightly constructed, and resting on palm beams, while the temples and palaces were roofed with stone.

Probably from the earliest times the same forms of roof have obtained in the same parts of the world, except that local circumstances have here and there interfered. For the buildings of Nineveh and Babylon, as well as for Jerusalem, the cedars of Lebanon were made use of. In Jerusalem, in early days, the roofs were flat, and the scarcity of timber, necessitating domed roofs, appears to have been first felt after the siege of the Holy City by Titus. In early days in Greece the roofs were flat, and it was customary to walk upon them. But pointed roofs were also used. In Rome the *solaria*, properly places for basking in the sun, were terraces on the tops of houses. In the time of Seneca the Romans formed artificial gardens on the tops of their houses, which contained even fruit trees and fish ponds (Smith's *Dict. of Gr. and Rom. Ant.*, s. 'Domus'). Herodotus (ii. 95) says that the Egyptians slept on the roof in the marshy part of Lower Egypt.

'Even the houses of the poor seem generally to have had their courtyards, at the back of which a structure was raised consisting of a single storey surmounted by a flat roof, to which access was given by a single staircase' leading from the courtyard.

'The flat roof seems to have been universal in Egypt; it added to the accommodation of the house; it afforded a pleasant rendezvous for the family in the evening, where they enjoyed the view and the fresh breezes which spring up at sunset. At certain seasons they must have slept there. On the other hand, the granaries, barns, and storehouses are almost always dome-shaped.

'The flat roof of the house had a parapet round it, and sometimes a light outer roof supported by slender columns of brilliantly painted wood' (Perrot and Chipiez, i. 36).

Fergusson (*History of Architecture*, 119) gives an illustration of a three-storeyed dwelling in the Egyptians' own quaint style, 'the upper storey apparently being like those of the Assyrians, an open gallery supported by dwarf columns. In the centre is a staircase leading to the upper storey, and on the left hand an awning supported on wooden pillars, which seems to have been an indispensable part of all the better class of houses.' 'In the Yezidi House we see an exact reproduction in every essential respect of the style of building in the days of Sennacherib. Here we have the wooden pillars with bracket capitals, supporting a mass of timber intended to be covered with a thickness of earth sufficient to prevent the rain or heat penetrating to the dwelling. There is no reason to doubt that the houses of the humble classes were in former times similar to that here represented' (*ib.* 160). In speaking of the palace of Esarhaddon, Fergusson says (*ib.* 164), 'Had these buildings been constructed like those of the Egyptians, their remains would probably have been applied to other purposes long ago; but having been overwhelmed so early and forgotten, they have been preserved to our day: nor is it difficult to see how this has occurred. The pillars that supported the roof being of wood, probably of cedar, and the beams on the under side of the roof being of the same material, nothing was easier than to set them on fire. The fall of the roofs, which were probably composed, as at the present day, of 5 or 6 ft. of earth, that being requisite to keep out heat as well as wet, would probably suffice to bury the building up to the height of the sculpture. The gradual crumbling of the thick walls, consequent on their unprotected exposure to the atmosphere, would add 3 or 4 ft. to this; so that it is hardly too much to suppose that green grass might have been growing on the buried palaces of Nineveh before two or three years had elapsed from the time of their destruction and desolation. Whenever this had taken place, the mounds afforded far too tempting positions not to be speedily occupied by the villages of the natives.' We may here remark that the modest dwellings of the Egyptian fellah are often covered by vaults of frisé, that is to say, of compressed or kneaded clay. None of the ancient monuments of Egypt possess such vaults, which are of much less durability than those of stone or brick. We are, however, disposed to believe that they were used in ancient times (Perrot and Chipiez, i. 110).

The palaces of Babylon appear to have consisted of courtyards and long narrow chambers; and as stone was not readily obtained, the question of how they were roofed has occasioned much discussion. Diodorus (ii. 10) states that the hanging gardens of Babylon were supported by stone beams, 16 ft. long and 4 ft. wide; but Strabo (xvii. 1. 5) says they were supported by vaulted arcades. Sir H. Layard believed that there were only flat roofs at Nineveh similar to that of modern houses in Mosul and the neighbouring villages, and states that he never came upon the slightest trace of a vault, while in almost every room that he excavated he found wood ashes and carbonized timber. He suggests that the long and narrow rooms were roofed with beams of palm or poplar, resting on the summit of the walls (Layard, *Nineveh*, ii. 256).

That flat roofs must have been extensively used is evident from the number of limestone roof rollers found by M. Place (*Ninivé*, i. 293) in his excavations in the ruins of buildings where they had fallen with the roofs; but Place as well as Perrot and Chipiez (i. 163) are of opinion that though the roofs were flat they were in many cases supported by brick vaults, side by side with other flat roofs of timber. Arches still standing in the city gates, and fragments of vaults found within the chambers of Sargon's palace at Khorsabad, give colour to this opinion. A vaulted storehouse for grain with a flat roof is shown in Wilkinson's *Ancient Egyptians* (vol. ii. p. 135).

Strabo (xv. 3. 18), quoting from some old authority on Susiana, states, 'In order to prevent the houses from becoming too hot, their roofs are covered with 2 cubits of earth, the weight of which compels them to make those dwellings long and narrow; because although they had only short beams, they had to have large rooms, so as to avoid being suffocated.'

What strikes one in considering the subject of roofs is the similarity of design in the countries north and south of Palestine (Assyria, Chaldæa, Egypt), the difference being due only to the material available. Wilkinson (ii. 115) says that the roofs of rooms of houses in Egypt were supported by rafters of the date tree, arranged close together, or more generally at intervals, with transverse layers of palm branches or planks. Many roofs were vaulted, and built, like the rest of the house, of crude brick. On the top of the house was a terrace, which served as well for a place of repose as for exercise during the heat; it was covered by a roof supported on columns; here they slept, using a mosquito net (Herod. ii. 95). The floors of the rooms were flat on the upper side, whether the rooms beneath were vaulted or supported on rafters. Strabo (xvii. 1. 37), in speaking of the labyrinth at Lake Mœris, tells us that the roofs of the dwellings here consisted of a single stone each, and that the covered ways throughout the whole range were roofed in the same manner with single slabs of stone of extraordinary size, without the admixture of timber or of any other material. 'On ascending the roof, which is not a great height, for it consists only of a single storey, there may be seen a field thus composed of stones. Descending again and looking into the aulæ, these may be seen in a line supported by twenty-seven pillars, each consisting of a single stone.' Perrot and Chipiez (i. 109) give examples of a complete system of construction, belonging exclusively to Egypt, for stone buildings with stone roofs. The interior of the building is divided up by rows of vertical supports or monoliths, on which rest architraves or stone beams, and across from architrave to architrave are placed long flat stones forming the roof. This, however, seems to have applied only to temples, the palaces as well as the houses of the people having been of very light construction, of wood or crude brick.

At Luxor, Karnak, and the Ramesseum, the temples are provided with staircases by which these flat roofs may be reached. These roofs seem to have been freely opened to the people, just as with us one is allowed to ascend domes and belfries for the sake of the view over the surrounding building and country.

The flat roofs of houses in the East have been used from the earliest times for a variety of domestic and even public purposes.—*For devotion and prayer.* St. Peter went up upon the housetop to pray about the sixth hour (Ac 10^{9}). They were used also for idolatrous purposes. There were altars on the top of the roof-chamber (עֲלִיָּה) of Ahaz in Jerusalem (2 K 23^{12}). They burned incense to Baal on the roofs of houses in Jerusalem (Jer 19^{13} 32^{29}); and there they also worshipped the host of heaven (Zeph 1^{5}).—*For recreation and for sleep at night.* It is customary at the present day for the people (especially the old) to take exercise morning and evening on the roof of the house; and during the summer-time members of the family usually sleep on the roof, carrying their bedding up at night and down again in the morning. 'At night all sleep on the tops of their houses, their beds being spread upon their terraces, without any other covering over their heads than the vault of heaven. The poor seldom have a screen to keep them from the gaze of passengers' (Morin, *Persia*, 229). 'We supped on the top of the house for coolness, according to their custom, and lodged there likewise, in a sort of closet about 8 ft. square, of wicker-work, plastered round towards the bottom, but without any doors' (Pocock's *Travels*, ii. 6). Saul appears to have slept on the roof of Samuel's house in the unnamed city. 'And it came to pass, about the spring of the day, that Samuel called to Saul on the housetop, saying, Up, that I may send thee away' (1 S 9^{26}); 'David walked upon the roof of the king's house at Jerusalem, and from the roof saw a woman washing herself' (2 S 11^{2}); 'Absalom spread a tent upon the top of the house' (2 S 16^{22}); 'Nebuchadnezzar walked upon the royal palace at Babylon' (Dn 4^{29}); 'Samuel communed with Saul upon the top of the house' (1 S 9^{25}); 'the people made themselves booths, every one upon the roof of his house' (Neh 8^{16}).

They used the housetops *to make their public lamentations*, and in the villages *to proclaim any news* that required to be promulgated. As the houses had few windows opening to the streets, the people rushed to the roofs to look down upon any processions, and to view what was going on far and near. 'At the present time local governors in country districts cause their commands thus to be published. These proclamations are generally made in the evening, after the people have returned from their labours in the field; the public crier ascends the highest roof at hand, and lifts up his voice in a long-drawn call upon all faithful subjects to give ear and obey. He then proceeds to announce, in a set form, the will of their master, and to demand obedience thereto.' 'On their housetops, and in their broad places, every one howleth' (Is 15^{3} 22^{1}). 'On all the housetops of Moab, and in the streets thereof, there is lamentation' (Jer 48^{38}). 'Proclaim upon the housetops' (Mt 10^{27}, Lk 12^{3}). Eusebius (*HE* ii. 23) tells us that 'the Pharisees, who had a design upon the life of St. James, bishop of Jerusalem, persuaded him to preach to the people, when assembled at the Passover, from the battlements of the temple, alluding to this custom of proclaiming from the housetop whatever was to be made known far and wide.'

The roof of the house in the East is used as is the backyard of European houses; linen and flax are dried there, also figs, apricots, raisins, and corn. 'The ordinary houses have no other place where the inmates can either see the sun, "smell the air," dry their clothes, set out their flower-pots, or do numberless other things essential to their health and comfort' (*Land and Book*, i. 49). Rahab the harlot brought the spies up to the roof of the house and hid them with the stalks of flax, which she had laid in order about the roof (Jos 2^{6}).

The staircase from the roof leads down into the inner court (Mt 10^{27} 24^{17}, Lk 12^{3}). Battlements or a parapet were enjoined by the law, a very necessary precaution, to prevent loss of life from falling over (Dt 22^{8}).

The manner in which Samson brought down the roof of the temple of Dagon (Jg 16), upon which about 3000 persons were assembled, by pulling down the two principal pillars, has not yet been satisfactorily ascertained. Shaw describes having seen several hundreds of people assembled, on the dey's palace in Algiers, to view an exhibition of wrestlers, and describes how the pulling down of the front or centre pillars would have been attended by a catastrophe similar to that which happened to the Philistines (Shaw, *Travels*, p. 283). Cf. further, Moore, *Judges, ad loc.*

The flat roofs in Syria at the present day are made as follows: Stout beams are first laid across the walls about 2 ft. apart; crosswise is laid tough brushwood, or, if that cannot be obtained, split wood with matting, and over it a mass of thorny bush in bundles; upon this is laid a plaster of mud or clay mortar, which is well pressed in, and over this a layer of earth 6 to 12 in. thick. This is plastered over with mud and straw as a protection against the rain. Each roof requires a little stone roller to be always ready—the handles of wood being movable, and used for all the rollers of the different roofs; periodically, and whenever the rain falls, the roller must be used to fill in the cracks and keep the roof compact. Constant care is required to avoid leakage (Pr 27^{15}). During the *PEF* excavations at Jerusalem one of these roof rollers was found in the ancient aqueduct to the west of the temple, where it must have lain for quite 1800 years, showing that flat roofs at that time were in use at Jerusalem, though at the present day they are mostly domed roofs of stone, on account of the scarcity of timber. The uncovering of a roof (Mk 2^{4}) of this nature would not be a difficult matter. See HOUSE in vol. ii. p. 432^{a}.

For other points connected with the subject of this art. see BRICK, GATE, HOUSE, PAVEMENT, WALLS.

LITERATURE.—Wilkinson, *Anc. Egypt.*; Fergusson, *Architecture*; Layard, *Nineveh*; Place, *Ninivé*; Perrot and Chipiez, *Egypt*, also *Chaldæa and Assyria*; *PEFSt*; Thomson, *The Land and the Book*. C. WARREN.

ROOM.—**1.** *Space to stay in:* Gn 24^{23} 'Is there room in thy father's house for us to lodge in?'; so $24^{25.\,31}$ (all מָקוֹם, from קוּם to rise up, stand; RV adds Is 5^{8} for same Heb., AV 'place'); Ps 31^{8} 'Thou hast set my feet in a large room' (מֶרְחָב, from רָחַב to be spacious; RV 'place'); Lk 2^{7} 'There was no room for them in the inn,' and 14^{22} 'Yet there is room' (both τόπος); cf. Mal 3^{10} 'there shall not be room enough to receive it' (no Heb.), Mk 2^{2} 'So that there was no room to receive them' (ὥστε μηκέτι χωρεῖν, RV 'so that there was no longer room for them'); Lk 12^{17} 'I have no room where to bestow my fruits' (οὐκ ἔχω ποῦ, RV 'I have not where'). In this sense is the phrase 'make room,' Gn 26^{22}, Pr 18^{16} (both רחב); to which RVm adds 2 Co 7^{2} 'make room for us' (Gr. χωρήσατε ἡμᾶς, AV 'Receive us,' RV 'Open your hearts to us'). Similarly Ps 80^{9} 'Thou preparedst room before it' (no Heb.). Cf. Dt 33^{20} Tind. 'Blessed is the rowmmaker Gad' (AV 'Blessed be he that enlargeth Gad'); and Milton, *PL* vii. 486—

> 'First crept
> The parsimonious emmet, provident
> Of future, in small room large heart enclosed.'

2. A *definite position* to be occupied: To 2^{4}, Wis 13^{15} (both οἴκημα); 1 Co 14^{16} 'he that occupieth the room of the unlearned' (ὁ ἀναπληρῶν τὸν τόπον τοῦ ἰδιώτου, Vulg. *qui supplet locum idiotæ*). Cf. Melvill, *Diary*, 6, 'I durst na wayes waver or mint away, bot stand stedfast in that roum and station wher He haid placed me'; Calderwood, *Hist.* 128, 'Displacing of the Minister of Glasgow out of his roome, which without reproach he hath occupied these many years.' This is the meaning of 'room' when in AV πρωτοκλισία is tr^{d} 'uppermost room' (Mt 23^{6} Mk 12^{39}, RV both 'chief place'), or 'chief room' (Lk 14^{7}, RV 'chief seat,' 20^{46}, RV 'chief place'), or 'highest room' (Lk 14^{8}, RV 'chief seat'). The Gr. word means the place of highest honour at table. See FOOD, vol. ii. p. 43^{a}. Cf. Knox, *Hist.* 380, 'But, said hee (turning his face towards the Room where such men as had so affirmed sate), if I bee not able to prove the Masse to bee the most abominable Idolatry that ever was used from the beginning of the world, I offer my selfe to suffer the punishment appointed by God to a false Preacher'; Lever, *Sermons*, 107, 'Then who can desyre a better master then the Lorde God or a higher roume then a stewardshyppe in the house of Christ'; and Ps 63^{9} in metre—

> 'Who seek my soul to spill shall sink
> Down to earth's lowest room.'

So in the frequent phrase 'in the room of' or 'in his room,' the Heb. being תַּחַת (2 S 19^{13}, 1 K $2^{35\,bis}$ $5^{1.\,5}$ 8^{20}, 2 K 15^{25} 23^{34}, 2 Ch 26^{1}; RV adds 2 K 14^{21} for AV 'instead of'); and the Gr. ἀντί (Mt 2^{22}). So Ac 24^{27} 'Porcius Festus came into Felix' room' (ἔλαβε διάδοχον ὁ Φῆλιξ Πόρκιον Φῆστον, RV 'Felix was succeeded by Porcius Festus'). Cf. Melvill, *Diary*, 129, 'The Generall Assemblie commandit the Presbyterie of Edinbruche to keipe his roum frie, and place nan thairin'; Calderwood, *Hist.* 110, 'It pertaines to the Office of a Christian Magistrate . . . to see that the Kirk be not invaded, nor hurt by false Teachers and Hirelings, nor the roomes thereof occupied by dumb doggs or idle bellies.' The plu. 'in their rooms' is found in 1 K 20^{24} (RV 'room') and 1 Ch 4^{41} (RV 'stead'), Heb. in both places תַּחְתֵּיהֶם. Cf. Dt 2^{23} Tind. 'The Caphthoryms which came out of Caphthor destroyed them and dwelt in their rowmes.' This is the meaning in the phrase 'give room,' which has been changed into 'give place' in AV wherever it occurs in earlier VSS; thus Gal 2^{5} Tind. 'To whom we gave no roume, no not for the space of an houre,' so Gen. NT 1557, but 1560 'gave not place.' Cf. Tindale, *Works*, i. 227, 'Dearly beloved, avenge not yourselves, but give room unto the wrath of God'; and *Pent.* (Prologe) 'Isaac when his welles which he had digged were taken from him, geveth rowme and resisteth not.'

3. The 'upper room' of Mk 14^{15}, Lk 22^{12} (Gr. ἀνάγαιον, TR ἀνώγεον), and of Ac 1^{13} (Gr. ὑπερῷον, RV 'upper chamber') is a room in the upper storey of the house, 'a roof-chamber' (see Moore on Jg 3^{20}; Driver, *Daniel*, p. 74; Thomson, *Land and Book*^{2}, ii. 634, 636 [with illustration]; and cf. HOUSE in vol. ii. p. 433^{a}). RV adds 1 Ch 28^{11} (Heb. עֲלִיָּה, AV 'upper chamber').

4. In Gn 6^{14} it is said that Noah's ark had 'rooms' made in it. The Heb. (קִנִּים) is lit. 'nests,' and is usually understood to mean small divisions or *cells*.

J. HASTINGS.

ROSE (חֲבַצֶּלֶת *ḥăbhaẓẓeleth*, Ca 2^{1}, Is 35^{1} RVm in both 'autumn crocus.'—Some have derived this word from בָּצָל *bāẓāl*, the same as the Arab. *baṣal* ='onion,' and secondarily 'bulb.' This theory rests on the supposition that the initial ח is a mistake for ה. Apart, however, from the fact that there is no critical support for this theory, it gains no probability from the ancient versions. The Syriac, for example, *ḥamẓallāitā*, gives the ח also instead of ה. The Targum on Ca 2^{1} explains *ḥăbhaẓẓeleth* by נרקום = *narcissus* (Celsius, *Hierob.* i. 489). An Assyrian word of similar form, *habaṣillatu*, signifies a 'marsh plant or reed.' Notwithstanding the authority of Gesenius, Michaelis, and Rosenmüller, we are inclined to accept *narcissus* as the correct translation. Two species of this genus grow in Palestine and Syria, *N. Tazetta*, L., flowering from November to March, and *N. serotinus*, L., flowering in autumn. The former has larger and more sweetly scented flowers than the latter. They are of the familiar pattern, with a white perigonium, and yellow, cup-shaped crown. The scape bears from three to ten flowers. The mention of the 'narcissus of Sharon' in parallelism with the 'lily (*shōshannāh*) of the valleys' increases the probability that they are allied plants. *Shōshannāh* is doubtless generic, and may include various species of Iris, Colchicum, Crocus, Pancratium, Ixiolirion, Tulipa, Fritillaria, Hyacinthus, Asphodeline, etc. (see LILY), any or all of which would go well in a parallelism with *narcissus*. For the trⁿ 'rose' we have only the authority of Ben Melech (Cels. *Hierob.* i. 488). The LXX ἄνθος and κρίνον give it no support.

The rose is mentioned in several places in the Apocrypha. Sirach speaks of φυτὰ ῥόδου ἐν Ἱεριχῷ, 'a rose plant in Jericho' (24^{14}, cf. 39^{13}). Seven species of rose exist in Pal. and Syria—*Rosa lutea*, L., the Yellow Rose, which grows only in N. Syria; *R. glutinosa*, S. et S., and *R. Thureti*, Barnat et Gremli, both Alpine species; *R. canina*, L., the Dog Rose, a mountain species; *R. dumetorum*, Thuill., a species growing from Lebanon and Anti-lebanon northward; *R. Arabica*, Crep., a Sinaitic species; and *R. Phœnicea*, Boiss. The latter is almost universal. The present writer has not met with any of these species at Jericho, but the last might easily grow there in hedges. There is nothing in the context to prevent the 'rose plant in Jericho' being a cultivated one. It has nothing to do with the traditional 'rose of Jericho.' This is a low, annual Crucifer, *Anastatica hierochuntina*, L. The so-called rose in this case is the entire plant, which, after maturing, dries up, and its branches curl inward, forming a brown hemisphere, 3 to 4 in. broad. On placing the root in water, it absorbs moisture, and the dry branches expand, and spread open. It has no resemblance to a rose, except in its round contour. Roses are everywhere cultivated in Pal. and Syria, and passionately admired by the people. The name *Wardeh*=Rose, is a favourite girl's name in Arabic (cf. NT RHODA). One of the industries for which Damascus is noted is the distilling of rose-water and an essential oil (attar of roses), as well as the making of syrup of roses. Large plantations of rosebushes are to be seen there and in other parts of the country. G. E. POST.

ROSH (רֹאשׁ).—1. A son, or, according to the LXX (Ῥώς), a grandson, of Benjamin, Gn 46^{21}. The reading of MT אחי וראש מפים 'Ehi and Rosh, Muppim,' should, however, probably be corrected after Nu 26^{38} to אחירם ושופם 'Ahiram and Shupham' (cf. also 1 Ch $8^{4f.}$). 2. In the title of Gog נְשִׂיא רֹאשׁ מֶשֶׁךְ וְתֻבָל in Ezk $38^{2f.}$ 39^{1} (RV 'prince of Rosh, Meshech, and Tubal'; AV and RVm 'chief prince of Meshech and Tubal'; AVm 'prince of the chief of Meshech and Tubal'). It is most probable that *Rosh* is here the name of a people or country, like MESHECH and TUBAL (so LXX [Ῥώς] and Symm. and Theod.). Its position, however, cannot be identified. Gesenius actually thought of the Russians, but this is impossible. Even the land of *Rāsh*, on the western border of Elam, which is mentioned in the cuneiform inscriptions (see Delitzsch, *Paradies*, 322), appears (see A. B. Davidson, *Ezekiel*, *ad loc.*) to lie too far east for the requirements of the prophecy. For further conjectures see the Commentaries of Bertholet and Kraetzschmar, *ad loc.* Duhm, followed by Cheyne, finds this same ראשׁ concealed under the קֶשֶׁת ('bow') of Is 66^{19}. J. A. SELBIE.

RUBY.—Three Heb. words, אֹדֶם, כַּדְכֹּד, and פְּנִינִים, are tr. 'ruby' in EV (text or margin), but it is doubtful whether this is the stone meant.

1. אֹדֶם is tr. 'ruby' in AVm and RVm at Ex 28^{17} 39^{10}, Ezk 28^{13}. The text, in each case, has sardius, after the Vulg. *sardius* and the LXX σάρδιον. אֹדֶם (from אדם or אָדֵם 'to be red') would obviously be a suitable name for any red stone. There is nothing in it to help us in fixing on the special kind of gem. A similar ambiguity attaches to the cognate Assyr. word *adamatu*, when used as a plant-name; all that Fried. Delitzsch (Assyr. *Handwörterbuch*, *sub voce*) feels justified in saying of it is that it is 'a plant, probably so called on account of its colour.' Pliny, too, presents the same kind of difficulty as we meet here; his method of naming stones according to their colours often leaves us uncertain which of them he has in view. Modern authorities are divided between the claims of the carnelian [Petrie makes it the red jasper; see art. STONES (PRECIOUS)] and the ruby to represent the Heb. אֹדֶם, the majority favouring the former. Two considerations are in favour of this view: by far the largest number of gems which have come down to us from antiquity are carnelians; and the אֹדֶם of Exodus was an engraved stone, whereas the ruby, on account of its hardness, was seldom engraved in ancient times.

2. כַּדְכֹּד is tr. 'ruby' by RV at Is 54^{12}, Ezk 27^{16}; AV has 'agate,' m. 'Heb. chrysoprase'; LXX has ἴασπις (Is.) and χορχόρ (Ezek.) (from the common confusion of ד and ר); Vulg. *iaspis* and *chodchod*. It is impossible to determine what the כַּדְכֹּד was. The root from which the noun is derived probably means 'to sparkle.' But this would suit a carbuncle almost, if not quite, as well as a ruby.

3. At Job 28^{18}, Pr 3^{15} [*Kethibh*, by a transcriber's mistake, פְּנִיִּים] 8^{11} 20^{15} 31^{10}, La 4^{7}, AV and RV tr. פְּנִינִים 'rubies'; RVm has 'red coral *or* pearls,' except at La 4^{7}, which has 'corals.' The LXX is very vague and fluctuating, using λίθοι, λίθοι πολυτελεῖς, τὰ ἐσώτατα (Job 28^{18}); and the Vulg. is still more unhelpful, 'cunctis *prctiosissimis*,' 'cunctis *opibus*,' 'multitudo *gemmarum*,' 'de ultimis *finibus*,' 'de *occultis*,' and at La 4^{7} '*ebore antiquo*.' (Toy, *Prov.* p. 72, appears to think that this last is due to a mistaken reading, הָבְנִים; but it is to be noted that at Ezk 27^{16} the Vulg. renders שֵׁן הָבְנִים by *dentes hebeninos*). Although פְּנִינִים never occurs in a list of gems, the Heb. writers must have had a distinct class of stones in view. This is clear from La 4^{7}: the colour of the human body could not be compared to that of precious stones in general. The same passage seems also to preclude the 'pearls' of our RVm. For if Carey (quoted by Delitzsch, *Job*, p. 370) had seen 'pearls of a slightly reddish tinge,' these are, at all events, not so common as to justify a comparison which would imply that pearls are usually red. The choice would appear to lie between 'ruby' and 'red coral.' And the decision depends on two considerations—the value and the colour of these two classes of objects. The passages in Job and Proverbs show that פְּנִינִים were costly. 'The price of wisdom is above פְּנִינִים.' Either rubies or coral would answer to this requirement. Rubies have always commanded a high price. Theophrastus speaks of quite a small ἄνθραξ as being worth forty gold staters. Benvenuto Cellini, in the 16th cent., states that a ruby of one carat was worth eight times as much as a diamond of the same weight. A fine ruby will still fetch more than a diamond of the same size. But red coral (*corallium rubrum*) has also always been held in high esteem. In ancient times it was

eagerly purchased in India. It finds a place in the *Lapidarium* of Marbodus. Good specimens continue to command a high price in China. The coral fisheries are a carefully regulated and highly important source of wealth on the Mediterranean coasts. On the second point—that of colour—the present writer is of opinion that the balance inclines in favour of the coral. Rubies are of too deep and fiery a hue to be compared at La 4[7] to the red of even an Oriental's body, notwithstanding the fact that there are exceptional gems, such as the one King describes (*Antique Gems*, p. 250), 'of the most delicious cerise colour.' But coral is found of every shade—deep red, rose pink, flesh colour, and even milky white. There is no difficulty about the supposition that the Jews were familiar with it, for it was to be obtained from the coast of India and the Red Sea, as well as from the Mediterranean. J. TAYLOR.

RUDDER.—See SHIPS AND BOATS.

RUDIMENT.—See ELEMENT.

RUE (*πήγανον, ruta*).—*Ruta graveolens*, L., the officinal rue, is a heavy-smelling, shrubby plant, of the order *Rutaceæ*, 2 to 4 ft. high, with glandular-dotted, bi-pinnately parted leaves, and corymbose, yellow flowers. It is cultivated for its medicinal properties, which are antispasmodic and emmenagogue. It has been inferred from Lk 11[42] that it was one of the plants subject to tithe (but see Plummer, *ad loc.*). The indigenous rue of Pal. is *Ruta Chalepensis*, L., the Aleppo rue, which differs but slightly from the officinal species.
G. E. POST.

RUFUS (Ῥοῦφος).—In Mk 15[21] we are told that Simon of Cyrene, who bore our Lord's cross, was the father of Alexander and Rufus. In Ro 16[13] St. Paul sends his salutation to Rufus, 'the chosen in the Lord, and his mother and mine.' The name, meaning 'red,' 'reddish,' was among the commonest of slave names. The mention of Simon as the father of Alexander and Rufus seems to imply that the two latter were known in the circles to which the Gospel was addressed. There is some evidence for thinking that St. Mark's Gospel was written in Rome; if this be so, then the same person may be referred to in both passages; but as the name was so common, this can be only a conjecture. 'Chosen in the Lord' implies some particular eminence as a Christian, and not merely one of the elect, which would not be any special distinction. By 'his mother and mine,' St. Paul means that the mother of Rufus had on some occasion shown to him the care of a mother, and that therefore he felt for her the affection of a son.

The name of Rufus was made use of largely in legendary history. He is introduced into the *Acts of Andrew* and of *Peter*. According to one account he was bishop of Thebes; according to another, bishop of Capua; according to another, bishop of Avignon. The last legend states that he travelled to Spain, founded the church at Tortosa, went over the Alps to Narbonne, and preached in Avignon. He appears to have been commemorated on the 12th, 14th, and 21st November.
A. C. HEADLAM.

RUG.—Jg 4[18] RV and AVm. See MANTLE, No. 4.

RUHAMAH.—The second child (a daughter) of Gomer, Hosea's unfaithful wife, was called LO-RUHAMAH, 'unpitied,' Hos 1[6. 8], as a type of Israel, when, unpitied by Jahweh, she was to be given over to calamity. The opposite condition of things is expressed in Hos 2[3] [Eng. 2[1]] 'Say ye unto your brethren, Ammi (*i.e.* 'my people,' in opposition to the name of the third child, LO-AMMI, 'not my people'), and to your sisters, Ruhamah' (רֻחָמָה 'pitied,' LXX Ἐλεημένη). Similarly, when Jahweh's anger is turned away, He declares in v.[25 (23)] 'and I will have mercy upon her that had not obtained mercy' (*wĕriḥamtî eth-lō rûḥāmāh*, LXX B καὶ ἀγαπήσω τὴν Οὐκ ἠγαπημένην [AQ have ἐλεήσω for ἀγαπήσω, and ἠλεημένην for ἠγαπημένην, cf. Hort on 1 P 2[10]]).
J. A. SELBIE.

RULERS OF THE CITY is, at Ac 17[6. 8], the EV rendering of the Gr. πολιτάρχαι (on the various spelling πολειτ. see Tisch. *NT*[8], Prol. p. 86, n. 2), as the special local title belonging to the magistrates in Thessalonica, before whose bar the Jews of that city, along with a mob of market-idlers, dragged Jason and other Christian converts, under a charge of hospitably receiving Paul and Silas, and of entertaining treasonable designs against the emperor. The word denotes 'rulers of the citizens,' who, as Thessalonica was a free city, had then the privilege of choosing their own rulers. The use of the term πολιτάρχης has been pointed to as an excellent illustration of the accuracy of St. Luke (*e.g.* by Alford and Knowling, *ad loc.*); for, while it is not employed in that form by classical authors, who use πολίαρχος and πολίταρχος, the actual existence of the Lukan form at Thessalonica is vouched for by inscriptions discovered there, one of which (assigned to the time of Vespasian) mentions among the politarchs for the time being Sosipater, Secundus, and Gaius—names occurring also as those of companions of St. Paul (Boeckh, *CIG* 1967, quoted by Conybeare and Howson, and by Alford).

Much fresh light is thrown on this subject in a paper by Prof. Burton of Chicago, in the *American Journal of Theology* for July 1898, entitled 'The Politarchs,' in which he has carefully collected, and commented on, the inscriptions which attest the use of the noun πολιτάρχης or of the verb πολιταρχέω. The following is a summary of his results:—There are seventeen inscriptions which attest the existence of the office of politarch in ancient cities, to which other two may be added, if we accept recent probable restorations. Eleven contain the verb, always in the present participle, and mostly in the genitive plural; seven contain the noun, giving in all eleven instances of it. There is itacistic variation between ει and ι in the second syllable of both noun and verb. While isolated examples occur from Thrace, Bithynia, the Bosporan kingdom, and Egypt, no fewer than thirteen belong to Macedonia, and five of these without much doubt to Thessalonica itself. None have apparently been discovered from Greece proper, and there is no reason to believe that the office existed south of Macedonia. Its presence in the latter province so largely was probably due to Roman influence in its municipal organization. The five Thessalonian inscriptions extend from the beginning of the 1st to the middle of the 2nd cent. A.D. As regards number, Thessalonica had five politarchs in the reign of Augustus and six under Antoninus Pius and Marcus Aurelius. Burton gives a full bibliography, mentioning as the most recent book that of Dimitzas: Ἡ Μακεδονία ἐν λίθοις φθεγγομένοις καὶ μνημείοις σωζομένοις, 2 vols., Athens, 1896. WILLIAM P. DICKSON.

RULER(S) OF THE SYNAGOGUE.—See SYNAGOGUE.

RUMAH (רוּמָה; B Κρουμά, A Ῥυμά).—The home of Pedaiah, the maternal grandfather of king Jehoiakim, 2 K 23[36]. Josephus, in the parallel passage, *Ant.* X. v. 2, has Ἀβουμά, no doubt a copyist's error for Ἀρουμά, which may be the ARUMAH of Jg 9[41], which lay in the neighbourhood of Shechem. Another Rumah (in Galilee) is named in Jos. *BJ* III. vii. 21, which *may* have been the birthplace of Pedaiah (see Neubauer, *Géog. du Talm.* 203; Guérin, *Galilée*, i. 367 f.)

Buhl, *GAP* 220 f.), if we may suppose that *connubium* still subsisted between the Northern and Southern kingdoms.

The reading רומה for דומה in Jos 15^{52}, although supported by the LXX (B Ῥεμνά, A Ῥουμά), is probably a copyist's error. See DUMAH, No. 2. According to Jerome, there was a various reading, *Rumah* (*i.e.* Rome) for *Dumah* in Is 21^{11}, which is said also to have been found in a manuscript belonging to R. Meir. J. A. SELBIE.

RUNNERS.—See FOOTMAN, and GUARD, No. 2.

RUSH.—See REED.

RUTH (רות, LXX Ῥούθ).—The heroine of the Bk. of Ruth. She was a Moabitess, the wife of Mahlon (Ru 4^{10}) the son of Elimelech and Naomi who were residing in the land of Moab because of a famine in Judah (Ru $1^{1ff.}$). By the time that the famine ceased, Elimelech and his two sons were dead. Naomi decided to return to her own land, and after she and her daughters-in-law had started she recommended them to stay in their native land and marry again. Ruth refused, and declared her intention that nothing short of death should part her from Naomi. They went on their way, and arrived at Bethlehem, much to the surprise of the inhabitants. It was the beginning of barley harvest. Elimelech's kinsman, Boaz, was one of the leading inhabitants of Bethlehem, and Ruth went to glean, and by chance entered a part of his field. Here Boaz noticed her and bade her remain in the same field, and praised her for the care she had taken of her mother-in-law. He invited her to share the meal of the reapers, and instructed his men to show her proper respect (ch. 2). Instigated by her mother, she introduced herself into his presence at night and claimed his protection. He was quite willing to give it to her, but there was a nearer kinsman who had prior rights to his, and he had to be reckoned with first. Boaz therefore sent Ruth home with a present for her mother, whilst he himself took the necessary steps to call upon the nearer kinsman to exercise or refuse to exercise his rights (ch. 3). He summoned him to his side at the gate of the city, with ten elders of the city as witnesses. He then called upon the nearest kinsman to buy or redeem Elimelech's portion of land. He refused to do this, because it involved his taking to wife Ruth the Moabitess, and passed on his rights to Boaz by drawing off his shoe and giving it to Boaz; for 'this was the manner of attestation in Israel.' The people in the gate were called upon as well as the elders to bear witness to the transaction, and invoked the blessing of God upon Boaz and Ruth (4^{1-12}). In this way they were married, and their firstborn son was called Obed, from whom were descended David and Christ (Ru $4^{13ff.}$, cf. Mt 1^{5}).

The name Ruth is of uncertain origin. It is to be noticed that her alleged descendant David entered into friendly relations with Moab (cf. 1 S $22^{3.4}$). The transaction recorded in this book is on the same lines as that legalized in Dt 25^{5-10}, though not coming under that law (see Driver, *Deut.* 285). The actual selling of the land by Naomi comes nearer to the law of Lv 25^{25}. Attempts have been made to assign the history to the days of Eglon (Jg 3^{12-30}), or the time of scarcity preceding Gideon's call (Jg $6^{3.4}$). See, further, next article. H. A. REDPATH.

RUTH, BOOK OF.—This book, in which the history of Ruth (see preceding article) is narrated, is full of interest. It is an anonymous work, idyllic in its character, describing pastoral life among the Hebrews in a time of peace and order, when old customs were kept up and carefully observed.

i. THE DATE OF THE BOOK.—This *must* be considerably later than the history, though how much later is a matter of controversy. The book looks back to 'the days when the judges ruled' (1^{1}), to a custom existing 'in former time in Israel' (4^{7}), and carries the descent from Boaz down to David (4^{22}), unless, as some have with little probability thought, the last verses do not really belong to the book. But it claims no particular date for itself, though the style would lead us to assign it to a comparatively early one. The linguistic difficulties in the way of its being early have been discussed by Driver (*LOT* pp. 426, 427 [^{6}454, 455]). The main argument for a post-exilic date, besides the linguistic one, is the way in which the customs of ch. 4 are treated as quite obsolete.

ii. THE OBJECT OF THE BOOK.—This may be described as twofold. (1) To introduce us to the family from which David was descended; and (2) to illustrate the marriage laws of the Israelites. The marriage of Ruth the Moabitess with Mahlon seems at first to run counter to the law as laid down in Dt $23^{3.4}$, and certainly in post-exilic times such a union was held to be unlawful (see Ezr $9^{1.2}$, Neh 10^{28}), but the law quoted says nothing about marriage, and differs in its terms from that of Dt 7^{3}. Some of those who look upon this book as post-exilic have been tempted to regard it almost as a political pamphlet, and a protest against the action taken both by Ezra and Nehemiah.

iii. PLACE IN THE CANON.—In the Jewish Canon the Talmud (Bab. *Baba bathra* 14) places it first amongst the Hagiographa or third class of sacred writings immediately before the Psalms. In Hebrew Bibles it is one of the five Megillôth or rolls which were read in the Synagogue on five special days in the Jewish ecclesiastical year—Ruth being read at the Feast of Weeks. As this was the second of the five days, the Book of Ruth generally appears second in order; but in Spanish MSS and in one Bible of A.D. 1009 Ruth comes first (Buhl, *Canon of the OT*, i. § 10). The arrangement adopted in modern versions by which Ruth follows Judges goes back to the Vulgate and LXX, and also to Josephus.* Its position in them is due to its having been linked on to the Book of Judges by its first verse, and having been treated as an appendix to that book.

LITERATURE.—Commentaries of Metzger (1857), Keil and Delitzsch, Wright (1864), Bertheau (combined with *Judges*, 1883), Hummelauer (1888), Oettli (*Die gesch. Hagiog.*, Nordlingen, 1889), Wildeboer (*Kurzer Hdcom.* 1898), Nowack (*Hdkom.* 1900); cf. also Driver, *LOT* 425 ff. [^{6} 454 ff.]; Cornill, *Einleit.*^{2} 242 ff.; Wildeboer, *Lit. d. AT*, 341 ff.; Wellhausen-Bleek; Robertson in *Book by Book*, 75; W. R. Smith, art. 'Ruth' in *Encycl. Brit.*^{9}; see also the relevant sections in the works of Ryle, Wildeboer, and Buhl on the *Canon of OT*.

H. A. REDPATH.

RYE (כֻּסֶּמֶת *kuṣṣemeth*; ζέα, ὄλυρα, *far*, *vicia*).—*Kuṣṣemeth* occurs three times in the Bible. Twice it is tr^{d} by AV 'rye' (Ex 9^{32}, Is 28^{25} m 'spelt'; RV in both passages 'spelt'). It is also tr^{d} in AV 'fitches' (Ezk 4^{9}, AVm and RV 'spelt'). The LXX gives in the first and third of the above references ὄλυρα, and in the second ζέα. ὄλυρα may, and ζέα does, mean 'spelt,' which is the seed of *Triticum spelta*, L., a wild wheat. Notwithstanding the authority of the LXX, we think that *kuṣṣemeth* is the same as the Arab. *kirsanah*, commonly pronounced *kirsenneh*. This is a leguminous plant, *Vicia Ervilia*, L., near the lentil in its general aspect. It is an annual, with pinnate leaves of 8 to 12 pairs of oblong, retuse leaflets, and a tortulose pod, 1 in. long and $\frac{1}{2}$ in. broad, containing 3 to 4 seeds, larger than those of the lentil. It is exceedingly common, being extensively cultivated for fodder, and for the seeds, which resemble those of the lentil. The substitution of *r* for the first *s* and *n* for *m* produces the classical Arab. form *kirsanah*. Evidently Jerome adopted this view, translating the word by *vicia*. Rye is unknown in Bible lands. Spelt is not cultivated, and is unknown here in the wild state. Perhaps the best rendering would be 'vetch,' with a marginal note, 'the seed known by the Arabs as *kirsenneh*, properly *kirsanah*' (but see art. BREAD in vol. i. p. 316^b). G. E. POST.

---

* The only way in which Josephus' reckoning of the books of the Bible as twenty-two can be accounted for is by supposing that he reckoned Judges and Ruth as one book.

S

SABACHTHANI.—See ELI, ELI, LAMA SABACHTHANI.

SABÆANS, SEBA, SHEBA.—The purpose of this article is to explain and differentiate the employment of these terms, leaving ethnological and other information to be given under the articles SEBA and SHEBA.

Sabæans occurs only twice in RV: once Is 45^{14} (סְבָאִים; B Σαβαείμ, A Σεβωείμ) as the gentilic name from *Seba*, and once Job 1^{15} (שְׁבָא, LXX om.) as that from *Sheba*. Other two instances occur in AV: Jl 3 [Heb. 4]^8, where RV substitutes 'men of Sheba' as tr. of שְׁבָאִים (LXX om.); and Ezk 23^{42}, where RV and AVm, following the *Kethibh* סובאים, substitute 'drunkards' [AV 'Sabæans' follows the *Ḳerê* סָבָאִים; B om., A οἰνωμένοι]. The text here is almost certainly corrupt, and it can hardly be said that Cornill, Bertholet, or Kraetzschmar have been very successful in their attempts at restoring it.

Seba (סְבָא, Σαβά) is mentioned in Gn 10^7 (=1 Ch 1^9, B Σαβάτ) as a son of Cush; in Is 43^3 (B Σοήνη) the name is coupled with Cush, and in Ps 72^{10} with Sheba.

Sheba (שְׁבָא, usually Σαβά) is variously described as (1) a grandson of Cush Gn 10^7 (=1 Ch 1^9, B Σαβάν); (2) a son of Joḳtan Gn 10^{28} (A Σαβεῦ, E Σαβαῦ)=1 Ch 1^{22} (A Σαβάν); (3) a son of Joḳshan Gn 25^3 (A Σαβάν, E Σαβά)=1 Ch 1^{32} (B Σαβαί, A Σαβά). The queen of Sheba (1 K $10^{1.\,4.\,10.\,13}$=2 Ch $9^{1.\,3.\,9.\,12}$) visited Solomon, bringing with her great stores of gold, precious stones and spices; the trading companies of Sheba are referred to in Job 6^{19} (B Σαβοί, ℵ$^{c.\,a}$ Ἐσεβοι, A^{vid} Ἀσεβοι), Is 60^6, Ezk $27^{22.\,23}$ (associated with Ra'amah, Haran, Canneh, Eden, Asshur, and Chilmad) 38^{13} (with Dedan and Tarshish); its gold is mentioned in Ps 72^{15} (Bℵ Ἀραβία), and its frankincense in Jer 6^{20}; in Ps 72^{10} the name is coupled with Seba ('the kings of Sheba [Bℵ βασιλεῖς Ἀράβων] and Seba shall offer gifts'). J. A. SELBIE.

SABANNEUS (B Σαβανναιοῦς, A Βανναιοῦς, AV Bannaia), 1 Es 9^{33}. The corresponding name in Ezr 10^{33} is Zabad.

SABANNUS (Σάβαννος, AV Sabban), 1 Es 8^{63} (LXX ^{62}).—Moeth the son of Sabannus corresponds to Noadiah the son of Binnui, Ezr 8^{33}.

SABAOTH.—See LORD OF HOSTS.

SABATEUS (B Ἀβταῖος, A Σαββαταίας, AV Sabateas), 1 Es 9^{48}=Shabbethai, Neh 8^7, where the LXX omits the name.

SABATHUS (Σάβαθος, AV Sabatus), 1 Es 9^{28}= Zabad, Ezr 10^{27}.

SABBATEUS (Σαββαταῖος, AV Sabbatheus), 1 Es 9^{14}.—'Levis and Sabbateus' correspond to 'Shabbethai the Levite' of Ezr 10^{15}.

SABBATH (שַׁבָּת; σάββατον; also, both in LXX and NT, of a *single* day, τὰ σάββατα).—The Hebrew name for the seventh day of the week, which became among the Israelites a centre of many important religious observances and associations.

The word is in form, probably (as may be inferred from שַׁבַּתּוֹ שַׁבְּתוֹת), contracted from שַׁבֶּתֶת (so Olshausen, p. 349; König, ii. 180 f.: otherwise, but less probably, Barth, *Nominalbildung*, p. 24; Jastrow [see *ad fin.*], p. 349). The root שָׁבַת means (see Is 14^4 24^8) *to desist*, *cease* (cf. Arab. *sabata*, *to cut off*, *intercept*, *interrupt*); hence the idea connected with the 'sabbath' will be that of *desisting*, *cessation*—the doubled *b* having an intensive force, and implying either *complete cessation*, or, perhaps, a *making to cease*. It should be borne in mind that the idea expressed by שָׁבַת and שַׁבָּת is not the positive 'rest' of relaxation or refreshment (which is נוּחַ), but the negative 'rest' of *cessation* from work or activity. Whether, however, this etymology expresses the *original* meaning of 'sabbath,' must remain for the present an open question: if it be true that it and the Assyr. *šabattum* had a common origin, it may have denoted originally something different (see below, § ii., first par. in small type).

i. HISTORY OF THE INSTITUTION IN THE OT.—The sabbath is mentioned in all the great Pentateuchal codes, and there are also allusions to it in the historical and prophetical books. It will be most instructive to consider the notices, as far as possible, chronologically.

In the legislation of JE the sabbath appears as a day of cessation from (in particular) *field-labour*, designed with a humanitarian end: Ex 23^{12} 'Six days shalt thou do thy work (מַעֲשֶׂיךָ), and on the seventh day thou shalt *desist* (תִּשְׁבֹּת), in order that thy ox and thy ass may rest (יָנוּחַ), and that the son of thy maidservant, and thy 'stranger,' may be refreshed (יִנָּפֵשׁ, properly 'get breath,' cf. 2 S 16^{14}),'—comp. the similar motive for the sabbatical year, v.^{11}. And in the parallel group of laws in ch. 34 (v.^{21}): 'Six days thou shalt work, but on the seventh day thou shalt *desist*: in plowing time and in harvest thou shalt *desist*.' In the Decalogue (Ex 20^8) the Israelite is commanded to 'keep' the sabbath 'holy'; and the injunction is expanded in the following clauses, vv.$^{9.\,10}$ (which are probably an explanatory comment, not forming part of the original Ten Words): the seventh day, it is there said, is a sabbath 'unto' (*i.e.* to be observed in honour of) Jehovah: no work—מְלָאכָה, more exactly *business*, the word generally used in connexion with the sabbath—is to be done in it by any member of the Israelite's household (including his servants), or by his cattle, or by the 'stranger' settled in his country; and in Deut. (5^{14}) a clause similar to Ex 23^{12b} is added, 'in order that thy manservant and thy maidservant may rest (יָנוּחַ) as well as thou' (cf. for the philanthropic motive, $12^{12.\,18}$ 14^{26b} 16^{11}). In the early historical books and prophets the sabbath is associated with the new moon, in a manner which implies that both were occasions of intermission from labour, and holidays: in 2 K $4^{22.\,23}$ a visit to a distance would, it is implied, be undertaken naturally only on a sabbath or new moon. Hos 2^{11} ('And I will cause all her mirth to cease, her pilgrimages, her new moons, and her sabbaths, and all her stated [religious] seasons') implies that the sabbath, though it had a religious object (cf. Is 1^{13}), was also an occasion of social relaxation: Am 8^{5} ('When will the new moon be gone, that we may sell corn? and the sabbath, that we may open out wheat?') shows that trade as well as field-labour was intermitted on it.

The passages quoted make it evident that in the 8th cent. B.C. the sabbath was regarded as sacred to J″, and that it was marked by abstention from at least ordinary occupations. The first of these facts implies naturally in addition that some special sacrifices were offered on it—an inference which might also be drawn from the connexion in which it is mentioned in Is 1^{13}. In later times, both the religious observances and also the abstention from labour were more fully defined and specialized. Jeremiah (17^{19-27}) has a prophecy relating to the sabbath: the people are solemnly charged by him, 'Bear no burden on the sabbath day, neither bring in by the gates of Jerusalem, nor carry forth a burden out of your houses, nor do any business; but hallow ye the sabbath day, as I commanded your fathers'; the command, it is added, had been imperfectly observed, but Jer. attaches to its observance now a promise of the permanence of the Davidic dynasty, and the safety of Jerusalem. Jer.'s authorship of this prophecy has been questioned by recent critics; but it is exactly in Jer.'s style: the high importance attached to the sabbath, even before Jer.'s time, is shown by the place which it holds in the Decalogue (to which Jer. plainly refers); and no doubt the prophet emphasized the sabbath, not simply for its own sake, but as a typical religious observance; it was an institution the observance or non-observance of which might be taken as a criterion of the general faithfulness or disloyalty of the nation.

In the 'Law of Holiness' (chiefly Lv 17–26), the individual laws in which, though their setting is later, may in many cases be as old as the 8th cent. or older (cf. vol. iii. pp. 69 f., 108^{a}), the observance of the sabbath is inculcated more than once ('Ye shall keep my sabbaths,' Lv $19^{3.30}$ 26^{2}), even under pain of death (Ex 31^{13} [a fragment of H] 'verily ye shall keep my sabbaths, for it is a sign between me and you [*i.e.* a mark, or token, like circumcision (Gn 17^{11}), of your being my people] . . . to know that I am J″ which sanctifieth you. And ye shall keep the sabbath, for it is holy unto you; every one that profaneth it shall surely be put to death'); and Ezekiel (who elsewhere also shows himself to be strongly influenced by this body of laws: *LOT* 138–144 [^{6} 145–152]) lays great stress upon it likewise: with evident reference to the language of H, he declares it to be an ancient ordinance of J″ (20^{12} 'moreover I gave them my sabbaths to be a sign between me and them, to know that I am J″ which sanctifieth them,' v.^{20} (I said) '. . . and hallow my sabbaths'; cf., of the priests, 44^{24}), and reproaches the people with having defiantly 'profaned' it ($20^{13.16.21.24}$ 22^{8} 23^{38}), or 'hidden their eyes' from it (22^{26}). It is probable that at this time an increased significance began to be attached to the sabbath on account of its being one of the few distinctive institutions of Israel which could be observed in a foreign land. The same prophet in 45^{17} $46^{4f.}$ (cf. vv.$^{1.3}$) also gives directions—based, it may be presumed, upon existing usage—respecting the sacrifices to be offered every sabbath by the 'prince' on behalf of the nation in the restored temple, viz. six lambs and one ram as a burnt-offering, with accompanying meal-offerings (the *daily* offering, according to Ezk $46^{13f.}$, was to be one lamb, with an accompanying meal-offering).

The later exilic references to the sabbath are in a similar strain to the reference of Jeremiah. Its observance is the typical religious duty, and the test of general allegiance to J″ (Is $56^{2.4.6}$); and a promise of restoration to Palestine is given to those Israelites who faithfully observe it, regarding it as a 'delight,' and refraining on J″'s 'holy day' from 'doing' their (ordinary) 'ways,' or 'finding' their own 'pleasure,' or 'speaking' [vain] 'words' (Is $58^{13f.}$): in Is 66^{23}, also, it is pictured as being (in the restored Jerusalem) a weekly occasion of worship before J″ for 'all flesh,' as the new moon would be analogously a monthly occasion.

In the legislation of P the regulations respecting the sabbath are further developed and systematized. Its institution is thrown back to the end of the week of Creation; God, it is said (Gn 2^{3}), then 'blessed the seventh day and hallowed it,'—*i.e.* set it apart for holy uses, and attached blessings to its observance,—'because in it he *desisted* (שָׁבַת) from all his work (מְלָאכָה 'business')' of creation: similarly in the motive, based upon the representation of P, attached in Ex. (20^{5}) to the fourth commandment; and in Ex 31^{17} 'for in six days Jehovah made heaven and earth, and on the seventh day he *desisted* (שָׁבַת), and was refreshed (וַיִּנָּפַשׁ,—as above, in 23^{12}).' In Ex 31^{12-17} the old law, derived from H, is supplemented by an addition (vv.$^{14b-17}$) emphasizing further the sanctity and permanence of the institution, and the penalty (death) for its non-observance: Ex 35^{1-3} (an injunction prefixed to the account of the construction of the tabernacle) the directions contained in 31^{15} are repeated almost *verbatim* (v.^{2}), and in v.^{3} the kindling of fire on the sabbath is prohibited; Lv 23^{3} it is to be observed (like certain other sacred seasons) by a 'holy convocation,' or religious gathering; Lv 24^{8} the shewbread is to be renewed every sabbath: Nu 15^{32-36} relates how a man found gathering sticks on the sabbath was by Divine direction stoned to death; Nu $28^{9f.}$ the special sacrifices for the sabbath are appointed, viz. double those offered on ordinary days (vv.$^{3-8}$), *i.e.* two male lambs for a burnt-offering in the morning, and two in the evening, with twice the usual meal- and drink-offerings. Lastly, in Ex $16^{5.22-30}$ the manna is stated to have been withheld on the sabbath, and given in double quantity on the previous day, in order to preserve the sanctity of the day; and the people are forbidden to leave their homes, and (indirectly) to bake or cook anything, on the sabbath.

In P the term *shabbāthōn* (RV 'solemn rest [properly, *cessation*]') is also used in connexion with the sabbath, viz. Ex 16^{23} 'to-morrow is a *solemn rest*, a holy sabbath unto J″'; 31^{15} (cf. 35^{2}, Lv 23^{3}) 'on the seventh day is a sabbath of *solemn rest* שַׁבַּת שַׁבָּתוֹן, holy unto J″' (elsewhere *shabbāthōn* is used of New Year's day, Lv 23^{24}, of the first and eighth days of the Feast of Booths, Lv 23^{39}, and of the sabbatical year, Lv 25^{5}; and 'sabbath of solemn rest' of the Day of Atonement, Lv 16^{31} 23^{32a} (cf. in v.^{3b} 'sabbath' alone), and of the sabbatical year, Lv 25^{4} †).—The term 'sabbath' is used also (Lv 25^{2} *al.*) of the SABBATICAL YEAR. On Lv $23^{11.15}$ see WEEKS (FEAST OF).

In the history of the post-exilic period we read in Neh 10^{31} how the people, headed by Nehemiah, bound themselves, if foreigners offered wares or food for sale on the sabbath, not to buy of them; and in Neh 13^{15-22} how Neh., finding this obligation disregarded, and also other kinds of work done on the sabbath (treading wine-presses, lading animals with corn, bringing fruit and other wares into Jerus., and selling and buying them), remonstrated with the people, and had the gates of Jerus. closed on that day, in order that merchants and packmen might not bring their 'burdens' (cf. Jer 17^{21}) into the city. Allusions to the sacrifices offered on the sabbath occur in Neh 10^{33}, 2 Ch 2^{4} 8^{13} 31^{3}.

It will be evident, from the preceding survey, that in the priestly Law the original character and objects of the sabbath have receded into the background, it has become more distinctly a purely ceremonial institution, and the regulations for its observance have been made more strict. It will appear in the sequel (iii.) how in a still later age these characteristics are all intensified.

ii. SPECULATIONS ON THE ORIGIN OF THE SABBATH.—It is not improbable that the sabbath is ultimately of Babylonian origin. In a lexicographical tablet (II Rawl. 32, l. 16) there occurs the equation—

ûm nûḫ libbi=*ša-bat-tum*,

or 'day of rest of the heart' (*i.e.* not, as was formerly supposed, a day of rest for man, but, as parallel occurrences of the same phrase show,* a day when the gods rested from their anger, a day for the pacification of a deity's anger)=sabbath. Further, in a religious calendar for two months (the second, or intercalary Elul, and Marcheshvan), which we possess,† prescribing duties for the king, the 7th, 14th, 19th,‡ 21st, and 28th days are entered as 'favourable day, evil day,' while the others are simply 'favourable' days. On the five specified days, the king is not, for instance, to eat food prepared by fire, not to put on royal dress or offer sacrifice, not to ride in his chariot, or hold court, not to seek an oracle, or even to invoke curses on his enemies: on the other hand, as soon as the day is over, he may offer a sacrifice which will be accepted. The days, it is evident, are viewed superstitiously: certain things are not to be done on them, in order to avoid arousing the jealousy or anger of the gods. The meaning of the expression 'favourable day, evil day' is that the day had an indeterminate character; it could become either the one or the other, according as the precautions laid down for its observance were attended to or not.§

Except in the passage quoted, *šabattum* is known at present to occur only (in the form *šabattim*) 2 or 3 times in syllabaries (Jensen, *ZA* iv. 274–8, *Z. f. Deutsche Wortforschung*, Sept. 1900, p. 153 [in an art. on the Week of seven days in Babylonia]): in the first of these syllabaries it corresponds to a Sumerian ideogram meaning *to pacify*; in the second (where Jensen contends that it occurs with the meaning *to come to rest*, *be calmed*, *pacified*) its occurrence is questioned by Jastrow, *AJTh* ii. 315 *n.*; in the third (*Z. f. D. Wortf.* 153) it corresponds strangely to the ideogram which means simply *day*, *sun*, *light*. The etymology of *šabattum* is uncertain. The verb *šabâtu* is, in a lexicographical tablet, equated with *gamâru*, which means commonly (Delitzsch, *HWB* p. 199) *to bring to an end*, *complete*, but which seems, to judge from two syllabaries (*Z. f. D. Wortf.* 153), to have signified also *to pacify*, *appease*; and Jensen, assuming that in the tablet *šabâtu* is quoted with this exceptional meaning of *gamâru*, explains *šabattum*, *šabattim*, from it. It remains however, for the present, a difficulty that while in Heb. *shabbāth* is connected (apparently) with *shābath*, to *desist*, the Assyr. verb *šabâtu* means something different.

These facts make it at least a plausible conjecture that the Heb. sabbath (which was likewise primarily a day of restrictions) was derived ultimately from Babylonia,‖ or, as Jensen would prefer to say,* that the Heb. and Babylonian institutions had a common origin: though naturally, like other Heb. institutions which were not originally confined to Israel, it assumed among the Hebrews a new character, being stripped of its superstitious and heathen associations, and being made subservient to ethical and religious ends. It is not difficult to imagine how, under the influence of Israel's religion, a change of this kind might gradually be wrought, though (supposing the hypothesis to be a sound one) we have no information of the stages by which it was actually effected; Jastrow's endeavour (*AJTh*, vol. ii. pp. 321 ff., 332 ff., 345 ff.) to show that the Heb. sabbath had once (like the *ûm nûḫ libbi*) a propitiatory character, and even that the verb *shābath*, as applied to J″, and *shabbāthōn*, expressed originally the ideas of *ceasing from anger*, *being pacified*, cannot be deemed convincing.

The sabbath, as a day of restriction, is an institution parallel to what is found among many early peoples, and indeed, as a survival from an earlier stage, among civilized peoples as well. The wide diffusion of periods of restriction makes it probable that they had their origin in simple ideas and social conditions. In all the cases known to us the restrictions are of the same general character—they refer to occupations, food, dress. Thus, besides the Babylonian institution, which has been already referred to, the Egyptians had a list of days, on which certain acts were prohibited (*AJTh*, ii. p. 350†). In Rome business was suspended during the *feriæ*; and on all *dies nefasti* courts of law and the comitia were closed. In the Hawaiian Islands, it was unlawful, on certain days, to light fires or to bathe; the king also at certain times withdrew into privacy, giving up his ordinary pursuits. In Borneo, work was forbidden on certain days in connexion with the harvest. The origin of such times of restriction is lost in antiquity: they come before us commonly as established customs, resting on precedent, and not supposed to need explanation. They may have arisen from various causes: thus in some cases observation would show that particular times were favourable or unfavourable to certain occupations; but very often they would be determined by superstitious or religious motives. The days thus fixed would gradually be tabulated and systematized; and when calendars had been constructed, particular days would come to be marked upon them as lucky or unlucky, and in some cases these would agree with definite phases of the moon. 'Such a calendar the Hebrews may have inherited, or may have received from Babylonia or from some other source': if they received it from Babylonia, they detached it from its connexion with the moon (fixing it for every seventh day, irrespectively of the days of the month), they generalized the abstinence associated with it, and, more than all, they transformed it into an agency, which, though, like other institutions, capable of abuse, has nevertheless, partly as observed by the Jews themselves, partly (see below) as forming the model of the Christian Sunday, operated on the whole with wonderful efficiency in maintaining the life of a pure and spiritual religion.‡

The question, which was formerly much debated, whether the sabbath was instituted at the close of the Creation, or whether it was a purely Mosaic ordinance, was already answered by Dr. Hessey (p. 135 ff.) in the latter sense; and in the light in which the early chapters of Gen. are at present regarded by scholars (cf. COSMOGONY, and Ryle's *Early Narratives of Genesis*), the question itself has become irrelevant. It is plain that in Gn 2$^{1-3}$ the sanctity of the seventh day of the week is explained unhistorically, and antedated: instead of the sabbath, closing the week, being sacred, because on it God 'desisted' from His six days' work of creation, the work of creation was distributed among six days, followed by a day of rest, *because* the week, ended by the sabbath, existed already as an institution, and the writer (P) wished to adjust artificially the work of creation to it. In the Decalogue, 'Remember' may be interpreted quite naturally as signifying 'keep in mind' in the future (cf. Ex 13^{3}, Dt 16^{3}).

* *E.g.* *šigu nûḫ libbi*=psalm of propitiation (Jastrow, *AJTh*, vol. ii. p. 316).

† Jastrow, *Relig. of Bab. and Assyr.* p. 376 ff.

‡ Perhaps the 7×7=49th day from the 1st of the preceding month—the month having 30 days.

§ The ancient Assyrians regarded the simplest and most ordinary occurrences as ominous of either good or evil (Jastrow, *Rel. of Bab. and Assyr.* p. 355, etc.); and, in fact, there is a calendar in which every day in the year is marked as either fortunate or unfortunate for something or other (p. 379 ff.).

‖ So Schrader, *KAT*^{2} on Gn 2^{3}; Lotz, *Quæstiones de hist. Sabb.* (1883) 67; Sayce, *HCM* 76 f., *EHH* 193 (where, however, the facts about the Bab. 'Sabbath' are overstated; for though, no doubt [Lotz, 58], *šabattum* might very naturally be the name of the 7th, 14th, etc., days of the two months referred to above, it is not, in any text at present known, applied to them actually); Gunkel, *Schöpf. u. Chaos* (1895), 155. Nor is there at present any evidence that a continuous succession of 'weeks,' each ending with a day marked by special observances, was a Bab. institution (Jensen, 154).

‡ With the last paragraph cf. C. H. Toy, 'The earliest form of the Sabbath,' in *JBL*, 1899, pp. 191–193.

iii. THE SABBATH IN THE LATER JUDAISM AND THE NT.—There are not many allusions to the sabbath in the apocryphal books. It was naturally included amongst the distinctively Jewish institutions, which Antiochus Epiphanes sought (B.C. 168) to abolish (1 Mac 1$^{39.\,43.\,45}$, 2 Mac 6^{6}). At the beginning of the Macc. uprising, the loyal Jews allowed themselves to be massacred in cold blood rather than profane the sabbath, even in self-defence (1 Mac 2$^{31\text{-}38}$): but in view of the consequences which persistence in such a course would obviously entail, Mattathias and his friends decided (vv.$^{39\text{-}41}$) to recognize *defensive* warfare as permissible on the sabbath (cf. 1 Mac 9$^{34.\,43}$, 2 Mac 8$^{25\text{-}28}$; also Jos. *BJ* II. xix. 2). The destruction of siege-works was not, however, considered allowable; and so Pompey was able to complete his mound against Jerus. on the sabbath (Jos. *Ant.* XIV. iv. 2). The unwillingness of the Jews to fight on the sabbath naturally became known to their enemies; and several instances are on record of attacks being planned for that day, and carried out successfully (Jos. *c. Ap.* i. 22 *end*; 2 Mac 5$^{25\text{f.}}$ 15^{1}; *Ant.* XIII. xii. 4, XVIII. ix. 2). The Romans so far recognized the scruples entertained by the Jews with regard to bearing arms or travelling on the sabbath, as to release them from the obligation of military service (Jos. *Ant.* XIV. x. 11–19).

Allusions to the sabbath, generally more or less satirical, occur in the classical writers: by some of them it was supposed to be a day of mere idleness, by others that it was a fast. See Tac. *Hist.* v. 4; Sueton. *Octav.* 76; Juv. xiv. 96, 105 f.; Martial, iv. 4. 7; Persius, v. 179-184; Seneca, *Epist.* 95, 47 (lights not to be kindled on it).

By the Jewish legalists the OT regulations respecting the sabbath were developed and systematized to an extent which has made their rules on the subject a byword for extravagance and absurdity. Two entire treatises of the Mishna, *Shabbāth* and *'Ērūbin*, as well as parts of others, are devoted to provisions for the observance of the sabbath; and there are also long discussions on the subject, with quotations of the divergent opinions of different Rabbis, in the Gemara. We may mention some of the more simple and reasonable provisions first. As the Jewish day began at sunset in the evening, the sabbath lasted from sunset on what we should call Friday to sunset on Saturday; according to Jos. *BJ* IV. ix. 12, the beginning and end of the day were announced by trumpets from the temple. The afternoon of Friday was called the 'eve of the Sabbath' (עֶרֶב הַשַּׁבָּת), or the PREPARATION-DAY (παρασκευή), and no business was allowed to be begun on it which might extend into the sabbath. The sabbath was no fast-day (cf. Jth 8^{6}): the second Isaiah had said that it should be regarded as a 'delight' (עֹנֶג); and the Jews have always been careful not to divest it of this character. Three meals (cf. *Pēāh* viii. 7; *Shabb.* xvi. 2), of the choicest available food (Edersh. ii. 52),* were accordingly prescribed for it, being laid ready before sunset on the Friday, and the lamp for the Sabbath being lighted at the same time. The Mishna adds minute regulations, as to how the meals, if necessary, were to be kept warm, without infringing the sanctity of the sabbath, as of course no fire might be kindled (Ex 35^{3}), or even attended to, on the day. The sabbath was regarded as set apart for religious exercises—both for private meditation and prayer, and also for public worship in the SYNAGOGUE (Mk 1$^{21.\,23}$ (Lk 4$^{31.\,33}$), 6^{2} (Lk 4^{16}), Lk 6^{6} 13^{10}, Ac 13$^{14\text{f.}\,27.\,42.\,44}$ 15^{21} 17$^{1\text{f.}}$ 18^{4}), or other place of prayer (Ac 16^{13}).*

With regard to the more technical observance of the sabbath, the Mishna (*Shabb.* vii. 2) enumerates 39 principal classes † of prohibited actions, viz. sowing, ploughing, reaping, gathering into sheaves, threshing, winnowing, cleansing, grinding, sifting, kneading, baking; shearing wool, washing it, beating it, dyeing it, spinning it, making a warp of it, making two thrum-threads, weaving two threads, splitting two threads, tying, untying, sewing two stitches, tearing thread to sew two stitches; catching deer (game), killing, skinning, salting it, preparing its hide, scraping off its hair, cutting it up; writing two letters, erasing for the purpose of writing two letters; building, pulling down, extinguishing fire, kindling fire, beating with a hammer, and carrying from one property to another (add also *Bēẓa* v. 1, 2 ‡). The real 'micrology' of the Rabbis appears, however, not so much in this enumeration as such, as in the consideration of the cases in detail, the discussion what actions do or do not fall under the several classes named, and sometimes also in the casuistical evasion of a prohibition. A few specimens of the extraordinary refinements thus introduced must suffice. The prohibition to tie or untie a knot was too general, so it became necessary to define the species of knots referred to. It was accordingly laid down that a camel-driver's knot and a boatman's knot rendered the man who tied or untied them guilty; but R. Meir said, 'a knot which a man can untie with one hand only, he does not become guilty by untying.' A woman might, however, tie on various articles of dress, and also tie up skins of wine or oil, and pots of meat. A pail might be tied to a well by a band ('fascia'), but not by a rope (חֶבֶל). R. Jehudah laid down the rule that any knot might be lawfully tied which was not intended to be permanent (*Shabb.* xv. 1, 2). This rule is, in fact, the principle by which the commentators explain the distinctions that have been just quoted. The rest of the tractate is almost wholly occupied with the discussion of similar distinctions in other subjects.

The aim of the tractate *'Ērūbin* ('mixtures,' or 'connexions') is to alleviate the extreme rigour of some of the Rabb. enactments respecting the sabbath. The 39th of the list of prohibited actions quoted above was that of carrying from one property to another: but in this tractate it is explained how places might, by a legal fiction, be combined together, so that things might lawfully be carried from one into another: there was thus an *'ērūb*, or 'commixture,' of courts, of streets, and of limits: a number of houses opening into a common court were, for example, treated as one, by all the families before the sabbath depositing some food in the common court; or a number of narrow streets or blind alleys were converted into a 'private property,' by extending along them a wire or rope, or by laying a beam over the entrance. The limit of a 'sabbath-day's journey' (Ac 1^{12}) was, according to the Rabbis, 2000 cubits;* but if, before the sabbath, a man deposited food for two meals at the boundary, he was considered to declare that place to be his domicile, and he was at liberty, when the sabbath came, to proceed 2000 cubits beyond it. However, it seems that such concessions were only granted for some serious and worthy purpose (Schechter, *ap.* Montefiore, *Hibb. Lect.* 562).

---

* The meal of which our Lord partook on a sabbath in the house of one of the 'rulers of the Pharisees' (Lk 14^{1}) would, we may be sure, be one of these sabbatical *epulæ lautiores*.

* On the sabbath as a day of spiritual edification, cf. also Jos. *Ant.* XVI. ii. 4 *middle*, *c. Ap.* ii. 17 *end*; Philo, ii. 168 *end*, 169, 197, 282, 630 (from Euseb. *Præp. Ev.* VIII. vii. 9 f.).

† אָבוֹת: derivative actions, or species of the principal classes named, were called תּוֹלָדוֹת. Margoliouth (*Expos.* Nov. 1900, p. 336 ff.) cites from an unedited Persian MS, containing an account of the feasts and other observances of different nations by an author of the 11th cent., an enumeration of 38 forbidden acts, differing in many particulars from those mentioned in the Mishna, and including more directly some of those alluded to in the Gospels.

‡ See Wünsche, *Erläuterung* [see full title *ad fin.*], p. 148.

Naturally, there were cases in which higher considerations superseded these rules for the strict observance of the sabbath,—דּוֹחִין אֶת־הַשַּׁבָּת '*push aside* the sabbath' is the expression used. The priests in the discharge of their duties in the temple—*e.g.* in preparing and offering the sacrifices appointed for the day—profaned the sabbath, and were 'guiltless' (Mt 12^5).† And so the Mishna permits on the sabbath acts necessary for the sacrifice of the passover, though it carefully excludes those which are deemed unnecessary (*Pesāḥim* vi. 1, 2). A Levite performing upon a stringed instrument on the sabbath in the temple (but not elsewhere), might, if his string broke, tie it up again, but he is forbidden to put in a new string (*'Ērūbin* x. 13). A priest who hurts his finger may bind it up with reeds in the temple (though not elsewhere), but he is not permitted to press out the blood (*ib.* 14). Similarly circumcision was permitted, though not anything connected with it which could be prepared before (Jn $7^{22f.}$; *Shabb.* xix.). In other cases humanitarian grounds superseded the sabbath. The general principle was that any 'doubt about life,' *i.e.* any doubt as to whether life was in danger, superseded the sabbath (כָּל־סְפֵק נְפָשׁוֹת דּוֹחֶה אֶת־הַשַּׁבָּת *Yômā* viii. 6):‡ but, of course, the further question then arose, What did endanger life? Ailments supposed to be dangerous to life are mentioned, and treatments permitted or forbidden are enumerated; but, to our minds, the distinctions drawn are arbitrary and absurd, and the reasons alleged in support of them most trivial and insufficient. 'He who has the toothache must not rinse his teeth with vinegar [and spit it out again; for this would be to apply a medicine]; but he may wash them as usual [and swallow the vinegar, for this would be merely like taking food]. He who has pains in the loins may not anoint himself with wine and vinegar [which would be a medicinal application], but he may anoint himself with oil [acc. to the usual custom], though not with oil of roses [which, being costly, would certainly not be used, except as a medicine].' (*Shabb.* xiv. 4; the explanations, from the commentators, *ap.* Surenh.). A strain might not have cold water poured upon it, but it might be washed in the usual way (xxii. 6). With such feelings current on the subject, the hostility aroused by the cures wrought by our Lord on the sabbath (Mt 12^{9-13}=Mk 3^{1-6}=Lk 6^{6-10}, Lk 13^{10-17} 14^{1-6}, Jn 5^{5-16} 7^{23} 9^{14-16}) is at once intelligible. It is also apparent why on a sabbath the sick were brought to Him to be healed after sunset (Mk 1^{32}, see v.^{21}).

The disciples, in 'plucking' (Mt 12^1=Mk 2^{23}=Lk 6^1) and 'rubbing' (Lk 6^{1b}) the ears of corn on the sabbath, violated the day, according to Rabb. ideas, in two respects; for 'plucking' was a species of 'reaping,' and 'rubbing' of threshing (cf. Maimonides, *Hilchoth Shabbāth* viii. 3, 'He who reaps even as little as a dry fig on the sabbath is guilty; and the plucker is a species (תּוֹלֶדֶת) of reaper'; and Jerus. Talm. *Shabb.* 10*a* 'A woman rubbing the heads of wheat [is guilty], as being a thresher,' *ap.* Edersh. ii. 56; also Lightfoot, *Horæ Heb.* on Mt 12^2). To lead an animal to water on the sabbath (Lk 13^{15}) was allowable, provided it carried nothing that could be regarded as a 'burden'; water might even be drawn for it, and poured into a trough, so that it came and drank of its own accord; it might not, however, be brought and set before the beast (Lightf. *ad loc.*; *'Ērūbin*, fol. 20*b*). But it is not permitted, at least in the Talmud, if an animal has fallen into a pit, or pool of water, to 'lay hold of it, and lift it out' (Mt 12^{11}; cf. Lk 14^5): it is allowed, however, to supply it with food, or, if that be impossible, to bring mattresses and cushions for the purpose of helping it to come out of itself (*Shabb.* fol. 128*b*; Maim. *Shabb.* xxv. 26); it is possible, however, that in the time of Christ this prohibition had not yet been formulated. To make clay and apply it to the eye (Jn $9^{6.\ 14}$) involved a breach, if not a double breach, of the sabbath-law: the Mishna (*Shabb.* xxiv. 3) lays it down that 'water may be poured on bran, but it must not be kneaded,' and the same rule might be naturally held to apply to clay: but the application of the clay to the eye was certainly not allowable: it was indeed permitted to apply wine to the outside of the eyelid (though not to put it inside the eye), but the application of saliva (which is mentioned, as it was deemed to possess curative properties) was altogether forbidden (*Shabb.* 108*b*; Maim. *Shabb.* xxi. 25; Lightfoot, *ad loc.*). Of course, to take up a bed (Jn 5^{10}) was prohibited, being an act of 'carrying.'*

It is, however, only right to observe that, in spite of the rules and restrictions created by the Rabbis, the sabbath does not seem to have been felt practically to be a day of burden and gloom, to those living under them. 'The sabbath is celebrated by the very people who did observe it, in hundreds of hymns, which would fill volumes, as a day of rest and joy, of pleasure and delight, a day in which man enjoys some presentiment of the pure bliss and happiness which are stored up for the righteous in the world to come. To it such tender names were applied as the "Queen Sabbath," the "Bride Sabbath," and the "holy, dear, beloved Sabbath"' (Schechter, *JQR* iii. 763, or *ap.* Montefiore, *Hibb. Lect.* 507; cf. the hymns quoted by Abrahams, *Jewish Life in the Middle Ages*, 1896, pp. 133–137).

iv. SUMMARY.—It appears, from what has been said, that, so far as we can trace the sabbath back among the Hebrews, it was a day sacred to J", and also a day, presupposing the agricultural period, marked by cessation from labour in the house and in the field: it had thus essentially a *philanthropic* character, the duty enjoined on it, as Wellh. has said, being less that the Israelite should rest himself, than that he should give others rest. Whatever the sabbath may have been in its primitive form, we may feel sure that this philanthropic application of it is of Israelite origin. As sacred to J", religious observances, at first simple and rudimentary, afterwards such as would spring naturally out of a more educated and maturer religious feeling, were attached to it,—special sacrifices, gatherings for worship in the temple, private prayer and meditation, and ultimately services in the synagogues. On its practical side, it was essentially an institution 'made for man.' Its intention was to give a rest from laborious and engrossing occupations, and from the cares and anxieties of daily life, and at the same time to secure leisure for thoughts of God. The restrictions attached to it were meant to be interpreted in the spirit, not in the letter. It had not essentially an austere or rigorous character; it was never intended that actions demanded by duty, necessity, or benevolence should be proscribed on it. Its aim was rather to counteract the deadening influence, upon both body and soul, of never-interrupted daily toil, and of continuous absorption in secular pursuits. But as time went on, an anxious and ultimately a superstitious dread of profaning the sabbath asserted itself; the spiritual was subordinated to the formal, restrictions were multiplied, till at length those which were really important and reasonable were buried beneath a crowd of regulations of the pettiest description. The general attitude taken towards the sabbath by our Lord was, while accommodating Himself to such observances as were consistent with its real purpose (*e.g.* worshipping or teaching in the synagogue), or otherwise innocent (p. 320^a n.), to free it from those adventitious accretions with which the 'tradition of the elders' had encrusted it. The sabbath, He emphatically declares (Mk 2^{27}), 'was made for man, not man for the sabbath.' [*] In particular, deeds of mercy were no infringement of its sanctity: it was 'lawful to do good on the sabbath day' (Mt 12^{12}). Nor was the sabbath, as the Rabbis seemed to make it, an end in itself, for the sake of which men should be subjected to a number of needless and vexatious rules; it was a means to an end, the good of God's people, and this end was best promoted by a reasonable liberty in the interpretation of the statutes relating to it; the multiplication of rules tended really not to preserve its essential character, but to destroy it.

---

* The distance is obtained by an essentially Rabbinical combination of Ex 16^{29} 21^{13} and Jos. 3^4. See Lightfoot on Lk 24^{50}, who remarks drily on the process, 'sed artem disce fabricandi quidlibet ex quolibet'; and comp. further the next article.

† Cf. *Pesāḥim* 65*a* (and elsewhere): אֵין שְׁבוּת בַּמִּקְדָּשׁ 'there is no sabbath-keeping in the sanctuary.'

‡ See in Wünsche (p. 151 f.), from the Gemārā (*Yôma* 85*ab*; cf. *Mechilta* on Ex 31^{13}, fol. 103*b*, ed. Friedmann), the biblical authority which 'Aḳiba and other Rabbis of the 2nd cent. sought to discover for this principle. The text which was deemed most conclusive was Lv 18^5, where it is said of the statutes of the law that if a man does them, he will 'live by them,' and not that he will die by them. See, further, on the teaching and exegesis of early Rabbis on the subject of the sabbath, Bacher, *Die Agada der Tannaiten*, i. 72, 84 f., 117, 191, 238, 260, 296 ff., 363, 404, ii. 94 f., 351, 362, 470, 510.

* Cf. Schürer, ii. 393–400, 412–414. The tractates *Shabbāth* and *'Ērūbin* are translated, in Sola and Raphael's *Eighteen Treatises of the Mishna* (1843), pp. 34–96; and, with copious notes, in Surenhusius' *Mischna* (1699), ii. 1–77, 78–134. There is also a pretty full abstract of *Shabbāth* in Edersheim, *Life and Times*, ii. 774 ff.; and a separate ed. in Heb., with useful introd. and glossary, by H. L. Strack, Lpz. 1890. See, further, the many Talm. passages tr. by Wetstein (*Nov. Test.*) on Mt $12^{2.\ 5.\ 10}$, Lk 14^1 etc.; and comp. also W. H. Bennett, *The Mishnah as illustrating the Gospels*, 1884, p. 53 ff.

The injunction Mt 24^{20} ('Pray ye that your flight be not in the winter, neither on a sabbath'; the clause is not in the ‖ Mk 13^{18}) rests probably upon the supposition either that the Christians addressed, being still resident in Judæa, would not, at the time contemplated, have yet cast off their Jewish scruples, or (Hessey, p. 174 f.) that impediments would be thrown in the way of their flight by the Jews around them. Jn 5^{17} 'My Father worketh even until now (viz. without interruption), and I work,' bears upon the relation which—not an ordinary man, but—Christ Himself holds towards the sabbath: He does not by works of mercy break the sabbath any more than God the Father does by His sustaining providence, which operates continuously on the sabbath not less than on other days (cf. *B'rêshîth R.* § 11; tr. Wünsche, 48; Bacher, i. 84 f., 298 f.).

The addition in the Cod. Bezæ after Lk 6^4 deserves also to be mentioned here: *τῇ αὐτῇ ἡμέρᾳ θεασάμενός τινα ἐργαζόμενον τῷ σαββάτῳ εἶπεν αὐτῷ, Ἄνθρωπε, εἰ μὲν οἶδας τί ποιεῖς, μακάριος εἶ· εἰ δὲ μὴ οἶδας, ἐπικατάρατος καὶ παραβάτης εἶ τοῦ νόμου.*

As regards the apostles, the sabbath is mentioned by St. Paul, directly in Col $2^{16f.}$ 'Let no man therefore judge you in meat, or in drink, or in respect of a feast day or a new moon, or a sabbath day, which are a shadow of the things to come (*i.e.* of the Christian dispensation); but the body is Christ's'; and inferentially in Gal $4^{9\text{-}11}$, where the observance of 'days and months and times and years' is described as a return to the 'weak and beggarly elements,' and Ro $14^{5f.}$, where it is implied that it is a matter of indifference whether one day is esteemed above another, or whether every day is esteemed alike: 'let every man be persuaded in his own mind.' The meaning of these passages clearly is that the Jewish sabbath, like other Jewish ceremonial observances, as the distinction of clean and unclean foods, or Jewish sacred seasons, as new moons, feast-days, and sabbatical or jubile 'years,' was a matter of indifference to the Christian, and was abrogated under the Christian dispensation. The general teaching of the NT is thus, in Dr. Hessey's words, that 'the sabbath properly so called, the sabbath of the Jews, with everything connected with it as a positive ordinance, was swept away by Christianity' (Lect. v., *ad init.*).

The Fathers frequently compare the (Jewish) sabbath with Circumcision, treating it, like that, as a temporary ordinance, and pointing out that Abraham, for instance, was justified without observing it: *e.g.* Justin, *Tryph.* §§ 19, p. 236 E, 27, p. 245 B; Iren. IV. xvi. 2; Tertull. *adv. Jud.* c. 2 (Hessey, pp. 56 ff., 371 ff. [ed. 5, pp. 42 ff., 281 ff.]).

In He 4^9 'There remaineth therefore a sabbath rest (*σαββατισμός*) unto the people of God,' *sabbath rest* is used figuratively of the rest in God after death. The apostle has been arguing that it was God's purpose that some should enter into His 'rest' (*κατάπαυσις*,—מְנוּחָה, properly *place of rest*),—the 'rest' signified by the expression being in the original context (Ps 95^{11}; cf. Dt $12^{9.10}$) the rest of Canaan, and this being identified by the apostle—no doubt on account of the presence and fellowship of God implied in it—with the rest of God,—*i.e.* the 'rest' into which God entered after finishing His work of creation, and which He designs to be shared ultimately by all His faithful people; as Israel, through disobedience, failed to enter into that 'rest,' the promise still remains open for Christians. See more fully A. B. Davidson's *Comm.* (T. & T. Clark), pp. 90–101. The Rabbis also sometimes regarded the sabbath as foreshadowing the rest of the world to come: thus in the Mishna (redacted *c.* 200 A.D.), *Tamid* vii. 4 (=*Sopherim* xviii. 2), in the enumeration of the psalms which were sung by the Levites in the Temple, when the morning burnt-offering was offered (Delitzsch, *Psalm.*^{4} 26 f.), it is said: 'On the sabbath, they recited the psalm (92) of which the title is "A Psalm, a song for the sabbath-day," *i.e.* a Psalm for the future (לֶעָתִיד לָבוֹא), for the day (*var. lec.* for the age), which is all sabbath, and rest for life eternal (לְיוֹם (נ׳ א׳ לְעוֹלָם) שֶׁכֻּלּוֹ שַׁבָּת וּמְנוּחָה לְחַיֵּי עוֹלָמִים).' The same saying is quoted also often elsewhere, *e.g.* *Mechilta* on Ex 31^{13}, *Rosh ha-shana* 31*a* (where, with the entire passage, it is attributed to R. 'Aḳiba [d. 135 A.D.]; cf. Bacher, i. 336); see also *Aboth de R. Nathan*, fol. 3*a bottom*, ed. Schechter (with the note).[*] But the passages cited by Schöttgen on He 4^9 from Zohar, Yalḳut Rubeni, and R. Samuel ben David, are very late,—the book Zohar being of the 13th cent., and the other two of the 17th cent.

The question of the relation of the **'Lord's Day'** (Rev 1^{10}), or Christian Sunday, to the Jewish sabbath, does not properly belong to the present article, and need therefore be only referred to briefly. The true view appears to be that the Sunday is not *substituted for* the Jewish sabbath; the sabbath is abolished; and the observance of the First Day of the week is an *analogous* institution, based on the consecration of that day by our Lord's Resurrection, sanctioned by apostolic usage (Ac 20^7, 1 Co 16^2), and accepted by the early Church,—the day being set apart for similar objects—rest from labour, and the service of God,—in a manner consonant with the higher and more spiritual teaching of Christ, and to be observed in the spirit of loyal Christian freedom, rather than by obedience to a system of precise statutes. Dr. Hessey has made it abundantly clear that during the first three Christian centuries the Lord's Day was never confounded with the sabbath, but carefully distinguished from it; and that it was only after the 3rd cent., and even then only gradually, that the Christian and the Jewish institutions were confused, and that tendencies towards 'Sabbatarianism' began. See, further, LORD'S DAY.

By early Christian writers, it may be worth noticing, the terms *σάββατον* and *σαββατίζειν* are not infrequently used in a fig. or spiritual sense of *abstinence from evil*; *e.g.* Justin, *Tryph.* § 12, 'The new law (of Christ) wills that you should keep sabbath perpetually'; let a thief, etc., turn from sin, *καὶ σεσαββάτικε τὰ τρυφερὰ* (cf. Is 58^{13}) *καὶ ἀληθινὰ σάββατα* τοῦ θεοῦ. Similarly Clem. Al. *Strom.* iii. 15, § 99, p. 556 Potter, where 'that keepeth the sabbath' of Is 56^4 is explained to signify κατὰ ἀποχὴν ἁμαρτημάτων, and iv. 3, § 8, p. 566 (ἢ μοι δοκεῖ τὸ σάββατον δι' ἀποχῆς κακῶν ἐγκράτειαν αἰνίττεσθαι), Tertullian, *adv. Jud.* c. 4, and others: see Hessey, pp. 57 ff., 93, 96 (ed. 5, pp. 43 ff., 70, 72); Suicer, *Thes. Eccles.* 916, 918 f.; and cf. also Ep. Barnab. xv. 1, 6, 7. And this, no doubt, is the meaning of the expression in the second of the 'Sayings of Jesus,' discovered in 1897 at Oxyrhyncus, λέγει Ἰησοῦς, Ἐὰν μὴ νηστεύσητε τὸν κόσμον [read τοῦ κοσμοῦ], οὐ μὴ εὕρητε τὴν βασίλειαν τοῦ θεοῦ· καὶ ἐὰν μὴ σαββατίσητε τὸ σάββατον οὐκ ὄψεσθε τὸν πατέρα: the Christian's whole life is to be hallowed, as a sabbath, in the service of God. But it is difficult to think that Christ Himself can have used the expression in this metaphorical sense. See, further, *Expos. Times*, ix. 69; Harnack, *Über die jüngst entdeckten Sprüche Jesu*, 1897, pp. 9–12 [tr. in *Expos.* Nov. 1897, pp. 323–7]; Lock and Sanday, *Two Lectures on the 'Sayings of Jesus,'* Oxf. 1897, pp. 7, 9, 19 f., 35 f.

---

[*] In the discussion in *Yômā* 85*b* a somewhat similar principle ('the sabbath is delivered into your hands, not you into the hands of the sabbath') is deduced, by an essentially Rabbinical method, from the words of Ex 31^{14} ('it is holy *for you*'). The argument is attributed in *Mechilta* on Ex 31^{13} to R. Shimeon b. Menassya (*c.* 190 A.D.); cf. Bacher, *op. cit.* ii. 493.

[*] On the opinion that this 'day' would be 1000 years, see Charles, *Book of the Secrets of Enoch*, on $33^{1.2}$; *Sanh.* 97*a*.

SABBATH DAY'S JOURNEY (Talmudic תְּחוּם[*] הַשַּׁבָּת).—An expression found but once in the Bible, Ac 1^{12} (σαββάτου . . . ὁδόν), where the Mount of Olives is said to be a Sabbath day's journey from Jerusalem. The expression immediately suggests some well-known regulation fixing the distance which might be travelled on the Sabbath, and, by implication, defines this distance as between five and six furlongs; for, according to Josephus in his *Ant.* (XX. viii. 6), the Mount of Olives is five furlongs from Jerusalem, while in his *BJ* (V. ii. 3) it is stated to be six, the variation being perhaps due either to the fact that the distance lay between the two, or to the fact that the older Hebrew ell was rather shorter than the later one. What the text suggests is quite in harmony with extant Rabbinical regulations, which, therefore, in this case exhibit not merely (as they so often and so misleadingly do) what ought to be, but what actually was. Thus, in the Jerusalem Targum, the command in Ex 16^{29} appears in the form, 'And let no man go walking from his place beyond 2000 ells on the seventh day'; and in the Targum on Ru 1^{15} Naomi says to Ruth, 'We are commanded to keep Sabbaths and festivals, and not to walk beyond 2000 ells'; and this regulation is supplemented with many ritualistic details in the Mishna tractate *'Ērūbin*. Occasional variations[†] from this generally accepted measurement[‡]—as, for example, the greater Sabbath day's journey of 2800 ells, the medium one of 2000, and the smaller one of 1800—are merely the freaks of individual Rabbis.

The evolution of the regulation can be traced with some approximation to certainty. The Rabbis seem first to have generalized the prohibition directed in Ex 16^{29} against a man's 'going out of his place' on the Sabbath to gather the manna, and then to have deduced the 2000 ells from the distance ordained (Jos 3^4) to be between the people on the march and the ark in front of them; or, as some suppose, from the distance between the tabernacle in the wilderness and the outermost part of the camp; but, probably, the case of the tabernacle was only an imaginary Rabbinical inference from that of the ark. By the 'analogy' in the use of *māḳôm*, 'place,' in Ex 16^{29} and in Ex 21^{13}—where the 'place' is a Levitical city of refuge with borders extending (it was affirmed) 2000 ells from the walls (Nu 35^5)—the man's 'place' of Ex 16^{29} became, in due course, the city in which he dwelt, together with its borders measuring 2000 ells straight out from the sides of the rectangle hypothetically constituting the city. (This measurement seems, from Nu 35^4, with its 1000 ells, to have been an exegetical mistake: the 2000 ells apparently refer to each side of the larger rectangle circumscribing the borders). According to Ginsburg (Kitto's *Cyclop.*, art. 'Sabbath Day's Journey'), it was argued that 'if one who committed murder accidentally was allowed to undertake this journey of 2000 yards (ells?) on a Sabbath without violating the sanctity of the day, innocent people might do the same.' Compare also J. Lightfoot on Lk 24^{50}, and his quaint remark on the 'pleasant art [the Rabbis] have of working anything out of anything.'

This Rabbinical regulation, being obviously and often inconvenient, was not allowed seriously to hamper the movements of the Jews. They secured, legally, a wider freedom by a simple device, which was called the 'connexion of boundaries' or the 'amalgamation of distances.' If a man desired to travel more than 2000 ells on a particular Sabbath day he could adapt the law to his project by carrying, before that Sabbath began, to some point within the Sabbatical limit, food enough for two meals; he could then and there eat the one moiety and bury the other, and could thus establish a domicile (to use a modern expression, a 'place within the meaning of the Act'), from which he could date his journey on the coming Sabbath. Even this precaution was not *de rigueur*. He could, if he preferred, eye a tree or a wall at a distance of 2000 ells from the place of his actual abode and declare it his legal abode for the Sabbath—that is, his legal starting-point for his projected Sabbath journey, provided he used words sufficiently definite as to the tree or wall, and, as Schürer phrases it, 'did the thing thoroughly' (*HJP* II. ii. 122, quoting *'Ērūbin*, iv. 7).[*]

J. MASSIE.

SABBATICAL YEAR (including Jubile Year and Land Laws).—In this article several distinct topics are treated together, which are too closely related to one another to be dealt with separately without a good deal of overlapping. A clear summary statement of the position of the Sabbatical and Jubile years in the cycle of Hebrew sacred seasons will be found under the art. FEASTS AND FASTS.

The 7 years' period recurs at every stage of the legislation, but not always with identical provisions, or even with application to the same subject. The 50 years' term is first found in the Priestly Code, but it is applied to cases previously connected with the 7 years' period. Consequently it will be clearest to gather the whole material from the successive sources in such a form as to make comparison easy. Accordingly, the same letter is used to mark corresponding matter in the following paragraphs.

---

[*] See Levy, *NHWB*, *s.v.* תחום (vol. iv. p. 637^b).

[†] Nowack (*Lehrb. d. Heb. Archäol.* i. 202) gives as his opinion that the Sabbath journey probably corresponded to the Egyptian measure of 1000 double steps, and quotes from Zuckermann the tradition in the Talmud that it was 2000 *steps*, explaining the 2000 *ells* elsewhere by Zuckermann's statement that in the Talmud *ell* and *step* are quite commonly made the same; and the Sabbath journey (Nowack adds) is sometimes called *mil* (מִיל)—that is, μίλιον. Jerome has another measurement. In his *Epist. ad Algasiam quæst.* x. we find: 'They are accustomed to answer and say, "Barachibas and Simeon and Hillel, our masters, have handed down to us that we should walk 2000 feet (*pedes*) on the Sabbath."'

[‡] Origen (*de Principiis*, iv. 17) says that the Jews held 2000 ells (δισχιλίους πήχεις) to be each man's 'place' (τόπον) (on the Sabbath).

[*] There is no necessary discrepancy between Lk 24^{50} and Ac 1^{12}. In the former passage it is said that our Lord took out the disciples ἕως πρὸς Βηθανίαν, 'until they came within view of Bethany' (Blass, *NT Grammar*, 139 n. 4), which (Jn 11^{18}) was 15 furlongs from Jerusalem. In the latter passage it is said that the disciples 'returned from the Mount called Olivet, which is nigh unto Jerusalem, a Sabbath day's journey off'—that is, from 5 to 6 furlongs. The Mount of Olives was a ridge about a mile long, and it is this and not Bethany whose distance is thus measured after Luke's manner (cf. 24^{13}), for the purpose of informing readers unacquainted with the locality. Bethany was on the south-east slope of the ridge, about a mile beyond the summit. It is unlikely that Luke intended to represent the Ascension as taking place either within or close to the village.

I. COMPARATIVE SUMMARY OF LAWS.—(i.) *The earliest Legislation*—E.—**a.** The 7 years' period is found in the Covenant Book Ex $23^{10f.}$, and among the Judgments Ex 21^{2-6} (cf. vol. i. p. 810).

b. In the former it is laid down as an obligation that every Hebrew owner of land should 'let it rest and lie fallow' in the 7th year. Hupfeld and Wellhausen apply this to the increase only, as though it was lawful to sow, but not to reap; but it is better, with Dillmann, Nowack, etc., to take it, as in our versions, as prescribing an entire cessation of all field work; for the two verbs in v.^{11} 'let drop (or 'release') and leave alone' (תִּשְׁמְטֶנָּה וּנְטַשְׁתָּהּ), seem obviously in contrast to both verbs in v.^{10} 'sow' and 'gather.' The oliveyards and vineyards are to come under the same rule as the corn land, *i.e.* no work is to be done in them in the 7th year. The aim expressed is 'that the poor of thy people may eat.' And so stringent is the rule that, if all is not consumed by the poor, the remainder must not be garnered, but must be left for 'the beast of the field' to eat. It is not explicitly stated that the owner and his family were not to *eat* of the spontaneous growth of the fallow year, but the passage, taken by itself, rather suggests that they might not.

c. In Ex 21^{2-6} a 6 years' term is fixed as the normal period during which a Hebrew could be compelled to serve as a slave. In the 7th year he could demand his freedom (see, further, art. SERVANT, and the *Oxf. Hex.* i. 55).

d. Neither in connexion with the fallow for the land nor with the emancipation of the slave is there any clear indication that the 7 years' period was fixed, beginning and ending simultaneously all over the country. In the second case, of the slave, this hypothesis is practically ruled out as impracticable, and in the case of the fallow the natural interpretation of the language is that each owner would reckon the term independently of others, and indeed that different portions of his holding would lie fallow in different years, so that, *e.g.*, if his corn land did not require his labour, he would still have his vines and olives to attend to, and *vice versâ*. The analogy of the weekly sabbath is too precarious to be allowed much weight.

e. The earliest legislation has no laws as to the inheritance, sale, or redemption of land.

(ii.) *The Deuteronomic Code*—D.—**a.** The 7 years' period occurs twice in Dt 15, in vv.$^{1-3}$ and vv.$^{12-18}$, and a third time in 31^{10-13}.

b. No mention is made of any custom of a periodical fallow, but an ordinance appears 15^{1-3} for the first time (reflecting the life of times when the purely agricultural stage has been passed), which provides for the remission, or, as some hold, the suspension of debts due to a creditor from 'his neighbour and his brother,' though debts may be exacted 'of a foreigner.' The motive of the law is compassion for the poor and unfortunate among the Israelites. And the provision in 31^{10-13} that 'at the end of 7 years, in the set time of the year of release' (שְׁמִטָּה, from שָׁמַט 'let drop' [RVm 'release'], Ex 23^{11}), in the 'Feast of Booths,' a public reading of the Deut. Law-book should take place, indicates that the sanction for the ordinance is to be found in the great principles of love to God and man reiterated in it.

c. A Hebrew slave (15^{12-18}) may go free after serving for 6 years.

d. The period, in the last case, obviously begins with the entrance of the slave upon servitude; but in the former, it is clear, from the allusion to the 'proclaiming' of 'J''s release,' that the close of each period is to be simultaneous over all the country, and to be publicly announced.

e. Except for the warnings against disturbing a neighbour's 'landmark' (19^{14} 27^{17}), no Deuteronomic law bears on the ownership of land.

(iii.) *The Priestly Code*—P.—**a.** Not only is the 7 years' period found in this, the latest stratum of Hebrew legislation, but a 50 years' term is added to crown the calendar (Lv 25).

b. Every 7th year, and in addition every 50th year, is to be kept with strictness as a fallow year, the crops being neither sown at the beginning nor reaped at the close, the vines not pruned and the grapes not gathered. The idea must be that no storing, or systematic harvesting operations, was to go on, but not that the crops that might grow of themselves were to be left untouched, for it is added, 'the sabbath of the land shall be for food for you; for thee, and for thy servant and for thy maid, and for thy hired servant and for thy stranger that sojourn with thee; and for thy cattle, and for the beasts that are in thy land, shall all the increase thereof be for food.' So it was lawful to go into the fields and oliveyards and vineyards, and gather food as it might be wanted from the spontaneous yield of the land.

This view is maintained by Dillmann, Nowack, and the Jewish interpreters. Still it is strange that in vv.$^{20-22}$, where the problem of food supply is dealt with, no allusion is made to the right conferred in v.$^{6f.}$ (cf. v.^{12}). It might be conjectured that v.^{6} was added to v.^{5} to modify a stringency regarded as impracticable.

All mention of the poor has dropped out, and the ordinance is expressly based on the religious principle that the land, as well as the people, should keep Sabbath unto J''. Neither is the arrangement of Deuteronomy recalled for the remission of debts, though the prohibition of usury is repeated from Dt 23^{19}.

c. A provision for emancipation of slaves occurs vv.$^{39-54}$, but in connexion with the **jubile**, in which year every Hebrew slave is to go free with his family. This can scarcely be in addition to, but rather in substitution for, the earlier provisions; for (1) if the law of emancipation at the 7th year was in force, it would be unnecessary to order it in the 50th; and (2) the later law in another point abrogates the earlier, as it prohibits lifelong bondage, and leaves no room for such a riveting of the ties of slavery as was involved in the archaic ceremony of the boring of the ear. Moreover, we find again the express mention of a religious principle as the motive for the law, viz. that all Israelites are J'''s servants, and therefore cannot be permanently owned by another. V.$^{48ff.}$ a new provision is also added, that a Hebrew enslaved to a 'stranger' (גֵּר) may be redeemed by a relative, the price varying with the distance of the jubile. Curiously, no such provision exists in the case of a Hebrew enslaved to a Hebrew.

d. The 7th year in Leviticus becomes for the first time a true sabbatical year, a season to be simultaneously observed as a fallow year in which no field work was to be done under a directly religious sanction. Moreover, the difficulties of such observance being apparent, doubters are encouraged (vv.$^{20-22}$) by an assurance of Providential aid in the shape of an unusually abundant yield in the 6th year. The produce is to be enough for 3 years, 'until the 9th year, until her fruits come in.' The reason is that, after the fallow of the 7th year, the ground is so hard that a second or third ploughing is necessary in the 8th year before sowing can take place, and consequently only the summer-sown crops of the 8th year come to anything, and they are not available for use till the beginning of the 9th year, the reckoning of the years being, of course, in this context from autumn to autumn.

It is not therefore necessary to reject 'until the 9th year,' as Dillm. proposes, on the ground that the '3 years' would naturally be the 6th, 7th, and 8th years, and that the allusion to the 9th year has been introduced because an editor referred the passage to the exceptional case of the 49th and 50th years when two fallow years followed one another, the 7th sabbatical year and the jubile year. Yet it is natural to conclude from the language of Lv 25, as Kalisch does, that the intention of the ordinance was that, after 7 sabbatical periods had passed, the 50th or jubile year should be intercalated as an additional fallow year, immediately after the 7th sabbatical year, and that a new sabbatical period should begin with the 51st year. This was also the view of the Jewish interpreters. But see, further, below II. (iv.).

e. The purchase and redemption of land is not alluded to in the earlier codes (but cf. Ezk 46^{17b} for allusion to some such custom), but is here treated with some fulness (vv.$^{8-10.\ 12-16.\ 23-34}$). The provisions may be enumerated as follows:—(1) The freehold of agricultural land could not be sold outright, for at the 50th or jubile year every piece sold returned to the owner or his representatives. The utmost that an owner desirous of selling could do was to grant a lease of the property, the term of the lease to expire at the next jubile, however near that might be. The purchaser only obtained the usufruct for the time being, and the price was to be regulated by the number of the crops due before the jubile. (2) In every case of a man being forced to sell part of his patrimony, it was the duty of his kinsman (v.^{25}) either, according to the ordinary interpretation, to redeem the land, *i.e.* from the purchaser (who is not named), or, according to the attractive theory put forth by Buhl (*AJTh* i. 738), to exercise a right of pre-emption. (3) If there was no kinsman to effect the *gĕ'ullah*, still, if the original owner at any time became rich enough, he could buy it back at the selling price, less the proportion belonging to the years since the sale (v.$^{26ff.}$). (4) House property in a walled city might be sold outright without returning to the vendor at the jubile (v.$^{29f.}$); but he was given the right of redemption during the one year after the sale (Maimonides and others mention a tradition that the term 'walled cities' is restricted to those that were such in Joshua's time). (5) House property in a village was subject to the provisions, see (1)-(3) above, attaching to agricultural land. (6) The Levitical possessions were subject to special provisions; (*a*) house property in their cities was to be saleable, as far as the leasehold value went, redeemable at any time, and restored at the jubile; and (*b*) the farm land round their cities was to be altogether unsaleable and inalienable. (7) The case of a field devoted to J" is treated in Lv 27^{16-24}. The field was to be valued at once, and might be redeemed at that price, with a fifth added, up to the jubile, after which it passed to the priest. If the field had been already sold, then no redemption was possible, and the gift became effective and final at the jubile. If the field was not part of the donor's own patrimony, but a purchased (=leased) portion of another man's possession, then the gift could only involve the usufruct till the jubile, when the property returned to the original owner.

Summary.—Three stages may thus be distinguished. (1) In Exodus a 7th year fallow for the land and a 7 years' term for Hebrew slaves is required, without any simultaneous reckoning of either period throughout the country. (2) In Deuteronomy a simultaneous remission of debts replaces the fallow year, the term of service for slaves remaining the same. (3) In Leviticus a simultaneous 7th year fallow is ordered; remission of debts is dropped in favour of a general prohibition of usury; emancipation at the 50th year is all that remains of the 7 years' term of service; and a whole series of provisions is added on land and house property.

The Analysis of Lv 25.—That this chapter contains earlier and later elements is generally admitted. Dillmann, Kuenen, and Nowack consider that there are no sure grounds on which to discriminate these. Driver and White ('Leviticus' in *SBOT*) treat the jubile for the land as original in the Holiness legislation (P^h), but ascribe to a later hand the extension to persons. Wellhausen thinks that the first draft placed the freeing of slaves and redemption of land in the 7th year, and, if Dillmann criticizes this reconstruction as involving an unworkable arrangement, Holzinger points out, on the other hand, that the priestly scribes were not always very practical. Another solution is offered in the *Oxford Hexateuch*, ii. 177, on Lv 25. It is there suggested that the regulations on the sabbath year, vv.$^{2b-7.\ 18-22}$, belong to the first draft of P^h; that the block of material on the jubile, vv.$^{8-17}$, which now interrupts the former, is itself composite, as is shown (1) by the number of doublets, and (2) by the recurrence of phrases which recall P^h; that a second draft of P^h underlies this passage and also the remainder of the chapter; that in this second draft the emancipation of slaves and redemption of land, and possibly a 50 years' term, were included; and that the rest, embracing all the clauses in which the term 'jubile' occurs, is by a later priestly editor. Addis and Baentsch take a similar view. The blowing of the trumpets on the 10th day of the 7th month is thought by many to be a provision earlier than the appointment of the same day as the solemn day of atonement, so that v.^{9b} will be later than v.^{9a}.

II. HISTORICAL CHARACTER.—(i.) *The Seventh Year Fallow.*—The custom of a periodical fallow is so common a feature in agricultural practice that we should almost require evidence to prove that there was nothing of the kind amongst the Hebrews from the beginning of their settled life; and the 7 years' period, which is still observed in Palestine and Syria, has every argument from analogy in favour of it. Moreover, the fact that the Covenant Book in Ex 23 is throughout directed to defining and regulating existing customs, and bears no mark of introducing any novelty (cf. the prob. allusion in Jer 17^4 [Heb.]; see Driver, *Deut.* 174), weighs in the same scale. The silence of the earlier historical books must be regarded as entirely natural if the fallow was not simultaneously observed. It would not be a feature that would call for mention. It is otherwise with so serious an interruption of the common life as would be occasioned by the observance of the same year as a universal fallow year, so that all workers on the land would be keeping holiday for 12 months. Moreover, the tradition at the Exile explicitly denies the observance of the sabbath years in the pre-exilic times (2 Ch 36^{21}, cf. Lv $26^{34f.\ 43}$). In fact, the first historical reference to the sabbatical year as an institution within the range of practical politics is in Neh 10^{31}, where it occurs among the items included in the covenant that was entered into at the prompting of Nehemiah. Even there the allusion is not quite certain. The language 'leave (נִטֹּשׁ; ='let lie fallow,' Ex 23^{11}) the seventh year, and the exaction of every debt,' recalls the law of the fallow in Exodus; but the clause is elliptical and far from explicit, and the following words, which recall Dt 15^2, make it doubtful whether the remission of debts in the 7th year is not the institution in view. It is not, in fact, till we reach the Greek period that we come upon undisputed references to the observance of the sabbatical year (Jos. *Ant.* XI. viii. 26): for Maccabæan times, see 1 Mac $6^{49.\ 53}$; Jos. *Ant.* XIII. viii. 1, XIV. x. 6, XV. i. 2; *BJ* I. ii. 4; and for the Herodian era, Jos. *Ant.* XIV. xvi. 2, XV. i. 2; Philo in Eus. *Præp. ad Ev.* viii. 7; and Tac. *Hist.* v. 4.

(ii.) *The Emancipation of Slaves at the Seventh Year.*—This is once referred to in Jer $34^{8ff.}$,* where the custom is shown to be more honoured in the breach than in the observance, and to be most difficult to enforce. The postponement of liberation to the 50th year may be another witness to the same fact.

(iii.) *The Remission or Suspension of Debts.*—

---

* Note here the techn. phrase קרא דרור ('proclaim liberty'), vv.$^{8.\ 15.\ 17}$; also Is 61^1 of captives (cf. Ezk 46^{17a} the 'year of דרור,' either of the jubile, or of the year of emancipation of slaves), and Lv 25^{10} of the jubile. [S. R. D.].

Unless Neh 10^{31} refer to this, history is silent as to the observance of any such custom.

(iv.) *The Redemption of Real Property.*—That there was some provision in law or custom against alienating land is clear from the instance of Naboth, and the institution of the *ge'ullah*, Jer $32^{6ff.}$, Ru 4. An obscure allusion in Ezk $7^{12f.}$ may be taken in the same sense; and it is, of course, possible that the 'year of liberty' in Ezk 46^{17} refers to the 50th year as an institution already known. Neither is there anything impracticable in the provisions themselves. See for parallels among other nations, Maine, *Village Communities*, 81–88; *Early Hist. of Institutions*, 81 f., 100 ff.; von Maurer, *Dorfverfassung*, i. 304 ff. This kind of tenure is known as the 'shifting severalty.' Strabo speaks of the Dalmatians redistributing land every 8 years, a practice which would support Wellhausen's theory that the term was originally 7 years and not 50. The denunciations of land-grabbing in Isaiah and Micah show that no such law was operative even if in existence. Moreover, no single undisputed historical allusion to the jubile exists, and the dating of the 3 sabbatical years that can be securely traced in B.C. 164–163, 38–37, and A.D. 68–69 leaves no room for the intercalation of the jubile year. For this reason, and because of the difficulty of the two fallow years in succession, the text has been strained to permit the identification of the 7th sabbatical year with the jubile year. The evidence from the literature is therefore rather against the jubile year having ever been historically observed. Neither is the anthropological evidence such as to rebut this presumption.

The term *jubile.*—Nowack gives a summary of interpretations, and refers to two essays by Kranold and Wolde (Gött. 1837) for a fuller account; but the *Oxf. Heb. Lex.* mentions only that which he selects as the best, and which is supported by the Targum on Ex 19^{13} and Jos 6^{5}, and by Phœnician inscriptions, viz. יוֹבֵל='ram.' It is used both in combination, as Jos $6^{4ff.}$, and alone, as Ex 19^{13}, for a 'ram's horn,' and lastly stands as a designation of the 50th year, ushered in by trumpet blasts.

LITERATURE.—Treatises on Heb. Archæology by Keil (Eng. tr. ii. 10–20), Nowack, and Benzinger; Ewald, *Antiquities*, 369–380; Schürer, *HJP* I. i. 40 ff.; Dillm., Driver-White, Kalisch, Addis, Baentsch, and *Oxf. Hex.* on Lv 25; Mishna, *Rosh ha-shana* i. 1, *Shebiith* vi. 1, 2, 5, 6.

G. HARFORD-BATTERSBY.

SABBEUS (Σαββαίας), 1 Es 9^{32}=Shemaiah, Ezr 10^{31}.

SABI (B Τωβείς, A Σαβεί, AV Sami), 1 Es 5^{28}= Shobai, Ezr 2^{42}, Neh 7^{45}.

SABIAS (Σαβίας).—A chief of the Levites in the time of Josiah, 1 Es 1^{9}, called in 2 Ch 35^{9} HASHABIAH.

SABIE (B Σαβειή, A Σαβιή, AV Sabi).—'The children of Pochereth-hazzebaim' (AV of Zebaim), Ezr 2^{57}, Neh 7^{59}, appear as 'the sons of Phacereth the sons of Sabie' in 1 Es 5^{34}.

SABTA (סַבְתָּא) or **SABTAH** (סַבְתָּה).—Son of Cush, Gn 10^{7} (A Σαβαθά), 1 Ch 1^{9} (B Σαβατά, A Σαβαθά, Luc. Σεβαθά). Glaser (*Skizze*, ii. 252) professes himself satisfied with the identification of this place with Dhu 'l-Sabtā, mentioned by the geographer Al-Bekri (i. 65), who quotes a line of an early poet, in which this is mentioned by the side of Al-Abatir, in the dwellings of the Banu Asad, probably in Yemamah. This identification is, however, of very small value; for the word *Sabtāu* means either 'a rock' or 'a desert,' and Dhu 'l-Sabtā therefore 'the place with the rock,' or 'the place with the desert,' whence it is not even certain that the poet quoted really meant it for a proper name. Moreover, there is no sign of such a place ever having been of importance. Hence the conjecture that it was to be identified with Sabat or Sabbata in the Gulf of Adulis (Ptol. IV. vii. 8) is much more probable. Other conjectures made by ancient and modern scholars are given in Ges. *Thes.*, the *Oxf. Heb. Lex.*, and the Commentaries.

D. S. MARGOLIOUTH.

SABTECA (סַבְתְּכָא, Sam. סבתכה).—Son of Cush, Gn 10^{7} (A Σαβακαθά, Luc. Σαβεκαθά), 1 Ch 1^{9} (B Luc. Σεβεκαθά, A Σεβεθαχά).—The identification of this place with Samydake in Carmania (Steph. Byz., ed. Westermann, p. 246), originally suggested by Bochart, has been renewed by Glaser (*Skizze*, ii. 252). There is, however, nothing in favour of this supposition, except the possibility that the genealogist may have been misled by the similarity of the name to Sabtah. Early critics guessed various places in Africa, while some have even supposed a person rather than a place to be meant. The termination *-ka* has an appearance of being Indo-Germanic, as also has the penultimate syllable. In that case the name probably meant 'sevenfold' (*saptaka*), Heptapolis. Some other conjectures are quoted by Gesenius, *Thes.*, and Dillm. *Gen. ad loc.* D. S. MARGOLIOUTH.

SACAR (שָׂכָר 'hire,' 'reward' [cf. the name יששכר ISSACHAR]).—**1.** The father of Ahiam, one of David's heroes, 1 Ch 11^{35} (B Ἀχάρ, A Σαχάρ)= **Sharar** of 2 S 23^{33}, where 'Sharar the (H)ararite' appears in B as Ἀραὶ Σαραουρείτης and in A as Ἀρὰδ Ἀραρείτης. The reading of B here may have arisen, by transposition of letters, from a Heb. original שָׂרָר הַהֲרָרִי, and the name *Sharar* should probably be read in both passages. **2.** The eponym of a family of gatekeepers, 1 Ch 26^{4} (B Σαχάρ, A Σαχιάρ).

J. A. SELBIE.

SACKBUT (סַבְּכָא Dn 3^{5}, שַׂבְּכָא $3^{7.\,10.\,15}$; LXX and Theod. σαμβύκη, Vulg. *sambuca*, Wyc. 'sambuke,' Cov., Bish. 'shawmes,' Dou. 'doulcimer,' Gen., AV, RV 'sackbut').—The Gr. σαμβύκη (which Ges., Buhl, Driver, etc., believe to be derived from the Aram.) was a stringed instrument (see vol. iii. p. 461^{a}). The Vulg. *sambuca* is no doubt a translit. of the Gr.; but since *sambuca* may mean 'made of the elder-tree' (from *sambucus*, the elder-tree), the name came to be used for any stringed instrument made of that wood. In Eng. the 'sambuke' had the same general application. Thus Ascham, *Toxophilus*, 26, 'And whatsoever ye judge, this I am sure, that lutes, harps, all manner of pipes, barbitons, sambukes, with other instruments every one, which standeth by fine and quick fingering, be condemned of Aristotle, as not to be brought in and used among them which study for learning and virtue.'

The Geneva translators used the more precise 'sackbut' (possibly, however, from an impression that it was a form of the same word). But the 'sackbut' is unsuitable, for two reasons: it is a wind instrument ('a brass trumpet,' says Chappell, 'with a slide like a modern trombone'); and, whereas the σαμβύκη was particularly shrill, the sackbut had a deep note. Cf. Drayton, *Polyolbion*, iv. 365—

> 'The Hoboy, Sagbut deepe, Recorder, and the Flute';

and Bunyan, *PP* 235, 'He and his Fellows sound the Sackbut whose Notes are more doleful than the Notes of other Music are.' The origin of 'sackbut' is doubtful. Skeat traces it to the Spanish *sacar* to draw out, and *buche* a box, used familiarly of the belly, and thinks that Webster is right in suggesting that the name was given to the instrument because it exhausts one's wind in blowing! Middleton shows how it lent itself to punning, *Spanish Gypsy*, ii. 1—

> '*Alv.*—You must not look to have your dinner served in with trumpets.
> *Car.*—No, no, sack-buts will serve us.'

J. HASTINGS.

SACKCLOTH (שַׂק *saḳ*, *σάκκος*, *saccus*) was a coarse material woven from goats' and camels' hair, and hence of a dark colour, as we see from Rev 6^{12} 'the sun became black as sackcloth of hair' (*σάκκος τρίχινος*); cf., for the colour, Is 50^{3}, Sir 25^{17} 'her countenance darkeneth like sackcloth,' reading *σάκκος* with B; also קֹדֵר 'a mourner,' lit. one who wears dark soiled garments (*RS*^{1} 414, n. 2). A similar material was called by the Romans *cilicium* from being prepared from the hair of the black goats of Cilicia, hence Jerome's rendering *saccus cilicinus* (Rev 6^{12}). From the fact that sacks were made of this coarse haircloth, J in Genesis ($42^{25.\,27.\,35}$) uses שַׂק as a synonym of אַמְתַּחַת; hence through the medium of Greek and Latin our 'sack' and 'sackcloth,' though haircloth is the more appropriate rendering. It was also used for saddle-cloths (Jos 9^{4}).

From the analogy of the evolution of dress among the Egyptians—for which see Erman (*Egypt*, 200 ff., with numerous illustrations)—we may infer that the dress of the Hebrews was originally, as in Egypt, a scant loin-cloth of *saḳ*, tied in a knot in front. This continued to be the distinctive dress of slaves, captives, and such as wished to appeal to the pity of superiors (see the instructive episode 1 K $20^{31\text{ff.}}$). To put on sackcloth is nearly always חָגַר שַׂק 'to gird sackcloth' about the loins (*loc. c.*, Gn 37^{34}, 2 S 3^{31}, and oft.; חָגַר alone, Is 32^{11}, Jl 1^{13}); to take it off was originally פִּתַּח 'to undo [a knot]' (Ps 30^{11}, Is 20^{2}). The linguistic evidence is thus entirely against the current idea that the sackcloth of the OT was worn in the form of a sack 'with an opening for the head, and side apertures for the arms.'

Religious usages are proverbially conservative, and Hebrew customs were no exception (see, *e.g.*, Jos $5^{2\text{b.}}$); hence it is not an unlikely supposition (Schwally, *Das Leben nach d. Tode*, 12 ff.) that the haircloth cincture continued to be regarded as the garment most suitable for religious ceremonies long after it had disappeared from ordinary use. This is at least more satisfactory than the usual explanation that the wish to mortify the flesh led to the use of sackcloth in the frequent instances where it is associated with fasting as an outward and visible expression of penitence, or in cases where confession and supplication are combined, as indeed is most frequently the case (1 K 21^{27}, Neh 9^{1}, Jon $3^{5\text{f.}}$, Jth $4^{10\text{ff.}}$ etc.). In most cases, even when not expressly mentioned, there was the accompaniment of ashes (Dn 9^{3}, Mt 11^{21}, Lk 10^{13}) or earth (Neh 9^{1}) upon the head. Hence the author of Baruch speaks of putting on 'sackcloth of prayer' (4^{20}; see Comm. for alternative rendering). The extravagances of Jon 3^{8}, Jth 4^{10}, where even the cattle are clothed in sackcloth, are scarcely historical. In the latter passage the altar, also, is similarly covered (Jth 4^{11}). That the sackcloth in such cases was usually worn next the skin (עַל־הַבָּשָׂר)—originally, as we saw, it was the only garment—even by women (Is 32^{11}, Jth 9^{1}, 2 Mac 3^{19}), seems beyond doubt (see 2 K 6^{30}, Job 16^{15}, which are often wrongly, as we think, taken to be exceptional cases).

Fondness for 'the old paths,' and the desire to furnish an object-lesson in simplicity of dress, as of life, in the midst of increasing luxury, are doubtless the reason that haircloth was the characteristic material of a prophet's dress (Zec 13^{4} RV; cf. Rev 11^{3} *προφητεύσουσιν . . . περιβεβλημένοι σάκκους*). Elijah was distinguished by a mantle of hair (2 K 1^{8} RVm). John the Baptist's only garment, like that of his prototype, was of camels' hair (Mt 3^{4}, Mk 1^{6}). Isaiah, on a particular occasion, wore even the primitive loin-cloth of *saḳ* (20^{2}).

The universal use of this black haircloth (שַׂק) as the appropriate dress of those mourning for their dead probably has its root in the circle of primitive thought above referred to—the intention being to do honour to the disembodied spirit (cf. Schwally, *op. cit.*). It was worn not only in cases of private mourning (Gn 37^{34}, 2 S 3^{31} and oft.), but in lamentations over public calamities (Am 8^{10}, Jer 48^{37}, La 2^{10}, 1 Mac 2^{14}). Further, just as prayer in this garb might avert threatened private bereavement (Ps 35^{13}), so might it avert—when combined with humility and penitence—a great national misfortune (Jer 6^{26}, Jl 1^{13}, Jth 4^{12}). Both ideas are frequently combined—mourning for past calamities and prayer for their speedy removal (1 Mac 3^{47}, 2 Mac 2^{25}, also Am 8^{10}, and other passages cited).

A. R. S. KENNEDY.

SACRAMENTS.—The word *sacramentum* (*sacrare* = 'to dedicate') originally meant 'something set apart as sacred, consecrated, dedicated.' As a technical legal term it was used of the sum which the two parties to a suit deposited *in sacro*, and of which the winner of the suit recovered his part, while the loser forfeited his to the *ærarium*. Hence it came to mean the suit itself, *causa controversia* (Smith, *Dict. of Gr. and Rom. Ant.* ii. p. 958). *Sacramentum* was also used actively of the 'thing which sets apart and devotes.' As a technical military term it designated either the 'preliminary engagement' entered into by recruits, or (much more often) the 'military oath of obedience' to the commander. Under the Empire the *sacramentum* which soldiers were obliged to take to their *imperator* was often taken by subjects, whether citizens or provincials, to the emperor (Tac. *Ann.* i. 7, 8), in recognition of his *proconsulare imperium* throughout the Empire. From Horace (*Od.* II. xvii. 10) onwards it is sometimes used of any 'oath or solemn engagement.'

The first appearance of the word *sacramentum* in connexion with Christianity may be called accidental. It occurs in a familiar passage in the frequently quoted letter (*Ep.* 96) of the younger Pliny to the Emperor Trajan. It was stated of the Bithynian Christians *quod essent soliti stato die ante lucem convenire carmenque Christo quasi deo dicere secum invicem, seque sacramento non in scelus aliquod obstringere.* There is not much doubt that the witnesses whom Pliny quotes referred to the obligation under which every Christian lies to renounce the devil and all his works, and of which the public service of the Church reminds him. Possibly the service to which allusion is made contained an express renewal of the baptismal pledge. That Pliny uses the word *sacramentum* to express this obligation or pledge is no more than an interesting coincidence. It was a natural word to use; and neither *jusjurandum* nor *promissum* would have expressed the meaning better. Yet Lightfoot is inclined to think that it means 'sacrament' in the Christian sense, and that Pliny has here 'confused the two sacraments,' the wording pointing to the baptismal pledge, while the context about the early hour and the stated day points to the eucharist (*Epp. of S. Ignatius*, vol. i. p. 52). It may be doubted whether the word *sacramentum* had as yet acquired among Christians any specially Christian meaning; and it is improbable that the Bithynian Christians used the word in a technical sense, or that Pliny uses the word because they had done so. The word is his, not theirs; and he employs it in the ordinary classical sense.

As a Christian term, *sacramentum* makes its first appearance in the Old Latin and in Tertullian. Both in Lat-Vet. and Vulg. it is sometimes used to translate *μυστήριον*. Cod. Bob. (k) has it Mt 13^{11}; Cod. Palat. (e) Lk 8^{10}; Cod. Clar. (h) Eph 1^{9} $3^{3.\,9}$ 5^{32}, 1 Ti $3^{9.\,16}$, Ro 16^{25}; Vulg. has it Eph 1^{9} 3^{3} (not ^{4}) ^{9} 5^{32}, Col 1^{27} (not ^{26}), 1 Ti 3^{16} (not ^{9}), Rev 1^{20} 17^{7} (not ^{5}).

But the more common rendering of *μυστήριον* is *mysterium*; and sometimes in consecutive verses first one word is used and then the other. In OT *sacramentum* occurs Dn $2^{18.\ 30.\ 47}$ 4^{6}, To 12^{7}, Wis 2^{22} 6^{24}, in all which places LXX has *μυστήριον*. But *mysterium* is also found, sometimes side by side with *sacramentum* (Dn $2^{18.\ 19.\ 28.\ 30}$), even in the same verse (^{47}). Tertullian uses *sacramentum* as the rendering of *μυστήριον* in passages where Vulg. has *mysterium* (1 Co 13^{2}, *Res.* 23; 1 Co 14^{2}, *adv. Marc.* v. 15; Eph 6^{19}, *adv. Marc.* v. 18). It is his usual word.

Three elements seem to have been at work in determining the Christian use of the word: (1) the original passive sense, 'a thing set apart as sacred'; (2) the active sense, 'that which sets apart,' especially an oath or pledge of fidelity; (3) the Greek term *μυστήριον*, to which it was regarded as equivalent. It is obvious that all these ideas coalesce very well respecting those rites which have been called sacraments, especially baptism and the eucharist.

But in the first instance the use of the term was very much wider. It was used to designate not only religious rites, but doctrines and facts. Almost any external form, whether of word or action, which conveyed or symbolized a religious meaning might be called a *sacramentum*. It will be worth while to examine some of the passages in which the word occurs in Tertullian and Cyprian.

Tertullian, after pointing out that even the heathen recognize avoidance of the public shows as the mark of a Christian, remarks that the man who puts aside the mark of the faith plainly denies the faith. *Nemo in castra hostium transit . . . nisi destitutis signis et sacramentis principis sui* (*de Spect.* xxiv.). Again, with regard to God's prohibition of idolatry, he says: *Huic sacramento militans ab hostibus provocor. Par sum illis, si illis manus dedero. Hoc defendendo depugno in acie, vulneror, concidor, occidor. Quis hunc militi suo exitum voluit, nisi qui tali sacramento eum consignavit* (*Scorp.* iv.)? In both these passages we have little more than the Roman military oath used metaphorically of the Christian's allegiance to God. In *Apol.* vii. we get a stage further, when he calls the horrible rite, of which Christians were often accused, in which a child was killed and eaten, *sacramentum infanticidii*. It is in this treatise that the use of the word is specially frequent. In contending that Judaism, and therefore Christianity, is far more ancient than heathenism, he says: *ipsa templa et oracula et sacra unius interim prophetæ scrinium sæculis vincit, in quo videtur thesaurus collocatus totius Judaici sacramenti et inde jam nostri* (xix.); where *sacramentum* seems to mean 'revelation,' or 'religion,' or 'dispensation.' It has a similarly indefinite meaning in the challenge respecting Christian abstention from heathen temples and nocturnal rites: *omnem hinc sacramenti nostri ordinem haurite, repercussis ante tamen opinionibus falsis* (xv.). In the plural the word is used of the doctrines of the Christian faith. Whence, he asks, did pagan philosophy get its doctrine of future rewards and punishments? *Nonnisi de nostris sacramentis* (xlvii.). OT types he calls *figurarum sacramenta* (*adv. Marc.* v. 1). In the treatise *de Baptismo* we reach the more definite use of the term. It opens with the words, *Felix sacramentum aquæ nostræ, quia ablutis delictis pristinæ cæcitatis in vitam æternam liberamur.* And so also of the eucharist: *Proinde panis et calicis sacramento jam in evangelio probavimus corporis et sanguinis dominici veritatem adversus phantasma Marcionis* (*adv. Marc.* v. 8). And again of both sacraments: *ad sacramentum baptismatis et eucharistiæ admittens* (*ib.* iv. 34).

Cyprian seems to have learned from his 'master' to use the word sometimes in its classical sense, sometimes with a vagueness which was possibly deliberate, sometimes quite definitely of baptism and the eucharist. Of Christian martyrdoms he says: *O quale illud fuit spectaculum Domini, quam sublime, quam magnum, quam Dei oculis sacramento ac devotione militis ejus acceptum* (*Ep.* x. 2). So of a supposed betrayal of the Christian faith, he says: *divinæ militiæ sacramenta solvantur, castrorum cælestium signa dedantur* (*Ep.* lxxiv. 8). He calls the Passover a *sacramentum* (*de Cath. Eccles. unit.*). But it is not easy to define its meaning when he speaks of *ecclesiæ veritas et evangelii ac sacramenti unitas* (*Ep.* liv. 1), or, again, of *veritatis jura et sacramenta* (*Ep.* lxxiii. 20). Comp. *sacramenta cælestia* (*Ep.* lxxiv. 4), a phrase which he uses several times. He says that *totum fidei sacramentum in confessione Christi nominis esse digestum* (*Ep.* xxx. 3); and that the Lord's Prayer contains many and great *sacramenta* (*de Dom. Orat.* 9); where 'doctrine' seems to be the meaning. In baptism, water and the Spirit are each of them called a *sacramentum*; and, as distinct from heretical baptism, those who receive the Church's baptism *utroque sacramento nascuntur* (*Ep.* lxxiii. 21). Immediately afterwards he uses *baptismi sacramentum* of the whole rite. So also of the eucharist he says: *Item in sacerdote Melchisedech sacrificii dominici sacramentum præfiguratum videmus* (*Ep.* lxiii. 3). He calls the consecrated wine *sacramentum calicis*[*] (*de Lapsis*, xxv.); and he appears to call the whole rite *sacramentum crucis*, when he says, *de sacramento crucis et cibum sumis et potum* (*de Zelo et Livore*, xvii.). On Cyprian's use of *sacramentum*, see an important note by E. W. Watson in *Studia Biblica*, iv. p. 253.

Augustine says that the bread and wine *ideo dicuntur sacramenta, quia in eis aliud videtur, aliud intelligitur* (*Serm.* 272). And again that *Signa cum ad res divinas pertinent, sacramenta appellantur* (*Ep.* cxxxviii.). But there must be resemblance between the two: *si enim sacramenta quamdam similitudinem earum rerum quarum sacramenta sunt non haberent, omnino sacramenta non essent* (*Ep.* xcviii.). Sacraments are *verba visibilia, sacrosancta quidem, veruntamen mutabilia et temporalia* (*con. Faustum*, xix. 16). *Accedit verbum ad elementum et fit sacramentum, etiam ipsum tanquam visibile verbum* (*in Joh. Tract.* 80). In one place he enumerates baptism, unction, the eucharist, and imposition of hands as sacraments[†] (*de Bapt. con. Don.* v. 28); in another he asks, *Quis novit Dei omnia sacramenta? Quid ait Apostolus? Si sciero omnia sacramenta, si habeam omnem prophetiam* (*Serm. ad Cæsar. eccles. plebem*, 3). This last passage is specially interesting, because in Vulg. the word is not used [though Aug. testifies that Old Lat. read *sacramenta*]; it has, *si habuero prophetiam et noverim mysteria omnia* (1 Co 13^{2}).

The general outcome is on the whole this, that the word *sacramentum* had two main uses, one very vague, and the other fairly definite. On the one hand, it might be used of anything, whether word, statement, or fact, which expressed or implied religious truth. On the other, it was applied to certain Christian rites, not fixed in number, but understood to be few, of which the chief were baptism and the eucharist. No rite had a better claim to be called a sacrament than these two, which fully realized the ideas connoted by the term, and were instituted by the Lord Himself. But there were other rites, mentioned in Scripture and sanctioned by the Church, to which the term might rightly be given; and the rite which was commonly placed side by side with these two as being of almost equal rank was unction or chrism, which is generally applicable to all Christians and has at least the authority of apostolic tradition.

---

[*] In harmony with this idea Rabanus Maurus (*de Cler. institutione*, i. 24, 31; Migne, *Pat. Lat.* cvii. 316) makes baptism, unction, the body, and the blood of the Lord to be four sacraments, expressly counting the body and the blood as two. Paschasius Radbertus is said to do the same; but he speaks of *sacramentum* (not *-ta*) *corporis et sanguinis* (*de Corp. et Sang. Dom.* iii. 2, 4; Migne, cxx. 1275).

[†] Similarly in a passage which was quoted almost *verbatim* at the beginning of Art. 26 (=25) in the Articles of 1553: *Sacramentis numero paucissimis, observatione facillimis, significatione præstantissimis, societatem novi populi colligavit* [Christus], *sicuti est baptismus Trinitatis nomine consecratus, communicatio corporis et sanguinis ipsius, et si quid aliud in scripturis canonicis commendatur* (*Ep.* 54; cf. *de Doct. Chr.* iii. 9).

The number three was no doubt attractive; but still more so the number seven; and it is remarkable that a list of seven sacraments does not seem to have been made earlier than the 12th cent., when first Gregory of Bergamo (*de Euchar.* 14), and then Peter Lombard (*Sent.* IV. ii. 1) fix on this limit. It was adopted by Thomas Aquinas and stereotyped by the Council of Trent. But it is neither scriptural nor logical. Our choice lies between two and an indefinite number.* Scripture plainly marks out two. They were instituted by Christ, and He Himself ordained the outward visible signs for them. In whatever sense Christ may be supposed to have instituted any of the other five,—confirmation, penance, unction, orders, and matrimony,—He ordered no special sign for them; and it is rash to say more than that they are among the more important of the many rites to which the name of sacrament may be given.† For a discussion of any one of the seven see the separate articles in the dictionaries. But with regard to matrimony it may be here pointed out that the Vulgate rendering of Eph 5^{32} *sacramentum hoc magnum est*, had considerable influence in causing marriage to be regarded as a sacrament.

There is a difference between the two great sacraments of the Gospel, in that baptism may be received once only, and the eucharist daily. The one confers an indelible character; the other does not. The same difference divides the other five. Confirmation and orders resemble baptism. Once baptized, always baptized; once confirmed, always confirmed; once a priest, always a priest. No one may have these rites repeated for himself; nor is there any need of repetition. But penance and unction admit of repetition. Matrimony belongs partly to the one class and partly to the other. No repetition of the rite is admissible between the same two parties; but when death has removed one, the other is free to have the rite repeated. Augustine writes thus of baptism and orders: *utrumque enim sacramentum est; et quadam consecratione utrumque homini datur: illud, cum baptizatur, istud, cum ordinatur: ideoque in Catholica utrumque non licet iterari* (*Con. ep. Parmen.* ii. 28). With regard to matrimony he says that its benefits are threefold, *fides, proles, sacramentum*; and he explains the last, *ut conjugium non separetur, et dimissus aut dimissa nec causa prolis alteri conjungatur* (*de Gen.* ix. 12: cf. *con. Faust.* xix. 26; *de Nupt. et Concup.* i. 11). See, further, Harnack, *Hist. of Dogma* [Eng. tr.], vi. 201 ff.

The question, whether there were sacraments under the OT, is, like the question of the number of sacraments under the NT, to a large extent a question of definition. What is meant by a sacrament? Definitions which exclude all but baptism and the eucharist of course exclude all OT rites. But those who, with Augustine, regard sacraments as essential to the life of a religious community must allow sacraments to the Jewish Church. Yet if, as he holds, the sacramental character of marriage consists in its indissolubility, then marriage, which is a sacrament under the Christian dispensation, was not a sacrament under the Jewish, which allowed divorce. The sacrifices and other rites were sacraments to the Jews, necessary then, but superfluous now. The difference is this: *sacramenta Novi Testamenti dant salutem; sacramenta Veteris Testamenti promiserunt Salvatorem. . . . Mutata sunt sacramenta; facta sunt faciliora, pauciora, salubriora, feliciora* (*in Ps.* lxxiii. 2). Both, however, tell of the passion and resurrection of Christ, the one by promising, the other by commemorating (*con. Faust.* xix. 16).

Literature.—Juenin (French Oratorian), *Commentarius Historicus et Dogmaticus de Sacramentis*, Lyons, 1717; Chardon, *Histoire des Sacrements*, Paris, 1745; Hahn (Protestant), *Doctrinæ Romanæ de Numero Sacramentorum septenario rationes historicæ*, Breslau, 1859, and *Die Lehre von den Sacramenten*, 1864. A. *SACRIFICE IN OT TIMES.*

i. Definition and Name.—The rites which are comprehended under the name of Sacrifice, while exhibiting many forms and embodying an equal complexity of ideas, yet display certain constant features which invest them with a character of unity. Four notes will serve to elucidate their place and function in distinction from other manifestations of the religious life.

(*a*) Sacrifice belongs to the class of specifically religious acts, known as cultus or worship, by which man seeks to draw near to God. When religion is permeated by intense moral earnestness, greater importance is ascribed to character and conduct than to worship, yet even in the perfectly ethical religion of Christianity the cultus has survived as at once a cherished privilege and a sacred obligation. In those religions in which the ethical interest is weak or absent, the paramount interest attaches to the appropriateness and impressiveness of the ceremonial approach to the Deity. And among the elements of the cultus, by the consent of antiquity, the rite of sacrifice excelled aud overshadowed all other ordinances in the efficacy of its appeal to the object of worship.—(*b*) Sacrifice is distinguished from other ordinances of worship in that it takes the form of the rendering to God of a material oblation. The elements of worship are at bottom two—forms which express the condescension of God to man, and forms which express the appeal of man to God. Of these the first has its familiar example in the proclamation of the word of God, the second in prayer. And with prayer sacrifice manifestly has a close affinity. To the universal religious instinct of antiquity, however, it seemed that the spiritual offering of aspiration and petition was lacking in weight and efficacy. There was therefore associated with it, and so prominently as to eclipse it, the sacred rite in which the worshippers made over to God or shared with Him material things of a kind which ministered to human wants.—(*c*) Sacrifice is distinguished from other acts in which material things are consecrated to the service of God by the circumstance that the sacrifice is consumed in the service. The spirit of religious devotion finds many ways of expressing itself—*e.g.* in the consecration of buildings for worship, in gifts of lands, in personal service, and to such acts the term sacrifice may be popularly extended; but in strict usage it is desirable to confine it to the class of oblations which not only spring from self-abnegation but also perish in the using.—(*d*) The effect of sacrifice, in the intention of the worshippers, is by pleasing the Deity to enjoy communion with Him, and through union with Him to gain deliverance from threatened evil and possession of coveted good. This formula roughly expresses the end of religion, and, in view of the ancient and commonly accorded position of sacrifice as the staple religious observance, it follows that communion with a Divine being, with the security involved in such communion, must also be the end generally contemplated in sacrificial practice.

---

* Hugo de St. Victore, following the Augustinian definition of a sacrament as *rei sacræ signum*, enumerates some twenty or thirty lesser sacraments, as the ritual use of holy water, of ashes, of palm-branches, of the paschal candle, of bells, and of curtains; also certain acts, as making the sign of the cross, bowing the head or the knee; and certain utterances, as *Dominus vobiscum*, *Alleluia*, the recitation of the *De profundis*, the *Jubilate*, the Creed, etc. (*de Sacramentis*, II. ix. 1–9; Migne, *Pat. Lat.* clxxvi. 471).

† The anointing of a king, the washing of the saints' feet, and the salt given in certain Latin rites to catechumens, have all been called 'sacraments,' *e.g.* in the Gelasian Sacramentary is a prayer *ut hæc creatura salis in nomine Trinitatis efficiatur salutare sacramentum.*

In the definition of sacrifice, an attempt has usually been made to formulate the contemplated end more narrowly. 'A sacrifice properly so called,' to quote one of the older examples, 'is the solemn infliction of death on a living creature, generally by effusion of its blood, in a way of religious worship, and the presenting of this act to the Deity, as a supplication for the pardon of sin, and a supposed means of compensation for the insult and injury thereby offered to His majesty and government' (Pye Smith, *Sacrifice and Priesthood* ^{3}, p. 3). The fault of this definition is that it is framed with reference to the single class of piacular sacrifices, and further, that it makes the questionable assumption that the piacular sacrifices consistently embodied the idea that the slaughter of the victim furnished a satisfaction to outraged Divine justice. Among writers of the anthropological school, on the other hand, the specific effect of sacrifice is often defined as being to remove from the worshipper restrictions or taboos, and to invest him with a character of sanctity. Its efficacy, in short, is conceived as being of a magical kind, —the persons or things hallowed being, as it were, charged with an energy of physical holiness, and thereby fitted to move and act in the religious sphere. In this sense the following definition has been given in a recent monograph:—'Sacrifice is a religious act which, by the consecration of a victim, modifies the condition of the moral agent who performs it, or of certain objects with which it is concerned' (Hubert et Mauss, *Essai sur le Sacr.* p. 41). Natural, however, and widely vouched for as is the idea that the victim imparts a character or an infection of sanctity, the interpretation of the *modus operandi* of the rite has fluctuated too widely to justify us in treating the above conception as vital to the idea of sacrifice. The only constant element has been the belief that, however operating, it pleased the object of worship and secured Divine favour.

Summing up, then, we define sacrifice as an act, belonging to the sphere of worship, in which a material oblation is presented to the Deity and consumed in His service, and which has as its object to secure through communion with a Divine being the boon of His favour.

The *names* used to describe the rite do not suggest a definition, but serve to emphasize certain of the elements which have been noted. *Sacrificium* indicates that it is an act within the sphere of holy things, or in the region of the cultus, while the appropriation of such a general term to the particular ordinance illustrates what has been said of its central position in pre-Christian worship. The group of words derived from *offerre* (oblation, offering, Germ. *Opfer*), connect themselves with the ritualistic act of the presentation of the victim, and also adumbrate the interpretation of sacrifice as a gift (cf. προσφορά). θυσία indicates that the typical form involved the slaughter of a victim.

Sacrifice is commonly referred to in OT by specifying the two leading varieties—viz. the Burnt-offering (עֹלָה), and the Sacrificial Feast (שֶׁלֶם). There are, however, two terms, which have a generic as well as a specific meaning. The מִנְחָה (a gift) was used in the older period as inclusive both of bloody and unbloody offerings (Gn $4^{4.5}$), but in P and later prophetic literature it has been appropriated to the particular and subordinate class of cereal offerings (Lv 2). The generic term of the later period is קָרְבָּן (הִקְרִיב to bring near, present, Ezk 20^{28} 40^{43}, Lv $1^{2ff.}$). Another term which comes near to a generic significance is אִשֶּׁה, an offering made by fire. It is used not only of animal offerings, but of the cereal offering (Lv 2^{11}), and even of the shewbread which was not consumed by fire, but became the portion of the priests ($24^{7.9}$). In NT θυσία is often used generically (Mt 9^{13}, Mk 9^{49} etc.). Elsewhere θυσία is bracketed with another term to give a comprehensive description of sacrifice—δῶρά τε καὶ θυσίαι (unbloody and bloody offerings, He 5^{1} 8^{3}), θυσίαι καὶ προσφοραί (the same in inverted order, He 10^{5}). The idea is also expressed by enumerating four varieties (10^{4}).

In AV the term 'sacrifice' is of frequent occurrence, being inserted into the title of many of the varieties of offering which have a special Heb. designation (see art. OFFERING). In RV the usual practice is to employ it only where the Heb. text has זֶבַח or a derivative, thus giving it the connotation of the sacrificial feast, while 'oblation' is appropriated to offerings of a different type. Exceptionally RV retains it as translation of חַג (Ps 118^{27}), and of מִנְחָה (141^{2}). In NT it renders θυσία and θύειν, and is sometimes distinguished from the 'offering' as the bloody from the unbloody.

ii. THE ORIGIN OF SACRIFICE.—The controversies in which this subject has been so fruitful have passed through two phases. In the earlier period the keenly debated issue was whether the institution was of Divine appointment, or merely devised by man as an instrument for satisfying the wants of his spiritual nature. In recent times the human origin has usually been assumed, but only as a fresh starting-point for the discussion of rival theories as to the significance originally attached to the rite, its primitive form, and the stages in the evolution of sacrificial ritual.

A. *The theory that Sacrifice was instituted by Divine authority*, while strongly contended for by many Reformed theologians, cannot be sustained even on the basis of the biblical narrative. The argument on which chief reliance was placed was that supplied in the account of Abel's sacrifice (Gn 4^{3-5}), and the apostolic reference to the reason of its acceptance by God (He 11^{4}). There is, it is admitted, no record of a Divine enactment, but Divine sanction was known to support it from the period of Abel's sacrifice; and the hint that by faith Abel offered a more acceptable sacrifice than Cain, it is held, justifies us in concluding upon a Divine origin. For faith necessarily implies that there must have been a previous revelation touching the ordinance: a positive enactment is presupposed as its object, since without such it must have been, not faith but superstition. But it is at least as natural a view of the matter that Abel's faith was a venture of trust called forth by a general assurance of the Divine holiness and mercy. The real spring, perhaps, of the zeal on this side of the controversy is disclosed in the argument that a human origin is precluded by the apostolic condemnation of will-worship (ἐθελοθρησκία, Col 2^{23}), *i.e.* of the usurpation by the creature of the Divine prerogative in the sphere of holy things. Concede that sacrifice, the distinctive feature of OT worship, was of human devising and yet acceptable to God, and it became impossible to make good against Roman, Lutheran, and Anglican practice that no festivals or rites were lawful unless expressly ordained in Scripture. As the force of this dogmatic prepossession has considerably abated, it is easy to admit that the 'will-worship' condemned by St. Paul did not include usages shaped by piety and discovered in experience to be for spiritual profit.

For a complete statement of the arguments for a Divine origin, with accompanying refutations, reference may be made to Spencer, *de Ratione et Origine Sacrificiorum*, iv. 2. The subject is also very fully discussed by Fairbairn (*Typology of Scripture*, i. 286 ff.), who advances the additional argument that in making for our first parents 'coats of skins' (Gn 3^{21}) God prompted and authorized the rite which serves as a covering of the soul. His position is, however, a mediating one, as he holds that, assuming even that it was merely suggested by the self-revelation of God, and afterwards approved, its essentially Divine origin may, apart from a positive enactment, be maintained.

In later times the case for the human origin has been strengthened. Not only does J manifestly treat it as the natural, self-evident mode of worship, but P ignores its existence altogether in pre-Mosaic times. In view of this conflicting tradition, and still more because of modified conceptions as to the range of the authoritative in Scripture, there has been a growing indisposition to use the scriptural material as a basis for a dogmatic pronouncement. The theory of a Divine institution, it should be further said, stands or falls with the theory of a primitive revelation, and this theory has even in theological schools been very generally abandoned. The only sense in which the Divine origin can be held is that, by creating man for religion, God is the author of the institution in which the religious sentiment found ancient and universal expression.

B. *The theories which ascribe to sacrifice a human origin* may here be briefly outlined, inasmuch as, while operating mainly with general anthropological material, they seek confirmation to some extent in the biblical sacrificial system. These theories may be best grasped in accordance with the views which they presuppose as to the primitive form of religion, and by which, it may be added, they must mainly be judged.

(1) In the first place, we meet with two theories which rest on the assumption that the religion of primitive man was a monotheism. Either by way of intuition, or as the result of reflexion on the world and man, it is supposed that the human mind had acquired a knowledge at least of the unity and of the cardinal attributes of God. Under the impression of this knowledge man may be supposed to have gone on to shape sacrificial rites, and that from either of two motives. (*a*) *The Expiatory theory* is to the effect that man, conscious of sin and of the punishment which it merits, substituted an animal victim which should endure the penalty due to himself, and so make his peace with God. This interpretation of the rite, it is true, has usually been identified with the advocacy of a Divine institution, but it at least holds its place in the popular mind—apart from any question of origin—as furnishing the explanation of the age-long searching after God through the ritual of the slaughtered victim and the smoking altar.—(*b*) *The Homage theory of Sacrifice* has been more favoured by those writers who regard the institution as a natural outgrowth from a primitive monotheism. On this view man was impelled to seek closer communion with God, not out of a sense of guilt, but rather out of a desire to acknowledge his dependence and profess his obedience. To give expression to these devout sentiments he fell back on the language which is more powerful than speech—the language of action (Warburton, *Div. Leg.* iv. 4). 'To such men (Cain and Abel) there came thoughts of one who is ruling them as they rule the sheep, who in some strange way makes the seeds grow which they put into the ground. . . . How shall they confess Him, and manifest their subjection? Speech, thanksgiving are not the most childlike way of testifying homage. Acts go before words' (Maurice, *Sacrifice*, p. 6).

The fundamental objection to the above two theories is that they attribute to primitive man a theology which it is hard to associate with the childhood of the race. The Expiatory theory not only presupposes a primitive knowledge of God transcending the thoughts of childhood, but it credits man with a sense of sin, and with a valuation of death as the wages of sin, which belong to a later period of spiritual development. Moreover, the theory conflicts with the preponderantly joyous character of early sacrifice. The Homage theory is attractive to spiritual and philosophical minds when seeking a justification for sacrifice, but can hardly be supposed to have originated it.

(2) A second group of theories is connected with the assumption that the deities of primitive man were beings of a low anthropomorphic order—whether nature-spirits, or ancestral ghosts, or fetishes. From this point of view it naturally seems that the worshipper has somewhat to offer which his Deity needs and will gratefully accept. How man ministers to this need, and how his ministering proves effectual, may be conceived in various ways suggested by examination of the possible motives.

(*a*) *The Gift theory* has it that the offerings were viewed as presents, and that the offerer reckoned on their being received with pleasure and gratitude. A chief or a king is approached with gifts, and the gods expect the same. The currency of this interpretation in classical antiquity is vouched for by Cicero. 'Let not the impious dare to appease the gods with gifts. Let them hearken to Plato, who warns them that there can be no doubt of what God's disposition toward them will be, since even a good man will refuse to accept presents from the wicked' (*de Leg.* ii. 16). In the older literature it is maintained by Spencer, who thinks it self-evident that this was the idea cherished by man in his primitive simplicity (ii. 762). Tylor and Herbert Spencer, though differing as to the primitive object of worship, find the origin of sacrifice in the idea of a gift. According to the latter, 'the origin of the practice is to be found in the custom of leaving food and drink at the graves of the dead, and as the ancestral spirit rose to divine rank the refreshments placed for the dead developed into sacrifices' (*Principles of Sociology*, § 139 ff.). Among the older writers it was commonly held that such an account of the origin of sacrifice could not be accepted in view of the place which it fills in the system of revelation (Bähr, *Symbolik*, i. p. 276); but within the last generation it has come to be regarded as by no means axiomatic that value implies dignity of origin. A more forcible objection is that the blood, which figures so prominently in sacrificial ritual, can scarcely have been selected as a desirable gift. And this criticism is effective in so far as it compels the admission that the whole system of sacrifice has not been shaped by the idea of the gift. There is, besides, reason for holding that the fundamental conception, while akin to that already stated, is more definite and suggestive.

(*b*) *The Table-bond theory* exchanges the general conception of a gift for that of a meal of which the Deity partakes in company with the worshippers. The germ of the theory is to be found in Sykes, who traced the efficacy of sacrifice, which is commonly a joint-meal, to the fact that 'eating and drinking together were the known ordinary symbols of friendship, and were the usual rites of engaging in covenants and leagues' (*Nature of Sacrifices*, p. 75). On this view sacrifice has more virtue than a mere gift; it knits the god and the worshippers together by the bonds created by the interchange of hospitality. In the hands of W. R. Smith (*RS* p. 269 ff.) the theory was developed by the addition that the Deity was united to the worshippers, not merely because of His gratification, but because a common meal physically unites those who partake of it. Whether this latter conception of the *modus operandi* of the meal be primitive is open to doubt, but in view of the materials and form of early sacrifice the conclusion seems irresistible that the original idea of the worshippers was to gratify their God, and strengthen their position in His favour, by joining with Him in the repast.

(*c*) *The theory of a materialistic sacramental communion* is a special development of the last. The hypothesis starts from the observation that at certain stages of civilization religion takes the form of animal-worship, or of the reverence for animals which are believed to share along with man in the Divine nature. At this stage, also, it happens that the sacred animal, which is commonly proscribed as food, is on solemn occasions made to furnish the material of a sacrificial meal. In other words, there is occasionally permitted what has been bluntly described as 'eating the god' (Frazer, *Golden Bough*). The motive for this is suggested by a widespread idea of physical virtue. In eating an animal or a human being the savage is supposed to incorporate 'not only the physical, but even the moral and intellectual qualities which were characteristic of that animal or man.' Similarly it was easy to believe that, if the Divine life resided in a group of sacred animals, a particle of the precious deposit would be distributed among all the recipients, and incorporated with their individual life (*RS*^{2} p. 313). As to whether we may regard as primitive the totemistic conception of the Divine-human affinity of animals, and of the assimilation of the Divine life through eating the totem, there is grave reason for doubt. The totemistic theory of the origin of worship has been widely propagated through the brilliant and learned monograph of W. R. Smith (*Journ. Philol.* ix. 75 ff.), and its fascinating exposition by Jevons (*Introduction to the History of Religion*, 1896); but the main body of English anthropologists refuse to regard it as primitive, while in France the hypothesis has been subjected to close and learned criticism (Marillier, 'La place du Totemisme dans l'évolution religieuse,' in *Rev. de l'Hist. des Religions*, 1897–98). Totemism seems most intelligible when viewed as formed under the play of savage thought or misconception, and as intruding upon and overrunning earlier forms of worship which found a god in nature or the spirits of men.

The theories above mentioned assume that sacrifice was directly called into existence by the religious idea. Another possibility is that the slaughtering of animals or men came to awaken awe and misgivings in the breast of the savage, and that he sought to reassure himself by a procedure which invested such acts with a religious character and sanction.

Amid this mass of speculation the most certain conclusion seems to be that sacrifice originated in childlike ideas of God, and that the fundamental motive was to gratify Him by giving or sharing with Him a meal.

iii. SEMITIC SACRIFICE IN THE PRE-MOSAIC PERIOD.—For the period between the dim region of origins and the consolidation of Israel as a nation a certain amount of material is professedly contributed in the patriarchal narratives of J. The representation given is that sacrifice originated in the first family when the bloody offering of Abel was accepted (Gn 4^{4}); that Noah offered burnt-offerings after his deliverance (8^{20}); and that by Abraham and his line it was practised under a variety of forms and with some diversity of ritual. The chief occasions were times of meeting with God, and other solemn moments of life: the kinds of offering in vogue were the Peace-offering (Gn 31^{54}), the Burnt-offering (22^{13}), the Covenant Sacrifice ($15^{7\text{f.}}$), and the Libation (28^{18}); the sacrificial material consisted of clean beasts and fowls (8^{20}), especially cattle, goats, sheep, and pigeons (15^{9}). Human sacrifice, it is made known to Abraham, is not required by God ($22^{1\text{ff.}}$). It is also recognized that sacrifice is practised outside the pale of the chosen line (Ex 18^{12}, cf. Nu $23^{1\text{ff.}}$).

That the kinds of sacrifice thus distinguished, the material of sacrifice, and other features, correspond to the usage of an early period in the history of Israel is quite certain; but the references do not carry us back to the earliest phases in the evolution of Semitic sacrifice. Between the primitive form of sacrifice and the comparatively complex and elevated cultus mirrored in these narratives there lies a course of development on which attention has been recently focussed owing to the researches of Wellhausen (*Reste arabischen Heidenthums*) and of W. R. Smith (*RS*). For the re-discovery of the stages and factors of this development, reliance is placed on the survivals from heathen Arabia, on the vestiges of Phœnician and other Semitic cults, and especially on the gift of divination which wrests from the phenomena of the matured institution a confession as to the course of its earlier life-history. The special features of Smith's treatment are his insistence on the connexion of primitive sacrifice with totemism, and his scheme showing the derivation of the varieties of sacrifice from the alleged primitive form, while he also supplements Wellhausen's elucidation of the growth of sacrificial ritual and the progressive modification of sacrificial ideas. This reconstructed chapter of history may be outlined as follows :—

(*a*) *Evolution of the varieties of Semitic Sacrifice.*—The original point of departure, as we have already seen, is, according to Smith, the sacramental meal, at which an animal was devoured which was akin both to the god and his worshippers, and which in virtue of its sacred properties served as a cement to bind together in closer union the Divine and the human sharers of the repast (*RS*² 313). On this followed a process of differentiation, giving rise on the one hand to the Sacrificial Feast, on the other to the holocaust. The distinctions between the original sacramental meal and the Sacrificial Feast are two : the former occurs at rare intervals and the flesh is deemed most holy, the latter occurs frequently and the flesh is in use as an ordinary article of diet. The transition is explained on the one hand by the cessation of the belief in the affinity of animals to man, on the other by times of scarcity and a growing taste for animal food. Less obvious is it why the primitive sacrifice, which was essentially a joint-meal, should have developed along a second line into a holocaust. The nexus is supplied by the following train of speculation. So long as the victim was a sacred animal there was but one type of sacrifice—the sacramental meal. When totemistic modes of thought disappeared, and domestic animals supplied the sacrificial material, the victim, since it was no longer deemed to be kin, no longer fulfilled the condition necessary to unite the god and his worshippers. The only victim that fulfilled the condition of being akin to worshippers and worshipped was a human victim, and so on solemn occasions recourse was had to human sacrifices. The eating of human flesh was, however, repugnant to natural feeling, and the human victim was therefore offered as a holocaust. And, naturally enough, when an animal came to be substituted for a human victim the holocaust persisted as the appropriate form (Lect. x.). By this account the evolution is carried forward to the point represented in the beginnings of Hebrew history—where the Sacrificial Feast and the Burnt-offering exist side by side.

(*b*) *Development of Sacrificial Ritual.*—The oldest Semitic form of ritual, it is supposed, is preserved in a description by Nilus of a Saracen sacrifice. 'The camel chosen as the victim is bound upon a rude altar of stones piled together, and the leader of the band, after inflicting the first wound, in all haste drinks of the blood that gushes forth. Forthwith the whole company fall on the victim with their swords, hacking off pieces of the quivering flesh and devouring them raw, with such wild haste that in a short interval the entire camel, body and bones, skin, blood, and entrails, is wholly devoured' (*RS*² p. 338). In this savage rite we see the first stage of usages which were to undergo many modifications before reaching familiar shape.—(1) *The manipulation of the blood*, so important in sacrificial ritual, here begins in the form that the worshippers lap it as it flows, and the god's portion runs out upon the stones. Later the repulsive draught is eschewed, and they are content to be smeared with it—a portion being sprinkled for the god upon the altar or running into a gutter, while some is sprinkled upon the worshippers. This double sprinkling survived to historic times in the Covenant-sacrifice. Ordinarily, however, the whole of the blood was treated as the god's portion, and was conveyed to him on the altar in peace-offerings and burnt-offerings, and also in the later piacular sacrifices.—(2) *Conveyance of other portions to the god.* Assuming that the above-mentioned rite is primitive, the god originally received nothing save a share of the effused blood. Gradually, however, other portions, as fat and entrails, were assigned to him, and the question emerged as to how they were to be conveyed to him. In the case of libations of blood or wine, they could be supposed to reach him by absorption in the ground, while fat was seen to melt, but the solid ingredients presented a difficulty. An early idea was to expose them, and allow them to reach their destination through being devoured by wild beasts. Next, the use of fire came in—originally, as Smith thinks, simply to get rid of the remanent portions, but afterwards as the means of carrying into the sphere of the gods the sublimated essence or the sweet savour of the meal. The usage in which, while the blood is poured out on the altar, the essence of the offering ascends in fire from the altar, is that which has been firmly established at the dawn of Hebrew history (Wellhausen, *op. cit.* 110 ff., 'Opfer u. Gaben'; *RS*², Lect. ix.).—(3) *Modifications of the human meal.* Like the drinking of the warm blood, the eating of the raw flesh had to yield in the course of time to more refined methods. With the appearance of the Burnt-offering it went partially out of use, while in the Sacrificial Feast it appears to have been at first boiled, at a later period roasted.—(4) *Growth of opinion as to the significance of Sacrifice.* The primitive interpretation of the rite as cementing the religious relationship through the eating of the sacred animal disappeared when the people reached the pastoral stage, although the idea lingered that food of any kind had a uniting virtue, and the illicit mystic forms of cultus which continued to be practised to some extent embodied the original idea. A new interpretation gained ground with the rise of the institution of property. The worshipper now had somewhat whereof he was absolute disposer, not joint-trustee along with the Deity, and it had thus become possible for him to confer on the latter a favour by the bestowal of what the worshipper was personally entitled to enjoy. In this way the Gift theory, which is imbedded in so many terms of the sacrificial vocabulary, came into existence. The institution of property, in fact, from the first exercised an influence that on the whole has worked for religious deterioration. At a later stage the gift was understood to be in some sense a substitute for the worshipper.

The Wellhausen-Smith contribution to the evolutionary account of Semitic sacrifice is a brilliant piece of work which has profoundly influenced research in cognate fields. But the attractiveness of the ingenious combinations, supported as they are by vast and *recherché* erudition, necessitates a reminder of the extremely speculative and precarious character of many of the positions. The theory credited to Semitic heathenism in its primitive stage, as already pointed out, is highly problematical. The construction in question postulates the idea of a communion between the god and the worshippers due to their assimilating the same food, but it cannot be held to be proved that this natural enough idea sprang ultimately from a theory that the sacrifice was efficacious because the victim was akin to both. Further, if the god and his votaries were already kin, it is not clear that their union could be more closely cemented by eating an animal which imported into the union no more than was already found in it. As regards the genealogical scheme, while Smith makes the holocaust a late derivative, and by a complicated process, from the sacramental meal, the truth is that the two types are always found existing side by side—among the Phœnicians as well as among the Hebrews; and, so far as historical evidence goes, there is no strong reason for according priority to either (Hubert et Mauss, p. 32 ff.). A weakness of Smith's position is that his exposition of primitive Semitic ideas is largely based on late Arab practice; and the next stage must be to test his speculations by the results of the researches now being actively prosecuted in the older field of Babylonian and Assyrian worship (Zimmern, *Beiträge zur Kennt. der bab. Relig.*).

iv. SACRIFICE IN ANCIENT ISRAEL.—From the speculative field of prehistoric evolution we advance to the period which extends from the Exodus to the rise of the 8th cent. prophets. The question which encounters us on the threshold is whether, and to what extent, Moses organized a system of sacrificial worship. The Pentateuch, in its main body, represents the work of Moses in this department as epoch-making and final. The Priestly Narrative, in the first place, makes no mention of a use of sacrifice anterior to Moses, and thus suggests, not indeed that it was not previously practised, but that it had then no place in the religion of the chosen line, and that it had no Divine sanction. In the next place it ascribes to Moses, as the instrument of God, an elaborate code which precisely, and with an aspect of finality, determines 'the when, the where, the by whom, and in a very special manner the how' of sacrifice (Wellh. *Hist. Isr.* p. 52). But the representation is in both particulars unhistorical. The use of sacrifice in primitive Israel, antecedently more than probable, is vouched for by independent tradition. The promulgation by Moses of an elaborate sacrificial code, which treats ritualistic correctness of detail as of paramount importance, is in itself improbable, and is inconsistent with the highly flexible practice under the Judges and the early monarchy, as well as with the prophetic conceptions of the nature of the Mosaic legislation (see below). It is indeed difficult to believe that Moses left no impress upon the forms of the religious life of the people which remembered him not only as emancipator, but as prophet (Dt 34^{10}), and it may well be supposed that he stands for an early stage in the evolution of the institution which culminated in the system of the Priestly Code; but it would be a hopeless task to try to disengage the Mosaic element in the archaic usages which P certainly embodies. In these circumstances it is desirable to base the account of ancient Heb. sacrifice on another group of sources. Foremost among these is JE, whose patriarchal narratives illustrate a comparatively early cycle of ideas, and the Book of the Covenant (Ex 20^{24}–23^{19}), which chronicles or corrects certain features of ritual practised down to the 9th century. In addition, great value attaches to the incidental references in Judges, in the books of Samuel, and in the early Prophets.

(1) *The Sacrificial material* consisted of the agricultural produce of Canaan, animal (Ex 22^{30}), cereal, and liquid (v.^{29}). The victims included—of large cattle, the old and young of the ox-kind; of small cattle, sheep and lambs, goats and kids. Of birds, the pigeon might be used in the Burnt-offering. Wild animals and fish, which figure in the Babylonian ritual, were not offered. The blood and the fat were specially appropriated to Jehovah, and of animal products presented to Him we hear of wool (Hos 2^{5}), but not of the libation of milk. Meal, which was baked into cakes (Jg 6^{19}, Am 5^{22}), was the common form of the cereal offering. The valuable products of oil (Gn 28^{18}, Mic 6^{7}) and wine (1 S 1^{24}, Am 2^{8}) were ingredients of the sacrificial meal, and were doubtless also offered in the form of a libation. The sacrificial material of the Carthaginians agrees with this, except that their code allowed many species of birds and also milk (*CIS* i. 237).

(2) *The varieties of sacrifice* were of two types—that in which the offering was wholly devoted to God, and that in which He received a portion and the worshippers feasted on the remainder. Of the former use the typical example is the Burnt-offering, of the latter the Sacrificial Feast (Ex 10^{25} 18^{12} 20^{24}); but there are other kinds of offering that have to be described which bear distinct names either because of the peculiarity of the ritual, or of the special end which they were designed to serve.

(*a*) *The Sacrificial Feast* was probably the oldest form, was in early times by far the most common, and gave satisfaction to normal states of religious feeling.

The names by which this type of offering is distinguished in RV are *Sacrifice* and *Peace-offering*. 'Sacrifice' (זֶבַח) is sometimes contrasted with the old generic name (מִנְחָה 1 S 2^{29}), but oftener with the Burnt-offering (Ex 10^{25}, 1 S 6^{15}), and in both cases it is 'the general name for all sacrifices eaten at feasts' (*Oxf. Heb. Lex. s.* זֶבַח). The sacrifice in the narrower sense is synonymous with the Peace-offering (שֶׁלֶם), which is similarly used to designate the division of offerings which were divided between God and man (Ex 20^{24}, Am 5^{22}). The original meaning of the שֶׁלֶם is obscure. The interpretation of our versions rendered by Peace-offering (LXX *θυσία εἰρηνική*) conceives it as the sacrifice offered when friendly relations existed towards God (שָׁלֵם, 'to be whole *or* at one')—in contradistinction to the piacular sacrifices which presupposed estrangement. *Heilsopfer* is somewhat similar in idea. An alternative rendering derives it from שִׁלֵּם 'to make whole,' 'make restitution,' in which case it would be originally an offering of reparation (*Erstattungsopfer*), and by an intelligible transition a payment of vows or thank-offering (Luther).

The occasion of the Peace-offering was some such event as prompts human beings to come together in a festive spirit. Even in the modern world the joyful event provokes demonstrations and rejoicings which are felt to have their fittest culmination in the banquet, and the Peace-offering was simply the form taken by the festal banquet in an age thoroughly permeated by the religious spirit. The opportunity for such celebrations is given, not only in the life of the nation and of the community, but in that of the kindred stock and of the family. In the national life such occasions for rejoicing occurred in the successful conclusion of a campaign (1 S 11^{15}, cf. Jg 16^{23}), in the cessation of a visitation of famine or pestilence (2 S 24^{25}), and in the accession of a king to his throne (1 K 1^{19}). In the last case, and also at the dedication of the temple, the provision naturally was on the most magnificent scale (1 K 8^{63}). The smaller unit of the local community had its special occasion for rejoicing in the events of the agricultural year: firstlings and first-fruits supplied the material of a sacrificial meal (Ex 22$^{29-31}$). The visit of a notable prophet to a town also suggested the recognition of the privilege by a sacrificial feast (1 S 16^{5}). The sept or larger family professed and strengthened its kinship by an annual reunion which took the form of the sacred banquet (20^{6}). Similarly, family religion found occasional expression in the pilgrimage of man and wife to a local sanctuary, where they ate and drank before the Lord (1 S 1^{3}). Other events in this sphere which were similarly hallowed were the departure on a momentous journey (Gn 31^{54}), the arrival of a guest of consequence (18$^{1-8}$), the embarkation on a new career (1 K 19^{21}). In general it served to keep alive the sense of dependence on God for protection and the natural blessings of life, while it had the social value of promoting the solidarity of the nation and of its component parts.

(1) *A course of preparation* was required before taking part in the sacred observance (1 S 16^{5}). A period of continence was ordained (21^{5}, cf. Ex 19$^{10.14}$); and lustrations and a change of garments constituted the physical holiness which was deemed seemly and necessary in approaching the Deity (Gn 35^{2}, Ex 19$^{10ff.}$). Naturally, also, it was made the occasion for the display of finery and ornaments (Hos 2^{13}). There was recognized, however, the necessity of a more spiritual preparation in which the heart was touched, or even renewed by God (1 S 10^{9}). (2) *The ritual* necessarily varied with the material. In the case of the animal sacrifice, the blood and the fat were appropriated to God (1 S 2^{16}), and were consumed on the altar. To lessen the temptation to sacrilege, it was provided that the fat should be given to God immediately after the slaughtering (Ex 23^{18}). The accompanying offering consisted of unleavened bread (*ib.*). The remaining portions were divided between the priests and the offerers. The sin of the sons of Eli was that, instead of taking the share allowed by ancient custom, they dipped with a rapacious flesh-hook into the cauldron, and also that they encroached on the Divine portion by claiming their share before the fat had been conveyed to God (1 S 2$^{12ff.}$). At this stage the sacrificial flesh was boiled, and it is represented as an objectionable innovation that the priests demanded their portion raw with a view to its being roasted. The custom of boiling the flesh is also commemorated in the prohibition of seething a kid in its mother's milk (Ex 23^{19})—which probably had its origin, not so much in a feeling that the practice was of the nature of an outrage, as in heathen associations connected with the sacrificial use of milk. (3) *The religious efficacy* of the Sacrificial Feast was doubtless differently interpreted according to the degree of spiritual enlightenment. The popular idea probably was that God was entertained at a feast, in which He received His portion in the form of fire-food, and that the honour and gratification thus afforded Him rendered Him well disposed to the

worshippers. The offering would thus be considered efficacious as bringing the response which is naturally elicited by a gift or service. The command, 'none shall appear before me empty-handed' (Ex 23^{15} 34^{20}), suggests that the practice of approaching a monarch with gifts was regarded as typical of the approach to Jehovah with offerings. The use of מִנְחָה (gift) in a comprehensive sense points to the same interpretation. With this, doubtless, was also associated the conviction that by eating and drinking along with Jehovah friendly relations were both expressed and strengthened. That the sacred life-blood of the animal was conceived as cementing the union by constituting a physical tie is more problematical (Schultz, *AJTh*, 1900, p. 269). But these interpretations were beginning to be challenged. The higher theology excluded the idea of God as a fellow-guest. A striking saying, ascribed to Samuel, declares offerings worthless without obedience (1 S 15^{22}).

(*b*) The **Burnt-offering**, עֹלָה (LXX *ὁλοκαύτωμα*, *ὁλοκαύτωσις*, *ὁλοκάρπωμα*, *ὁλοκάρπωσις*), 'that which ascends,' is so called either as that which is elevated to the altar (Knobel, Oehler, Nowack), or which ascends in flame (Bähr, Keil, Delitzsch). It is usually synonymous with 'the whole Burnt-offering,' though originally the distinction may have obtained that the portion of any bloody sacrifice consumed on the altar was designated the עֹלָה, while only the Burnt-offering consisting of an entire victim was a כָּלִיל (Nowack, *Arch.* ii. 215).

If the bright side of human experience, which gives birth to joy and hope, had its characteristic rite in the Peace-offering, the Burnt-offering answered to the mood in which the predominant feeling is grief, apprehension, or awe. In certain situations, of course, there is a combination of joyousness and solemnity, of hope and fear—as at the coronation of a monarch, or the conclusion of a national covenant with God, and in such cases the double aspect has its expression in the combination of the two types of offering (1 S 10^{8}, Ex 24^{5}). But on occasions of extraordinary solemnity or gravity the Burnt-offering stood alone. The deliverance from the Flood, accompanied as it may be supposed to have been by overwhelming awe at the sweep of God's devastating judgment, was marked by the sacrifice of the Burnt-offering (Gn 8^{20}). Similarly on the occasion of a theophany, when the sense of privilege is overborne by the sense of danger in the presence of Jehovah, the Burnt-offering is the appropriate rite (Gn 22^{13}, Jg 13^{16}). At the beginning of a war, when the danger and the dubious issue are keenly realized, it alone bespeaks the Divine aid; nor does the leader of the host embark without this appointed service on his hazardous enterprise (Jg 6^{26}). It would even seem that in perplexity it was used with the divinatory purpose, which in Babylonia had been one of the principal uses (Jg $6^{17\text{ff.}}$). When one was driven to extremity by the hatred of a powerful opponent, it might be offered in the hope of God interposing to change his heart (1 S 26^{19}). In time of peril it might be promised by way of vow on condition of success (Jg 11). It has indeed been alleged that in periods of national calamity it was not offered—the idea being that this was useless so long as the wrath of Jehovah was fierce against king or people; but this view rests upon an incident in the life of David (2 S 24^{13}) when acting under prophetic guidance, and cannot well be supposed to represent the prevalent belief. (1) *The sacrificial material* had consisted, from very early times, in one or other of the following: the ox-kind, the goat, the sheep, the turtle-dove, and the young pigeon (Gn 15^{9}). (2) *The ritual* of the Burnt-offering exhibits survivals of ancient usage. Though the usual custom now was to slay the victim beside the altar, there are traces of an older practice of slaying it upon the altar (Gn 22^{9}, cf. 1 S 14^{33}). The ritual of Gideon is peculiar: the flesh of the kid is boiled, it is then put in a basket along with unleavened cakes and placed on the altar, while the broth is poured either over it or on the ground (Jg $6^{19.\,20}$). The token of acceptance is its consumption by fire. In the later period the broth played no part, the flesh being consumed raw upon the altar.

(3) *The significance* of the Burnt-offering is suggested by what has been said of its occasions. Its object was to secure protection against threatened danger, success in the hazardous conflict, deliverance from the sore calamity; and if in some instances it has the appearance of a thank-offering after deliverance, the dominant thought may still have been that security was sought against a recurrence of the judgment. Further, it is clear that the idea was to ensure safety by performing an act which was acceptable to God, and thus dispose Him to maintain the worshippers' cause. The intention was not invariably to propitiate God in the sense of altering His attitude from hostility to clemency; the sacrifices of Abraham and of David are rendered when God is already at peace with them, but they were always at least propitiatory in the secondary sense that they were designed to prevent God from changing His attitude of clemency into an attitude of hostility. As to how they were supposed to influence God we cannot very confidently speak. The old Hebrew idea was that the food actually reached God in the form of the fragrant fire-distilled essence, and thus gratified Him as an agreeable gift (Gn 8^{21}). In this point of view it was more efficacious than the Peace-offering, inasmuch as it paid to God greater honour, and made Him a more costly gift. The story of the sacrifice of Isaac suggests the theory that the animal was substituted for a human victim, but it does not say that Isaac was to die for Abraham, and it therefore does not involve the idea that the animal victim was understood to bear the penalty due to the sin of the offerer. On this view, the animal victim represented only the substitution of the less valuable for the more valuable gift. As in the case of the Peace-offering, it is certain that the reflexion which was rooted in the higher faith gradually worked its way to a nobler conception than that of gratifying God by the delights of a repast. Old forms of expression, such as 'sweet savour' and 'bread of God,' continued to be used even when it had come to be realized that the quality which pleased God was the piety which prepared the fire-food.

Human Sacrifices, of which OT contains some record, come under the category of the Burnt-offering. That they occurred in the heathen stage through which the progenitors of the Hebrews passed in prehistoric times, can hardly be questioned. The practice prevailed throughout Semitic heathendom; it is abundantly vouched for among the Arabs and the Carthaginians, and it was in use among the Moabites (2 K 3^{27}). The story of the sacrifice of Isaac (Gn 22^{11}) clearly implies that the custom had been deeply rooted in the past; the history of Jephthah furnishes an indubitable instance from the period of the Judges (Jg $11^{34\text{ff.}}$); and its persistence down to a late period may be collected from various prophetic references (Mic 6^{7}, Jer 7^{31}, Ezk 20^{26} 23^{37}). The main point in dispute is whether 'human sacrifices were an essential element of the Mosaic cultus' (Ghillany), or whether they 'were excluded from the legitimate worship of Jehovah' (Oehler). The argument for the legitimacy of the practice would be considerably stronger if we could regard as human sacrifices the slaying of Zebah and Zalmunna by Gideon (Jg $8^{18\text{ff.}}$), and of Agag by Samuel (1 S 15^{33}, cf. 2 S 21^{9}); but these acts may be assigned to the different category of executions. In the case of Jephthah it is hard to suppose that he expected other than a human being to come forth to meet him, and the most that can be said is that the narrative seems to recognize in the issue a merited punishment. The manifest moral of the sacrifice of Isaac is that the practice was 'an alien element repudiated by conscious Jahwism' (Holzinger on Gn $22^{14\text{-}20}$). As to the commandment of Ex 22^{29},—'the firstborn of thy sons shalt thou give unto me,'—it is an exegetical possibility that the words point to human sacrifice; but as a normal demand of OT religion, and indeed of any sane religion, it is inconceivable (see art. PRIESTS AND LEVITES, p. 70^{b}).

(c) *The Covenant-sacrifice* is closely related to the Peace-offering, although it may be considered to be intermediate between the עֹלָה and the זֶבַח. The peculiarity lies partly in the specific object,—which is to seal a compact, partly in the ritual. According to antique practice the formation of a covenant or an alliance was sealed by a variety of rites. One form is the sprinkling of each party with the other's blood, or the commingling of the blood of both by smearing it upon stones. In a second form animal blood is employed. Another is the partition of a carcase, with the passage of the covenanting parties between the divided parts. Of the latter custom there is an evident trace in 1 S 11^7. After being chosen as king, Saul 'took a yoke of oxen and cut them in pieces, and sent them throughout all the borders of Israel.' In the text it is interpreted as a threat of a like fate being visited upon rebels; but the form, which is reminiscent of the passage through a sundered victim, rather conveys an invitation to the tribes to join with him in a covenant. The form is also recognizable in the ritual employed in God's covenant with Abraham (Gn 15). A heifer, a ram, and a she-goat are sundered in twain; and after nightfall a flaming torch, which clearly represents God in its action, passes between the divided pieces. Another noteworthy feature of the narrative is that at first birds of prey descend upon the carcase and are driven away—not improbably a deliberate repudiation of the ancient practice of exposing the god's portion to be consumed by wild creatures (v.^{11}). The second important instance of the Covenant-sacrifice connects itself with the usage of cementing an alliance by an interchange of blood. At the making of the covenant between Jehovah and His emancipated people, Burnt-offerings and Peace-offerings are sacrificed; and in connexion with the burnt-offering, as it would seem, Moses pours half of the blood upon the altar for God, while the other half is sprinkled on the people (Ex $24^{6.8}$). In this type of sacrifice a different idea from that of propitiating God by a gift is clearly preserved—that, viz., of the establishment of communion of life through assimilation of the same blood.

(d) *Vegetable offerings* were later in origin, and in less repute, but must have formed an important division of the offerings at the sanctuaries. Meal, baked into cakes, was doubtless a common form of offering (Jg 6^{19}, 1 S 1^{24}). The most interesting example of this class is the SHEWBREAD (לֶחֶם הַפָּנִים, *ἄρτοι ἐνώπιοι, προκείμενοι (τῆς) προθέσεως, τοῦ προσώπου, τῆς προσφορᾶς*) (Ex 25^{30}, cf. Lv $24^{5ff.}$). This offering, even as regards the number of the loaves, is anticipated in the far older Babylonian ritual (Zimmern, *Beiträge*). The ritual in the first stage followed the method of exposure—the bread being laid out on a table in the sanctuary; but the Divine portion is conveyed to the Deity in the end by being allotted to the priests. The vegetable offerings, it should be added, were often associated with animal offerings. The Book of the Covenant prohibits the use of leavened bread in connexion with the Sacrificial Feast (Ex 23^{18}).

(e) *The Libation* was originally a libation of blood, possibly at a later stage of milk and of water (1 S 7^6, 2 S 23^{16} preserve a recollection of the latter), but in the historical period the chief material is oil, which also naturally went along with the cereal offerings. The rarity of the mention of the libation of wine, which was certainly in use, is not improbably connected with the incongruity to more elevated thought of the idea of offering to God a festal banquet, and also with official opposition to the excesses to which the prominence of this element led (1 S 1^{14}). There could not be wanting an instinct that the libation of wine was most in harmony with the unethical genius of heathendom.

v. THE PROPHETS AS REFORMERS OF SACRIFICIAL WORSHIP.—The sacrificial system of ancient Israel was the result of a long and complex formative process. A remote heathen past supplied the rudimentary forms, and these had undergone modification under the influence of a progressive civilization, and of the early stages of a gradual revelation. The system of ordinances thus historically given was now to be subjected to a testing ordeal. The knowledge of God and of His will, which had been conveyed through His dealings with Israel, and which had been understood in essence by Moses, attained to great clearness and consistency in the consciousness of the 8th century prophets; and, possessed as they were by this knowledge, they were compelled to examine in its light the past and the future of the people, and to sit in judgment on all the present doings of the house of Israel. In particular, they could not but ask whether the sacrificial cult, which to popular thinking was all but coextensive with religion, was needed and justified in view of the better knowledge of God. As a fact this was a subject which bulked largely in their teaching; it supplied the occasion of much of their strongest invective; and so unqualified was their denunciation that it is a debatable question whether they proposed the abolition of all sacrificial worship, or only its reform.

That the religious ideal of the prophets involved the abolition of sacrifice, as affirmed by various modern writers, is a thesis which rests on a partial view of the evidence. 'Their opposition to sacrifice,' says Kayser, 'was founded on principle, and the real significance of their language is: "No offering, but love and right knowledge of God"' (*Alttest. Theol.*^{2} p. 156). This, it is held, is the natural sense of a group of passages which represent God as declining offerings, as sated with them, and even loathing them. 'To what purpose is the multitude of your sacrifices to me? I delight not in the blood of bullocks, or of lambs, or of he-goats. Bring no more vain oblations' (Is $1^{11ff.}$, cf. Am 5^{21-25}, Hos 6^{4-6}, Mic $6^{6ff.}$). But such expressions may as naturally be understood of a conditional as of an absolute rejection of sacrifice. The people addressed was a sinful nation, persisting in its sins, and the repudiation of offerings at its hand by no means implied that sacrifice would be equally unacceptable at the hand of a penitent and regenerate people (cf. Smend, *Alttest. Theol.* p. 168). And the view that the repudiation is merely conditional is borne out by hints that accompany the more extensive prophetic prospects. Thus, Hosea looks forward to the cessation of sacrifice as a national punishment or calamity (3^4 $9^{1ff.}$); Isaiah predicts that the Egyptians will bring sacrifice and oblation to Jehovah (19^{21}), while Jeremiah very emphatically includes sacrifices in the purified worship of the future (33^{18} 17^{26}). In short, those who regard the prophets as abolitionists make a mistake which is common in studying polemics—viz. of misconceiving an attack on abuses as an attack on the institution which they have infected.

A second argument adduced is that the prophets lay great stress on the fact that in the Mosaic period sacrifice was neither rendered nor ordained (Am 5^{25}, Jer $7^{21.22}$), whereby they are supposed to claim for a policy of abolition the sanction of a sacred period of antiquity. These remarkable passages are of great weight in the controversy as to the Mosaic contribution to sacrificial legislation, but in the present connexion they are not convincing. That Israel did not sacrifice during its wanderings (Am 5^{25}) was not necessarily an argument for cessation, but might equally have in view to win the people to a doctrine which certainly was included in the prophetic programme—viz. that the place of sacrifice in worship was not the all-important, or even pre-eminent, one that was commonly supposed.

The prophetic programme of reform in this field embraced both sacrificial practice and sacrificial theory. (1) Among the practical reforms the foremost place belonged to (a) *the prohibition of heathen sacrifices*—*i.e.* those offered to other gods, to idols (Hos 11^2, Jer 11^{12}), to the dead (Ps 106^{28}), and to sacred animals (Ezk 8^{10}). In connexion with these the practice of kissing the idol is noticed (Hos 13^2). To the class of heathen sacrifices we may also refer those mystic rites in which the victim was an unclean or repulsive creature (the swine Is 65^4, the mouse 66^{17}), and which may have been an underground survival from a very early cult (*RS*^{2} p. 357 ff.). (b) *The prohibition of certain kinds of sacrifice* is also enforced—notably human sacrifices (Ezk 20^{31}). It is, moreover, difficult to resist the impression, in view of the disparaging references to the number and costliness of the offerings (Is 1^{11}, Mic 6^7, Am 4^4, Ezk 20^{28}), that the school preferred fewer kinds and greater simplicity. In particular, antagonism to the Sacrificial Feast is strongly suggested by (c) *condemnation of the excesses which connected themselves with the sacrificial cult.* The sacrifices of this type naturally gave occasion for revelry, and even for drunken and licentious orgies (Hos 4^{13}, Am 2^7), and thus an institution conceived to honour God became a main instrument in promoting a national corruption, which called down the vengeance of Heaven. While, therefore, we cannot regard the prophets as against sacrifice in principle, it is at least a probable view, in consideration of the organic connexion of the sacrificial meal with the indulgence of fleshly lusts, that they meant to discountenance the Peace-offering as the main source of evil, and laboured to enhance the credit of those other varieties which precluded its characteristic temptations.

(2) It was, however, on the theoretical side that the prophetical protest went deepest, and most loudly challenged the existing order. (a) It demanded a revision of the popular estimate of the place of the cultus in religion, and in a minor degree of the place of sacrifice in the cultus. The current

conception was that religious ordinances were the grand means of pleasing God, and to this the prophets sharply opposed the doctrine that in God's view ceremonies are unimportant in comparison with morality. Latent in Mosaism, this view found striking expression in a saying already quoted—'to obey is better than sacrifice, and to hearken than the fat of rams,' 1 S 15^{22}. It is the main burden of the prophecy of Amos, and finds its classic expression in the 'what doth the Lord require of thee?' of Micah ($6^{6ff.}$, cf. Hos 6^{6}, Pr 17^{1} 21^{3}). The secondary importance of the cultus, in fact, was the obvious consequence of the soteriology of the prophets. According to their teaching it was only on condition of righteousness, after backsliding on condition of repentance and amendment, that the Divine favour could be ensured; failing the fulfilment of this condition, ceremonial religion only provoked the Divine anger; and it was therefore out of the question to treat the two as of co-ordinate rank. And, further, even within the sphere of the cultus it is not granted that it is the all-important form of 'service.' Hosea attaches high importance to the teaching function of the priests (4^{6}), while in more than one passage preference is manifestly exhibited for the exercises of prayer ('calves of the lips,' Hos 14^{2}) and for sacred song (Ps 27^{6}).

(*b*) *The significance of sacrifice* for the prophets remains to be considered. With the cultus thus depreciated, and the pre-eminence of sacrifice in the cultus challenged, in what sense was it possible to maintain its efficacy? After what has been already said, it is inconceivable that they supposed it to be acceptable to God in the capacity of a gift. The God who claimed the whole life for duty was not likely to be influenced by a present or a meal. And from the point of view of their high theology the Gift-theory fell to the ground as untenable, even ridiculous. In the first place, God did not experience the wants which the offerings supplied; in the second place, even if He did, the offerings were already God's property, not man's to present (condensed in Ps 50^{10}). If sacrifice had any efficacy at all, it needed another explanation for those who had realized the true God. This it possessed as a vehicle for the expression of the sentiments, and for the revelation of the spirit of the life, of those who sincerely served or sought God. Its efficacy, in short, was neither more nor less than that of prayer, which, on its part, is of value not as an act considered in itself, but in virtue of the aspirations and the sincerity which find voice in it. That in the prophetic valuation the function of sacrifice was identical with that of prayer, cannot indeed be conclusively proved, but it is the view which best harmonizes with their religious theory; and it derives confirmation from several considerations. In the patriarchal narratives, which embody a measure of the prophetic spirit, it is usually associated closely with the prayer of adoration and petition, suggesting that the spoken word serves the purpose of making the action articulate. In the case of the sacrifice of Abel, again, the ground of acceptance manifestly was the disposition of the worshipper, which disposition prayer equally with sacrifice would have served to bring to expression. Especially significant is the fact that in certain passages the offering of words is demanded (Hos 14^{2})—the implication being that they served the same purpose as sacrifice in making the appeal of prayer to God, and that they were preferable in that they were less likely to foster evil practices and to encourage superstition.

The Deuteronomic Reformation made the influence of the prophetic school to tell along another line on the development of the sacrificial system. The suppression of the local sanctuaries, and the consolidation of worship in Jerusalem, which had its spring in prophetic inspiration, had far-reaching consequences. One immediate consequence was to detach sacrifice from the everyday life of the people, and to reduce it in the main to an element in the worship in which national religion found expression. Naturally also the Sacrificial Feast ceased to be as practicable as when it had been observed in their several districts by the smaller units of the family and the clan, and it tended to give place to the type of the holocaust in which the people looked on at the consumption of the offerings in the service of God, whether directly or by His priests. With the decay of the Sacrificial Feast, moreover, the spirit of worship was altered—the joy of the table being swallowed up in a deepening sense of the solemnity of the collective worship, and of the more imposing rites to which it gave prominence (Wellh. *Proleg.* Eng. tr. p. 76 ff.; Nowack, *Arch.* ii.).

Sacrifice in Deuteronomy.—While in general Deut. reflects the prophetic doctrine of the superiority of morality to ceremony, it is far from representing the abolitionist standpoint ascribed to Amos. Its list of offerings includes burnt-offerings, peace-offerings, heave-offerings, votive-offerings, free-will offerings, first-fruits, while it prohibits human sacrifices (18^{10}), the drinking of blood (12^{23}), hair-offerings and mutilations (14^{1}). Among its leading interests are to conserve somewhat of the joyous character of sacrifice in spite of the centralization of worship (12^{7}), and to ensure a sufficient portion to the priests from the sacrifices,—in the case of animal offerings the shoulder, two cheeks, and the maw (18^{3}). The animal victim, it is also emphasized, must be without blemish (17^{1}). The sacrifice in expiation of an uncertain murder (21^{9}) is interesting for its peculiar ritual, manifestly antique, while it is obviously excepted from the centralization of the worship.

vi. THE SACRIFICIAL SYSTEM OF THE PRIESTLY CODE.—With the downfall of the kingdom of Judah, involving the destruction of the Temple and the deportation of the people, Hosea's prediction of the cessation of sacrificial worship was fulfilled. Whatever relief individuals might thereafter find in recurrence to simple forms of offering, or by conforming to heathenism, the nation as such, broken as it was and dispersed, was deprived of the stated means of communion with God. Yet the visitation which had thus overwhelmed Judah, and reduced its institutions to ruins, was not interpreted by its religious leaders as a Divine condemnation of its system of worship. The writings of Ezekiel bear testimony to the hopes of a great prophet touching the restoration of the Temple and its solemn ordinances. The priests who escaped into exile carried with them a minute knowledge of the Temple services, possibly also written summaries of the rules that had governed the elaborate system of offerings and ritual; and it may well be believed that, ere the Temple with its solemn rites faded from living memory, it was realized to be a pious duty to compile a faithful record of the ancient sanctities and glories. Cherished as a monument of the past, this record naturally became, in the prospect of a new national existence, the basis of a practical religious programme. The dream of restoring the old worship on the old sacred ground, in a second Temple of Jerusalem, was one which must have irresistibly appealed to the pious exile. But restoration did not preclude adaptation and amendment. Novel circumstances, foreign impressions, deeper reflexion, required that the legacy from the past should be handled with freedom as well as with piety. The result of the two factors—obscure as was the process—was the Priestly Code, which was adopted as authoritative at the Reformation under Ezra, *c.* 444, and which thenceforward regulated Jewish worship and gave its characteristic note to Jewish religion. The sacrificial system described in this code (Leviticus, Ex 25–31. 35–40, Nu 1–10. 15–19. 25–36) we have now to analyze.

1. *Forms of Sacrifice.*—The arrangement of the complicated enactments of the code has been attempted in different ways, but the more satisfactory method is to adopt as the leading clue the distinction of kinds and varieties. The classification of the Levitical sacrifices may, however, be carried out from different points of view.

The main principle of division has been sought in the distinction of the *subjects* on behalf of whom sacrifices were offered.

It is on this principle that Maimonides bases his interesting and instructive summary of the sacrificial laws (*Præfatio in quintam Misnæ partem*, iii. 1 ff.). The varieties, he premises, may all be reduced to four groups—the Sin-offering, the Guilt-offering, the Burnt-offering, and the Peace-offering; and the victims were of five species—sheep, cattle, goats, young pigeons, and turtle-doves. In reference to the subjects, his classification (slightly transposed) is as follows:—

1. Sacrifices offered on behalf of the whole congregation:—(*a*) in the exercise of its ordinary religious duty, under a stated ritual, and tied to stated occasions (Sabbath, New Moon, Feasts); (*b*) on the occasion of some collective or public transgression.

2. Sacrifices offered on behalf of the individual:—(*a*) in virtue of his connexion with the theocratic community as an official or ordinary member, *e.g.* the Passover; (*b*) on a special occasion—*e.g.* a sin of word or deed, a bodily accident, a misfortune in business, the end of a fixed period, the obligation of a vow.

The Levitical sacrifices have also been classified with reference to the different *ends* which they served in the approach to the Deity.

The usual division from this point of view is into *honorific*, designed to render due homage to God, and *piacular* or *expiatory*, designed to make atonement for sin—to which, since W. R. Smith's work, it has been usual to add sacrifices of *communion*. The distinction which Oehler lays at the basis of his discussion is expressed by him (*Theology of OT*, Eng. tr. p. 423) as follows:—'We refer the four kinds of offering to two higher classes—those which assume that the covenant relation is on the whole undisturbed (Peace-offerings), and those that are meant to do away with a disturbance which has entered into this relation, and again to restore the right relation (of the people or of separate individuals) to God' (Burnt-, Sin-, and Guilt-offerings).

The division founded on the distinctions of the sacrificial *material*—animal, vegetable, or liquid—is the most obvious, and may be followed here as of adequate importance, while not prejudging the difficult question of the purpose of sacrifice.

(i.) *Animal sacrifices* are by far the most important, and in P it appears that a re-valuation has taken place of the two ancient types. The Peace-offering of which the worshippers claimed a large share is overshadowed by the Burnt-offering, with which are now associated two kindred sacrifices—the Sin-offering and the Guilt-offering, falling to God and His ministers.

(*a*) **The Burnt-offering** (עֹלָה Lv 1, Ex 29$^{38-42}$, Nu 28$^{3ff.}$, Lv 6$^{8ff.}$), which stands at the head of the group, owes its position to the fact that its purpose was the most general, that the victims were of pre-eminent value, and that at this stage it was regarded as most perfectly embodying the sacrificial idea (Knobel-Dillmann on Lv 1^{3}). (1) *The victims* were the ox-kind, sheep, goats, turtle-doves, or young pigeons,—in the case of the animals it was prescribed that the victim should be a male, as the more valuable, and without blemish (1^{3}, for a list of blemishes cf. 23$^{22ff.}$). (2) *The ritual* to be observed includes the following points in the case of the animal victims:—(*a*) *Action of the offerer*—imposition of hands (Lv 1^{4}), slaughter of the victim at the door of the tabernacle, to the north of the altar (vv.$^{3.11}$), flaying and cutting up the carcase (v.^{6}), washing of the entrails and legs (v.^{9}). (*b*) *Action of the priest*—manipulation of the blood which is sprinkled about the altar (v.^{5}), disposition of the pieces upon the wood of the altar (v.^{8}), burning the offering (v.^{9}). The dove was killed by the priest, and its crop and feathers were flung aside as unsuitable (v.$^{14ff.}$). In the above ritual the occasion presupposed is a private sacrifice, which might be rendered as the result of a vow or spontaneously (22^{18}). (3) *The occasions* of this sacrifice were in the main connected with the collective worship, of which it formed the chief element. The daily services of the temple consisted of the continual Burnt-offering (עֹלַת תָּמִיד), wherein a he-lamb was offered every morning and evening, accompanied by cereal oblations and by libations (Ex 30$^{38ff.}$, Nu 28$^{1-8}$). On holy days it was celebrated on a magnified scale: on the Sabbath two pairs of lambs were offered (Nu 28$^{9.10}$); at the New Moon, at the Passover, and at the Feast of Weeks it consisted of two bullocks, a ram, and seven he-lambs, with corresponding increase of the concomitant offerings (v.$^{11ff.}$).—*The purpose of the Burnt-offering* may be so far understood from its use as the constant element in the organized worship of the community. It was not connected with any particular form of transgression, but was appropriate as the means of approach to God of a people, or of individual persons, sensible of God's majesty and holiness, and of their standing in His sight. The effects are described from three points of view—that it is a 'savour of rest-giving' (*i.e.* acceptable) to God (רֵיחַ־נִיחוֹחַ Lv 1^{9}), that it surrounds the worshipper with a 'covering' (לְכַפֵּר עָלָיו 1^{4}), and that it cleanses from ceremonial impurity (14^{20}). On this point see Propitiation, § 4.

The later period of the monarchy was a period of national calamities, culminating in ruin and exile, which were interpreted by the prophets as a judgment upon national sin. Under these conditions there was naturally a strong disposition to strengthen the nation's interest with Jehovah by the multiplication of solemn sacrifices, and during the Exile future safety might well seem to lie in the development of the system of bloody sacrifices. It is thus that the fact has been plausibly accounted for that two kinds of sacrifice, which occur only in name in the earlier history, figure in Ezekiel somewhat prominently, while in P they almost rival in importance the Burnt-offering. These are the Sin-offering and the Guilt-offering (AV Trespass-offering).

(*b*) **The Sin-offering** (חַטָּאת, LXX [τὸ] περὶ or ὑπὲρ ἁμαρτίας) is mentioned 2 K 12^{17}, but there signifies presents or fines paid to the priests. In Ezekiel the special occasions on which it is prescribed are the dedication of the altar (43$^{19ff.}$), the annual cleansing of the sanctuary (45$^{17-19}$), the consecration of prince and people on festal occasions, including Passover week (45$^{22.23}$), and the return of a priest to duty after purification (44^{2}). In the ritual the outstanding features are the sprinkling of the blood of the victim on the doorposts of the temple (45^{19}) and on the four horns of the altar (43^{20}), and the burning of the carcase without the sanctuary (v.^{21}). The regulations of P may be thus summarized:—(1) *Beneficiaries and appropriate victims.* For a ruler the suitable offering was a he-goat (Lv 4^{25}), for an ordinary person a she-goat (4^{29}), a ewe-lamb (4^{32}), a turtle dove or young pigeon (5$^{7ff.}$), or a cereal offering (5^{11}); for priests (4^{3}), Levites at their installation (Nu 8^{8}), and for the whole congregation (Lv 4^{14}), a bullock, for the latter also a he-goat (Nu 15^{24}). On the Day of Atonement a bullock was offered for the high priest, and two he-goats for the congregation (Lv 16$^{3ff.}$). (2) *The ritual* included the following acts: (*a*) imposition of hands, and slaughter of the victim by the offerer (4^{4}) or the representatives of the congregation (v.^{15}); (*b*) manipulation of the blood, which was sprinkled before the veil, smeared on the horns of the altar, and poured out at the base (v.^{7}); (*c*) disposal of the carcase, whereof the choice and fat portions were burnt on the altar, while the skin, entrails, and (in some cases) the ordinary flesh were burned without the camp (v.$^{8ff.}$). The remaining flesh was not burnt, but fell to the priests, when the offering did not concern themselves (5^{13} 10$^{16ff.}$). (3) *The object* of the sacrifice is otherwise conceived than in Ezekiel. With the latter it mainly appears as a service of consecration for holy places, in P it is designed for the 'covering' of minor offences (Lv 5$^{1-6}$), the removal of ceremonial uncleanness (12$^{6.8ff.}$), and atonement for sins of ignorance (בִּשְׁגָגָה 4$^{2.22.27}$). By the last it might be understood, either that the wrong-doer was ignorant of the law, or that he acted in forgetfulness of the law. (4) As to the *effect* of the sacrifice, it is declared that a 'covering' takes place and the sin is forgiven (4$^{26.35}$).

(*c*) **The Guilt-offering**, AV Trespass-offering (אָשָׁם [LXX τὸ ὑπὲρ ἀγνοίας, τὸ τῆς πλημμελείας, ἡ πλημμέλεια], 'offence,' then reparation made for the same), occurs in this general sense in the older history (1 S 6$^{3ff.}$, 2 K 12^{17}). The allusions to it in Ezekiel are incidental, and show that in his time it had already gained a footing, and that its special character was generally understood (40^{39} 42^{13} 44^{29} 46^{20}).—*The occasion* of the Guilt-offering, according to P, is unwitting trespass against the ordinances of God, in respect either of holy things (Lv 5^{15}) or of the rights of property (6$^{1ff.}$). The special feature of the regulations is that reparation is demanded for the trespass, with the addition of a fine, one-fifth of the value of the thing to be restored, which goes to the priest (5^{16}). Where the injury is a private wrong, restitution is made to the injured party, failing whom or his heirs it goes to the priest (Nu 5$^{5ff.}$).—*The victim* is usually a ram (5^{8}), and *the ritual* is similar to that of the Sin-offering (Lv 7^{7}). The 'covering' of the trespass and the forgiveness of the offender follow upon the acceptance of the offering (6^{7}).

The distinction of the Sin-offering and the Guilt-offering has been felt to be a matter of some difficulty, aggravated by the fact that the latter was wrongly supposed to be in view in Lv 5^{1-13}. The principal views which have been held are—(1) that the Sin-offering was for sins of omission, the Guilt-offering for sins of commission; (2) that the former operated objectively by averting punishment, the latter subjectively by appeasing the conscience; (3) that the former was offered because of open, the latter because of secret sins. Unmistakably, however, the specific feature of the Guilt-offering is the preliminary act of restitution; and its occasion would thus seem to be those cases where the sin which had been committed allowed of an act of reparation. The Sin-offering was required in cases where the harm done could not be undone or measured. The designation of the suffering Servant as a Guilt-offering (Is 53^{10}, not 'offering for sin') indicates that the highest degree of efficacy was ascribed to this form of offering.

In the ritual of the Day of Atonement the bloody sacrifices were combined in an impressive way, and invested with peculiar features.

(*d*) **The Peace-offering** (שָׁלֶם, זֶבַח שְׁלָמִים, LXX *εἰρηνικὴ* [*θυσία*], *σωτήριον*) is brought under fixed regulations. In Lv $7^{11ff.}$ three varieties are distinguished—(1) *thank-offerings* (זֶבַח הַתּוֹדָה), (2) *votive offerings* (זֶבַח נֶדֶר), and (3) *free-will offerings* (זֶבַח נְדָבָה). The view of Hengstenberg, that the thank-offering is an alternative generic name, equivalent to peace-offering, and that the votive offering and the free-will offering are the species, is inconsistent with the fact that a different treatment of the sacrificial flesh is prescribed for (1) as compared with (2) and (3). As to the distinction of the three varieties, the most satisfactory explanation is that which interprets the thank-offering as a response to experienced acts of Divine goodness, while the votive offering and the free-will offering are connected with expectation of benefit and supplicatory prayer. The first, in short, was contemplated only after blessings received, while the last two were decided on when some special blessing was still awaited at the hand of God. The supplicatory pair, again, were distinguished in this way, that the free-will offering was presented in support of the prayer, while the votive offering was promised as conditional on the granting of the boon. 'The latter did not need to be presented if the prayer was not granted, the former had already been presented, even if the request continued unfulfilled' (Kurtz, *Sac. Worship*, Eng. tr. p. 262).—(*a*) *The victims* are the same as in the holocaust—oxen, sheep, and goats, but not pigeons. It was accompanied by a cereal offering mingled with oil (Lv 7^{12}). In view of the less solemn character of this offering, the regulations as to quality are relaxed: the female animal is allowed as well as the more valuable male (Lv 3^{6}), and for the free-will offering the principle of the unblemished character is not rigidly insisted on (22^{23}). (*b*) *The ritual* corresponded in its first stages with that of the Burnt-offering and the Guilt-offering. The imposition of hands, the killing of the victim, and the sprinkling of blood upon the altar are common to it with the holocausts. (*c*) *The distribution of the sacrifice* includes God's portion—consisting of fat pieces ($3^{3ff.}$), the priest's portion—consisting of the breast (חָזֶה) and the right fore-leg (שׁוֹק הַיָּמִין $7^{30.32}$), while the worshipper received the residue. The parts assigned to the priest were handled in a peculiar way, on account of which they are described as the breast of the wave-offering, and the thigh of the heave-offering (Ex 29^{27}). The ceremony of the **wave-offering** (תְּנוּפָה, הֵנִיף) consisted in moving the portion backwards and forwards in the line of the altar, with a motion somewhat similar to that of a saw (Is 10^{15}). 'The swinging in a forward direction,' says Oehler, 'was a declaration in action that it properly belonged to Him; whilst the movement back again denoted that God on His part returned the gift, and assigned it as His own present to the priest' (*l.c.* ii. 6). The handling of the **heave-offering** (תְּרוּמָה) is interpreted in a similar way by Kurtz, following the Jewish tradition, as a symbolical act, whereby the offering was presented to God by being lifted upward (*l.c.* p. 269 ff.); but according to most moderns heaving was not an act of worship, but only the preliminary act of detaching a portion from the rest of the carcase for consecration (see OFFER, § 5). In any case it is certain that the mode of viewing the waving must soon have extended to the heaving, and made it equally a religious ceremony and a vehicle of ideas of consecration. The breast which was waved fell to Aaron and his sons (Lv 7^{31}), the heave-shoulder to the officiating priest (7^{33}). (*d*) *The portion of the worshippers* was enjoyed at a sacrificial meal. In the case of the thank-offering the whole had to be consumed on the day of the sacrifice (Lv 7^{15}), while the feast furnished by the two other varieties might be extended over the second day (v.^{16}). At the end of the fixed time the remnants were burned with fire without the camp. (*e*) *The effect* of the Peace-offering is only referred to in a general way: it is a 'savour of rest-giving' unto the Lord, *i.e.* acceptable to God (Lv 3^{5}).

On a review of the regulations which have thus been sketched, it appears that the following distinctions may be drawn:—(1) In respect of destination, the Peace-offering stands by itself as a sacrificial meal, while the remaining three are conveyed entire to God or to God and His ministers. (2) In respect of ritual, certain acts are common to all—the imposition of hands, the sprinkling of blood on the altar, the burning of the fat portions, but the other portions are either burned on the altar (Burnt-offering) or outside the sanctuary (Sin-offering and Guilt-offering). (3) In respect of occasion, two were elements of normal public worship (Burnt-offering and Peace-offering), two presupposed exceptional relations between God on the one hand and the community or the individual on the other (Sin-offering and Guilt-offering). It is indeed too much to say that in connexion with the former the sacrificer always stood upon the ground of salvation, in connexion with the latter he had fallen from a state of grace. The use of the Sin-offering in the matter of the consecration of temple buildings and furniture does not suggest the rupture of covenant relations, nor does it appear that the sacrificer of a Guilt-offering had fallen from a state of grace more surely than any ordinary member of the community. He was probably a man of unusual sanctity and tenderness of conscience, and the point was, not that his sin was particularly heinous, but only that it was particularly definite. Moreover, it was only on the assumption that he was still 'in a state of grace' that he was allowed to sacrifice at all: for the sins which led God to cast men off no sacrifice was accepted. The view, in short, that there were two classes of sacrifices contemplating respectively the pardoned and the unpardoned is much less tenable than the view that all four were at one in contemplating the community as being in a state of guilt, and requiring to be constantly reconciled to God. They have, in fact, become—not excepting the Peace-offering in its later interpretation—piacular sacrifices which dispose God to mercy, procure the forgiveness of sin, and avert punishment. Behind this lies the question as to the ground of its efficacy, or the *modus operandi*, which in view of its importance will be treated in a separate section.

(ii.) *Vegetable offerings* consisted of the produce of the tilled field and of the vineyard, but not of garden-herbs or the fruits of the orchard. They were sometimes an accompaniment of the bloody sacrifice, sometimes independent.

The Meal- (AV Meat-) offering (vol. iii. p. 309) (מִנְחָה of P, LXX *θυσία*) was a preparation of flour and other ingredients. In the older practice the quantities probably varied, and features of the later practice which have been noted are the fixing of the measure (Ezk $46^{5.7.11.14}$), the prohibition of leavened bread and honey (Lv 2^{11}), and the substitution for ordinary meal of a fine sort of flour (Wellh. *l.c.* p. 441). (1) Among *the independent Meal-offerings* we place the list in Lv 2, although it has been strongly contended, chiefly on dogmatic grounds, that a bleeding sacrifice is presupposed as a basis (see review of opinions in Kurtz, p. 304 ff.). (*a*) *Varieties* are distinguished according to the different processes used in preparing the flour, viz. kneading it with oil, baking it in an oven, a baking-pan, or a frying-pan, and bruising ears of corn. (*b*) Other *ingredients* added were, in all cases salt (2^{13}), in most cases oil, in one case incense (v.^{15}). Under stress of poverty a cereal oblation might also be presented as a Sin-offering, but without oil or incense ($5^{11ff.}$). (*c*) *The ritual* resembled that of the Sin-offering so far as consistent with the difference of material—a portion being consumed by fire on the altar, while the remainder fell to the priests (Lv $6^{14ff.}$). (*d*) *The effects* of covering sin, and delivering from its consequences, are ascribed to it in common with the Sin-offering (5^{13}, but see PROPITIATION, § 11 *g*). Special effects which are attributed to it are such as the insurance of the reliability of the trial by ordeal (Nu $5^{11ff.}$), where oil and incense are excluded.

(2) As a *concomitant of the animal sacrifices* the Meal-offering had a prominent place in the sacrificial system. It was indeed laid down that no Burnt-offering or Peace-offering was legitimate without the cereal oblation (Nu 15. 28. 29). In the public worship of common days and festivals it bore a stated propor-

tion to the number and material of the burnt-offerings (Nu $15^{1ff.}$). Occasions where the material and the ritual undergo modification are the consecration of the priests (Lv 8^{26}), the presentation of a thank-offering (7^{12}), and the sacrifices of the Nazirite (Nu 6^{17}).

The Shewbread is regulated by a minute ritual (Lv $24^{5ff.}$), specifying the material, the number and size of the cakes, the manner of their arrangement on the table, and the use of incense (v.^{7}). The sacrosanct character of the offering, of which part fell to the priests, is emphasized, and it seems to have the special significance of recalling to God the terms of His covenant (v.^{7}). See, further, art. SHEWBREAD.

(iii.) *Drink-offerings and Incense-offerings.*—The libation (נֶסֶךְ, LXX *σπονδή*) appears at this stage only as an accompaniment or element of another kind of offering.

We have already met with oil as an ingredient of sacrificial cakes. Ezek. ($46^{5ff.}$ 46^{14}) and P (Numb.) fix the quantity, though with variations, required in consideration of the number and quality of the victims. Neither in this case nor in that of wine (Nu 18) is anything said of the manipulation of the Drink-offering. The oil was probably used in part for kneading, in part treated as a libation. The wine was probably poured into a gutter, whence it drained into the ground.

On *the Incense-offering* (קְטֹרֶת, LXX *θυμίαμα*, קְטֹרֶת סַמִּים) see art. INCENSE; and on other forms which would fall to be noticed here, see FIRST-FRUITS, TITHE, and art. PRIESTS AND LEVITES, *passim*.

2. *The Efficacy of the Bloody Sacrifices* is of such importance, and has figured so largely in the history of theology, as to call for separate treatment. The questions that have to be discussed are two—(1) the nature of the benefits which were conceived to flow from the sacrificial worship; (2) the manner in which the offerings were conceived to operate so as to procure the desiderated boons.

(1) *The Benefits procured by sacrifice.*—These fall into two classes, which, to our thinking, are very clearly distinguished. In one group of cases the purpose is the cancelling of guilt, in the other the removal of ceremonial uncleanness. In other words, sacrifice has both a moral and a physical occasion.

(*a*) *The Expiation of guilt* is the leading purpose of the Levitical sacrifices. Their office is to cover or make atonement for sin. The word employed to describe this specific effect is כִּפֶּר. This efficacy is connected with all four kinds of principal offerings: the objects of the covering are persons and sins, the covering takes place before God, and it stands in a specially close relation to the sprinkling of the blood and the burning of the sacrificial flesh (Lv 1^{4} etc.). The view that the main purpose of the Levitical sacrifices was the obliteration of guilt has, however, been traversed by Ritschl, who finds the necessity for the covering, not in the moral but in the natural attributes of God, not in the sinfulness but in the creaturely condition of man (*Lehre von der Rechtfertigung u. Versöhnung*, Bd. ii.).

כִּפֶּר, originally to cover, then to expiate—either as pleasing God by covering His table, or by hiding from His sight (cf. old Babylonian sacrificial term *kippuru*, 'to wash away, atone,' Zimmern, *op. cit.*, Vorwort). But from what, according to Ritschl, does sacrifice hide? Throughout the OT there is evidence for the belief that to see or meet with God involved destruction (Gn 32^{30} Jacob, Jg 6^{23} Gideon, 13^{22} Manoah), and this being so it was necessary to take measures for self-protection. This was found in sacrifice. 'From the majesty of God *per se* the destruction follows of those who come before His face as perishable creatures—provided that their life is not preserved of divine grace' (p. 203 ff.). To the common view, which makes the sacrifice an atonement for sin, Ritschl objects that it is incredible that God would have prescribed for His covenant people a system which presupposed that they were to be permanently under His wrath. But we have no analysis of the consciousness of those witnessing a theophany which makes it clear that it was the mere presence of God, not of God as holy, that led the Israelite to expect death. In the later period at all events, when the holiness of God and the prevalence and heinousness of sin had been so profoundly realized, it is impossible to doubt that what invested the approach to God with its character of peril was above all the consciousness of the contrast between Divine holiness and human guilt. The strength of this penitential feeling no doubt varied in the case of different offerings, as well as with different worshippers, but it could never be wholly absent from the educated theocratic conscience. See, further, art. PROPITIATION, esp. § 17.

(*b*) *Purification from physical uncleanness*, as a condition of re-entering the religious life of the community, is also an important function of sacrifice. The circumstances constituting this ceremonial uncleanness are mainly three—participation in the processes of sexual life, contact with a corpse, and recovery from leprosy.

(*α*) As regards the first category, there were degrees of uncleanness, and the major degree, which entailed a sacrificial purification, attached only to morbid sexual conditions and to the position of a woman after child-bearing (Lv 15. $12^{2ff.}$). The sacrifices prescribed for the purification of a mother were a lamb for a Burnt-offering and a dove for a Sin-offering.

(*β*) The defilement diffused by *a dead body* was intense, long-sustained, and removed in a peculiar way (Nu $19^{16.\ 18}$ 31^{19}).

The Sacrifice of the Red Heifer (Nu $19^{1ff.}$), which was appropriated to purify from this form of defilement, presents certain curious features of ritual. The victim is a red heifer without spot (v.^{2}). The use of the blood is confined to sprinkling seven times towards the sanctuary. With the Sin-offering it has a certain affinity, but in this case the whole of the carcase—skin, flesh, blood, and dung, mixed with fragrant ingredients—is burned without the camp. The extraordinary feature of the offering, however, is that the main purpose is the procuring and reservation of the ashes (v.^{9}). These gave its virtue to the holy water which was sprinkled on the third day on those contaminated by the neighbourhood of the dead, and this procured them purification on the seventh day (v.^{12}). For a discussion of the symbolism see Kurtz, p. 422 ff.; for the evolutionary aspect, *RS*^{2} pp. 351, 354, 376. See, further, art. RED HEIFER.

(*γ*) The recovery of a *leper* was marked by two series of rites (Lv $14^{1\text{-}32}$). In the first stage one bird was killed over a vessel of running water, and another, after being dipped in the coloured water, was allowed to escape (vv.$^{6.\ 7}$). In the second stage the man offered a Guilt-offering, a Sin-offering, and a Burnt-offering (vv.$^{13.\ 31}$)—with the peculiar provision that blood from the Guilt-offering was smeared on the right ear, the right thumb, and the right great toe of the offerer (v.^{14}). The same rite was observed for the purification of houses infected in some such way as is typified to us by 'dry-rot' ($14^{33ff.}$; see art. LEPROSY).

In the matter of these purificatory rites, two outstanding facts have to be explained—the temporary isolation of persons and families under certain physical or pathological conditions, and the association of sacrifices of an expiatory kind with their readmission to the life of the community. The temporary isolation has its manifest explanation in a regard to the health of the community, which recognized permanent sources of danger in the sexual life as well as in leprosy and the death-bed. Less apparent is it why the same kinds of sacrifice which expiated guilt should have been required in connexion with events with no moral complexion—such as the natural calamity of disease, and the joyous event of birth. But the matter becomes partially intelligible when we recall the doctrine, widely operative in OT, as to the strictly retributive character of natural evils. When sickness was interpreted as a judgment because of open or secret sin, when death, especially premature or sudden death, was similarly construed, the obvious procedure was to approach God with a remembrance of the procuring cause, and to make atonement for the guilt. Nor is it difficult to bring child-bearing within the same sphere of ideas. The pangs of child-birth were naturally regarded from this standpoint as penal: in J they were interpreted as a punishment expressly inflicted because of woman's share in the primal sin (Gn 3^{16}); and it is quite intelligible that on restoration to the fellowship of her people the mother's sacrifice should be directed to cancel the guilt in which her sufferings were believed to have their spring. See, further, art. UNCLEAN, UNCLEANNESS.

(*c*) *The Consecration of persons and things for sacred uses* appears as a further prominent function of the Levitical Sacrifices. The ceremonies at the consecration of the priests have been discussed elsewhere (see PRIESTS AND LEVITES, pp. 70 f., 83).

The consecration of the temple-furniture by means of sacrifice, esp. the Sin-offering, is a prominent feature in the ordinances of Ezekiel ($43^{25ff.}$). In Exodus minute instructions are given as to the consecration of the tabernacle in all its parts by means of holy oil ($30^{22ff.}$ $40^{1\text{-}15}$, cf. Lv $8^{10.\ 11}$). The idea of giving to a building and to its furniture the character of physical holiness was certainly antique, and even yet maintains its ground in opposition to the view that the only character which consecration can confer on material objects is reservation for religious uses. It had its roots in the conception that God is merely a visitor on earth, and that He can only appear in those places which have been detached from the earthly sphere, and which have acquired certain of the characters of His heavenly home (Jn 4$^{20.21}$).

(2) *The Sacrificial Theory of the Levitical legislation.*—The theory has been the subject of keen and prolonged controversy. That the sacrificial worship was ordained as a means of grace, and indeed as a condition of pardon and communion, is evident; but we have further to ask what was the precise function ascribed to sacrifice in the legal economy. And at this stage, it may be confidently premised, the sacrificial theory has shed the anthropopathic ideas which operated in the earlier ages. If the ritual embodied forms and phrases descending from the period of religious childhood, the crude ideas which first shaped them had been outgrown and forgotten. The theology of the prophets had too deeply saturated the religious thought of Israel to make it possible for any but an elevated doctrine to gain official recognition. The gift-theory of Spencer, as Bähr observed, is involved in insurmountable difficulties if the attempt is made to prove its vitality and persistence in an age whose consciousness was dominated by the unity and spirituality of God (*Symbolik*, ii. 275). Equally does the same objection press against the view that the sacrifice may still have been construed as a gratifying meal; while it is generally admitted that the theory of a communion physically mediated by the sacrificial feast, whatever part it may have previously played, was now quite outside the horizon of Israel's religious teachers. Another theory, which has also had some vogue, may be summarily set aside as belonging to a plane of thought incompatible with the deeply religious spirit of the Pentateuch. This is the view which reduces the system to the level of police regulations by interpreting the sacrifices as essentially fines, and as primarily designed to punish and check wrongdoing. The explanations of the Levitical sacrificial theory which have so far survived in the controversial struggle operate with higher forms of thought. These explanations vary not a little in detail, but substantially they may be reduced to three types according as they seek to elucidate the subject with the help of the three Christian categories of substitutionary satisfaction, prayer, and sacrament. In addition, there is a widely diffused opinion that either no sacrificial theory is propounded, or that it is not consistently carried through in the later legislation.

(i.) *The theory of a Penal Substitution* is entitled to precedence, not only on historical grounds, but also because of the *primâ facie* support which it has in the biblical evidence. The salient points of the theory may be summarized as follows—(1) as a sinner the offerer was under the wrath of God, and his life was forfeited; (2) by a gracious provision he was permitted to substitute an immaculate victim, to which his guilt was transferred, and which was put to death in his stead; (3) the vicarious death of the victim was accepted by God, who, on the ground of the satisfaction offered Him, received the worshipper to peace and fellowship. As to a fourth point—wherein the ground of the satisfaction lay—opinion has differed within the school. The usual Protestant view has been that the ultimate ground of the sinner's acceptance was the sacrifice of Christ which the victims typified, and even that reflective minds might have risen at the OT stage to a realization of this real ground of forgiveness with which their typical ritual brought them into touch. Others held that the sacrifices had *per se* a true expiatory efficacy in relation to the sins of the offerers (see Outram, p. 248 ff.; Fairbairn, ii. p. 304).

The essential feature of this theory, then, is that the death of the animal victim was of the nature of a vicarious punishment—*i.e.* 'some evil inflicted on one party in order to expiate the guilt of another, in the sense of delivering the guilty from punishment, and procuring the forgiveness of sin' (Outram, *ib.*). The evidence on which chief reliance is placed is contained in the ritual of the Day of Atonement (see AZAZEL). In this ceremony it is distinctly stated that the high priest confesses the iniquities of the children of Israel over the scapegoat, that the goat carries their iniquities away into the desert, and that he who lets the goat go incurs defilement (Lv 16$^{20ff.}$). In the case of the Sin-offering there is a similar contamination conveyed by the victim (v.^{28}), and, although the transference of guilt is not expressly mentioned, it is argued that this offering is clearly governed by the same ideas. Further, it is contended that the acts common to the ritual of all of the bloody sacrifices are expressions of the substitutionary idea. (*a*) The immaculate quality of the victim fitted it to take the place of the guilty; (*b*) the imposition of hands had the significance of setting it apart as a substitute, or imputing to it the sinner's guilt, or both; (*c*) the slaughter of the victim was the carrying out of the penal substitution; (*d*) the sprinkling of the blood on the altar attested to God that an animal had been slain as an atoning sacrifice; (*e*) the consumption by fire had the significance, on the older view, of the consignment of the substitute to eternal fire,—on the newer, of bringing the transaction before the mind of God (Kurtz, pp. 123–149; Fairbairn, ii. p. 302 ff.; Cave, p. 123 ff.). In the judgment of most modern scholars, the theory in question is untenable, and for the following reasons: (α) the death of the victim cannot have been vicarious, since sacrifice was not allowed for sins which merited death (Nu 15^{30}), only for venial transgressions; (β) a cereal offering might also atone (Lv 5$^{11-13}$), and in this case there could be no idea of a penal substitution; (γ) the victim was slain by the offerer, but on the theory in question should have been put to death by the priest as God's representative; (δ) the assumption that the imposition of hands involved a transmission of guilt is inconsistent, not only with other references to this practice, but with the fact that the sacrificial flesh was treated as most holy, and might be eaten by the priest; (ε) the central act of the sacrifice was, not the act of slaughtering, but the manipulation of the blood, which was viewed as the seat of the animal soul, or as a life which was presented to God (Dillmann, *Alttest. Theol.* p. 468. On the Imposition of Hands, see Driver's note in *Priesthood and Sacrifice*, p. 39).

Of the above arguments, at least (*a*), (γ), and (δ) are of undeniable weight; but how much do they prove? Simply this, that the idea of penal substitution is not one which has been consistently transfused throughout the entire sacrificial system. The various kinds of animal sacrifice, with their common element of ritual, are certainly not the creation of one man, or of one school, by whom they were shaped with a single eye to making them the vehicle of a particular sacrificial theory. The sacrificial system of P clearly embodies a large inheritance of forms and usages which had been created by earlier modes of thought, and the legislators did not feel called upon to recast every rite in a spirit of doctrinaire consistency. But when this has been said the possibility still remains that the sacrificial forms of most recent growth, and the most likely therefore to reveal the ideas of the compilers, embody the idea of propitiation through penal substitution. In the case of the sacrifice on the Day of Atonement, as we have seen, there is a transference of guilt, and the conclusion is drawn that the flesh becomes unclean; in the case of the Sin-offering as much is suggested; and it is a reasonable view that the interpretation thus given was meant to supply a key to the less articulate language of the other bloody sacrifices. The *locus classicus*, Lv 17^{11}, is not sufficiently definite to serve as a ground for rejecting the view. Moreover, the presuppositions of such a sacrificial theory were already recognized in OT religion. That sin is universally prevalent, that it provokes the Divine anger, and that its due recompense is suffering and death, had long been axiomatic in the higher teaching, and had been impressed upon the popular mind by numerous examples of public and private judgments. Further, the prophets had been wont to describe the judgments of God upon the nations as sacrifices, and it was a familiar enough idea that the consummated sacrifice was one in which the vengeance of God was fully wreaked upon a people in the carnage of a battlefield, or in the atrocities of the sacked city.

On the prophetic view, indeed, as has been maintained, there were only two possible modes of Divine reaction against sin—viz. the execution of the destroying purpose, or forgiveness on the ground of repentance and reformation. But there was a third possible development of thought. The sacrificial system was maintained, and even grew in honour, and it was an obvious reflexion that, in place of the consummated sacrifice of destruction spoken of by the prophets, God accepted as a surrogate the sacrifice of animal victims. That the idea of substitution was already familiar appears from Gn 22^{13} (offering of a ram in place of Isaac), and at a late stage the vicarious idea is used to explain the sufferings of the righteous Servant of Jehovah (Is 53). And given the doctrine that sin entailed death, and that one being might suffer in room of another, it was a highly natural, if not an inevitable step, to go on to suppose that the rite of sacrifice combined the two ideas, and that the slain victim bore the penalty due to the sinner.

(ii.) *The Prayer-theory* may serve to designate the group of interpretations which rest on the fundamental idea that the efficacy attached to sacrifice was due to the fact that it symbolized the religious sentiments which are the condition of acceptance with God. While on the former view the victim is held to take the place of the offerer in bearing the doom which he has merited, on this view it is held to be the mere vehicle for the expression of his devout sentiments and longings. The purpose of the sacrifice, as with prayer, is to serve as an index of what is in the worshipper's heart, and its virtue is exhausted in bringing this before God. Further, as prayer is of various kinds, so different writers have given to sacrifice varying interpretations corresponding to these kinds: by Philo, *e.g.*, it is construed as chiefly expressive of spiritual aspiration, corresponding to the prayer of supplication; for Bähr it has the function of expressing hatred of sin and self-surrender to God, corresponding to the prayer of confession and supplication; while Maurice also emphasizes the note which corresponds to the prayer of adoration.

The views of Bähr, though he adopts a different rubric, belong to this type. He finds the key of the system in Lv 17^{11}—'the soul placing itself at the disposal of God in order to receive the gift of true life in sanctification' (p. 211). From this point of view the ritual undergoes a new interpretation. A valuable and unblemished victim is selected as symbolical of the excellence and purity to which the offerer aspires; the death is necessary only in order to procure a life which may be offered to God; the sprinkling of the altar is the presentation of the life, still resident in the blood, to God. A simpler version of the theory is given by Oehler, who emphasizes the vital point in saying that 'the self-surrender of the person sacrificing was accomplished vicariously in the offering' (p. 632); and the discussions of Maurice centre round the same idea (p. 67 ff., 'The Legal Sacrifices'). Schultz holds that the Priestly Code was strongly dominated by the teaching of the prophets, and that the significance of all kinds of offerings was simply that which belongs to genuine worship. The Burnt-offerings and the Peace-offerings were a mode of adoration, while 'the ground of purification in the Sin-offering (and the Guilt-offering) is that God accepts the sacrifice, and that man in this offering, enjoined by God as the embodied prayer of a penitent, expresses his confession, his regret, his petition for forgiveness' (*Amer. Journ. Theol.* 1900, p. 310).

The exegetical arguments by which this view has been supported are of no great cogency. Lv 17^{11}, on which Bähr places such reliance, is at the most a contribution, though this doubtfully, to the view that the atoning element was the pure life which was offered, not the death through which it passed. In any case it does not give expression to the characteristic idea of the symbolical theory. 'It is never said in any manner of circumlocution that the blood of the animal slain atones for the offerer by symbolically representing the soul of the offerer' (Cave, p. 250). The inarticulate evidence of the ritual is no more favourable. It is true that it can be so interpreted as to fall in with the theory, but no part of the rites or appended commentary speaks so strongly for the theory as do the sacrifices of atonement for the idea of vicarious punishment. A further objection which has been pressed by Kurtz and others is, that it is alien to the spirit of revealed religion as the religion of grace, inasmuch as it grounds the acceptance of the sinner upon his own worthiness, or at least on the worth of his sentiments and resolutions. This, however, is indecisive: to say that prayer alone is efficacious is not to say that it is meritorious. Weightier is the objection, that on the Prayer-theory correct ritual could not claim the paramount importance which it possesses in the Priestly Code. Further, the view could never be popular that sacrifice had no efficacy other than that of a vehicle for the expression of the spirit of worship; and the Priestly Code, which has all the character of a popular religion, may well be supposed to have taken account of the common need, and to have supplemented the spiritualized thought of the prophets on the subject of sacrifice with a theory which made the offering an objective, an independent, and as such a deeply efficacious ground of obtaining or preserving the favour of God.

(iii.) *The Sacramental* idea has also been widely used to elucidate the sacrificial theory of the Pentateuch. But to describe the sacrifices as of the nature of sacraments does not supply a definite theory as to the real questions at issue. The category called in to explain the problem is itself ambiguous, and when it has been accepted it has still to be explained whether the efficacy of a sacrament is understood in the Roman or the Zwinglian sense, or in accordance with an intermediate type of doctrine.

Thus a Protestant theologian claims for the sacrifices that they possess the sacramental notes; they were signs of spiritual realities: they not only represented but sealed and applied spiritual blessings, and their efficacy was proportioned to faith (Scott, *Sacrifice*, p. 288). Similarly, a Roman Catholic divine teaches that there were certain Mosaic ceremonies to which something of a sacramental character attached, notably the Passover, which corresponded to the Eucharist, the purificatory rites, which corresponded to the sacrament of penance, and the consecratory sacrifices, which corresponded to the sacrament of ordination (Hunter, *Dogmat. Theol.* iii. 172). But this means only that they have agreed to use the same name, not that they are at one as to the theory of the *modus operandi*—which is the point in dispute—of the OT sacrifices. That the use of the sacramental rubric, so far from introducing us to a definite theory, rather serves to obscure the issues, appears from the fact that it is adopted by writers who differ *toto cœlo* as to the rationale of sacrifice. 'The acceptance of the sacrifice by Jehovah,' says Bähr, 'and His gift of sanctification to the worshipper, gives to the sacrifice the character of a sacramental act' (ii. p. 211). At the same time Cave, who devotes considerable space to the refutation of Bähr's distinctive positions, discusses the nature, the method, the extent, and the efficacy of the Mosaic atonement under a title which affirms that the Mosaic sacrifices had 'a sacramental significance' (p. 138 ff.). Yet again the sacramental title has been claimed by Robertson Smith for the idea, which is not alleged to be consciously present in the Priestly Code, that the union of the worshippers with their God was cemented by the physical bond of a common meal.

Reasons might, indeed, be given for resting satisfied with the Sacramental interpretation—as that it does justice to the element of mystery, or that it contributes a formula in which those may rest who think the controversy fruitless. But an independent theory it is not, and when closely examined is found to branch off either into the Prayer-theory, or into some modification of the doctrine of an objective atonement, which has its chief illustration in the theory of penal substitution.

(iv.) There remains *the view that no sacrificial theory underlay the Levitical code.* The earlier ideas, which attached themselves to the efficacy of a gift or of a uniting meal, had been discredited in the course of religious progress, and the legislation, it is supposed, had nothing definite to put in their place.

'A precise answer to the question how the sacrificial worship influenced God, men were unable to give.' What was certain was that it was of Divine appointment; for the rest it was a mystery. 'When, in the blood of the Sin-offering, the tie between God and His people was renewed, what was felt was the weird influence of the incomprehensible' (Smend, p. 324).

The impression made by the code, however, rather is that the matter was so well understood as not to require explanation, than that it was so mysterious as to be incapable of explanation (cf. Lv 17^{11}). It seems, besides, improbable, in view of the share that the mind invariably claims in religion, and of the fact that every preceding phase had its accompaniment of illuminating idea, that at the culminating stage thought abnegated its function, and took refuge in the category of mystery. More likely is it that the step deemed by Holtzmann inevitable at a later stage was already taken, and that the chaos of confused ideas resulting from the discredit of old views was averted by the assertion of the substitutionary idea—'the most external, indeed, but also the simplest, the most generally intelligible, and the readiest answer, to the question as to the nature of expiation' (*Neutest. Theol.* i. p. 68).

vii. SACRIFICE IN JUDAISTIC PRACTICE AND DOCTRINE.—The authority of the Pentateuch ensured for its sacrificial legislation a prominent place in the religious life of the Jewish people subsequent to the Exile. By the destruction of the Second Temple, a revolutionary blow was subsequently struck at the sacrificial system, inasmuch as offerings could no longer be presented at the place and in the manner appointed by God. In the necessarily brief sketch of this part of the subject, we confine our attention to the two points of outstanding interest—the theory of sacrifice prevalent in the Jewish schools before the rise of Christianity, and the way in which Judaistic thought, after the destruction of Jerusalem, accommodated itself to the suspension of its sacrificial cult.

1. *The old Jewish theory of sacrifice*, could we be confident of recovering it, would possess priceless interest as helping to elucidate the sacrificial ideas of those who, like St. Paul, passed through the school of the synagogue. Unfortunately, the date of the material collected by Weber (*Jüd. Theol.*^{2} 38 ff.), and utilized by Pfleiderer and Holtzmann, is somewhat uncertain; and it is always open to doubt whether a dictum is not a product of later Talmudic reflexion. The ideas and tendencies most satisfactorily vouched for may be thus summarized:—

(*a*) Sacrificial worship was not regarded as of pre-eminent importance, but was co-ordinated, as a condition of pleasing God, with knowledge of the Law, and with the performance of good deeds. That a higher valuation of sacrifice did not obtain was due partly to prophetic influence, partly to the later developments of the religious life. The temple had now its complement and competitor in the synagogue, which was the sphere of the larger part of religious activity, as being the ordinary place of worship; and, as the exposition of Scripture and tradition was the most prominent element in the worship of the synagogue, the Rabbi and the scribe tended to overshadow the priest in popular estimation. Thus a dictum ascribed to the period of the Second Temple has it that an ignorant high priest is inferior to the wise man, even though the latter be a 'bastard' (Weber, p. 38).

(*b*) Recognition is accorded to a class of acts serving a function similar to animal sacrifices, but belonging to a higher order. To this category belong the merits of the forefathers. The merits of Abraham, in particular, served to cover the sins of his posterity. Suffering especially had expiatory quality. By penal and disciplinary sufferings, and above all by death, atonement was made for sin. A much higher degree of efficacy attached to the sufferings and death of the righteous, as foreshadowed in Is 53. The death of the righteous is expressly compared, in point of efficacy, to the Day of Atonement (*Pesikta*, 174*b*). The trial of Abraham, the lamentations of Jeremiah, all the dolour of the prophets, and all the anguish of the martyrs, constituted a ground for the forgiveness of sin in Israel. Even the penal sufferings inflicted by God upon the Egyptians and other hereditary foes of Israel have the character of a ransom for the chosen people (Weber, p. 326 ff.; cf. Holtzmann, *Neutest. Theol.* i. p. 64 ff.).

(*c*) Interpretation of sacrifice in the sense of substitution. The rise of ideas of substitution with imputation of guilt and merit has been indicated in the previous section. If, as is probable, these were already associated with the sacrificial system, it can be readily understood how they were extended to explain the merits and the sufferings of the fathers. If, on the other hand, they originated independently, it cannot be doubted that at this period they profoundly influenced the sacrificial theory. From the belief in the vicariousness of the death of the righteous, it was an easy, an inevitable transition, to belief in the substitution of the animal victim. The idea of penal substitution supplied an intelligible popular answer to the question, which could not fail to be raised, as to why and how sacrifice procured the favour of God; and although express statements of the idea are few (2 Mac 7^{37}, 4 Mac 6^{29}), the evidence points to this mode of thought having become current. 'Everything pressed towards the assumption that the offering of a life, substituted for sinners according to God's appointment, cancelled the death penalty which they had incurred, and that consequently the offered blood of the sacrificial victims expiated sin as a surrogate for the life of the guilty' (Holtzmann, p. 68). The Philonic interpretation of sacrifice as symbolic of self-sacrifice was too philosophical and gave too little religious assurance for general acceptance.

During the period in question, the sacrificial regulations were observed with the utmost scrupulosity, and with all due pomp and solemnity. But at the same time a process was going on which was loosening the hold of sacrifice upon the Jewish mind, and in which the conviction was already finding half-articulate expression, that it was not a complete provision, and even that it was not vital to the communion of the people with God. Had no such loosening taken place, it is difficult to conceive how faith in God could have survived the blow which at one and the same time robbed the Jews of their fatherland and their organized national worship. A living belief in the necessity would naturally have issued, when sacrifice became impossible, in apostasy to heathenism.

Of sacrificial practice at the close of the period some glimpses are given in NT. Allusion is made to the sacrifice of the minor Burnt-offering at the presentation of Jesus (Lk 2^{24}), the sacrifice of the Passover (Mk 14^{12}), the union in sacrifice of a Galilæan group (Lk 13^{1}), the offering after recovery from leprosy (Mt 8^{4}), the votive offering (Ac 21^{26}), and money offerings (Lk 21^{4}). Josephus gives a somewhat minute account of the sacrificial system for the information of the Gentile world (*Ant. passim*), leaving the impression that it was thoroughly normative for contemporary practice. The intermission of the sacrifice offered for Cæsar's prosperity marked the beginning of the Jewish war (*BJ* II. xvii. 2). The seizure by John of the store of wine and oil, used in the Burnt-offerings, and their distribution among the multitude, made the Roman conquest, he thinks, only a merited counterpart of the doom of Sodom (V. xiii. 6).

2. *Readjustment of Judaistic thought with the cessation of sacrifice.*—To the new conditions created by the destruction of the Temple, theology accommodated itself by the theory that other observances were accepted as a substitute for sacrificial worship. The study of the Law took the place of the rites of the altar, and even took over the characteristic designation of the latter (עֲבֹדָה). The knowledge of the Law, it was taught, was more valuable in the sight of God than the continual Burnt-offering, and even than the building of the sanctuary (*Megilla* 3*b*, 16*b*). In particular, it was held that the duty of offering the legal sacrifices had been superseded by the duty of studying the laws relating to the subject (*Pesikta* 60*b*). The other observance which is treated as an equivalent for the abolished service is Prayer, in accordance with which a parallelism was worked out between the order of the daily sacrifices and the order of daily prayers, and also between the varieties of sacrifice and the different kinds of prayer (Weber, p. 38 ff.).

It was also natural that the idea of the merits of the righteous, especially of pious sufferers, should continue to gain in significance and emphasis. The destruction of Jerusalem comprehended an unparalleled tale of horrors, and involved in suffering and death many innocent and righteous persons; and it might well be believed that this was a consummated sacrifice whereby full atonement had been made for national sin (Weber, p. 323 f.).

B. *THE SACRIFICIAL DOCTRINE OF NT.*

It is open to question whether in an undisturbed course of development sacrifice would have maintained its place in the religion either of the Jewish or of the Græco-Roman world. On the one hand, it possessed many features which justified its position as the central religious rite—it lent itself to imposing ceremonial, it was peculiarly fitted to thrill the physical nature of the worshippers, it satisfied the instinct which prompts men to give to God what costs them something, it supplied an external ground of confidence, and it was hallowed by its immemorial antiquity. But, on the other hand, it was menaced by more than one factor in the higher civilization of the ancient world. On the æsthetic side there must have been some considerable feeling to the effect that the public slaughter of cattle, especially with such accompaniments as were observed at Roman festivals, could not be retained in a period of advancing refinement as the appropriate form of worship. Still more, the conceptions of God prevalent in the Stoic and Platonic schools raised the question as to whether animal offerings were really acceptable to God, while the scepticism of others turned upon the system the shafts of ridicule. The Jewish Church, in its turn, contained within it, in the prophetical teaching, a set of principles which at least involved the conclusion that sacrifice was unnecessary, from which it was no long step to the position that it should be discontinued. But, whatever the issue might have been in the natural progress of refinement and theological reflexion, the question was settled both for the Jewish and the Gentile world by two extraordinary events. The destruction of Jerusalem, as we have seen, brought about the abolition of sacrifice in one way, and in another Christianity destroyed the system in the name of a higher fulfilment.

i. NT APPRECIATION OF THE OT SACRIFICES.—The teaching of Jesus on this subject, as recorded in the Synoptic report, has two outstanding features: (1) the recognition of the Divine authority of the sacrificial law, and of its binding character upon the Jews; (2) the accentuation of the prophetic doctrine of the pre-eminence of the moral over the ceremonial. He assumes that His hearers offer sacrifice (Mt 5^{24}), and He enjoins a recovered leper to make the offering required in the Law (8^4). Did He Himself join in the sacrificial worship? He whose presentation as an infant was accompanied by a Burnt-offering, whose death was preceded by the celebration of the Passover, and who made it a maxim to conform to the laws of the Jewish Church even when knowing Himself unbound by them, certainly did not hold aloof from the temple-worship of which sacrifice was the central act. With equal certainty we may assume that it was only as an element of collective worship that sacrifice was used by Him. But, while at this stage sanctioning sacrifice, He adopts the saying of Hosea that 'God will have mercy and not sacrifice' (Mt 9^{13} 12^7), and accounts the scribe who gives a similar valuation as not far from the kingdom of God (Mk 12^{33}). The second prophetic axiom, that sacrifice is worthless with unrepented sin in the background, finds utterance in Mt $5^{23.24}$. Had this been all the evidence, it could have been held, and with greater confidence than in the case of the prophets, that Jesus contemplated the continuance of sacrifice as a subordinate element in the religious life. The abolition is involved in the announcement of the establishment of a new covenant (Mt 26^{28}, Mk 14^{24}, Lk 22^{20}), with the implication of the disappearance of the old economy and all its sacrifices.

The direct references of St. Paul to the subject are not numerous. The observance of the sacrificial law was still maintained to some extent among the Jewish Christians, and the apostle on one occasion associated himself with four men who went through a purification ending in offering (Ac 21^{26}). In 1 Co 10^{18} he speaks as if the purpose and significance of one kind of sacrifice were well understood: it was designed to establish communion or fellowship with God, it might be with demons, and of the worshippers one with another, through the medium of the sacrificial meal. The principal aspect in which the OT sacrifices presented themselves to him was the typical. In themselves they belonged to the beggarly elements, but they pointed forward to a satisfying and enduring ground of reconciliation with God.

The Epistle to the Hebrews contains an express and full discussion of OT sacrifice. As kinds it distinguishes gifts and sacrifices—*i.e.* unbloody and bloody offerings, and regards the sacrifices of the Day of Atonement as the crown of the system. The purpose was deliverance from sin (5^1), the beneficiaries were priests and people, but the contemplated end was not fully attained. That they were ineffectual for the purpose in hand was proved from the restricted scope of their claim ('sins of ignorance,' 9^7), from the imperfections and burdened consciences of the worshippers ($10^{2.3}$), from the necessity of the repetition of the offerings ($v.^2$), and from explicit declarations of God ($v.^5$). The conclusion is that they accomplished only a bodily or ceremonial purification (9^{13}), and that, as merely typical of a real salvation, they were a transitory provision (10^1). In so far as blessing flowed from them in the old dispensation it was attached to the faith accompanying them (11^4).

In general we should distinguish two stages in the thought of the apostles on this subject. In the pre-Christian stage they had believed in the full efficacy of the Levitical sacrifices, and in the Christian they regarded them as chiefly valuable because of their witness to their own inadequacy, and to the complementary work of Christ.

ii. THE PERFECT SACRIFICE OF THE NEW COVENANT.—It was, then, axiomatic for the NT writers that the system of OT sacrifices had been abolished by Christ. This conclusion was not, however, founded on the belief that sacrifice was a superfluous rite, but on the conviction that the OT sacrifices, which had possessed some value relative to their time, had been superseded by a sacrifice of a nobler nature and of absolutely certain efficacy. This was the sacrifice offered up by Christ. In the NT doctrine of Christ's sacrifice, now, we may distinguish five points, on three of which the testimony is unmistakable, while the other two are left in some obscurity. The points on which the teaching is clear are (1) the sacrificial character of Christ's death, (2) the blessings which proceed and flow from it, (3) the conditions on which these are appropriated. The debatable ground is reached when it is attempted to fix the NT conception of (4) the nature or material of Christ's offering, and (5) the manner in which it operated towards God as the procuring cause of the blessings of redemption.

(1) *The interpretation of Christ's death as a sacrifice* is imbedded in every important type of the NT teaching (Ritschl, ii. p. 161; Cave, p. 284). The silence of St. James and St. Jude raises no presumption against the idea being part of the common stock of Apostolic doctrine. It has been denied that St. Paul adopts the category (Schmidt, *Die paul. Christologie*, p. 84), but the denial rests on dogmatic rather than on exegetical grounds (Ritschl, ii. p. 161). The interpretation was given by Jesus in connecting His death with the Sinaitic sacrifice of the Covenant (Mt 26^{28}, Mk 14^{24}, 1 Co 11^{25}), and it is expanded and presented by the apostles under various points of view.

The evidence for the Apostolic construction is as follows:—(*a*) It is expressly stated that Christ was offered as a sacrifice—*προσφορά* (Eph 5^2, He 9^{14}), *θυσία* (Eph 5^2, He 9^{26}). (*b*) A saving efficacy is ascribed to the blood or the cross of Christ, and in these cases the thought clearly points to the forms of the altar (Ro 3^{25} 5^9, 1 Co 10^{16}, Eph 1^7 2^{13}, Col 1^{20}, He $9^{12.14}$, 1 P $1^{2.19}$, 1 Jn 1^7 $5^{6.8}$, Rev 1^5). (*c*) The correspondence is worked out between Christ's death and the different OT sacrifices—esp. the Sin-offering (Ro 8^3, He 13^{11}, 1 P 3^{18}), the Covenant-sacrifice (He $9^{15\text{-}22}$), the sacrifices of the Day of Atonement (He 2^{17} $9^{12\text{ff.}}$), and the Passover (1 Co 5^7). (*d*) The distinctive acts of the OT sacrificial ritual are shown to have been repeated in the experience of Christ—the slaying of the immaculate victim (Rev 5^6 13^8), the sprinkling of the blood, both in the sanctuary as in the sin-offering (He $9^{13\text{ff.}}$) and upon the people as in the Covenant-sacrifice (1 P 1^2), and the destruction of the victim, as in the case of the Sin-offering, without the gate (He 13^{13}) (Ritschl, ii. p. 157 ff.; Sanday-Headlam, *Romans*, p. 91). (*e*) The specific effect of sacrifice—expiation or pardon of sin—being ascribed to Christ's death, points in the same direction (*ib.*).

Nor for the apostolic age was the description of Christ's death as a sacrifice of the nature of a mere illustration. The apostles held it to be a sacrifice in the most literal sense of the word, and it is not difficult to appreciate various reasons why they clung to, and even gloried in, this interpretation of the death. It was not merely that they received it with the impress of Christ's own authority. It provided them with their best defence against a popular calumny: without altar and offering Christianity lent colour to the suspicion that it was at bottom irreligious if not atheistic, and the one effective means of removing the natural prejudice was to show that it embodied the doctrine of a literal and necessary sacrifice. Further, it solved to their own minds the speculative difficulty arising out of the death of Christ. Judged by acknowledged canons, His crucifixion had the aspect of a retributive judgment,—at the least, of a repudiation of His mission by God; but this explanation, in view of their faith in Christ and the event of the resurrection, was an impossibility. On the other hand, it was not intellectually satisfying to treat it as a mere mystery, and to point to the fact that it had been foretold by the prophets. The needed intellectual relief was found in bringing it under the category of the victim-death which God had of old appointed, not as the punishment of the victim's sin, but as a means of blessing to others. Above all, the sacrificial interpretation met a religious want — the need, all but universally felt, of a ground of confidence external to self on which to rest in approaching the majesty and holiness of God.

(2) *The benefits procured by Christ's sacrifice* are coextensive with the blessings of the gospel, and may be distinguished as primary and derivative. The primary effects are that it sets man in a new relation, on the one hand to God, on the other to sin. By St. Paul special prominence is given to the new relationship which it establishes between God and the sinner; on this ground the sinner is justified or accepted as righteous (*δικαίωσις*, Ro 3^{24-26}), adopted (*υἱοθεσία*, 8^{15}), and placed on a footing of reconciliation (*καταλλαγή*, 5^{11}). Elsewhere the emphasis is laid rather on its efficacy in procuring the forgiveness of sin, *i.e.* in saving from the penal consequences which otherwise the curse of the broken law inevitably entails. It is upon this aspect that Christ fastens our attention in speaking of His Covenant-sacrifice (*ἄφεσις τῶν ἁμαρτιῶν*, Mt 26^{28}); the idea of cancelling guilt, of which a vital moment is liability to punishment, is associated with Christ's sacrifice in He 2^{17}, 1 Jn 2^{2} (*ἱλάσκεσθαι* with *ἁμαρτίας* as object, and so 'to expiate'); and the redemption series of terms (*λύτρον, ἀπολύτρωσις, ἐξαγοράζειν*), while comprehensive of all the aspects of spiritual deliverance in Christ, has special reference to emancipation from the curse of sin or its merited penalties (Eph 1^{7}, Col 1^{14}). Upon these fundamental boons of peace with God and forgiveness follow, in the order of grace, the gifts of the Spirit as the energy of sanctification (Gal $5^{22\text{ff.}}$), and as the spring of boundless consolations — viz. peace, joy, hope, assurance, with their fruits (Ro $5^{1\text{ff.}}$), while the consummation is reached in the heavenly inheritance that is the meet portion of the sons of God (Ro 8^{17}). In brief, the sacrifice of Christ is represented as the ground of all filial communion with God, as the condition of pardon, as the source of all noble endeavour and true comfort in the life which now is, and as our one warrant for confidence as to the world to come.

(3) *The conditions on which the blessings are procured*, on which the hypothetical becomes actual, are REPENTANCE (*μετάνοια*) and FAITH (*πίστις*). As to the necessity of these conditions the NT writers speak with one voice. Even St. James must have considered faith of vital importance, since otherwise he need not have become a Christian at all. The one question in regard to which the teaching is somewhat fluid is as to the precise object of the faith which unlocks the treasury of redemption. In Hebrews the conception is very general—the object is God and His promises. In the Pauline theology it is brought into the most intimate connexion with Christ, and includes belief in Him as Messiah, crucified Saviour, and risen Lord (Ro 4^{24} 10^{9}, 1 Th 4^{14}), issuing in union with the crucified and exalted Christ in trust and self-surrender (Gal 2^{20}).

(4) *The nature of Christ's offering*, and (5) *The mode of its operation*, are two questions which are so closely inter-connected that they may best be discussed in conjunction. So far we have been dealing with the facts of the Atonement as to which the biblical teaching is full and express. These data are, to adopt an old formula—the disease, sin; the remedy, Christ's sacrifice; the application of the remedy, salvation here and hereafter on the ground of repentance and faith. But the medical analogy suggests that the remedy may cure the disease, while yet it may be obscure to the patient wherein precisely the virtue of the curative agent lay, and how it affected his system so as to overcome the disease. Similarly, theology has its questionings, which the NT teaching does not unmistakably answer, as to the precise 'what' of Christ's offering, and as to 'the principle on which the forgiveness of sins is connected with its sacrificial quality' (Ritschl, ii. p. 185).

(*a*) The references of *Christ* to His own death, while representing it as conditioning the highest blessings, do not elucidate the connexion between the work and its effects.

The passage in which Christ speaks of Himself as come 'to give his life a ransom for many' (Mk $10^{42\cdot45}$, Mt 20^{28}), has been supposed to contain *in nuce* the solution of the problems of the Atonement. A ransom implies captives (sinners), a hostile power which holds them in thrall (God as the representative and vindicator of the outraged moral law), operation of the ransom (the death of Christ accepted as a substitute for that of sinners), specific effect (deliverance of sinners from the penalties of sin). This elaboration has, however, been challenged at almost every point. It is maintained by Ritschl that the key-word of the passage is erroneously rendered 'ransom,' that as the equivalent of כֹּפֶר it has the significance of a protective covering, and that the way in which it operates to protect us is by stimulating us to self-denying imitation of Christ (*Rechtf. u. Vers.* ii. 85). Wendt adheres to the ransom idea, but maintains that the specific effect is to deliver from bondage to suffering and death, and that it accomplishes this by teaching us to adopt Christ's sanguine valuation of these evils (*Lehre Jesu*, ii. 237). According to Beyschlag, the evil from which it was to emancipate was worldly ambition and similar forms of sin, which could not survive the ruin of earthly hopes in the tragedy of the Cross (*Neutest. Theol.* i. 153). The error of this group of interpretations lies in disconnecting Christ's death from the immediate specific effect of expiation or the forgiveness of sin, while the older interpretation unduly exploited the metaphor. All that the passage teaches is that the death of Christ was the means of effecting a redemption from sin (*ἀπολύτρωσις*) which accrues to the benefit of many. The institution of the Lord's Supper supplies an important reference to our Lord's death:—'This is my blood of the new Covenant, which is shed for many' (Mk 14^{24}); 'this cup is the new Covenant in my blood' (1 Co 11^{25}), to which St. Matthew adds the definition of the specific effect—'for the remission of sins' (26^{28}). These words are important as comparing the death of Christ to the Covenant-sacrifice which accompanied the giving of the Law at Sinai (Ex $24^{3\text{-}8}$), and as suggesting that it resembles the latter in its operation and effect. As to the effect of both sacrifices there is not much room for doubt. The Covenant-sacrifice of Sinai ratified the legal covenant between God and His people, the Covenant-sacrifice of Calvary established the Covenant of grace foretold in Jer 31^{31}, in which the cardinal boon, as specified in St. Matthew's addition, is the remission of sins. As to the manner of its efficacy we are hampered by the uncertainty as to how the sprinkling of the people with blood in the Sinaitic sacrifice operated, or was understood to have operated, in establishing the Old Covenant. According to the traditional view, the blood of the animal victims, slain in room of the guilty people, and sprinkled on them, was accepted as atoning for their guilt, and hallowed them for entrance on their new relation with God. Again, it has been supposed that the fundamental idea was that the victim represented the two parties in the Covenant, and the killing of it meant that so far as the Covenant was concerned they had no longer will or life, *i.e.* the Covenant was immutable

(Westcott, *Hebrews*, p. 301). Yet again it has been interpreted as of the nature of a honorific gift which as such was acceptable to God (Wendt, *op. cit.* ii. 237). And once more, recurring to the evolutionary account, we might utilize the idea that by sharing the blood God and His people were knit into a close physical union and communion. Corresponding to these accounts the sacrifice of Christ would be necessarily interpreted as efficacious as a penal substitution, as an act declaratory of the immutability of God's gracious purpose, as an acceptable gift of perfect obedience, and as a sacramental act uniting God and man. It thus appears that the conception of the death as a Covenant-sacrifice does not itself yield a theory, but only supplies a form which can be utilized to illustrate a theory otherwise grounded. Probably Christ's meaning was simpler than any that has been specified, viz. that it was God's plan to seal a covenant by a sacrifice, and that, like the Old, the New Covenant, which provided for the remission of sins, had a sign of its origin and validity in the shedding and sprinkling of blood.

(*b*) The *Pauline Epistles* bring us closer to the familiar theological issues. In view of his speculative interests, it is antecedently probable that St. Paul had reflected on the problems which have proved so fascinating to later Christian thought, while his rabbinical training must have left a deposit of answers to similar questions touching OT sacrifice. As a fact, he makes a large contribution to a theory of the Atonement.

(*α*) The element of Christ's sacrifice to which decisive importance attaches is the death upon the cross. So vital is this that the gospel may be summarily described as the message of the cross (1 Co 1^{18}). It is in the death of the Son (Ro 5^{10}), in His cross, in the blood of His cross (Col 1^{20}), that the procuring cause is found of the blessings of redemption. It is obviously true that St. Paul recognizes other elements without which the death would have had no significance. Especially does it derive its value from the dignity of the person of Him who was Messiah, declared to be the Son of God in the resurrection, and who is now exalted (Ro 1^4, Col $1^{14ff.}$). But it was not simply as obedient (Ro 5^{19}, Ph 2^8), it was as the obedient One who was slain, and whose blood was spilt, that He had power and prevailed (Ro 3^{25}). 'It is upon the moment of death that the grounding of salvation is exclusively concentrated' (Holtzmann, *Neutest. Theol.* ii. p. 111).

(*β*) The sacrifice of Christ had the significance of the death of an innocent victim in the room of the guilty. It is vain to deny that St. Paul freely employs the category of substitution, involving the conception of the imputation or transference of moral qualities. He does not, indeed, expressly say that Christ died in our stead (ἀντί): the phrase is 'on our behalf' (ὑπέρ, Ro 5^8 8^{32}, 1 Th 5^{10} etc.), or 'on account of our sins' (διά, Ro 4^{25}; περί, 1 Co 15^3). But the idea of an exchange of parts as betwixt Christ and man is unmistakable. Christ suffers death, which is the penalty of our sins, not of His own; man is the recipient of a righteousness which he has not built up, but which is won for him by Christ (2 Co 5^{21}). From his reference to Christ as a means of propitiation (ἱλαστήριον, Ro 3^{25}) it is probable that the apostle conceived of Christ as expiating guilt through the vicarious endurance of its characteristic penalty. It does not, indeed, follow that he conceived of Christ as becoming the object of the Father's wrath, and construed the cross as having the quality of a punishment inflicted upon Christ and recognized as such, or the content of an equivalent of the misery of the lost (Pfleiderer, *Paulinismus*, p. 92 ff.).

(*γ*) The necessity of Christ's sacrifice had its ground in the Divine justice. The economy of grace, which includes the Atonement, is indeed derived, as its ultimate spring, from the love of God (Ro 5^{6-10} $8^{32.39}$); but the justice of God had a voice in the shaping and developing of the economy. The atoning sacrifice was necessary in order 'that God might be just' as well as 'the justifier of them that believe' (Ro 3^{26}). But this answer only opens up new vistas of questionings. Why was Christ's vicarious death demanded by God in virtue of His justice? We may safely say that neither the Grotian theory—to prevent the spread of sinful disorder by an example of punishment, nor even the orthodox view—because Divine justice by its very nature insists on punishment or satisfaction, lay within the apostle's horizon. The ground of the necessity was something more positive, viz. that God, whose word could not be broken, had enacted and provided in Scripture that sin would be punished with death. According to Pfleiderer, this is one of the instances of the contradictions of Paulinism. The Law, which the apostle pronounced to be temporary and now abrogated, is here utilized to lay the foundation of the doctrine of the Atonement (*op. cit.* p. 103). But the proclamation of death as the wages of sin is not confined to the Law; it goes back to the patriarchal and earlier times (Gn 3^3), in which St. Paul always recognized an anticipation of the religious conditions of the age of the gospel.

(*δ*) The sacrificial death of Christ was an event which broke the power of sin as the dominant principle of humanity. It does not exhaust St. Paul's teaching as to the mode of its efficacy to say that, on the ground of the sacrifice, God accepts and sanctifies the sinner. He also teaches that in the death of Christ there took place a death of mankind to sin, 'If one died for all, then all died' (2 Co 5^{14}, cf. Ro 8^3). Humanity was then in a manner comprehended in Him, and, although the realization was to be partial and gradual, contemporaneously with His death it died in principle to the old order in which the flesh held the nobler elements in thrall. Christ routed sin in the sphere of human nature, and a new humanity was thus potentially created. While insufficiently recognizing the forensic aspect of Christ's work, Weizsäcker justly observes: 'it consists not only with his doctrine of the Person of Christ, but also with the several modes of thought of the great apostle, that Christ's work in death appears to him under this highest view-point of the destruction of a world and its power through a higher power and order, and that this distinction should take place in its own province, so that flesh is vanquished in the flesh, law through law, death through death' (*Apost. Zeitalt.* p. 140).

(*c*) The *Epistle to the Hebrews*, though dealing very fully with the sacrifice of Christ, chiefly dwells on its parallelism to the Levitical sacrifices in respect of the ritualistic acts of the manipulation of the blood, and its superiority as regards its range and efficacy. There are, however, two points at which it propounds or develops a reflexion which is of far-reaching importance in the field of speculation. The first relates to the question as to the precise nature of Christ's offering, or the element which gave it its atoning value. In common with the apostles, the writer fixes our attention closely on the event of the bodily death as that which constitutes Christ the sin-bearer (9^{28}) and the instrument of our sanctification (10^{10}). But behind this lay the question wherein the sacrificial value of the death consisted. Was the material of the sacrifice the sum of the physical anguish, and of the accompanying distress of spirit, which immediately preceded death, and especially of the agony, the humiliation, and the dissolution of the final event? Or was it the spirit of self-sacrificing love which prompted Jesus to lay down His life? In other words, was the sacrifice of Christ efficacious in virtue of its quality of a suffering unto death, or in virtue of its quality of an obedience unto death? Already St. Paul, in whose scheme of thought it was of vital consequence that Christ suffered the physical consequences due to human sin, had given expression to the thought that an element of fundamental value was the obedience of Christ. That we are justified by His blood, and that we are justified by His obedience, are parallel conceptions (Ro $5^{9.19}$). This conception, which with St. Paul comes in somewhat incidentally, is very directly stated in He $10^{5.9}$ 'Sacrifices and offerings and whole burnt-offerings and sacrifices for sin thou wouldest not; then hath he said, Lo, I am come to do thy will' (vv.$^{8.9}$). Here the contrast between the Levitical sacrifices and the sacrifice of Christ is developed in a peculiarly suggestive way. It does not consist in this, that in the former case animal victims are slain, in the latter a victim of pre-eminent dignity, but in the circumstance that in the one case the offering is a material, in the other a spiritual oblation.

The second important passage is that in which the writer develops the parallel to the action of the high priest in the sanctuary on the Day of Atonement. Even as the high priest entered the Holy of Holies, bearing with him sacrificial blood, which he offered for himself and the people (9^7), so Christ entered heavenly places 'through his own blood,' or to present His sacrifice before God ($9^{11ff.}$ v.^{23}). From this representation it would appear that the vital moment of the sacrificial act was the presentation of His blood. And as it may be maintained that the object in presenting the blood was, not to bring into God's presence evidence of the consummation of the death, but to offer that which the OT described as the seat of life, it would follow that the quality of satisfying God attached to Christ's offering of a stainless soul or a perfected obedience. The issue may be more sharply defined thus: Was the satisfaction rendered by Christ the death to which He voluntarily submitted, or was it the lifelong obedience which found in the death its last and most signal expression? To many minds the thought embodied in the second alternative has brought welcome intellectual relief. For the hard saying that God could be satisfied only by the death of His Son it substitutes the reasonable and even natural idea that the filial obedience manifested in the whole life of Jesus —in His inner life, and His ministry of teaching and beneficence, as well as in His faithfulness unto death—constituted the offering with which God was well pleased, and which brought humanity into a new relation to God.

While suggesting the higher conception of the nature of Christ's offering, the Epistle does not free itself from the idea that the physical event of death came into account as something additional to the obedience. It accepts the principle that 'apart from shedding of blood there is no remission' (9^{22}), and indeed knows nothing of a sacrifice which does not involve suffering and death as an essential element of it (9^{26}). The following utterance seems to come near to the eventual teaching of the Epistle. 'It has been said that Christ's perfect sacrifice is wholly inward, of the heart. But is it not essential to sacrifice that it should be the outward act by which the inward intention is realized, is pledged, is sealed? The inward self-dedication only becomes sacrificial when it has discovered the appropriate offering by which it can verify itself. Only through attaining this expression, in outward realization, does the language of sacrifice apply to it' (Scott Holland in *Priesthood and Sacrifice*, p. 85).

(*d*) In the *Johannine writings* the centre of gravity shifts from the Atonement to the Incarnation. In the Pauline theology the capital theme is the sinner's acceptance and pardon on the ground of Christ's atoning sacrifice; in the Johannine it is the possession of eternal life in intimate and vitalizing union with the Word made flesh. The keynote of the one is reconciliation,—of the other, communion. It is indeed a difference of emphasis, not of inclusion and exclusion. As St. Paul also experienced and chronicled the inspiration and spiritual energy enjoyed in mystic communion with the exalted Christ, so the Johannine writings also embody numerous references to the importance of Christ's sacrificial death. They preserve the Baptist's testimony to Christ as the lamb-victim, whether the Paschal lamb or the suffering Servant of Jehovah (Is 53^{11}), that takes away the sin of the world (Jn 1^{29}); His work is paralleled, as in Hebrews, to that of the high priest on the Day of Atonement (17^{19}); and His death, which is conceived as a Sin-offering, has manifestly expiatory value (*ἱλασμὸς περὶ ἁμαρτιῶν*, 1 Jn 2^{2}, cf. 4^{10}). But the group of ideas connected with the Atonement is felt to be accepted and reproduced as part of the common stock of Christian beliefs, rather than to have been assimilated and developed under the progressive guidance of the Spirit of truth.

It has sometimes been affirmed that St. John unfolds a new theory of redemption. Not by dying, but by shedding abroad a revelation of God and true life from His Divine-human person, did Christ come to drive away darkness and sin (cf. Holtzmann, ii. 474). In other words, his soteriological theory was Greek—that sin is ignorance, and its remedy light. But his being possessed with the marvel of the Incarnation was not incompatible with the loyal acceptance which he intimates of the general belief as to the significance of Christ's death. In Roman Catholic and Anglican theology there is a similar insistence on the pre-eminence of the Incarnation dogma, coupled with a certain reserve, but assuredly no want of faith, in regard to the Atonement.

Such being the perspective of the Johannine theology, there is not much ground for expecting answers to questions raised in the theory of the Atonement. It accentuates by preference moral aspects of the Atonement, but without entitling us to infer that Christ's sacrifice only influences God indirectly through the change which it previously produces in believers. As examples of its moral influence may be noted that in the Capernaum discourse Christ views His death as the preliminary to giving His flesh for the life of the world (6^{51}), and that at a later period it is spoken of as destined to exercise an irresistible magnetism (12^{32}). But that its influence was not in the first instance merely subjective, appears from the fact that it is represented as a transaction in which Satan joined issue in decisive conflict, was beaten back, and in consequence was shorn of his power (16^{11} 12^{31}). And with this direct transcendental effect clearly predicated, it becomes the more probable that in the Johannine teaching the sacrifice of Christ, when likened to an expiatory or propitiatory sacrifice, was understood to have an effect upon God unconditioned by its after-fruits in human experience.

To sum up, we find that the NT writers are unanimous and distinct as to the saving significance of Christ's sacrifice, as to the blessings which flow from it, and as to the conditions on which these are appropriated. As regards the precise nature of the offering, and its mode of working, our Lord says nothing definite. St. Paul certainly holds the satisfaction of Divine justice through a vicarious death; the Ep. to the Hebrews emphasizes the germinal thought that the offering was the obedience or spiritual perfection of Christ; St. John's record chiefly confines itself to its moral bearings. Upon the points in question, indeed, they have more to teach if we could handle the key. To their thinking, and to that of their readers, these points were elucidated by describing Christ's death as a sacrifice, especially a Sin-offering; but, as we cannot say with confidence what was the accepted theory of the significance of sacrifice, the elucidation has in its turn become a problem. From this condition of mingled certainty and uncertainty several inferences may fairly be drawn. In the first place, it may be surmised that the sacrificial category, while emphasizing certain vital aspects, was inadequate to the expression of the full significance of the work of Christ, and that the old sacrificial doctrine was providentially left in obscurity at those points where it was least adequate. In close connexion with this it may also be suggested that there was a design not to bind up the work of Christ so intimately with the interpretation of an obsolescent institution as to prevent its receiving fresh illumination from other fields of human life. From this would follow, further, a commission to theology not to regard itself as bound by the fragmentary NT data for a theory of the Atonement, but to reinterpret by its own thought the nature, the grounds of the necessity, and the mode of efficacy of the sacrifice of Christ. In the exercise of this commission modern theology has very generally become penetrated by the conviction that the sacrifice of Christ is too narrowly interpreted of His death, and that the atoning efficacy attaches to the whole life, in which active and passive obedience are interwoven as warp and woof. Meanwhile the uncertainty which attaches to certain stages of the process only throws into bolder relief the apostolic certitude as to the fact that God was in Christ reconciling the world to Himself.

iii. THE SACRIFICES OF THE CHRISTIAN LIFE. —The NT doctrine is that Christ offered a sacrifice which established peace with God, and which procures the forgiveness of sins. But with this the conception of offering was not wholly detached from the sphere of human service; on the contrary, a place is reserved for human offerings of a complementary or secondary kind.

(*a*) The graces and the activities of the Christian life have a sacrificial character. In the Prophets it was a frequent thought that the forms and expressions of the devout life—the broken spirit, the voice of adoration and aspiration—were sacrifices of peculiar value; and such spiritual exercises continued to be described as oblations. The NT doctrine of the priesthood of believers also involved the idea that they had somewhat to offer. The material of such offerings is the Christian personality (Ro 15^{16}, cf. Jude ^{24}), or the body regarded as the instrument of Christian service (Ro 12^{1}), or the exercises and activities of the Christian life (1 P 2^{5}), including prayer (He 13^{15}), beneficent deeds (v.^{16}), money gifts (Ph 4^{18}), or the graces in which service has its spring (faith, Ph 2^{17}) (Cave, p. 406 ff., who treats this subject very fully and suggestively). The immediate effect attributed to these offerings is that they are pleasing to God (Ro 12^{1}), are to Him as the odour of a sweet smell (Ph 4^{18}).

But the further question arises whether God, as pleased with these sacrifices, and on the ground of the offerings, bestows upon the Christian any special corresponding blessing. It may safely be said that they are not regarded as expiatory: only faith comes into account as connected with the forgiveness of sin, and then as the mere condition of obtaining the boon of which the real ground is the sacrifice of Christ. But certain of the offerings specified have at least a purificatory virtue—faith which overcomes the world, and hope which purifies. As regards forms of Christian service, it is antecedently probable that they were regarded as procuring certain benefits. To call an act a sacrifice, was clearly to imply that a benefit followed; and to say that God was well pleased, was equally to imply that He would practically manifest His approbation. From the NT standpoint, indeed, the motive for rendering spiritual sacrifices is gratitude to God for His inexpressible magnanimity; but it does not thence follow that they do not receive a rich Divine recognition. In the parable of the Unjust Steward it is taught that wealth might be so used as to procure an abundant entrance into the everlasting habitations (Lk $16^{1\text{ff.}}$), and it is no unfamiliar thought of the apostle of grace that God will specially reward the work and labour of love.

But what is the precise nature of the Divine response to the offerings of service? The current reply is that in the present it takes the form of inward enrichment and growth in grace, and that in the world to come it will be manifested in a distinction of degrees of glory. But it may be doubted if this exhausts the NT conception of the efficacy of the secondary sacrifices. The life that utters itself in the forms of sacrifice would appear to evoke a response additional to strengthening grace, which is of the nature of a special providential discipline or blessing, and which, resting on the individual or even the house, makes generally for their protection and well-being (Mt 6^{33}). So St. Paul, after specifying the acceptable sacrifices of the Philippians, concludes that God will supply all their need (Phil 4^{19}).

An expiatory character might appear to be ascribed to one class of spiritual sacrifices, viz. the sufferings of the saints. 'I rejoice in my sufferings on your behalf,' says the apostle, 'and fill up what is lacking of the afflictions of Christ in my flesh on behalf of his body, which is the Church' (Col 1^{24}). By some Rom. Cath. exegetes it has been argued that the afflictions of the saints are regarded as combined with the passion of Christ to constitute the satisfaction on the ground of which God pardons sin. But while the apostle affirms that his sufferings are for the good of the Church, he does not say that it is as propitiatory, and the mode of conveying benefit may well have been that, by the apostolic example of patient obedience, the body was edified. But how do they fill up what was lacking of Christ's sufferings? The idea may either be that the apostle desired to approximate to the standard of Christ's sufferings (Weiss), or that he desired to endure his share of the sufferings which Christ, through His Church-body, has yet to suffer (Alford, *in loc.*). See also Lightfoot and Abbott.

(*b*) The worship of the Church embodies a sacrificial element; but this is not to be identified with the Eucharist, nor can the latter be scripturally interpreted as having the character of a propitiatory sacrifice. To say that worship is sacrificial is to repeat what has already been said of the NT spiritual sacrifices. The faith and hope and love which find expression in praise and prayer, the money gifts which are devoted to the work of Christ, are declared by the apostles to have this character. Specially is the celebration of the sacrament of the Lord's Supper, evoking, as it does, faith and hope and the sentiment of gratitude, the occasion of the presentation of spiritual offerings. The special question is whether the Eucharist is a sacrifice in a peculiar specific sense, and if so, what is its precise character and efficacy. The question as to whether it may be called a sacrifice is not of vital importance. It may easily be brought within the compass of our working definition. 'In a certain loose sense the Lord's Supper may be called a sacrifice, inasmuch as it was deliberately associated by its founder with the sacrificial rites of the OT' (Cave, p. 439). The really important issues are raised by the Roman doctrine, which interprets it as continuous with the atoning sacrifice of Christ, and as therefore possessing a propitiatory character.

'By the consecration of the bread and of the wine a conversion is made of the whole substance of the bread into the substance of the body of Christ our Lord, and of the whole substance of the wine into the substance of His blood' (Dec. Conc. Trident., Sess. xiii. cap. 4). 'Forasmuch as, in this Divine sacrifice, which is celebrated in the Mass, that same Christ is contained and immolated in an unbloody manner who once offered Himself in a bloody manner on the altar of the Cross, the holy Synod teaches that this sacrifice is truly propitiatory, and that by means thereof this is effected—that we obtain mercy and find grace if we draw nigh contrite and penitent,' etc. (Twenty-second sess. cap. 2). 'Wherefore, not only for the sins, etc., of the faithful who are living, but also for those who are departed in Christ, and not yet fully purified, it is rightly offered' (*ib.*). At the same time, it is held that propitiation is not the only, or even the principal, fruit (canon 5 of thirteenth sess.).

It would be out of place to develop the general objections to this view, which involves the grave religious defect of suggesting that salvation rests on an incomplete and therefore insecure foundation. The relevant objections are that the tenet of transubstantiation, which is the presupposition of the theory, has no scriptural warrant, while the interpretation of the Eucharist as a perpetual propitiatory offering is inconsistent with the NT teaching that the sacrifice of Christ was expiatory, and was offered once for all (Ro 6^{10}, He 7^{27} $9^{12.\ 26\text{-}28}$ $10^{10.\ 12.\ 14}$, 1 P 3^{18}).

According to a modified view, the Eucharist is a perpetuation of Christ's sacrifice, but not of the propitiatory sacrifice which He offered on Calvary. Attention is here transferred to the sacrifice which Christ presented, and continues to present, in the heavenly sanctuary (He $8^{1\text{-}3}$), and it is maintained that in the Eucharist the Church presents an offering which is organically connected with the ceaseless offering of her Head.

'The offering of our Heavenly High Priest,' to quote an important statement of this view, 'includes in it a present and eternal offering of His life in heaven.' But the duty of the Church is to repeat and represent the life of her Head in another and higher world; and in the Eucharist she 'appropriates and reproduces the priestly offering of Him in whom she lives. As our Lord's offering of Himself never ends or can end, so in that offering His people, organically united to Him, one with Him, must be offered, and must offer themselves; and this they do in the expressive and touching symbols of the Eucharist' (Milligan, *Heavenly Priesthood*, p. 266).

On this view, then, the Eucharist is a sacrifice which not only represents, but also, as a consequence of Christ's union with the Church, forms a part of the offering made by Christ to God. It is commended on the ground that it satisfies the legitimate demand for a perpetual oblation which is unscripturally ministered to in the sacrifice of the Mass. But the scriptural evidence is in conflict with its cardinal positions. The offering of Christ, which is the ground of our salvation, was, according to passages already quoted, one which does not need to be repeated, and we are therefore forced to seek it within the compass of Christ's earthly life — either in His death or in His obedience unto death. It is said, indeed, that that which is unchangeable and everlasting is not repeated, but it is hardly disputable that what was present to the mind of the writer to the Hebrews was the contrast of the ever-renewed to the completed, not to the never-ending offering. Nor was it declared in the words of institution that the special purpose of the Eucharist was to furnish the Church with an ordinance which should be a counterpart, and even a part, of the activities of Christ's heavenly priesthood. Rather is it brought into close relation with the obedience unto death which preceded His entrance into glory.

On the whole, it may be concluded that, while the Eucharist, more than other means of grace, has the form of a sacrifice, it is at bottom, like them, only the occasion of sacrifice, *i.e.* of the presentation to God of spiritual offerings. Whether the outward act be prayer, or praise, or the Eucharist, the offerings therein rendered to God are the faith, the penitence, and the self-surrender to which it gives expression, and which are sustained by the rite.

The Typology of Sacrifice, which has been incidentally touched on, requires more direct consideration at the close of this study, in which we have seen the sacrificial worship of the earlier dispensation disappear in the sacrifices of the New Covenant. From the typological point of view, the Levitical sacrifices come under the category of prediction. They differed from the predictions proper in form,—being enshrined not in word but in institution and rite,—but they served the same end of testifying beforehand to the person, the life, and the work of Christ, and to the contents and conditions of His salvation. In the older works the study of sacrifice as prediction and fulfilment was assiduously prosecuted as at once affording the deepest gratification to the believer, and furnishing a weapon of distinct apologetic value. In labouring at this task, Christian piety gave free play to fancy, and every feature of the OT ritual became eloquent of the unspeakable riches of Christ. Dogmatic prepossessions also supervened to dominate the discussion; and, while the Romanist discovered in the Levitical system a foreshadowing and corroboration of the distinctive sacerdotal and sacramentarian tenets of his communion, the Protestant found in it an equally good witness for every fundamental article of the evangelical system of doctrine (Fairbairn, *Typology of Scripture*).

The luminous and thorough monograph of Principal Cave is distinguished, in its treatment of the typical aspect of sacrifice, by great sobriety of judgment. A type is defined as an enacted prophecy, and three essential notes are distinguished: it adumbrates something; it adumbrates some future thing, and it is specially designed by God to adumbrate that future thing (p. 158). The sacrificial practice he divides into two branches —that which was concerned with atonement, and that which was concerned with the presentation of the offering. And to these types respectively correspond, as their antitypes, the death of Christ and our spiritual sacrifices. 'The atonement by blood has its antitype in the atonement made by Jesus. In the activities and passivities of the Christian life are to be found the antitype of the Mosaic injunctions other than those concerning the methods of atonement, the high priesthood, and the tabernacle' (p. 419, cf. 406 ff.).

The precedent for treating the OT sacrifices typologically, *i.e.* as predictive in character and design, is set in the NT. As certainly as reliance is placed on fulfilments of OT verbal predictions is use made of antitypal fulfilments to attest the Messiahship and the redemptive mission of Jesus. But while the OT sacrifices are thus accorded the dignity of OT predictions, they must also share in the consequences of the altered view as to the precise nature and scope of prophecy viewed as prediction. What has become increasingly clear is that OT prophecy does not consist of chapters of detailed history written before the event. Prophetism was in essence faith in God as the righteous Governor of the world and the gracious Guardian of His people, and on the basis of this faith it cherished a confident expectation of the realization on earth of a kingdom of righteousness by the instrumentality of a divinely commissioned King, who should through suffering establish His dominion (Bruce, *Apolog.*^{2} p. 257 ff.). Similarly, the typical element in the Levitical code cannot be regarded as coextensive with its multifarious forms and ritualistic acts. The Pentateuchal code of sacrifice is not a mystical version of the Christian religion, whose every form and rite was shaped by a design to show forth the story of our Lord's passion, or to elucidate the 'activities and the passivities' of the Christian life. The witness which it bears to Christ is less voluminous, but not necessarily less weighty. The OT sacrifices expressed a need which Christ satisfies, and embodied a faith which Christ justifies. The need to which they gave utterance was that felt by the human heart for some ground of religious confidence external to itself; and this, which the animal victim only seemed to supply, is fully met in the Christian conviction that sin is forgiven, in some real deep sense, for Christ's sake. The faith which they declared was that God had provided a means by which man could enter into communion with God, and the great expectation which they expressed has its realization in the filial relations with God into which the Christian is brought by Christ. Yet once more, the institution embodied the conviction, which was also a prediction, that the sovereign boon of union with God is not won without labour and cost. The victim was slain, the offerer denied himself for God. And this principle only attained to a fuller and deeper realization when, on the one hand, Christ died that He might bring men to God and reign in human hearts; and when, on the other, it was seen that self-sacrifice is the ritual of the lives that He moulds.

LITERATURE.—Mishna סדר קדש (*Rerum sanctarum ordo*), esp. זבחים (*de Sacrificiis*), ed. Surenhusius, vol. iii., Amsterdam, 1702; Philo, *de Victimis* (Yonge's tr. 1855, vol. iii.); Outram, *de Sacrificiis*, London, 1677; Spencer, *de legibus Hebræorum ritualibus* (lib. iii. W. P. PATERSON.

SADDUCEES.—

i. Origin and History of the Sadducees.
ii. Derivation of the name 'Sadducee.'
iii. Their opposition to the Pharisees.
  (*a*) Controversies as to the Law: (1) Criminal Law, (2) questions of Ritual, (3) the Feasts.
  (*b*) Doctrinal differences: (1) as to the resurrection of the body, and future retribution; (2) as to the existence of angels and spirits; (3) as to 'fate' and free will, and Divine providence.
iv. The Sadducees and Jesus.

i. ORIGIN AND HISTORY OF THE SADDUCEES (cf. art. PHARISEES, § i.).—The Sadducees were the spiritual descendants of the priestly party in Jerusalem, which, towards the close of the Greek period of Israel's history, was anxious to Hellenize the Palestinian Jews. The Maccabæan rising (see art. MACCABEES), which was caused by the attempt of Antiochus Epiphanes to accomplish this by violence, taught these Hellenizers the folly of tampering with the national religion; while the success of Judas Maccabæus and his brothers in asserting the nation's political independence deprived them of office and power. Their descendants, however, speedily accommodated themselves to the new order of things, which was in many respects after their mind. The Maccabæan rising had ended otherwise than was hoped when it began. In the course of the struggle for national independence the Maccabee brothers were compelled to enter into alliances with foreign princes, to receive honours and dignities from them, and in general to maintain their cause by the use of purely secular means. The Jewish State which they set up was not essentially different from the secular States around them. This led to a new development of parties among the Jews. The HASIDÆANS, who had withdrawn from the struggle with the Syrians, when religious freedom was granted, grew both in numbers and in strictness, and came to be known as the *Pharisees.* Their great concern was, not that the nation should be politically independent, but that it should be secured against the intrusion of all foreign elements by the most scrupulous observance of the Law. And they now found themselves face to face, not with foreign rulers, but with native princes, who, while thoroughly orthodox in the faith, were indifferent to what they conceived to be the interests of religion, and from whom they accordingly became increasingly estranged.

The successors of the Hellenizers, on the other hand, were in full sympathy with the secular policy of the Hasmonæan princes, and, unlike the Pharisees, took no exception to the illegitimacy of their high priesthood. They entered the service of the new princes as soldiers and diplomatists, and, drawing around them the leading adherents of the new dynasty, formed the party, to which was given their family name of Zadokites or *Sadducees.* Taught by experience, this party made no violent attempts to introduce Greek customs; but they were a purely political party: their main interest was in the Jewish State as an independent State, and not, like that of the Pharisees, in the legal purity of the Jews as a religious community. The tension between the Hasmonæans and the Pharisees at last became so keen that John Hyrcanus broke decisively with the latter, and openly proclaimed himself on the side of the Sadducees.

From their first appearance in history as a distinct party (during the reign of John Hyrcanus, B.C. 135–105), the Sadducees were the devoted adherents of the Hasmonæan princes. Under Aristobulus I. and Alexander Jannæus, the immediate successors of John Hyrcanus, their party was supreme. Under Alexandra Salome the Pharisees were for a short time in possession of power; but when Aristobulus II. became king the Sadducees once more came to the front. They supported him in his conflict with Hyrcanus II., Antipater, and the Romans, and they also stood by him and his two sons, Alexander and Antigonus, in their attempts to restore the Hasmonæan dynasty. But the day of their political power was now past. Their numbers were also considerably reduced. When Pompey captured Jerusalem (B.C. 63) he executed many of their leaders, as did also Herod (B.C. 37). Herod further diminished their influence by appointing and removing high priests according to his own pleasure, and by filling the Sanhedrin with his own creatures. When Judæa, after the deposition of Archelaus, came under the direct rule of the Romans, the Sadducees, who now included the families raised to the dignity of the high priesthood by Herod, again attained a measure of power through their preponderance in the Sanhedrin, to which the Romans committed the internal government of the country, reserving to themselves, however, not only the control of all military matters and the levying of customs, but also the confirmation and execution of all capital sentences. Matters remained thus down to the troubled days that preceded the destruction of Jerusalem, except during the short reign of Agrippa I. (A.D. 41–44), who favoured the Pharisees. But the latter were the real possessors of power; for, in order to render themselves tolerable to the people, the Sadducees were compelled to act in most matters in accordance with Pharisaic principles. And when Jerusalem was destroyed and Israel ceased to exist as a nation, they speedily disappeared entirely from history.

According to Josephus (*Ant.* XIII. x. 6, XVIII. i. 4), the Sadducees were a small minority of the Jews, which included only the rich and those of the highest dignity. This is almost equivalent to identifying them with the priestly aristocracy and their adherents. During the second half of the Persian and the whole of the Greek domination of Israel, the high priests were the civil as well as the religious heads of the Jewish community in Judæa, and, theirs being the only hereditary office among the Jews since the downfall of the Davidic monarchy, they and their families formed a kind of sacerdotal nobility (cf. Jos. *Vita*, 1). We are expressly told in Josephus (*Ant.* XX. ix. 1) and in Ac 5^{17} (cf. 4^{1} 23$^{1ff.}$), that in NT times some at least of the high priests were Sadducees. It was these chief priests with their families and adherents that formed the Sadducean party. This party, however, was not a priestly party in the sense that the priests generally necessarily belonged to it: some of these (*e.g.* Josephus, *Vita*, 1 f.; see also *Vita*, 39; Taylor's *Sayings of the Jewish Fathers*^{2}, ii. 10, iii. 2) were Pharisees (cf. Jn 1$^{19.24}$). Nor did it, as a rule, stand up for the special interests of the priests. The opposition between the Pharisees and the Sadducees was not an opposition between the strict legalists and the priests, but between the former and the chief priests and their adherents (cf. Schürer, *GJV*^{3} ii. 406 f.).

ii. DERIVATION OF THE NAME 'SADDUCEES.'—The name 'Sadducees' (צַדּוּקִים, sing. צדוקי, *Σαδδουκαῖοι*) is now almost universally derived from the proper name *Zadok.* The derivation, favoured by many of the Fathers and by a few moderns (*e.g.* Derenbourg, Stanley, and Edersheim), from the adj. צַדִּיק, according to which the Sadducees were the *righteous*, so called either because, in opposition to the Pharisees, they adhered to the written law, or because of their severity as judges, must be abandoned, owing to the impossibility of accounting for the change of *i* into *u* (see especially Montet, *Essai sur les origines des partis saducéen et pharisien*, 53 ff.). From which Zadok, however, did they derive their name? According to *Aboth de- Rabbi Nathan*, from a disciple of Antigonus of Socho.

> 'Antigonus of Socho received from Shime'on ha-Çaddiq. He used to say, Be not as slaves that serve the Rab on the terms of receiving recompense; but be as slaves that serve the Rab not on the terms of receiving recompense; and let the fear of Heaven be upon you; that your reward may be doubled for the time to come. Antigonus of Socho had two disciples, who repeated his words; and they repeated them to (their) disciples, and their disciples to their disciples. They arose and refined after them, and said, What did our fathers imagine, in saying that a labourer might do work all the day and not receive his reward at evening? Nay, but if our fathers knew that there was the world to come, and that there was a revival of the dead, they would not have spoken thus. They arose and separated from the Thorah; and two sects were formed from them, *Çadukin* and *Baithusin*; Çadukin after the name of Çadok, Baithusin after the name of Baithos' (Taylor, *l.c.* 112 f.).

This legend, though adopted by Ewald (*GVI*^{3} iv. 357), is of no historical value. It is first found in a document of late origin; it is plainly wrong in what it says of the Boethusians, who derived their name from Boethus, the father of Simon, whose daughter, Mariamne, Herod married, and whom he raised to the high priesthood (*Ant.* XV. ix. 3; cf. XVII. iv. 2, XVIII. v. 1, XIX. vi. 2); it is also mistaken in asserting that the Sadducees rejected the Law, and in making the denial of a resurrection of the dead their primary and fundamental characteristic. We must therefore either derive the name 'Sadducee' from an unknown Zadok, an influential member or head of the party at an epoch which it is impossible to determine (Montet, *l.c.* 59), or from Zadok, who was priest in Jerusalem in the days of David and Solomon (1 K $1^{8.\ 26.\ 32ff.}$ 2^{35}; cf. 4^4, 1 Ch 29^{22}), and whose descendants held the same office down to the Exile. The latter derivation is generally regarded, not indeed as thoroughly established, but as the most probable. In his ideal picture of the future theocracy, Ezekiel (40^{46} 43^{19} 44^{15} 48^{11}; in all these passages the LXX has the form Σαδδούκ) admits only the 'sons of Zadok' to the right of officiating as priests in the new temple at Jerusalem. Though after the return from the Exile this rule was not strictly carried out, the 'sons of Zadok' formed the main body of the post-exilic priesthood; and more especially it was from among them that the chief priests down to the close of the Greek period were drawn (see art. PRIESTS AND LEVITES, p. 96^a). In the absence, therefore, of more specific information, it is assumed that the family name 'Zadokites' or 'Sadducees' was given, probably by their enemies, to the sacerdotal aristocratic party, which included not only the chief families of the legitimate line, but also the adherents of the Hasmonæan princes, and, in NT times, the families raised to the high priestly dignity by Herod and his successors.*

This derivation of the name 'Sadducees' is not inconsistent with what we know of the behaviour of many of these 'sons of Zadok.' As early as the time of Ezra and Nehemiah, not only did many of the common priests intermarry with the Gentiles among whom they lived (Ezr 9^2), but Eliashib, the high priest, and members of his family, entered freely into alliances with the neighbouring aristocracy and with the Persian officials (Neh $13^{4ff.\ 28}$). They were evidently more concerned for their own privileges than for the reformation so dear to the heart of Ezra and Nehemiah. The position of the high priests as civil heads, under the Persian or Greek governors, of the community in Judæa, almost inevitably led to their gradual secularization. They were necessarily brought into close contact with their Gentile rulers; and their political interests tended to thrust their religious interests into the background. There were doubtless some of these high priests who remembered what was due to their position as the servants of Jehovah, but the temptation to forget must have been very great. Towards the close of the Greek period many of the chief priestly families were entirely secularized; they felt no interest in what was distinctively characteristic of the Jewish religion; for the sake of their own personal enjoyment and advancement they were willing, and indeed eager, to adopt the manners and customs of their Gentile masters. 'The high priests regarded their sacred office only as a pedestal of worldly power' (Wellhausen, *IJG*^{3} 248). There is nothing, therefore, improbable in the supposition that the aristocratic priestly party, whose interests were mainly political, and of which they formed from the beginning a considerable part, came to be known by their family name.

iii. THEIR OPPOSITION TO THE PHARISEES.—Though the Sadducees were the priestly nobility and the Pharisees were drawn mainly from the ranks of the common people, the opposition between them was not a mere opposition between two different classes of society. Nor was it merely a question as to the laxer or stricter interpretation and observance of the Law. It was an opposition of principles, of dispositions, and of theories of life (Wellhausen, *l.c.* 295). The Pharisees were, in their own peculiar way, intensely religious; their great desire was to mould their fellow-countrymen into a 'holy' nation by means of the Law; they looked forward to a future, in which their hopes were sure to be realized, and could therefore meanwhile endure the foreign dominion, provided it allowed them perfect religious freedom. The Sadducees, on the other hand, were largely indifferent to religion, except in so far as it was a matter of custom; their great care was for the State as a purely secular State; they were satisfied with the present, so far as it permitted them to live in comfort and splendour. The acute opposition between the two parties first manifested itself in the political sphere, in the struggle for power during the reign of John Hyrcanus and his successors. When the Hasmonæan dynasty fell, the animosity still continued; but to a large extent it necessarily ceased to be political, and concentrated itself upon questions as to the Law, matters of ritual, and doctrine.

(*a*) *Controversies as to the Law.*—The Sadducees refused to acknowledge the binding force of the oral law, the 'tradition of the elders' (Mt 15^2, Mk 7^3), to which the Pharisees attached supreme importance. They held that only the written law of Moses was binding (*Ant.* XIII. x. 6, XVIII. i. 4); and although, as judges, and in order to maintain their position against the Pharisees, they must have had their own exegetical tradition, they did not regard themselves as absolutely bound even by it; they held it praiseworthy to dispute with their teachers (*Ant.* XVIII. i. 4). It is incorrect, however, to represent them as acknowledging only the Pentateuch and as rejecting the rest of the OT. They also doubtless agreed with the Pharisees on many points settled by the oral law; only, unlike the Pharisees, they did not regard it as binding (cf. Taylor, *Sayings of Jewish Fathers*^{2}, p. 115).

---

* It is not claimed for this derivation of the name 'Sadducee,' which was first suggested by Geiger, that it is more than probable. Montet (*l.c.* 51 f.) argues against it that there is not a single trace in post-exilic literature of this close connexion between the Sadducees and the Zadokites, and that this unanimous silence is fatal to the hypothesis. Kuenen, whom he cites (p. 59 f.) as holding substantially his own view, afterwards changed his opinion. 'The name "Sadducees," which the priestly nobility of Jerusalem received later, I now also identify with Zadokites. In the not unjustifiable reaction against Geiger's exaggeration I went too far' (*Gesammelte Abhandlungen zur Biblischen Wissenschaft*, 496).

In addition to, and partly in consequence of, this fundamental difference between the two parties, there were differences as to individual legal questions. (1) *Criminal Law.* As judges, the Sadducees were more severe than the Pharisees (*Ant.* XX. ix. 1; cf. XIII. x. 6). They interpreted literally the *lex talionis* (Ex 21^{24}, Dt 19^{21}), whereas the Pharisees mitigated its severity by accepting as punishment a money payment. They also interpreted literally Dt 25^{9} ('spit in his face'); the Pharisees said it was enough to spit before the offending person. As regards Ex $21^{28\text{ff.}\ 35\text{f.}}$ they went beyond the requirement of the Law in exacting compensation not only for the damage done by one's ox or ass, but also for that done by one's servants. They were less severe, however, than the Pharisees in punishing false witnesses. According to Dt $19^{16\text{ff.}}$ a false witness was to suffer the punishment which he hoped to see inflicted on the person falsely accused by him. The Sadducees held that this punishment should be inflicted on him only if the falsely accused person had been punished; the Pharisees demanded his punishment, provided sentence had been pronounced on the accused, whether the sentence was executed or not.

(2) *Questions of Ritual.* The Pharisees laid the greatest stress on the cleanness of the vessels used, and on the various actions being performed in due succession and with strict legal correctness. According to them, all the vessels of the temple had to be purified at the close of each feast; the scriptures were so precious that they could be written only on the skins of clean animals, and any one who touched the sacred rolls was thereby rendered unclean; in accordance with Lv 16^{13} they insisted, in opposition to the Sadducees, that on the Day of Atonement the high priest should not kindle the incense till after he had entered the Holy of Holies; at a Feast of Tabernacles, Alexander Jannæus was attacked by the people, the majority of whom by that time favoured the Pharisees, because, as high priest, he poured the water of libation upon the ground beside the altar, instead of upon the altar. The Sadducees scoffed at the Pharisaic laws relating to purity: according to Pharisaic principles, the sacred writings were less pure than the books of Homer, contact with which did not defile; the Pharisees, it was said, would even sprinkle the sun in the heavens with lustral water. So far as they laid stress on Levitical purity, it was apparently in the interest of the priesthood. They insisted that the red heifer, from whose ashes the lustral water was prepared (Nu $19^{1\text{-}10}$), should be burned only by priests who had been thoroughly cleansed from all possible defilement, whereas the Pharisees laid more stress on the act performed by the priest than on the priest himself, whom they even tried to defile by contact with themselves. The Pharisees demanded that the cost of the daily sacrifice, which was offered on behalf of the whole people, should be defrayed out of the temple treasury; while the Sadducees maintained that, the treasure in the temple being in a manner their property, the sacrificial victims should be provided from the free-will offerings of the individuals who took part in the sacrifice.

(3) *As to the Feasts*, the two parties differed in the manner of fixing the date of Pentecost. According to Lv $23^{11.\ 15}$ seven full weeks had to be counted from 'the morrow after the sabbath' upon which the priest waved the sheaf of first-fruits before the Lord. The Pharisees followed the traditional interpretation (*e.g.* in the LXX, *ad loc.*; cf. *Ant.* III. x. 5), that the 'sabbath' meant the first day of the feast, and that consequently Pentecost might fall on any day of the week. The Sadducees (or rather, according to Schürer, *l.c.* 413, the Boethusians, a variety of the Sadducees) held that the 'sabbath' meant the weekly sabbath, and that therefore Pentecost always fell on the first day of the week. They naturally also refused to acknowledge as binding the tradition of the fathers as to the way of observing the sabbath.*

(*b*) *Doctrinal differences.*—(1) According to the NT (Mt 22^{23}, Mk 12^{18}, Lk 20^{27}, Ac $4^{1.\ 2}$ 23^{8}) and Josephus, the Sadducees denied *the resurrection of the body*, to which Josephus adds that they denied also *future rewards and punishments*, and even maintained that the soul perishes with the body (*Ant.* XVIII. i. 3 f.; *BJ* II. viii. 14). The doctrines of a bodily resurrection and of future retribution in the later Jewish sense are not found, till late, in the OT; but it teaches a shadowy existence of souls in Sheol. In opposition to the Pharisees, therefore, the Sadducees held substantially the old Hebrew view, save (if Josephus is to be trusted) as regards continued existence after death. (2) According to Ac 23^{8} they also denied *the existence of angels and spirits*, *i.e.* of a world of supermundane spirits. Seeing that they accepted the OT, it is difficult to understand their position on this subject. It was probably due to their general indifference to religion and to the rationalistic temper which led to the extreme limit in opposition to the angelology of their adversaries. (3) According to Josephus (*BJ* II. viii. 14; *Ant.* XIII. v. 9) the Sadducees denied 'fate' altogether; it was impossible for God to commit or to foresee anything evil; the doing of good or evil was left entirely to man's *free choice*; man was the master of his own destiny and the sole author of his own happiness or misery. The Pharisees, on the other hand, made everything dependent on 'fate' and God; still they did not teach an absolute fatalism; it had pleased God that there should be 'a mixture' of the Divine and human elements; there was a co-operation of God in all human actions, good and evil, but the doing of good or evil was to a large extent in man's power (*BJ* II. viii. 14; *Ant.* XVIII. i. 3, XIII. v. 9). 'Properly understood, the real difference between the Pharisees and Sadducees seems to have amounted to this: that the former accentuated God's preordination, the latter man's free-will; and that, while the Pharisees admitted only a partial influence of the human element on what happened, or the co-operation of the human with the Divine, the Sadducees denied all absolute preordination, and made man's choice of evil or good, with its consequences of misery or happiness, to depend entirely on the exercise of free-will and self-determination' (Edersheim, *The Life and Times of Jesus the Messiah*, i. 316 f.). Though Josephus is our only authority for the denial of Divine providence on the part of the Sadducees, there is no good reason to question his substantial accuracy. They felt no need of a Divine providence, but relied entirely on their own resources. 'They claimed nothing from God, nor He from them' (Wellhausen, *l.c.* 295).

iv. THE SADDUCEES AND JESUS.—In the NT the Sadducees are mentioned by name only in Mt 3^{7} $16^{1.\ 6.\ 11\text{f.}}$ (in the parallel passage, Mk $8^{11\text{ff.}}$, they are not mentioned), $22^{23.\ 34}$, Mk 12^{18}, Lk 20^{27}, Ac 4^{1} 5^{17} $23^{6.\ 7.\ 8}$. They are not mentioned by name in St. John's Gospel, where, however, we find the expression 'chief priests and Pharisees' ($7^{32.\ 45}$ $11^{47.\ 57}$ 18^{3}) instead of the 'Pharisees and Sadducees' of Mt and Mk. It was only towards the close of His life that our Saviour came into open conflict with them. They had little influence with the people, especially in religious matters; His criticism was therefore mainly directed against the Pharisees and scribes, the supreme religious authorities, although, according to Mt $16^{6.\ 11}$, He also warned His disciples against the leaven of the Sadducees, meaning, probably, their utterly secular spirit. They, on their part, seem to have ignored Him, until, by driving the money-changers out of the temple (Mt $21^{12\text{f.}}$, Mk $11^{15\text{ff.}}$, Lk $19^{45\text{f.}}$), He interfered with the prerogatives of the Sanhedrin. His acceptance of the Messianic title 'son of David' also filled them with indignation against Him (Mt $21^{15\text{f.}}$). They accordingly joined the scribes and Pharisees in opposition to Him, and sought to destroy Him (Mk 11^{18}, Lk 19^{47}), first, however, attempting to discredit Him in the eyes of the people, and to bring down upon Him the vengeance of the Romans, by their questions as to His authority, as to the resurrection, and as to the lawfulness of paying tribute to Cæsar (Mt $21^{23\text{ff.}}$ $22^{23\text{ff.}}$, Mk $11^{27\text{ff.}}$ $12^{18\text{ff.}}$, Lk $20^{1\text{ff.}\ 19\text{ff.}\ 27\text{ff.}}$; cf. Jn $11^{47\text{ff.}\ 57}$). In the Sanhedrin that tried Him they probably formed the majority, and the 'chief priests,' who presided, belonged to their party. The ostensible ground on which they condemned Him was His claim to be the Messiah; this was blasphemy against God, for which they decreed Him worthy of death (Mt $26^{63\text{ff.}}$, Mk $14^{61\text{ff.}}$, Lk $22^{66\text{ff.}}$). But the Sadducees, at least, were doubtless even more influenced by the fear that a Messianic movement led by Jesus might have disastrous political consequences (cf. Jn $11^{47\text{ff.}}$).

After our Lord's Ascension they persisted in their opposition to Him in the person of His disciples (Ac $4^{1\text{ff.}}$ $5^{17\text{ff.}}$ $23^{1\text{ff.}}$). We are not informed that any of them joined the infant Church; for, as we have seen, the priests, a great company of whom were obedient to the faith (Ac 6^7), were not necessarily of their party. According to Josephus (*Ant.* XX. ix. 1) they were also responsible for the death of James, the 'brother' of our Lord.

LITERATURE.—See literature at end of art. PHARISEES.

D. EATON.

SADDUK (B Σαδδούλουκος, A Σάδδουκος, AV Sadduc), 1 Es 8^2.—Zadok the high priest, ancestor of Ezra (cf. Ezr 7^2).

SADOC.—1. (*Sadoch*) An ancestor of Esdras, 2 Es 1^1=ZADOK of Ezr 7^2. 2. (Σαδώκ) A descendant of Zerubbabel and ancestor of Jesus, Mt 1^{14}.

SAFFRON (כַּרְכֹּם *karkôm*, κρόκος, *crocus*).—*Kŭrkŭm*, the Arab. form of *karkôm*, is defined in the Arab. dictionaries by *za'farân*, from which the Eng. word *saffron* is derived. Three sorts of plants are known in Arab. by the name *za'farân*:—(1) The genus *Colchicum*, of the order *Liliaceæ*. The three styles of the species of this genus are long, and often orange-coloured, but are not used in medicine or cookery. The corm and seeds are medicinal. (2) *Carthamus tinctorius*, L., the Safflower or Bastard Saffron. This is an annual plant of the order *Compositæ*, 3-5 ft. high, having a head of orange-coloured flowerets as large as a walnut. These flowerets are employed for the same purposes as the true saffron, and, being much cheaper, they are used to adulterate the more costly commodity. They are also used in dyeing. The safflower is cultivated in large quantities near Damascus. (3) The genus *Crocus*, of the order *Iridaceæ*, of which there are eight species in Palestine and Syria, besides the cultivated *C. sativus*, L. The orange-coloured styles and dissected stigmas of all the species of this genus are collected and dried, and used as a colouring material and aromatic in the preparation of food, esp. to impart a yellow tinge to boiled rice. They were formerly employed in medicine as an anti-spasmodic and emmenagogue. The most abundant of the wild species of crocus is *C. cancellatus*, Herb. Bot. The corms of this are edible, and are collected in considerable quantities, and sold in the streets of Damascus and other Oriental cities. They have a flavour somewhat like that of the chestnut. *Za'farân* is familiarly used for all the above-named plants. On the other hand, *kŭrkŭm* is not commonly used for any. It is the classical name for the *crocus* alone, but not confined to any one species. In the only passage in which *karkôm* occurs (Ca 4^{14}), *i.e.* among a list of cultivated garden aromatics, it prob. refers to *C. sativus*, L.

G. E. POST.

SAHIDIC VERSION.—See EGYPTIAN VERSIONS, vol. i. p. 669^b.

SAINT.—This stands in AV for two Heb. words. 1. קָדוֹשׁ (Aram. קַדִּישׁ in Daniel): (*a*) of *men*, Dt 33^3, Ps 16^3 34^9 106^{16}, Hos 11^{12} † [elsewhere and usually tr. 'holy'; see HOLINESS]; (*b*) of *angels* (a usage now obsolete), Dt 33^2, Job 5^1 15^{15}, Ps 89$^{5.7}$, Zec 14^5, Dn 8^{13}; cf. Jude ^{14} and prob. 1 Th 3^{13} † [RV in all except last 'holy one(s),' see Driver on Dn 8^{13}]. 2. חָסִיד 1 S 2^9, 2 Ch 6^{41}, Pr 2^8+16 t. in Psalms [also tr. 'godly,' 'holy,' 'merciful'; see, more fully, Driver, *Par. Psalter*, 443 f.]. Both these words, with few exceptions (חָסִיד in Ps 4^3 12^1 16^{10} (?) 32^6 86^2, Mic 7^2, 1 S 2^9 (?), Pr 2^8, Dt 33^8; קָדוֹשׁ in Ps 106^{16}, but this is hardly an exception), are used in the plural or with a collective noun, *i.e.* of a class. Neither in the OT nor NT is it usual for a righteous man to be called individually 'a saint' or 'the saint.' The reason of this is that a man's standing in relation to God was not regarded as one of isolated consecration or holiness, but as something attaching to him as member of a larger whole, to which the covenant relation in the first instance belonged. In the OT this larger unit was Israel, the holy nation; in the NT the Church, the holy nucleus of redeemed humanity. 'The saints'—'the saints of the Most High,' 'the people of the saints,' or most fully 'the people of the saints of the Most High' (Dn 7$^{18.22.25.27}$ 8^{24})—were the members of a holy community, consecrated to a holy life as defined by the covenant on which the relation depends. Such, then, is the general notion expressed by the words קְדוֹשִׁים and חֲסִידִים, and their LXX and NT equivalents, ἅγιοι and ὅσιοι. But there are further distinctions which have to be noted.

Ἅγιοι and ὅσιοι. While קְדוֹשִׁים is rendered in the LXX by ἅγιοι, חֲסִידִים appears as ὅσιοι. The specific idea of the former is 'the consecrated,' or those in religious covenant with God; of the latter, 'the godly' or 'pious,' those dutiful to the religious relation. While ἅγιος is a very rare word in classical Greek, and was perhaps for that very reason chosen by the LXX, to the exclusion of the usual term ἱερός—so compromised by its use in pagan religion—ὅσιος, on the other hand, largely retains its classical meaning. Thus Plato (*Gorg.* p. 507*b*) says, περὶ μὲν ἀνθρώπους τὰ προσήκοντα πράττων δίκαι' ἂν πράττοι, περὶ δὲ θεοὺς ὅσια; and elsewhere he makes δίκαιος the generic and ὅσιος the specific term (cf. also Xen. *Anab.* II. vi. 25). Accordingly, in the OT, it is objective sanctity that is expressed by οἱ ἅγιοι (=οἱ ἡγιασμένοι=ὁ λαὸς αὐτοῦ in Dt 33^3; cf. Ezr 8^{28} ὑμεῖς ἅγιοι τῷ κυρίῳ); whereas subjective sanctity—response in feeling and conduct to God's חֶסֶד, or graciousness—is usually emphasized in the use of οἱ ὅσιοι (=οἱ ἀγαπῶντες τὸν Κύριον in Ps 96^{10}, where we have also φυλάσσει Κύριος τὰς ψυχὰς τῶν ὁσίων αὐτοῦ, cf. 97^{10}: so μετὰ ὁσίου ὁσιωθήσῃ, καὶ μετὰ ἀνδρὸς τελείου τελειωθήσῃ, καὶ μετὰ ἐκλεκτοῦ ἐκλεκτὸς ἔσῃ, 2 S 22$^{26\text{f.}}$=Ps 18^{26}, and cf. Dt 33^8). Of course the gracious conduct of 'the godly' is but a realization of the idea of their relation as God's 'consecrated ones'; but it is this their conduct, in dutiful loyalty to the Covenant shown in habitual act, that marks them ὅσιοι (as in Ps 50^5 συναγάγετε αὐτῷ τοὺς ὁσίους αὐτοῦ, τοὺς διατιθεμένους τὴν διαθήκην αὐτοῦ ἐπὶ θυσίαις). This agrees with the fact that ὅσιος sometimes renders words like זַךְ, טָהוֹר, תָּם, תָּמִים; and that its normal equivalent חָסִיד is also rendered by ἐλεήμων (Jer 3^{12}, of God), εὐσεβής (Mic 7^2), εὐλαβούμενος (Pr 2^8); while חֲסִידֶיךָ is paraphrased by οἱ υἱοί σου in 2 Ch 6^{41}. Further, *ḥāsîd* is used only of persons; and here one remembers the title *Ḥăsîdîm*, by which the godly called themselves in Maccabæan days; see art. HASIDÆANS. The opposite holds of οἱ ἅγιοι, in which the stress falls on the covenant relation, though at times not without suggestions, in the context, of the practical loyalty thereto of those thus described. These distinctions and contrasts also persist fairly constantly through the later parts of the LXX, including the Psalms of Solomon.

When we reach the NT, the striking thing is the total disappearance of οἱ ὅσιοι as a title of God's own people. In a substantival sense ὅσιος is used only of Jesus as Messiah, and that after Ps 16^{10} (Ac 2^{27} 13^{35}). On the other hand, the prerogative phrase for members of the sacred Society of Israel, οἱ ἅγιοι, is transferred to the members of Christ's Ecclesia, as consecrated to the Messianic Kingdom in keeping with the holy calling of God. It was, in all probability, the overshadowing sense of the privilege of such a status, and of the Divine action as bringing it about, that caused the objective side to obtain such exclusive emphasis as to prevent the term expressive of human devoutness (οἱ ὅσιοι) from emerging as before. Christians stood as men called out or sanctified by electing grace (ἐκλεκτοὶ τοῦ θεοῦ, Col 3^{12}; cf. Eph 1^4 κλητοὶ ἅγιοι, 1 Co 1^2, Ro 1^7), their sainthood determined by their relation to Christ as believers (ἁγίοις κ. πιστοῖς ἐν Χριστῷ, Eph 1^1, Col 1^2; cf. ἐν τοῖς ἡγιασμένοις πίστει τῇ εἰς ἐμέ, Ac 26^{18}), on the basis of His sacrificial death (He 10$^{10.14}$), which inaugurated the New Covenant (v.^{29}).

'Saints by effectual calling' is thus the primary sense of 'the saints.' But in all a new spirit or a renewed heart is assumed to exist, the subjective response quickened by the message of so great redemption. All the justified are 'saints,' and as such are marked by true 'repentance from dead works and faith towards God.' But faith towards God in Christ involves devotion to an obedient walk after Christ's example, 'as befitteth saints' (Eph 5^{3}); and to this practical aspect of saintship attention is growingly directed as time goes on. St. Paul is constantly calling on his converts to commit themselves, once for all, to conduct 'worthy of the Lord unto all pleasing' (Col 1^{10}). St. Peter keeps before his readers the obligation of saintliness, after the pattern of the Holy Father, and in remembrance of the superlative cost of their initial redemption from their former vain manner of life (1 P 1^{15-21}); and he refers women to the example of 'the holy women' in the OT (3^{5}). In the Apocalypse we read of 'the patience of the saints, those who keep God's precepts and the faith of Jesus' (14^{12}); and are told that 'the fine linen is the righteous deeds (*δικαιώματα*) of the saints' (19^{8}). And indeed this expectation that fundamental consecration will appear in conduct and character, is a necessary corollary of the belief that the believer as such was 'sealed' a member of the Messianic community by the *Holy* Spirit. Here lay the significance of Christian baptism (1 Co 6^{11}); and St. Paul at least built his whole theory of sanctification upon the abiding presence of the Holy Spirit in the 'saint' as the immanent principle of his new life (Ro $8^{4.\,14\text{f.}}$, 1 Th $4^{7.\,8}$). It is by His energy that the regenerate will wars its warfare against the flesh and attains fuller life (8^{13}); it is in virtue of His indwelling that the saint shall enjoy the final redemption of his whole man, including release from the bondage of bodily corruption ($8^{11.\,23}$); and the animating impulse of the very life of prayer, whereby saints overcome, and realize full manhood in Christ (Eph $4^{12\text{ff.}}$), is still the self-same Holy Spirit (Ro $8^{26\text{ff.}}$, Eph $3^{16\text{ff.}}$ 4^{30} 6^{18}). See SANCTIFICATION.

LITERATURE.—The material is collected in Trench, *Synonyms of the NT*, and in Cremer, *Bib.-Theol. Lex.*, s. *ἅγιος* and *ὅσιος*.

J. V. BARTLET.

SALAMIEL.—An ancestor of Judith, Jth 8^{1} (BA *Σαλαμιήλ*, ℵ *Σαμαμιήλ*). See SHELUMIEL.

SALAMIS (*Σαλαμίς*; *Salamis*), the first place visited by Paul and Barnabas on the first missionary journey (Ac 13^{5}), was, as early as the 6th cent. B.C., one of the most important Greek towns of Cyprus. Under the Persians, it was the seat of one of the many Greek princes of the island; and in Roman times it was a flourishing mercantile town, from which the eastern half of Cyprus was governed. Having been overthrown by an earthquake in the reign of Constantine, it was rebuilt by Constantius, and under the name of Constantia became the capital of Cyprus. From A.D. 367–403 the bishop of Constantia was Epiphanius.

Under the Roman empire the Jews were very numerous in Cyprus; and there must have been a large colony of them at Salamis, with several synagogues. They were no doubt attracted by the facilities for trade afforded by the fine harbour of Salamis, and the farming of the copper mines of Cyprus to Herod the Great (Jos. *Ant.* XVI. iv. 5). The word was preached in Cyprus soon after the martyrdom of Stephen (Ac $11^{19.\,20}$), and amongst the early converts was Mnason (Ac 21^{16}). Barnabas was a Cypriote (Ac 4^{36}), and so possibly was John Mark, who accompanied Paul and Barnabas to Cyprus. During the suppression of the insurrection of the Jews in the reign of Hadrian, Salamis suffered greatly, and was almost deserted.

Salamis stood on the seashore at the eastern end of the great fertile plain—Salaminia—which stretches westward for many miles between two ranges of mountains. Its harbour was good, and from it the rich products of Cyprus were shipped to Seleucia and the Syrian coast. The harbour is now filled with sand and overgrown with thorns and thistles; and a few broken columns and fragments of mural masonry alone remain to mark the greatness of the ancient city. The site is about 3 miles from the modern *Famagusta*, and not far from it is the Greek monastery of St. Barnabas.

C. W. WILSON.

SALASADAI.—An ancestor of Judith, Jth 8^{1} (B *Σαρασαδαί*, A *Σαλασαδαί*, ℵ *Σαρισαδαί*).

SALATHIEL.—**1.** The father of Zerubbabel, 1 Es $5^{5.\,48.\,56}$ 6^{2} (*Σαλαθιήλ*, and so in the genealogies of Mt 1^{12} and Lk 3^{27}). See SHEALTIEL and ZERUBBABEL. **2.** Another name of Esdras, 2 Es 3^{1} (*Salathiel*).

SALECAH (סַלְכָה; Ἀσελχά, Σελχά, Σεκχαί, Ἐλχά, Ἀχά; *Salecha*, *Salacha*; AV Salcah, in Dt 3^{10} Salchah).—Salecah, one of the cities of Og (Jos 12^{5}), was on the eastern boundary of Bashan, to which the kingdom of Og extended (Dt 3^{10}, Jos 13^{11}). Though not specially mentioned, it must have been included in 'all the kingdom of Og, king of Bashan,' which was given to the half tribe of Manasseh (Jos 13^{30}). But in 1 Ch 5^{11} the children of Gad are said to have dwelt 'in the land of Bashan unto Salecah.'

Salecah was held by the Nabatæans under king Aretas (B.C. 9–A.D. 40), whose coins have been found in the ruins. It was an important place in Roman times, and was specially sacred to Allat, the mother of the gods. It is identical with the present *Ṣalkhad*—the *Ṣarkhad* of Abulfeda, who mentions its numerous vineyards, and the *Selcath* of William of Tyre, in whose day it was a strong fortress. The town occupies a commanding position a little south of the last spurs of *Jebel Haurân*, at the point where the great eastern road, that led from Gadara to the Persian Gulf, entered the desert. In the town, now occupied by Druses, there are many of the ancient houses—some almost perfect. The water-supply was, and still is, derived from rain water collected in reservoirs and cisterns. A conical volcanic hill rises to a height of over 300 ft. above the town, and in its crater stands the castle. It was built, or rebuilt, by the Romans, and must afterwards have been restored by the Arabs or the Seljúk Turks, for at the time of the Crusades it was an important fortress. From it the old Roman road can be seen running straight as an arrow over the plain towards Bosra and Gadara, and eastward as it enters the desert on its way to the Persian Gulf (Porter, *Giant Cities of Bashan*, p. 75; Heber-Percy, *A Visit to Bashan and Argob*).

C. W. WILSON.

SALEM (*Σάλημος*, AV Salum), 1 Es 8^{1}=Shallum, an ancestor of Ezra (cf. Ezr 7^{2}); called also SALEMAS (?), 2 Es 1^{1}.

SALEM (שָׁלֵם, *i.e.* Shalem; *Σαλήμ*; *Salem*).—**1.** A place of which Melchizedek was king (Gn 14^{18}, He $7^{1.\,2}$). It was, apparently, near a broad open valley (*'ēmeḳ*), called 'the vale of Shaveh,' or 'the king's vale' (Gn 14^{17}). Various positions have been assigned to Salem. Josephus and the Jewish commentators identified the town with Jerusalem, and believed Salem to be the ancient name of that city (Jos. *Ant.* I. x. 2, *BJ* VI. x.; Onkelos and all the Targg.). This was also the opinion of the early Christians, for Jerome (*Qu. in Gen.*) writes of Melchizedek as 'king of Salem, which was the old name of Jerusalem,' and he alludes to the same belief in *Ep.* lxxiii. *ad Ev.* § 2. (See also Eus. *Onom.* *Ἰερουσαλήμ*). Jerome himself, however, identified Salem with a place called *Salumias*, in the Jordan Valley, 8 miles south of Scythopolis, where the ruins of the palace of Melchizedek were shown (*Ep.* lxxiii. *ad Ev.* § 7; *Onom.* *s.* 'Salem,' 'Aenon'). At this spot there is now an artificial mound (*tell*), and on it the tomb of *Sheikh Salim.* In a fragment preserved by Eusebius (*Præp. Ev.* ix. 22) the meeting of Abram and Melchizedek is said to have taken place in 'Ar-Garizin, that is, Mt. Gerizim. This is probably a tradition derived from the belief, current in the times of Eusebius and Jerome, that Shechem was the Shalem (AV, RVm) of Gn 33^{18} (*Onom. s.* 'Salem,' 'Sichem'). This view was advocated by Dean Stanley (*S. and P.* 250). The Samaritan tradition places Salem at *Sâlim*, east of *Nâblus*. Bochart (*Phaleg* ii.) and Ewald (*Gesch.* i. 410) supposed Salem to have been east of Jordan, between Damascus and Sodom.

The most probable view is that Salem was Jerusalem. The arguments in its favour are:—that Jerus. is so called in Ps 76^2 (see below); that Salem as the residence of a priest-king must have been an important and well-known city, and that, if it be not Jerusalem, it is only once mentioned in the OT; the similarity of the names of the two kings Melchizedek and Adonizedek (Jos 10^1, if this and not Adonibezek is the correct reading, see ADONIZEDEK); and the parallel drawn between Melchizedek and the king of the line of David ruling at Jerusalem (Ps 110^4). In the Tel el-Amarna tablets, which are earlier than the conquest of Palestine by Joshua, Jerusalem appears as *Uru-salim*, that is, according to Sayce [but this interpretation is extremely doubtful], the city of the god Salim, or god of peace. It may be added that Abram's route on his return from Damascus to Hebron might well have passed through Jerus., and that the vale of Shaveh may have been the broad open head of the valley of Hinnom before it contracts and becomes a ravine (*gai*). See, further, Dillm. on Gn 14^{17}; Sayce, *HCM* 295 ff., *EHH* 28; Hommel, *AHT* 201.

2. (*ἐν εἰρήνῃ*; *in pace*) There is a general agreement that in Ps 76^2 'Salem' is Jerusalem. Each of the two names Salem and Zion indicates Jerusalem as the special seat of Divine worship, as Judah and Israel each stand for the whole nation in Ps 76^1 114^2.

3. The valley of Salem (*τὸν αὐλῶνα Σαλήμ*) is mentioned (Jth 4^4) as one of the places to which the people of Judæa sent messengers on the approach of Holofernes. Reland suggests (*Pal.* p. 977) that the original Heb. reading was למישור לשלם (=*εἰς αὐλῶνα εἰς Σαλήμ*, 'into the plain to Salem,' that is, into the Jordan Valley (Αὐλών) to Salem), and that the Greek translators rendered without the repeated *εἰς*. The place was very possibly that called *Salumias* by Jerome (see above), which was situated not far from the point at which the ancient road from Bethshean to Shechem left the plain of the Jordan and entered the hills.

4. In Jer 41 [48] ^{5} the LXX (B) reads Salem for Shiloh. This Salem, if the reading be correct, must have been near Shechem, and possibly at *Sâlim* to the east of *Nâblus*.

C. W. WILSON.

SALEMAS (*Salame, Salemas*, AV Sadamias), 2 Es 1^1=Shallum, an ancestor of Ezra (cf. Ezr 7^2); called also Salem, 1 Es 8^1. There is some doubt as to the nominative of this name in 2 Esdras. It occurs in the genitive, for which Dr. James reads in the text Saleme, with note 'Salemæ A.'

SALIM (Σαλείμ; *Salim*).—A town or village named (Jn 3^{23}) to indicate the position of Ænon,—the 'springs' in which John was baptizing,—and, presumably, a well-known place. It was on the west side of Jordan (cf. Jn 3^{26} with 1^{28} and 10^{40}), but its site has not yet been determined. Various identifications have been suggested.

(1) Eusebius and Jerome (*Onom. s.* 'Ænon') state that in their day Ænon was shown 8 miles south of Scythopolis, near Salim (*Salumias*), and the Jordan. This Salim is now, apparently, *Tell Ridhghah* (see SALEM), not far from which is a group of fine springs that answer well to the 'many waters' of Ænon. It has been objected to this site that, as it was in Samaria, the Jews would not have gone to it to be baptized. But it is probable, from its position, that Salumias was in the district of Scythopolis—a town of Decapolis, with a large population of Jews noted for their strict performance of all religious observances. See, further, Westcott on Jn 3^{23}.

(2) Robinson (*BRP* iii. 333) and Conder (*Tent-Work*, i. 91) have proposed *Sâlim*, east of *Nâblus*; but this place is 4 miles from the springs identified with Ænon, and separated from them by a range of hills. It is, too, in the heart of Samaria, and not far from Shechem.

(3) Barclay (*City of the Great King*, 558–570) identifies Ænon with the copious springs in *Wâdy Fârah*, to the N.E. of Jerusalem, and is of opinion that Salim was in the *Wâdy Suleim* near *'Anâta* (Anathoth).

(4) Büsching identifies Salim with *'Ain Karim*, the traditional birthplace of St. John.

(5) Alford (*Gr. Test.* Jn 3^{23}) and Riehm (*HWB*, *s.* 'Salim') suppose Salim and Ænon to be Shilhim (LXX Σελεείμ) and Ain in the Negeb (Jos 15^{32}). But these two places in the southernmost parts of Judah, as yet unidentified, seem to be too far removed from what is known of the scene of the Baptist's labours.

C. W. WILSON.

SALIMOTH (B Σαλειμώθ, A Ἀσσαλιμώθ, due to a wrong division of syllables in the names Βανί | ασΣαλιμώθ, AV Assalimoth), 1 Es 8^{36}. Called Shelomith, Ezr 8^{10}.

SALLAI (סַלַּי).—**1.** The eponym of a Benjamite family which settled at Jerusalem after the Return, Neh 11^8 (Σηλεί). **2.** The name of a priestly family, Neh 12^{20} (Bℵ*A om., ℵ$^{c.a}$ Σαλλαί), called in v.^{7} Sallu.

SALLU.—**1.** The eponym of a Benjamite family which settled at Jerusalem after the Return, 1 Ch 9^7 (סַלּוּא; B Σαλώμ, A Σαλώ), Neh 11^7 (סַלָּא; B Σηλώ, ℵ$^{c.a}$ Σηλώμ). **2.** The name of a priestly family, Neh 12^7 (סַלּוּ; Bℵ*A om., ℵ$^{c.a}$ Σαλουαί), called in v.^{20} Sallai.

SALLUMUS (Σάλλουμος), 1 Es 9^{25}=Shallum, Ezr 10^{24}; called Salum, 1 Es 5^{28}.

SALMA.—See SALMON.

SALMAI (שַׁלְמַי).—The eponym of a family of Nethinim, Neh 7^{48} (B Σαλαμεί, A Σελμεί, ℵ Σαμαεί), called in Ezr 2^{46} **Shamlai** (*Ḳerê* שַׂמְלַי; *Kethîbh* שַׁלְמַי followed by AV text **Shalmai**; B Σαμαάν, A Σελαμί), and in 1 Es 5^{30} SUBAI.

SALMANASAR (*Salmanasar*).—2 Es 13^{40}=SHALMANESER (which see).

SALMON, or **SALMA** (שַׂלְמוֹן Ru 4^{21}, שַׂלְמָה Ru 4^{20}, שַׂלְמָא 1 Ch $2^{11\ bis.\ 51.\ 54}$, LXX Σαλμάν Ru B, 1 Ch 2^{11}A; Σαλμών Ru A, 1 Ch 2^{11} B; Σαλωμών 1 Ch $2^{51.\ 54}$; NT Σαλμών with variant Σαλά (ℵ* B Aeth.) in Lk 3^{32}).—The father of Boaz and son of Nahshon of the tribe of Judah (Ru $4^{20.\ 21}$), and therefore in the direct line of the ancestry of our Lord (Mt $1^{4.\ 5}$, Lk 3^{32}). If the Salma of 1 Ch $2^{51.\ 54}$ is the same person, he was the 'father' or 'founder' of Bethlehem, but it is to be noticed that that Salma is reckoned as one of the sons of Caleb the son of Hur.* From Mt 1^5 we learn that Salmon married Rahab. The Salma of 1 Ch 2^{54} had many descendants,—Bethlehem and the Netophathites, Atroth-beth-Joab, and half of the Manahathites, the Zorites,—but the text of the verse seems to have been corrupted. Some have wished to distinguish between Salma and Salmon, in order to lengthen the genealogy, but it is scarcely to be conceived that a different person is intended in the two consecutive verses of Ruth ($4^{20.21}$). As to the genealogy of Christ, Eusebius (*HE* ii. 7) asserts quite distinctly that genealogical tables of various families, such as that of David, were in existence up to the time of the Herods. That this is possible may be gathered from the care exercised at the time of the return from the Babylonish captivity about noting those who 'could not show their fathers' houses, and their seed, whether they were of Israel' (Ezr 2^{60}, cf. Neh 7^{61}).

---

* This cannot mean in any case that Salma was literally a son of Caleb.

H. A. REDPATH.

SALMONE (Σαλμώνη; *Salmone*).—The name of a promontory at the N.E. end of Crete, now *Cape Sidero*, on which stood a temple of Athene. The Alexandrian ship in which St. Paul sailed from Myra for Italy, after reaching Cnidus with difficulty, met the full force of the N.W. wind, and could not continue her voyage on the direct track, which passed close to the southern points of Morea. The captain, consequently, determined to alter her course and, when off (κατά) Salmone (Ac 27^7), to work his way westward under the lee of Crete. The arguments in favour of a N.W. wind, and its influence on the course of the ship, are well stated by Smith of Jordanhill (*Voyage and Shipwreck of St. Paul*, p. 35).

C. W. WILSON.

SALOAS (B Σάλθας, A Σαλδας, AV Talsas, from the Ald.), 1 Es 9^{22} = Elasah, Ezr 10^{22}.

SALOM.—A Greek form (Σαλώμ) of the name SHALLUM (שַׁלּוּם). Its only application in EV is to Salom, the father of Hilkiah, Bar 1^7.

SALOME (Σαλώμη).—**1.** The daughter of Herodias, Mt 14^{3-6}, Mk 6^{17-22}; see HEROD, vol. ii. pp. 355, 360. **2.** A woman present at the crucifixion, Mk 15^{40}, and afterwards a visitor at the sepulchre, Mk 16^1. The comparison of the former passage with Mt 27^{56} leaves little doubt that she was also the wife of Zebedee, and, if so, she figures in the incident of Mt 20^{20-23}. Nothing else is known of her, though there are many conjectures, of which the principal is that she was a sister of Mary, the mother of Jesus. In support of that view may be cited a reading of the Peshiṭta version of Jn 19^{25} (cf. also the Jerus. Syr. lectionary), and a presumptive unlikelihood, on account of the similarity of the names, that Mary the wife of Clopas was a sister of the mother of Jesus. James and John would thus be the cousins of Jesus, and the silence of the NT as to so close a relationship becomes significant. 'Many other women' were present at the crucifixion, Mk 15^{41}; and amongst these unnamed disciples must probably be sought the sister of Mary, the identification with Salome being precarious in the extreme, and sustained by no real evidence. See, further, art. MARY, vol. iii. p. 278 f.

R. W. MOSS.

SALT (מֶלַח, ἅλας, ἅλς).—This mineral (sodium chloride) is in such general use as a condiment to food amongst all civilized nations that it has become a necessity; and undoubtedly it is beneficial in the animal economy as an antiseptic, and a preventive to the development of intestinal worms. Even wild animals feel its necessity as well as domestic cattle; and it is well known that in former times when the bison roamed in immense herds over the plains of North America they made long journeys to the 'salt-licks,' or salinas, for the purpose of licking the ground coated with this mineral. Salt of commerce is one of the most abundant of substances, and is found to a greater or less extent in nearly all countries, especially in England, Germany, Switzerland, and the Austrian Alps; in India, both in the salt range of the Punjab and in the great salt lake of Sambur in Rajputana; in China, and in N. America. In Europe and the British Isles its chief source is the Triassic formation. It is also the most abundant saline ingredient in the waters of the ocean* and of most salt lakes. On the coasts of Spain, Italy, and some other countries, salt of commerce is largely extracted from the oceanic waters by evaporation. Salt is found also in the waters of nearly all rivers.

The chief source of salt in Palestine is, and always has been, the terraced hill, called *Khashm Usdum*, on the south-western shore of the Dead Sea (which see); and this trade is still carried on by the Arabs. Here a cliff of solid rock-salt from 30 to 60 ft. high,† capped by white marl, extends for a distance of nearly 7 miles along the shore of the lake, and affords an inexhaustible supply; while salt is also obtained from pits dug into the sand or slime of the shore, into which the waters of the Dead Sea are admitted and then allowed to evaporate. The abundance of salt was of the greatest use to the Israelites, not only for domestic purposes, but for use in the sacrifices of the temple (Lv 2^{13}, Ezr 6^9, Mk 9^{49}); and so Antiochus the Great, as a reward for the alliance of the Jews in his wars with Ptolemy Philopator, bestowed upon them gifts for their sacrifices, of wine, oil, and other articles, amongst which were 375 medimni of salt.‡ Cf. Ezk 47^{11} (RVm), where, in the prophetic description of the ideal future, after the Dead Sea as a whole has been sweetened, the marshes are still reserved for the production of salt.

Salt trade was extensively carried on in ancient times along the caravan routes in Syria, Palestine, and Northern Africa. One of the chief of these was the route from the ports of Phœnicia to the Persian Gulf through Palmyra. The Phœnicians manufactured salt by evaporation from sea-water, and used it for salting fish.

Emblematic Uses of the Term.—Owing to its purifying, sustaining, and antiseptic qualities, salt became an emblem of fidelity and friendship amongst Eastern nations. To have 'eaten of his salt,' and thus partaken of his hospitality, was (and still is) regarded by the Arabs as a token or pledge of eternal amity. So in the Bible it is used as an emblem of the Covenant ('a covenant of salt') between J″ and His people (Nu 18^{19}, 2 Ch 13^5). In memorable language our Lord applies the expression to His disciples: 'Ye are the salt of the earth' (Mt 5^{13}). Again He says: 'Salt is good; but if the salt have lost its saltness, wherewith will ye season it?' and He concludes with the injunction: 'Have salt in yourselves, and have peace one with another' (Mk 9^{50}).

Excess of saltness in the ground produces sterility; hence a salt-land becomes emblematic of barrenness and desolation (Dt 29^{23}, Jer 17^6, Zeph 2^{11}); and a city when destroyed was sown with salt, in token that it was never again to be restored. Thus it happened in the case of Shechem when captured by Abimelech (Jg 9^{45}).

E. HULL.

SALT, CITY OF (עִיר הַמֶּלַח).—This was one of the cities which fell to the lot of the tribe of Judah, and was situated in the wilderness of

---

* In the proportion of 28 to 29 grammes per litre.

† Hull, *Mount Seir*, ch. xiv. p. 129; Lartet, *Voyage d'Exploration de la Mer Morte*; Tristram, *Land of Israel*, 326.

‡ Jos. *Ant.* XII. iii. 3. Revenue was raised by a tax on salt, the remission of which was offered the Jews by Demetrius king of Syria; *ib.* XIII. ii. 3.

Beth-arabah (Jos 15[61. 62]). It was also not far from En-gedi, the site of which we know; hence it may be inferred to have occupied some position on the western shore of the Dead Sea, between En-gedi and *Khashm Usdum* (the salt mountain. See art. SALT). E. HULL.

SALT SEA.—See DEAD SEA.

SALT, VALLEY OF (גֵּיא־מֶלַח).—The scene of memorable victories of David, or of Abishai his lieutenant, over the Edomites (2 S 8[13], 1 Ch 18[12]),* and at a later period of Amaziah over the same hereditary enemies of Judah (2 K 14[7], 2 Ch 25[11]). The position of this valley can scarcely be a matter for doubt, both on account of its historical associations as related in the above passages, and from the position of the salt mountain, *Khashm Usdum*, which rises from the western shore of the Dead Sea. The accounts of the battles would lead to the inference that the position was some valley lying between Jerusalem and Edom of which Petra (Sela) was the capital; and the name indicates the proximity of either the salt mountain or the salt sea. Both the inferences are satisfied by identifying the Valley of Salt with the plain extending from the southern end of the Dead Sea to the foot of the cliffs (the ascent of 'Aḳrabbim), † which cross the valley from side to side and form the southern margin of the Ghor. This plain is of sufficient extent to be the battleground for large armies. See arts. ARABAH and DEAD SEA. E. HULL.

SALTWORT (Job 30[4] RV).—See MALLOWS.

SALU (סָלוּא).—The father of Zimri the Simeonite chief who was slain, along with the Midianitish woman, by Phinehas, Nu 25[14] (B Σαλμών, A Σαλώ, Luc. Σαλώμ), 1 Mac 2[26] (Σαλώμ, hence AV Salom).

SALUM (A Σαλούμ, B om.), 1 Es 5[28] = Shallum, the head of a family of porters (cf. Ezr 2[42]). Called Sallumus, 1 Es 9[25].

SALUTATION (NT *ἀσπασμός*; 'salute' in OT is expressed by ברך [lit. 'bless'] or שׁאל לְשָׁלוֹם [lit. 'ask for the peace of'], in NT by *ἀσπάζομαι* [also tr. in AV 'greet']).—In the modern East some word or act of salutation accompanies all social intercourse, the phrases and gestures being modified according to the occasion and the relationship of the parties. It is against all the courtesies of Oriental life to deliver any message, ask information, or pass to any matter of business, without some form of salutation by which inquiry is made after each other's welfare, and goodwill is expressed. Thus a traveller seeking direction from a peasant by the roadside must first hail him by expressing a wish that his toil may bring an ample reward. Similarly, a purchaser on entering a shop, before mentioning what he wants or engaging in the usual swordplay about the price, must salute the merchant with the wish that the day may prove one of blessing and profit. Remoteness from cities and centres of civilization does not mean ignorance of such etiquette, as the Bedawin of the desert excel in this politeness. No inferiority of position is allowed to excuse the omission of such courtesy: the beggar at the door expects a salutation along with the copper or piece of bread, and, if refused charity, claims that he shall at least be dismissed with a recommendation to the Divine care. Something of formal dignity mingles also with the daily salutations in the family. Some of the chief occasions of salutation are: the birth of a son, a marriage, the meeting of relatives away from home, the return of a friend from a journey, the appeals of the street beggar. Salutations are also offered to the host after partaking of refreshments, upon meeting a fellow-traveller on the road, and on visits of respect to ecclesiastical or government officials.

Oriental salutation, ancient and modern, owes much of its originating motive and distinctiveness of character to the following facts of Oriental life:—

(1) *The strong sense of personal dignity among Orientals.*—In Job 29 there is an enumeration of the elements of Oriental greatness, and a description of the happiness of the man who is met on every side by the reverence, obedience, and loving gratitude of those to whom he has been a benefactor. The same sense of dignity implies a quick recognition of affront, and a strong feeling of indignation when the claim to respect is repudiated. Hence the complaint over the cessation of the wonted reverence in Job 30. The narrative in the Bk. of Esther turns upon the salutation that Mordecai refused to Haman. Christ's Oriental hearers would be deeply stirred by the appeal of the affronted guest (Lk 7[44-46]), and by the list of indignities heaped upon the neglected king (Mt 25[42. 43]). The ancient sculptures and paintings of Assyria and Egypt show the forms of prostration in which gods and kings were saluted and supplicated. Similar formalities are mentioned in the Bible as being employed in ordinary social life (Gn 32[17-20] 33[3], 1 S 25[23-31]). The usual salute of reverence is that of standing erect. Thus children rise to salute their parents (Pr 31[28]); and in the village, when the men are gathered in a room on the occasion of a marriage or funeral, it is customary for all to rise and stand whenever a member of the village or a visitor from the neighbourhood enters the room. There is a weird allusion to this custom in Is 14[9]. The most impressive form of salutation is to kneel, and clasp and kiss the feet. This is done when some favour is sought or influence solicited on behalf of oneself or a friend (2 K 4[27]). When words fail, and there are no more tears to shed, this oratory of silent helplessness seems to say, 'Cast me not away from thy presence' (Ps 51[11]). It is the power of weakness over strength through the confession of weakness.

(2) *The comfort derived from physical health, peace of mind, and family affection.*—With Orientals the summit is always more pleasant than the ascent; work is undertaken in order to the attainment of rest rather than rest enjoyed in order to the renewal of labour. When anything urgent or important has to be done, the early morning is chosen, so that, if possible, rest of mind may be recovered before the evening (Gn 22[3], Jer 7[25]). An Arabic proverb says, 'It is better to have bad news in the morning than news of any kind in the evening.' Hence a fulness of meaning, a sense of needed comfort, in the salutation of peace (שָׁלוֹם *shālôm*, *εἰρήνη*), implying both the safety of Divine protection and the restfulness of human friendship (Gn 26[29. 31] 44[17], Ex 4[18], Nu 6[26], Jg 18[6], 1 S 1[17] 20[42] 25[6. 35] 29[7], 1 Ch 12[18], Mk 5[34]). The question of giving and receiving this salutation of peace was one of grave importance to travellers meeting strangers on the road. If the strangers were enemies, they would also be aliens in religion, and unable to call down the blessing of their god upon those who were under the protection of another. Even at the present day, Moslems, Jews,

---

* Both these passages, judging by the context, evidently refer to the same event, but in the former it is 'the Syrians' who are vanquished, in the latter it is 'the Edomites.' As it is extremely improbable that the Syrians should have been encountered at the southern extremity of the Dead Sea, we must suppose that the latter is the correct account, and that the former is an error due to transcription. (See Driver, *Sam.* 217 f.).

† *'Aḳrabbim*='scorpions,' which are found under the stones at this place.

and Christians shrink from bestowing upon each other the salutation of peace. To the Moslem especially it seems heterodox to wish peace to the infidel, and an impertinence to be thus saluted by him. These limitations are left behind in Mt 5^{47}. Hence the directness of the question, 'Art thou for us, or for our adversaries?' (Jos 5^{13}), and the anxious inquiry, 'Is it peace?' (2 K 9^{17-22}). Hence also the abhorrence of deceitful salutation (Ps 28^3, Jer 6^{14} 8^{11}, Ezk 13^{10}). The ordinary hail of travellers on the road is the old formula mentioned in Ps 118^{26}, Mt 21^9 23^{39}, 'Blessed is he that cometh.' Among relatives and familiar friends the form of salutation after an interval of separation is to kiss on both cheeks, or on each side of the neck. It is the kiss of brotherly love, and is frequently referred to in Scripture (Gn 27^{27} $29^{11.13}$ 31^{55} 33^4, Ex 4^{27}, Ps 85^{10}; cf. Ro 16^{16}, 1 Co 16^{20}, 2 Co 13^{12} 'Salute one another with a holy kiss,' similarly 1 Th 5^{26} 'Salute all the brethren with a holy kiss,' and 1 P 5^{14} 'Salute one another with a kiss of love'). In the case of children saluting their parents, scholars their teachers, and servants their masters, the custom is to stand, and, bowing down, to kiss the hand. In Oriental letters the opening sentence frequently begins with the expression, 'After kissing your hands,' as a token of respect. This reverential salutation of kissing the hands is always given to priests, rabbis, and sheikhs of religion. It was the salutation claimed by the Pharisees (Mk 12^{38}). Absalom changed the salutation of respect to that of equal friendship (2 S $15^{5.6}$). There prevails at the present time a compromise of courtesy by which one seizes the hand of a friend in order to give the kiss of veneration, but the other defeats the design by quickly withdrawing his hand as soon as his fingers have been touched. See art. KISS.

In Bible instances of salutation, where one person falls upon the neck of another, the Heb. word for 'neck' (צַוָּאר *ẓavvār*) is used in the *dual* [probably not *plural*] as indicating the two sides that are kissed (Gn 27^{16} 33^4 45^{14} 46^{29}, Ca 4^9).

In Oriental salutation great attention is paid to asking after each other's health and general welfare, in the course of a call of courtesy or on an occasion of meeting. It is exceedingly trying to a Western, who craves some exchange of thought, to have to answer these repeated inquiries after his health, more especially as every such inquiry begins another circulating decimal of devout commonplaces. It is owing to the prominence given to this matter that the visit of salutation in the Bible is often described as a health-inquiry (1 S 10^4 17^{22} 30^{21} RV gives the more general 'salute' instead of 'ask of welfare' in 1 Ch 18^{10}). The union of reverence and affection in salutation is exemplified in Ex 18^7, 1 S 20^{41}, 2 S 14^{33}. The salutation of bowing and kissing was employed in the worship of Baal (Job 31^{27}, 1 K 19^{18}).

The injunction, 'Salute no man by the way' (2 K 4^{29}, Lk 10^4), referred to the inevitable delay imposed by common courtesy in asking and answering formal inquiries as to health, family, etc. The special responsibility of one sent by another is recognized by the Orientals, and the messenger is saved from the charge of rudeness by a proverb which says, 'The messenger has only to deliver his message.'

(3) *The deep-seated conviction that both blessing and cursing in salutation tend to work out their fulfilment.*—It was of importance to give or to withhold the salutation of peace. The salutation at parting took the form of a benediction (Ru $1^{9.14}$, 1 S 20^{42}, 2 S 19^{39}), and consequently the same word might mean 'rejoice' or 'farewell' (Ph 4^4). This form of salutation is exemplified in rich fulness at the close of the Pauline Epistles. When Christ said that the 'peace' He gave was not after the custom of the world, He referred to the emptiness that had come to mark salutations that once expressed a precise meaning and a sincere desire (Lk 24^{36}, Jn 14^{27} 20^{19}). The disciples were told that when they went forth in His name, and invoked the Divine blessing on a house, and were refused admittance and hospitality, then the blessing returned to those who had uttered it. It was their introduction to what has since become a familiar law in the Christian service, that whatever is forfeited for the Lord is found in Him.

G. M. MACKIE.

SALVATION, SAVIOUR.—The purpose of this art. is to give a general survey of the doctrine of salvation as developed within the period covered by the Biblical writings. Of necessity the subject stands in close relations with others treated in the Dictionary, and the reader is therefore recommended to consult, in addition to special articles on such subjects as FAITH, MEDIATOR, REDEEMER, RANSOM, PAROUSIA, etc., the general articles on GOD, HOLY SPIRIT, JESUS CHRIST, MESSIAH, KINGDOM OF GOD, and ESCHATOLOGY. It will be the aim of this article, as far as possible, to avoid unnecessary repetition, and, passing over points of detail, to confine itself to a bird's-eye view of the doctrine as a whole.

i. The Words.
ii. The Idea (in general).
iii. History of the Idea.
    1. In the Old Testament.
    2. Between the Testaments.
    3. In the Teaching of Jesus.
    4. In the New Testament: (*a*) in general; (*b*) St. Paul; (*c*) St. John.
iv. Systematic Statement.
    1. Nature of Salvation: (*a*) temporal and spiritual; (*b*) individual and social; (*c*) present and future.
    2. Conditions of Salvation: (*a*) on the Divine side; (*b*) on the human side.
    3. Extent of Salvation: (*a*) in this life; (*b*) in the life to come; (*c*) in the universe.

i. THE WORDS.—'Salvation' is in OT tr. of a number of words, the principal of which are: יְשׁוּעָה, יֵשַׁע or יֶשַׁע, מוֹשָׁעוֹת [only Ps 68^{20} RV 'deliverances'], תְּשׁוּעָה, from the stem ישׁע (lit. 'to be broad, spacious'; only found in Niphal and Hiphil, the latter with the meaning 'deliver'); in the NT it is tr. of σωτηρία, from σώζω 'to save' (less frequently of τὸ σωτήριον, neut. of the adj. σωτήριος; *e.g.* Lk 2^{30} 3^6, Ac 28^{28}, Eph 6^{17}; cf. Tit 2^{11} ἡ χάρις τοῦ θεοῦ σωτήριος, 'the grace of God bringing salvation'). Other words translated 'save' in our VSS are in OT חִיָּה and הֶחֱיָה (Piel and Hiphil of חָיָה 'to live,' with the meaning 'to keep living,' 'to save alive'; so Gn 12^{12} 19^{19} 45^7 [RV] 50^{20}, Ex $1^{17.18}$, Nu 22^{33} 31^{15}, Dt 20^{16}, Jos 2^{13} 6^{25}, Jg 8^{19} 21^{14}, 1 S 27^{11}, 1 K 18^5 20^{31}, 2 K 7^4, Ezk $13^{18.19}$, and esp. Ezk 3^{18} 18^{27}, where the reference is to escape from penalty through repentance); הִצִּיל (lit. 'to snatch away,' with meaning 'deliver,' by which it is usually rendered both in AV and RV; *e.g.* 1 S 12^{21} and often. The tr. 'save' occurs in AV only 2 S 19^9). מִלֵּט (Piel of unused מָלַט 'to slip away,' 'to escape,' with meaning 'to let *or* cause to escape,' hence 'to deliver'; 1 S 19^{11}, 2 S 19^5, 1 K 1^{12}, Job 20^{20}, Jer 48^6, and 2 S 19^9 RV, Jer $51^{6.45}$); שָׁמַר (lit. 'to keep,' 'to preserve'; Job 2^6, RV 'spare'). In NT the word 'save' is usually the translation of σώζω, but the compound διασώζω is rendered 'save' in three instances (Lk 7^3 RV, where AV renders 'heal,' Ac 27^{43}, 1 P 3^{20}, cf. Ac 23^{24} 'to bring safe'; elsewhere 'escape' Ac 27^{44} 28^1, or 'make whole' Mt 14^{36}), and the same is true in one case (2 P 2^5 AV) of φυλάσσω (lit. 'to guard,' 'to preserve,' so RV). The phrase περιποίησις ψυχῆς in He 10^{39} is rendered 'saving of the soul' in both versions.

'Saviour' is the tr. in OT of the Hiph. ptcp. (מוֹשִׁיעַ) of ישׁע (so Jg $3^{9.15}$, Is 19^{20} 43^{11}, and often); in NT and LXX of σωτήρ, from σώζω.

ii. THE IDEA.—The root idea in salvation is *deliverance*. In every case some danger or evil is presupposed, in rescue from which salvation consists. Since in primitive times one of the greatest dangers to be feared is defeat in battle, salvation is often used in OT in the sense of 'victory' (*e.g.* Ex 15^{2}, 1 S 11^{13} RV 'deliverance,' 19^{5} RV 'victory,' Ps 20^{5} RVm 'victory'), and successful warriors are called 'saviours' (*e.g.* Jg $3^{9.15}$, Neh 9^{27}). But this is only one modification of a much broader usage. Men are said to be saved from trouble (Ps 34^{6}, Is 33^{2}, Jer 14^{8} 30^{7}; cf. 1 S 10^{19}, Ps $107^{13.19}$), enemies (2 S 3^{18}), violence (2 S 22^{3}, Ps 59^{2} 'bloodthirsty men'), reproach (Ps 57^{3}), exile (Ps 106^{47}, Jer 30^{10} 46^{27}, Zec 8^{7}), death (Ps 6^{4}, cf. v.^{5}), sin (Ezk 36^{29}, cf. Ps 130^{8}, Mt 1^{21}). Since all deliverance comes from God, He is frequently spoken of as 'Saviour' (so esp. in Deutero-Isaiah $43^{3.11}$ $45^{15.21}$ 49^{26} 60^{16} 63^{8}; but also Jer 14^{8}, Hos 13^{4}, 2 S 22^{3}, Ps 106^{21}). The name 'Saviour' is often applied to God in the Apocrypha (*e.g.* Ad. Est 15^{2}, Bar 4^{22}, Jth 9^{11}, Wis 16^{7}, Sir 51^{1}, 1 Mac 4^{30}; cf. 3 Mac $6^{29.32}$ 7^{16}, Ps-Sol 3^{7} 8^{39} 16^{4} 17^{3}). It is less frequent in NT, being found only in Lk 1^{47}, 1 Ti 1^{1} 2^{3} 4^{10}, Tit 1^{3} 2^{10}, Jude ^{25}. Elsewhere in NT the title is applied only to Jesus Christ (so Lk 2^{11} and often). With the growth of the Messianic idea we find the tendency to use the words 'save' and 'salvation' in a technical theological sense of the deliverance to be brought in with the Messianic age (*e.g.* Jer 23^{6}) or at the last day (Is 25^{9}). This usage, which is common in the Apocalyptic literature (*e.g.* Enoch 62^{13} 99^{10}, Apoc. Bar 68^{3}, 2 Es 8^{3}; cf. Ps-Sol 10^{9} 12^{7}), reappears in NT in such passages as Mt 10^{22} $24^{13.22}$ and parall., Ro 11^{26} 13^{11}, 1 Co 3^{15}, 2 Ti 4^{15} RV, He 9^{28}, 1 P $1^{5.9.10}$. The word is still used, however, in NT as in OT, in the wider sense of deliverance from trouble (so Ja 5^{15} of the healing of the sick, and often in the Gospels). With the deepening sense of moral evil, 'salvation' acquires a more profound ethical and spiritual meaning. It includes deliverance from sin itself as well as from the various evils which are the consequence of sin, and so comes to stand, in the spiritual realm as well as in the temporal, for a present experience as well as for a future expectation. The growth of this deeper meaning will become apparent as we pass to a brief review of the history.

iii. HISTORY OF THE IDEA.—

The Sources.—In the present state of Biblical criticism, any attempt to trace the development of a theological conception must be provisional. As a part of general history, the history of doctrine is dependent for its sources upon the results reached in the wider discipline, and the uncertainty which still obtains as to the date and authorship of many OT passages (*e.g.* Psalms) hinders the theologian in his attempt at constructive statement. On the other hand, the student of doctrine has an advantage over the general historian. For there is an inner logic of ideas which is quite independent of time and place. And it is often possible by the aid of this logic to trace the origin and development of conceptions, even where external evidence as to their history is lacking or uncertain. In the present article the general results of Biblical criticism are presupposed. It is assumed that the idea of salvation has had a history, the broad outlines of which we can trace, and that the record of this history is preserved for us in the Biblical writings, which, together with the contemporaneous Apocryphal and Pseudepigraphical literature, constitute our sources. In what follows we shall give the different steps in the development of the idea in their natural order, even if the particular passages which illustrate a special usage be themselves of later or of uncertain date.

1. *In the Old Testament.*—The most signal instance of the Divine salvation in the early history of Israel, and the one which made the deepest impression on the national memory, was the deliverance from Egypt. The prophetic historian in the Pentateuch (J) relates with triumph how 'J″ saved Israel that day out of the hand of the Egyptians; and Israel saw the Egyptians dead upon the seashore' (Ex 14^{30}). The same glorious deliverance is celebrated in Ps 106 (cf. esp. vv.$^{7.8.10}$). In these passages we have the simplest meaning of 'salvation.' It is deliverance from present danger or trouble, more especially from defeat in battle. J″ is the Saviour of Israel, because He is the one from whom such deliverance comes. 'J″ is my strength and my song,' sings the author of the Song of Moses (Ex 15^{2}), 'and he is become my salvation.' And the context makes clear the sense in which this salvation is to be understood. 'J″ is a man of war, J″ is his name' (v.^{3}, cf. the title *J″ Sabaoth*, 'J″ of Hosts,' *i.e.* according to what is probably the best interpretation, J″ the God of the armies of Israel). The use of 'salvation' in this sense of victory in battle is frequent in the OT, esp. in the historical books. In the time of the judges J″ raised up 'saviours' in the persons of Othniel (Jg 3^{9}) and of Ehud (3^{15}). He sent Gideon to save Israel ($6^{14.15}$, cf. vv.$^{36.37}$), and required him to reduce his force to 300 men, lest Israel should say, 'mine own hand hath saved me' (7^{2}). In the time of their distress at Aphek the people send in haste to fetch the ark from Shiloh, 'that it may come among us and save us out of the hand of our enemies' (1 S 4^{3}). With the growth of the national life the importance of such deliverance increases. J″ made Saul to be king that he might save the people from the Philistines (1 S 9^{16}), and the same is true of David after him (2 S 3^{18} 'By the hand of . . . David I will save . . . Israel out of the hand of the Philistines and out of the hand of all their enemies'; cf. also 2 K 14^{27}). This view of J″ as the Saviour of Israel in battle finds classic expression in the Deuteronomic code (Dt 20^{2-4}): 'And it shall be, when ye come nigh unto the battle, that the priest shall approach and speak unto the people, and shall say unto them, Hear, O Israel, ye draw nigh this day unto battle against your enemies: let not your heart faint; fear not, nor tremble, neither be ye affrighted at them; for J″ your God is he that goeth with you, to fight for you against your enemies, to save you.'

Side by side with this view of 'salvation' as victory in battle, goes the wider conception of it as deliverance from trouble. J″ not only delivers His people from their enemies (2 S 3^{18}), but from all their calamities and distresses (1 S 10^{19}, cf. Ps 107^{13}). He saves the poor man who cries to Him out of all his troubles (Ps 34^{6}, cf. 37^{39}). His salvation brings with it not merely deliverance, but security and prosperity. This close connexion with prosperity is clearly brought out in such a passage as Ps 118^{25} 'Save now, we beseech thee, O J″. O J″ . . . send now prosperity' (cf. Ps $106^{4.5}$ 'O visit me with thy salvation: that I may see the prosperity of thy chosen'). In more than one instance the Hebrew words usually translated 'salvation' are rightly rendered in EV 'welfare' (*e.g.* Job 30^{15} יְשׁוּעָה) or 'safety' (*i.e.* security, cf. Job $5^{4.11}$, Pr 11^{14} יֶשַׁע). Especially common is this connotation in connexion with the eschatological use of the word. Cf. Is 61^{10} 'I will greatly rejoice in J″, my soul shall be joyful in my God; for he hath clothed me with garments of salvation, he hath covered me with the robe of righteousness.' The salvation in which the redeemed Israel is here represented as rejoicing is the good time of safety and prosperity to be ushered in with the Messianic age. But this is already to anticipate the next meaning.

Thus far we have considered salvation as deliverance from present evil. The conception is both temporal and material. But with the rise of Messianic prophecy* we note a new development. The conception of salvation is still more or less external. It involves victory in battle, the defeat of enemies, and worldly prosperity. But this victory is not looked for in the present. There is a preceding judgment to take place, in which unfaithful Israel shall receive from J″ the just recompense of her sins. Only after this impending judgment, and then only for the faithful remnant, will J″ show Himself as Saviour. We have thus the beginnings of the use of the word in an eschatological sense, as one of the features of the Messianic age. The prominence of the conception varies greatly in the different prophets. In some it is almost overshadowed by the message of doom. In others it is a hope which burns bright and clear. Often judgment and salvation go hand in hand, as in such a passage as Is 35^4 'Your God will come with vengeance . . . he will come and save you.' The Messianic salvation is the theme of many of the Psalms (*e.g.* 53^6 'Oh that the salvation of Israel were come out of Zion! When God bringeth back the captivity of his people, then let Jacob rejoice and let Israel be glad.' Cf. 14^7 $69^{29.\ 35}$ 106^{47} 133^{16}). Especially common is the use of the word in the eschatological sense in the later portions of Isaiah (*e.g.* 25^9 $45^{8.\ 17}$ 46^{13} $49^{6.\ 25}$ 51^6 56^1 61^{10} 62^{11}). From the prophets it passes over into the Apocalyptic books (*e.g.* Ps-Sol 10^9 and often), and reappears in the NT with deepened ethical and spiritual meaning.

---

* The word 'Messianic' is here used in its broadest sense, to include the doctrine of a future Divine deliverance in all its forms, whether or not it involves the belief in a Messianic king of David's line.

Looking more closely at the content of this future salvation, we find that it has many features in common with the salvation already experienced in the past. It is still a time of victory over enemies, of worldly prosperity and joy. But there is a new element which enters into the conception through the experiences of the Exile. Whatever else the future salvation may bring with it, it involves restoration from captivity. Thus Jeremiah, looking forward to the day when God 'will raise up unto David a righteous branch,' who 'shall reign as King and deal wisely and shall execute judgment and justice in the land,' goes on to say that 'in his days Judah shall be saved and Israel shall dwell safely. . . . They shall no more say, As J″ liveth, which brought up the children of Israel out of Egypt; but as J″ liveth, which brought up and which led the seed of the house of Israel out of the north country, and from all the countries whither I have driven them; and they shall dwell in their own land' (Jer 23^{5-8}; cf. $30^{7-9.\ 18}$ 'Behold, I will turn again the captivity of Jacob's tents,' 31^{11}, and esp. 46^{27} 'Fear not thou, O Jacob my servant, neither be dismayed, O Israel. For, lo, I will save thee from afar, and thy seed from the land of their captivity; and Jacob shall return, and shall be quiet and at ease, and none shall make him afraid'). So Ezekiel looks for a day when God shall save His distressed flock, and gather them under one shepherd, even His servant David ($34^{22.\ 23}$). And Zechariah confidently expects the time when God shall save His people 'from the East country and from the West country,' and shall 'bring them, and they shall dwell in the midst of Jerusalem' ($8^{7.\ 8}$, cf. Is 66^{20}). The return from captivity is the theme of the Psalmist's prayer (106^{47}, cf. 53^6); and in the little hymn which forms the appendix of Is 11 the returned exiles are represented as praising God for His deliverance, and drawing water with joy out of the wells of salvation (12^3).

But the Jerusalem to which the exiles return is not to be in all respects the same as the old. We have emphasized the external features in the Messianic ideal. But we shall greatly misconceive the nature of Israel's hope if we regard it as purely external. The revelation of God's holiness had been too clearly apprehended by the prophets to make them content with any ideal which was not ethical. As the condition of enjoying the future salvation is repentance on Israel's part (Is $1^{19.\ 20}$), so it includes as one of its chief elements the righteousness of the nation (Jer 31^{31-34}). The Messianic age is to be a time of justice and judgment and of the pure worship of God. When the Messiah comes, he will be not merely a faithful shepherd (Ezk 34^{23}) but a just judge (Is 11^{3-5}), binding up the broken-hearted, setting at liberty the captives, righting the wronged (Is 61^1), but at the same time punishing the guilty (Is 11^4 61^2); in short, realizing the ethical ideal, the failure to attain which had been the cause of all Israel's misfortunes. In the great eschatological passages in prophet and psalmist alike, salvation and righteousness go hand in hand (Is $45^{8.\ 17}$ 46^{13} 51^5 61^{10}, cf. Ps 24^5 71^{15} $132^{9.\ 16}$).

Such being in general the nature of the Messianic salvation, how widely shall we conceive its extent? In many passages indeed the prophetic vision seems bounded by Israel. The old oppressors are to be destroyed in the great judgment of the Day of J″ (Is 13. 34. 63^{1-6}, Ezk 38. 39, esp. 39^{21}, Zeph 2^{4-15}), or, if they survive at all, it is as captives, holding the same menial position which they had once imposed upon Israel (Jl 3^8, cf. Is $61^{5.\ 6}$). Elsewhere, however, the prophetic horizon broadens, and we have the prediction of a day when the knowledge and service of J″ shall be shared by those who hitherto have known Him not. Jerusalem is to be the scene not only of a universal dominion, but of a universal worship (Mic 4^{1-4}, cf. Is 2^{2-4}, Is 60. 66^{19-21}, Ps $68^{31.\ 32}$, Zec $8^{22.\ 23}$ $14^{16.\ 17}$). Nay, the time is coming when the Divine worship shall not be confined to Jerusalem. The author of Is 19 associates Egypt and Assyria with Israel as worshippers of the one true God. 'In that day shall there be an altar to J″ in the midst of the land of Egypt, and a pillar at the border thereof to J″. And it shall be for a sign and for a witness unto J″ of hosts in the land of Egypt; for they shall cry unto J″ because of the oppressors, and he shall send them a saviour and a defender, and he shall deliver them. And J″ shall be known to Egypt, and the Egyptians shall know J″ in that day' (vv.$^{19-21}$, cf. Zeph $3^{9.\ 10}$, Ps 87). This conception of a salvation wider than Israel culminates in the great passage Is $49^{5.\ 8}$. Here we have the sublime conception of Israel not merely as the recipient but as the minister of the Divine salvation. 'And now saith J″ that formed me from the womb to be his servant to bring Jacob again to him and that Israel be gathered unto him . . . yea, he saith, It is too light a thing that thou shouldst be my servant to raise up the tribes of Jacob and to restore the preserved of Israel; I will also give thee for a light to the Gentiles that thou mayest be my salvation unto the end of the earth' (cf. Is 45^{21-24} 55^{1-5}).

Two features of the prophetic teaching still need special mention, as bearing on the development of the doctrine of salvation. The first is the growing transcendence of the conception; the second, the increasing stress laid upon the individual.

In the earlier prophets the Messianic ideal is essentially earthly. Jeremiah, for example, looks for the re-establishment of the Davidic monarchy, and the restoration of conditions more glorious indeed, but essentially the same as those which preceded the Exile (Jer 23^5 30^9 33^{17-22}). But with the lapse of time we note the tendency to magnify the contrast between the Messianic age and that which it succeeds. The hope of Isaiah (ch. 11) of a renewed nature is taken up by his successors and developed with a great wealth of detail. In the Messianic age the wilderness and the solitary place shall be glad, and the desert shall rejoice and blossom as the rose (Is 35^1). 'The wolf and the lamb shall feed together, and the lion shall eat straw like the ox' (65^1). The voice of weeping shall no more be heard in Jerusalem (65^{19}). There shall be no more darkness or gloom, for the uncertain luminaries of earth shall be superseded by a Divine light ($60^{19.\ 20}$); the years of life shall be greatly extended (25^8); and those Israelites who have passed away in the gloom and despair of the Exile shall rise from their graves to share with their brethren in the Messianic glory (26^{19}, Dn 12^3).

It is not always easy to tell how far the passages which speak of a renewed nature are to be taken literally, and how far they are merely symbolical of the great fertility and prosperity of the Messianic age. But, whatever may be true of individual cases, there can be no doubt that the passages cited prepared the way for that transcendent view of the future which is characteristic of many of the Apocalyptic books. The prophetic hope seemed too great to be realized under existing conditions, and hence could be ushered in only by a complete transformation of the present order of things. The clearest anticipation of this new point of view is given by the unknown author of the last chapters of Isaiah in his doctrine of new heavens and a new earth (65^{17}, cf. 66^{22}). Where such a view-point obtains, the Day of J″ no longer has its significance, as in the older prophets, as ushering in a new stage of this world's history. It marks the division between two worlds or ages, separating the present period of probation and distress from the final age of fruition and judgment which is to be the scene of Israel's 'everlasting salvation' (Is 45^{17}. Cf. Dn 7^{14}; Targum on Gn 49^{18} (quoted by Cremer, *s.v.* *σώζω*): 'My soul waiteth not for the salvation of Gideon the son of Joas, for that is temporal, nor for the salvation of Samson, for it is passing, but for the salvation of the Messiah, the son of David, which through thy word thou hast promised to bring to thy people, the sons of Israel, for this redemption my soul waiteth; for thy redemption, O Jehovah, is an everlasting redemption').

The second feature which demands notice is the increasing stress laid upon the individual. In the earlier history of Israel the conception of salvation had been primarily national, but with the destruction of the nation the attention of the prophets was directed more and more from the people as a whole to the units which composed it. Jeremiah, and still more Ezekiel, are the prophets of this growing individualism, which appears clearly in such passages as Jer $31^{29.30}$, Ezk 18. No small part of Messiah's work consists in righting the wrongs of the oppressed, and re-establishing the widow and the fatherless in the rights of which they have been defrauded (Ps $72^{4.13}$, Is $11^{3.4}$ 61^{1-3}). Under Him, as under a faithful shepherd, all those who have been faithful to J″ during the period of Israel's misfortunes shall be gathered together to form a new commonwealth in which righteousness shall be the controlling feature (Ezk 34, cf. Is 60^{21}). This conception of God as the Saviour of the individual finds expression in the Wisdom literature (*e.g.* Job 5^{15} 22^{29} 26^{2}, Pr 20^{22}), and in many of the Psalms. J″ is the deliverer of the weak and the needy (109^{31}, cf. 18^{27} $72^{4.13}$), the Saviour of the meek (76^{9} 149^{4}, cf. Job 22^{29}), and of all that put their trust in Him (86^{2}, cf. 88^{1}). The poor man cried, and J″ heard him, and saved him out of all his troubles (34^{6}). He saves the upright ($37^{39.40}$), and such as be of a contrite spirit (34^{18}). He hears the cry of them that fear Him, and fulfils their desire (145^{19}). Whatever may be the true interpretation of many of the later Psalms, there can be no doubt that their tone was much influenced by this growing individualism. There is a sense of intimacy in relation to God, a confidence, a joy in trust in Him which can only be thus explained. Out of their own experiences in personal communion with God the writers have gained an insight into His tenderness and love which they transfer in thought to the nation. It is no accident that later ages have given an individualistic interpretation to psalms whose reference is clearly national. And if we do right, with many recent interpreters, to understand the suffering servant of Deutero-Isaiah, of Israel the nation, it was surely through some personal experience of affliction gladly borne for another's good that the prophet was raised to his sublime interpretation of the meaning of his people's deeper sufferings.

The crown of this individualism is reached in the doctrine of the resurrection, which unites in an unexpected way the conceptions of individual and of national salvation. In most of the OT, salvation is a conception which has meaning only for this life. There is indeed an existence after death, but it is gloomy and uneventful, without experience of God's mercy and grace. 'In death there is no remembrance of thee (God): in Sheol who shall give thee thanks?' (Ps 6^{5}). This earth is the scene of God's salvation, whether present or future; and even the glories of the Messianic age unroll themselves upon this platform, and will be enjoyed by those only who may be alive when the promised deliverance comes.

But with the growing sense of God's greatness and power came the conception that even the realm of the dead was under His control, and that the righteous who had died in distress might still hope after death to see the salvation of God. This hope, which appears in sporadic utterances in the Psalms (*e.g.* 49^{15} $73^{24.25}$), and finds classic expression in Job 19^{25-27} ('I know that my vindicator liveth,' etc.), culminates in the doctrine of individual resurrection, which meets us for the first time in Is 26^{19}, and is repeated in Dn 12^{1-3}.

But this growing individualism had a still more important consequence than in extending the range of the Divine salvation. It materially modified the idea of its nature. The conception of salvation with which we have thus far been dealing is, for all its ethical features, more or less external. It is deliverance from *the consequences of sin* rather than from *sin itself*. The prophets call upon men to repent and forsake their sins, that they may become worthy to receive the promised salvation. But with the deepening moral sense there comes the insight that even for repentance itself Divine help is needed, and the cry arises to God for a deliverance which shall include not merely the consequences of sin, but the very sin which has caused them. This new insight finds expression in such a prayer as that of the 51st Psalm: 'Create in me a clean heart, O God; and renew a firm spirit within me. Cast me not away from thy presence; and take not thy Holy Spirit from me. Restore unto me the joy of thy salvation; and uphold me with a willing spirit' (vv.$^{10-12}$). Here the salvation for which the Psalmist prays includes deliverance from sin as one of its elements (cf. Ps $130^{7.8}$ 'O Israel, hope in J″: for with J″ there is loving-kindness, and with him is plenteous redemption. And he shall redeem Israel from all his iniquities'; cf. Ps 39^{8} 79^{9}). It is the prophets of individualism, Jeremiah and Ezekiel, who give clearest expression to this idea of salvation as deliverance from sin. 'Behold, the days come, saith J″, that I will make a new covenant with the house of Israel. . . . But this is the covenant which I will make. . . . I will put my law in their inward parts, and in their heart will I write it; and I will be their God, and they shall be my people. And they shall teach no more every man his neighbour, and every man his brother, saying, Know J″: for all men shall know me, from the least of them unto the greatest of them, saith J″; for I will forgive their iniquity, and their sin will I remember no more' (Jer 31^{31-34}, cf. 33^{8}). 'And I will sprinkle clean water upon you, and ye shall be clean: from all your filthiness, and from all your idols, will I cleanse you. A new heart also will I give you, and a new spirit will I put within you: and I will take away the stony heart out of your flesh, and I will give you an heart of flesh. And I will put my spirit within you, and cause you to walk in my statutes, and ye shall keep my judgments, and do them . . . and I will save you from all your uncleannesses' (Ezk 36^{25-29}, cf. 37^{23}). Here we have a conception of salvation which goes deeper than any external deliverance. The great prophet of the Exile carries on the same line of thought. To him the chief blessing of the Messianic age is the forgiveness of sins. It is not Israel whose righteousness deserves the salvation of J″, but J″ who goes out after His erring children, to forgive and redeem them for His name's sake (Is 43^{22-25}; cf. 44^{22} $33^{22.24}$ 64^{6-9} $65^{1.2}$, Zec 3^{9} 13^{1}). In such passages we have a direct preparation for the profound conception of the NT.

2. *Between the Testaments.*—In the Apocalyptic and Pseudepigraphical literature of the Jews we find a further development of the tendencies already noted in the OT. Extending over a period of some three centuries, its earlier portion contemporaneous with the later parts of the OT, its later (*e.g.* Apoc. Baruch, 2 Esdras) with the NT, it bridges the gap between the two in thought as well as in time. This is especially true in connexion with our doctrine. In not a few places indeed 'salvation' is still used in the sense of present deliverance (*e.g.* Jth 8^{17}, Ep. of Jer 36). In general, however, the use of the word is eschatological. The expected salvation is that of the Messianic age, which, with the lapse of time, is conceived of in more and more transcendent manner. Where the earlier conception of an earthly kingdom still survives, it is usually in the form of a millennium or preliminary period of blessedness, preceding the final triumph which takes place in the other world. Side by side with this growing transcendence we note a further development of individualism. Not only has the

doctrine of the resurrection become a familiar article of faith, but the doctrine of rewards and punishments is extended to the period immediately after death. In some cases the hope of individual reward is associated with large expectations of the triumph of Israel, or extends even beyond this to take in the conversion of the Gentiles. In other cases (as in 2 Esdras) the writer despairs even of the conversion of Israel, and is fain to console himself with the thought that the righteous at least, even if few in number, shall at the last receive a glorious reward. Amid such a wealth and variety of material, we must confine our quotations to a few typical passages, referring the reader for fuller information on points of detail to the books which deal specially with the subject (see Literature at end of article).

In the Apocalyptic picture of the Messianic kingdom, the old and the new, the material and the spiritual, are blended in startling and unexpected combinations. Sometimes we seem to be breathing the atmosphere of the old prophets; at others we are repelled by the artificiality and unreality of the conception. Thus in the earliest portion of the Book of Enoch (1–36, dated by Charles B.C. 170) the picture of the future is crassly material. At the resurrection, the righteous eat of the tree of life (25^{4-6}), and as a result enjoy patriarchal lives (5^9 25^6). The scene of the Messianic kingdom is a purified earth (10^7 16^{22}), with Jerusalem for its centre (25^5). The blessings of the kingdom, in which the converted Gentiles share (10^{21}), are of a sensuous nature. The powers of nature are increased indefinitely. Thus the righteous will beget 1000 children (10^{17}); of all the seed that is sown each measure will bear 10,000 grains, and each measure of olives will yield ten presses of oil (10^{19}, cf. Apoc. Bar 29^5, and note of Charles, p. 54). The author of the Psalms of Solomon (B.C. 70–40), on the other hand, emphasizes the ethical features of the kingdom. He looks for a Messianic king of the lineage of David who shall break in pieces them that rule unjustly (17^{24}). He will be a righteous king, and taught of God (17^{35}), pure from sin, so that he may rule a mighty people (17^{41}). 'He shall purge Jerusalem, and make it holy even as it was in the days of old' (17^{33}). 'He shall not suffer iniquity to lodge in their midst; and none that knoweth wickedness shall dwell with them' (17^{29}). In both of these books the earth is the scene of the Messianic Kingdom and Jerusalem its centre. Elsewhere, however (*e.g.* Enoch 82–90. 91–104. 37–70, Assumption of Moses, Apoc. Baruch), we have a more transcendent view of the future. Thus the author of Enoch 82–90 sees a new Jerusalem taking the place of the old ($90^{28.\,29}$) and becoming the centre of a new community in which all the members shall be transformed into the image of the righteous Messiah (90^{38}). The author of Enoch 91–104 takes up the prophetic thought of a new heaven and a new earth, but develops it on the former side only (91^{16}). It is not earth but heaven which is to be the abode of the redeemed (104^2). 'Be hopeful,' he cries to his despondent readers, 'for aforetime ye were put to shame through ills and affliction; but soon ye will shine as the stars of heaven, ye will shine and ye will be seen, and the portals of heaven will be opened to you. . . . Be hopeful and cast not away your hope; for ye will have great joy as the angels of heaven. . . . And now fear not, ye righteous, when ye see the sinners growing strong and prospering in their ways, and be not like unto them, and have no companionship with them, but keep afar from their violence; for ye will become companions of the hosts of heaven' ($104^{2.\,4.\,6}$). Here we have the sharpest possible contrast between this world and that which is to come. The salvation of which the writer speaks has become purely otherworldly. A similar view-point meets us in the Assumption of Moses (cf. esp. $10^{8.\,9}$) and in the Slavonic Enoch (Paradise as the abode of the righteous; cf. 8. 9. $42^{3.\,5}$ 61^3 65^{10}), as well as in portions of the Apocalypse of Baruch (21^{19} 44^{9-15} 51^5 85).

The most striking example of this transcendent conception of salvation is found in the Similitudes of the Book of Enoch (37–70; Charles, B.C. 94–64). In this remarkable writing, which in many respects anticipates most clearly the NT conception of the glorified Christ, the Messiah is conceived of as a strictly supernatural being. Clothed with wisdom and righteousness, he sits on the throne of his glory (45^3) to judge all living beings, whether men or angels (49^4 51^2 55^4 62^3). By the word of his mouth he slays the wicked (62^2). Heaven and earth are transformed ($45^{4.\,5}$) and made fit for the dwelling of the redeemed community, whose members, clothed with life (62^{16}), resplendent with light (39^7), with faces shining with joy (51^5), become angels in heaven (51^4), and dwell in closest communion with their redeemer (62^{14}), in the glory of his eternal kingdom (49^2).

This passage is specially interesting because it puts the Messianic Kingdom in the world to come. The author knows only one salvation, even the eternal salvation of the new world. In other books, however, we have a different conception. The Messiah's Kingdom, which is of temporary duration, belongs to this world, not to the next. Thus the author of Enoch 91–104 looks for a millennial kingdom of three world-weeks preceding the transformation of nature which ushers in the new world (93^{3-10}). The same idea reappears in the Slavonic Enoch, Baruch, and 2 Esdras. For details see MILLENNIUM, where references and quotations are given. Doubtless this idea was the result of a compromise between the earlier and simpler view of salvation which placed it upon this earth, and that later and more transcendent conception whose growth we have been tracing. Whatever its origin, it was an idea which had wide currency, meeting us not only in Jewish but in early Christian literature as well, and being represented, within the NT itself, by the Millennium of the Apocalypse.

Side by side with this growing transcendence we note a further development of the individualistic tendency. This appears most clearly in connexion with the life after death. The doctrine of the resurrection, which in Isaiah and Daniel is applied to some men only, is further extended. While the older sceptical tendency still survives in Sadduceeism, the belief in a universal resurrection wins more and more adherents. With this change the character of the conception alters. Instead of exhausting its significance in connexion with the Messianic Kingdom as the means of entrance for the righteous upon joys which they could not otherwise enjoy, it becomes the channel of universal retribution. As the righteous rise to be blessed, so the wicked are raised that they may receive the recompense of their sins (beginnings in Dn 12^2; cf. also Enoch 22^{11} $51^{1.\,2}$, Apoc. Bar 30^{2-5} 50. 51, 2 Es 7^{32-37}; yet note that in many places resurrection is still only of the righteous, *e.g.* Enoch 90^{33} 91^{10} 92^3 100^5, Ps-Sol 3^{16} $14^{2\text{ff.}}$ $15^{13\text{ff.}}$: cf. on this whole subject Wendt, *Lehre Jesu*, ii. 45–49).

But the moralization of the life after death does not stop here. It extends also to the intermediate state. Little by little, Sheol loses its aspect of colourless monotony. It becomes the scene of preliminary rewards and punishments. It has its compartments where the wicked are kept separate from the righteous—the former in great pain, waiting the eternal judgment; the latter in a bright spot, where there is a spring of water (Enoch $22^{9.\,11}$; yet note that punishment is only for those who have died and been buried 'without incurring judgment in their lifetime,' ^{10}). In the Similitudes the elect are represented as dwelling in the garden of life (61^{12}, cf. 70^4 60^8 'the garden where the elect and righteous dwell, where my grandfather was taken up, the seventh from Adam'; 60^{23} 'the garden of the righteous'; 77^3 'the garden of righteousness'). This place of preliminary blessedness, at first tenanted only by Enoch and Elijah, afterwards by all the righteous (cf. 60^{8}), develops into the Paradise of NT times; see PARADISE. Thus side by side with the preliminary blessedness of the millennial kingdom we have the righteous enjoying foretastes of salvation in the life immediately after death.

The effect of this new view of the life after death was inevitably to diminish the relative importance of the final salvation. In those writings which, under Greek influence, developed the idea of immortality (*i.e.* Philo, Wisdom, 4 Maccabees), the doctrine of an intermediate state falls away altogether, and souls are represented as entering upon their final award at death (cf. Wis 3$^{1-4}$ 4$^{7-11}$, cf. v.^{14}, 4 Mac 13^{16} 5^{36} 18^{23}). Even where this is not the case, as in Slavonic Enoch, we find the tendency more and more to spiritualize the earlier conceptions. Resurrection is no longer a return to earthly conditions, but, as in 1 Corinthians, the putting on of a new organism fitted to the life of the heavenly kingdom (Enoch 22$^{8-10}$). Paradise is no longer the abode of the righteous in the intermediate state, from which they are raised to enter a higher state of blessedness, but the place of their eternal habitation (Apoc. Bar 51^{11}, 2 Es 8^{52}). Sheol is more and more identified with Gehenna as the place of final punishment of the wicked (Enoch 56^{8} 63^{10} 99^{11} 103^{7}, 2 Es 8^{53}), and loses its character as an intermediate abode of righteous and wicked alike. Thus more and more we note the tendency, which can be paralleled in Christian history, to break down the middle wall between the intermediate and final states, and to make death the real dividing line in human destiny.

A further evidence of the growing individualism is to be found in the definite abandonment, in certain quarters, of the hope of national restoration which had formed so prominent a feature of the prophetic anticipation. This appears most clearly in such late books as Apoc. Baruch and 2 Esdras.* In the earlier literature the national ideal still survives, and in many passages (*e.g.* Ps-Sol 17) finds beautiful expression. Even the hope of Gentile participation in the promised salvation is not without its representation (*e.g.* Enoch 10^{21} 90^{30}, Ps-Sol 17$^{32-35}$). It could not be otherwise with a people whose daily study had been the prophetic literature. But as time goes on and the kingdom does not come, we find men more and more losing sight of the larger aspects of the Divine salvation, and concentrating their thoughts upon the fate of individuals. The present world is abandoned to hopeless corruption (cf. Apoc. Bar 15^{8} 21^{13}), and the world to come belongs to the righteous, and to them alone (cf. Apoc. Bar 15^{8} 24$^{1.2}$, and esp. 2 Es 7$^{47-61}$). When the seer laments the sorrows of the wicked, and the small number of those who shall finally be saved, he is bidden to look away from them, and to consider the righteous, for whom alone God cares. 'For I will rejoice over the few that shall be saved, inasmuch as these are they that have made my glory now to prevail, and of whom my name is named. And I will not grieve over the multitude of them that perish; for these are they which are now like unto vapour and are become as flame and smoke; they are set on fire and burn hotly and are quenched' (2 Es 7$^{60.61}$ Charles' tr. in *Eschatology*, p. 292). Here we have the individualistic theodicy in its most extreme form.

No doubt this growing individualism had its good side. Within the OT itself we have already seen how it deepened the moral insight, and heightened the sense of personal responsibility. We find in the period in question the same stress on individual righteousness. But, on the other hand, we note also the tendency to conceive the whole matter of salvation in a more or less external and legal way. Salvation is the reward which God has promised to those who faithfully keep His law. The more difficult the achievement the greater God's delight in the result. This is specially apparent in the later books (cf. Apoc. Bar 51^{7} 'But those who have been saved by their works and to whom the law has been now a hope, and understanding an expectation, and wisdom a confidence, to them wonders will appear in their time'; 14^{7}, with Charles' note; 2 Es 9$^{7.8}$ 'And every one that shall be saved, and that shall be able to escape by his works and by faith whereby ye have believed, shall be preserved from the said perils, and shall see my salvation in my land and within my borders: for I have sanctified them for me from the beginning'; cf. 7^{77} 8^{33}). Here we find ourselves in that very atmosphere of work-righteousness which culminates in the Talmud, and against which the Gospel came as a protest.

Summing up the conceptions of salvation which we have met thus far, we find that they are four: (1) salvation in this life, in the sense of deliverance from present danger or trouble, especially from defeat in battle; (2) the salvation of the Messianic Kingdom, to be enjoyed by all the righteous who may be alive at the time, as well as by the risen saints; (3) salvation after death, in the sense of a preliminary foretaste, by the righteous, of the enjoyment of the age to come; (4) the final salvation of the heavenly world, when the present earth has been destroyed, and the period of corruption has come to an end. These different conceptions live on side by side, modifying one another in various ways, shading off into one another by almost imperceptible degrees, the old not displaced by the new, but transformed by it, and that in such subtle and gradual ways that it is often impossible to trace the separate steps of the process. Into such a world of thought, confused, changeful, yet rich with germs of fruitful and inspiring life, Jesus came with His Gospel of salvation.

3. *In the teaching of Jesus.*—The word 'salvation' (σωτηρία) is only twice used by Jesus—once in the conversation with Zacchæus (Lk 19^{9} 'To-day is salvation come to this house'), and again in the interview with the woman of Samaria (Jn 4^{22} 'Salvation is from the Jews'). But the verb σώζειν occurs frequently in His teaching. Often it is used to denote physical healing (*e.g.* Mt 9^{22}, Mk 3^{4} 5^{34} 10^{52}, Lk 6^{9} 8$^{48.50}$ 17^{19} 18^{42}). Elsewhere it has a broader meaning. Not to mention the well-known passages in John (5^{34} 10^{9} 12^{47}), He spoke of Himself as come 'to seek and to save that which was lost' (Lk 19^{10}, cf. Mt 18^{11}, Lk 9^{56}, both omitted by RV). Of the sinful woman who washed His feet in Simon's house He declared that her faith had saved her (Lk 7^{50}), and in more than one passage concerning the future of His Kingdom He uses the word σώζω in the same eschatological sense with which we are already familiar (Mt 10^{22} 24$^{13.22}$, cf. Mk 13$^{13.20}$). Salvation is indeed only the reverse side of that Gospel of the Kingdom which was the burden of His preaching. The two ideas may be used interchangeably, as appears from such passages as Mt 19$^{24.25}$, Mk 10$^{25.26}$, Lk 8$^{10.12}$ 13$^{23.28}$. If, then, we would understand Jesus' view of salvation, we must take our departure from His idea of the Kingdom.

But here we find ourselves involved in difficulties growing out of the criticism of the sources. These centre mainly about two points—(1) the relation of Jesus' teaching to that of His contemporaries; (2) the relation of His teaching to that of His successors.

(1) We have already noted the purely transcendent and eschatological form which the idea of the Kingdom had assumed

---

* It seems probable that both of these books in their present form are of composite authorship, the earlier portions, written before the destruction of Jerusalem, retaining the national Messianic hope, the later having definitely abandoned it. For the evidence in detail see Charles' edition of *Baruch*, and his *Eschatology*, p. 283 ff.

in contemporary Judaism. The question arises how far Jesus felt Himself in sympathy with this view. There are passages in the Synoptics, especially in the so-called Apocalypse of Jesus (Mk 13 and parall.), which have marked points of resemblance to the contemporary Apocalypses. The Kingdom is spoken of as purely future—a miraculous state to be ushered in by the Parousia of Jesus, and involving a sudden and complete transformation of the present order of things (cf. Mk 8^{38} 9^{1}, Mt 19^{28}, Lk 20$^{35.\ 36}$). What shall we think of these passages? Do they represent the genuine teaching of Jesus? and if so, are we to think of Him, with many recent scholars, as holding a point of view essentially the same as that of His contemporaries? or, following Weiffenbach, Wendt, and others, are we to regard these apocalyptic elements as later additions, derived from Jewish or Jewish-Christian sources, and therefore to be disregarded? or, finally, is it possible, without recourse to the theory of interpolation, so to interpret Jesus' eschatological teaching as to show its harmony with the deeper and more spiritual views elsewhere expressed? This is one class of questions now being actively discussed, a full answer to which seems necessary before it is possible adequately to set forth Jesus' doctrine of salvation.

(2) The other class of questions leads us into the criticism of the Fourth Gospel. Here it is the absence of the idea of the Kingdom which is most striking. In place of the Kingdom, the great gift which Jesus brings is eternal life, which is represented, not, as in the Synoptics, as a blessing to be enjoyed in the future (Mk 10^{30}), but as a present possession (5^{24} 6$^{40.\ 47.\ 53}$). When we hear the Christ of the Fourth Gospel saying, 'He that believeth hath eternal life' (6^{47}), we seem to be in a different world from that of the eschatological discourses of the Synoptics. It is the world of a St. Paul, who says, 'If any man is in Christ, he is a new creature' (2 Co 5^{17}); of a St. John, who writes, 'Whosoever shall confess that Jesus is the Son of God, God abideth in him and he in God' (1 Jn 4^{15}). Are we to believe that the same Christ spoke Mt 23 and Jn 14–16; and if so, how is their teaching to be reconciled?

Fortunately, we are not shut up for our view of Jesus' doctrine of salvation to the settlement of either of these disputed questions. There are enough perfectly plain and undisputed passages—apart from these—to give us a clear view of His central teaching. Possibly we may find, if we take our stand upon this more certain ground, that before we have finished we shall have gained light which will help us in the solution of the more difficult problems.

If we would understand our Lord's doctrine of salvation in its epoch-making significance, we must consider its relation to the views of His contemporaries. While it is true that Jesus fed His spirit upon the writings of the OT prophets, and drew thence many truths which His contemporaries had forgotten, it is no less true that He was also a man of His own time, and that His teaching was influenced, not merely negatively but positively, by the development whose main lines we have traced. We may illustrate this by a reference to the two points most prominent in the contemporary view of the kingdom—(*a*) its transcendence, and (*b*) its individualism.

(*a*) We are often tempted, because of the familiar human features in Jesus' teaching, to overlook its transcendent elements. Yet there can be no doubt that our Lord's conception of the Kingdom is distinctly supermundane. Whatever may be the origin of the phrase, 'Kingdom of heaven,' found only in the first evangelist, it cannot be denied that the idea was characteristic of Jesus. The Kingdom of which He is the Messiah belongs to a different and higher order from that which at present obtains. Its blessings are not earthly but heavenly. The evidence for this may be found in all parts of His teaching (cf. His promise, to the persecuted disciples, of reward in heaven, Mt 5^{12}, cf. Lk 10^{20} 'rejoice that your names are written in heaven'; the command to lay up treasures in heaven, Mt 6^{20}, cf. Mt 19^{21}, Mk 10^{21}, Lk 12^{21} 16^{11}; the parable of the Unjust Steward, Lk 16$^{1-13}$; the indifference which He showed Himself, and which He recommended to His disciples, with reference to this world's goods, Mt 6^{19}; the answer to the Sadducees about the resurrection, Lk 20$^{34-36}$; the answer to Pilate, Jn 18^{36} 'My Kingdom is not of this world'; as well as such distinctly eschatological passages as Mt 24^{30} 26^{64}). In view of such utterances, sharply contrasting the Kingdom, as belonging to the heavenly world, with all that is earthly, there can be no doubt that Jesus' conception stood in many respects closer to the transcendent views of His contemporaries than to the more earthly ideals of the earlier prophets.

And yet it is at this very point that the originality of Jesus' teaching is most clearly apparent. To the Jews of His day the transcendence of the Kingdom meant its removal from all contact with present life. Just because their ideal was essentially worldly, involving the hope of earthly triumph and prosperity, did they despair of its realization under existing conditions, and refer it wholly to the future. To Jesus, on the other hand, the Kingdom was in a true sense present already (Mt 12^{28}, Lk 11^{19}, cf. Lk 10^{18}, and comments of Holtzmann, *Neutest. Theol.* i. pp. 217, 218; Lk 17$^{20.\ 21}$ 'The Kingdom of God is within you,' or, 'in your midst'; also the references to those who are already in the Kingdom, Mt 11^{11}, cf. Lk 7^{28}, Mk 10^{15}, cf. Lk 18$^{16.\ 17}$, Mt 23^{13}, and esp. the parables of the Kingdom which represent it as a growth from small beginnings—so the sower, tares, mustard seed, leaven [Mt 13 and parall.], and esp. the seed growing secretly, Mk 4$^{26-29}$). Its transcendence is the transcendence of a higher spiritual order (Holtzmann, *l.c.* p. 190), which, so far from being inconsistent with earthly conditions, is destined to be realized in and through them. Thus Jesus instructs His disciples to pray for the doing of God's will on earth as it is in heaven (Mt 6^{10}), and declares that wherever men show the qualities and practise the traits which are characteristic of the heavenly world, there the Kingdom is present in germ (compare Mk 10^{14} with Mt 18^{4}).

The explanation of this change is to be found in Jesus' view of God. At no point had contemporary Judaism departed further from the doctrine of the OT. The idea of J″ as a living God, actively interested in human affairs, had given place to a conception purely transcendent. God was thought of as a being remote, inaccessible, mysterious, living in a distant and heavenly world, to be approached only through the mediation of the ceremonial law. In place of this purely transcendent being, Jesus proclaimed a loving Father, profoundly concerned in all that affects His children, watching their affairs with a tender interest, infinitely wise and great indeed, yet infinitely condescending, more ready to give good gifts than earthly fathers to their children (Mt 7^{11}), having a care for His universe so minute and detailed that not a sparrow falls to the ground without His notice (Mt 10^{29}). To Jesus, as to His contemporaries, God was supremely holy; but, unlike them, He did not hesitate to proclaim this holy God as the model for men's imitation (Mt 5^{48}). To Him this world was God's world, and hence, in spite of all its sin and misery, adapted to be the scene of the realization of His heavenly kingdom. It is in view of such conceptions of the relation of God and man that we must understand Jesus' teaching concerning salvation.

To be saved, according to our Lord, means simply to enter upon a life fitted to the children of such a Father—a life whose marks are righteousness, brotherly love, and, above all, trustful dependence upon God; a life only fully to be realized in the future, when the redeemed shall be released from earthly limitations, and enter the new conditions of the resurrection life (Lk 20$^{34-36}$), yet in a true sense possible even now for all those who, like Him, have learned to know God as their Father, and, through the life of self-denying service, have entered upon a blessedness which no earthly trial or misfortune can disturb.

So we find Jesus speaking of salvation as a present experience. To the sinful woman in the house of Simon He declares that her faith hath saved her, and bids her go in peace (Lk 7^{50}). To Zacchæus He says that this day is salvation come to his house (Lk 19^{9}). Even in the midst of this present life, with its sorrows and persecutions, the children of the Kingdom are constantly receiving good gifts from their heavenly Father (Mt 7^{11}). However much they may have given up they receive an hundredfold more (Mk 10^{30}). Through prayer they enter into daily communion with God, and receive the strength and help they need. They have the assurance that no evil can befall them when they put their trust in Him (Mt 6^{31-34}). For the earthly fellowship which they have sacrificed they receive a spiritual fellowship which is far more satisfying (Mk 10^{30} 3^{35}). From the bondage of the ceremonial law, with its intolerable yoke, they have entered upon the service of a Master whose burden is light (Mt 11^{30}). In the healing of the sick, and especially in the casting out of demons, which is a mark of their Master's ministry, they see the breaking down of Satan's kingdom, and the beginnings, even on earth, of the era of blessedness which is characteristic of the Kingdom of God (Lk 11^{20} 10^{18}).

It is in view of such a conception that we must understand Jesus' teaching in the eschatological discourses. Whatever may be our solution of the critical difficulties involved (for a full discussion see PAROUSIA), we may without hesitation reject the view of those who see in Jesus' teaching simply the echo of the ideas of contemporary Judaism. Our Lord's view of the Kingdom is so far eschatological that the complete fulfilment of the ideal which He preaches belongs to the future. But the ideal itself, as essentially moral and spiritual, has a present as well as a future application. To Jesus the hope of the Parousia meant the introduction of no new kind of salvation, but only the complete victory of the principles which He had illustrated in His own life, and whose embodiment, imperfect and yet real, in the little band of men whom He had gathered about Him, constituted the beginning of His Kingdom. It is indeed in its combination of present and future elements that the originality of Jesus' doctrine of salvation consists. Wendt has well expressed this in his *Teaching of Jesus* when he says that 'the epoch-making advance made by Jesus in His idea of salvation beyond that of the Psalmists and Prophets, as well as of the Jews of His time, consisted in the fact that He not only conceived the supreme ideal of salvation as purely supermundane and supersensuous,—a heavenly, not an earthly ideal,—but also that because of this determination of the ideal He gained a new view of the present world and of the earthly life—a view according to which it is possible for the devout to have even here and now, not merely a certain *hope* of salvation in the future, but also genuine *experiences* of salvation in the present' (ii. p. 187, Eng. tr., which, however, gives an inadequate rendering of the original, i. p. 241; cf. the whole passage).

In view of such considerations, the Johannine conception of eternal life as a present possession seems no longer foreign to Jesus' teaching. Whatever may be the ultimate decision of criticism as to the origin of the discourses in which the phrase occurs, there can be no doubt that the idea is one which accords well with what we learn from other sources of our Lord's doctrine of salvation. Wendt argues strongly for its genuineness on the ground that it is needed to account for the presence of similar ideas in the apostolic age (*Lehre Jesu*, ii. p. 198). But, even apart from this, some such conception seems required from what we know of Jesus Himself. Holtzmann is certainly not a critic who can be charged with any leaning to conservative views. Yet, speaking of the Synoptic teaching concerning eternal life 'as gift and good of the future age,' he writes (*Neutest. Theol.* i. 222): 'Yet it (*i.e.* eternal life) is not thought of as a merely formal definition which can be filled up with any content which the imagination may choose to give it. On the contrary, it is a possession of the present, already well known, which has been projected into the future. The highest and most intense feeling of existence—a feeling of incomparable power and richness of content (*unvergleichlich kraft-und gehaltvolles Daseinsgefühl*) without the slightest trace of twilight or mortality, of dull, hollow finiteness,—this is Jesus' conception of life and blessedness. Such a thought could be entertained only by one who Himself possessed the thing. In this sense He must have already borne the Kingdom of God as an inner good within Himself, must have known it as already present on the ground of His own experience. And not only so; but wherever His Gospel is preached in the world, wherever the Spirit of God is manifest either in miraculous power or in the hearts of men, wherever, in the sense of the parables, seeds spring up and fruits ripen, there also—with the righteousness which makes out the content of the Kingdom—the Kingdom itself is already present.'

(*b*) But we shall not fully understand the originality of Jesus' doctrine of salvation until we have considered it at the other point where it is most natural to compare it with that of His contemporaries, *i.e.* its individualism. We have already studied the growth of the individualistic tendency in the later Judaism, and seen its effects in subordinating the conception of national to that of individual righteousness, and in extending the doctrine of retribution from this life to that after death. Here, too, we find points of contact in Jesus' teaching. He also insists strongly upon the necessity of individual righteousness. Most of His time is spent in dealing with individual men, and the conditions which He lays down for entrance to His Kingdom are such that each man must fulfil them for himself. So in His view of the life after death Jesus accepts the results of the intermediate development. Sheol has altogether lost its character of colourless monotony. Death involves no interruption in the communion of the individual with God. Abraham, Isaac, and Jacob are even now enjoying a resurrection life with God (Lk $20^{37.\,38}$); Lazarus passes at once from this world into Abraham's bosom (Lk 16^{22}); and to the dying thief on the cross the promise is made that this day he shall be with his Master in Paradise (Lk 23^{43}).

And yet it is just in His dealing with individual men that the contrast of Jesus' view of salvation to that of His contemporaries is most apparent. To the Pharisees of His day salvation was the reward of righteousness. And the righteous man was he who perfectly conformed his life to the requirements of the ceremonial law. It is difficult for us to appreciate the nature of these demands not only upon a man's good-will, but upon his time and upon his means. As Holtzmann has well shown (*l.c.* i. 132 ff.), it was impossible for a man of moderate means to be righteous in the full legal sense, without sacrificing all hope of worldly prosperity. A rich man might indeed keep the law. A few less blessed with this world's goods—the so-called 'poor' of the later Jewish literature—had the courage to make the needed sacrifice. For the most part men felt the burden too heavy, and were content to live as they could, without part in the hopes and ideals of their religious teachers, despised by them as sinners and outcasts, without share in the Divine favour or interest in the Divine salvation. (Cf. Jn 7^{49} 'This multitude which knoweth not the law are accursed,' and especially 2 Es $7^{51.\,52.\,59-61}$).

It was exactly to this company of outcasts, the poor and despised in Israel, that Jesus directed His preaching (Lk $4^{18.\,19}$, Mt 11^{5}, Lk 7^{22}; cf. the beatitudes of the Sermon on the Mount, Mt 5^{3-11} and parall. Lk 6^{20-23}). He said of Himself that He was come to seek and to save the lost (Lk 19^{10}). He called sinners to repentance (Mk 2^{17}, Mt 9^{13}, Lk 5^{32}). He declared that there is more joy in heaven over one sinner that repenteth than over ninety and nine just persons that need no repentance (Lk $15^{7.\,10}$). He ate and drank with publicans and sinners (Mk 2^{16}), and declared to the self-righteous Pharisees that the publicans and harlots were entering into the Kingdom of heaven before them (Mt 21^{31}). He swept away the burdensome requirements of the ceremonial law, and invited men to the service of a Master whose yoke was easy and whose burden was light (Mt $11^{29.\,30}$). He made the conditions of entrance to His kingdom humility, trustfulness, the childlike spirit (Mt 5^{3} $18^{3.\,4}$). In place of a God who cared only for a spiritual aristocracy, whose pleasure it was to make hard conditions that He might increase the value of the few who were saved (2 Es $7^{59.\,60}$), He proclaimed a compassionate and loving Father, willing to receive back the returning prodigal upon the first evidence of repentance (Lk 15^{20}). He revived the forgotten prophetic doctrine of the Divine forgiveness, and made the chief blessing of His Kingdom to consist in the remission of sins (Mt 26^{28}, cf. Mk 2^{10}).

This is the explanation of the universalism of Jesus. A Gospel for the sinful knows no race limitations. A Messiah who felt Himself specially sent to the lost sheep of the house of Israel (Mt 15^{24}), Jew though He might be, could not turn away from humble penitence, wherever found. The Samaritan (Jn 4^{7}, Lk 17^{16}; cf. 10^{33}), the Syrophœnician (Mk 7^{26}), even the Roman (Mt 8^{10}), shared His blessing and His praise. The teaching of the Fourth Gospel concerning the other sheep not of the Jewish fold (10^{16}), and the hour when men shall no longer worship the Father either in Jerusalem or on Mt. Gerizim (4^{21}), is the legitimate outcome of the principles on which Jesus regularly acted. The Messiah of the Jews showed Himself to be in very truth the Saviour of the world.

There is still another point in which the teaching of Jesus differs radically from that of His contemporaries: this is in the emphasis He lays on the principle of service. Here the individualism of which we have spoken receives its needed complement. Men are saved one by one, each for himself; but they are saved that they may serve. As members of the Kingdom, it is their duty and their privilege to minister to one another's needs. Freely forgiven by the heavenly Father, they also are to forgive one another (Mt 18$^{21-35}$). He that would be greatest in the Kingdom of Christ must show himself servant of all (Lk 22^{26}, cf. Jn 13^{14}). He that would save his life must be willing to lose it (Mt 16^{25}, Mk 8^{35}, Lk 9^{24}; cf. 17^{33}). We unduly limit this sentence if we understand it simply of the conditions of entrance to the Kingdom. It expresses the law of the Kingdom all the way through, the law, namely, of self-realization through self-sacrifice.

In this connexion we find our Lord reviving another forgotten OT truth. When the great prophet of the Exile first proclaimed the doctrine of salvation through the vicarious sacrifice of the good, he found few hearers (cf. Is 53^{1} 'Who hath believed our report?'). The connexion of salvation with prosperity had been too long and too close to make the new teaching intelligible. In the succeeding centuries it fell altogether into the background. Our Lord reasserts it, and applies it to Himself. He compares Himself to the good shepherd who lays down his life for the sheep (Jn 10^{11}). He declares that He is come to give His life a ransom for many (Mk 10^{45}). He compares His death to a covenant sacrifice, sealing the new relationship between His disciples and God (Mt 26^{28}). The crucifixion and rejection which seemed to His disciples to mark the failure of His mission had no such meaning to Him. They were but a necessary step in His redeeming work. The reproachful word of His enemies had a deeper meaning than they knew. He saved others; Himself He could not save (Mt 27^{42}, Lk 23^{35}, Mk 15^{30}). And the principles which He applies to Himself He extends also to His disciples. Looking forward to their approaching persecutions, He bids them not be dismayed, since if they would enter into His glory they must drink His cup (Mt 20^{23}, cf. 5$^{10-12}$). Thus suffering and death, which in earlier times had seemed the direct opposite of salvation, are shown by our Lord to have a necessary part to play in bringing it about.

Summing up our Lord's teaching concerning salvation, we may say that it is deliverance from sin through entrance upon a new Divine life. The marks of this life are humility, brotherly service, and filial dependence upon God. In the practice of these traits consists the righteousness of the Kingdom, and in their experience its blessedness. This new Divine life, which is mediated not merely by the teaching and example of Christ but by His sufferings and death, begins here, continues unbroken in the life after death, and will be finally consummated at the Parousia, when the principles of Christ shall be everywhere accepted, and the will of God be done on earth even as it is done in heaven.

4. *In the New Testament.*—The salvation brought by Jesus is the theme of the entire apostolic age. Wherever we turn in the NT, whether it be Acts, Hebrews, St. Paul or St. John, we are conscious of a note of confidence and triumph, as of men possessing a supreme good, in which they not only themselves rejoice, but which they are anxious to share with others. More significant than any change in doctrine is this consciousness of salvation as a glorious fact, dominating and transforming life. None the less is it true that on this common basis we note differences of conception. Not all the disciples grasped the teaching of Jesus with equal clearness. In not a few parts of the NT we find survivals of earlier Jewish ideas and sympathies (*e.g.* Ac 1^{6}, Rev 7$^{4-8}$ etc.). So the degree of theological development varies greatly (cf. the speeches in Acts with Romans). Under the circumstances there is need of discrimination. We shall begin our treatment with a brief survey of the common features of the apostolic teaching, and then pass on to describe the more distinctly theological views of St. Paul and St. John.

(*a*) *In general.*—The central theme of the apostolic preaching is the proclamation of Jesus as Saviour. Cf. Ac 5$^{30.\,31}$ 'The God of our fathers raised up Jesus, whom ye slew, hanging him on a tree. Him did God exalt to be a Prince and a Saviour, to give repentance to Israel, and remission of sins' (cf. Mt 1^{21}, Jn 3^{17}, Ac 2^{21} 4^{12} 13^{23} 15^{11}, Eph (5^{23}, Ph 3^{20}, 2 Ti 1^{10}, Tit 1^{4} 2^{13} 3^{6}, 2 P 1$^{1.\,11}$ 2^{20} 3$^{2.\,18}$, 1 Jn 4^{14}, He 2^{10} Jesus as author of salvation). 'Salvation' has become a technical term which sums up all the blessings brought by the Gospel (cf. Eph 1^{13} 'the Gospel of your salvation'; 1 Co 15$^{1.\,2}$ 'the Gospel . . . by which ye are saved'; Ac 13^{26} 'the word of this salvation'; cf. v.^{47} 16^{17} 'the way of salvation'; 28^{28}, Ro 1^{16} 'the power of God unto salvation'; 10^{10} 'confession unto salvation'; 11^{11}, 2 Co 7^{10} 'repentance unto salvation'; 2 Ti 3^{15} 'able to make wise unto salvation'; He 6^{9} 'things that accompany salvation'; Jude ^{3} 'our common salvation'; Tit 2^{11} 'the grace of God, bringing salvation'; cf. 1 Ti 2$^{3.\,4}$ 'God . . . who would have all men to be saved, and come to a knowledge of the truth'). In contrast to all previous deliverances of God (He 1$^{1.\,2}$), the fulfilment of that for which the OT prophets looked (1 P 1$^{10-12}$), the earnest of the age which is even now at the door (Ac 2$^{16.\,17}$ the pouring out of the Spirit as fulfilment of the prophecy of Joel), is the great deliverance which God has wrought through His Son. Jesus is not only Saviour; He is the only Saviour. The stone which the builders set at nought has been made head of the corner (Ac 4^{11}). 'And in none other is there salvation; for neither is there any other name under heaven that is given among men, wherein we must be saved' (Ac 4^{12}).

In strict conformity with the teaching of Jesus, salvation is represented primarily as deliverance from sin. Our Lord is called *Jesus* because He 'shall save his people from their sins' (Mt 1^{21}). He 'came into the world to save sinners' (1 Ti 1^{15}). The blessings of His kingdom are repentance (Ac 5^{11} 11^{18}, cf. 20^{21}) and remission of sins (Ac 2^{38}, cf. 3^{19} 5^{31} 10^{43} 13^{38} 26^{18}, and esp. 3^{26} 'Unto you first God, having raised up his Servant, sent him to bless you, in turning away every one of you from your iniquities'). So the Apocalypse begins with a song of praise 'unto him that loveth us, and loosed us from our sins by his blood' (1^{5}). As death is the consequence and penalty of sin, salvation is at the same time deliverance from death

(He 5^{7}, cf. 2^{14}, Ja 5^{20}, cf. 4^{12} 'he who is able to save and to destroy'; 2 Ti 1^{10} 'our Saviour Jesus Christ, who abolished death, and brought life and incorruption to light through the Gospel'), and from the wrath of God, of which death is the judicial consequence (cf. Ro 5^{9} with 1^{32}). More particularly with reference to the individual, in contrast to the cosmic salvation taught by St. Paul (Ro 8^{21}), it is called salvation of the soul (1 P $1^{9.\ 10}$, Ja 1^{21}, He 10^{39}). In its wider relations it is a salvation of the world (Jn 3^{17}, 1 Jn 4^{14}).

Common also to the entire NT is the stress laid upon the sufferings and death of Christ as mediating salvation. The cross which had been such a staggering blow to the disciples' faith at the first (Lk $24^{20.\ 21}$), and which still remained a stumbling-block to Jews and foolishness to Greeks (1 Co 1^{23}), is now seen to have a necessary part to play in Christ's saving work (He $2^{9\text{ff.}}$ $5^{8.\ 9}$ 12^{2}, 1 Co 1^{18}, 1 P $1^{18.\ 19}$, Rev 1^{5}, Ac 2^{23} 20^{28}, Lk 24^{26}), and is interpreted in the light of Is 53 (Ac 8^{32}, 1 P $2^{21\text{-}24}$. Cf. also the title 'lamb' in Rev $5^{6.\ 9}$ $7^{9.\ 10}$) as the fulfilment of prophecy (Lk 24^{27}, Ac 3^{18}, 1 Co 15^{3}). As a result of this new view of Christ's death, we find the NT writers without exception rising to a new conception of the meaning of suffering (Ac 5^{41} 9^{16}, 2 Co 1^{6}, Ph $1^{19.\ 28}$, He 5^{9} 13^{13}, 1 P 1^{7}, Ja 1^{2}, Rev 7^{14}), and applying to their own experiences of sorrow and temptation a standard which they have learned from Jesus Christ (1 P 2^{21}, He 13^{13}, 2 Co 1^{6} $4^{8\text{-}11}$; cf. 1 Co $4^{10\text{-}13}$, Col 1^{24}).

If we compare the NT teaching as a whole with that of Jesus, we note a greater stress upon the eschatological element. This is true not only of the Apocalypse and of the early discourses in the Acts, where the Parousia is the centre of interest (cf. Ac $3^{20.\ 21}$), but also of such writings as James (cf. 5^{8} with 1^{12}), Hebrews, and 1 Peter, as well as the Epistles of St. Paul (cf. esp. Thess. and 1 Co 15). In Hebrews the word 'salvation' is used in a purely eschatological sense (*e.g.* He 9^{28} 'Christ, having been once offered up to bear the sins of many, shall appear a second time, apart from sin, to them that wait for him, unto salvation'; cf. 1^{14} 2^{3} 2^{10} 5^{9} 6^{9}). The same is frequently the case in 1 Peter (*e.g.* $1^{5.\ 9.\ 10}$ 'a salvation ready to be revealed at the last time,' 'the end of your faith, even the salvation of your souls,' but cf. 3^{21}), and in the letters of St. Paul (*e.g.* Ro 13^{11} 'Now is salvation nearer to us than when we believed'; cf. 5^{10}, 1 Co 3^{15} 5^{5}, 2 Ti 4^{18}). The early Christians, almost without exception, felt themselves living at the end of the ages (1 Co 10^{11}), and looked at any moment for the return of their Master to set up His heavenly Kingdom (see PAROUSIA). Doubtless the resurrection experiences had much to do with this. The revelation of Jesus in glory, the assurance that He was even now sitting at the right hand of the Father, tended to emphasize the transcendent elements in His teaching, and to magnify the contrast between this present evil age and that which was to come. Thus St. Peter in Acts urges his hearers to save themselves from this crooked generation (Ac 2^{40}), and St. Paul declares that if in this world only Christians have hope in Christ, they are of all men most pitiable (1 Co 15^{19}). The contrast in both these passages, unlike that involved in the Johannine doctrine of the world, of which we shall speak presently, is a temporal one. The time of present distress is set over against that of future glory. At the great day of the Parousia, which is impending, there is to be a transformation of the universe (Ro 8^{21}, 1 Co 7^{31}), new heavens and a new earth (Rev 21^{1}), and believers, with their risen brethren who have gone before (1 Th 4^{15}), shall be clothed with heavenly bodies (1 Co $15^{47\text{-}49}$), and enter upon an existence adapted—as the present cannot be—to the enjoyment and practice of the spiritual life (Ro 8^{23}, cf. v.^{11}).

It is at this point that we note the closest contact with the ideas of contemporary Judaism. Coming to Christianity from an atmosphere charged with the hope of earthly, even if of superhuman prosperity, it was impossible but that the disciples should show some traces of their early training. The letters of St. Paul show us what a struggle it took before Christianity freed itself from the yoke of Jewish legalism. Not dissimilar was the relation to the eschatological ideas of Judaism. The thoughts of the early Christians clothed themselves naturally in imagery taken from the Jewish apocalyptic books. They looked for a heavenly Jerusalem (Rev $21^{2\text{ff.}}$, cf. also He 12^{22}, Gal 4^{26}), with its streets of gold and its gates of pearl, and did not resign without a struggle the hope of a millennial Kingdom on earth anticipating and preparing the way for the joys of the heavenly Kingdom (see MILLENNIUM). The Apocalypse introduces us most deeply into this world of Jewish-Christian thought, which, however, has left its traces in other books of the NT (*e.g.* 2 P, Jude), and is not wholly absent even from him who did the most to overcome it—the Apostle Paul (*e.g.* Gal 4^{26}, 2 Co 2^{3}).

And yet it is easy to exaggerate the extent of this influence. In spite of all the points of contact with Judaism, the early Christians lived in a new world. To them as to their Master salvation was a new life (Ac 2^{28}, cf. 3^{15} 11^{18}), entered upon by repentance and faith. It was a life of forgiven sin, of filial trust, of brotherly service, of present communion with Christ. If the full enjoyment of the promised salvation still lay in the future, they were yet not without experience of Christ's present blessing and help. In the miracles of healing and deliverance which characterized the opening days of the Church (Ac 3^{16}); above all, in the presence and power of the Holy Ghost (Ac 2^{16} 4^{31} 10^{44}), they saw the pledge of their Saviour's power and rule. The sanctification without which no man shall see the Lord (He 12^{14}) was not only the ideal, but to a large extent a characteristic of their daily living. The social joys of the Kingdom were anticipated in daily communion with the brethren (Ac $2^{46.\ 47}$). Thus the life experiences of the early Christians, even as revealed in such books as Acts, are truer to the teaching of their Master than a superficial study of the use of such theological terms as 'salvation' and 'kingdom' would seem to indicate. Much more shall we find this the case when we pass to the more developed conceptions of St. Paul and St. John.

(*b*) *St. Paul.*—We have already touched upon the points which the teaching of St. Paul shares with the rest of the NT—the conception of salvation as deliverance from sin, the emphasis upon the mediation of Jesus, and especially upon the significance of His death, the importance given to the eschatological element, the Jewish dress in which many of his ideas are clothed. Some interpreters have indeed carried the relation to Judaism so far as to contend that St. Paul was a chiliast, distinguishing, on the ground of 1 Co $15^{23.\ 24}$, an earlier resurrection of believers from the later and general resurrection (see PAROUSIA). But this view cannot be successfully maintained. So far as the resurrection is concerned, St. Paul's ideas are as far as possible removed from the crass materialism which characterized the thought of many of his contemporaries (cf. 1 Co 15^{37} 'That which thou sowest, thou sowest not that body that shall be,' etc.), and the salvation of the Parousia, which, unlike the coming in Rev 19, introduces the final blessedness of the saints, is only the working out to their full completion of principles and forces already active in this present life. Indeed the conception of salvation as a present experience is characteristic of all St. Paul's teaching, and gives it its chief significance.

To appreciate St. Paul's doctrine of salvation, we must set it against the background of his view of the *flesh.* Whatever be the exact interpretation given to the term; whether, with Holsten, it be understood metaphysically, as implying, on St. Paul's part, a dualistic view of the universe, or, with most interpreters, be regarded simply as the synonym for corrupt human nature, there can be no doubt that, to St. Paul, mankind as a whole is the prey of a power of evil which it cannot resist, and from which it is unable to escape. From Adam downwards all men have sinned, and come short of the glory of God (Ro 3^{23}). Being sinful, they are exposed to the curse of the law, and to the death which is the inevitable consequence and penalty of broken law. The glory of Christ's salvation consists in the fact that it delivers man from this sinful flesh, and so at the same time from the law which is its judge, and the death which is its penal consequence.

Thus salvation, while a single process, involves different elements, and may be looked at from different points of view. In the first place (or, to be more accurate, in the last place), it involves deliverance from death. To St. Paul, as to the other apostles, salvation is so far an eschatological conception, that its full effects will be apparent only at the Parousia. In that great day, when the terrors of the Divine wrath shall be revealed from heaven 'upon every soul of man that worketh evil' (Ro 2^{9}, cf. 1^{18}), Christians shall be safe. The Parousia, which to others is a day of death (2 Th 1^{9} 'who shall suffer punishment, even eternal destruction from the face of the Lord and from the glory of his might'), is to usher them into the presence of their long-expected Saviour. With the risen saints, who have died before them, they shall be caught up to meet the Lord in the air (1 Th 4^{17}), and, freed from the last trace of the flesh which has hitherto hampered them (1 Co 15^{50-52}), shall enter into the joys of His heavenly kingdom. It is this glorious experience—still in the future—to which St. Paul refers when he uses salvation as an eschatological term (*e.g.* Ro 13^{11}).

But salvation is not merely deliverance from future punishment. It includes also freedom from sin as a present power. Indeed it is this present deliverance which alone makes the future possible. Through union with Christ, the believer has become a new creature (2 Co 5^{17}). He has died to sin (Ro 6^{2}), crucified the flesh, with the passions and the lusts thereof (Gal 5^{24}), and entered upon a new spiritual life of righteousness, peace, and joy (Ro 14^{17}). Already he is a saved man (Ro 8^{24}, 1 Co 1^{18}, 2 Co 2^{15}), reconciled with God (Ro 5^{1}), claiming and receiving the privileges of a son (Ro $8^{14.15}$), rejoicing in daily experiences of a Father's grace, knowing how to glory even in tribulations (Ro 5^{3}), since he has learned that all things work together for good to them that love God (Ro 8^{28}). No doubt he still has his conflict with evil. But the conflict is no longer a discouraging one. Whereas he once felt himself the slave of the flesh, sold under sin (Ro 7^{14}), now he knows himself to be its master. The law of the spirit of life in Christ Jesus has made him free from the law of sin and of death (Ro 8^{2}). And the day is coming when, through the transformation of his body, he shall be freed from whatever defiling contact still remains (Ro 8^{23}).

Being freed from sin, the Christian is also free from law. Law has authority only over the sinner; but the man who through union with Christ has entered upon a new life in the spirit is free from law (Ro 6^{14} 7^{6} 10^{4}). He is not only delivered from the fear of its punishment, but—what is more important—he has exchanged the bondage of its requirements for the freedom of the new man in Christ Jesus (Col 2^{14}, Gal $5^{1.13.18}$). In place of the spirit of fear he has received the spirit of adoption, whereby he cries, 'Abba, Father' (Ro 8^{15}). Knowing himself to be heir of all things, he refuses to be entangled again with the beggarly rudiments of ritual prescription under which he was once held in bondage (Gal $4^{3.9}$, Col 2^{20}). As a Christian he lives on a higher plane, and breathes a different atmosphere from that of work-righteousness, however earnest (Ro $3^{20.21}$, Gal 3^{2-7}). Thus the break with legalism, practically begun by Jesus' teaching concerning the childlike spirit, is theoretically completed by the Pauline doctrine of a justification or righteousness by faith instead of by works.

With the mention of faith we touch the heart of St. Paul's doctrine of salvation. We are saved by faith. And faith, to St. Paul, means more than belief. It is more even than trust. It is an act of the will by which the believer so lays hold upon Christ that he actually becomes partaker of His risen and triumphant life (Eph 3^{17}, Gal $3^{26.27}$, Ro 11^{20}, Col $2^{11.12}$ 3^{1-4}; cf. McGiffert, *Apostolic Age*, pp. 141, 142). For the Christ whom St. Paul knows as mediator of salvation is more than man, even the best of men; more even than the Jewish Messiah, great as are his prerogatives. He is a pre-existent Divine Being, coming into the world from a higher realm, and imparting to those who are subject to the law of sin and death the new spiritual vitality without which deliverance is hopeless.

This doctrine of Christ as the incarnation of a pre-existent Divine Being, which is common to St. Paul, the writer to the Hebrews, and St. John, gave Christianity its chief point of contact with contemporary Greek thought, and formed the bridge by which men naturally passed from the latter to the former. But with all recognition of the points of similarity between the Logos doctrine of the Alexandrian philosophers and the NT teaching concerning the pre-existent Christ there is one point of difference, whose importance cannot be overestimated. The interest of the one is cosmological; it grows out of a desire to understand the world. The interest of the other is soteriological; it springs from the need of deliverance from sin. To St. Paul, helpless under the burden of the flesh, finding that, when he would do good, evil is present with him, seeking in vain for a deliverer from his intolerable bondage,—to St. Paul, we repeat, the significance of the heavenly Man, revealed to him in the experience of the Damascus road, consists in the fact that He is a life-giving spirit (1 Co 15^{45}).

We are ready now to understand the significance of the death of Christ. It is the means by which He gains the victory over the flesh and enters upon the new resurrection life. No merely forensic conception can do justice to St. Paul's thought at this point. It is not a matter primarily of guilt or of penalty. In sin he sees a power of evil, working out its own deadly and inevitable fruits. Christ took to Himself this sinful flesh, and let it work out upon Himself its natural consequences. He submitted to death, which is the rightful wages of sin, in its most aggravated and shocking form. In the striking words of Gal 3^{13} He became 'a curse for us: for it is written, Cursed is every one that hangeth on a tree.' But the death, which to an ordinary man would have ended everything, was to Him simply the door through which He passed into the higher life of the heavenly Kingdom. Being sinless, it was impossible for Him to be holden of death. Rising from the grave in newness of life, He opens the way for like escape to all who through faith in Him become partakers of His Divine and heavenly life.

No one can understand the Pauline doctrine of salvation who does not conceive it primarily as present union with the Divine and glorified Christ. What our Lord has once done on the great theatre of the universe, that each individual Christian is to repeat on the lesser stage of his earthly life. He, too, must die to sin (Ro 6^{2}) and rise to righteousness (Ro $6^{5.6}$). He, too, must share the sufferings of Christ (Col 1^{24}), and sit with Him in heavenly places (Eph 2^{6}). The life which he lives is to be no longer his, but that of the Christ who liveth in him (Gal 2^{20}). Old things have passed away, and all things are become new (2 Co 5^{17}). Thus already here and now the Christian anticipates the blessings, whose full realization remains for the Parousia. Nothing can separate him from the love of Christ—neither death nor life, nor angels nor principalities, nor things present nor things to come (Ro $8^{38.39}$). If he die before the Parousia, it matters not. Though to live be Christ, to die is gain, for dying means departing to be with Christ, which is very far better (Ph 1^{23}, cf. 2 Co 5^{8} 'absent from the body, at home with the Lord').

It is clear that from such a point of view the significance of the Parousia is very different from that which it has in Jewish-Christian thought. To St. Paul it is not necessary to wait until the Second Coming before one can enjoy the salvation of Christ. His greatest blessing has been given already. The Spirit who shall one day quicken our mortal bodies already dwells within us as a transforming power (Ro 8^{11}), and the redemption of the body for which we still groan (Ro 8^{23}) will only give free play to spiritual forces, with the working of which we are already familiar. Thus we see that here also, as well as in his doctrine of righteousness by faith, the teaching of the apostle is true to the new insight of the Master.

Two points still need brief mention before we leave the Pauline teaching. These are: (α) The emphasis which he lays on the social side of salvation; (β) his doctrine of a cosmic salvation.

(α) Nothing is more striking, in view of the intense personal independence of St. Paul, than the stress which he lays upon the social side of salvation. This comes out most clearly in his doctrine of the Church—a conception which takes the place in his teaching of the present Kingdom of the parables. Through union with Christ a man is not only joined to his Master as an individual, but becomes a member of His body, the Church (Eph 1^{23}). The new Divine life which he enjoys is shared by his brothers and sisters of the Christian family. The gifts which he receives are for the purpose of ministering to their necessities

(Eph $4^{11.12}$). If he suffers, they suffer with him (1 Co 12^{26}); if he is honoured, they are partakers of his joy (1 Co 12^{26}). The end of all is the building up of the Christian community in the knowledge and love of Christ (Eph $4^{13.16}$), and the reward for which the apostle looks at the Parousia is the presence of his converts among the company of the redeemed, spiritually fitted, because of his ministry, to enter upon the enjoyment of the heavenly kingdom (1 Th 2^{19}, cf. 1 Co 1^{14}).

It is not strange that, holding such views, we see the apostle looking upon all history as a training school for the Divine salvation (Ro 9–11), and hoping for the day when even his fellow-Israelites, who have thus far turned a deaf ear to the message of the Gospel, shall repent and become partakers of its blessings (Ro 11^{26}).

(*β*) But the apostle's view reaches out beyond this earth, and takes in the universe as a whole. He sees the whole creation groaning and travailing together in pain until now, waiting till it be delivered from the bondage of corruption into the liberty of the glory of the children of God (Ro 8^{21}). He looks upon Christ as the mediator of a salvation truly cosmic, and declares that it is God's purpose 'through him to reconcile all things unto himself, whether things upon the earth or things in the heavens' (Col 1^{20}, cf. Eph 1^{10}). Thus, according to St. Paul, the salvation in which we here share is only part of a great world process whose end shall be a universe redeemed (cf. 1 Co 15^{28}).

The teaching of St. Paul had a profound influence upon his contemporaries. We see its effect most clearly in 1 Peter, which, in spite of the emphasis it lays upon the future (1 P 1^{5}), has the conception of salvation as a present experience (3^{21}, cf. also 1^{23} 2^{16} 4^{1}). And yet it is easy to overestimate it. Other influences were at work in the early Church. The legal conception of religion which characterized the Jew was reinforced by similar conceptions which had their origin on Gentile soil. The view of salvation as freedom from law through the possession of a present spiritual life was not fully adopted even by many who in other respects were profoundly influenced by St. Paul. The letter to the Hebrews is a case in point. Here, as we have seen, the point of view is almost wholly eschatological. Salvation is conceived as a reward promised to those who remain faithful under their present trials, and faith, instead of being vital union with a present Christ, is simply the assurance that God will keep His word (He 11^{1}). In this respect the letter to the Hebrews is typical of the future. When we study the Christianity of the Fathers we find the Gospel often presented as a new law, and salvation, which is wholly future, is the reward promised by God to those who keep it. The doctrine of a mystic union with Christ through faith tends more and more to fall into the background, only to be revived in a sacramentarian form, foreign to the Pauline teaching. This fact must be borne in mind if we would appreciate the full significance of the Johannine conception of salvation.

(*c*) *St. John.*—We have already referred to the problem raised by the passages in the Fourth Gospel which speak of eternal life as a present possession, and given reasons for believing that they truly represent the teaching of Jesus. But however much we may be convinced of the historic foundation of the discourses, there can be no doubt that, in their present form at least, they show traces of the reflexion of the evangelist. The connexion between the Gospel and the Epistle is too close to be overlooked. This connexion is evident in thought as well as in language. In both we have a single conception, clear-cut, uniform, consistent. We have to do with a form of teaching which may be contrasted with other parts of the NT as belonging to a distinct type. In presenting the Johannine teaching, therefore, we follow most recent scholars in using both Gospel and Epistles as sources.

In St. John the conception of salvation as a present spiritual experience reaches its culmination. There are indeed traces of the more common eschatological conception, esp. in the First Epistle (*e.g.* $2^{18.28}$ 3^{2} 4^{17}; cf. Jn 5^{28} $6^{44.54}$ 21^{22}), but they hold a comparatively subordinate place. Salvation is represented, as in the Synoptics, as eternal life. But for this life a man need not wait till the Parousia. It is already the possession of all who believe on Christ. He that hears Christ's word, and believeth Him that sent Him, 'hath eternal life, and cometh not into judgment, but hath passed out of death into life' (5^{24}; cf. vv.$^{39.40}$ 3^{36}, 1 Jn 4^{15} 5^{12}). Christ is represented as the bread of life (6^{48}), of which, if a man eat, he shall live for ever (v.^{51}). He is the resurrection and the life (11^{25}), and whosoever liveth and believeth on Him shall never die (11^{26}). Cf. also the passages which speak of regeneration (Jn 3^{3}, 1 Jn 3^{9} 5^{1}).

When we look more closely into the nature of this new life, we find that it has two main characteristics: it is a life of spiritual insight and of holy affection. These are indicated by the two words 'light' and 'love.'

Like St. Paul, St. John makes the sharpest possible contrast between the sinful world without Christ and the new spiritual society brought into existence by His redemption. To St. John, as to St. Paul, the whole world lieth in the evil one (1 Jn 5^{19}), and the greatest need of man is to be delivered from the bondage of sin (Jn 8^{34-36}). But to St. John the characteristic mark of this sinful state is ignorance, and the remedy which is needed is knowledge. It is the truth which must make men free (Jn 8^{32}, cf. 5^{34}). The world lies in darkness (1^{5}). It does not know God and His Christ. It does not apprehend, and therefore will not receive, His message. Into such a world the Logos comes, as light. His influence is as wide as humanity (1^{9}). In the fulness of time He becomes flesh and dwells among men (1^{14}), and they behold His glory, as of the Only-begotten from the Father, full of grace and truth (1^{14}). He declares the God whom no man hath seen at any time (1^{18}). Nay, more, in His own person He clearly manifests Him; for He that hath seen Him hath seen the Father (14^{9}). He is the light of the world (8^{12} 9^{5} 12^{46}), and the condemnation of men consists in the fact that when light was come into the world, they loved darkness better than light, because their works were evil (3^{19}; cf. 12^{38} 'sons of light' as a synonym for the saved). For this is eternal life, to know God, who is Himself light (1 Jn 1^{5}), and Jesus Christ whom He has sent (17^{3}, cf. 1 Jn 5^{20}).

But the redeemed life is not merely a life of knowledge. It is also a life of love. God is love (1 Jn 4^{8}) as well as light, and every one that loveth is begotten of God and knoweth God (1 Jn 4^{7}). The clearest proof of the passage of the disciples from death to life is the presence of a loving spirit (1 Jn 3^{14}, cf. Jn 13^{34}). 'He that saith he is in the light, and hateth his brother, is in the darkness even until now. He that loveth his brother abideth in the light, and there is none occasion of stumbling in him' (1 Jn $2^{9.10}$). The intimacy of the relationships into which men enter through the Christian life is often emphasized. They are children of God (1 Jn $3^{1.2}$). They are Christ's dear friends, to whom, unlike those who are merely servants, He makes known all that He has heard of His Father (Jn 15^{15}). The one commandment which He lays upon them is that they should love one another, even as He has loved them (13^{34}, cf. 15^{17}).

The secret of this new life of light and love is union with Christ. He is the vine, of which the disciples are branches (Jn $15^{1ff.}$). He is the heavenly bread upon which they feed ($6^{33ff.48}$). From Him comes that water of life which, when once received, never faileth, but becomes in each man a well of water, springing up unto eternal life (4^{14}, cf. 6^{35}). He is the good shepherd who lays down His life for the sheep (10^{11}); the grain of wheat, which, falling into the ground in apparent death, springs up to bear much fruit (12^{24}). Nor is this mediatorial work confined to His earthly life. If He leaves the disciples at death, it is to return by the Holy Spirit (14^{16-18}), the Paraclete, who shall institute a yet more intimate relation than that which has gone before ($16^{7.12.13}$), bringing to remembrance the things of Christ (14^{26}, cf. 16^{14}), leading the disciples, as they are able to bear it, into all the truth (16^{13}, cf. 1 Jn 5^{7}), becoming the bond through which Christ and the Father are united to them in a communion that shall know no end (cf. 14^{23} with ^{16} $17^{21.23}$, 1 Jn 3^{24}).

If we compare St. John's view of the mediatorial work of Christ with that of St. Paul, we note many points of similarity. To both Christ comes into the world from a pre-existent heavenly life. To both He is the power through whom sin is overcome, and the redeemed introduced into the spiritual Kingdom of righteousness, of peace, and of joy. In both, His mediatorial work is universal in its extent (cf. Jn 1[3] 'all things were made through him'; 1[9] 'the light which lighteth every man'; 10[16] 'other sheep . . . not of this fold'; 12[32] 'I, if I be lifted up, will draw all men unto myself'; 4[42] 'Saviour of the world'). And yet there is a difference of emphasis. St. Paul lays chief stress upon the death of Christ. The earthly life is passed over lightly. Attention is focussed upon the great tragedy of the cross, from which the conquering Saviour issues victorious in the resurrection. To St. John, the death is only an incident in the saving work. It is the incarnation as such which is redemptive. Christ enters into the world as light, and His mere appearance carries with it redeeming or condemning power. To as many as received Him, to them gave He the right to become children of God (1[12]). Those, on the other hand, who believe not, are condemned already by the mere fact of their unbelief (3[18]). St. Paul, for all his stress upon present salvation, is a man of historic sense, quick to apprehend, and apt to state, the contrast between the present period of affliction and the glories still to be revealed at the Parousia. To the mystic intuition of St. John, time relations fade away, and we face two contrasted eternities—the world of light and of darkness, of righteousness and of sin, of love and of hate. Against this background of absolute realities there is no longer any place for the apprehension of relative values. Whosoever is begotten of God sinneth not (1 Jn 5[18], cf. 3[6]). They that reject Christ are children of the devil, who from the beginning was a liar and murderer even as they (8[42-44]). Here the Pauline dualism is carried to the extremest point. The progress, the variety, the shading by which the latter is relieved, are here blotted out in the clear white light of eternity.

Yet the very sharpness of the presentation is the means of reviving forgotten truths. In the rarefied atmosphere of the Johannine Gospel, all traces of Jewish nationalism and materialism vanish. Salvation is indeed conceived as a transcendent good, but, as in the case of Jesus Himself, the transcendence is that of a higher spiritual order. One does not need to wait for the future to enjoy it. Here and now men may become partakers of light and life, of righteousness and love, of peace and joy. The Parousia is conceived less as a single event than as a continuous process (cf. PAROUSIA). Resurrection and judgment are present experiences. Even while in the world, the disciples may enter upon a life which is not of the world. The prayer of the Master is not that they may be taken out of the world, but that they may be kept from the evil (17[15]).

We have thus completed our historical survey of the Biblical doctrine of salvation. We have seen how through the centuries the conception has been deepened and enriched, as the more external and material elements have more and more given place to those which are moral and spiritual. We have noted the transformation wrought by the life and teaching of Jesus, and seen the central place assigned to His person and work in the thought and experience of His disciples. Amid all varieties of statement—in spite of many survivals of earlier and less spiritual ideas—we have marked the persistence of certain permanent features which warrant us in speaking of a Biblical idea of salvation. It remains to gather these together, and to exhibit them in their relations both to one another and to those which are more transient. This will be the aim of our concluding section.

iv. SYSTEMATIC STATEMENT.—In presenting the Biblical conception of salvation as a whole we have to consider (1) its nature, (2) its conditions, (3) its extent.

1. *Nature of salvation.*—We have seen that in every case the fundamental idea in salvation is deliverance. Our opening statement is as true of the profound utterances of a St. Paul or a St. John as of the simplest passages in the OT, that 'in every case some danger or evil is presupposed, in rescue from which salvation consists.' If, then, we would understand the Biblical conception as a whole, we must recognize clearly what is the great evil from which, according to its teaching, man needs to be delivered. That evil is death. No other term is comprehensive enough to unite the various elements in the Biblical teaching. From the first lines of the OT to the last chapter of the NT, salvation stands for that Divine activity by which God preserves or enriches the life of His children, by delivering them from the multiform dangers and evils which threaten its destruction. The content of the conception varies indeed with the deepening apprehension of what true life means. The dangers become less external, more spiritual; less transient, more permanent; less local, more universal, but the underlying thought abides. We may illustrate at once the permanent elements in the idea and those that are transient by considering the contrast between (*a*) the temporal and the spiritual; (*b*) the individual and the social; (*c*) the present and the future.

(*a*) *Salvation as temporal and spiritual.*—In the earlier portions of the OT 'life' is used in the familiar sense of animal existence. 'Death' means physical destruction, with the loss of all that that entails. When a man dies, he loses everything worth having—home and friends, health and strength, national relationships and responsibilities, the privileges of Divine worship and of Divine communion. We misrepresent the OT conception of Sheol when we speak of the shadowy existence in the under-world as life after death. In the gloomy monotony of the grave the vigour and vitality which gave joy to life are lost. Man exists, indeed, but it is with 'a negative existence, a weakened edition of his former self; his faculties dormant, without strength, memory, consciousness, knowledge, or the energy of any affection. . . . The colour is gone from everything; a washed-out copy is all that is left' (Salmond, *Immortality*[4] (1901), p. 163). It is not strange that, where this view obtains, the great evil to be feared is physical death (Ps 6[4. 5]), and the supreme blessing to be coveted a long life (Ps 91[16]). The Divine salvation is found in deliverance from all that threatens or impairs life, all that weakens its vigour or vitality—violence, oppression, captivity, calamity, troubles, and distresses of every kind. The great blessing which God gives is prosperity—a long life and a full one, with one's wife a fruitful vine, and one's children as olive plants about the table (Ps 128). Greatest of all evils to be feared is defeat in battle, since in the stern days with which we have to do it carries with it the loss of all that men count dear, both for the individual and for the nation.

But with the deepening of the moral insight we note the rise of a deeper conception. Life is seen to involve more than outward prosperity. It has an inner spiritual meaning. A man lives, in the full meaning of the word, only when he enters into communion with God in righteousness and love. From this point of view the great evil to be feared is not physical but moral. It is sin which destroys the communion between a man and his Maker. From sin therefore, first of all, a man needs to be delivered. We have seen how this truth comes to expression in the latter portions of the OT. Jesus puts it in the forefront of His teaching, and it has been the distinct note of the Christian Gospel ever since. Salvation is primarily deliverance from sin. It is the restoration of the interrupted communion between the Father and His children through the creation in the latter of a new spiritual life. Once dead in trespasses and sins, they are made alive again through union with the living Christ. Thus it is still death from which men need to be delivered, but it is a death which is spiritual, not physical.

One mark of the contrast between the two views is found in the changed estimate of suffering. To most of the OT, suffering is purely evil. It is a mark of that destruction and decay from which man needs to be delivered. To the NT, it has become a means through which man may enter into a more abundant life. The Christian glories in his weakness. He 'takes pleasure . . . in injuries . . . in persecutions, in distresses, for Christ's sake,' knowing that when he is weak, then is he strong (2 Co 12[9. 10]).

And yet we must not exaggerate the contrast. We misrepresent the NT teaching if we limit the blessings of the Gospel to the spiritual realm. The outer world as well as the inner is the scene of God's rule. The common physical blessings are not to be despised. Christ healed the sick as well as preached to the poor. The Father whom He proclaimed knows that His children need earthly bread as well as the bread from heaven. St. Paul, for all his contrast between flesh and spirit, recognizes the lawfulness of the physical appetites. The abstinence which he practises and recommends is out of regard for others' consciences, not because of any inherent evil in flesh and wine (Ro 14, cf. 1 Ti 4[4]). The physical universe is the scene and instrument of spiritual training. The body is a temple of the Holy Ghost (1 Co 6[19]). And, however great the change in the future, it is to no disembodied existence that he looks forward, but to a life in which the physical organism, now tainted by sin, shall be exchanged for a new body better adapted for the spiritual life (1 Co 15[35ff.]). Nothing is more characteristic of the Biblical view of the future, NT as well as OT, than the extent to which it pictures the heavenly life in imagery suggested by the earthly. The heavenly city, the marriage feast, the many mansions, the tree of life, the crystal river,—these form the setting for spiritual joys. The last scene is not the destruction of the universe, but its transformation and redemption (Ro 8[21]).

(*b*) *Salvation as individual and social.*—In the earlier portions of the OT, the subject of the Divine salvation is Israel the nation. It is characteristic of primitive society that it has small regard for the individual as such. It is the tribe, the clan, the nation which is the centre of the religious as of the social life. So markedly is this the case that the action of Ruth in leaving her own people to follow her mother-in-law Naomi to Canaan is the cause of wonder, and is made the theme of an entire book. It is only natural, therefore, that we should find the interest of the Biblical writers centring in the fortunes of the people as a whole rather than in the units which compose it. Even where the outlook broadens, and the prophetic vision takes in other peoples, the point of view is still national. It is Egypt and Assyria whom the prophet sees standing with Israel as recipients of the Divine salvation, to whom, as to Israel, J" applies the endearing title, 'my people' (Is 19[24. 25]). Where this point of view obtains, it is impossible to rise to any true universalism. For a universal religion must be founded in the nature of man as such, and for this there is needed a profound sense of the worth of the individual.

We have seen how this sense awakens in Jeremiah and Ezekiel; how it is deepened by the experiences of the Exile and the Restoration. We have noted the tender and beautiful utterances in which it finds expression in the Psalms, and seen how its later development tended to follow the lines of legal conformity rather than of the filial spirit. The individualism of the Apocalyptic books is the individualism of the law-court or the market-place rather than of the family. Its language is that of bargain and sale, of reward and punishment. There is indeed no theoretical objection to the reception of the Gentiles, if they will adopt the ceremonial law and become Jews. But there is the immense practical difficulty of a condition laid upon strangers which even the children have not been able to bear. If the salvation of God is really to become a universal good, some deeper foundation must be found than that of ceremonial law. It must be grounded in conditions that are vital, not legal.

Such a foundation Jesus laid in His teaching concerning the childlike spirit. Reviving the old prophetic teaching concerning the forgiveness of sins through the mercy and love of God, He laid a basis for His Gospel as broad as humanity. Men are not servants, with whom God deals on terms of law, but sons, whom He is willing to receive, whenever they turn to Him in penitence and faith. Thus the Gospel of Jesus is founded in an intense sense of the worth of the individual. In the family each child has his peculiar place. To Jesus, salvation means the bringing back of the child who has been wandering in the far country into the plenty and peace of the Father's home.

And yet the Gospel of Jesus is a social Gospel. It is a Kingdom which He preaches, not a collection of individuals. His teaching differs from that of His predecessors only in that He makes the conditions of entrance broader, simpler, more catholic—in a word, more human. Whether or not He used the word Church in Mt 16[18], there can be no doubt that He intended to found a society which should body forth to the world the principles for which He stood. In this respect the Pauline doctrine of the Church is the legitimate outgrowth of the teaching of Jesus concerning the Kingdom. In the Christian life none liveth to himself and no one dieth to himself (Ro 14[7]). The sacramental sign which marks the separation of the believer from the world marks also his entrance into the Christian brotherhood, and the feast by which he shows forth the death of Christ until He come is eaten with his fellow-disciples as a communion meal. The social character of the Christian life is indicated in a thousand unexpected ways, but perhaps nowhere more beautifully than in the Pauline word about the Parousia in 1 Th 4[15. 18] 'We that are alive, that are left unto the coming of the Lord, shall in no wise precede them that are fallen asleep . . . wherefore comfort one another with these words.'

(*c*) *Salvation as present and future.*—We have seen that the earliest conception of salvation is *present* deliverance. This must be the case if death ends all. If God do not save while life lasts, He cannot save at all. The conception of national salvation does indeed open the way for a wider perspective. The life of the nation is longer than that of the individual, and God may delay His deliverance more than a single generation and still be in time. Yet the point of view is fundamentally the same. If God's succour is not to be in vain, it must come before the nation utterly perishes. There must be at least a remnant to carry on the national life, a shoot left in the old stock, which may spring up to newness of life (cf. Is 6[13]).

Yet the experiences of later Jewish history made this contact between present and future increasingly difficult to maintain. The old national prestige seemed gone, never to return. More and more, men despaired of present deliverance and concentrated their thoughts upon the future. The very barrenness of their present experience, the very absence of all evidence of God's present interest and help, served but to enlarge their expectations for the distant day when J" should at last make bare His arm to help. What if individuals died? what if Israel as a nation should perish? God was able even to raise the dead. Some day He would stir the dry bones, and the nation would rise to newness of life (Ezk 37). Nay, He would call back from their graves the very individuals who had passed away, that they might share the joys of the final triumph (Is 26[19], Dn 12[2]). Thus more and more the conception of salvation becomes eschatological and transcendent. The gap between present and future widens. Between the present time of distress, without experience of God's redeeming grace, and the future age which brings His great deliverance, there is a great gulf fixed.

This gulf Jesus bridged with His Gospel of a present Kingdom. He restored the older conception of a living God, able and willing to help His children in their daily need. But He saw that the great need was spiritual, not temporal. Conceiving of salvation as deliverance from sin, He taught that such deliverance was possible here and now. Prophet and psalmist before Him had had their intimations of a communion with God possible even in the midst of present trouble and distress. He made this communion a familiar experience. Devout spirits even within the OT, finding outward prosperity too little, had prayed for a clean heart and a contrite spirit; He showed how this prayer could be answered. The influence of the Master is apparent in the new view-point of the disciples. To the Christian believer, whatever his thought of the future, salvation is a present experience, introducing a man into a fellowship with God which no earthly sorrow or misfortune—not even death itself—can interrupt.

And yet here, again, we must beware of exaggeration. However great the emphasis on present deliverance, to Christianity, as to Judaism before it, salvation has its future meaning. We have noted the eschatological element in Jesus' own teaching. We have seen it repeated in that of His disciples. It is present in St. Paul; it is not absent even from St. John. He, too, rejoicing in communion with a present Christ, looks forward to a day when He shall be yet more fully manifested, and believers, seeing Him as He is, shall be transformed into His image (1 Jn 3^{2}). The very preciousness of the present experience, the very exaltation of the spiritual standard, serve but to deepen the longing for the day when all that now impedes the progress of Christ's Kingdom shall be done away, and God be all in all.

2. *Conditions of salvation.*—These may be considered on the Divine side and on the human.

(*a*) *On the Divine side.*—The ultimate cause of salvation is the Divine mercy. This is the uniform teaching of OT and NT. Whether in the simpler meaning of victory in battle or the more profound conception of spiritual regeneration, salvation is undeserved. God does not treat the Israelites according to their merits, but according to the riches of His grace. They were not more in number than other peoples when He chose them for His own, and delivered them from their captivity in Egypt (Dt 7^{7}). For His name's sake He saved them, that He might make His mighty power known (Ps 106^{8}, cf. Jer 14^{7}). When they forsook Him and wandered from Him, He did not give them up. His love endured in spite of their unfaithfulness (Hosea). He was inquired of by them that asked not for Him, found of them that sought Him not. He spread out His hands all the day unto a rebellious people (Is 65$^{1.2}$). Even His judgments are a mark of His love (Am 3^{2}). Not only the deliverance from enemies, but the repentance which makes it possible is His gift (Ps 51^{10}).

The same conception reappears in the NT. God is not the stern creditor exacting the uttermost farthing, but the loving Father, forgiving His erring children; more ready to give good gifts than earthly parents to their children. The disciples did not choose Christ, but He chose them and appointed them that they should go and bear fruit, and that their fruit should abide (Jn 15^{16}). The more profound and spiritual the conception of salvation, the deeper the conviction that it is undeserved. 'By grace have ye been saved through faith; and that not of yourselves: it is the gift of God' (Eph 2^{8}).

In many passages indeed, esp. in OT, the Divine mercy is represented as an arbitrary thing. Not only is the deliverance of God contrasted as purely miraculous with all human instrumentalities (cf. 1 S 14^{6} 'no restraint to J″ to save by many or by few'; Is 59^{1} 'J″'s hand is not shortened that it cannot save'; 1 S 17^{47} 'J″ saveth not with sword and spear'; Hos 1^{7} salvation by J″ contrasted with salvation by bow or by sword, or by battle, etc.; cf. Ex 14^{13} the deliverance from Egypt; Jg 7^{2} the defeat of the Midianites by Gideon; Ps 33^{16} 44^{6} 57^{3}), but it often seems dependent upon moods of the Divine feeling which man cannot fathom. There are times when J″ may be approached; there are others when no man may draw nigh to Him (Ps 32^{6}, cf. Is 55^{6}). When the great waters overflow, prayer cannot reach Him (Ps 32^{6}?). At such a time the part of wisdom is to wait patiently until His anger be past. But on the whole we find an increasing emphasis upon the permanent character of God's saving purpose. It belongs to God's nature to show mercy. However Israel may change, His purpose towards Israel changes not. So we find increasing recognition of God's use of means. When He would deliver His people from the Philistines or the Midianites, He raises up some man to be their saviour. Even the experiences which seem outside of His control are not really so. The Assyrian boasts of his defeat of Syria and Samaria, saying, 'By the strength of my hand I have done it, and by my wisdom' (Is 10^{13}), and knows not that he is but the rod of J″'s anger, in whose hand as a staff is His indignation (10^{5}). This broadening view of the Divine Providence becomes strictly universal in the NT. Nothing can separate from the love of Christ (Ro 8^{39}). All things without exception work together for good to them who are called according to God's purpose (Ro 8^{28}). History is a mighty drama, in which each event fills its appointed place, preparing the way for that dispensation of the fulness of the times in which it is God's purpose to sum up all things in Christ (Eph 1^{10}). Even the groanings of the creation in its present distress are but the travail throes of the new universe, that shall be, when the sons of God shall be revealed (Ro 8^{22}).

Among the instruments appointed by God to mediate His salvation, the Jewish law, with its sacrificial system, holds an important place. Through its precepts men were trained in purity and holiness, and in its sacrifices they saw a pledge of God's forgiveness and mercy. To the contemporaries of our Lord it seemed a finality, and the salvation of the Messianic age would but serve to introduce on a larger scale the worship and sacrifices of the heavenly Jerusalem. Christians, following their Master, recognized the law as a Divine institution, but to them its authority was temporary. It was a tutor to bring men to Christ; but after Christ was come it was no longer needed. Its significance might be variously conceived. To the writer to the Hebrews, it had a positive value, as typifying the higher righteousness and the more perfect Atonement of the Gospel. To St. Paul, its significance is chiefly negative. It reveals the futility of any merely legal righteousness, and points men to the better salvation revealed by Christ.

With Christ we reach the centre of the Biblical doctrine of salvation. He is the Saviour *par excellence*, the true Mediator between God and man, the fulfilment of all the promises, the realization of all the hopes of the earlier dispensation. Two distinct lines of preparation meet in Him. There is the hope of the Messiah, a human deliverer through whom God has promised to deliver His people, and to set up on earth His long deferred kingdom. There is also the expectation of a special intervention of J″ Himself; the coming of a day when He shall leave His heavenly dwelling-place and take up His abode in the midst of His people, superseding the lesser radiance of sun and moon and stars by the light and glory of His presence. Jesus is at once Jewish Messiah and God incarnate; Son of Mary, and the Word made flesh.

This is not the place to trace the development of the NT doctrine of Christ (see art. JESUS CHRIST). It is sufficient to say that it runs parallel with the deepening conception of salvation. In Jewish-Christian circles, where the thought of salvation is still framed on the older lines of an external deliverance, it is the Messianic thought which is most prominent. Jesus is a man, approved of God unto men, by mighty works and wonders and signs which God did by Him (Ac 2^{22}), crucified according to the Scriptures (Ac 3^{18}), raised from the dead (Ac 2^{24}), and now waiting in heaven till the time of the restoration of all things (Ac 3^{21}). To St. Paul and St. John, with their deeper conception of salvation as a new spiritual life of righteousness and love, Jesus is a pre-existent Divine being, coming into the world from a higher realm as a quickening and life-giving principle to all who have been made one with Him by faith.

The contrast between these two views may be illustrated in connexion with the view of Christ's death. To the Jewish-Christians, with their more external conception of salvation, it is an arbitrary appointment of God, the necessity of which they recognize, but which they cannot understand. Christ died that the Scripture might be fulfilled. To St. Paul and St. John, the death is a necessary step in that great process through which evil is overcome and the Christian believer made partaker of Christ's risen and glorified life. That we may become like Him and share His nature, it was necessary that He should become like us and share our nature. He must suffer death with us, that we may be raised to life with Him.

The conception of salvation as a new Divine life finds clearest expression in the doctrine of the HOLY SPIRIT (which see). Here, too, we trace a development from the conception of the Spirit as the energy of God coming upon men to fit them for special work in connexion with the Divine kingdom (*e.g.* Jg 11^{29} 13^{25} 14^{6}), to that which sees in Him the immanent God, entering into the life of men through regeneration (Jn 3^{6}), creating in them a higher life of holiness and love (Gal 5^{22}), dwelling within them as an inner spiritual principle (Ro 8^{9}), uniting them with God and with Christ (Ro $8^{9.\,10}$), leading them into truth (Jn 16^{13}), sanctifying them (Ro 15^{16}), making intercession for them (Ro 8^{26}), more and more transforming them into the image of their Master (Ro 8^{29}), and at last raising them from the grave through the transformation of their mortal bodies into the new glory of the resurrection life (Ro 8^{11}). Where such a view is held, it is easy to see how futile is any thought of human merit. The aspirations which rise toward God, the graces which fit us for His fellowship, are the work of the Spirit. The very life which we live is not our own. It is the gift of God, who worketh within us both to will and to do of His good pleasure (Eph $2^{8.\,9}$, Ph 2^{13}).

(*b*) *On the human side.*—Yet it would be a mistake to conclude that the Bible knows no human conditions of salvation. The same St. Paul who lays such stress on the Divine activity in salvation urges his readers to work out their own salvation with fear and trembling (Ph 2^{12}). As on the Divine side salvation is a new life created in man, so on the human side it is a life which manifests itself in certain distinctive activities. These may be summed up under the three heads of—(*a*) repentance, (β) faith, (γ) obedience.

(a) The first and indispensable condition of salvation is *repentance* (which see), by which is meant not merely sorrow for sin, but actual forsaking of sin and turning to righteousness. This is as necessary for deliverance from Assyrian oppression as for entrance upon the new life of Christ's Kingdom. God may indeed save men from their sins, but He cannot save them in their sins. We have already noted the deepening estimate of this grace, and seen how from a mere condition of salvation, which a man can achieve for himself without God's help, it comes to be an element in salvation itself—the first step in the process whose end is perfect holiness.

(β) *Faith.*—The obverse of repentance is *faith* (which see). Man turns from sin to God, and the means by which he lays hold of the Divine deliverance is faith. Saving faith in the Biblical sense is always more than belief (Ja 2^{19}). It involves an act of the will, and issues in obedience. Yet on this common ground we note a difference of conception. In much of the Bible faith means trust in God's word, together with the activities which follow it. Its object is God's promise rather than His person. Abraham had faith in God—that is, he trusted His promise—and 'he went out, not knowing whither he went' (He 11^{8}). Because of this trust, he shall one day receive his reward; but this reward lies still in the future (He $11^{13.\,39}$). This is the sense in which faith is used in Hebrews. To St. Paul, on the other hand, faith has a deeper meaning. It is the means of obtaining a present blessing, not a future one. Its object is a person, not a promise. By faith a man lays hold upon Christ as his Saviour, becomes one with Him, partakes of His heavenly life, shares His righteousness, and rises with Him into His eternal Kingdom. It is thus a comprehensive term, which covers the entire human side of that experience whose Divine side is the working of the Holy Spirit.

(γ) But repentance and faith are alike vain, save as they issue in *obedience* (which see). This is the all-embracing Biblical virtue. Man's relation to God is such that his righteousness must take this form. The particular content may vary with the growth of the Divine revelation. In OT, for instance, it includes the faithful observance of the ceremonial law with its prescriptions of ritual and sacrifice. Yet even in OT these are subordinate to the eternal principles of justice and mercy (cf. Mic 6^{6-8}). In the NT the law has been done away. The only sacrifice required is the spiritual sacrifice of prayer and praise (He 13^{15}), the offering up of the person in life-service to God (Ro 12^{1}). The burdensome prescriptions of the Levitical ritual have given place to Christ's new commandment of love. Yet this love is no vague or indefinite virtue. It shows itself in the willing acceptance of God's fullest revelation; in discipleship of Christ and membership in His Kingdom. Beginning with faith, it manifests itself in all the social virtues. It rejoices to minister to the needy and oppressed. It does not disdain the gatherings of the saints for prayer and praise, and it finds its public marks in the sacramental signs of baptism and the Eucharist, by which the believer's membership in the body of Christ is openly showed forth.

3. *Extent of salvation.*—It remains to consider the extent of salvation. Here our study has shown a constant enlargement in man's conception of the sweep of God's purpose. We may illustrate this in connexion (*a*) with the present life; (*b*) with the life after death; (*c*) with the universe as a whole.

(*a*) *Salvation in this life.*—We have already noted the growing universalism of the Biblical teaching. At first it is Israel alone for whom God cares. He is J″'s dearly beloved son. Other nations are but God's servants, instruments in His hand through which He accomplishes His saving purpose for Israel. Then the Gentiles also share the blessings of the Messianic deliverance, but it is only by becoming subject to Israel, and adopting the Jewish law and worship. Yet even in OT there are gleams of a conception more truly catholic. To Isaiah, Egypt and Assyria as well as Israel are chosen of God. The foundation for a true universalism is laid in the prophetic doctrine of the worth of the individual. Jesus makes the conditions of entrance to His Kingdom purely moral and spiritual—repentance, trust, humility, obedience, the childlike spirit. Where these are present, there is a son of God, whether he observe the ceremonial law or not. The practical universalism of Jesus is theoretically completed in the Pauline doctrine of the abrogation of the Jewish law. This was the natural consequence of the new view of redemption. When salvation is regarded as a new Divine life, it is impossible not to recognize the Christianity of those who have received the Holy Spirit, even if they have not been circumcised (Ac 10[44-48]). To the freedom of the Divine Spirit, like that of the wind, blowing where it listeth, no man may venture to set bounds. The salvation of Israel is still the centre of hope and prayer (Ro 9[1]), but it is only as part of a process which is as wide as humanity.

With the widening horizon, we note a corresponding change in the depth of the conception. Salvation becomes not only a broader, but a more intensive term; less external, more spiritual; less local, more permanent. It not only affects more men, but it affects them more profoundly. Its subject is the whole man. It reaches soul as well as body. It delivers from sin as well as from suffering. It not only removes causes of evil; it creates forces of good. As nothing is too large, so nothing is too small to fall within the range of its activity. Life and death, things present and things to come, are alike subject to the control of that Christ who is able to save to the uttermost.

This double growth may be well illustrated in connexion with the doctrine of election. At first the Divine choice centres in Israel the nation, or in those heroes or prophets whom God has set apart for special service in connexion with the national deliverance. Then other nations are included in the Divine plan. God chooses Egypt as well as Israel. Cyrus the Persian is His servant, set apart to do a special work in the execution of His redemptive purpose. To the broader view-point of the NT, with its juster estimate of the worth of the individual, election is no longer confined to a few. All Christians are elect, called to be saints (Ro 1[6]) according to the Divine purpose. And as the range of the Divine choice widens, so its content deepens. Christians are elect unto salvation (2 Th 2[13]), with all the richness of meaning which the Christian revelation has put into the word. The object of the Divine choice is not merely deliverance from future punishment. Men are called to the Christian life as a whole, with its good works (Eph 2[10]), its joys and graces, its brotherly service, its missionary zeal, its willingness to spend and be spent, yes, if need be, even to be cast away (Ro 9[3]), if thereby others may be saved. Thus the individualism of the NT doctrine of election, so far from being a narrowing of the conception, is rather a mark of its true universalism.

(*b*) *In the life after death.*—With the expansion of the conception of salvation in this life, we find the Biblical outlook reaching across the grave, and taking in the life after death. Nothing is a more striking witness to the strength and richness of the Hebrew conception of God than the way in which it succeeded in transforming the pagan conception of Sheol which at the first the Israelites had shared with their contemporaries. We have already traced the steps in this moralization of the life after death, and need not repeat them here. From a gloomy, passionless, joyless existence, Sheol becomes the scene of God's presence and power. It has its garden of life, where the righteous await contentedly the greater joys of the resurrection. Christianity further emphasizes and enriches this conception. Whatever new elements Christ has brought into the thought of God and His salvation are carried over into the life immediately after death. Christ's activity is not merely confined to the living. In the spirit He preaches even in the realm of the dead (1 P 3[19]). The shifting and uncertain imagery through which the human imagination had endeavoured to picture the nature of 'that undiscovered country' is now reinforced or superseded by a definite conception. To die means to depart and to be with Christ (Ph 1[23]); to enter into the Father's home, where the elder brother has gone before to prepare a place and a welcome for each returning traveller (Jn 14[2]). Whatever the joys still remaining at the Parousia, they are not different in kind from those upon the experience of which one enters immediately after death. The highest blessedness of heaven will consist in communion with Christ. 'It is not yet made manifest what we shall be. We know that if he shall be manifested, we shall be like him, for we shall see him even as he is' (1 Jn 3[2]).

(*c*) The Biblical doctrine of salvation reaches its climax in the conception of a *redemption of the universe.* Foreshadowed in the OT doctrine of new heavens and a new earth, developed in the period between the Testaments in extravagant and non-spiritual forms, it remains an element in the Biblical conception to the last. It is not God's purpose merely to save men out of the world, but to save the world. Whatever is hopelessly evil—whether in nature, man, or spirit—shall at last be utterly destroyed. No foe will longer remain to dispute the authority of Christ or mar the glories of His eternal Kingdom. The last enemy to be destroyed is death (1 Co 15[26]). Not till then will Christ's saving work be finished, and He restore to the Father the power given to Him, that in the redeemed universe God may be all in all (1 Co 15[28]). This doctrine of a cosmic salvation, wrought out most fully by St. Paul, but implied also in other parts of the NT, has three main elements: (1) the redemption of physical nature with its destruction of suffering and death; (2) the redemption of mankind with its destruction of sin; (3) the redemption of the angelic world with its destruction of the spiritual forces which now oppose the Kingdom of God. Thus in terms naturally suggested by the thought of his day, but with a vigour and breadth of conception worthy of the largest generalizations of our modern science, the apostle presents the work of Christ in its unity as one great process, running through the ages, reaching out to take in the uttermost bounds of space, penetrating to the profoundest depths of spiritual experience in order to bind together all things in earth and heaven in one universal purpose of salvation (Eph 1, Col 1).

LITERATURE.—The Literature, which is voluminous, is widely scattered, all the more important Commentaries, as well as works on Biblical Theology, contributing directly or indirectly to the subject. For monographs on special phases of the doctrine the reader is referred to the literature given in the special articles on ESCHATOLOGY, FAITH, JUSTIFICATION, PAROUSIA, RANSOM, REDEMPTION, etc. Here only a general survey can be given.

On Salvation in general, cf. Cremer, *Bib.-Theol. Lex.* s. σώζω, σωτήρ, σωτηρία; M'Clintock-Strong, artt. 'Saviour' and 'Salvation'; Herzog, *RE*^{3}, artt. 'Heil' and 'Erlösung'; Ritschl, *Rechtfertigung und Versöhnung*, vol. ii.; Kähler, 'Zur Lehre von der Versöhnung,' in *Dogmatische Zeitfragen*, ii. 1898; Gess, *Christi Person und Werk* (1870); Thomasius, *Christi Person und Werk* (1886); Briggs, 'The Biblical Doctrine of Salvation,' in *Church Union*, N.Y., Jan. 1897.

On the doctrine of Salvation in OT, cf. the Biblical Theologies, esp. Schultz, 5th ed. (p. 562 ff.), Dillmann (p. 411 ff.), Riebm, Smend, Kayser-Marti, Piepenbring (Eng. tr. p. 207 ff.); Briggs, *Messianic Prophecy*; Duhm, *Theologie der Propheten* (1875); Adeney, *The Hebrew Utopia* (1879).

On the period between the Testaments, cf. Gfrörer, *Jahrhundert des Heils*, ii., esp. chs. 8–10; Drummond, *Jewish Messiah* (1877); Stanton, *Jewish and Christian Messiah*; Schürer, *HJP*; Weber, *Jüdische Theologie*^{2}, 1897. Much information may also be obtained from the notes in Charles' editions of Enoch, Secrets of Enoch, Apocalypse of Baruch, and Assumption of Moses, as well as from his *Eschatology, Hebrew, Jewish, and Christian*, 1899.

On the NT doctrine, besides the Biblical Theologies of Weiss, Beyschlag, Reuss, Bovon, Stevens, Gould, and esp. Holtzmann, cf. Klaiber, *Neutest. Lehre von der Sünde und Erlösung* (1836); Wendt, *Lehre Jesu*; Horton, *Teaching of Jesus*; Gilbert,

Revelation of Jesus (1899); Pfleiderer, *Paulinismus*^{2}; McGiffert, *Apostolic Age*; Briggs, *Messiah of the Gospels*, *Messiah of the Apostles*; Stevens, *Pauline Theology*, *Johannine Theology*; Everett, *Gospel of Paul* (1893); du Bose, *Soteriology of the NT* (1892); Ménégoz, *La Théologie de L'Épître aux Hébreux* (1894), *Le Péché et la Rédemption d'après St. Paul* (1882); Nösgen, *Geschichte der NT Offenbarung* (ii. p. 300 ff.); Cone, *The Gospel and its earliest interpretations* (1893); Baldensperger, *Selbstbewusstsein Jesu*^{2} (1892); Titius, *Die Neutest. Lehre von der Seligkeit* (1895); Ménégoz, 'Le Salut d'après l'enseignement de Jésus-Christ,' in *Rev. Chrét.* 1899, ix. pp. 401–421; W. Bousset, *Jesu Predigt in ihrem Gegensatz zum Judentum* (1892); Harnack, *Das Wesen des Christentums* (1900; Eng. tr. 1901).

On special points in connexion with the doctrine, cf. the various monographs on the Kingdom of God by Schnedermann, Schmoller, Issel, J. Weiss, Bruce, Boardman, Toy (*Judaism and Christianity*, pp. 303–371); Schmidt, *Die paulin. Christol. in ihrem Zusammenhang mit der Heilslehre des Apostels dargestellt* (1870); Cremer, *Die paulin. Rechtfertigungslehre im Zusammenhang ihrer gesch. Voraussetzungen* (1900); Wernle, *Der Christ und die Sünde bei Paulus* (1897); Kabisch, *Eschatologie des Paulus* (1893); Teichmann, *Die paulin. Vorstellungen von Auferstehung und Gericht, und ihre Beziehung zur jüd. Apocalyptik* (1896); Schlatter, *Der Glaube im NT*^{2} (1895), 'Der biblische Begriff der Gnade' (*Schrift und Geschichte*, pp. 177–217); Riehm, *Der Begriff der Sühne im AT* (1877); Kühl, *Die Heilsbedeutung des Todes Christi* (1890); Seeberg, *Der Tod Christi in seiner Bedeutung für die Erlösung* (1895); E. W. ADAMS BROWN.

SAMAIAS (*Σαμαίας*).—1. Shemaiah, one of the chiefs of the Levites in Josiah's reign, 1 Es 1^{9} (cf. 2 Ch 35^{9}). 2. 1 Es 8^{39} = Shemaiah, of the sons of Adonikam, Ezr 8^{13}.

SAMARIA.—1. (שֹׁמְרוֹן, that is, *Shōmĕrôn*, 'watch-mountain'; *Σαμάρεια, Σεμερών, Σομερών, Σομηρών, Σωμωρών*; Jos. (*Ant.* VIII. xii. 5), *Σωμαρεῖν*; Euseb. (*Onom.*), *Σεμηρών*; *Samaria*) The capital of the kingdom of Israel. The Assyrian, *Samirina* (Ins. of Tiglath-pileser III., Sargon, etc.), and the Greek and Latin forms of the name, come from the Aramaic שָׁמְרַיִן. A characteristic derivation of the name is given, in 1 K 16^{24} (RV, cf. Jos. *Ant.* VIII. xii. 5), where we are told that Samaria was built by Omri who bought the 'hill of Samaria' from Shemer, and, having fortified it, called the name of the city that he built Shomerôn (*Samaria*) after Shemer. (See discussion of etymology by Stade in *ZATW* v. 165 ff.)

Commanding the roads from Shechem northwards to Esdraelon, and westwards to the coast, and situated within easy reach of the Mediterranean, no better site could have been selected for the fortified capital of the Northern kingdom. The hill ('mountain of Samaria' Am 4^{1} 6^{1}, Sir 50^{26}) rises from 300 to 400 feet above the bed of a broad fertile valley (perhaps the 'field of Samaria' Ob ^{19} RV), and is isolated on all sides but the east, where it is connected with the hills ('mountains of Samaria' Am 3^{9}, Jer 31^{5}) by a low narrow saddle. On three sides it is surrounded and overlooked by hills clothed with olive and vine, but they are beyond the range of catapult and bow, and so were not a source of danger. On the fourth side the hills are low, and the view over them to the west, with the blue waters of the Mediterranean in the distance, is one of exceptional beauty. This charm of position, in a rich 'fat' valley, bordered by vine-clad hills, formed part of that 'glorious beauty' which made Samaria the 'crown of pride of the drunkards of Ephraim' (Is 28^{1-4}).

From the 7th year of Omri, Samaria was the capital ('the head of Ephraim' Is 7^{9}, 'Samaria and her daughters' Ezk 16^{53}), and residence of the kings of Israel (1 K 16^{29} 20^{43} 21^{1-18} 22^{51}, 2 K 1^{3} $3^{1.6}$ 10^{36} $13^{1.10}$ $14^{14.23}$ $15^{8.13.14.17.23.27}$ 17^{1}, Is 7^{9} 10^{9}, Hos 10^{7}); and it was also their burial-place (1 K 16^{28} 22^{37}, 2 K 10^{35} $13^{9.12}$ 14^{16}). Samaria is on this account mentioned with or compared with the capital of the Southern kingdom (2 K 21^{13}, Is $10^{10.11}$, Ezk 16^{51} 23^{4}, Am 6^{1}, Mic $1^{1.5}$), which was to share its fate. Ezekiel calls it 'the sister' (16^{55} 23^{33}), and the 'elder sister' of Jerus. (16^{46}). The city was surrounded with strong walls (*Ant.* VIII. xiv. 1), and beautified by the kings of Israel. There was a fortified palace, 'the castle of the king's house' (2 K 15^{25} RV), with a 'roof-chamber' (2 K 1^{2}). This probably stood on the top of the hill, and near or connected with it may have been the ivory palace built by Ahab (1 K 22^{39}). There was a Syrian quarter in Samaria (1 K 20^{34}); and a city gate (1 K 22^{10}, 2 K $7^{1.18.20}$, 2 Ch 18^{9}) and pool (1 K 22^{38}) are mentioned.

At Samaria, Ahab received a visit from Jehoshaphat, and, at the entrance of the gate, the two kings sat to hear the prophecy of Micaiah (1 K 22^{10}, 2 Ch $18^{2.9}$). There the 70 sons of Ahab were slain (2 K $10^{1.7}$); there Jehu destroyed all that remained unto Ahab (2 K $10^{12.17}$); and there, according to one account (2 Ch 22^{9}, cf. 2 K 9^{27}), Ahaziah was killed. It was to Samaria that Joash, after the capture of Jerus., brought the vessels for the service of the temple, and the treasures of the king's house (2 K 14^{14}, 2 Ch 25^{24}); and that Pekah, at least according to 2 Ch $28^{8.9.15}$, returned at the head of his army, laden with the spoil of Judah, and accompanied by a long train of captive Jews, who were afterwards released.

Samaria became the religious as well as the political centre of the Northern kingdom. The marriage of Ahab with Jezebel, and the consequent close alliance between the usurping dynasties of Israel and Phœnicia, led to the establishment of the Phœnician worship on a large scale in the capital. Ahab caused a temple and altar to be erected to Baal (1 K 16^{32}; *Ant.* IX. vi. 6), and made the Asherah (1 K 16^{33}, 2 K 13^{6} RV). The temple, which was probably of great size, contained 'pillars of Baal,' apparently of wood, which were torn down and burned, and a 'pillar of Baal,' possibly a stone pillar with an effigy of the god on one of its faces, which was broken down when Jehu destroyed the temple after slaughtering the prophets of Baal (2 K 3^{2} $10^{21.25-27}$ [in v.^{25} read prob. with Klost. דְּבִיר *adytum* for עִיר 'city']). The Phœnician rites were celebrated with great splendour, and Jezebel, who had slain the prophets of the LORD (1 K 18^{13}), fed 450 prophets of Baal and 400 prophets of the Asherah at her table (1 K 18^{19} RV). The idolatrous worship was strongly opposed by the prophets of J″, some of whom worked and preached in the city. Elisha had a fixed residence in it (2 K 2^{25} 5^{3} 6^{32}, cf. v.^{24}), and Hosea probably prophesied there. Isaiah ($10^{9.11}$ 36^{19}) alludes to the idols, graven images, and gods of Samaria; Hosea (7^{1} $8^{5.6}$ 10^{5}), to its wickedness, and to the calf-worship which existed side by side with the worship of Baal; Amos (8^{14}), to its sin; and Isaiah (8^{4} 9^{9}), Hosea (13^{16}), Amos (3^{12}), Micah (1^{6}) foretell the penalties that it would have to suffer for the sins of its people. Jeremiah (23^{13}) mentions the prophets of Baal, and Ezekiel (23^{4}) can find no fitter symbol for the city than Oholah the harlot.

Soon after Samaria was built, it was probably besieged by Benhadad I., who forced Omri to make 'streets' in the city for the Syrians (1 K 20^{34}). During Ahab's reign it successfully resisted a siege by Benhadad II. (1 K 20^{1-21}; *Ant.* VIII. xiv. 1, 2). In the reign of Jehoram, after a minor expedition had been thwarted by Elisha (2 K $6^{19.20}$; *Ant.* IX. iv. 3), the city was again besieged by Benhadad. On this occasion the garrison and townsmen were reduced to the last extremity (2 K $6^{24.25}$), when a panic seized the Syrian army and the siege was raised (2 K 7^{1-20}; *Ant.* IX. iv. 4, 5). In the 7th year of Hoshea, Samaria was besieged by Shalmaneser, but it was actually taken, B.C. 722, by his successor Sargon after the siege had lasted three years (2 K $17^{5.6}$ $18^{9.10.34}$, cf. 21^{13}; *Ant.* IX. xiv. 1; *Inscriptions of Sargon*). The Northern kingdom fell with its capital, and the people were transplanted by the conqueror; but the city was not completely destroyed (Jer 41^5). Two years later it rose, in alliance with Hamath, Arpad, and Damascus, against the Assyrians; but the rising collapsed on the overthrow of the king of Hamath (see *Inscriptions*). The transplanted Jews were replaced by foreign colonists (2 K 17^{24}, Ezr 4^{10}) under Assyrian governors, of one of whom the name, Nabu-achi-šu, has been preserved (III. Rawlinson, 34, col. ii. 94 f.). In B.C. 331 Samaria submitted to Alexander, who killed many of its inhabitants, and replaced them by Macedonian colonists. Later it was dismantled by Ptolemy Lagi, afterwards rebuilt, and again destroyed by Demetrius Poliorcetes. The walls must soon have been restored, for it was a 'very strong city' when taken by John Hyrcanus, B.C. 120, after a year's siege (*Ant.* XIII. x. 2, 3; *BJ* I. ii. 7). Hyrcanus is said to have completely destroyed the city by 'bringing streams to drown it'; but this can refer only to that portion of it which lay at the foot of the hill. Samaria was rebuilt by Pompey, who made it a free city, and attached it to the government of Syria (*Ant.* XIV. iv. 4; *BJ* I. vii. 7); and it was further restored and strengthened by Gabinius (*Ant.* XIV. v. 3; *BJ* I. viii. 4). Herod, in pursuance of his commercial policy, which was based on intercourse with the West, and of his plan of covering the country with strongholds garrisoned by Gentile soldiers devoted to his interests, made Samaria a strong fortress. He embellished it, built a temple of great size and magnificence, and settled it with veterans from his army and people from the neighbourhood (*Ant.* XV. viii. 5; *BJ* I. xxi. 2). The city, which is said at this time to have had a circumference of 2½ miles, was re-named Sebaste (Augusta) in honour of Augustus, who had given it to Herod (*Ant.* XV. vii. 3); and this name has survived in the modern *Sebustieh.* At Samaria Herod entertained Agrippa; there he killed his wife Mariamne, and there also he strangled his sons (*Ant.* XV. vii. 5–7, XVI. ii. 1, xi. 7). During the Jewish revolt, Samaria and Herod's soldiers, called *Sebastenes*, went over to the Romans (*Ant.* XVII. x. 3, 9; *BJ* II. iii. 4, iv. 3, xii. 5). Many authorities suppose that the gospel was preached in Samaria (Ac $8^{5.9.14}$); but it is possible that some town in the district of Samaria, of which the name is not specified, is intended (note the absence in v.^{5} of the def. art. in some MSS). Septimius Severus made Samaria a *Colonia*, but it rapidly declined as Shechem (Neapolis) rose to importance, and in the 4th cent. it was already a small town (Euseb. *Onom.*). It was an Episcopal see, and its bishops attended the Councils of Nicæa, Constantinople, and Chalcedon, and the Synod of Jerusalem (A.D. 536). According to Jerome it was the burial-place of Elisha, Obadiah, and St. John the Baptist (*Ep. ad Marcellam*, *Com. ad Obad.*), and their tombs were shown to pilgrims in the Middle Ages. The Crusaders established a Latin bishopric in Samaria.

The modern village of *Sebustieh* lies at the E. end of the terraced hill of Samaria, which is now partially cultivated and in places covered with olive groves. The old city wall can be traced for most of its course, following irregularly the contour of the hill, and there are remains of the west gate. From this gate a street 50 ft. wide, and lined with columns, of which many still stand, ran along the S. side of the hill to a gate on the E., which has disappeared. To the W. of the village are the columns of a large buried temple; towards the S.W. the columns of a smaller temple; and in a hollow at the foot of the N.E. side of the hill are several shafts of columns that formed part of a quadrangle, perhaps a hippodrome, 622 ft. long and 190 ft. wide. Close to the site of the E. gate are the ruins of the fine cathedral church of St. John, built between A.D. 1150 and 1180, over the traditional tomb of St. John the Baptist. In the neighbourhood of the village are two fine springs, *'Ain Hârîm* and *'Ain Kefr Rûma*, from which small streams flow for a short distance. These streams are, apparently, those utilized by Hyrcanus to undermine the lower portion of the city. (Stanley, *S. and P.* 243–246; G. A. Smith, *HGHL* pp. 346–349; *PEF Mem.* ii. 160, 211–215; Guérin, *Samarie*, ii. 188, etc.).

2. SAMARIA (ἡ Σαμάρεια; *Samaria*) mentioned in 1 Mac 5^{66} cannot be the well-known Samaria, and is apparently an error. The place intended seems to be *Marisa* (Marishah, now *Kh. Mer'ash* near *Beit Jibrin*), a reading found in an ancient Latin version. See Josephus, *Ant.* XII. viii. 6, and 2 Mac 12^{35}. C. W. WILSON.

SAMARIA, TERRITORY OF (ἡ Σαμαρεῖτις χώρα, Σαμάρεια, Σαμαρία; Jos. χώρα Σαμαρέων; *Samaria*).—At an early period the name of the city was applied to the kingdom of the ten tribes, and as the limits of that kingdom varied (2 K $10^{32.33}$ 15^{29}, 1 Ch 5^{26}), so did those of the territory called Samaria. Thus the 'king of Samaria' (2 K 1^3, Hos 10^7) is the king, and the 'cities of Samaria' (1 K 13^{32}, 2 K $17^{24.26}$ 23^{19}) the cities, of the Northern kingdom; and the 'mountains of Samaria' (Jer 31^5, Am 3^9) is simply another term for the hill-country of Ephraim (AV Mt. Ephraim). The name Samaria is used in its extended sense in 1 K 18^2, 2 K 17^{28} 23^{18}, 2 Ch 25^{13}, Ezr 4^{17}, Neh 4^2, Am 3^{12}.

In the Apocrypha (1 Es $2^{16.25}$, Jth 1^9 4^4, 1 Mac 3^{10} 5^{66} $10^{30.38}$ $11^{28.34}$, 2 Mac 15^1) and in NT (Lk 17^{11}, Jn $4^{4.5.7.9}$, Ac 1^8 8^1 9^{31}) the name Samaria denotes the central of the three districts—Judæa, Samaria, and Galilee—into which the country west of Jordan was divided. According to Josephus (*BJ* III. iii. 1, 4, 5), Samaria was bounded on the north by Galilee and the territory of the free city of Scythopolis, its most northerly village being Ginæa (*Jenîn*), in the great plain of Esdraelon. It extended S. to the toparchy of Acrabatta, *'Akrâbeh*, and the villages of Anuath, *Kh. 'Aina*, and Borceos, *Berkît*, which were about 15 Roman miles S. of Shechem, and belonged to Judæa. In the Jordan Valley the boundary ran N. of Sartaba, *Kurn Surtaba* (Mishna, *Rosh hash-shana*, ii. 3); and on the west to the N. of Antipatris (Talm. Bab. *Gittin*, 76*a*). It was separated from the sea on the W. by the coast district of Judæa, which stretched N. to Ptolemais (*BJ* III. iii. 5).

Samaria is a land of hills and valleys, with here and there upland plains of great fertility. Carmel and other hills are partially clothed with dense thickets, and, in places, remnants of former forests can still be seen. In the plains and open valleys the rich soil yields abundant harvests of wheat, oats, and maize, whilst on the terraced hillsides the fig, the olive, and the vine bring forth their fruit in due season. Josephus says truly (*BJ* III. iii. 4) that the country was fruitful and well wooded; it abounded in wild fruit and in that produced by cultivation; its water was good, and in consequence of the excellence of its grass the cattle yielded more milk than elsewhere.

Samaria is an open country, and was always at the mercy of hostile invaders. It seems to have offered little resistance to Joshua, and, after the conquest, Canaanites, Midianites, Syrians, Assyrians, Greeks, and Romans overran it with comparative ease. No great battle was fought within its limits, and the stirring episodes of mountain warfare, so frequent in Judæa, are unknown to its annals. On the other hand, it is remarkable for the number of fortified towns or 'strong places' that guarded its approaches. The open character of Samaria facilitated communication. Great highways of commerce passed through it, and chariots were used at a very early period. Amongst the trade routes were that from the coast, through the remarkable pass between Ebal and Gerizim, to the districts east of Jordan; and those from the Maritime Plain across the hills to Megiddo (*Lejjûn*), and En-gannim (*Jenîn*), and thence to Bashan and Damascus. To these well-travelled roads was due in great measure the close connexion that has always existed between Samaria and the trans-Jordanic regions, and the readiness with which the Jews of the district succumbed to the influence of the surrounding paganism.

After the Assyrians had conquered the kingdom of the ten tribes, they carried away the people to Assyria, and brought men from 'Babylon, and from Cuthah, and from Avva, and from Hamath and Sepharvaim,' and placed them in the 'cities of Samaria' (2 K 17$^{6. 24. 26}$; *Ant.* IX. xiv. 1). At a later date, during the reigns of Esar-haddon and Assur-bani-pal (Osnappar, RV), the number of Assyrian colonists in Samaria was largely increased (Ezr 4$^{1. 9. 10}$). In 2 K 17^{29} these colonists are termed 'Samaritans.' Josephus says (*Ant.* IX. xiv. 3, X. ix. 7, XI. iv. 4) that they were called Cuthæans in Hebrew, from Cuthah, the city of their origin, and Samaritans in Greek, from the country to which they were removed; and he regarded the Samaritans of his day as their descendants. The Cuthæans and others brought their national gods with them, an act which was believed to have brought on them the vengeance of the God of the land. One of the captive Jewish priests was consequently sent to teach them 'how they should fear the LORD.' The result appears to have been that they adopted the Jewish ritual, but combined the worship of J″ with that of their graven images (2 K 17$^{25-41}$; *Ant.* IX. xiv. 3). Possibly, many of their high places and altars were destroyed during the reforms of Josiah (2 K 23^{19}, 2 Ch 34^{6}).

The Captivity freed the Jews from their old sin of idolatry, and intensified the exclusiveness of the Jewish character. When, therefore, the Jews returned from Babylon, and the Samaritans offered to assist them in rebuilding the walls and temple at Jerusalem, the proffered aid was refused, and the Jews excluded the Samaritans from all participation in their worship. Quarrels naturally arose, and led to a mutual enmity between the two peoples, which was marked by frequent outbursts of active hostility. The Samaritans were generally the aggressors. They attempted to prevent the rebuilding of Jerusalem (Ezr 4$^{7-24}$, Neh 4$^{7-13}$; *Ant.* XI. iv. 4); seized Jewish lands, and carried Jews off as slaves (*Ant.* XII. iv. 1). On one occasion they brought the bodies of dead men into the cloisters of the temple (*Ant.* XVIII. ii. 2), and on another they killed Galilæans who were passing through Samaria on the way to Jerusalem. This last outburst gave rise to disputes, which were referred to Rome for settlement (*Ant.* XX. vi. 1–3; *BJ* II. xii. 3–7). The Samaritans were always ready to claim kinship with the Jews when the latter were prosperous (*Ant.* IX. xiv. 3, XI. viii. 6); but at other times they repudiated the relationship, and acknowledged their Assyrian origin (Ezr 4^{2}; *Ant.* XI. iv. 3, 9, XII. v. 5). The feeling of the Jews towards their enemies is indicated by the term of reproach, 'Thou art a Samaritan, and hast a devil' (Jn 8^{48}); by the words of Jesus son of Sirach (Sir 50$^{25. 26}$); and the mutual hostility explains Christ's command to His disciples not to enter into any city of the Samaritans (Mt 10^{5}).

Samaria, after its conquest by Assyria, was ruled by Assyrian, Babylonian, and Persian governors until Syria and Palestine fell to Alexander after the battle of Issus. The Samaritans hastened to proffer aid to the conqueror, and in return were granted, according to Josephus, permission to build a temple on Mt. Gerizim (*Ant.* XI. viii. 4, 6, XIII. iii. 4, ix. 1). In this temple, which, more probably, however, was built by Sanballat during the time of Nehemiah, the Samaritans offered sacrifices after the manner of the Jews. But when Antiochus IV. Epiphanes took Jerus. and desecrated the temple, they were quite ready to address him as god, and ask his permission to call their place of worship the temple of Zeus Hellenius (*Ant.* XII. v. 5). After having more than once changed hands during the struggle between Alexander's successors, Samaria was given by Antiochus III. the Great, as part of the dower of his daughter Cleopatra, to Ptolemy V. Epiphanes (*Ant.* XII. iv. 1). During the reign of the latter's successor, Ptolemy VI. Philometor, the Samaritan colony in Egypt, which owed its origin to the settlement of Samaritans serving in Alexander's army (*Ant.* XI. viii. 6), and to the removal of Samaritans from Palestine to Egypt by Ptolemy I. Soter (*Ant.* XII. i. 1), maintained, in controversy with the Alexandrian Jews, that according to the laws of Moses the temple was to be built on Gerizim and not at Jerus. (*Ant.* XIII iii. 4). Samaria was conquered by John Hyrcanus, who destroyed the temple on Gerizim (*BJ* I. ii. 6, 7); and, after passing to the Romans when Pompey intervened in the quarrel between Hyrcanus II. and his brother, it was given to Herod by Augustus (*Ant.* XV. vii. 3). On Herod's death it was granted to his son Archelaus (*Ant.* XVII. xi. 4; *BJ* II. vi. 3); but, on his banishment, it was added to the province of Syria (*Ant.* XVII. xiii. 5; *BJ* II. viii. 1). In the time of Pilate a large number of Samaritans were killed when on their way to Gerizim, and to Pilate's action on this occasion Josephus ascribes his recall (*Ant.* XVIII. iv. 1, 2).

In the days of our Lord the Samaritans formed an important element in the population; and though they probably had a strong admixture of Jewish blood in their veins (2 K 23$^{19. 20}$, 2 Ch 34^{6}, Ezr 6^{21}, Jn 4^{12}; *Ant.* X. iv. 5), they had not lost their distinctive character as aliens by descent (Lk 17^{18}, cf. 10$^{29-37}$), and apparently in religion (Jn 4^{22}). The gospel appears to have been first preached to the Samaritans by Philip, and with some measure of success (Ac 8$^{5-25}$). But it cannot have been very generally accepted, for the Samaritans more than once came into collision with the Roman emperors and the Christians. Vespasian quelled a threatened rising by slaying 11,600 of them on Mt. Gerizim (*BJ* III. vii. 32); and they were so severely punished by Zeno and Justinian for murdering Christians and destroying churches, that they never afterwards recovered. Benjamin of Tudela, A.D. 1163, found 'Cutheans, who observe the Mosaic law only, and are called Samaritans,' at *Nâblus*, Cæsarea, Ascalon, and Damascus (*Early Travels*, p. 81). They are now represented by a few families at *Nâblus*.

LITERATURE.—Conder, *Tent-Work*, i. 80–109; Stanley, *Sinai and Palestine*, 229–248; G. A. Smith, *HGHL* 321–343; Guérin, *Samarie*; Schürer, *HJP* I. i. 190 f., 280, II. i. 5–8; Baedeker-Socin, *Pal.*^{3} 226 ff.; Buhl, *GAP*, 207. C. W. WILSON.

SAMATUS (Σάματος), 1 Es 9^{34}.—One of the sons of Ezora, corresponding to Shemariah or Shallum in Ezr 10$^{41. 42}$.

SAMECH (ס).—The fifteenth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 15th part, each verse of which begins with this letter. In this Dictionary it is transliterated by *ṣ*.

SAMELLIUS (B Σαμέλλιος, A Σεμ- Σεβ-; AV Semellius), 1 Es $2^{16.\,17.\,25.\,30}$=Shimshai the scribe, cf. Ezr 4^{8} etc.

SAMEUS (B Θαμαῖος, A Σαμαῖος; AV Sameius).—Of the sons of Emmer (1 Es 9^{21}), answering to Shemaiah, of the sons of Harim, Ezr 10^{21}.

SAMGAR-NEBO (סַמְגַּר־נְבוֹ).—An officer of Nebuchadnezzar, who, according to the MT of Jer 39 [Gr. 46]^{3}, took his seat, along with other princes, in the middle gate of Jerusalem after the Chaldæan army had forced its way into the city. If the name (LXX Bℵ Σαμαγώθ, A Εἰσσαμαγάθ) is to be accepted, it may be=*Šumgir-Nabu*, 'be gracious, O Nebo' (Schrader, *COT* ii. 109).[*] The text has in any case suffered corruption, as is evident, apart from other considerations, from the multitude of variant readings exhibited (cf. Swete, *OT in Greek, ad loc.*) by the LXX. If we retain the name Samgar-nebo, we ought perhaps to drop the first 'Nergal-sharezer,' and read: 'Samgar-nebo the Sar-sechim [a title as yet unexplained], Nebushazban the Rab-saris [cf. v.^{13}] and Nergal-sharezer the Rab-mag' (so Sayce in art. NERGAL-SHAREZER above). Another course is to reject (with Giesebrecht) the name Samgar-nebo entirely, taking סמגר as a dittography of רב מג, and joining נבו to the following, נבושרסכים thus = נְבוּשַׁזְבָּן of v.^{13}. It must be confessed that the means are not yet at our disposal for pronouncing with confidence on the true text. See, for another expedient, art. SARSECHIM. J. A. SELBIE.

SAMLAH (שַׂמְלָה).—An Edomite king, described as 'of Masrekah' (which see), Gn $36^{36f.}$ (B *deest*, A Σαλαμά, *D* Σαμαλά)=1 Ch $1^{47f.}$ (B om., A Σαμαά).

SAMMUS (Σαμμούς, B Σαμμού), 1 Es 9^{43}=Shema, Neh 8^{4}.

SAMOS (Σάμος), one of the most important islands in the Ægæan, is separated from the coast of Ionia by the narrow straits in which the Greeks met the Persian fleet and won the decisive victory of Mycale, B.C. 479. It was the centre of Ionian luxury, art, and science; and, from the moment when it became a member of the Ionic confederacy to the time when it was deprived of its freedom by Vespasian, its history is full of interest. In B.C. 84 it was united to the province of Asia, and in B.C. 17 it was made a free city by Augustus. This was the political status when St. Paul, after passing Chios, touched at Samos (Ac 20^{15} RV) on his return from his third missionary journey. There were many Jewish residents on the island (1 Mac 15^{23}), who obtained numerous privileges when Marcus Agrippa and Herod visited Samos. The latter also made presents to the Samians (*Ant.* XVI. ii. 2, 4; *BJ* I. xxi. 11). Descriptions of the island and its history will be found in Tournefort, *Voyage de Levante*, ii. 103 etc.; Ross, *Reise auf die griech. Inseln*, ii. 139 etc.; Murray, *Handbook to Asia Minor*, etc. pp. 359–361. C. W. WILSON.

SAMOTHRACE (Σαμοθράκη, *i.e.* the Thracian Samos).—An island of considerable size in the Ægæan Sea, to the south of the coast of Thrace, and north-west from the city of Troas. St. Paul and his companions, sailing from Troas, made a straight run, without tacking (see RHEGIUM), across the sea to Samothrace (Ac 16^{11}); and the next day they sailed north to NEAPOLIS, on the Thracian coast, which, according to Pliny (*Nat. Hist.* iv. 23), was about 38 miles from the island, though the actual distance is hardly more than about 20 miles. At the northern end of the island was the town, called by the same name; and here, doubtless, it was that the ship which carried St. Paul cast anchor for the night. Ac 20^{6}, also, probably implies that the ship anchored for a night at Samothrace; but no details are recorded. There was no good harbour at any point round the island, which therefore was difficult of approach (*importuosissima omnium*, as Pliny says); but the ancient Greek sailors always liked to anchor for the night, if convenient or possible (Ac $20^{14.\,15}$).

Samothrace is a mountainous island; and in the view from the Trojan coast it forms a huge mass behind and towering over the intermediate island of Imbros. Its summit rises to 5240 ft.; and there Homer describes the sea-god Poseidon taking his seat to survey the battle before Troy. In a similar way the island of Samos on the coast of Ionia forms a huge mass rising boldly out of the sea; and the common name Samos is probably due, not to colonization from one to the other, nor to common stock in the inhabitants, but to the character of the islands, each in the distance looking like a single huge mountain.[*]

Samothrace, being unsuited for a trading centre by its harbourless nature, played little part in Greek history. Its only importance is due to the cult of the mysterious gods called *Cabiri*, who were said to have been worshipped by the original Pelasgian inhabitants of the island (Herod. ii. 51). The Mysteries of the Cabiri rivalled those of Eleusis in reputation and attractiveness during the later centuries of Greek history; and Philip of Macedon was initiated at Samothrace.

W. M. RAMSAY.

SAMPSAMES (ℵV Σαμψάμης, which is followed by AV and RV; A Σαμψάκης; Lat. VSS *Lampsacus*).—One of the places to which the Romans are said to have written in favour of the Jews, 1 Mac 15^{23}. It is usually identified with *Samsun*, a seaport town on the Black Sea, between Sinope and Trebizond (cf. Ramsay, *Hist. Geog. of Asia Minor*, 273)

SAMSON.—

iii. The sources.
iv. The historical background.
v. Historical importance.
vi. Significance for the history of religion.
vii. Significance for the history of civilization.
viii. Mythological traces.
Literature.

i. THE NAME.—The pronunciation *Samson* is derived from the Vulgate, which follows the LXX Σαμψών, using a vowel older than the ĭ of the Heb. שִׁמְשׁוֹן *Shimshôn*. The name is not to be derived from שמן, or שמם, or שָׁמֵשׁ 'serve' (cf. Moore on Jg 13^{24}), but is formed from שֶׁמֶשׁ 'sun' by means of the denominating ending וֹן; a diminutive sense ='little sun' (cf. the Arab. name *Shumais* in Nöldeke, *ZDMG* xl. p. 166) is less probable than a derivation with the sense 'sunny,' 'sun's man' (cf. Ges.-Kautzsch, *Gram.*^{26} § 86 f. g.). It is natural to think of the Danite city BETH-SHEMESH, which was not far from Samson's birthplace. The name Samson is confined in the OT to the judge (but cf. שִׁמְשַׁי *Shimshai*, Ezr $4^{8f.\,17.\,23}$), and is found nowhere but in Jg 13–16, which have him for their subject (the Syr. and LXX Luc. wrongly introduce him in 1 S 12[11]). The same thing is true of the name of his father MANOAḤ (מָנוֹחַ 'rest,' 'resting-place'), Jg 13[2ff.] 16[31]; but after the Captivity the inhabitants of Ẓor'ah, Samson's native town, are called (1 Ch 2[52-54]) MANAHETHITES (מָנַחְתִּי), a circumstance which might imply that Manoaḥ was the *heros eponymos* of a Danite clan, and was only afterwards assigned as father to the judge Samson (cf. the case of JEPHTHAH in Jg 11[1]).

---

[*] On the similarity of the names *Shamgar* and *Ṣamgar* see Moore, *Judges*, 106.

[*] Constantine Porphyr. (iii. p. 41, Bonn ed.), Eustathius, and Strabo (pp. 346, 457) say that Σάμος meant 'hill'; and the name was common in the Greek world.

ii. THE NARRATIVE.—

Ch. 13. The barren wife of the Danite Manoaḥ of Ẓor'ah has a vision of the angel of Jahweh in the form of a man, who promises to her a son who from his mother's womb is to be a 'consecrated one' to God (נְזִיר אֱלֹהִים, see NAZIRITE), and who is to make a commencement of freeing the people from the Philistine yoke. Therefore his mother is to abstain from all intoxicating liquors and guard against everything that defiles; no razor is to come upon the head of the child. At Manoaḥ's prayer the angel appears a second time, and repeats his instructions. Only after he ascends in the flame of the offering presented to Jahweh and disappears, do Manoaḥ and his wife recognize who had been their guest. The boy, when born, is named Samson, and grows up under the blessing of Jahweh.

Ch. 14. Arrived at manhood, Samson, not without opposition from his parents, makes choice of a Philistine girl at Timnah to be his wife. On his way there he kills a lion, and on his return journey eats of the honey which he finds in the carcase. At the wedding feast he makes this the subject of a riddle for the young men, and, when his young wife coaxes him into telling her the solution and betrays it to them, he leaves her in ill humour.

Ch. 15. Having recovered himself, Samson will visit his wife in her parents' house, but finds that she has been given by her father to another. In revenge he destroys the ripe harvest fields of the Philistines by foxes with burning brands. The Philistines retaliate by burning his wife and all her house, an act which Samson again avenges by slaughtering many of them (vv.[1-8]). Having made his escape to the territory of Judah, which, however, owned the Philistine suzerainty, he allows himself, on their menaces, to be handed over by the inhabitants bound, but bursts his bonds and slays a thousand Philistines with the jawbone of an ass. The wearied Samson is revived by Jahweh by means of a spring flowing from the jawbone (vv.[9-19]).

Ch. 16. While Samson is visiting a harlot at Gaza he is betrayed, and his enemies think to seize him in the morning. But he catches up the folding-doors of the city gate, posts and all, and carries them to the top of a mountain by Hebron (vv.[1-3]). His paramour, DELILAH, in the Vale of Sorek is bribed by the Philistines to deliver him over to them: three times he deceives her as to the source of his strength, and bursts the bonds wherewith she has bound him. At last he confesses that his strength lies in his God-consecrated hair, and after he has been shaved while asleep he falls defenceless into the hands of the Philistines. The latter put out his eyes and set him to slaves' work in the prison at Gaza (vv.[4-22]). At the festival in honour of their god DAGON, the conquered foe is to be exhibited as a spectacle to the assembled people. But with the new growth of his hair the blind man feels his strength return, and after praying to Jahweh he pulls down the pillars of the house in which the Philistines are assembled, so that they all perish along with himself in the ruins. His body is buried by his relatives in the family sepulchre. His judgeship had lasted twenty years (vv.[23-31]).

iii. THE SOURCES.—Of all the narratives in the Book of Judges, that about Samson is the only one that is not composed from the two ancient sources which supplied the material of the book—in all probability the Judæan source (J) and the Ephraimitic (E). The attempt to distinguish two sources throughout has only once been made, and that superficially, by von Ortenberg, but cannot be regarded as successful. On the other hand, it has been rightly recognized by van Doorninck (1879) and Stade (1884) that ch. 14 has undergone extensive revision, and Böhme (1885) has proved the same for ch. 13. In both chapters the aim of this revision is religious; the whole personality of Samson is meant to be brought under the religious point of view more than is the case in the particular narratives. Böhme has shown at the same time that ch. 13 bears marks of the source J, and thus the whole Samson history will have to be assigned to this source. That E has no share in it is explained by the circumstance that for the Ephraimitic source the judge who 'began to deliver Israel out of the hands of the Philistines' (13[5]) was not Samson but Samuel (1 S 7[2ff.]). Whether the Samson history, whose scene was the neighbourhood of Judah, had only a local importance such as to prevent its being made use of by E, or whether that history was too repugnant to its theocratic character (cf. Eb. Schrader, who calls E 'the theocratic narrator'), in any case Samuel takes the place of Samson completely in E (1 S 1–7; cf. esp. the birth story in 1 S 1 with Jg 13), whereas in J Samuel plays no part at all as judge and military commander.

But if the Samson story is derived from only one source, yet, apart from the above-mentioned revision, it is not on that account a literary unity in all its parts. On the contrary, the various anecdotes about Samson were originally related separately and only afterwards collected and arranged. Later than any of them, we may assume, is the story of his birth (ch. 13), just as is the case with almost all ancient heroes, even those of them who otherwise appear in the clearest light of history.

Samson is included by the Deuteronomistic redaction, to which the Book of Judges owes its shape, amongst the 'great judges'; but this, it appears, was not done without a considerable amount of weeding out. The concluding formula of the Deuteronomic redaction as to the duration of Samson's judgeship appears already at the end of ch. 15 (v.[20]), and is then repeated in 16[31]. This should in all likelihood be explained on the ground that R^D closed his history of Samson with ch. 15, and did not admit ch. 16 into his Book of Judges. The reason is easily discovered. Down to the close of ch. 15 Samson is the husband of *one* wife, and love to her along with love to his native land is the motive of all his actions. But in ch. 16 he appears as the slave of sensual passion, caught in the toils of a succession of paramours, to the last of whom he even betrays the secret of the Divine strength that animated him. If this itself must have appeared to the mind of R^D quite unworthy of a God-called judge (cf. 2[16. 18f.]), his fate also was an unfitting one, namely that he should end his life as prisoner and slave of the unbelievers. Hence R^D excluded ch. 16 in the same way as ch. 9 (the story of Abimelech). He was indifferent to the circumstance that thus the account of Samson's death disappeared; neither is there any mention of the death of Barak or of Deborah, and only a supplementary allusion to that of Ehud (4[1]). It was not till the last redaction of Judges that ch. 16 was once more united with the preceding chapters, but the first concluding formula (15[20]) was still piously allowed to remain. How much of the minor alterations of the old text is to be attributed to this last redaction, cannot be determined.

iv. THE HISTORICAL BACKGROUND.—The tribe of Dan, to which Samson belongs, possessed not only *one* tribal territory, but two,—the one west of Jerusalem, situated between Benjamin and Judah; the other in the extreme north, at the lower sources of the Jordan, bordering upon the territory of Naphtali. Samson comes from the southern territory; his native town Ẓor'ah (צָרְעָה), one of the principal places belonging to the tribe (Jos 19[41], Jg 18[2. 8. 11], cf. also Neh 11[29]), still bears the same name at the present day. It lies on the northern slope of the fertile *Wâdy es-Ṣurar*, through which the railway from Jaffa to Jerusalem now runs, opposite the ancient Beth-shemesh (cf. G. A. Smith, *HGHL* 218 f.). But the question is, whether Samson lived (or is supposed to have lived) *before* or *after* the emigration of the 600 Danites who founded the northern settlement of the tribe. The history of this expedition is given summarily in Jg 1[34] (to be supplemented by Jos 19[47] [LXX]), and in full detail in

Jg 17. 18. Since the account of it in the last-mentioned two chapters is preceded by the story of Samson, one might be disposed at first to decide for the former of the above alternatives. But it must not be forgotten that chs. 17–21 are appendices to the Book of Judges, and that their present position tells us nothing about their order in time. When the 600 Danites struck off to the north, their tribe was still contending for its independence, although with little prospect of being able to assert it. The braver and more resolute members of the tribe having taken their departure, the remnant will have abandoned all further struggle and rested content that their foreign lords should leave them in possession of the soil, probably upon condition of paying tribute. But this is the condition of things which we meet with in the story of Samson. The Philistines have penetrated far into the Shephēlah, Timnah (the modern *Tibne* only 4 or 5 miles S.W. of *Ṣor'a*) belongs to them. Between them and the Danites there is no state of war, but unrestricted intercourse, *connubium* and *commercium*—nay, the whole life of the Danites appears to gravitate towards the Philistine cities. The power is entirely in the hands of the Philistines: when Samson gets into trouble with them, his native town cannot shelter him. But even the territory of Judah, to which he flees, offers no security, for it, too, is subject to the Philistines, as its inhabitants (Jg 15^{11}) expressly affirm as a fact generally recognized. Samson's own demeanour is not at all that of an enthusiast for political independence and deliverer of his people from the Philistine yoke. He belongs, on the contrary, to that class amongst his countrymen who are disposed to modern and liberal ideas, and who have no scruple about entering into relations with the Philistines and even connecting themselves with them by marriage. This strange conduct is already excused and explained in Jg 14^4 as being in obedience to a Divine commission, in order that Samson might find an opportunity of damaging the Philistines. But this verse does not belong to the oldest form of the narrative, and is actually contradicted by other passages. Samson himself offers to the Judahites (15^{11}) the excuse that he had not attacked the Philistines, but simply requited the wrong done to him by them. And in precisely the same fashion he always asserts his innocence to himself and to his enemies (cf. $15^{3.7}$): if they would only leave him in peace, they should be safe from him, so he thinks at least. In the case of all his exploits, then, we have to do not with conscious attempts to deliver Israel, but only with the involuntary uprising of a subject people against the alien and unloved oppressor, with little 'pin-pricks,' each of which is regarded as a heroic deed and greeted with malicious joy. But ten hot-blooded and foolhardy Samsons would not have been able to loosen the chains of Israel's bondage. This was only accomplished when the Philistines, who had ventured to attack the kernel of the Isr. territory, were, after some initial successes (1 S 4), completely beaten by the uprising of Mt. Ephraim (1 S 13) and afterwards of all Israel under the leadership of Saul and David, and driven back within their own narrow territory. By means of these wars Samson's home became once more free, and a permanent possession of Israel. The Samson stories are probably intended, then, to be understood as belonging to the period which immediately preceded the Philistine war of 1 S 4, and are thus, apart from the appendices Jg 17–21, in the right place. That implies at the same time that the tradition, at first oral, embodying them must also go back to the same period. In a later age there was no possibility of their arising.

v. HISTORICAL IMPORTANCE.—According to the scheme of the Book of Judges as its programme is set down by the Deuteronomic redactor in Jg $2^{11ff.}$, Samson was 'raised up' by Jahweh to be 'judge' over all the children of Israel, in order to deliver them from the rule of the Philistines, to which Jahweh had given them over on account of their unfaithfulness (cf. 13^1). We saw that in the case of Samson there can be no mention of such deliverance, and just as little of an activity on behalf of, or any judgeship over, the whole of Israel. What we are told of him, at all events, claims nothing more than quite a local importance. We need not wonder, then, that R^D left out ch. 16 (see above), but only that he allowed Samson to pass as a 'judge' at all. But this may be explained as due to the example set in the pre-Deuteronomic Book of Judges, the work of R^{JE} (cf. Budde, *Kurzer Hdcom.* x ff., xv f.). The rank of a divinely-sent judge could not be henceforward taken from Samson. His credentials rest especially on ch. 13, the Divine promise and wonderful accomplishment of his birth. We shall have to regard the whole of this chapter as a later addition to the particular Samson narratives which were gathered from the mouth of the people and lie before us in chs. 14–16. As a literary composition, however, that chapter need not be more recent than these others. It is worthy of note that even it still confines the historical importance of Samson within very narrow limits. All that is said of him in v.^{5} is that 'he shall *begin* to deliver Israel out of the hand of the Philistines.'

vi. SIGNIFICANCE FOR THE HISTORY OF RELIGION.—The glaring contradiction between the Divine call of Samson and his far from exemplary manner of life caused much racking of the brains and much offence to the older theologians. A correct judgment of his personality is possible only when, on the one hand, we leave out of view the Christian standard of morality, and when, on the other, we take into account that Samson was originally not a religious but a popular hero. Still there remains even in the oldest strata of the narratives one religious trait, and it is this which has made it possible to represent him as under theocratic enlightenment. Any endowment beyond the ordinary human standard, or any conduct quite opposed to what is otherwise recognized as the character of a person, is explained in antiquity, and so also in the OT, as due to a superhuman being, a spirit, having taken up its abode in the person. On this account all who are mentally deranged are supposed to be the dwelling-place of a spirit, by whom they are possessed. In this way also the superhuman strength of Samson is explained; and as the Philistines, the enemies of Israel, suffer through his deeds, the spirit which works through him is the spirit of Jahweh, the God of Israel. The last verse of ch. 13 notes the first occasion upon which the spirit of Jahweh moves him, without telling us how this working showed itself. In $14^{6.19}$ 15^{14} 'the spirit of Jahweh came upon him' to enable him to perform the greatest feats of strength. It is noteworthy, however, that this expression is wanting in 14^8. This appears to point to a different way of viewing the matter, and, as this same way entirely dominates ch. 16, it may be regarded as the more original. According to Samson's own statement in 16^{17}, which is confirmed by vv.$^{20.28}$, his strength is not a new thing every time, imparted at the moment of need through his being filled with the Divine spirit, but is a constant possession, connected with the hair of his head, on which no razor comes, because from his mother's womb he has been a consecrated one of God, a Nazirite (נָזִיר).

The Nazirate is a religious institution of undoubtedly the highest antiquity; it is named as early as Am $2^{11f.}$, along with prophecy, as one of the special blessings which Jahweh has bestowed upon His people. At the same time it persisted in Israel down to the days when Israel's religion had undergone a great spiritualizing, for not only do we find it in Nu 6 in ths legislation of the post-exilic period as a firmly established sacred usage, but we meet with its practice in Jerusalem at the temple even in the time of the Apostls Paul (Ac $21^{23f.}$). But in the OT Samson is the only Nazirite we encounter; for the consecration of Samuel is of quite a different character, and the words 'and there shall no razor come upon his head' in 1 S 1^{11} certainly do not belong to the original text. From the story of Samson, now, we can gather that the essence of the Nazirite vow consisted simply in allowing the hair to grow. At the expiry of the period fixed for the vow the hair was shorn by the priest and cast into the sacrificial flame (Nu 6^{18}, Ac 21^{24}).* Even Samson's lifelong Nazirats (Jg $13^{5.7}$) can scarcely be understood as implying that he is to carry his hair with him down to the grave, but rather that he has it shorn from time to time, and each time consecrates the shorn hair to Jahweh. But, as the Nazirite bears the God-consecrated offering upon his head, he naturally requires to keep his body, which ministers nourishment also to the hair, pure from everything that is repugnant to the Deity. The regulations on this subject will undergo change and enlargement with the times; the prohibition of wine (including, no doubt, all intoxicating liquors) belongs certainly to the oldest state of things, and is witnessed to already in Am 2^{12}. An intoxicated man is possessed by another spirit which disputes God's authority. Samson, indeed, does not impress us as one who practised self-restraint in any direction; his taking food from ths carcase of the lion (Jg $14^{8f.}$) is directly opposed to the enactments of Nu $6^{6ff.}$, for ths term 'dead body' there certainly includes *a potiori* the carcases of animals. But from these contradictions between the Samson story and the Nazirate law we can only conclude that the story does not proceed throughout on the presupposition of his being under a Nazirite vow. The contradictions must have been early observed, and this explains why what was wanting in the cass of Samson himself, namely abstinence from wine and from unclean food, is compensated for in $13^{4.14}$ by attributing this abstinence to his mother for the period of her pregnancy.

According to ch. 16, Samson's strength resides in the unshorn hair of his head, a belief which in the case of the Nazirate is explained by the consecration in virtue of which Jahweh Himself dwells in ths hair consecrated to Him. Amos, too, appears to attribute special powers to the Nazirites ($2^{11f.}$), but what is the nature of these we are not told. But the notion that some mysterious power resides in the hair, apart even from such special consecration, is extraordinarily widespread. A large collection of facts directly connected with supposed active and passive bodily powers may be found in J. G. Frazer, *The Golden Bough* ², iii. 390 f. The Sunda Isles of the present day contribute much material to this collection, but so also does Europe of the Middle Ages, especially in the matter of processes against witches. The reader may note also what is said in the same work (i. 370 ff., cf. also p. 31) about letting the hair grow, and about the dangers connected with the cutting of it. The fear of these rises to such a pitch that, for instance, the chief of the Namosi upon the Fiji Islands, every time he had his hair cut, had to devour a man, in order to ward off the dangers which threatened him. We have therefors to do here with convictions diffused over the whole world, and which certainly go back to very early times. Even in Israel they must have been much older than the religion of Jahweh, but they were brought within its scope in the form of the Nazirate. From the story of Samson and from Am $2^{11f.}$ we may infer with some probability that Israel was conscious that the blessing of the Nazirate gave them an advantage over the Philistines and the Canaanites; and if that is so, we must hold that the Nazirate was established in Israel prior to the conquest of Canaan.

vii. Significance for the History of Civilization.—The story of Samson is specially important from this point of view. Above all, we see from it that the ideal of the country hero was exactly the same in Israel then as it is at the present day. The lion of a village must be first in success with the female sex, first in bodily strength, courage, and fondness for brawling, and first in mother wit. Samson displays the last-named quality in his riddle (ch. 14), in his ever-varied devices against the Philistines, and in the witty fashion in which he ever anew deceives Delilah. Veracity by no means belongs to the list of virtues of the country hero, and as little does faithfulness in love. Excess, or at least enormous capacity in eating and in drinking strong liquors, is amongst the things that may almost be taken for granted. It is strange enough that this trait is not strikingly displayed in Samson. Who knows whether from the store of legends that circulated regarding him there may not have been dropped this or that portion dealing with the subject in question? As to the matter of his enormous bodily strength, every village, or at least every shire, has still its Samson, whose displays of strength, as recorded in popular stories, speedily go, without the calling in of any superhuman causes, beyond what is possible for man. Many of our readers, especially those who have been brought up in the country, will be able to substantiate what we have said. Such conditions of life, which we can still detect everywhere, are the earliest soil of the Samson stories; everything else is only secondary.

We have, further, in ch. 14 a graphic description of the wedding festivities in ancient Israel, the only one which has come down to us. We see from it that on such occasions the proceedings were essentially the same as in the modern East, and, in some important points, even the same as at our own Jewish weddings. There is a seven days' feast (v.^{17}), above all with plenty of eating and drinking of wine (מִשְׁתֶּה), in which the whole community takes part. The thirty companions (v.^{11}), with their head, who is probably meant in 14^{20} and 15^{2}, are the conductors of the bride (cf. the 'sixty valiant men' of Solomon in Ca 3^{7}, and the 'friend of the bridegroom' in Jn 3^{29}). They would have to defray the expenses of the wedding, as is still the custom in Syrian villages. Samson and the young wife would, as is also the custom there, be called 'king' and 'queen' during the seven days (cf. Budde, *Kurzer Hdcom.* xvii. p. xvii f.). Samson's riddle is only a small part of the amusements of all kinds—songs, dances, games, stories—with which the seven days were filled up.

Although, however, the practices at Samson's wedding are the same as are usual elsewhere, the same cannot be said of the character of the marriage itself. From $15^{1f.}$ it is plain that the young wife did not go after the marriage to Ẓor'ah to Samson's house, but remained in the house of her parents at Timnah. And even if this might appear to be explained on the ground that Samson, according to 14^{19b}, parted from her in anger instead of personally accompanying her in stately procession to Ẓor'ah (cf. 1^{14}), there is not the slightest hint in $15^{1f.}$ that hs purposed subsequently to take her home to Ẓor'ah, but only that he meant to visit her *in her parents' house.* Nor does the kid which he takes with him appear to be an extraordinary present for a special purpose, such as to make up for his anger of 14^{19}, but seems rather to belong to the visit as such. If all this be so, then we have to do with that peculiar ancient form of marriage to which W. R. Smith (*Kinship and Marriage in early Arabia*, pp. 70–76) gavs the nams *ṣadîḳa* marriage. It answers to the ancient social institution of the matriarchate, under which the wife remains with her relations, the husband visits her there, the children belong to the tribe and the family of ths mother. One-sided dissolution of such a marriage and ths contracting of another (cf. Jg 15^{2}) by the woman is also witnessed to amongst the Arabs (*l.c.* p. 65). If Samson's marriage is to bs understood in this way, this does not of course imply that at the time when these stories took their rise all marriages in Israel were of the *ṣadiḳa* type. But we learn again from the ancient Arabic materials collected by W. R. Smith, that, even when the later form of marriage had come to prevail, such *ṣadîḳa* marriages were still contracted when the ordinary marriage was not possible, as, for instance, between members of hostile tribes (*l.c.* p. 71 f.). This may be the explanation in the case before us, where a man belonging to the territory of Israel, which was subject to the Philistines, seeks in marriage a girl of the ruling people. We should perhaps adopt a similar interpretation when it is said that Gideon had a concubine in Shechem (Jg 8^{31}), which still belonged to the Canaanites; and when Abimelech, her son, speaks of himself as a Shechemite and not as an Israelite (9^{2}). If any one thinks it worth while, he may, upon the ground of this ancient social custom, view mors mildly even Samson's relation to Delilah in $16^{4ff.}$ It is surprising indeed that at such a marriage the festivities described in ch. 13 should be the same as at the marriages which constitute the man the possessor (בַּעַל) of the woman; but it may well be that different points of view have here become confused.

viii. Mythological Traces.—Samson's extraordinary strength, which he displays in a number of feats, led even in olden times to a comparison of him with Hercules, and recently such comparisons have gone the length of vain attempts to count up exactly twelve exploits of Samson. After it came to be recognized or believed that the Hercules legend is a solar myth, many in our own century proceeded to take the story of Samson also as a sun-myth, and to interpret it so in detail. The derivation of the name שִׁמְשׁוֹן from שֶׁמֶשׁ tells indeed rather against than in favour of this view, for it is not the way with a nature-myth to borrow or even to derive the name of its hero from the cosmical object which it describes. The derivation from *Beth-shemesh* is a much more natural one. But such mythical explanations are not capable of being refuted in detail, because the elements with which they operate are so simple that any one so disposed may find them in any history, and for the most part in opposite ways. At all events, the strength of Samson requires no such explanation; on the contrary, it is explicable, as we saw, by considerations drawn, on the one hand, from the history of civilization, and on the other from religion. And it is equally certain that none of the narrators of the story is conscious that he is handing on a myth; the features of the contemporary history and civilization are very clearly marked. This does not prevent the supposition that mythical traits may have found their way into these popular narratives. Undoubtedly a *topological* [Gunkel, *Genesis*, p. xv, incorrectly gives this the name 'geological'] motive for a legend appears at work in 15^{17}, where the name 'Height of the Jawbone' is to be explained. It is quite remarkable, too, that the fire-brand foxes ($15^{4ff.}$) recur in Ovid (*Fasti*, iv. 679 ff.) in the Roman cultus, and are explained (*ib.* 701 ff.) by the act of a mischievous boy which exactly resembles the act of Samson. But, *in this instance* at all events, we have not to do with a solar myth; the reader may be reminded how in Poitou 'the spirit of the corn appears to be conceived in the shape of a fox' (Frazer, *l.c.* ii. 283; cf. the whole chapter entitled 'The corn-spirit'). The attempt to give a continuous mythological interpretation of the story of Samson is therefore to be abandoned, although there are various points in it besides the above which may profitably be examined from this point of view.

---

* How large a part was played by the hair-offering in the lifs of ancient peoples, especially of the Semites, may be learned from W. R. Smith, *RS* ² 325–334, cf. also p. 482 ff.

LITERATURE.—The Comm. on *Judges*, esp. those of Moore, in *Internat. Crit. Com.* 1895; Budde in *Kurzer Hdcom.* 1897; Nowack in *Hdkomm.* 1900; and the authorities cited in these. The older literature will be found in Winer's excellent art. 'Simson' in his *RWB*³, 1848.

K. BUDDE.

SAMUEL (שְׁמוּאֵל, Σαμουήλ).—The meaning 'name of God,' which is now generally accepted, is the only one that can be upheld on philological grounds. The author of the early history of Samuel obviously connects the name with the circumstances of Samuel's birth as if שאול מאל=שמואל (1^{20} 'and she called his name Samuel, *saying*, Because I have asked him of the Lord'); but it is impossible to regard this explanation as giving the actual derivation of the name. As is not infrequently the case in the OT, 'the writer merely expresses an assonance, not an etymology, *i.e.* the name שמואל *recalled* to his mind the word שאול *asked*, though in no sense derived from it' (Driver, *Text of Sam.* p. 13 f.). The derivation 'heard of God' (שְׁמוּעַ אֵל) is also etymologically improbable.*

The history of Samuel as set forth in the first Book that bears his name contains so many discrepancies not only as regards the history of the period, but also as regards Samuel's character and position, that it is impossible to assign it to a single author. These inconsistencies can be explained only on the theory that we have two accounts of the history of Samuel, which have been combined by a later editor (see following article). In order, therefore, to obtain a clear conception of the life and work of Samuel, it is necessary to treat the two sources separately.

In the earlier of the two documents from which the Books of Samuel are mainly compiled, Samuel first appears in connexion with the election of Saul as king at Gilgal ($9^{1ff.}$). He is there described as 'a man of God' (9^{6}), or, more accurately, as a *seer* (רֹאֶה as opposed to נָבִיא a *prophet*, 9^{9}), living in the land of Zuph (probably in the hill-country of Ephraim). The narrative opens somewhat abruptly with the story of Saul's search for the asses of his father. After three days' search Saul is on the point of returning homewards, when he is urged by his servant to consult the man of God living in that district (it is not until v.^{15} that we learn his name). Saul's objection, that the seer will certainly expect a present, is met by the servant producing the fourth part of a shekel. They accordingly enter the city and inquire for the seer, whom they meet on his way to the high place. The meeting, however, was no accidental one, for Samuel had been divinely prepared on the previous day for the coming of the Benjamite stranger, and had been instructed to anoint him to be prince over Israel; for, said Jehovah, 'he shall save my people out of the hands of the Philistines.' Samuel accordingly invites Saul to the sacrificial meal, at which a place had been reserved for him, and on the following morning privately anoints him, and informs him at the same time of his Divine mission to deliver Israel from its oppressors. He adds, further, three signs by which Saul may prove the truth of his words, and bids him do as occasion serves him when these have been fulfilled. The signs are fulfilled, and shortly after Saul's return to his father's house the occasion foretold by Samuel presents itself in connexion with the siege of Jabesh-gilead by Nahash the Ammonite. Saul's prompt and successful action in relieving the besieged city arouses the enthusiasm of his countrymen, who crown him king at Gilgal.

The comparatively subordinate position occupied by Samuel, according to this older narrative, and the limited extent of his influence on the affairs of the nation, stand in striking contrast to the traditional view of his life and work. He is here represented as the seer of a small town, who is consulted in matters of difficulty and perplexity by the inhabitants of the district in which he lives, and who is in charge of the local shrine: beyond this district he is unknown to the rest of Israel. Further, his chief claim to fame lies in the fact that on one occasion only he is chosen by Jehovah as His instrument in carrying out His plans for the deliverance of Israel. Lastly, it is noticeable that he has no voice in the establishment of the monarchy; his interest in the matter apparently ceases with the performance of his part in anointing Saul; nor does he appear to have been consulted in the actual election of the king. It cannot, however, be doubted that this older document has been preserved to us only in a very fragmentary form; and we may infer with considerable probability that it originally contained a longer and fuller account of the life and work of Samuel, which was passed over by the editor in favour of the (from his point of view) more satisfactory account preserved in the later document. The explanation of this selection is furnished by the later document, which is obviously coloured by the views and conceptions of a later age, and as such approximates more closely to the standpoint of the editor who combined the two narratives. It remains, therefore, to examine the narrative of the later document, and to estimate how far we can utilize it for the purpose of supplementing the earlier account.

The later narrative commences with the birth of Samuel, and relates how Hannah, the barren wife of Elkanah, on the occasion of the yearly feast made a solemn vow to the LORD that if He would look upon her affliction and give her a man child, she would dedicate him to the service of the sanctuary. Samuel is born in answer to her prayer, and in due time handed over to the care of Eli, the aged priest at Shiloh. His childhood is thus spent within the precincts of the ancient Israelite shrine, where 'he ministered to the Lord before Eli the priest' (2^{11}), and 'grew in favour both with the Lord and also with men' (2^{26}). But the sons of Eli, who in the natural course of events would have succeeded their father, proved unworthy of their sacred office, and provoked the wrath of Jehovah by their abuse of their priestly privileges. In consequence of their sin the destruction of the house of Eli is decreed by Jehovah, who announces His purpose to the youthful Samuel in a vision of the night. The favour of Jehovah, however, which is openly displayed towards the latter, makes it apparent that he has been chosen to succeed to the priestly office, and all Israel recognized 'that he was established to be a prophet of the Lord': for through his agency the word of the Lord was revealed to all Israel (3^{20}–4^{1a}). In the history of the defeat of Israel at Aphek, and of the capture and restoration of the ark by the Philistines (4^{2}–7^{1}), there is no mention of Samuel, who is suddenly reintroduced some time after the return of the ark, in the character of a 'judge,' rather than in that of a 'prophet' or 'priest' ($7^{2\text{ff.}}$). Like a second Moses, he is represented as exhorting the people to turn from their idolatrous practices and to serve Jehovah alone. The people hearken to his words, and in order to confirm their resolution he summons a national assembly at Mizpah, where they make public confession of their sins. The purpose of this gathering, however, is misunderstood by the Philistines, who at once collect their forces to meet what appears to them as a national uprising. Dismayed by the approach of their hereditary enemies, the Israelites beseech Samuel to intercede with Jehovah on their behalf. In answer to Samuel's prayer, Jehovah sends a violent thunderstorm, which scatters the Philistines, and renders them an easy prey to the pursuing Israelites. To commemorate their deliverance, Samuel sets up a great stone and calls the name of it Eben-ezer, or 'stone of help.' According to the writer, this victory marks the downfall of the Philistine domination; for from that time onwards the Philistines 'came no more within the border of Israel,' while the cities 'which they had taken from Israel were restored from Ekron even unto Gath' (7^{14}). In the peaceful times that followed, Samuel is represented as administrating justice throughout Israel by means of a yearly circuit of the chief sanctuaries on the west of Jordan—Beth-el, Gilgal, and Mizpah. As his years increase, he naturally associates his sons with himself in the office of judge; but, like the sons of Eli, they 'walked not in the ways' of their father. For this reason, and also because they desire 'to be like all the nations,' the people demand that a king should be set over them. Their request is viewed with disfavour by Samuel, who plainly regards it as an act of rebellion against Jehovah. But, in compliance with the Divine command, he first sets clearly before them the treatment they may expect at the hands of a king, and then, as they still persist in their demand, takes steps to grant it. For this purpose he once more summons the people to Mizpah, and, after pointing out their ingratitude, directs that lots should be cast for the king: the choice falls on Saul the son of Kish, of the tribe of Benjamin (8^{21}). Samuel now realizes that his life's work is at an end, and in a solemn farewell speech he first bids the people attest the justice of his rule, and then, by means of a brief survey of the national history, warns them against disobeying the word of Jehovah. His exhortation is rendered the more impressive by a miraculous thunderstorm, which frightens the people into a confession of their sin in asking for a king. Their fears are allayed by Samuel, who assures them of Jehovah's favour if they will serve Him truly.

---

* In a recent article on 'The Name of Samuel and the Stem שאל' (*JBL*, vol. xix. pt. i.), M. Jastrow, jr., maintains that the first element (שְׁמוּ) of the compound name *Shĕmû'ēl* should be rendered 'offspring' rather than 'name,' on the analogy of the Assyr. *shumu*, which occurs frequently in the former sense in proper names (*Nebu-shum-ukin, Bel-shum-usur*, etc.): he explains *Samuel* therefore as='son of God,' and compares the correlative *Abiel*. There is, however, no evidence to show that the Heb. שֵׁם ever bore this meaning: the passages cited by Jastrow in favour of it readily admit of the usual signification.

The election of Saul as king, and the consequent establishment of the monarchy, seem to form a fitting conclusion to the work of the last Israelite 'judge'; but the last days of Samuel were destined to be embittered by the foolish action of the king whom he had been chiefly instrumental in appointing. In accordance with the command of Jehovah as announced by Samuel, Saul wages a war of extermination against the Amalekites, but, in deference to the wishes of his people, spares Agag the king and the best of the spoil. Samuel is divinely informed of the king's action, and openly taxes him with disobeying the commands of Jehovah. Saul seeks to palliate his offence, but Samuel ignores his excuses and announces his rejection. He thereupon confesses his sin, and begs for forgiveness; but Samuel merely reiterates his sentence, interpreting the rending of his cloak by Saul as a sign that the latter's kingdom has been 'rent' from him. In response, however, to Saul's appeal, he consents to honour him once more before the people by joining with him in the worship of Jehovah. He then slays Agag with his own hands, and departs to his house at Ramah. This incident marks the close of Samuel's public life; for 'he came no more to see Saul until the day of his death,' but remained in seclusion at Ramah (see art. Ramah), where he died and was buried.

The above sketch of the contents of the later document shows clearly that the writer regarded Samuel as exercising a far wider sphere of influence than the unknown seer of the earlier narrative. The position, indeed, which he assigns to Samuel is that of a second Moses, who rules over the people as the representative of Jehovah, and whose mission it is to win the people from their apostasy to the service of the only true God. Further, he depicts him as exercising the office of a 'judge' (in the sense in which that term is employed in the pre-Deuteronomic Book of Judges (2^{6}–16^{31})), and delivering Israel from the hands of their Philistine oppressors: thus Israel's desire for a king can only be explained as an act of rebellion against Jehovah.

The contrast between the two representations of Samuel is very marked, and at first sight it would appear as if the one must necessarily exclude the other. But though there can be no doubt as to the greater historical value of the earlier narrative, which bears all the marks of a high antiquity, it by no means follows that the later narrative must be rejected as unhistorical. For it must be remembered (1) that the later is not founded on, but is clearly *independent* of, the earlier narrative; and (2) that the view which is taken of the standpoint of the later author does not of necessity affect the general truth of his narrative. Hence, though the earlier narrative contains no account of Samuel's childhood, of his connexion with Eli at Shiloh, and of his intercession on behalf of the people, we have no grounds for regarding these *facts* as other than historical. It cannot be doubted, however, that the *form* in which they have been preserved to us has been largely coloured by the later 'prophetic' point of view. Interpreted by this later standpoint, the establishment of the monarchy, or rather the election of David's predecessor as king, has little to recommend it, and is not unnaturally described as one of many acts of apostasy on the part of ancient Israel. For the purpose of this narrative, it must be remembered, is *religious*; and it does not lie within the writer's scope to estimate the importance of this event in the *political* history of the nation. His interest rather centres in the person of Samuel the prophet, and there is on this account a marked tendency to magnify his office and to overestimate his influence. The extent to which this tendency has affected the narrative is illustrated in a very striking manner by the story of Samuel's intercession on behalf of the people at Mizpah ($7^{2\text{ff.}}$). That Samuel did intercede for the people may be inferred from Jer 15^{1}; but that his intercession was followed by the subjugation of the Philistines (7^{13}) cannot be reconciled with the subsequent history (see the account of Saul's campaign against the Philistines 13^{1}–14^{46}, and especially 14^{52} 'and there was sore war against the Philistines all the days of Saul'). In like manner, we may conclude that the representation of Samuel as a 'prophet,' and his aversion to the monarchy, reflect the point of view of a later age, and have but little foundation in fact. Looking back over the past history of Israel, the writer clearly regards Samuel as the last of the old order of judges, and also as the forerunner of the new order of prophets. That his estimate in the main is a correct one cannot be denied: it is clear, however, that it has largely influenced his portrayal of Samuel's life and work.

In conclusion, it may be pointed out that the account of the anointing of David by Samuel ($16^{1\text{-}13}$), and the second explanation of the proverb, 'Is Saul also among the prophets?' ($19^{18\text{-}24}$), can only be regarded as late and unhistorical (see below, p. 386 f.). They illustrate that tendency to increase the importance of the heroes of the nation, and to connect them with the beginnings of later institutions, which in later times became especially characteristic of Jewish writings.

J. F. Stenning.

SAMUEL, I. AND II.—

- i. Title.
- ii. Contents.
- iii. Sources and Date
- iv. Analysis.
- Literature.

i. Title.—The two Books of Samuel, like the two Books of Kings, formed originally in the

Hebrew Canon a single book called שמואל (Samuel).* The LXX translators, however, regarded the Book of Samuel and the Book of Kings as a complete history of the two kingdoms of Israel and Judah, and divided them into four books, which they entitled 'Books of the kingdoms' (*βίβλοι βασιλειῶν*). The same division was followed by Jerome in the Vulgate, but the title was changed to 'Books of the Kings' (*Libri Regum*). The compromise which now obtains in printed Hebrew Bibles, viz. the division of the books into four in accordance with the LXX and Vulgate, and the retention of the Hebrew titles for each pair, was first adopted in Daniel Bomberg's printed edition of 1516.

The selection of the title is due to the fact that the opening chapters deal mainly with the history of Samuel, who still plays an important rôle in those that follow: the prominent part taken by him in the establishment of the monarchy may also have contributed to the choice of his name for the history of the period which is chiefly concerned with the reigns of Saul and David.

ii. CONTENTS.—In their present form the two Books of Samuel fall most naturally into four main sections: (*a*) I 1–15 Samuel and the establishment of the monarchy; (*b*) I 16–II 8 Saul and David; (*c*) II 9–20 David; (*d*) II 21–24 an Appendix. That this arrangement corresponds to the intention of a later editor is made evident by the three concluding summaries by which the various stages of the narratives are marked off, viz. I 14$^{47-51}$, II 8 (of which 3$^{2-5}$ 5$^{13-16}$ originally formed part), and II 20$^{23-26}$. Since, however, I 15 (the rejection of Saul and of his kingdom) was clearly intended to conclude the history of Saul's reign, it seems better to attach that chapter to the first, rather than to treat it as introductory to the second section.

The four main sections admit of the following subdivisions, which bring out more clearly the course of the history which they contain:—

- (*a*) I 1–15 From the birth of Samuel till the rejection of Saul.
  - (1) 1^{1}–7^{1} Samuel's birth and childhood and the misdeeds of the house of Eli; Samuel succeeds to the office of Eli (1^{1}–4^{1a}): the downfall of the latter's house, and the capture of the ark by the Philistines (4^{1b}–7^{1}).
  - (2) 7^{2}–15^{35} Samuel as judge over Israel delivers them from their Philistine oppressors: in answer to the request of the people (ch. 8), and, through the agency of Samuel (ch. 9 f.), Saul after defeating the Ammonites (ch. 11) is made king. Samuel lays down his office (ch. 12), and Saul carries on a successful war with the Philistines (chs. 13. 14). After defeating Amalek, Saul is informed by Samuel that Jehovah has rejected him because of his disobedience, and will give his kingdom to another (ch. 15).
- (*b*) I 16–II 8 From the first appearance of David till he is firmly established on the throne of Israel and Judah.
  - (1) I 16–31 History of David during the reign of Saul. He is secretly anointed by Samuel, and enters the service of Saul (ch. 16). By his success as a warrior he endears himself both to the royal family and to the people, but excites the jealousy of the king, whose attempts on his life compel him to flee from the court (17–22). Saul tries in vain to capture David at the head of his band of outlaws (23–26). The latter finally becomes a vassal of the Philistine king (chs. 27. 29. 30), while Saul is once more engaged in war with the Philistines, and, after a vain attempt to obtain a Divine oracle (ch. 28), perishes with his sons at the battle of Mt. Gilboa (ch. 31).
  - (2) II 1–8 David's lament over Saul and Jonathan (ch. 1). In the civil war which ensues between David and the house of Saul, the former proves victorious, and finally becomes king over Israel and Judah (2–5^{3}). He captures Jerusalem, and succeeds in throwing off the Philistine yoke (ch. 5). The ark is brought to the capital (ch. 6), and the permanency of the Davidic dynasty assured (ch. 7). Concluding summary of David's reign (ch. 8).
- (c) II 9–20 Further history of David's reign.
  - (1) 9–12 David's kindness to Meribbaal, the son of Jonathan (ch. 9): the war with Ammon, and David's great sin (10–12).
  - (2) 13–20 Absalom's rebellion (13–19), and the revolt of Sheba (ch. 20).
- (*d*) II 21–24 The Appendix, consisting of—
  - (1) historical incidents: the Gibeonites and the house of Saul (21$^{1-14}$); exploits and lists of David's heroes (21$^{15-22}$ 23$^{8-39}$); the census (ch. 24).
  - (2) poetical fragments: a psalm of David (ch. 22), and David's 'Last Words' (23$^{1-7}$).

The history set forth in these books extends roughly over a period of a hundred years, during which Israel gradually emerged from the condition of national disintegration and anarchy, described in the Book of Judges, and acquired a definite national existence. The establishment of the monarchy was at once the external sign of the union which was effected between the hitherto scattered tribes, and the means by which it was brought about. Hence the main interest of the history naturally centres round the persons of Samuel, Saul, and David, who were the principal agents in the work of consolidating the kingdom.

iii. SOURCES AND DATE.—The Books of Samuel in their present form afford a striking illustration of the methods of Hebrew composition. An examination of their contents at once reveals the fact that their author, after the manner of Hebrew historians, has made use of previously existing documents, which, though covering the same ground, yet present the materials at their disposal in very different forms. The principle which he has followed in the compilation of his work is very similar to that with which we are already acquainted in those parts of the HEXATEUCH where J and E have been united by a later editor (R^{JE}) into a composite whole. In the present case we have also two narratives which together form the main bulk of the history. These narratives, however, are so obviously *independent* of one another, and so clearly distinguished by their different *point of view*, that there is now considerable unanimity among critics with regard to their respective contents. Moreover, throughout the main section of the Books of Samuel, the editor or redactor has made but little effort to harmonize the varying accounts of the incidents which he relates, and has contented himself, for the most part, with reproducing in a twofold form the leading events in the history of Saul and David. Hence arises that *duplication of incidents* which is especially characteristic of the composition of the greater part of the history from I 7–II 8. Thus we find *two independent* accounts of the choice of Saul as king and of his rejection. In like manner the compiler has preserved to us a double account of David's introduction to Saul, and of his flight from court; of the sparing of Saul's life by David, and of the latter's flight to the Philistines; and, lastly, of the death of Saul.

In nearly all these cases (to which others might be added) both accounts have been preserved almost entire, and the redactor has not attempted to connect them by other than the slightest of links: in a few instances, however, he would seem to have shortened or condensed the one narrative while transcribing the other in full; in no case has he welded the two together in such a manner as to render analysis impossible.

It remains, therefore, to investigate these two sources, and to consider their probable origin and source. In this connexion our chief if not our only guide is the *difference in point of view*; but this, as we have said, is so clearly marked that we have no difficulty in determining the relative ages of the two narratives. On the one hand, in what we may provisionally call the *older* narrative, we have a simple, straightforward history, which, from its graphic style, and its vivid description, as well as from its *religious* conceptions, manifestly belongs to a period of great antiquity. In other words, we have a natural representation of the state of society and of religion which existed in the early days of the monarchy, closely akin to that which we find in the earlier portions of the Book of Judges. The *later* narrative throughout is obviously coloured by the religious teaching of a later age, and the standard by which the various incidents are judged is that of a period subsequent to the prophetic teaching of the 8th century.

---

* This is shown by the presence of the concluding notes of the Massora at the end of 2 Samuel. Further, Origen, who is cited by Eusebius (*HE* vi. 25), attests the same fact: *βασιλειῶν πρώτη, δευτέρα, παρ' αὐτοῖς ἕν, Σαμουήλ, ὁ θεόκλητος*; and, similarly, Jerome (*Prol. Gal.*) mentions *Samuel, quem nos regnorum primum et secundum dicimus*, as the third of the prophetic books.

Kuenen (*Hist.-Krit. Einleitung*, I. ii. p. 46 f.) and Wellhausen (*Composition*, p. 238 f.), who are followed, at least as regards 1 S 7. 8. $10^{17\text{ff.}}$ 12, by Löhr, held that this later narrative was derived from a Deuteronomic source; but Cornill and Budde have shown conclusively that it is marked, at any rate in part, by a close affinity to E. The great similarity of this narrative, both in language and style, to the E of the Hexateuch, has led these critics to regard it as a continuation of that source. Budde, indeed, goes further, and assigns the earlier narrative to the older source J, supposing that the two sources were welded together by R^{JE}, and afterwards edited by a Deuteronomic redactor. Antecedently, no doubt, this theory, which presupposes that the Hexateuchal sources J and E did not cease with the conquest of Canaan, but continued the history down to a later date, if not to their own day, has much to commend it (see Moore, *Judges*, p. xxv f.), but a closer examination of the resemblances between these two narratives and the Hexateuchal sources does not establish their *identity*.

The question at issue may be briefly described as follows:—Excluding for the time being 2 S 9–24 (see *Analysis*), we find that the main bulk of the history contained in 1 S 1^{1}–2 S 8 has been preserved in a double series of narratives, which practically cover the same ground. These two narratives are obviously independent of one another, and are clearly distinguished by their *point of view*, and in part also by their *literary style*. The latter feature, however, is more especially prominent in the first incident (the election of Saul, 7–12), which is preserved in common by both narratives. Here, as Cornill and Budde have shown (see, however, Löhr, p. xxii f.), the later narrative (7. 8. $10^{17\text{f.}}$ 12) presents noticeable affinities with E, and has accordingly been assigned by them to that source. But it is to be noted (1) that this resemblance to E is by no means so strongly marked in the latter portions of the history, which present the same point of view, and clearly belong to the same source as ch. 7 f.; and (2) that the affinity does not exclude non-Elohistic features, notably the aversion of Samuel to the monarchy. Budde, to a certain extent, evades the latter difficulty by assigning the larger portion of the later narrative to a later recension of E (E_2), which, as he rightly recognizes, has been largely influenced by the prophetic teaching of the 8th cent., more especially by Hosea. It is clear that both Cornill and Budde go too far in *identifying* the later narrative with E. That it is nearly related to E in language and thought cannot be denied, but at the most we can only conjecture that its author (or authors, for in the later narrative we can distinguish certainly two hands) belonged to the school of E, and that in writing the histories of Saul and David he was animated by a similar spirit and similar ideas. Budde's identification of the older narrative with J is closely connected with his view of the source of the later narrative. The points of contact are not so strongly marked; but if we are right in regarding the later narrative as the work of a follower of E, we may assume with considerable probability that the older narrative was composed by a writer belonging to the school of J.

The older narrative may be assigned approximately to the 9th cent., while the earlier stratum of E (Budde's E_1), which, though old, yet treats the history from a more subjective standpoint, dates probably from the following century. The later stratum (or strata) of E (E_2) has, as we have seen, been influenced by the teaching of the prophets of the 8th cent., and will belong to the end of the 8th or to the beginning of the 7th cent. As in the Hexateuch and in Judges, these sources were combined and welded together by a later editor (R^{JE}), who has, however, carried out his work in a less thorough manner. His work is in any case prior to the reforms of Josiah (B.C. 621) and to the influence of Deuteronomy, and must be placed in the 7th cent. The present form of the Books of Samuel is largely due to an author of the Deuteronomic school, whose hand may be clearly traced in the concluding summaries (I $14^{47\text{-}51}$, II 8), and in various chronological notices (I 7^{2} 13^{1}, II $2^{10\text{a}.\ 11}$ $5^{4.\ 5}$). To him also we probably owe I $2^{27\text{-}36}$ and II 7, while he has expanded other passages (mainly belonging to E_2) which lent themselves to this treatment, *e.g.* I 3. 12, II 8. $12^{10\text{f.}}$. Lastly, he appears to have omitted II 9–20 as incompatible with his view of the history (compare the very similar action in the Book of Judges *), though these chapters undoubtedly belong to the older narrative of J. The older work of JE, however, was not entirely superseded by the later recension; hence a later editor of the 5th or 4th cent. was able to utilize the earlier form of the two books, and, as might be expected, restored those parts of JE which D had excluded. He not improbably also transposed II $3^{2\text{-}5}$ $5^{13\text{-}16}$ from their original position after II 8^{14}. The obviously late insertions I $16^{1\text{-}13}$ $17^{12.\ 13}$ $19^{18\text{-}24}$ $21^{11\text{-}16}$ may have been added at this time, or possibly even later. Finally, the Appendix (II 21–24), a collection of miscellaneous fragments belonging to different periods, and the Song of Hannah (I $2^{1\text{-}10}$), were added after the separation of the Books of Samuel from the Books of Kings.

Though we do not accept Budde's identification of the older and later narratives with J and E of the Hexateuch, we have retained these symbols as representing approximately the age and characteristics of the two sources from which the history of these books is derived. Apart from minor interpolations and additions, the parts belonging to the respective sources are as follows:—

J I 9^{1}–$10^{7.\ 9\text{-}16}$ $11^{1\text{-}11.\ 15}$ $13^{1\text{-}7\text{a}.\ 15\text{b}\text{-}18}$ $14^{1\text{-}46.\ 52}$ $16^{14\text{-}23}$ $18^{5.\ 6\ \text{(partly)}\text{-}11.\ 20\text{-}30}$ $20^{1\text{-}10.\ 18\text{-}39.\ 42\text{b}}$ $22^{1\text{-}4.\ 6\text{-}18.\ 20\text{-}23}$ $23^{1\text{-}14\text{a}}$ 26. 27. 29–31, II $1^{1\text{-}4.\ 11.\ 12.\ 17\text{-}27}$ $2^{1\text{-}9.\ 10\text{b}.\ 12\text{-}32}$ 3. 4. $5^{1\text{-}3.\ 6\text{-}10.\ 17\text{-}25}$ 6. 9–11. $12^{1\text{-}9.\ 13\text{-}31}$ 13^{1}–20^{22}.

J_2 I 10^{8} $13^{7\text{b}\text{-}15\text{a}.\ 19\text{-}22}$.

E I $1^{1\text{-}28}$ $2^{11\text{-}22\text{a}.\ 23\text{-}26}$ 3^{1}–$4^{1\text{a}}$ (all E_2) $4^{1\text{b}}$–7^{1} 7^{2}–8^{22} (E_2) $10^{17\text{-}24}$ (E_2) 12. (E_2) $15^{2\text{-}34}$ $17^{1\text{-}11.\ 14\text{-}58}$ $18^{1\text{-}4.\ 13\text{-}19}$ $19^{1.\ 4\text{-}6.\ 8\text{-}17}$ $21^{1\text{-}9}$ 22^{19} 23^{19}–24^{19} 25. 28, II $1^{6\text{-}10.\ 13\text{-}16}$ 7.

R^{JE} I $10^{25\text{-}27}$ $11^{12\text{-}14}$ 15^{1} $18^{21\text{b}}$ $19^{2.\ 3.\ 7}$ $20^{11\text{-}17.\ 40\text{-}42\text{a}}$ 22^{10} (last cl.) $23^{14\text{b}\text{-}18}$ 24^{16} (in part) $^{20\text{-}22\text{a}}$, II 1^{5}.

R^{D} I 4^{18} (last cl.) 7^{2} (in part) 13^{1} $14^{47\text{-}51}$ 28^{3}, II $2^{10\text{a}.\ 11}$ $5^{4.\ 5}$ 8 (based in part on older materials) $12^{10\text{-}12}$.

Additions of the latest editor, I $4^{15.\ 22}$ $6^{11\text{b}.\ 15.\ 17.\ 18.\ 19}$ (the larger number) $11^{8\text{b}}$ 15^{4} (last ed.) 24^{14} 30^{5}, II 3^{30} $5^{6.}$ (last cl.) $^{7\text{b}.\ 8\text{b}}$ 15^{24} (in part) $20^{23\text{-}26}$.

---

* The Deuteronomic redactor of the Book of Judges omitted 1^{1}–2^{5} 9. 17–21, perhaps also ch. 16 (see SAMSON, p. 378^{b}).

Latest additions, I $2^{1-10.\,22b}$ 16^{1-13} $17^{12.\,13}$ 19^{18-24} 21^{10-15} 22^{5}, II 14^{26}, and the Appendix 21–24.

iv. ANALYSIS.—(*a*) I 1–15.—From the birth of Samuel to the rejection of Saul.

(1) 1^{1}–4^{1a} (E_2). Early history of Samuel, including the history of Eli and his house, and the announcement of its downfall.

These chapters serve as an introduction to 4^{1}–7^{1}, and appear to be somewhat later than that section. From their representation (1) of Samuel and his office, and (2) of Israel's subjection to the Philistines, it is clear that they both belong to E, though probably to different strata. The Song of Hannah (2^{1-10}) is undoubtedly a very late addition: (*a*) the Song is probably a triumphal ode composed on the occasion of some national success (vv.$^{4.\,10}$); (*b*) there is no special reference to the circumstances of Hannah—the fact of its being attributed to her is due probably to a misconception of the metaphor employed in v.^{5b}; (*c*) a comparison with the LXX text of 2^{11a} (=Heb. 1^{28b}) shows that the Song was inserted at a different place in that version (see Driver on 1 S 1^{28}). Another insertion is 2^{22b} (from *and how that*); it is out of place after vv.$^{12-17}$, and is omitted by the LXX (note the use of היכל instead of אהל). The announcement of the anonymous prophet (2^{27-36}) cannot also in its present form belong to the original narrative: (*a*) the text, especially of vv.$^{31-33}$ (LXX omits v.^{31b} and ^{32a}), is in great disorder and unintelligible; (*b*) the establishment of the monarchy is presupposed v.^{35}; (*c*) v.^{36} clearly dates from the period after Josiah's reformation, and presupposes the central sanctuary at Jerusalem (Oort, *ThT* xviii. p. 309 f.); (*d*) the 'faithful priest' of v.^{35} is not Samuel, as we might expect from ch. 3, but Zadok, who superseded Abiathar, the grandson of Eli, under Solomon (1 K 2^{26}). The passage, which has obviously been expanded by the Deuteronomic editor, probably foretold the destruction of Eli's house, and the succession of Samuel.

(2) 4^{1b}–7^{1} (E). The defeat of Israel by the Philistines at Aphek and its results, viz. the death of Eli and the capture of the ark; further history of the ark and its restoration.

In these chapters, which form a closely connected whole, it is noticeable (1) that the main interest centres in the history of the ark; (2) that Samuel is never even mentioned; (3) that the destruction of the house of Eli, which forms the real sequel to 1^{1}–4^{1a}, is treated merely as a side issue of the defeat. On these grounds it has been argued with some force that this section is independent of the chapters that precede; the latter were probably added with a view to supplementing the undoubtedly old account of the fall of the house of Eli, and of the capture of the ark. The original beginning of the section (4^{1b}) is to be restored from the LXX (*καὶ ἐγενήθη ἐν ταῖς ἡμέραις ἐκείναις καὶ συναθροιζονται ἀλλόφυλοι εἰς πόλεμον ἐπὶ Ἰσραήλ*); $4^{15.\,18}$ (last clause) and ^{22} are rejected by most critics as redactional glosses. For the additions of the LXX in 5^{6} 6^{1}, and its various readings in $6^{4.\,5}$, see Driver, *Heb. Text of Sam.* p. 47 f.: unless we accept the readings of the LXX, 6^{5a} (to *the land*) must be rejected as a gloss; while $^{11b.}$ (from *with the mice*) $^{15.\,17.\,18a.}$ (to *villages*) ^{19} (*fifty thousand men*) will likewise be later insertions.

(3) 7^{2-17} (E_2). Samuel as judge; the rout of the Philistines at Mizpah; summary of Samuel's judicial activity.

The position here occupied by Samuel is that of a judge (שֹׁפֵט), in the sense in which that term is used in the pre-Deuteronomic Book of Judges (2^{6}–16^{31}; see Moore, *Judges*, p. xxii f.). At his command the people put away their 'strange gods,' and assemble for repentance and fasting at Mizpah; in answer to his prayers on their behalf, the Philistines are miraculously defeated; and so complete is their defeat, that 'they came no more within the borders of Israel.' The section thus gives a similar representation of the position of Samuel and of Israel's political condition to that of the *later* (E_2) of the two accounts of the choice of Saul as king (8. 10^{17-24} 12), to which it serves as an introduction. To R^{D} is probably to be assigned the chronological note (*for it was 20 years*) in v.^{2}, the name Ebenezer in v.^{12}, and the statement as to Samuel's judicial work in v.^{15}. Ebenezer, as we know from 4^{1} 5^{1}, was the scene not of Israel's victory, but of its defeat. For the linguistic resemblances to the redaction of Judges, see Driver, *LOT*^{6} p. 177 f. It seems probable that the present section has been inserted here in place of an earlier account; for, as Driver points out (*ib.* p. 174), 'the existing narrative does not explain (1) how the Philistines reached Gibeah (10^{5} etc.) and secured the ascendency implied ($13^{19\text{f.}}$), or (2) how Shiloh suddenly disappears from history, and the priesthood located there reappears shortly afterwards at Nob (ch. 22). That some signal disaster befell Shiloh may be inferred with certainty from the allusion in Jer 7^{14} 26^{6} (cf. Ps 78^{60}).' See art. SHILOH.

(4) 8–12. The twofold account of the circumstances that led to the election of Saul as king.

The older narrative of J (9^{1}–$10^{16.\,27b\,(\text{LXX})}$–$11^{11.\,15}$) describes how Saul, the son of Kish, of the tribe of Benjamin, in his search for his father's asses, is persuaded by his servant to consult a seer living in the district to which they had wandered. The seer is none other than Samuel, who had previously been warned by Jehovah to expect the Benjamite stranger; and had been instructed to anoint him as king, that he might deliver Israel from the Philistines: 'For,' says Jehovah, 'I have seen the oppression of my people (LXX), because their cry has come unto me' (9^{16}). On the following day Samuel anoints Saul, and assures him of his Divine call by means of three signs: he further bids him do as occasion serves him after the fulfilment of the signs; for God is with him (10^{7}). About a month later ($10^{27b\ \text{LXX}}$), the town of Jabesh-gilead is besieged by Nahash the Ammonite, and messengers are despatched 'unto all the borders of Israel' to obtain assistance. In the course of their journey they reach Gibeah in Benjamin, and there, as elsewhere, make known their errand. On learning the sad plight of his countrymen, Saul is at once seized with the spirit of God, and promptly takes measures to relieve the besieged city. By means of a forced march he surprises the Ammonites, and delivers Jabesh-gilead and is thereupon installed as king at Gilgal (11^{15}).

The narrative of E (E_2) (8. 10^{17-24} 12) offers a very different explanation of the manner in which Saul became king. After the signal defeat of the Philistines, described in ch. 7, Samuel continues to *judge* Israel in peace and quietness until compelled by old age to delegate his authority to his sons. But the latter prove unworthy of their high office, and the people therefore demand that a king should be set over them after the manner of the neighbouring nations. The request is viewed with disfavour by Samuel, who characterizes it as rebellion against Jehovah. At the bidding of Jehovah, however, he first sets before the people 'the manner of the king that shall reign over them' (ch. 8), and then proceeds to carry out the election of a king by lot at Mizpah (10^{17-24}). The account concludes with the farewell speech of Samuel, in which he solemnly lays down his office, and hands over the reins of government to Saul (ch. 12).

The two narratives which are here combined are thus not only *complete* in themselves[*] and *independent* of one another, but also *mutually contradictory*. In the earlier narrative (1) Samuel is a *seer* living in a certain district, who is unknown to the rest of Israel; (2) he is employed as the instrument of Jehovah's purpose on *one* occasion only; after his interview with Saul everything is left to the working of the Divine spirit in the latter; (3) Israel is oppressed by the Philistines, and cries to Jehovah for a deliverer (9^{16}); (4) the establishment of the monarchy is the means chosen by Jehovah for the deliverance of His people: Samuel's attitude towards it is merely that of an onlooker. In contrast to this representation we find in the later narrative (1) that Samuel is the *judge* of *all* Israel, who rules over the people as the representative of Jehovah; (2) that in accordance with this position he hands over the reins of government to the newly-elected king; (3) that the *external* condition of Israel is entirely favourable: the Philistines had been finally subdued by Samuel (ch. 7); (4) that the request for a king is regarded as an act of apostasy: it is due to the desire to be like other nations, and is displeasing both to Jehovah and to Samuel.

The redactor has made but little effort to reconcile these conflicting accounts, but his hand may be traced in 10^{25-27a} and 11^{12-14}, according to which the ceremony at Gilgal is represented as a *renewal* of Saul's former election at Mizpah: $10^{25.\,26a}$ refer back to ch. 8, and place Saul once more at Gibeah, while vv.$^{26b.}$

---

[*] In the narrative of J it is noticeable that the name of the town in which Samuel the seer lived is never mentioned. It is probable (so Budde, but see above, p. 198^{a}) that the name was omitted just because it was *not* Ramah, the house of Samuel the judge (7^{17} etc.). Since also the identity of Samuel with the seer is not made clear till 9^{14}, it seems probable that the redactor has omitted a notice which both introduced Samuel and made known the name of his native town. In E there is no account of the anointing of Saul (cf. 12^{3} 'his anointing'): this was probably omitted because of the already existing account in J (10^{1}). The narrative probably also contained some notice of the confirmation of the choice of Saul as king after 10^{24}, which was omitted by the redactor in view of $13^{14.\,15}$.

^{27a} with their sequel in 11^{12-14} are intended to explain why Saul is not recognized as king in ch. 11, and why it was necessary to *renew* the kingdom. But the warriors 'whose hearts God had touched,' and who accompanied Saul to his home, presumably as a bodyguard, do not appear in ch. 11. Again, the 'sons of worthlessness' who refuse to acknowledge Saul, and by their action, according to the view of the redactor, prevent him from assuming the kingly office, are apparently so few in number that they can be threatened with death in $11^{12.13}$; yet it is presumably on their account that the election of Saul requires confirmation. Further, these verses conflict also with the later narrative of E; for 'the manner of the kingdom' (10^{25}) is obviously the same as 'the manner of the king' ($8^{9.11}$), and not, as the redactor evidently implies, a codified system of laws to be observed by people and king alike. Lastly, the present position of Samuel's resignation (ch. 12), which would naturally follow after 10^{24}, may also be ascribed to the redactor. Minor additions due to the same hand are 8^{22b}, 9^{2b} 'from his shoulders and upward he was higher than any of the people' (introduced from 10^{23b}), and the explanatory note 9^9: on 10^8 see ch. 13. The linguistic resemblances of the later of these two narratives, partly with E (esp. Jos 24), partly with the redaction of Judges, are very marked (see Driver, *LOT*^{6} p. 177 f.). With this agrees the strong disapproval of the monarchy, which, as Budde has shown, is expressed in language that has many affinities with Hosea (see Budde, *Richter u. Sam.* p. 184 f.). That the narrative is, however, pre-Deuteronomic, is shown (1) by the manner in which the author of Dt 17^{14-20} (the law of the king) is influenced by this narrative (see Driver, *Deut.* p. 213), and (2) by the reference in Jer 15^1 to Samuel's *intercession* on behalf of the people—a fact which is recorded only in chs. 7 and 12. Traces of Deuteronomic expansion are to be found in 12^9 (וַיִּמְכֹּר אֹתָם בְּיַד), v.^{11} (אֹיְבֵיכֶם מִסָּבִיב), v.$^{14f.}$ (מָרָה אֶת־פִּי י״י): to the Deuteronomic redactor must also be assigned the mention of Samuel by himself (12^{11}), and the mention of the invasion of Nahash (12^{12}) as the motive for the demand for a king; this disagrees with $8^{4f.}$, and further presupposes a knowledge of the earlier narrative (ch. 11). The similarity both in *language* and in *point of view* between the later of these two narratives (E) and the redaction of the Book of Judges has been already referred to, and shown to agree with the probable origin of that narrative. Both works are pre-Deuteronomic, and interpret history from the point of view of Hosea and the prophets rather than from that of Jeremiah and the Deuteronomist: the formula which is especially characteristic of Judges (cf. Jg 12^7 $10^{2.3}$ etc.) is applied to Eli (4^{18}), and in a modified form to Samuel (7^{15}), while the use of the word 'judge' is entirely analogous to its sense in Judges. Further, as Moore (*Judges*, p. xxiii f.) has pointed out, 'Samuel's speech (ch. 12), which contains a retrospect of the period of the judges (vv.$^{7-11}$), and solemn words of warning for the future under the newly-established kingdom, is precisely the conclusion which we desire for the book of the Histories of the Judges, corresponding admirably to the parting discourse of Joshua (Jos 24) at the close of the period of the conquest' (so Graf, *Gesch. Büch.* p. 97 f., Budde, Driver). We may thus assume with considerable probability that these chapters originally formed part of E's history of the Judges, and that they were afterwards excerpted by R^{JE} as forming a suitable introduction to the history of the monarchy.

(5) 13. 14 (J with the exception of $13^{7b-15a.19-22}$ (J_2) 14^{47-51} (R^D)). Saul's struggle with the Philistines. These chapters describe the revolt of the Israelites under Saul against their Philistine oppressors. The signal for revolt is given by Jonathan, who destroys the pillar (?) of the Philistines at Gibeah (see GIBEAH); the Philistines, who had doubtless heard of Saul's election as king, at once assemble their forces at Michmash on the N. side of the Wâdy Suweinît over against Geba (see GEBA and GIBEAH). Alarmed by the size of the Philistine army, the followers of Saul, who had retreated to Gibeah, gradually melt away until only six hundred are left (13^{15b}); the Philistines in the meantime overrun the country in three directions. Jonathan once more takes the initiative, and by a bold stroke succeeds in overcoming the Philistine garrison at Michmash (14^{1-14}). This success is at once followed by a general attack in which Saul completes the rout of the Philistines. Jonathan unwittingly disobeys the command of his father by eating food, and is with difficulty rescued by the people from death. Apparently Saul was not in a position to follow up his victory, but suffered the Philistines to retreat to their own land (v.^{46}). The section concludes with the remark that 'there was sore war against the Philistines all the days of Saul.'

These chapters form the continuation of the earlier narrative (J) contained in 9^1–$10^{16.27b}$–$11^{11.15}$, showing how Saul carried out the object for which he was appointed (9^{16}). That they do not form the *immediate* sequel of those chapters is evident. From the description of Saul in ch. $9^{1f.}$ we should not expect to find him described as the father of a full-grown warrior such as Jonathan is here represented to be, and, further, the introduction of Jonathan (13^2) is very sudden. Presumably, therefore, the redactor has omitted the intervening narrative (possibly in favour of ch. 12), unless we suppose, with Kuenen (*Ond.*^{2} p. 51), that he has here incorporated a still earlier account of Saul's campaign. To the Deuteronomic redactor must be assigned the chronological notice in 13^1 (LXX omits) and the concluding summary of Saul's reign 14^{47-51}. In *form* the latter passage displays a marked resemblance to the framework of Judges, and, as its *contents* show, is clearly a late insertion. The victories (LXX) here ascribed to Saul (v.^{47}) are borrowed from the similar summary of David's reign in 2 S 8: apart from the campaign against Nahash (ch. 11) and against the Amalekites (ch. 15), Saul's reign was spent in constant warfare with the Philistines. In the view of R^D the account of Saul's reign finishes here, and is followed by that of the history of David. The most probable view of the account of Saul's rejection preserved in 10^8 13^{7b-15a} is that of Budde and H. P. Smith (*Samuel*, p. xxi), who regard it as a later addition inserted in the narrative of J before the union of J and E. On the one hand, the verses cannot belong to the original narrative: for (1) 10^8 interrupts 10^7 and ^{9}, and the proper sequel of 13^{7a} is 13^{15b}; (2) they do not agree with the facts narrated. The command to wait seven days (10^8) is clearly inconsistent with the exhortation of 10^7; nor does the narrative of $13^{7bf.}$ in any way establish Saul's disobedience, seeing that be waited the prescribed number of days. Again, after 13^{1-7a} we expect to find some account of Saul's retreat from Michmash to Gibeah, rather than an interview with Samuel at Gilgal, necessitating a journey to and from that place, for which there would be but little opportunity ('to Gilgal' in v.^{4} is no doubt an addition, cf. $^{7b.15a}$ (LXX)). On the other hand, according to the view of the interpolator, the meeting of Samuel and Saul, described in $13^{8f.}$, is the *first* after 10^8 hence we may conclude, with Wellhausen (*Hist.* 257 f.), that these verses are earlier than 11^{12-14}, *i.e.* than the union of J and E.

13^{9-22} may be assigned to the same hand as vv.$^{7b-15a}$: they interrupt the connexion, and appear to be somewhat exaggerated; the text is very corrupt.

(6) Ch. 15 (E). The rejection of Saul. The new king is bidden by Samuel to exterminate the Amalekites; but he and the people spare Agag the king and the best of the spoil, and Samuel is therefore commanded to announce to him the Divine sentence of rejection. The king endeavours to minimize his fault, but in vain. The sentence is pronounced, and Samuel himself slays the Amalekite king.

The chapter clearly forms the sequel of 7. 8. $10^{17ff.}$ 12, describing the test to which Saul was subjected, and his failure to endure it. Samuel once more appears as the representative of Jehovah, to whose word the king has to submit, while the style and language display a close affinity with the later narrative. It cannot, however, be denied that this chapter, as opposed to 7 ff., is characterized by a somewhat different *tone*: the author, in presenting his account of Saul's rejection, has made it subservient to the prophetic lesson (Jer 7^{21-26}) which he wishes to inculcate, viz. that obedience is better than sacrifice. This desire to explain how Saul, who had been Divinely chosen, could be rejected by Jehovah, has, it would seem, led him to reconstruct and expand the narrative in a form which is scarcely consonant with the actual facts (note 'the theoretical *motive* assigned for the expedition vv.$^{2.6}$, and the supreme importance attached to the *principle* actuating Saul in his conduct of it v.$^{10ff.}$,' Driver, *LOT*^{6} p. 178). But, though we cannot accept his treatment of the subject, there is no reason to doubt the genuineness of his facts, viz. the campaign against Amalek, the sacrifice of Agag, and the breach between Samuel and Saul. The view expressed by Wellhausen and others, that this chapter holds 'an intermediate position between the two streams of narrative already considered,' is true only to the extent that it is to be assigned to the early stratum of E (Budde's E_1). The reference to the anointing of Saul by Samuel is probably due to the redactor, and cannot be adduced as proving that the writer of ch. 15 was acquainted with 9^1 etc.

(*b*) I 16–II 8. Saul and David.

(1) 16^1–18^5. David's introduction to Saul.

The anointing of David by Samuel at the house of his father 16^{1-13} (a late addition); J's narrative of David's introduction to Saul (16^{14-23}); E's account of the same (17^1–18^5),

At first sight the section 16^{1-13}, of which $17^{12.13}$ is probably a fragment, would seem, like $17^{1f.}$, to belong to the series E, but a comparison of these two sections shows that the former is not presupposed by the latter: according to 17^{14} Jesse has only *four* sons, in 16^{10} he has *eight*; again, 17^{24} makes it evident that David's brothers had no knowledge of his having been anointed (compare also the later history of David's persecution by Saul, in which Saul alone is regarded as the anointed of Jehovah). On the other hand, the influence of $17^{1f.}$ is apparent in $16^{11.12}$ (cf. 17^{42}) as well as in the general point of view. Further, the incident is hardly consistent in itself; Samuel's fear of Saul does not agree with the character of the latter as portrayed in ch. 15, and he so far forgets it in v.$^{6f.}$ as to speak openly of his mission; similarly, the sacrifice, which he alleges as the cause of his coming, is never performed. The suggestion of Budde, that the section is an unskilful imitation of $10^{1f.}$, inserted for the purpose of showing that David also was Divinely consecrated, is probably correct (cf. Wellh. *Hist.* p. 269 f.); to the same hand is probably due the gloss 16^{19} (אֲשֶׁר בַּצֹּאן *which is with the sheep*).

In the earlier narrative of David's introduction to Saul he is described as a skilful musician, as 'a mighty man of valour, and a man of war, and prudent in speech, and a comely person, and the Lord is with him' (16^{18}); he is invited by Saul to his court that he may drive away the 'evil spirit from the Lord' by his playing, and is given the office of king's armour-bearer.

According to the later narrative, during one of the many engagements with the Philistines, the army of Israel is defied for forty days by the giant Goliath of Gath. Despite Saul's promises, no one will venture to engage the Philistine in single combat, until David, the youngest son of Jesse, a Bethlehemite, who had been sent from the sheepfold on an errand to his brethren in the army, expresses his willingness to accept his challenge. Saul at first seeks to dissuade him on the score of his youth, but afterwards gives his consent, and offers the loan of his armour. After a vain attempt to wear the armour, David goes forth to the encounter armed only with his shepherd's sling. It is not until the combat has been brought to a successful conclusion that Saul, on inquiry, ascertains the parentage of the youthful hero; Jonathan, the king's son, is seized with a great affection for the shepherd lad, while the king insists on his remaining at court (17^{1}–18^{5}).

It is impossible to reconcile these two accounts, which differ in every essential feature. In the earlier account David is of mature age, an experienced warrior, and a player of some renown; he is brought to court on account of his musical skill, and is attached to Saul's person as his armour-bearer; lastly, Saul is well acquainted with his parentage. In the later account David is but a shepherd lad, unused to warlike weapons; he attracts Saul's attention by his bravery in meeting Goliath; Saul does not learn his name and parentage until after the duel. The phenomenon is the same as that which confronts us in chs. 7–12. Here R^{JE} has attempted to harmonize the two narratives by 17^{15a} ('now David went to and fro from Saul'), which does not agree with $16^{14f.}$ (according to which David receives a permanent office at court), nor with $17^{17f.}$ (which describes him as living at Bethlehem with his father).

It is, however, noticeable that in the LXX (B) $17^{12\text{-}31.\,35b.\,41.\,48b.\,50.\,55}$–$18^{6a}$ are omitted. Wellhausen formerly held that this shorter text was the more original, and this view is still maintained by Cornill, Stade, W. R. Smith, and H. P. Smith; but most critics agree 'that the translators—or more probably, perhaps, the scribe of the Heb. MS used by them—omitted the verses in question from harmonistic motives, without, however, entirely [*] securing the end desired' (Driver, *Heb. Text of Samuel*, p. 116; similarly Wellhausen and Cheyne). Thus, according to 17^{33}, David is still but a youth (not the full-grown warrior of 16^{18}), while vv.$^{34ff.}$ describe him as a shepherd lad, unacquainted with the use of armour (as opposed to 16^{21b}). Further, it is inconceivable that discrepancies such as those described above should have been introduced into the text after the union of J and E, nor do the style and language of the sections omitted by the LXX support a late date.

The shorter, simpler account of David's introduction to Saul given in J ($16^{14\text{-}23}$) is obviously more in accordance with the actual facts; it forms a fitting sequel to 14^{52}, and aptly illustrates the statement 'that whenever Saul saw any mighty man, or any valiant man, he took him unto him.' The account preserved in E seems to be derived rather from popular tradition than from actual history; for we learn from 2 S 21^{19} that *not* David but Elhanan slew 'Goliath the Gittite, the staff of whose spear was like a weaver's beam.' Later tradition, therefore, has transferred the exploit of the warrior to his royal master; the reading of 1 Ch 20^{5} is clearly due to a harmonizer (see Driver, *Samuel*, p. 272).

(2) $18^{5\text{-}30}$ (J and E combined). David's life at Saul's court, and Saul's growing jealousy of him.

It is clear that in this section also we have two accounts combined, though it is not easy to distinguish the various parts. The narrative as a whole seems drawn from the older source, and forms the continuation of $16^{14f.}$ David is here represented as a well-known warrior and leader, and not as the youthful hero of $17^{1f.}$. The song (v.^{7}) was probably treated by both sources as the immediate cause of Saul's jealousy, but, whereas the second introduction in v.^{6a} (*when David returned from the slaughter of the Philistine*) connects it with the Goliath incident, we require some further exploit as the occasion of the song in the older narrative; probably the first introduction in v.^{6} (*as they came*) is a fragment of this notice. Vv.$^{9\text{-}11}$, the evil spirit from God, connects these verses with $16^{14f.}$; but vv.$^{13\text{-}16}$ and vv.$^{17\text{-}19}$ must be assigned to the later narrative. In vv.$^{13\text{-}16}$ we have a parallel account to that of v.^{5} (belonging to the older narrative), while vv.$^{17\text{-}19}$ clearly refer back to 17^{25}, according to which Saul was bound to receive David into his family: this is ignored by the older narrative, vv.$^{20\text{-}30}$, which knows nothing of David's betrothal to Merab (cf. v.^{23}, where David seems to regard an alliance with the royal family as beyond the bounds of possibility). Further, since the later narrative must have contained an account of David's marriage with Michal, it is probable that the redactor has treated his sources more freely than usual, and omitted part of E's narrative; v.^{21b} is obviously an attempt on his part to harmonize the two accounts of David's betrothal.

The LXX (B) makes considerable omissions in this chapter also, viz. vv.$^{5.\,6a.\,8b.\,10.\,11.\,12b.\,17\text{-}19.\,21b.\,26b.\,29b}$, and the majority of critics accept this shorter version as representing the original text (Wellh., Kuenen, Driver). As Driver (*Notes on Sam.* p. 120 f.) points out, 'the sequence of events is clearer; and the gradual growth of Saul's enmity towards David is distinctly marked' (cf. vv.$^{12a.\,15.\,29}$); further, the section then forms a connected whole, and nearly all the additional passages in the MT admit of satisfactory explanation. The fact, however, that throughout this portion of the Books of Samuel we are confronted with two accounts of the same incidents, makes it more probable that the LXX omissions here, as in ch. 17, are due to a harmonizer; further, we may argue (with Budde) that it is inconsistent to reject the (unsuccessful) recension of the LXX in ch. 17, and to adopt its more successful attempt in ch. 18. (For a fuller statement see DAVID).

(3) 19 (E). 20 (J). Outbreak of Saul's hostility towards David; David's flight.

Later account of Jonathan's intervention on behalf of his friend ($19^{1\text{-}7}$); the spear-throwing (vv.$^{8\text{-}10}$); with the assistance of his wife Michal, David escapes from his house (vv.$^{11\text{-}17}$); David's flight to Ramah (vv.$^{18\text{-}24}$); earlier account of Jonathan's intervention ($20^{1\text{-}42}$).

These two chapters consist of several short sections, in which are set forth various incidents illustrating Saul's enmity towards David on the one hand, and on the other the affection displayed towards him by Jonathan and Michal. The redactor has apparently expanded the account of E in $19^{2.\,3.\,7}$, which are inconsistent in themselves, and are clearly influenced by the fuller account of J in ch. 20. Vv.$^{8\text{-}10}$ give E's account of the spear-throwing, which differs but little from that of J in $18^{10f.}$; vv.$^{11\text{-}17}$ have been rejected by Wellhausen, Stade, and Cornill on the ground of internal improbability, but the passage both in language and tone bears all the marks of E, and forms a suitable continuation of what precedes (for another view see H. P. Smith, *Samuel*, p. 178 f.). Vv.$^{18\text{-}24}$, which offer a second explanation of the proverb, Is Saul also among the prophets? are rejected by nearly all critics as a late interpolation, similar to that in $16^{1\text{-}13}$. The grounds for this view are, briefly, (1) that an entirely different and, as it would seem, more genuine account has been already given in $10^{10f.}$; (2) that David would most naturally flee southwards to Nob (cf. 21^{1}), and not to Ramah in the north; (3) according to 15^{35} a further meeting between Saul and Samuel is excluded. (1) is decisive against these verses belonging to the earlier narrative, while (2) and (3) equally exclude E as their source, though the position occupied by Samuel, as well as the place (Ramah), seem to argue for that narrative; the words 'from Naioth in Ramah' (20^{1a}) naturally form part of the preceding account. Ch. 20 describes at length the attempt made by Jonathan to reconcile his father to David, and the means by which he informed the latter of the failure of his efforts. The section, which is obviously old and historical, is probably a duplicate of $19^{1\text{-}7}$, by which it has been displaced; for (1) the situation is the same as that of $19^{1f.}$, and (2) David would not require further proof of Saul's hostility after the unmistakable evidence of $19^{11f.}$. These difficulties, it is true, admit to a certain extent of explanation (cf. Driver, *LOT*^{6} p. 180), but the recurrence of duplicate accounts throughout 1 Samuel renders it probable that we have here a further example of the same phenomenon.

The text is evidently in great disorder, and the passage has probably been considerably expanded by the redactor. Wellhausen is no doubt right in regarding the sign of the arrow as part of the original narrative. This sign, however, would exclude any meeting or conversation between David and Jonathan. Hence we must regard vv.$^{40\text{-}42}$ (to *for ever*) as redactional. Further, vv.$^{11\text{-}17}$ interrupt the main course of the narrative, and reverse the relative positions of Jonathan and David, the latter being regarded as the undoubted successor of Saul; they are probably therefore to be assigned to the redactor (Budde and Kittel ascribe all vv.$^{5\text{-}17}$ to the same hand).

(4) 21 (E). 22 (J). David flees to Nob, where he is received by Ahimelech, who gives him the shew-

---

[*] By its omissions B removes the difficulties caused by (1) David's residence in Bethlehem, and (2) Saul's ignorance of David's name and parentage.

bread, and the sword of Goliath (21$^{1-9}$). [David flees to Achish, king of Gath, vv.$^{10-15}$]. David takes refuge in the stronghold (read מְצוּדַת at v.^{4}) of Adullam, whence he sends his parents to Moab (22$^{1-4}$); massacre of the priests at Nob; escape of Abiathar (22$^{6-23}$).

With the exception of 21$^{10-15}$, the two chapters seem to connect quite naturally. But a closer examination makes it plain that the sequel (ch. 22) of the incident narrated in 21$^{1-10}$ belongs to a different source. (1) Doeg the Edomite is differently described in 22^{9}; (2) in ch. 22 emphasis is laid on the fact that Ahimelech had 'inquired of God' on behalf of David (v.$^{14f.}$); 21$^{1f.}$ ignores this fact, and lays more stress on the *sacred* character of the bread given to David and his followers. Of the two accounts the earlier is that contained in 22$^{6-23}$. The later account, of which only part is given in 21$^{1-9}$, doubtless contained some record of the massacre of the priests at Nob; probably Budde is right in regarding 22^{19}, which interrupts the connexion, as part of this later account. To the redactor may be assigned 22^{10b} (Goliath's sword) and 'and a sword' in v.^{13}. The section 21$^{10-15}$ interrupts the main narrative, and presupposes 16$^{1-13}$ and 19$^{18-24}$ (Wellh., Budde); like those passages, it must be regarded as a late insertion. Probably it was designed to take the place of ch. 27 f., and was afterwards retained alongside of it (Kuenen, Budde); to the same hand we must also assign 22^{5} (the prophet Gad, cf. 2 S 24^{11}).

(5) 23–27 (J 23^{1-14a} 26. 27; E 23^{19}–24^{19} 25). David as an outlaw.

David delivers Keilah from the Philistines; then, warned by the oracle, leaves the city before it is besieged by Saul (23$^{1-13}$); he then takes refuge in the wilderness of Ziph, where he is visited by Jonathan (vv.$^{14-18}$); the Ziphites inform Saul of his whereabouts, and the latter seeks to capture him (vv.$^{19-24}$); tidings of a Philistine invasion give David a temporary respite from Saul (vv.$^{25-29}$), who on his return continues the pursuit, and on this occasion falls into David's hands. David, however, spares the king's life, and, in the dialogue that follows, the latter admits that David is more righteous than he is (ch. 24). The incident of Nabal, the wealthy sheepowner of Carmel (ch. 25), separates the two accounts of the sparing of Saul's life by David; for it is generally admitted that ch. 26 merely gives another version of the same occurrence which is narrated in 23$^{19-24}$. As a last resource, David enters the service of Achish, king of Gath, by whom he is assigned Ziklag as a residence: thence he makes a series of raids against the tribes dwelling in the Negeb of Judah, etc. (ch. 27).

The agreement between the two stories narrated in 23$^{1. 19-24}$ 24 and ch. 26 in regard to (1) Saul's pursuit of David in the wilderness; (2) the sparing of Saul's life; and (3) the dialogue that ensues, is so great that we can only regard them as different versions of the same incident. The variations only affect the details, and are such as might easily have arisen in two independent narratives. Moreover, as Driver (*LOT*^{6} p. 181) points out, 'if the occasion of ch. 26 was a different one from that of 23$^{19f.}$, it is singular that it contains no allusion, on either David's part or Saul's, to David's having spared Saul's life before.'

Of the two accounts the earlier and more original is undoubtedly that contained in ch. 26 (Kuenen, Wellh., Driver, Stade, H. P. Smith, Löhr). The arguments in favour of this view are clearly stated hy Löhr (*Sam.* p. xlv) as follows:—(1) the detailed information supplied as to (*a*) David's companions (26^{6}, contrast 'David and his men,' 24$^{3f.}$), and (*b*) Saul and his camp (26$^{5. 7}$); (2) the manner in which Saul falls into David's hands; and more especially the old religious conception underlying 26^{19}. To these we may add (3) the shorter and more genuine reply of Saul (26$^{21. 25}$), which appears in a more expanded form in 24$^{17-21}$. Budde, however, who is followed by Cornill, Cheyne, and Kittel, solely on the ground of *linguistic* evidence, contends for the *later* origin of ch. 26; but the expressions cited by him are not sufficiently characteristic to outweigh the arguments given above; further, he ignores the characteristic תַּרְדֵּמָה (26^{12}, cf. Gn 2^{21} 15^{12}; see Löhr, *Sam.* p. xlv; H. P. Smith, *Sam.* p. 230).

The first section of ch. 23 (vv.$^{1-13}$) carries on 22^{2} and belongs to the earlier narrative. V.^{6} is obviously out of place *after* v.^{2}, and is probably a gloss designed to introduce v.^{9b}, while the first question in v.^{11} is repeated by error from v.^{12}.

V.^{14a} properly forms the commencement of ch. 25 (or, according to the view of Budde, etc., of 23$^{19f.}$). Vv.$^{14b-18}$ (the interview between Jonathan and David) are clearly a redactional insertion, similar to 20$^{11-17. 40-42a}$. To the redactor must also be assigned 23^{19b} ('in the wood, in the hill of Hachilah, which is on the south of the desert'), which is inconsistent with v.^{22}, and the phrase 24^{16} (*and Saul said, Is this my son David?*) added from 26^{17} for harmonistic purposes.

23$^{25-28}$, which have no parallel in the earlier narrative (ch. 26), contain a local tradition explaining the origin of the name *Sela-hammaḥleḳoth* (prob. = 'The rock of divisions').

The order of 24$^{4-7}$ is apparently at fault; and Gaupp, followed by Cornill and Budde, would rearrange the verses as follows: $^{4a. 6. 7a. 4b. 5. 7b}$. Possibly the disorder has arisen by interpolation (H. P. Smith, p. 217 f.), and we should omit vv.$^{4b. 6}$ (the incident of the skirt). 24^{13} is omitted by Wellh. and Budde as a gloss: the latter also regards vv.$^{20-22a}$ as due to the redactor.

The notice of the death and burial of Samuel (25^{1a}) is clearly a redactional insertion borrowed from 28^{3a}; it is out of place here. The rest of the chapter connects naturally with 23^{28}, and fills up the interval of time required by that verse: it is probable, therefore, that the earlier narrative also contained some account of the incident narrated in 23$^{25-28}$. The present position of ch. 25 is doubtless due to the desire to separate the two accounts (23$^{19-23}$ 24. 26). 25$^{28-31}$ have probably been expanded by the writer from the point of view of his later knowledge.

27^{1} David's decision to take refuge with the Philistines follows quite naturally after ch. 26, and the whole chapter clearly belongs to the earlier narrative with 23^{1-14a} 25. 26: with this agrees its silence as regards any previous visit of David to Gath (21$^{10-15}$), and the oracle of 22^{5}.

(6) 28 (E). 29. 30 (J). The Philistines prepare for battle with Israel (28$^{1. 2}$); Saul being unable to obtain a Divine oracle, seeks out a woman with a familiar spirit at Endor, who conjures up Samuel (28$^{3-25}$); in spite of the confidence expressed by Achish, the other Philistine leaders mistrust David's loyalty, and insist on his dismissal (29$^{1-11}$). On his return to Ziklag, David finds that his city has been sacked by the Amalekites; he hastens in pursuit, and recovers all that the Amalekites had taken: the rest of the booty is equally divided among his men, part being sent as a present to 'the elders of Judah' (ch. 30).

28$^{1. 2}$ carry on the narrative of ch. 27, which is continued in chs. 29 and 30. 28$^{3-25}$ are usually regarded as out of place. According to' 28^{4} the Philistines are already at Shunem (in the plain of Jezreel); but in 29^{1} they are assembled at Aphek in the Sharon valley, and only advance to Jezreel in v.^{11}; similarly the Israelites in 29^{1} are encamped by the spring which is in Jezreel, and presumably only fall back on Gilboa before the advance of the Philistines; whereas in 28^{4} they are encamped at Gilboa.

Budde (who is followed as regards the *order* by Driver) solves the difficulty by placing 28$^{3-25}$ after chs. 29. 30. He further assigns the incident to the same source (J) as the rest of the section, arguing (1) that Samuel is here represented as a seer (9$^{1f.}$), and not as a judge or prophet; (2) that the general contents of the passage agree with the earlier representation, and (3) that it has many points of contact with ch. 14: the undoubted reference in vv.$^{17-19a}$ (to *Philistines*) to ch. 15 he regards as a redactional insertion. Budde's theory, however, fails to give any reason for the present order of these chapters, which admits of a perfectly simple explanation, if we assign 28$^{3-25}$ to the later narrative. In that case the historical introduction in 28^{4} will be parallel to and independent of the similar notices in 28$^{1. 2}$ 29$^{1. 11}$, and the section as a whole will form the sequel to ch. 15 (Wellh., H. P. Smith). On this view we might retain vv.$^{17-19a}$ (with H. P. Smith), but they are more probably to he regarded as a redactional expansion, suggested by v.^{16}, which points back to 16$^{23b. 28}$ (see Löhr, p. xlix). As in the case of ch. 15 (Saul's war of extermination against the Amalekites), a genuine historical incident has been utilized for the purpose of inculcating a *moral* lesson from the prophetic standpoint.

(7) I 31–II 1 (J, except II 1$^{6-10. 13-16}$). Death of Saul.

The defeat of Israel on Mt. Gilboa and the death of Saul and his three sons (31$^{1-7}$). The Philistines carry off the bodies of Saul and his sons to Beth-shan, whence they are removed by the inhabitants of Jabesh-gilead (vv.$^{8-13}$). The news of the death of Saul and Jonathan is conveyed to David at Ziklag by a fugitive Amalekite, who describes how he slew Saul (2 S 1$^{1-10}$). David fasts till evening, and then orders the execution of the Amalekite because he had slain 'the Lord's anointed' (vv.$^{11-16}$). The lament of David over Saul and Jonathan (vv.$^{17-27}$).

These chapters contain a double account of the death of Saul. The earlier narrative (J) describes how Saul in despair commits suicide after his armour-bearer has refused to slay him (I 31–II 1^{4}): in the later narrative (E) a wandering Amalekite slays him at his request while he is suffering from cramp (or giddiness), though unwounded (II 1$^{6-16}$). It has heen conjectured by those who regard the two chapters as belonging to the same source, that the account of the Amalekite is untrue;

but this conflicts with the whole narrative of 1^{6-16}, which conveys no hint of such being the case. It is probable, as Budde infers from 4^{10}, that David himself slew the fugitive who brought him the tidings of Saul's death. This latter passage (4^{10}) knows nothing of the reason assigned for the execution of the messenger in 1^{6-16}, viz. the fact that he had laid hands on 'the Lord's anointed.'

Ch. 31 has been excerpted, with slight variations, by the compiler of Chronicles (1 Ch 10), who has in part preserved a purer text (see Driver, *Notes on Sam.* p. 176 f.). Budde regards II 1^{6} as a redactional insertion, introducing the later narrative; vv.$^{11.\,12}$ belong probably to the earlier narrative; they are out of place in their present context.

II 1^{17-27} the lament of David is avowedly taken from the Book of Jashar (so Jos 10^{12-14}, 1 K $8^{12\text{f.}}$ (LXX)), but there is no reason to doubt David's authorship (on the text see Driver, *Notes*, p. 180 f.).

(8) 2–4 (J). The struggle between the house of Saul and the house of David.

David is anointed king of Judah at Hebron (2^{1-4}): he thanks the men of Jabesh-gilead for their kindly action in recovering the bodies of Saul and his sons, and at the same time informs them of his coronation (vv.$^{5-7}$). Meantime Ishbaal, the sole remaining son of Saul, is set on the throne of Israel at Mahanaim by Abner, the captain of the host (vv.$^{8-11}$): then follows the encounter between the troops of Joab and Abner at Gibeon, which results in the defeat of the men of Israel; in his flight Abner is pursued by Asahel, Joab's brother, whom he slays; Asahel's death puts an end to the pursuit (vv.$^{12-26}$). The downfall of the house of Saul is caused by the rupture between Ishbaal and Abner: the latter makes a league with David, to whom he restores his wife Michal; and he further promises to bring all Israel unto him. Abner, however, is treacherously slain by Joab in revenge for the death of Asahel, and is mourned by David and all the people (ch. 3). The assassination of Ishbaal, and the execution of his murderers (ch. 4).

These chapters continue the earlier narrative of I 31 and II 1^{1-4}, the conclusion of which is probably lost. $2^{10\text{a}}$ (to *two years*)^{11} ($=5^{5}$) are obviously insertions; they interrupt the narrative, and are doubtless part of the chronological scheme of the Deuteronomic editor. 3^{2-6} (a notice of David's family at Hebron) are out of place, and belong properly after 8^{14}: v.^{1} is continued by v.$^{6\text{b}}$., v.$^{6\text{a}}$ concealing the insertion. V.^{30} is omitted by all critics as a later interpolation. 4^{4} is certainly interpolated: probably v.$^{4\text{b}}$ should be placed after 9^{3} (Wellh., Budde).

(9) 5^{1}–8^{13} (J, except ch. 7 (E)). David as king of all Israel.

After the death of Ishbaal, David is acknowledged as king by all the tribes of Israel (5^{1-3}). He captures the Jebusite city Jerusalem; takes up his residence there, and fortifies it ($^{6-10}$). Hiram, king of Tyre, aids him in building his palace ($^{11.\,12}$). [Notice of David's family ($^{13-16}$)]. The Philistines hear that David has been anointed king over Israel, and immediately attack him, but are twice defeated ($^{17-25}$). The removal of the ark from Baale-judah (=Kiriath-jearim) to Jerusalem is checked by the untoward death of Uzzah: the ark is therefore left at the house of Obed-edom (6^{1-10}). After an interval of three months it is brought up to the city of David in solemn procession, in which David takes part: his action is derided by Michal, who is therefore cursed with barrenness ($^{11-23}$). David proposes to build a house for Jehovah, but is informed by Nathan that this honour is reserved for his son (7^{1-17}). David's prayer (vv.$^{18-29}$). A summary of the wars waged by David (8^{1-14}); his judicial activity (v.^{15}); and a list of his officers (vv.$^{16-18}$).

It is obvious that the war with the Philistines (5^{17-25}) follows immediately after vv.$^{1-3}$, which contain a twofold introduction, viz. vv.$^{1.\,2}$ and v.^{3}. The intervening sections (vv.$^{4-16}$) are clearly misplaced: vv.$^{4.\,5}$ (cf. 1 K 2^{11}) are omitted by the Chronicler, and are premature: vv.$^{6-9}$ the account of the capture of Jerusalem is undoubtedly old and genuine, but the text is unfortunately very corrupt; Budde would place it after 6^{1}: vv.$^{11.\,12}$ probably belong to the latter part of David's reign, if they are not an addition from 1 K 5 (see S. A. Cook, *AJSL* xvi. 3, p. 151): vv.$^{13-16}$ should be placed like 3^{2-5} after 8^{14}. It is probable that the account given in vv.$^{17-25}$ should be supplemented by the details supplied in 21^{15-22} 23^{8-39} (see below). That vv.$^{17-25}$ do not connect with vv.$^{4-16}$ is shown by the different use of the term 'the hold' (הַמְּצוּדָה) in vv.^{9} and ^{17}: the use of this term here and in 23^{14} supports S. A. Cook's theory (*AJSL* p. 154 f.), that David's encounter with the Philistines *preceded* the incidents in chs. 2–4, and belong to the period 'when he had no army (חיל) or host (צבא), as chs. 8 and 10, but was accompanied only by his "men" or "servants"' (5^{21} $21^{15.\,17.\,22}$). 6^{1}, according to Budde, must have introduced some warlike incident, and he therefore prefixes it to 5^{6-12}: the rest of the chapter is old and genuine, though possibly it has been expanded in parts. Ch. 7 is admittedly later than chs. 5 and 6, with which it is clearly connected: the section, it is true, displays certain resemblances both in thought and expression to Deuteronomy, but these are not strongly pronounced; and from the nature of its contents the chapter would easily lend itself to theocratic expansions. Kuenen assigns the chapter to a post-Deuteronomic source on the ground of vv.$^{1\text{b}.\,13.\,22.\,23.\,24}$; but $^{1\text{b}}$ is omitted by the Chronicler (1 Ch 17^{1}): v.^{13} is certainly due to the Deuteronomic editor, and vv.$^{22-24}$, from their general character, may well be an expansion. Probably, therefore, Budde is right in assigning the chapter to E.

Ch. 8 forms the concluding survey to the history of David (cf. 1 S 14^{46-51} at the end of the history of Saul): in its present form the chapter represents the work of the Deuteronomic editor, who seems, however, to have made use of the older sources. The wars are first noticed: with the Philistines (v.^{1}), with the Moabites (v.^{2}), with the Aramæans and their allies (vv.$^{3-8}$); then follows an account of the homage paid by the king of Hamath (vv.$^{9.\,10}$); [the spoil dedicated by David to Jehovah (vv.$^{11.\,12}$)]; the subjugation of Edom (RV *Syria*) (vv.$^{13.\,14}$). The notices of David's family at Hebron (3^{2-5}) and at Jerusalem (5^{13-16}) should be inserted here (Wellh., Budde): Budde would also insert $5^{4.\,5}$ (R^{D}). The chapter concludes with an account of David's administration (v.^{15}), and a list of his officers (vv.$^{16-18}$).

A fuller account of the two campaigns against the Aramæans is preserved in ch. 10, which has been condensed and slightly altered by R^{D} in vv.$^{3-8}$: he has also inserted vv.$^{9.\,10}$ here, transferring them from the end of ch. 10 (see below), to which vv.^{13} and ^{14} properly belong (cf. the similar conclusion $^{6\text{b}}$ and $^{14\text{b}}$). Vv.$^{11.\,12}$ are probably a late insertion. It is remarkable that in ch. 10 the victories over the Aramæans form but two episodes in the war with Ammon; yet this war is ignored in ch. 8, and in its stead (v.^{2}) the subjugation of Moab is described. This fact is not mentioned elsewhere, and seems inconsistent with I $22^{3\text{f.}}$: it is far from improbable, therefore, that Moab has been substituted for Ammon in 8^{2} (Budde).

(*c*) II 9–20 (J) [and 1 K 1. 2]. Life at David's court, *or* the history of the succession to David's throne.

The events narrated in these chapters are closely connected with, and mutually dependent on, one another: they are further distinguished by unity of plan and conception. The story of Meribbaal (ch. 9) explains the action of Ziba (16^{1-4}) and the speech of the former (19^{24-30}): 10^{1}–11^{1} with 12^{26-31} explain how David became acquainted with Bathsheba, and how he compassed the death of Uriah, while the whole section chs. 10–12 forms the necessary introduction to the final choice of David's successor in 1 K 1. 2. The narrative throughout, by its lifelike touches and its minuteness of detail, as well as by its bright and flowing style, betrays its early origin, and must have been composed soon after the events which it describes.

(1) 9^{1-13}. David on inquiry learns of the existence of Meribbaal (MEPHIBOSHETH), the lame son of Jonathan: for Jonathan's sake he deals kindly with his son, and retains him at court; Saul's estates are restored to his grandson, and Ziba, Saul's servant, appointed to look after them.

Budde would place ch. 24 and 21^{1-19} before this chapter, on the ground that the incident narrated in $21^{1\text{f.}}$ is presupposed in ch. 9 and $16^{7\text{f.}}$ 19^{28}, and that the census (ch. 24) would naturally take place soon after David's accession. It is difficult, however, on this theory, to explain the present position of 21^{1-14} and 24, and, as Wellhausen has pointed out, the popular and legendary character of these chapters is very different from that of chs. 9–20 (for a fuller discussion of this point see on chs. 21–24). More probable is Budde's view, that $4^{4\text{b}}$ should be placed after v.^{3}.

(2) 10–12. Owing to the insult offered to his ambassadors, war breaks out between David and Ammon: the latter call in the Aramæans to their aid, and prepare to defend their capital. Joab, with the pick of the troops, attacks and defeats the Aramæans, while the rest of the army under

Abishai successfully engage the Ammonites (10^{1-14}). Once more the Aramæans, under Hadadezer, assemble against Israel, but are again defeated, this time by David himself: Joab is then sent to besiege the Ammonite capital (10^{15}–11^{1}; see RABBAH). David remains at Jerusalem, where he commits adultery with Bathsheba, the wife of Uriah the Hittite, one of his warriors. After a vain attempt to conceal the sin, he sends a letter to Joab instructing him to bring about the death of Uriah: his orders are carried out, and David then marries Bathsheba, who bears him a son (ch. 11). The prophet Nathan awakens David to a sense of his guilt by means of a parable, and announces the Divine punishment: the child of Bathsheba dies despite David's penitence; but another son (Solomon) is born (12^{1-25}). Meantime the siege of Rabbah has been drawing to a close, and David in person commands the final assault: the chapter ends with an account of the spoil, and of the punishment inflicted on the inhabitants (12^{26-31}).

Except in the speeches of Nathan, which have probably been expanded, the narrative appears to have been preserved in its original form: after 11^{22} we must restore the longer text of the LXX (see Driver, *Text of Sam.* p. 224) in accordance with vv.$^{19-21}$: 12^{10-12} are probably due to the Deuteronomic editor, who regarded all the misfortunes of David's house as resulting from his great sin, while the phrase, 'the house of the Lord,' in v.^{20}, seems an anachronism. With regard to the relation of 10^{1}–11^{1} and 12^{26-31} to ch. 8, it is noticeable that (1) according to $10^{6\text{f.}}$ the Ammonites hire the services of the Aramæans of Beth-rehob and Zobah, the king of Maacah, and the men of Tob: in $8^{3.\,4}$ the Ammonites are not mentioned, and there is only an obscure notice of a victory over the Aramæans; (2) in 8^{3} Hadadezer of Beth-rehob (for *son of Rehob*) is mentioned by name as leader of the Aramæans: in $10^{1\text{f.}}$ his name is given so abruptly (v.^{16}) that he must, as Budde conjectures, have been mentioned earlier in the original narrative; (3) both accounts describe a second campaign: in 8^{5} the Aramæans of Damascus, in 10^{16} those 'that were beyond the River' came to the assistance of their countrymen. Budde conjectures very plausibly that when the detailed account $10^{1\text{f.}}$ was appended, the editor attempted to make the two narratives dissimilar: to this end he omitted the name of Hadadezer in 10^{6}, and substituted Damascus for 'beyond the River' in 8^{5}. By these means he was able to transfer the notices of Tou's homage ($8^{9.\,10}$) and of the Edomite war ($8^{13.\,14}$) from the end of ch. 10 to their present position.

(3) 13–20. The rebellion of Absalom, its cause and effects. Amnon, David's firstborn, and presumably his successor, is murdered by command of Absalom for the violation of his half-sister Tamar: Absalom takes refuge with his maternal grandfather the king of Geshur (ch. 13). Joab, by the help of the wise woman of Tekoa, induces the king to consent to Absalom's return: the latter in his turn coerces Joab into bringing about a meeting between himself and the king, which results in the reconciliation of father and son (ch. 14). Absalom now schemes to win the people to his side, and thus secure the throne, and finally sets up the standard of revolt at Hebron. David at once flees eastward from Jerusalem, accompanied by his bodyguard and Ittai the Gittite: he sends back Zadok and Abiathar with the ark to the capital, and arranges that tidings should be brought to him by their two sons: he further persuades Hushai to return, that he may defeat the counsel of Ahithophel (ch. 15). In his flight David learns from Ziba of the disaffection of Meribbaal, and submits to the insults of Shimei the Benjamite (16^{1-14}). Meantime Absalom, following the advice of Ahithophel, takes possession of his father's harem (16^{15-23}). The same adviser further counsels the immediate pursuit of David, but Absalom declares in favour of the waiting policy advised by Hushai (17^{1-14}). The news of his decision is conveyed to David by the two sons of the priests, at the risk of their lives: he at once withdraws across Jordan, and is met at Mahanaim by rich Gileadites with ample supplies for his army (vv.$^{15-29}$). Absalom, who has already crossed the Jordan, is confronted at Mahanaim by David's army under Joab, Abishai, and Ittai. In the battle that ensues David's forces are completely victorious: Absalom in his flight is slain by order of Joab, in direct disobedience to David's command (18^{1-18}): then follows a graphic description of the manner in which the news was conveyed to David (vv.$^{19-33}$). The death of Absalom plunges David into profound grief, from which he is only with great difficulty aroused by Joab: public opinion and the politic message of David to the men of Judah are the chief factors in bringing about the king's return (19^{1-15}). At the passage of the Jordan Shimei asks for pardon and is forgiven; Meribbaal explains how he had been slandered by Ziba; and, lastly, the aged Barzillai refuses the king's invitation to himself, but asks his favour for his son Chimham (vv.$^{16-39}$). The men of Israel are envious of the favour shown to the men of Judah, and a quarrel breaks out (vv.$^{40-43}$). In consequence of this dispute Sheba the Bichrite stirs up Israel to revolt against David. Amasa, the newly-appointed commander, fails to muster the men of Judah quickly enough, and Abishai (or, perhaps, Joab, see art. JOAB in vol. ii. p. 659 note) is sent with all the available troops to stamp out the rebellion. Amasa meets the royal forces by the way, and is treacherously slain by Joab: the two brothers then pursue Sheba northwards to Abel of Beth-maacah, where he is slain, and his head handed over to Joab: the chapter concludes with a repetition of the list of officers given in $8^{16\text{f.}}$ (ch. 20).

In this section there are but few passages whose origin has been called in question by the critics: $13^{18\text{a}}$ (to *apparelled*) is probably a misplaced gloss (Wellh.) to v.^{19}: it interrupts the connexion between vv.^{17} and $^{18\text{b}}$; at the end of the chapter the right order of the verses is clearly $^{37\text{b}.\,37\text{a}.\,38\text{b}.\,39}$, $^{38\text{a}}$ being due to the scribe. 14^{26} is rejected by most as a later addition; Budde omits all vv.$^{25-27}$. 15^{24} appears to have been worked over by a Deuteronomic redactor: 'and all the Levites with him' is certainly due to him, while the phrase 'and Abiathar went up' is out of place; Abiathar must originally have been mentioned alongside of Zadok (cf. v.^{29}): the textual difficulty in v.^{27} may also be due to the same cause (Budde reads, 'See, do thou and Abiathar return'; Wellh. 'unto [Zadok] the high priest, do thou return,' etc.). $18^{18\text{b}}$ (*for he said* to *remembrance*) conflicts with 14^{27}, and must be rejected as an interpolation, unless with Budde we omit 14^{27}. Lastly, 20^{23-26} are repeated with some variations from $8^{16\text{f.}}$, or more probably (see H. P. Smith, *Sam.* p. 327 f.) are original here, and were borrowed by the compiler of ch. 8 for his concluding panegyric. It seems very probable (as Budde suggests) that the author of ch. 8 omitted the following chapters (9–20), because, from his point of view, the family history which they contained did not redound to David's credit, and that they were afterwards restored by a later editor.

The unity of chs. 9–20 (see above) has been admitted by nearly all commentators and critics (Kuenen, Wellhausen, Driver, Budde, Cornill, Kittel, Löhr, etc.), with the exception of Thenius (*Comm.*^{2} p. xiii), who rejected ch. 9 (the incident of Meribbaal) and 10^{1}–11^{1} 12^{26-31} (the Ammonite war) as later redactional additions to the history of David; but, as we have shown above, these sections are necessary to and presupposed by the following narrative. This theory, however, has been revived, in a different form, by S. A. Cook in his analysis of 2 Samuel (*AJSL* (*Hebraica*), p. 155 f.). According to the latter's view, ch. 9 is related to 1 S $20^{15\text{f.}}$, and is therefore to be ascribed to an Ephraimite source: while 'the story of David's sin with Bathsheba and the birth of Solomon (11^{2}–12^{25}) has been inserted in the account of a war against Rabbath-ammon of which it was originally independent.' He further argues that this war with Ammon should *follow*, and not precede, the events recorded in chs. 13–20, chiefly on the ground that David's flight to and hospitable reception at Mahanaim * are impossible *after* the sanguinary war recorded ($10^{1\text{f.}}$); and places it at the end of David's reign. Absalom's rebellion, he contends, was probably confined to Judah (see Sayce, *Early Hist. of the Hebrews*, p. 429 f.),—the leading men (Amasa and Ahithophel) were both Judæans, and the centre of revolt was at Hebron, the old Judæan capital,—and followed shortly after David had settled in Jerusalem: in like manner the extent of Sheba's revolt, which was really limited to the Bichrites (20^{14} LXX), has been exaggerated so as to include all Israel, and then appended to Absalom's rebellion. As the result of his investigation Cook concludes: '(1) that the union of Judah and Israel under one king did not occur at any early date in David's reign, and (2) that the narratives in 2 Samuel which presuppose any close relationship between Judah and Israel (or Benjamin) previous to this union are due to a redactor (R^{JE}?), and, in several cases at least, seem to be derived from an Ephraimite source '

---

* Cook ingeniously emends 17^{27} 'and Shobi the son of Nahash' (וְשֹׁבִי בֶּן־נָחָשׁ) to 'and Nahash, etc., brought' (וַיָּבִאוּ נָחָשׁ), thus supplying (according to his view of the chronology) a motive for David's embassy in $10^{1\text{f.}}$.

The evidence, however, on which these conclusions are based is obtained in many cases by a very subjective treatment of the text, and cannot be said to outweigh the general impression conveyed by chs. 9–20 as a whole. It is probable that Cook is right in certain cases (especially in the story of Ahithophel 16^{20}–17^{23}) in tracing the difficulties of the narrative to the combination of two sources; but he certainly goes too far when he condemns all the interviews recorded, viz. those with Ziba, Meribbaal, Shimei, and Barzillai, as the work of the redactor.

(*d*) 21–24. The Appendix.

These four chapters contain a number of heterogeneous fragments, viz.: (*a*) the famine in Israel expiated by the death of the sons of Saul at the hands of the Gibeonites (21^{1-14}); (*b*) a series of exploits against the Philistines (21^{15-22}); (*c*) David's Hymn of Triumph after the defeat of his enemies (ch. 22 = Ps 18); (*d*) David's 'Last Words' (23^{1-7}); (*e*) further exploits against the Philistines, and list of David's heroes (23^{8-39}); (*f*) David's census of the people, and its result (ch. 24).

These chapters interrupt the main narrative of chs. 9–20, which is continued in 1 K 1–2, and must therefore have been inserted in their present position after the division of the Books of Samuel and Kings. It is noticeable that (*f*) is closely related in style and manner to (*a*); 24^{1} clearly continues 21^{14}, while both narratives have a similar conclusion (21^{14b} 24^{25b}). The two narratives were apparently first separated by (*b*) and (*c*), the contents of which are very similar, and between these again were inserted the two Psalms chs. 22 and 23^{1-7}.

The incident narrated in $21^{1f.}$ evidently belongs to the beginning of David's reign, and seems to be alluded to by Shimei ($16^{7.8}$) and Meribbaal (19^{28}), but is entirely ignored by ch. 9. Ch. 24 is very similar to 21^{1-14}, of which it is clearly the sequel: in each case the Divine wrath is kindled against the people owing to the action of the king, and they are punished with a plague, vv.^{10} and ^{17} (David's repentance and his prayer) are out of place, and may have been inserted later: Budde arranges the verses as follows: $^{10.\ 11b.\ 12.\ 13b.\ 11a.\ 13a.\ 13c.\ 14.\ 15.\ 16a.\ 17.\ 16b}$. He (see above) assigns both sections to J, and places them before ch. 9: on his view ch. 24 should precede 21^{1-14}, and he therefore omits 24^{1a} as a Deuteronomic gloss; 21^{2b} he assigns to the redactor, and rejects 21^{7} as a late insertion caused by the displacement of the passage. He suggests that the gloomy nature of their contents caused the sections to be removed by the compiler, and that they were afterwards added by the editor. The character of these and of the other sections is, however, very different from that of chs. 9–20, with which they exhibit no affinity: hence, though 21^{1-14} and ch. 24 undoubtedly contain old traditions, we can only conjecture that they were added by a later hand after the completion of the main narrative. 21^{15-22} and 23^{8-39} likewise contain old material, and belong to the early period of David's reign (see 5^{17-25}): possibly they may be derived from the register of the 'recorder,' as Driver suggests (*LOT*^{6} pp. 183, 187). Budde, who regards them as part of the original narrative, places them after 5^{25}: his transposition of 23^{13-17a} to the end of the chapter is probably correct. The two Psalms chs. 22 (= Ps 18) and 23^{1-7} (David's 'Last Words') are admittedly later additions to the book. The Davidic authorship of ch. 22 has been maintained by Ewald, Hitzig, etc., but the internal evidence points to a later author. The 'Last Words' of David are obviously out of place; the majority of critics agree that they are the work of a later hand: the text is in parts very corrupt.

J. F. STENNING.

SANAAS (B Σαμά, A Σανάας; AV Annaas, 1 Es 5^{23}).—The sons of Sanaas returned from captivity under Zerubbabel to the number of 3330 (B 3301). In Ezr 2^{35}, Neh 7^{38} they are called the children of Senaah. In Neh 3^{3} the name has the article Hassenaah. The numbers given are 3630 (Ezr.), 3930 (Neh.).

SANABASSAR, SANABASSARUS.—See SHESHBAZZAR.

SANASIB (B Σαναβεἰς, A Ἀνασεἰβ), 1 Es 5^{24}.—The sons of Jeddu the son of Jesus are mentioned as priests who returned 'among the sons of Sanasib' with Zerubbabel. The name is omitted in the parallel Ezr 2^{36}; the Vulg. probably preserves the correct form *Eliasib*.

SANBALLAT (סַנְבַלַּט, Σαναβαλλάτ, *Sanaballat*).—The name is Assyr. *Sin-ballidh*, 'the Moon-god has vivified.' Sanballat is called a Horonite (Neh $2^{10.19}$ 13^{28}), but the locality meant is uncertain: for conjectures as to it see art. HORONITE. He seems to have held some office in Samaria (Neh 4^{2}) when Nehemiah arrived in Jerus., and, along with Tobiah the Ammonite and Geshem the Arabian, was bitterly opposed to Nehemiah, and did his best to thwart his endeavours to rebuild the walls of the Jewish capital. There was a party inside Jerus. itself which was equally opposed to the Tirshatha, and conspired with Sanballat to hinder Nehemiah by spurious prophecies and other means (Neh 6). One of the party was the high priest Eliashib, whose grandson had married Sanballat's daughter (Neh 13^{28}).

Josephus (*Ant.* XI. vii. 2) transports Sanballat from the reign of Artaxerxes Longimanus to that of Darius Codomannus, the last king of Persia, whose officer he is said to have been in Samaria. His daughter Nikasô was married to Manasseh, the brother of the high priest Jaddua. Manasseh, being threatened with expulsion from the priesthood unless he divorced his wife, fled to Sanballat, who suggested that he should become the high priest of a rival temple on Mt. Gerizim, and promised to secure for him the protection of Darius. Just at this time, however, the invasion of Persia by Alexander the Great took place; Sanballat went over to the conqueror with 7000 men, and induced him to allow the temple on Mount Gerizim to be built. Manasseh became its first high priest, and soon afterwards Sanballat died. The whole story seems to be derived from some apocryphal Jewish account of the origin of the Samaritan temple.

A. H. SAYCE.

SANCTIFICATION.—Of the three words for 'holiness' based on the adjective ἅγιος, one only is here really in question, viz. ἁγιασμός. The other two, ἁγιωσύνη, the abstract *quality* (*sanctitudo*), and ἁγιότης, the same concretely and subjectively conceived as a personal quality (*sanctitas*), fall naturally under HOLINESS. But ἁγιασμός, like 'sanctification,' connotes *state*, and that not as native to its subject, but as the outcome of action or process.

There is no need to deal separately and at length with the cognate verbs ἁγιάζειν, ἁγνίζειν. The essential ideas involved have already been discussed under HOLINESS; while what they have to contribute to the idea of sanctification as a process will appear incidentally in the body of this article. In general, however, it may be said (1) that ἁγιάζειν is late Greek and biblical (ἁγνίζειν being classical), and has meanings determined by the several senses of ἅγιος, but all springing from 'to consecrate,' 'to render sacrosanct or appropriated to Divine use' (in contrast to 'profane' or 'open to common use'); whereas the more classical ἁγνίζειν means 'to render pure' (no longer 'unclean,' or hateful in God's sight). (2) Each verb passes through a ritual stage of meaning to reach an ethical or spiritual one. In the case of ἁγνίζειν the two are clearly distinguishable, as in Jn 11^{55}, Ac $21^{24.26}$ 24^{18} on the one hand, and Ja 4^{8}, 1 P 1^{22}, 1 Jn 3^{3} on the other. But there is little even in the latter series of passages on which to base a doctrine of sanctification. In the case of ἁγιάζειν (for Heb. see HOLINESS IN OT, *ad init.* note) the senses are more varied and complex. It means (*a*) to render sacrosanct by ritual methods appointed by God (Ex 28^{3} 30$^{29f.}$, Mt 23$^{17. 19}$, He 9^{13}; cf. 1 Co 7^{14}), or simply by act of the Divine will (Jer 1^{5}, Jn 10^{36}); (*b*) to hallow ethically, the human spirit or will being directly concerned; (*c*) to realize the state of ethical devotion to the Divine in concrete conduct (Jn 17^{19}, Rev 22^{11}; cf. Mt 6^{9}). The second sense, ethical hallowing, has two subdivisions, viz. (i.) vicarious or sacrificial, *e.g.* He 10$^{10. 29}$ 13^{12}, cf. 2^{11} 10^{14}, Eph 5^{26}, and (ii.) intrinsic, as in Jn 17$^{17. 19}$, cf. 1 P 1$^{2. 22}$, Ac 20^{32} (26^{18}), 1 Co 6^{11}, Ro 15^{16}. Intrinsic hallowing itself is either initial, as in 1 Co 6^{11}, Ac 26^{18}, or mature, as in 1 Th 5^{23}. In all forms the determinative part is played by the Divine (Jn 10^{36} 17$^{17. 19}$, He 10^{10}), yet the human factor is fully recognized (Jn 17^{19} ἁγιάζω ἐμαυτόν, cf. ἁγνίζειν of man in Ja 4^{8}, 1 P 1^{22}, 1 Jn 3^{3}). The working out of these two, and the element of process involved, will appear in the detailed exposition of ἁγιασμός which follows.

A. Ἁγιασμός :—
    (i.) Its use outside the NT.
    (ii.) Its NT usage.
B. Sanctification as taught in the NT.
    By (*a*) Christ.
        (*b*) St. Paul.
        (*c*) The Epistle to the Hebrews.
        (*d*) St. Peter.
        (*e*) St. John.
C. Connected Summary.
    Literature.

A. ἉΓΙΑΣΜΌΣ.—(i.) *Its use outside the NT.*—The form of the word, indeed, suggests that emphasis should lie on the process involved. But its actual usage, which is perhaps exclusively Biblical and patristic, does not bear this out. It is true that the LXX shows traces of the active sense; as in Jg 17^{3}, where A has ἁγιασμῷ ἡγίασα for ἁγιάζουσα ἡγίακα of B; Sir 7^{31} θυσίαν ἁγιασμοῦ κ. ἀπαρχήν ('the sacrifice of hallowing' being parallel to 'first-fruits'); Ezk 45^{4} ἔσται αὐτοῖς (τοῖς ἱερεῦσιν) τόπος εἰς οἴκους ἀφωρισμένους τῷ ἁγιασμῷ αὐτῶν; 2 Mac 2^{17} τὸ βασίλειον κ. τὸ ἱεράτευμα κ. τὸν ἁγιασμόν, the covenanted prerogatives of Israel, and 14^{36}; ἅγιε παντὸς ἁγιασμοῦ Κύριε, διατήρησον εἰς αἰῶνα ἀμίαντον τόνδε τὸν προσφάτως κεκαθερισμένον οἶκον. But in Am 2^{11} ἔλαβον ἐκ τῶν υἱῶν ὑμῶν εἰς προφήτας, κ. ἐκ τῶν νεανίσκων ὑμῶν εἰς ἁγιασμόν (?='a hallowed thing,' where the Heb. has 'for Nazirites'), the passive sense seems to prevail (cf. 3 Mac 2^{18} τὸν οἶκον τοῦ ἁγιασμοῦ, 'the House of Sanctification,' contrasted with idol-houses; perhaps also Sir 17$^{9\,(10)}$ ὄνομα ἁγιασμοῦ αἰνέσουσιν, on the analogy of Mt 6^{9} ἁγιασθήτω τὸ ὄνομά σου. So of Messiah it is said, in Ps-Sol 17^{33}, that 'he shall cleanse Jerusalem with (a state of) sanctification (ἐν ἁγιασμῷ), as it was even at the first.' Similarly in the earliest patristic usage; as in 1st Ep. of Clem. xxxv. 2, where, as gifts of God, are named ζωὴ ἐν ἀθανασίᾳ, λαμπρότης ἐν δικαιοσύνῃ . . . ἐγκράτεια ἐν ἁγιασμῷ, and xxx. 1, ἁγία (*var. lec.* ἁγίου) οὖν μερὶς ὑπάρχοντες ποιήσωμεν τὰ τοῦ ἁγιασμοῦ πάντα, φεύγοντες καταλαλιάς, κ.τ.λ. Hence the idea of sanctification as a quality or state sometimes attaches to ἁγιασμός, even outside the NT;* while in the NT it will be found to be the prevailing thought in one form or another.

(ii.) *Its NT usage.*—In St. Paul the word occurs eight times, in five distinct passages. In the earliest of these, 1 Th 4$^{3. 4. 7}$, it means a state of practical or realized consecration to God's will, conduct conformed to the ideal attitude or standing of the Christian, as 'in Christ.' Such a state is the essence of God's will for man; and it is defined, in one connexion, as the 'state of abstinence (ἀπέχεσθαι) from fornication,' the ability of a man to possess (see art. POSSESS) his own vessel in a condition of hallowedness and honour, in contrast to one of lustful passion. For 'God called us not on a basis of unchastity, but in (the status of) hallowedness' (οὐ . . . ἐπὶ ἀκαθαρσίᾳ ἀλλ' ἐν ἁγιασμῷ). Similarly in 2 Th 2^{13} he says that Christians were chosen of God 'in (the status of) hallowedness due to the Spirit, and faith based on the Truth' (ἐν ἁγ. πνεύματος κ. πίστει ἀληθείας)—where none would doubt that 'faith' means a state of soul. This divinely-determined state is set forth in other but kindred terms, as one wherein the soul is 'sealed' by the Holy Spirit (2 Co 1^{22}, Eph 1^{13}) as something devoted to God. This idea is adopted in 1 P 1^{2}, along with explicit mention of the objective or sacrificial basis of man's consecration, 'the blood of Christ'—the aspect emphasized in Hebrews (9$^{10. 14. 28}$; cf. 2^{11}). In another passage St. Paul himself refers to this more objective side of the state of hallowedness, when, in 1 Co 1^{30}, he calls Christ as crucified (v.^{23}) God's 'wisdom' or secret as regards 'righteousness (justification) and sanctification and redemption.' Here the thought is not of sanctification as a process, but as a status into which a man is brought by God's act on condition of faith; as is seen from 1 Co 6^{11} 'Ye were washed clean, ye were sanctified, ye were justified in (virtue of) the name of our Lord Jesus Christ, and in (virtue of) the Spirit of our God.' Every Christian as such has been put into a virtual or implicit state of cleansedness from his sinful past and consecration to God's holy ends, in the same experience of faith which ushers him into the state of justification. These are, indeed, but different aspects of one and the same spiritual fact, and are produced by the same Divine means, both objective and subjective.

The like thought, under the different metaphors of death to sin and life unto God, corresponding to Christ's cross and resurrection, reappears in Ro 6. 'He that hath died hath been justified from sin' (v.^{7}); 'be reckoning yourselves to be dead indeed unto sin (purification), but living unto God (consecration) in Christ Jesus' (v.^{11}). So saying, St. Paul passes to the practical consequences of the new attitude to sin and to God implied in spiritual union with Christ on the part of the justified. Status or attitude of soul must express itself in moral habit. As formerly it had been lawlessness that had expressed itself through the man's actions, so now he is to let righteousness sway him, with a state of hallowed action as issue (εἰς ἁγιασμόν, vv.$^{19. 22}$). Accordingly, the same apostle teaches, in 1 Ti 2^{15}, that an abiding state of faith, love, and hallowedness of living must characterize the Christian. And the like is taught in He 12^{14}, which alludes to the pursuit of peace with all men and of the holy habit of living (ἁγιασμόν) befitting fellowship with God. In all these cases no stress falls upon process as entering into the state in question; though in some there is a suggestion of it, in the notion of habit or state to be realized in conduct. The idea is that of constant reaffirmation of the underlying attitude of consecration to God's will and ends. But, so far, there is no suggestion of progress; rather of maintenance (see 1 Ti 2^{15}) of a sound attitude or condition. Progressive sanctification, a growth from less to more, whether in purity or range, is not contemplated in the word ἁγιασμός itself. Yet it is embraced in the scope of apostolic teaching, as we see when we proceed to examine other references to the subject of the Christian life.

B. SANCTIFICATION AS TAUGHT IN THE NT.—(*a*) *By Christ.*—Christ's own teaching on this subject is too ideal or timeless to yield definite results as to the conditions imposed by human frailty upon the realization of Divine sonship. 'Ye shall be perfect as your heavenly Father is perfect' (Mt 5^{48}), is the standard at once of obligation and possibility. But it stands, like the Mosaic precept of which it seems to be the equivalent, 'Ye shall be holy, for I am holy' (Dt 18^{13}), unconditioned by any *how* or *when*.

---

* Thus Œcumenius on 1 Th 3^{13} says, τοῦτο ἀληθῶς ἁγιασμός, τὸ παντὸς ῥύπου καθαρὸν εἶναι.

(*b*) *St. Paul.*—Accordingly it is to St. Paul, the great exponent of the gospel from the experimental or appropriative side, that we have to look for the fullest account of the matter. There is a state possible to Christians, corresponding to the ideal of their calling, in which they can be described as 'unblameable in holiness' (ἀμέμπτους ἐν ἁγιωσύνῃ), and into which they may be brought by the grace of God in this life. Therein they stand hallowed through and through (ὁλοτελεῖς), every part of their being (ὁλόκληρον τὸ πνεῦμα κ. ἡ ψυχὴ κ. τὸ σῶμα) abiding by grace in a condition fit to bear the scrutiny of their Lord's presence without rebuke (ἀμέμπτως ἐν τῇ παρουσίᾳ τοῦ Κυρίου ἡμῶν Ἰησοῦ Χρ. τηρηθείη). Such is the teaching of 1 Th 3^{13} 5^{23}. The fidelity of God to His purpose in calling men to be Christians is pledged to this achievement (5^{24}), though there is no definite time, as measured from the initial hallowing of the spirit in conversion, at which it must needs be accomplished. God, who begins the good work in the soul, also continues to work at its perfecting (ἐπιτελεῖν), right up to the day of Jesus Christ (Ph 1^{6}); and yet, ere that day dawns, Christians may become already 'pure in purpose (εἰλικρινεῖς = Christ's καθαροὶ τῇ καρδίᾳ) and void of offence,' and so remain 'until the day of Christ' (1^{10}). It is this state of realized sanctification of conduct or 'walk,' so as to 'please God,' that St. Paul has constantly in view in exhorting his converts to holy living (*e.g.* 1 Th 4^{1}). This is what he means, at times, by his use of ἁγιασμός. But the conception needs to be carefully guarded and explained by other aspects of his thought. Thus (1) it represents a growth *in* holiness rather than *into* holiness out of something else; (2) it is conceived as realizable by a definitive act of faith—claiming and appropriating its rightful experience by an act of will informed by the living energy of the Holy Spirit—rather than as the cumulative result of a slow, instinctive process after conversion; (3) it is not the same as absolute moral perfection or consummation (τελειοῦσθαι), but is rather the prerequisite to its more rapid and steady realization.

(1) St. Paul (like the NT as a whole) bases the Christian life on an initial and most radical hallowing of the spirit or inmost seat of personality, implicit in justifying faith; and it is in consequence of this that the Christian is styled 'regenerate.' Thus the prime spring of life is renewed; the root impulse or attitude of the *ego* is changed and hallowed; and so the whole man can be regarded as virtually consecrated to God. The outward hallowing of the 'walk' or conduct proceeds on the basis and in the power of this hallowed 'inner man' of the heart. From the first this 'inner man' enjoys the salvation of which consecration to God's will and ends is one aspect. But this salvation needs to work outwards, through the spheres of man's life more closely bound up with his sensuous nature and its false egoism (σάρξ)—the man as ψυχικός, possessed of a number of faculties not yet adjusted to God's ends, but often biassed rather towards selfhood. The whole man, spirit, soul, and body, has to be leavened. This is what St. Paul means when bidding the Philippians 'work out' into realization (κατεργάζεσθε) 'their own salvation,' a salvation already possessed in principle, relying upon the in-working of God for ability so to do (Ph 2$^{12f.}$). The end of such actualizing of the partly latent salvation is the image of Christ, just set forth in majestic and moving terms. Conformity to the image of God's Son is the hope of the Christian's calling (Ro 8^{29}), that whereunto tends the intercession of the Holy Spirit immanent in the human spirit (v.$^{26f.}$). Not until this has been realized in fulness can sanctification become perfection: and St. Paul himself repudiates all claim to having attained to this (Ph 3^{12}). Yet in the very same context he ranges himself with the class of 'mature' believers (τέλειοι, 3^{15}), whose settled purpose it is to reach that goal, and for whom the one great rule is, 'walk according to the full extent of your present ideal, and nothing less.' In such persons, as in himself (1 Co 4^{4}), he assumes an habitual enjoyment of a good conscience, the absence of a sense of yielding to sin. Such is the sanctification of Christian maturity, the type of life belonging to those already 'spiritual' as distinguished from 'babes in Christ' (1 Co 3^{1}). The latter are still largely determined by nature, in contrast to grace (σάρκινοι), by 'the flesh,' in its conflict with 'the Spirit' (σαρκικοί, cf. Gal 5^{17}). They have not yet come to realize their own position, its dangers, and the resources at hand in the Spirit, in obedience to whose impulse they are bidden consciously to walk (Gal 5^{16} πνεύματι περιπατεῖτε καὶ ἐπιθυμίαν σαρκὸς οὐ μὴ τελέσητε). To such St. Paul says in remonstrance: 'If it be to the Spirit that you are fain to trace any true life you possess, why do ye not habitually walk in conscious reliance upon His promptings, but rather follow promiscuously the first instinct—whatever that may be, whether of flesh or Spirit? The principle of either sort of action is still within; yet if you yield yourselves definitively to the Spirit, and wait on His illumination, as He reveals the things of Christ, the flesh will be practically neutralized and not affect your walk, which shall then be ever "in the Spirit," relative to your degree of enlightenment' (Gal 5$^{26. 15-25}$).

(2) This conscious self-consecration to the indwelling Spirit, to carry out God's will alone under His prompting, and so to bear only 'the fruit of the Spirit' (Gal 5$^{22f.}$), is set forth under various figures, but is uniformly represented as a single act—whether of breaking definitely with sinful habits, or of self-devotion to the Divine sway. 'Let us (once for all) cleanse ourselves (καθαρίσωμεν ἑαυτούς) from all pollution of flesh and spirit, perfecting holiness (ἐπιτελοῦντες ἁγιωσύνην) in the fear of God' (2 Co 7^{1}). 'I beseech you . . . to present (παραστῆσαι) your bodies a living sacrifice, hallowed, acceptable to God, as your spiritual service; and undergo, not a process of conformity to this age, but of transformation in mental renewal, that ye may prove what the will of God is—that good and acceptable and perfect will' (Ro 12$^{1f.}$). Here the process of gradual conformity to God's will is represented as following upon a definite self-surrender, in which the virtual or ideal relation to God, implied in trustful acceptance of Christ as 'righteousness and sanctification' to the sinful soul, is consciously realized and reaffirmed. As united to Christ by faith, Christians had 'died to sin,' and their 'old man' (old moral personality) was crucified with Him (Gal 5^{24}) and virtually 'put off'; coincidently they had been 'raised together with Christ,' in the power of a new moral personality, and had virtually 'put on the new man which is in process of renewal unto full insight after the image of Him that created him' (Ro 6$^{2-10}$, Col 3$^{9-11}$, Eph 4$^{22-24}$). But to this, their virtual state, many needed to be awakened, in order to put themselves consciously into the line of the Divine will and working, and no longer ignore the Holy Spirit's inward striving to work out, in realized acts, the consecrated attitude of their inmost being. And such awakening and real consecration—such arming for the fray—was rather a thing of definite decision (expressed by aorists, Ro 13^{14}, Col 1$^{9f.}$, Eph 6$^{11. 13-16}$) than of vaguely protracted process (expressed by presents).

(3) But such definitive self-surrender is no prelude to a life of effortless passivity. The true attitude once definitively assumed, it is to be reaffirmed in a lifelong process of conscious acts of obedience, the grounds, bearing, and issues of which are now appreciated (Eph 6$^{10. 18}$). No longer will it be marked by frequent 'grieving of the Spirit,' who has 'sealed' the soul for final redemption, but by a 'filling with the Spirit' (Eph 4^{30} 5^{18}). In such a process the Christian is 'consummating holiness' (ἐπιτελῶν ἁγιωσύνην), being hallowed in fresh ranges of his powers, even as Christ could say, 'For their sakes I hallow myself, that they themselves also may be hallowed by (the) truth' (Jn 17$^{19. 17}$). Such hallowing has no necessary connexion with purification from sin, but only with realization of the possibilities of devotion to God's will in love. It was here that St. Paul felt himself not yet to have attained or to have been brought to perfection.

(*c*) *The Epistle to the Hebrews.*—It was probably of this positive holiness, resulting from deepened consecration, that the writer to the Hebrews was thinking when he spoke of the Divine discipline of suffering as meant to issue in participation in the Father's holiness (12^{10}). But, on the whole, the objective aspect of sanctification, that of a true covenant-relation established by the offering of the Son's holy will in His life-blood, prevails in this Epistle. In it cleansing, consecration, and perfection * (9$^{13f.}$ 10$^{10. 14}$), all refer to the initial status of the believer (so Ac 26^{18}, cf. 20^{32}), as one of perfect access to the Father through the perfect sacrifice of the Mediator. The present participle, οἱ ἁγιαζόμενοι, does not refer to progressive sanctification, but expresses a constantly growing class, and so is equivalent to οἱ ἅγιοι (2^{11} 10^{14}).

(*d*) *St. Peter.*—We have seen already how his use of ἐν ἁγιασμῷ πνεύματος refers to the initial consecration wrought and sealed by the Spirit. Similarly in 1 P 1^{22} τὰς ψυχὰς ὑμῶν ἡγνικότες ἐν τῇ

---

* He 6^{1} ἐπὶ τὴν τελειότητα φερώμεθα is only a seeming exception; for it refers to knowledge, not to personal character.

ὑπακοῇ τῆς ἀληθείας εἰς φιλαδελφίαν ἀνυπόκριτον, ἐκ καρδίας ἀλλήλους ἀγαπήσατε ἐκτενῶς, ἀναγεγεννημένοι, κ.τ.λ., the perfect *ἡγνικότες* (like *ἀναγεγεννημένοι*) ‘refers back to the initial act of consecration, of which their acceptance of baptism was the outward sign. The working out of this . . . remained’ (Hort); and it is represented as something to be taken in hand once for all (aorist). With this accords the other pertinent passage, 1 P $1^{15f.}$, though it has but little theoretic significance. Hort takes its imperative, ‘become ye holy’ (*ἅγιοι . . . γενήθητε*), to refer to manifestation, not to essence. The thought is, ‘show yourselves holy, as you are,’ ‘show forth in your converse with others the holiness that attaches to your standing as consecrated by the Spirit’s touch.’ So, too, in 2 P $1^{4ff.}$ believers are conceived to be, through the fulfilment of the precious promises of the gospel, ‘sharers in (the) Divine nature,’ and separate or hallowed from the corruption of worldly desire. But progress is still requisite in order to ensure the final fruition of their calling and election. They are called diligently to add to their faith virtue, insight, self-control, patience, piety, brotherly affection, and, to crown all, love. These are regarded as fruit, tokens of true knowledge of Christ. Their absence argues dull vision of things divine, and a forgetfulness of a man’s initial cleansing from his old sins. Here the fact of progress in the experimental realization of the Divine life within is implied, but little or no theory of its rationale is given. Akin to this, in its practical point of view, seem the words in Rev 22^{11} *ὁ ἅγιος ἁγιασθήτω ἔτι*: for parallelism with *ὁ δίκαιος δικαιοσύνην ποιησάτω ἔτι* tends to fix its meaning as ‘let the saint still (once more) act as a saint.’

(*e*) *St. John.*—In St. John we meet the idea that the regenerate, in virtue of the Divine seed abiding in them, cannot sin habitually (1 Jn 3^{9} $5^{4.18}$, cf. 3^{6}). But a progressive purification of life, on the model of Christ’s purity and as the conscience is enlightened, is taught (*πᾶς ὁ ἔχων τὴν ἐλπίδα ταύτην ἐπ’ αὐτῷ ἁγνίζει ἑαυτὸν καθὼς ἐκεῖνος ἁγνός ἐστιν*, 3^{3}). It does not, however, seem to imply actual sin as a condition of purification: for St. John writes, that his readers may not fall into any single act of sin (*ἵνα μὴ ἁμάρτητε*, 2^{1}). If, then, a man walk in the light of a good conscience illumined by the gospel, it is possible to have unembarrassed fellowship with God, on the abiding basis of the cleansing effected by the atoning blood of Jesus (1^{7})—and that in spite of the presence of sin as a latent force within the soul (1^{8} *ἁμαρτίαν ἔχειν*). The initial consecration which brings free access (the *παρρησία* of He 10^{19}) suffices to neutralize sin, in the sense of a nature prone to sin; while the power of the Divine seed may avail, on condition of the will’s abiding in Christ, to ward off actual sin, and that indefinitely. Meantime sanctification, in the sense of the effacing of old evil habits and self-consecration to new forms of love, will go forward uninterruptedly on the model of Christ’s purity (1 Jn 3^{3}).

C. CONNECTED SUMMARY.—In Biblical religion, as elsewhere, the religious conception of holiness precedes the ethical; the idea of special relation to God and His service antedates the idea of intrinsic human goodness. The former is at first conceived as a matter of ritual duly performed, which places the worshipper in a state of objective sanctity. At a certain stage, however, the Divine will became defined in terms largely concerned with morality: henceforth the religious relation or state of holiness could be measured and tested by obedience to such divinely sanctioned forms of human conduct. And as moral action was felt to derive its value from internal volition, religious holiness lost something of its strictly objective character, and became bound up with the subjective state of man’s heart or volition. This is the stage, roughly speaking, to which the prophets brought the idea of sanctification in Israel. As, moreover, any striking result in the direction of the Divine will was traced to the action of the Divine Spirit, the loyalty of heart found in Israel was traced to the Spirit of Holiness proceeding from Jehovah. It does not seem, however, that even in the prophets the piety and morality of the ordinary individual were directly traced back to the Spirit. The first suggestion of this profound idea may be found in Ps 51, where the taking away of God’s Holy Spirit seems to be regarded as precluding the possibility of the ‘clean heart’ or ‘stedfast spirit,’ for which the psalmist supplicates. Yet in one special instance, that of Messiah Himself, the spiritual qualities which mark His consecrated life are traced to the action of the Spirit of Jehovah, Is 11^{2}. When we add that an ethical sense by this time attached to holiness in God, and was thence transferred to the holiness incumbent upon His worshippers (‘Be ye holy, for I am holy’), we have already all the rudiments of a doctrine of sanctification such as emerges in the NT under the creative influence of Jesus the Christ.

The decisive advance, whereby each individual is sealed as a hallowed member of God’s new Israel, appears as early as St. Peter’s address on the Day of Pentecost; and not long after, the same apostle sees in the gift of the Spirit to Gentile believers the token of their hallowing also unto God’s kingdom. But there is little or no sign that any one before St. Paul saw in the Spirit the very principle of the consecrated life in Christians, alike in its inception and in its development. His thought here was bound up with another most distinctive conception, viz. the mystical indwelling of Christ as the essence of the believer’s life. How closely these twin ideas were related may be seen in the great passage, Eph 3^{16-19}, in which he treats the strengthening of the inner man by the Holy Spirit as the condition of Christ’s indwelling, in such wise that the believer is filled with His love, and so with the very fulness of God (cf. Jn 14–17). Here we notice, in passing, that the tenses employed point to the possibility of such an experience being attained at a definite stage subsequent to conversion. It answers to that more conscious and deliberate self-surrender to God’s sanctifying grace which we have already recognized, on its human side, in such passages as Ro 12^{1}. But we observe in particular the fact that love seems to be to St. Paul (cf. 1 Co 13, Eph 1^{4}, Col 3^{14}), as to St. John, the all-inclusive ethical equivalent of personal holiness, as a state well-pleasing unto God, and indeed participation in His own essential life (‘unto all the fulness of God,’ cf. 2 P $1^{4.7}$).

Thus sanctification begins subjectively as faith (cf. Ac 26^{18}), or trustful self-abandonment to God’s revealed will; and ends as love. Attitude passes into character, the soul becoming assimilated to its object, the God to whom it is consecrated. This means that Justification, which involves regeneration, is implicit Sanctification; and actual Sanctification means the subjective attitude of the justified become explicit in moral life. Of the relation between the Divine and human factors active in sanctification as a process the NT gives no formal theory—any more than in the case of Faith itself, on which Sanctification, no less than Justification, is made to turn. It, too, begins and ends in faith: St. Paul might well have written *ὁ ἅγιος ἐκ πίστεως ζήσεται*. But the reality of each factor is strongly affirmed. Man is urged to ‘work out’ the grace within; yet with an awful sense that God Himself is already at work, prompting and animating, and so in utter reliance on His mighty initiative. A moral conflict there is, a struggle that taxes the nerves of the soul and exercises all its vigilance; but it is a conflict *of faith* (1 Ti 6^{12}), conducted in reliance upon Divine resources (Christ, and the Holy Spirit ever taking of His things and inspiring the soul), not in self-sufficiency (see Gal 2^{20} in contrast to Ro $10^{2f.}$ 7^{7}–8^{9} 3^{27}). The normal, and not only the intermittent, issue of such a conflict may be victory, and that without prescribed limit. Failure is due to imperfection of receptivity, intermittent 'abiding.' Yet, where this is understood, failure but strengthens for fuller victory, by deepening the sense of dependence; 'for when I am weak, then am I strong' (2 Co 12^{10}).

Literature.—The general literature is much the same as for Regeneration, the sections in Martensen's *Dogmatics* being specially good and suggestive. Much bearing on our topic will also be found in books on the Holy Spirit, *e.g.* Kuyper, *The Work of the Holy Spirit* (Eng. trans. 1900), and works there cited. Among older treatises, Marshall's *Gospel Mystery of Sanctification* (1690) is a classic. The Methodist doctrine of Holiness as 'Christian Perfection' or 'Perfect Love' has created quite a literature of its own. And in recent times a large literature has arisen, devoted to the experimental side of the subject as placed in relief by the so-called 'Holiness Movement,' of which 'Perfectionism' is one special phase. But such literature is not, as a rule, marked by much exegetical precision, and is apt to confuse the Biblical and dogmatic standpoints. The most scholarly books of this type are those of Prof. H. C. G. Moule of Cambridge, *e.g. Thoughts on Christian Sanctity* and *Outlines of Christian Doctrine*. There is a pamphlet by J. A. Beet, entitled 'Holiness, as understood by the Writers of the Bible' (1880), which examines the passages bearing on Sanctification in a careful and scholarly way. But in few books, save formal Biblical Theologies, is sufficient account taken of the standpoint and emphasis of the several Biblical writers, and in general of the psychological conditions involved in reducing their experimental language to theory.

J. V. Bartlet.

SANCTUARY.—The ideas underlying 'sanctuary,' a sacred or 'holy place' (מִקְדָּשׁ, קֹדֶשׁ—the former, however, is rarely, the latter never, used in OT of the *local* sanctuaries, for which the Canaanite term בָּמָה is regularly employed *), form part of the larger group of ideas associated with 'holy,' 'holiness,' etc., which have been analyzed and discussed in their manifold applications in the article Holiness in OT (vol. ii., see esp. p. 396ᵃ). In dealing with early Semitic religion, the term 'sanctuary' is used in a wider and a narrower application. On the one hand, the whole territory in which a particular deity is worshipped was in a sense his sanctuary; in this sense Canaan, 'J″'s land' (Hos 9^{3}), is also His house (8^{1} 9^{15}) and a 'holy land' (Zeph 3^{11}). On the other hand, in every such territory there were particular spots which were regarded as the favourite haunts of the god, at which he had manifested his power in the past, and was supposed to be still peculiarly accessible to his worshippers. Such primitive sanctuaries consisted of imposing natural objects—in particular, mountains, springs of water with the fertile spots around them, a wide-spreading tree with the ground beneath its shade, or more arbitrarily selected spots associated with visible manifestations of the deity (theophanies). When the Hebrews entered Palestine they found the land thickly studded with such local sanctuaries, each of them a centre of Canaanite worship. As the country gradually came under their control, its sacred places became *ipso facto* sanctuaries of the national God, Jahweh. Only a few typical examples can be mentioned here,† reference being made once for all to the special articles on the places named.

(*a*) Comparatively limited in number are the instances where *springs* and *wells* are attested as the sites of sanctuaries in our extant literature. The best known are the ancient sanctuary of Beersheba, associated by tradition with Abraham (Gn 21^{31}) and Isaac (26^{33}), and retaining its sanctity to a late date (see below); Kadesh (קָדֵשׁ 'holy place'), also named En-mishpat or Judgment-spring (14^{7}), and Beer-lahai-roi ($16^{7.\,14}$). Gihon, the modern Virgin's fountain, on the west side of the Kidron ravine, was the site of Solomon's consecration, and therefore a sanctuary of repute (1 K $1^{33.\,39}$); his rival Adonijah assembled his friends by another sacred spot, 'the Serpent stone' (Zoheleth), which was by En-rogel, the fuller's spring (1 K 1^{9}).

(*b*) More numerous were the *sacred trees*, which played an important part in the religion of the heathen Semites, and are still objects of veneration among the fellahin of Syria, as the pieces of cloth hung on their branches and the fragments of broken pottery underneath amply testify. Abraham's first altar on the soil of Canaan was raised beneath the shade of the terebinth of Moreh (Gn $12^{6.\,7}$ RVm) at 'the place of Shechem,' an eloquent witness to the extreme antiquity of this oracular sanctuary. Here were buried the objectionable images of Jacob's household (35^{4}); and the same tree, no doubt, is associated with Joshua (Jos $24^{26f.}$) and Abimelech (Jg 9^{6}). Of equal antiquity was another sanctuary, the terebinths of Mamre at Hebron (Gn 13^{18}). These tree-sanctuaries, indeed, figure with peculiar frequency in the legends of the patriarchs—a fact which is to be interpreted as implying their existence long before the Hebrew conquest. Besides those already noted at Shechem and Hebron, others are found at Beersheba (Gn 21^{33}), at a spot near Bethel (35^{8}), and, from a later period, at Ophrah (Jg $6^{11f.\,24}$). The fact that justice was uniformly dispensed under religious sanction and protection implies the presence of a sanctuary at the palm of Deborah (Jg 4^{5})—by several recent scholars identified with the 'oak of weeping' (see Allon-Bacuth) of Gn 35^{8}—and at Gibeah, where, according to the better Greek text, Saul sat under the tamarisk 'at the high place' (see p. 197ᵇ note), apparently to administer justice. Under the monarchy, indeed, these tree-sanctuaries were multiplied indefinitely, as we learn from the vigorous polemics of the later prophets against the 'altars upon every high hill, in all the tops of the mountains, and under every green tree and under every thick oak, the place where they did offer sweet savour to all their idols' (Ezk 6^{13}; cf. Dt 12^{2}, Jer 2^{20} and often, Is 57^{5}).* For the sacred pole or *'ashērah*, which some authorities regard as a substitute for the living tree, see Asherah, vol. i. p. 165.

(*c*) The special sanctity of *mountains* and *high hills* was a widespread belief, not confined to the Semites, in the ancient world. The earliest sanctuary of which we have any historical, as distinguished from legendary, record in OT is the mountain sanctuary of Horeb-Sinai, 'the mountain of God' (Ex 3^{1}, cf. 1 K 19^{8}). Hermon, as its name implies, was invested with similar sanctity. Within the limits of Canaan the names of Carmel (1 K $18^{19ff.}$), the opposing peaks of Ebal and Gerizim, Tabor (Hos 5^{1}), and the Mt. of Olives (2 S 15^{32}) at once suggest themselves. These, after all, are insignificant in number compared with the innumerable 'high places' or *bāmôth* with which the land was studded (see High Place, vol. ii. p. 381, for ample reff.). Down to the 7th cent. B.C. the religious customs of the Hebrews required that every town and village should have its local sanctuary, just as in Christian lands every parish has its church. From the interesting narrative 1 S $9^{12ff.}$ 10^{5} we learn that these sanctuaries were situated on the nearest commanding eminence. Where no such eminence was available, the sanctuary, it has been supposed, was erected upon an artificial mound (cf. Jer 7^{31}, 2 K 17^{9}). The usual type, however, of the artificial sanctuary, that is, a sanctuary created by human hands to mark the site of a special Divine manifestation, was the sacred pillar or *mazzēbah* or the sacred stone-circle (גִּלְגָּל) or cromlech (see, for details, Pillar, vol. iii., and cf. Altar, vol. i. p. 75).

Several of the above-mentioned sanctuaries had a more than local reputation. Those of greatest repute in the Northern Kingdom were Bethel, the chief 'royal sanctuary' (מִקְדַּשׁ מֶלֶךְ, AV 'the king's chapel,' Am 7^{13}), with its companion sanctuary Dan; Gilgal (Am 4^{4}, Hos 4^{15} etc.); and the far distant Beersheba (Am 5^{5} 8^{14}). A favourite sanctuary was at Gibeon, 'the great high place' (1 K $3^{4ff.}$), where Solomon's inaugural sacrifices were offered. In the period from the conquest to the building of the temple, the presence of the ark gave a special sanctity to the place of its location. Thus there can be no doubt that Shiloh was the principal sanctuary in the time of the judges; a special temple (הֵיכָל) was built for the greater safety of the ark, with the house of Eli as its ministrant priests. Hence the annual religious festival at Shiloh was one of exceptional importance (Jg 21^{19}, 1 S $1^{3.\,21}$). Whether the important sanctuary at Nob was contemporary with that at Shiloh is uncertain;

---

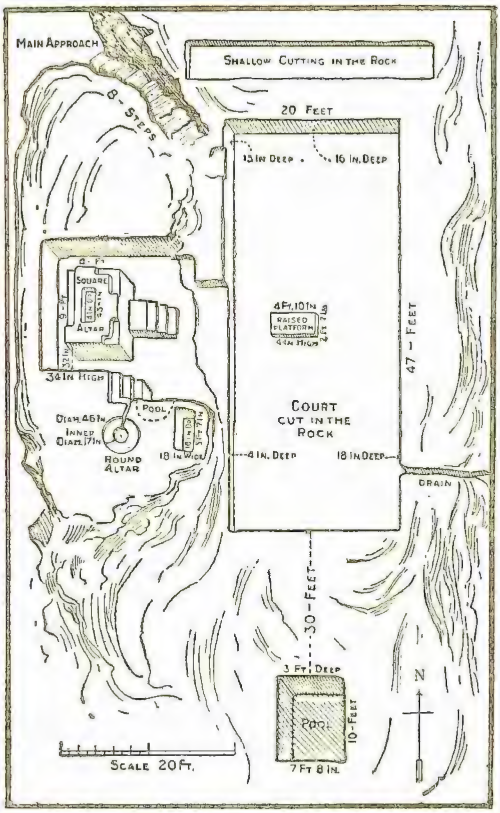
* That 'sanctuary' (*miḳdāsh*) and 'high place' (*bāmāh*) are synonymous in the older literature is evident from Am 7^{9} and Is 16^{12}. Cf. Ezk $20^{28f.}$ where 'high hill' also appears as a synonym of 'high place.'

† A German scholar, Freiherr von Gall, has recently investigated over *one hundred*, E. and W. of the Jordan, in his monograph on ancient Israelite sanctuaries (*Altisrael. Kultstätten*, 1898).

* We do not include here the graves of the Hebrew patriarchs and heroes, since it is still a moot point to what extent, if at all, these were places of worship for their descendants.

the first mention of it occurs after the destruction of the latter (1 S $21^{1ff.}$), but this may be accidental. All the sacred places of the South, however, were soon eclipsed by the royal sanctuary at Jerusalem, raised on the spot consecrated by the theophany at the threshing-floor of Araunah (2 S $24^{18.25}$, 2 Ch 3^{1}).

Round these ancient shrines centred the religious life of the Hebrews in early times. Hither they flocked as the annual festivals came round, at the recurring new moons and sabbaths, to offer their tithes, their first-fruits, and their sacrifices. Unfortunately, we can only partially reconstruct either the equipment of these sanctuaries or the ceremonies which characterized the worship of antiquity, with its sacrificial meal and the joyous intercourse of the sacral community. Without unnecessarily repeating the facts already given in the article HIGH PLACE (§ iv. vol. ii. p. 382), we may note the indispensable altar with its almost universal adjuncts, the sacred pillar (*mazzēbah*) and the sacred pole (*'ashērah*), the hall (לִשְׁכָּה 1 S 9^{22}) or halls in which the sacrificial feast was held, a temple or shrine (בֵּית בָּמוֹת 1 K 12^{31} and elsewhere) for the protection of the sacred images which formed part of the equipment of some sanctuaries at least, such as the mysterious EPHOD and the almost equally mysterious TERAPHIM (see commentaries on Hos 3^{4}).



PLAN OF HIGH PLACE, PETRA.

The recent discovery of what must have been the royal sanctuary of Edom, close to the ruins of Petra, affords very material aid in the reconstruction above desiderated. Near the summit of a mountain overlooking Petra * were found two rock-cut 'obelisk-like columns,' about 18 ft. in height, and some 100 ft. apart, clearly the *mazzēbahs* of OT. On the actual summit was a large court, 47 ft. by 20, hewn in the rock to the depth in parts of 18 in., and approached from below by a stair cut in the rock. Near the centre of the court sufficient rock has been left to form a raised platform 5 ft. by 2½, and 4 in. in height. It has been suggested that here the worshipper stood whose victim was being offered, the rest of the worshippers standing in the surrounding court. On the west of the latter, facing the raised platform, stands the altar, 9 ft. by 6, in height 3 ft., cut free on all sides from the surrounding rock, and furnished on the side towards the court with a short flight of four steps. On the topmost step, which is considerably the largest, stood the officiating priest. In the centre of the upper surface of the altar a rectangular depression has been hewn out to serve as the altar-hearth. Immediately to the south of the altar, and approached from it by steps, the rock presents a flat surface with two large 'circular and concentric' cups hewn out with vertical sides, the larger 3 ft. 10 in., the smaller 1 ft. 5 in. in diameter. Here the sacrifices may have been prepared, as a conduit leading from the lower cup seems to have served to carry away the blood of the victims. For further details reference must be made to the articles cited, both of which are illustrated by photographs and drawings.

From the time when the Hebrews served themselves heirs to the sanctuaries of Canaan, the worship of J″ was there celebrated for several centuries with the full approval of Israel's religious guides (see 1 S 7^{17}, 1 K 3^{4} 18^{30} and oft.). Such local worship is alone contemplated in the oldest Hebrew legislation ('in every place where I record my name I will come unto thee and I will bless thee,' Ex 20^{24}). But by this multiplicity of sanctuaries the religion of J″ was exposed to two great dangers, against which the prophets of the 8th century repeatedly utter the most solemn warnings. In the first place, there was an ever-increasing admixture of heathen Canaanite elements with the purer and more spiritual elements of the true Hebrew cultus, until Hosea could truthfully declare that the worship of J″ had practically degenerated into idolatry (13^{2}) and its ministrants into idol-priests (see CHEMARIM). In the second place, the native religion, with its multiplicity of local Baalim, exerted a baneful influence on the Mosaic doctrine of the unity of J″. The Northern Kingdom came to an end before a reformation could be effected. In the South, thanks to the unique position of its royal sanctuary and the comparative purity of the cultus as there practised, this twofold danger was not felt to quite the same extent. Yet the destruction of Samaria, the strongest possible proof of the Divine commission of her prophets, could not fail to make a profound impression on the best religious spirits of the South, while, at the same time, the greatly enhanced importance of the temple at Jerusalem would gradually tend to diminish the popularity and prestige of the local sanctuaries. Whether Hezekiah really made the attempt at centralization with which he is credited (2 K 18^{4}) must be left an open question. The reform, at the best, was shortlived. Not till the far-reaching reformation of Josiah, under the immediate inspiration of Deuteronomy (B.C. 622–621), were effective measures taken for the destruction of the local sanctuaries and the deportation of their priests to Jerusalem (2 K 23). The losses as well as the gains of so drastic a measure of reform have been set forth under the article HIGH PLACE (with which compare DEUTERONOMY, JOSIAH). In the Priestly document (P) the battle has long been won, and scarcely an echo remains. The law and practice of one central sanctuary are transferred to the period of the desert wanderings (see TABERNACLE), an unhistorical presentation of the religious history of the Hebrews which dominates the whole subsequent literature, and has prevailed to our own day.

In what has been said up to this point, the purely religious aspect of the ancient sanctuaries has been properly kept in the foreground. But, in early times at least, these sanctuaries were also the seats of justice (θέμις), of which their priests were the administrators. In general, where the consuetudinary law of the clan or tribe proved inadequate, a fresh *torah* or Divine and authoritative decision was sought from J″'s representatives at the nearest sanctuary of repute. The extant law-codes, further, make provision for the interposition in specified cases of the priests of the local sanctuaries in their judicial capacity—whence their peculiar title Elohim (see אֱלֹהִים in *Oxf. Heb. Lex.*), though some of the passages in question (Ex 21^{6} $22^{8f.}$ [Heb. $^{7f.}$]; cf. $18^{15ff.}$, 1 S 2^{25}) are of doubtful interpretation. More explicit are the recommendations of Deut. regulating the procedure of the supreme court at the central sanctuary (Dt $17^{8f.}$). Passing from the law-codes to the history, we find, as has been pointed out above, repeated evidence of the leaders of the people dispensing justice at the various sanctuaries, *e.g.* Moses at En-mishpat or Kadesh (see LAW IN OT, vol. iii. p. 67^{a}), Deborah, Samuel,—whose circuit included Bethel, Gilgal, and Mizpah, all notable sanctuaries (1 S 7^{16}),—and Saul (reff. above).

---

* The following is based on an article by Professor Robinson of Chicago (who, though not the first to visit the site, was the first to realize its importance, April 1900), entitled 'The High Place at Petra in Edom,' in the *Biblical World*, Jan. 1901; and on an earlier article by Professor Ives Curtiss (who visited the site in July 1900) in *PEFSt*, Oct. 1900.

Every primitive sanctuary, further, in virtue of its inviolability as the abode of deity, was an asylum or place of refuge. This right of asylum is expressly recognized in the oldest legislation, only cases of premeditated murder being excluded (Ex $21^{13.14}$; see GOEL, vol. ii. p. 223 f.; ALTAR, vol. i. p. 77^{a}). The later institution of cities of refuge (see REFUGE) was the necessary corollary of the destruction of the local sanctuaries.

For the so-called 'shekel of the sanctuary,' see MONEY (vol. iii. p. 422). A. R. S. KENNEDY.

SAND (חוֹל, ἄμμος) consists of an aggregate of incoherent grains of silex, generally mixed with others of different mineral substances, such as mica, felspar, and gems. It was a familiar object with writers of the Bible, and is therefore used emblematically, the expression 'as the sand which is by the seashore' being found in several passages (Gn 22^{17}, Jos 11^{4}, 1 S 13^{5}, 1 K 4^{20} etc.). The reference is to the line of sandhills along the coast of the Mediterranean (see SEA (GREAT)) and Lower Egypt (Ex 2^{12}).

In the following passages the word is used to represent—(1) *Numberlessness, vastness:* the descendants of Abraham (Gn 22^{17}, Jer 33^{22}, Ro 9^{27}, He 11^{12}); the store of corn gathered by Joseph in Egypt (Gn 41^{49}); the nations of Canaan (Jos 11^{4}); the Philistines (1 S 13^{5}); the Israelites (2 S 17^{11}, 1 K 4^{20}, Is 10^{22} 48^{19}); the captives of the Chaldæans (Hab 1^{9}); Solomon's largeness of heart, *i.e.* wisdom (1 K 4^{29} [Heb. 5^{9}]); (2) *heaviness* (Job 6^{3}, Pr 27^{3}); (3) *an insecure foundation* (Mt 7^{26}).

i. THE NAME AND ITS HISTORY.—*Sanhedrin* (*i.e.* συνέδριον) was the name applied to the highest court of justice and supreme council at Jerusalem, and in a wider sense also to lower courts of justice. In the Jewish tradition-literature this designation, borrowed from the Greek, alternates with the post-biblical Heb. בית דין, Aram. בי דינא. The Hebrew-Aramaic form סַנְהֶדְרִין (we find also the punctuation סַנְהֶדְרִין) sprang from the Greek word, the aspiration of the second vowel (from ἕδρα) becoming audible and being transcribed with ה. The ending -ιον was pronounced as a monosyllable, with elision of the ο, as in other words with the same ending (cf. פלטין=παλάτιον, i.e. *palatium*). The word, however, is found written also without ה (see Levy, *Wörterb. z. den Targumim*, ii. 175; *NHWB* iii. 553*b*). From סנהדרין, which sounded like a Semitic plural, there was even formed a sing. form סַנְהֶדְרִי, which is met with not infrequently. Both forms were treated as feminines. From סַנְהֶדְרִי was formed the plur. סנהדראות.

Owing to the character of the ancient traditions embodied in the Talmudic literature, it cannot be gathered from these when the employment of the Greek word began. In the halachic tradition it makes its appearance as completely naturalized and belonging to the ancient vocabulary of this tradition. The first historical statement in which Josephus employs the word συνέδριον has regard to the procedure of the Roman governor of Syria, Gabinius, who abrogated the constitution of the country of the Jews, and divided the latter into five districts, each with a *synedrion* at its head (*Ant.* XIV. v. 4). One of these *synedria* had its seat at Jerusalem, and was of exactly the same rank as the others. But it is not likely that the name first took root on this occasion (B.C. 57), and in consequence of the action of Gabinius. For if the term was first employed in his decree degrading the supreme council of Jerusalem, it would surely not have been retained when, a few years afterwards, the Sanhedrin at Jerusalem regained its dignity; nor, if it had had so hateful an origin, would it have gained the popularity which is conspicuous in its employment in the national tradition, and especially in that connected with religious legislation. But a direct proof of the earlier origin of our loan-word may be drawn from the Alexandrian translation of the OT. In the LXX version of the Book of Proverbs συνέδριον is used pretty frequently: so in 15^{17} to reproduce סוֹד in the sense of 'deliberative assembly' (cf. also 11^{13} and 3^{22}, likewise Jer 15^{17}). In 26^{26} בקהל is rendered by ἐν συνεδρίοις. But specially striking are the renderings of 22^{10} and 31^{23}. In the former of these passages the translator read וישב בית דין for וישבת דין, and rendered accordingly ὅταν γὰρ καθίσῃ ἐν συνεδρίῳ, where, however, συνέδριον is, as in the language of the Palestinian schools, equivalent to בֵּית דִּין. In the other passage the second half of the verse is rendered ἡνίκα ἂν καθίσῃ ἐν συνεδρίῳ μετὰ τῶν γερόντων κατοίκων τῆς γῆς. The addition ἐν συνεδρίῳ is plainly occasioned by the mention of the 'elders' of the land, for the members of the Sanhedrin are called זְקֵנִים (πρεσβύτεροι), and the Sanhedrin itself (see below) also bears the title γερουσία.—Now we do not know when the Book of Proverbs was translated into Greek, but in all probability it is included among the 'other books,' besides the Pentateuch and the Prophets, whose translation into Greek is mentioned in the Prologue to Sirach. In that case the Greek translation of Proverbs would have been in existence as early as B.C. 130, and συνέδριον had been then for a long time the common property of the Jewish school speech, into which it must have found its way at the era of the Græco-Syrian supremacy.

ii. ORIGIN AND HISTORY OF THE INSTITUTION.—1. It might be assumed beforehand that the institution which received the Greek title συνέδριον in the 2nd cent. B.C. had also an existence of some kind during the earlier centuries of the second temple. It has been suggested that the GREAT SYNAGOGUE (כנסת הגדולה), which in the school tradition (see *Aboth* i. 1) forms the connecting link between the last of the Prophets and the first teachers of the Law who are named in the Greek period, was nothing else than the supreme council of Jerusalem, afterwards called the Sanhedrin. But it is to be noted as a fact that the school tradition itself understands by כנסת הגדולה not an institution persisting for centuries, but that extremely important assembly held under Ezra and Nehemiah (Neh 8–10), which was called the 'great,' just as 1 Mac 14^{28} gives the name *συναγωγὴ μεγάλη* to the assembly which nominated Simon hereditary prince and high priest. Of course it is possible that the supreme council of Jerusalem was thought of as the continuation of that great assembly, or, rather, that the great assembly was thought of as the supreme council, the Sanhedrin of the period between the last of the Prophets and the beginning of the Greek domination. Such a conception would make its way all the more readily, seeing that later tradition contracted this period to a few decades. It would also explain the circumstance that in the Roll of Fasts (*Megillat Taanith*) the Sanhedrin is called כנישתא (=כנסת) in the passage cited below. An actual trace of the highest court of justice as it existed in Jerusalem at the close of the Persian period should perhaps be discovered in the description of the college of judges which, according to 2 Ch 19^{8}, king Jehoshaphat instituted at Jerusalem, and whose functions are specified, having regard to Dt 17^{8}. In this description the Chronicler had before his mind's eye the institution as it existed in Jerusalem in his own day.

2. In the records relating to the Greek period we find the supreme council of Jerusalem bearing the designation *γερουσία*. It is so named by Antiochus the Great (*c.* 200 B.C.) at the head of the leading classes of the Jews who are freed from all imposts and taxes (Jos. *Ant.* XII. iii. 3). Antiochus V., in a letter to the Jewish people (B.C. 164), offers greetings *τῇ γερουσίᾳ τῶν Ἰουδαίων* (2 Mac 11^{27}). Elsewhere, too, in the narratives of the Maccabæan era there is mention of the *γερουσία*, or we find the first place assigned to the 'elders' (*οἱ πρεσβύτεροι*) of Israel (cf. Schürer, *GJV*³ ii. 192 [*HJP* II. i. 167]). In the Talmudic tradition the Sanhedrin of the Hasmonæan period is called בית דין של חשמונאי 'house of justice of the Hasmonæans' (*Aboda zara* 36*b*; *Sanhed.* 82*a*). Its history coincides partially with the history of the conflicts between the PHARISEES and SADDUCEES. When John Hyrcanus, towards the end of his reign, shook himself loose from the Pharisees and declared their enactments to be without force (Jos. *Ant.* XVI. xi. 1), he is not likely to have accomplished this without having expelled the Pharisaic members from the Sanhedrin. There came thus into being a 'Sadducean Sanhedrin' (סנהדרין של צדוקים; cf. בית דין של צדוקים of Bab. *Sanhed.* 52*b*), as it is called in a valuable tradition preserved in § 10 of the Roll of Fasts (*Megillat Taanith*) which is of importance for the history of the Sanhedrin. Here it is said that on the 28th of the month Tebet: יתיבא כנישתא על דינא, *i.e.* 'the assembly constituted itself according to the law,' or 'the assembly sat for judgment.' According to the accompanying gloss, which rests beyond doubt on historical tradition, this event, whose memory was thus perpetuated by an anniversary, took place in the reign of Jannæus, and consisted in the expulsion of the Sadducean members from the Sanhedrin, and in the constitution of a new Sanhedrin, whose deliberations were conducted on Pharisaic principles, under the leadership of Simon ben Shetach. But this victory of the Pharisees was soon followed by the bitterest conflicts between them and Alexander Jannæus, and by the consequent supremacy of the Sadducees in the Sanhedrin, which, however, had to yield in turn to that of the Pharisees under Jannæus successor Salome Alexandra.

In the brothers' quarrel amongst the sons of Alexandra, the Sanhedrin must again have played its rôle. This strife led to the intervention of Rome, and not long afterwards to the above-mentioned degradation of the Sanhedrin by Gabinius. This degradation, however, was only transient, and soon we find the Sanhedrin sitting in judgment upon Herod the young son of Antipater (*Ant.* XIV. ix. 4). This memorable judicial sitting was destined to be fateful for the Sanhedrin, those who took part in it falling victims to the bloody revenge of Herod when he came to power (*ib.*). The institution itself Herod allowed to continue. He even utilized the Sanhedrin to get sentence of death passed upon the aged Hyrcanus (*Ant.* XV. vi. 3).

3. During the period of the Roman procurators, which was interrupted for a few years (A.D. 41–44) by the reign of Agrippa I., the Sanhedrin continued to be the supreme authority of the Jewish people. It appears as such in the NT narratives of the trial of Jesus (Mt 26^{57}, Mk 14^{55} 15^{1}, Lk 22^{66}, Jn 11^{47}), as well as on other occasions in the early days of Christianity (Ac 4^{15} $5^{22\text{ff.}}$ $6^{12\text{ff.}}$ 22^{30} $23^{1\text{ff.}}$ 24^{20}). Jesus Himself once (Mt 5^{22}) names the Sanhedrin as the tribunal called on to give judgment in the case of capital offences. In Josephus' record of the events that occurred in the times of the last procurators and during the war against Rome, the Sanhedrin is mentioned sometimes as *συνέδριον* and sometimes as *βουλή*. Or he speaks, as is almost his uniform practice in his autobiography, of the *κοινὸν τῶν Ἱεροσολυμιτῶν* (*Vita* 12. 13. 38. 49. 70), or, shortly, *τὸ κοινόν* (*ib.* 52. 60), meaning by this especially the Sanhedrin. It was the latter that during the first years of the war with Rome guided affairs and organized the struggle. But when the Zealots seized the reins of power in the besieged Jerusalem, they no doubt put the Sanhedrin aside. In order to procure a sentence of death upon a man who had incurred their displeasure, the Zealots assembled *ad hoc* a tribunal of 70, in which Josephus (*BJ* IV. v. 4) sees a caricature of the regular court. Amongst the traditions relating to the melancholy events connected with the fall of the Jewish State, we read not only of the destruction of the Temple but of the 'cessation of the Sanhedrin' (*Sota* ix. end; *Echa rabbathi* on La 5^{15}). 'With it,' we are told, 'ceased the joyous song of the feasts.'

4. As the Jewish people itself, immediately after the destruction of Jerusalem, began a new life in Palestine under new conditions, so also the Sanhedrin of Jerusalem experienced a kind of resurrection. At Jabneh (Jamnia) an assembly of teachers of the Law constituted itself and regarded itself as the continuation of the Great Sanhedrin. In the first instance a university or academy, but then an assembly which deliberated, which interpreted the laws of the Jewish religion, and thus became really a legislative and judicial body,—this new Sanhedrin, as constituted at Jamnia, had many points of close contact with the old council of Jerusalem. And when Jamnia ceased to be the central point of Jewish scribism, the Sanhedrin migrated—so the tradition expressed it (*Rosh hashana* 31*a b*, upon the authority of R. Jochanan, † 279)—to other places, till it settled down at Tiberias. This notion of the persistence of the Sanhedrin even after the destruction of Jerusalem, and of its continuance in the high schools of Palestine, has largely influenced the traditions about the Sanhedrin. What was true of the new institution was transferred to the ancient one, and the historical picture of the latter was thus essentially changed. Yet it may be assumed, on

the other hand, that faithful adherence to tradition about the ancient Sanhedrin secured the retention in the new body of many peculiarities of the institution as it had existed in its last decades. In this way even the statements about the Sanhedrin preserved in Tannaite tradition and in halachic theory may be treated as historical evidence. It is hard, to be sure, to bring this evidence into harmony with the statements of Josephus and the NT, but all the same it is to these first-named witnesses that we owe our acquaintance with most of the features in the picture we are to draw of the character and activity of the Sanhedrin.

5. In distinction from the lesser courts of justice which were found in all the cities of the Jews' country, the Sanhedrin at Jerusalem was called the Great Sanhedrin (סנהדרין גדולה or סנהדרי גדולה, the same as בית דין גדול). The Mishna (*Sanhed.* i. 6) says on this point: 'There was a great Sanhedrin of 71 members and a little Sanhedrin of 23.' According to the Tannaite Jose b. Chalaftha, well known as a chronologist and a source of historical information, there were in Jerusalem itself, besides the Great Sanhedrin, other two little *synedria*. This statement, which is coupled with information about the activity of the Sanhedrin (Tosefta, *Chagiga* ii. 9, and *Sanhed.* vii. 1; Jerus. *Sanhed.* 19*c*; Bab. *Sanhed.* 88*b*), agrees with the anonymous statement of the Mishna (*Sanhed.* xi. 2) and the Sifrê (on Dt 17[8], § 152).

iii. PLACE OF MEETING.—The seats of the two lesser courts of justice of Jerusalem are specified in the above passages as, respectively, 'the entrance of the Temple mount' [in one version 'the Temple mount'], and 'the entrance of the Temple court' [in one version 'of the Chêl,' *Middoth* ii. 3]. The legend of the destruction of Jerusalem (*Echa rab.* Proœm. n. 23, *ib.* on La 2[2] and 4[16]; *Kohel. rab.* on Ec 3[16]; Bab. *Gittin* 57*b*) also speaks of the great and the little Sanhedrin.—As the seat of the Great Sanhedrin, the Tannaite tradition (besides the above-cited passages, see Mishna, *Peah* ii. 6, *Eduyoth* vii. 4) names 'the Hall of Hewn Stone' (לשכת הגזית), which, according to *Middoth* v. 4, was on the south side of the great court. This hall served the priests also for the disposing by lot of their functions (Mishna, *Tamid* ii. end; Tosefta, *Yoma* ii. 10; Bab. *Yoma* 25*a*), and as the place for the recitation of the *Shema'* (*Tamid* iv. end).

According to a *baraitha* of the Bab. Talmud (*Yoma* 25*a*) the 'Hall of Hewn Stone' was in the form of a 'great basilica.' But this statement may have arisen from the description of the basilica at Alexandria in which the Sanhedrin there held its sittings (Tos. *Sukka* iv. 6; Bab. *Sukka* 53*b*). Abayi, a Bab. Amora of the 4th cent., inferred from the statements about the use of the Hall of Hewn Stone, that the latter lay half on sacred ground and half outside it. In any case the Hall must be thought of as within the Temple area, and the view of Schürer (*GJV* [3] ii. 311) that הגזית means the ξυστός and לשכת הגזית the hall by the *Xystus*, and that the latter is identical with the βουλή mentioned by Josephus (*BJ* v. iv. 2), cannot hold ground. Josephus gives in this passage the situation of the place where the 'council' (Sanhedrin) held its sittings during the last years of the Jewish State. But, according to a tradition which is to be regarded as in its kernel true, during the last years of Jerusalem the sittings of the Sanhedrin were no longer held in the Hall of Hewn Stone, but were removed from it to a place called the 'trade hall' (חָנוּת, *var. lec.* plur. חנויות 'trade halls'), and from there again to 'Jerusalem' (*Shabbath* 15*a*; *Rosh hashana* 31*a*; *Sanhed.* 41*a*; *Aboda zara* 8*b*). According to this authority the last sittings of the Sanhedrin were held outside the Temple area, in the city itself, and it is to this situation that Josephus' words about the βουλή in the neighbourhood of the ξυστός refer.

iv. COMPOSITION OF THE COURT.—1. The Great Sanhedrin consisted, according to the above-cited testimony of the Mishna, of 71 members. It is called on that account סנהדרין של שבעים ואחד (*Shebuoth* ii. 2), or בית דין של שבעים ואחד (Jose b. Chalaftha, *l.c.*; cf. also Mishna, *Sanhed.* i. 5; Tos. *Sanhed.* iii. 4). The derivation of this number from that of the 70 elders of Nu 11[16], which with Moses amounted to 71, appears to be old (Mishna, *Sanhed.* i. 6; Sifrê on *Numbers*, § 92). It is questionable whether it was this derivation that determined the number of members, or whether the number already established found its sanction by thus going back to the Bible narrative. According to the above-cited statement about the basilica of Alexandria, there was in that city also a Sanhedrin of 71 members. The same number was retained at Jamnia, for, as Simon b. Azzai (before A.D. 150) relates, there were 72 elders present, when Eleazar b. Azarja was associated with Gamaliel II. as president (Mishna, *Zebachim* i. 3; *Yadaim* iii. 5, iv. 2), *i.e.* one more than the usual number. An isolated tradition, from Jehudah b. Ilai, fixes the total membership at 70 (Mishna, *Sanhed.* i. 6; Tos. *Sanhed.* iii. 9), and the Great Sanhedrin is called accordingly ס׳ של שבעים (Sifrê on *Numbers*, § 92). Josephus likewise chose 70 of the elders of the land to constitute the supreme authority in the province of Galilee, which had been assigned to him (*BJ* II. xx. v); and in the same way the court set up by the Zealots (see above, ii. 3) numbered 70 members. The vacillation of our authorities between the numbers 70 and 71 is no doubt due to the circumstance that the president might be regarded as belonging to the total number or not.

2. We have no positive information as to who composed the Sanhedrin. The halachic tradition on this point must be regarded as theory, derived only in part from the actual condition of things. The members of the Sanhedrin were called זְקֵנִים 'elders' (= πρεσβύτεροι), a name which gained its special sense from the fact that the Sanhedrin was regarded as an institution set up by Moses when he nominated the 70 elders (Nu 11). It is members of the Sanhedrin that are meant when it is said that the preparing of the high priest for his functions on the Day of Atonement is to be attended to by זקנים מזקני בית דין (*Yoma* i. 3, 5). Again, זָקֵן is doubtless to be taken in its special sense of member of the Sanhedrin, when the epithet הַזָּקֵן is applied to Shammai, Hillel, and Hillel's grandson Gamaliel I. In the NT the members of the Sanhedrin (πρεσβύτεροι, or πρεσ. τοῦ λαοῦ) are often named along with the chief priests (ἀρχιερεῖς) and the scribes (γραμματεῖς), for the membership of the Sanhedrin was recruited from these two leading classes (Schürer, *l.c.* p. 200). Josephus, in whose writings the Sanhedrin is frequently called βουλή, also calls its members βουλευταί (*BJ* II. xvii. 1). This designation probably accounts for one of the halls of the Temple being called לשכת בולוטי 'hall of the βουλευταί.'

The same hall afterwards bore the name לשכת פרהדרין 'hall of the πρόεδροι' (Mishna, *Yoma* i. 1). This last title, which has been handed down by the Tannaite Jehudah b. Ilai (Bab. *Yoma* 8*b*), is quite worthy of credit, and it supports the suggestion of Schürer that by the πρόεδροι should be understood the highest in rank of the members of the Sanhedrin, the 'first ten' of whom we hear under the procurator Festus (*Ant.* XX. viii. 11, τοὺς πρώτους δέκα; cf. Schürer, *l.c.* p. 201 f.). Upon the above-cited authority of Jehudah b. Ilai we are told that the πρόεδροι were changed every twelve months, so that the rank of 'first ten' was enjoyed by different members of the Sanhedrin every year. If we, further, take into account that the institution of the πρόεδροι was of late origin, we can readily understand how the above change of name for the hall also came into use. The circumstance that the 'hall of the πρόεδροι' was the private residence of the high priest is not difficult to explain, considering the relation of the high priest to the Sanhedrin. The βουλευταί, afterwards the πρόεδροι, may have assembled in the house of the high priest (cf. Mt 26[57], Mk 14[53]) before taking their places in the public sitting of the Sanhedrin.

3. Of distinctions of rank within the Sanhedrin we hear nothing, apart from the above-mentioned conjecture. Neither are we aware on what principle the members were nominated or how the Sanhedrin filled up vacancies in its number. Only

two, divergent, statements have come down to us regarding the latter point, and of these one can refer only to the period preceding the destruction of Jerusalem, whereas the other has in view rather the school of Jamnia and its successors. The first statement is found in the above-named narrative of Jose b. Chalaftha, and in an anonymous precept of the Tosefta (*Shekalim*, end), according to which a seat in the Sanhedrin is the last step in the career of judge. Any one who distinguished himself as a judge in his place of residence was advanced to be a member first of the one, then of the other, of the two lesser *synedria* at Jerusalem, and was chosen finally to be a member of the Great Sanhedrin. According to the other statement (Mishna, *Sanhed.* iv. 4; Tos. *Sanhed.* viii. 2), in front of the members of the Sanhedrin sat in three rows the non-ordained scribes, and from among these any vacancies in the membership were filled up, the requisite number being chosen and ordained according to a fixed order. It is plain that these two accounts of the filling up of vacancies relate to different periods of time. In the first, which has in view the period before the destruction of Jerusalem, there is no mention at all of the ordination of the new members, but we find the expression הושיב, which means 'cause to sit,' implying simply that the new member had a seat assigned him in the Sanhedrin. This is quite intelligible, for, according to the view we are considering, those who became members of the Sanhedrin had previously officiated in the lower courts, and were thus ordained already.

4. As to the *qualifications* for membership in the Sanhedrin, the oft-cited narrative of Jose b. Chalaftha gives a list of the personal qualities which the candidate for this high rank must possess. He had to be learned (חכם), humble (עניו; Bab. *Sanhed.* 88*a* שפל ברך), popular with his fellow-men (רוח הבריות נוחה הימנו). In the different versions of the passage there are yet further moral qualities specified. In the ancient exposition of Nu 11^{16} (Sifrê, § 92) it is inferred from the word איש ('man') that the members must be perfect men: learned, courageous, strong, and modest. Jochanan, the Palestinian Amora of the 3rd cent., states the qualifications of a member of the Sanhedrin thus: tall stature, learning, dignified bearing, advanced age. Further, in order to be able to meet the demands of his office, he must be acquainted with foreign languages and initiated into the mysteries of the art of magic (Bab. *Sanhed.* 17*b*).

As the high court of justice described in 2 Ch 19^8 consisted of 'Levites, priests, and heads of Israelitish families,' so in the ancient exposition of Dt 17^9 (Sifrê, *ad loc.*, § 15 *ad init.*) it is stated that the court dealing with law cases must have priests and Levites amongst its members, but that even without these it might be legitimately composed. A rule of the Mishna (*Kiddushin* iv. 5) is to the effect that an inquiry as to purity of family descent is not to be carried beyond the Sanhedrin, since no one can be a member of it whose origin is not unquestionable. It is actually prescribed in another rule (*Sanhed.* iv. 2) that judges in criminal cases, including therefore members of the Sanhedrin, are to be only priests, Levites, or Israelites whose daughters may be married by priests.

v. THE PRESIDENT OF THE SANHEDRIN.—1. On this point the tradition-literature contains statements which it is difficult or impossible to reconcile with the reports of Josephus and the NT. The last are meagre, indeed, and do not give a distinct picture of the method of procedure in the Sanhedrin and of the action of its president. But from Josephus we learn that in B.C. 47 the Hasmonæan high priest and prince Hyrcanus II. called the Sanhedrin together and directed the procedure in the case of Herod (*Ant.* XIV. ix. 4 f.), and that in A.D. 62 the Sadducean high priest Ananus II. summoned the Sanhedrin, in order to have some sentences of death passed (*ib.* XX. ix. 1). At the trial of Jesus, the high priest Caiaphas appears at the head of the Sanhedrin (Mt 26^{57}), as does the high priest Ananias at the trial of St. Paul (Ac 24^1). Of such a function belonging to the high priest (cf. also 2 Ch 19^{11}) there is not the slightest trace in the tradition-literature. On the contrary, it is assumed as an axiom that the Sanhedrin had its own president, making up the number of members to 71 (see above). The simplest designation of the president is ראש בית דין 'head of the house of justice' (*Rosh hashana* ii. 7, iv. 4), which in the later haggadic literature is represented by ראש של סנהדרין (*Pesikta rabbathi*, c. xi. p. 43*b*), ראשי סנהדרין (*Tanchuma*, ed. Buber, i. 175), ראשי סנהדראות (*Esther rab.* on 1^{13}). But the title that must be regarded as peculiar to the president is אב בית רין 'father of the house of justice.' As head of the supreme court, the *'Ab Bêth Dîn* is once named after the king (*Yoma* vii. 5), once after the 'prince' (*Taanith* ii. 1), by which last title is meant the head of the State, who, after the usage of the Pentateuch and especially of Ezekiel, is frequently called in the halachic literature נָשִׂיא 'prince'; once it is expressly said, with allusion to Lv 4^{22}, ואיזהו הנשיא זה המלך (*Horayoth* iii. 3). Now, remarkably enough, the same word נשיא became the title of the president of the Sanhedrin. The sitting arrangements of the Sanhedrin are thus described (Tos. *Sanhed.* viii. 1; Jerus. *Sanhed.* 19*c*): 'The Sanhedrin sat in a semicircle [lit. 'like the half of a circular threshing-floor']; in the middle sat the *Nasi*, and the elders [*i.e.* the members of the Sanhedrin] sat upon his right hand and upon his left.' This statement appears to relate to the Sanhedrin of Jamnia, for it is followed immediately by the reminiscences of a teacher of the Law regarding that Sanhedrin. Eleazar b. Zadok reports: 'When R. Gamaliel [Gamaliel II.] held the presidency at Jamnia, my father and another sat to the right, the others to the left.'

2. It is not till the post-Hadrianic era that the *'Ab Bêth Dîn* appears side by side with the *Nasi* as joint-president. Jochanan († 279) records—doubtless on the basis of trustworthy tradition—that R. Simon b. Gamaliel (the son of Gamaliel II.) was Nasi, while R. Nathan was 'Ab Bêth Dîn (Bab. *Horayoth* 13*b*). This double presidency, to designate which the two titles of the president of the Sanhedrin are utilized, is carried back, in a quite isolated notice of the Mishna (*Chagiga* ii. 2), to the time when the Temple still existed. We are told there of a controversy about a religious law which went on for five generations, always between two teachers of the Law. The five pairs of teachers named (the last pair being Hillel and Shammai) are the same who, according to the Mishna (*Aboth* i. 1), were the bearers of the tradition, and who are once (*Peah* ii. 5) summarily designated, as such, זוגות 'the Pairs.' That these pairs were the most noted teachers of their time, the Pharisaic heads of the schools of the 2nd and 1st cent. B.C., is known to us also from other traditions about most of them. But the above notice, according to which the first of the pairs was always Nasi and the second 'Ab Bêth Dîn, must be regarded as a transferring of later relations to early times. If 'pair' had the meaning attributed to it by the author of the notice, it would be incomprehensible, apart from anything else, why the series of pairs came to an end with Hillel and Shammai. Nevertheless, the 'Pairs' belonged to the leading members of the Sanhedrin, as is witnessed in the case, for instance, of Simon b. Shetach, from other quarters. One of the pairs, Shemayah and Abtalion, is mentioned also by Josephus as belonging to the Sanhedrin (*Ant.* XV. i. 1, where they appear as Pollion and Sameas).

3. Yet another transference of later relations to

early times took place with respect to the title *Nasi.* This title, which from the second half of the 2nd cent. A.D. onwards had become hereditary, was also attributed to the forefathers of its hereditary bearers. It was said (Bab. *Shabbath* 15*a*) that Hillel, his son Simon, Simon's son Gamaliel, and Gamaliel's son Simon, held the position of Nasi during the last century of the second Temple (B.C. 30–A.D. 70); and the appointment of Hillel to be Nasi, *i.e.* president of the Sanhedrin, is described in a narrative emanating from the Tannaite period (Tos. *Pesachim* iv. end; Jerus. *Pesach.* 33*a*; Bab. *Pesach.* 66*a*). Both this narrative and the above chronological notice, apart from the title *Nasi*, have a historical foundation. For, although we hear nothing elsewhere of Hillel's son, we know that Hillel himself, as well as his grandson Gamaliel I. and his great-grandson Simon b. Gamaliel I., were amongst the leading men in Jerusalem. The last named was one of the directors of the war against the Romans, as we learn from Josephus (*BJ* IV. iii. 9; *Vita*, 38), who, moreover, mentions that he was descended from an illustrious family. Hillel and Gamaliel I. are known not only as notable scribes, but also as the founders of institutions and enactments, which prove that they must have played a leading rôle in the supreme court, the Sanhedrin. That Gamaliel I., at whose feet Saul of Tarsus, the future Apostle Paul, sat as a pupil (Ac 22^3), took the lead in the Sanhedrin, may be seen from the well-known narrative of Ac 5^{34-39}. Of course, all this does not prove that Hillel and his successors were presidents of the Sanhedrin. The statements of Josephus and the NT about the presidency of the high priest are too definite to be got over. But, on the other hand, we may not summarily reject the supposition that in a body, composed for the most part of scribes and called on to decide questions which demanded an expert acquaintance with the Law, the heads of the scribal body took the first place side by side with the high priests, who were only exceptionally scribes as well, and that perhaps the Pharisaic heads of schools were even formally invested with a certain rank in the Sanhedrin, approaching closely to that of president.

In this way, as a matter of fact, the title 'father of the house of justice' (*'Ab Bêth Dîn*) may, as has been held by many investigators, have been in use even at a time when the president proper of the Sanhedrin was still the high priest. On closer consideration one cannot escape the impression that neither at the time of the Hasmonæan high priests nor at that of the high priests appointed by Herod and by the Roman procurators, could the Sanhedrin have been without a guidance not identical with the presidency of the high priest. The school traditions regarding the position held by the Pharisaic school heads in the Sanhedrin possess thus a kernel of historical truth, even if they are adapted to later conditions and artificially constructed.

4. Another question is how the term *Nasi*, which is used for the head of the State, could come to be the title of the president of the Sanhedrin. Two hypotheses are possible. (*a*) The title may go back to the time when the high priest who as such presided over the Sanhedrin was also actually prince (נָשִׂיא) or head of the State, *i.e.* to the time of the Hasmonæan rulers. Or (*b*) the title 'prince' may have been given, after the destruction of Jerusalem, to the president of the Sanhedrin at Jamnia, Gamaliel II., in order, as it were, that at least in the naming of the head of the highest authority which had arisen from the ruins of the national independence, there might be preserved a symbol of that independence. The second hypothesis is the more likely, because the first would imply that the title *Nasi* continued unused during more than a whole century until it was revived in the way indicated in the second explanation, after the fall of Jerusalem.

5. The assumption of the title *Nasi* by Gamaliel II. and then by his son Simon was probably connected with the belief that the family of Hillel was descended from the Davidic royal house. There was thus coupled with the title in an esoteric kind of way a recollection of the former princes of the house of David. It was not till the time of Gamaliel II.'s grandson Jehudah I., who was called *Nasi* κατ' ἐξοχήν, that the title became the official designation of the head, recognized even by the Roman government, of the Jews in Palestine, *i.e.* of their patriarch. Its meaning as president of the Sanhedrin then fell into the second place.

vi. FUNCTIONS AND PROCEDURE.—1. The Great Sanhedrin at Jerusalem was primarily the supreme court of justice, which had either the sole right of judgment in certain specially important matters, or was appealed to on questions upon which the lower courts were unable to come to a decision. As to this last point, we learn from the oft-cited report of Jose b. Chalaftha (Tos. *Sanhed.* vii. 1 and parall.) the following: 'When the first competent tribunal failed to come to a finding, the litigant, accompanied by the most distinguished member of this court, betook himself to Jerusalem to submit his case in the first place to the two lesser *synedria* (see above). If neither of these could come to a decision, the question came for final judgment before the Great Sanhedrin.' There can be no doubt that a kernel of historical truth underlies this description of the train of judicial procedure (see also Mishna, *Sanhed.* xi. 2).—In regard to cases reserved for the sole competence of the Great Sanhedrin, the Mishna (*Sanhed.* i. 5) enumerates the following points upon which only the 'tribunal of the seventy-one' was entitled to judge and pronounce a verdict: (1) A process affecting a tribe; (2) the process against a false prophet; (3) a process affecting the high priest; (4) the sending out of the army to a non-compulsory war; (5) the extension of the city of Jerusalem; (6) the extension of the Temple courts; (7) the appointment of *synedria* over the tribes; (8) the judging of a city which had lapsed into idolatry (see Dt $13^{13\text{ff.}}$). With reference to the fourth point, it is enacted also amongst the decrees affecting the king, that the latter is to lead the army out to war only upon the authority of a decision of the Great Sanhedrin (Mishna, *Sanhed.* ii. 4). The eight points bear, indeed, a theoretical stamp, and even presuppose the continued existence of the tribes (the first of them has for background the narrative of Jg 20 f.); but, on the other hand, they witness that, even in halachic theory, the Great Sanhedrin figures not merely as a court of justice, but also as the body that was called on to give decisions in State matters and which exercised administrative authority, in the fashion exhibited to us by the statements and narratives, meagre as they are, contained in other sources. A Tannaite rule (Tos. *Sanhed.* iii. 4) prescribes that the installation of a king and of a high priest is to belong only to the tribunal of the seventy-one.

2. Cases affecting life and death came, according to the Mishna (*Sanhed.* i. 4), before the little Sanhedrin (of 23 members). As a matter of fact, in important instances the Great Sanhedrin was called together to pronounce judgment. According to a Tannaite tradition (Jerus. *Sanhed.* 18*a*, 24*b*), the right of judging in matters of life and death was taken from Israel (*i.e.* from the Jewish courts) forty years before the destruction of the Temple. 'Forty' here is a round number and unhistorical, but the circumstance related by this tradition and confirmed by the Gospel accounts of the trial of Jesus is historical, and is connected with the restrictions imposed on the competence of the Jewish courts, and of the Great Sanhedrin in particular, in the time of the Roman procurators.

3. The decisions of the Great Sanhedrin 'from which went forth direction for all Israel,' were of inviolable force, and binding upon all teachers of the Law and all judges. Any one of these who gave a judgment in opposition to its decrees was called a 'rebellious elder' (זקן ממרה), and was condemned by the Great Sanhedrin (*Sanhed.* xi. 2–4). The rules for dealing with occasional errors of the Sanhedrin in giving decisions or in interpreting the Law are casuistically exhibited in the first chapter of the Mishnic tract *Horayoth*.

4. The Great Sanhedrin of Jerusalem sat in the Hall of Hewn Stone (see above, iii.). According to the report of Jose b. Chalaftha, it held its sittings from the time of the offering of the daily morning sacrifice till that of the evening sacrifice (Tos. *Sanhed.* vii. 1, and parall.). On the Sabbath and on feast days no sittings were held, but the members of the Sanhedrin assembled in the school situated on the temple mount (*ib.*; in Bab. *Sanhed.* 88*b*, instead of the 'school' [בית המדרש שבהר בית] it is the place called *Chêl*, where at other times [see above, iii.] one of the two lesser *synedria* held its sittings). The members of the Sanhedrin sat in a semicircle, that they might see one another while deliberating (Mishna, *Sanhed.* iv. 2; Tos. *Sanhed.* viii. 1). 'Two clerks of court (סופרי הדיינין) stood before them, the one to the right and the other to the left, and took down the words of those who gave their voice for acquittal and of those who were for condemnation' (Mishna, *Sanhed.* iv. 2). According to Jehudah b. Ilai (*ib.*) there were three clerks: one took down the votes for acquittal, one those for condemnation, while the third took down both (in order to check the lists of the other two). In the report of Jose b. Chalaftha it is said that, when a question came before the great Sanhedrin, and the reply could not be given on the ground of a tradition, it was decided by the votes of the majority. As to the mode of deliberating and voting and the distinctions which were observed according to the nature of the subject under consideration, tradition contains a multitude of rules which, it may safely be inferred, are based upon the actual praxis of the Great Sanhedrin of Jerusalem. Some of these rules may be cited:—In questions of civil right and in those affecting the Ceremonial Law, the taking of the vote began with the principal member of the Sanhedrin; in judgments affecting life and death it began 'at the side,' *i.e.* with the younger members, in order that their vote might not be influenced by that of the leaders (Mishna, *Sanhed.* iv. 2; Tos. *Sanhed.* vii. 2). For a judgment affecting life and death an attendance of at least 23 members was required. If the result of the vote showed a majority of only one for 'guilty,' the court had to be increased by two successively till the number of 71 was reached. Only when the full number was present, was a majority of one (36 votes against 35) sufficient to procure a condemnation (Mishna, *Sanhed.* iv. 5).

vii. LATEST HISTORY OF THE SANHEDRIN.—The Great Sanhedrin of Jerusalem, as we have already said, revived, after the fall of Jerusalem, in the schools of Palestine. The activity of the college of scribes, in which the tradition of the Pharisaic schools was perpetuated and underwent vigorous development, attached itself to the work of the defunct supreme court of Jerusalem, and it strengthened its authority by adopting the name and the constitution of the Great Sanhedrin. Down to the 5th cent., *i.e.* down to the cessation of the office of patriarch or Nasi, which was hereditary in the house of Hillel, there existed in the Holy Land an institution which could be regarded as a continuation of the Great Sanhedrin. After Babylon became the one centre of Jewish learning in the time of the Gaons, the name 'Sanhedrin' was given to the most eminent members of the so-called *Kalla* assemblies, the 70 scholars who sat in the first seven rows and who at all events were chosen upon a fixed principle.

Even recent times have witnessed a revival of the name of the ancient Sanhedrin. In the year 1807, at the summons of Napoleon I. there met in Paris an assembly of representatives of Judaism, which at the invitation of the Emperor himself took the name 'Sanhedrin,' and constituted itself upon the traditional model of the Great Sanhedrin of Jerusalem. Apart from a few declarations as to the relation of the Jewish religion to State law and of Jews to non-Jews, this assembly has left no permanent traces.

LITERATURE.—In all accounts of Jewish history at the time of the second temple, as well as in the Histories of NT times, the Sanhedrin is treated of in more or less detail. The sources are the writings of Josephus and the NT on the one hand, and the Jewish tradition-literature on the other. Amongst the latter the name *Sanhedrin* is attached to the tracts of the Mishna and Tosefta dealing with justice and its administration, as well as to the corresponding tracts of the Jerus. and Bab. Talmuds. Of the Literature cited by Schürer (*GJV* 3 ii. 188 f.) the following works and treatises, dealing specially with the Sanhedrin, may be selected for mention: Selden, *de Synedriis et Præfecturis juridicis veterum Ebræorum*, Lond. 1650–55; Sachs, 'Ueber die Zeit der Entstehung des Synhedrins' (in Frankel's *Zeitschrift*, 1845, pp. 301–312); Levy, 'Die Præsidentur im Synedrium' (in Frankel's *Monatsschrift*, 1855); Langen, 'Das jüdische Synedrium und die römische Procuratur in Judäa' (in *Tübinger Theologische Quartalschrift*, 1862, pp. 411–463); Kuenen, 'Ueber die Zusammensetzung des Sanhedrin' (*Gesam. Abhandl. z. bibl. Wissensch.*, Budde's tr. pp. 49–81); D. Hoffmann, 'Der oberste Gerichtshof in der Stadt des Heiligthums' (*Programm des Rabbiner-Seminares zu Berlin* for 1877–78); Jelski, *Die innere Einrichtung des grossen Synedrions zu Jerusalem und ihre Fortsetzung im späteren palästinensischen Lehrhause bis zur Zeit des R. Jehuda ha-Nasi*, Breslau, 1894. Not mentioned by Schürer is a work in Hebrew by the well-known Jakob Reifmann, entitled סנהדרין (61 pages), published at Berditschew in 1888. W. BACHER.

SANSANNAH (סַנְסַנָּה; B Σεθεννάκ, A Σανσάννα; *Sensenna*).—A town in the Negeb (RV 'the South') allotted to Judah (Jos 15^{31}). It is not mentioned amongst the towns in the Negeb that belonged to Simeon. But, comparing the list in Jos 15^{31} with the parallel lists in Jos 19^{5} and 1 Ch 4^{31}, it will be seen that its place is taken in the one case by Hazar-susah, and in the other by Hazar-susim. There is no indication of its position, a question upon which authorities differ. Tristram identifies it with *Beit Susîn* on the road from Gaza to Egypt; Schwarz (*Heil. Land*, p. 72), with *Simsim* on a height N.E. of Gaza; and Guérin, with *Sûsieh*, E.N.E. of *es-Semû'a* (Eshtemoa). C. W. WILSON.

SAPH (סַף; B Σάφ, A Σεφέ), called in Chronicles Sippai (סִפַּי; B Σαφούτ, A Σεφφί).—One of four Philistine champions of whom it is related that they were born to the giant in Gath, and that they were slain by David's heroes (2 S 21^{18}, 1 Ch 20^{4}). There is no difficulty in supposing that he was a son of the Goliath whom David slew, but it is perhaps more natural to understand the term 'the giant' as a collective, making him merely of the same giant stock with Goliath. See GIANT. W. J. BEECHER.

SAPHAT.—**1.** (B Σαφάγ, A Σαφάτ, AV Sabat) 1 Es 5^{34}. His sons are named among the sons of Solomon's servants who returned with Zerubbabel. There is no corresponding name in the lists of Ezr and Neh. **2.** (B^{*} om., A Σαφάτ, $B^{ab\ mg}$ 'Ασάφ) 1 Es 5^{9}=Shephatiah, Ezr 2^{4}.

SAPHATIAS (B Σοφοτίας, A om.), 1 Es 8^{34}= Shephatiah (cf. Ezr 8^{8}); called Saphat in 5^{9}.

SAPHUTHI (B Σαφυεί, A Σαφυθί, AV Sapheth), 1 Es 5^{33}=Shephatiah, one of the sons of Solomon's servants, Ezr 2^{57}.

SAPPHIRA (Σαπφείρη).—The wife of Ananias. She fell dead, like her husband, at the rebuke of St. Peter, Ac $5^{1ff.}$ See ANANIAS, No. 7.

SAPPHIRE (Heb. סַפִּיר, LXX *σάπφειρος*, Vulg. *sapphirus*) is mentioned eleven times in the OT, once in the Apocr. (To 13^{16}), and once in the NT (Rev 21^{19}). It is one of the stones in the high priest's breastplate (Ex 28^{18} 39^{11}), and one of the foundations of the New Jerusalem (Rev 21^{19}), the latter thought arising, no doubt, from Is 54^{11}. It was of considerable value (Job 28^{16}, Ezk 28^{13}). From it was fashioned the throne of Ezekiel's visions (Ezk 1^{26} 10^{1}; cf. also Ex 24^{10}, where the pavement under the feet of the God of Israel is of 'sapphire'). The consistency with which the VSS adhere to a uniform transliteration of the name is remarkable; Ezk 28^{13} is no exception, for although סַפִּיר is here seventh in order, and *σάπφειρος* fifth, this is due to the Greek following the arrangement of Ex 28^{18}.

The etymology of the Heb. word throws no light on the nature of the stone. Probably סַפִּיר is Semitic, but neither of the roots ספר or שפר tells us anything as to colour or structure. It is, however, difficult to believe that a sapphire was one of the gems in the high priest's breastplate, for this stone is not easy to engrave, the diamond being the only stone that will scratch it. A similar objection might be brought against the *lapis lazuli* [Petrie's identification in STONES (PRECIOUS)], which was not deemed very suitable for engraving because of the hard points in it. But the objection has not quite so much force in this case; the lapis lazuli was sometimes engraved. And there are good reasons for thinking that this is the stone referred to in the Bible. Theophrastus (*Lap.* 23) evidently has in view the deep-blue mineral which is 'usually mottled with white, and contains gold-like specks of iron pyrites,' when he describes the *σάπφειρος, ὥσπερ χρυσόπαστος*. Pliny (*HN* 37, 119), writing of the *cyanos*, states: *inest ei aliquando et aureus pulvis qualis sappiris*; by the *sappirus* he clearly means the lapis lazuli. And if we identify it with the Heb. סַפִּיר, the requirements of all the biblical passages will be fairly met.

Two varieties of lapis lazuli, a natural and an artificial, were known to the ancients. The former came from Cyprus and Scythia, and was 'a silicate and sulphate of calcium, sodium, and aluminium.' The latter was made in Egypt: it was an alkaline silicate, coloured deep-blue with carbonate of copper; scarabs and signets were made of it, and it was used as a pigment.

If the sapphire of our Bibles does not correspond with the gem now known by this name, it yet remains probable that this gem is once mentioned. RVm suggests *sapphire* in place of *jacinth* (*ὑάκινθος*) in Rev 21^{20}. Middleton (*Engraved Gems*, p. 132) and King (*Antique Gems*, p. 46) are in favour of the identification. Pliny (*HN* 37, 125) seems at first sight to be against it, for he writes of the *fulgor violaceus* of the *hyacinthos*; but his view is not really adverse, for the less valuable sapphires are amethyst by artificial light. King (pp. 51, 399) quotes the lines of Marbodus as recognizing with astonishing clearness, considering his date, the fact that sapphires, rubies, and Oriental topazes are all of them varieties of the same mineral, namely, the hyacinth—

> 'Three various kinds the skilled as *Hyacinths* name,
> Varying in colour and unlike in fame:
> One, like pomegranate flowers, a fiery blaze:
> And one the yellow citron's hue displays.
> One charms with paley blue the gazer's eye
> Like the mild tint that decks the northern sky.'

The best sapphires are now obtained from Ceylon. The Greeks wore these stones as jewels. A few engraved ones have survived, mainly from the age of imperial Rome, but the gem was too hard to be much used for this purpose. Cf. art. JACINTH in vol. ii.

J. TAYLOR.

SARABIAS (Σαραβίας), 1 Es 9^{48} = Sherebiah, Neh 8^{7}.

SARAH, also (to Gn 17^{15}) **SARAI** ('Sarah' means 'princess,' 1 K 11^{3} *al.*; the meaning of 'Sarai' is doubtful: perhaps [Olsh. *Lehrb.* § 110; Nöldeke, *ZDMG*, 1886, p. 183, 1888, p. 484; König, *Lehrg.* ii. 1, 427] it is an older form of 'Sarah,' formed with the unusual fem. term. *-ay*).[*]—**1.** The wife of Abraham, first mentioned in Gn 11^{29} (J). Sarai's parentage is not given: according to 20^{12} (E), she was Abraham's half-sister, the daughter of his father, but not the daughter of his mother.[†] The incidents of her life have already been narrated at some length in connexion with ABRAHAM, HAGAR, ISAAC, and ISHMAEL; so that a *résumé* will be sufficient here. Sarai accompanied Abraham into Canaan (12^{5}), and went down with him into Egypt (12^{10-20}: J): it was on this occasion that, fearing lest her beauty might indirectly cost him his life, Abraham passed her off as his sister, and, being admired before the Pharaoh by his courtiers, she was sent for and taken into his palace. This was in accordance with the custom, described as still prevalent among Oriental princes, of arbitrarily selecting beautiful women to be added to their harems.[‡] Abraham's timidity and want of candour might have involved him in serious consequences; but the Pharaoh contented himself with rebuking him for his untruthfulness, and appointing an escort to conduct both him and Sarai out of the country (v.^{20}; cf. 18^{16} 31^{27}).

From 12^{4}, compared with 17^{17}, it appears that Sarai was at this time at least 65 years of age; and it has often been wondered why Abraham should have been in alarm on the ground stated, and why the Pharaoh should have been attracted by her beauty. The difficulty disappears when it is remembered that the statements about Sarai's age belong to a different document (P) from the one (J) which narrates the visit to Egypt: the author of the latter evidently pictured Sarai as still a young woman. (Cf. for similar cases elsewhere in Genesis, vol. ii. pp. 484 (No. 3), 503^{b}, 532^{b}).

Sarai is next mentioned in ch. 16 (J, except vv.$^{1a. 3. 15f.}$). Being barren (cf. 11^{30}), she induces Abraham to take her handmaid Hagar as a concubine; but when she finds that Hagar 'despises' her, she passionately and unjustly casts the blame upon her husband: 'The wrong done to me be upon thee; J″ judge between me and thee.' Abraham, however, declines to interfere; and bids Sarai herself deal with Hagar as she pleases. Her harsh treatment of her handmaid compels Hagar to take flight; and only the voice of J″'s angel induces her to return, and 'submit' herself to her mistress (see, more fully, HAGAR and ISHMAEL).

In the existing text of Genesis, the promise of a son for Sarai is first distinctly given in ch. 17 (P), vv.$^{15-21}$. Her name is changed to *Sarah* (v.^{15}); she is to be blessed, and a son is to be born to her;

---

[*] Found in certain words in the cognate languages. See Olsh. and König, *ll.cc.*; Nöld. *Syr. Gr.* § 83; Wright, *Arab. Gram.* i. § 295, *Comp. Gram.* 138; Dillm. *Aeth. Gram.* 127*c* (cf. § 120*b* β); Barth, *Nominalbildung*, 385. Sayce's doubts (*HCM* 179) are unfounded. The explanation (Jerome and older scholars) 'my princess' is philologically impossible. The LXX gives for *Sarai* Σαρα, and for *Sarah* Σαρρα.

[†] Cf. MARRIAGE, vol. iii. p. 267^{b}; W. R. Smith, *Kinship*, 162 f. The tradition (Jos. *Ant.* I. vi. 5, *al.*) that she was the same person as ISCAH has no probability: it can only be reconciled artificially with 20^{12}; and had the writer of 11^{29} identified Sarai with Iscah, he would certainly have worded the verse differently.

[‡] There is an incident quoted by Ebers in the 'Tale of the Two Brothers' which partly illustrates this; see Petrie's *Egyptian Tales*, 2nd ser., 1895, pp. 53–55.

'she shall become nations' (cf. v.^{4} 35^{11}); 'kings of peoples shall be from her' (cf. v.^{6} 35^{11}; and see 36^{31}). Abraham 'laughs' in incredulity at the idea of a son being born to him and Sarah in their old age; he fixes his hopes upon Ishmael, but is told that, though Ishmael will become a 'great nation,' the covenant will be established with Isaac (vv.$^{18-21}$). In ch. 18 (J) the promise of a son is again given to Abraham; and when Sarah, overhearing it, 'laughs' inwardly in incredulity, it is repeated to herself (vv.$^{9-15}$). This narrative is in reality not the sequel to the one in ch. 17, but *parallel* to it: 18^{9-15} is clearly written without reference to 17^{15-21}, and the writer is evidently not conscious that a promise of the same kind had already been given.

Ch. 20 (E) describes Sarah's adventure at the court of Abimelech, in Gerar, *i.e.* (Trumbull, Guthe, Dillm., Buhl, p. 89) the Wādy Jerûr, 70 miles S. of Gaza, and 55 miles S.W. of Beersheba. As before (12^{10-20}) in Egypt, Abraham, in fear on account of his own life (v.^{11}), passes Sarah off as his sister: Abimelech takes her, but is warned by God in a dream that she is a married woman; like the Pharaoh ($12^{18f.}$), though in stronger terms, he rebukes Abraham for his deceit (v.^{9}); Abraham excuses (v.^{11}) and defends (v.^{12}) himself; and Abimelech then makes reparation, both to Abraham (v.$^{14f.}$) and to Sarah (v.^{16}), for the injury he has unwittingly done them. The narrative is in substance remarkably similar to those in 12^{10-20} (Abraham and the Pharaoh) and 26^{6-11} (Isaac and Abimelech): it can hardly be doubted that all three are variations of the same fundamental theme,—a popular story told of the patriarchs, and attached sometimes to one and sometimes, at different localities, to another (cf. ABIMELECH, vol. i. p. 9^{a}; ISAAC, vol. ii. p. 484^{b}).

Isaac's birth is narrated in 21^{1-7} (vv.$^{1a. 2a}$ J; vv.$^{6. 7}$ E; vv.$^{1b. 2b-5}$ P). The exclamation in v.^{6} ('God hath prepared laughter for me; every one that heareth will laugh over me') is meant as a third explanation of the name 'Isaac' (cf. 17^{17} in P, 18^{12} in J; and see ISAAC, vol. ii. p. 485, No. 8); v.^{7} the aged mother gives expression to her joyous surprise at the birth of a son. Two or three years afterwards (21^{8}), upon occasion of the family-feast held to celebrate Isaac's weaning, Sarah's jealousy of her handmaid is again aroused; she peremptorily demands the expulsion of both Hagar and Ishmael; and Abraham reluctantly complies (21^{9-14}). Ch. 23 (P) relates the death of Sarah (cf. the allusion of J in 24^{67b}), at the age of 127 years, in Ḳiriath-arba' (Ḥebron), and the purchase by Abraham of a cave in the field of MACHPELAH, 'in front of' MAMRE, in which to bury her (cf. 25^{10} P, 49^{31} P). The only other reference in the OT to Sarah is Is 51^{2}, where she is alluded to as the mother of the chosen race.[*]

Sarah is a typical but not an ideal character. She is a devoted wife and mother; but, at the same time, like many another woman, imperious, hasty in her judgments, and jealous: wrapt up in her husband and her son, she resents the smallest disparagement, or assumption of superiority, on the part of either Hagar or Ishmael, and does not rest satisfied till she finds herself in her home without a rival.

In NT Sarah is mentioned Ro 4^{19} 9^{9} (Gn 18^{14}), He 11^{11} (her faith), 1 P 3^{6} (her conjugal 'obedience' to Abraham, calling him 'lord,' Gn 18^{12}); and the narrative of Sarah and Hagar, and of their respective children, is treated allegorically, as foreshadowing the freedom of Christians, the 'children of promise,' in Gal 4^{21}–5^{1} (cf. HAGAR, vol. ii. p. 278).

2. The daughter of Raguel and wife of Tobias, To $3^{7. 17}$ and oft. (LXX Σάρρα). See TOBIT (BOOK OF).

S. R. DRIVER.

SARAIAS.—**1.** (Σαραίας) 1 Es 5^{5}, Seraiah, the high priest of Zedekiah's time, father of Jehozadak, and grandfather of Jeshua (cf. 1 Ch 6^{14}). **2.** (*Sareus*) 2 Es 1^{1}, the father of Ezra. It is uncertain whether he is the same person as the AZARAIAS of 1 Es 8^{1}, where the following ZECHRIAS takes the place of Azaraias of 2 Es 1^{1}.

SARAMEL, RV Asaramel (A Σαραμέλ, ℵV Ἀσαραμέλ; *Asaramel*).—Saramel appears to be a word in the original Heb. or Syr. text of 1 Mac. which the translator did not understand when preparing the existing Gr. version. Nearly all commentators adopt the reading Asaramel. By some, including Luther, it is held to be a place-name, and to have been the spot at which the assembled Jews made Simon Maccabæus 'their leader and high priest' (1 Mac $14^{28. 35}$). By others various restorations of the Hebrew text have been proposed.—1. (*Wĕ*)*sar-'am-'ēl*, 'and prince of the people of God,' understanding this as a title of Simon. The original *wĕ*, 'and,' is supposed to have been corrupted into *bĕ*, 'in.' This view, first proposed by Wernsdorf (1747), is adopted by Scholz, Grimm, Schürer, Zöckler, Kautzsch, Kraetzschmar, and others. 2. (*Bĕ*)*sha'ar-'am-'ēl*, 'at the gate of the people of God,' or—3. (*Ba*)*ḥăẓar-'am-'ēl*, 'in the court of the people of God' (Ewald, *et al.*). 4. A. R. S. Kennedy (*Expos. Times*, Aug. 1900, p. 523 ff.) proposes either (*a*) *ba'ăzār* [*ath Yisra*] *'ēl*, 'in the court of Israel,' which was incorrectly deciphered *ba'ăzar-ham-'ēl*, the letters ה and י and כ and ש being very like each other in the older Phœn. characters; or (*b*) *ba'ăẓart-'am-'ēl*, 'in an assembly of the people of God.' He prefers the former.

C. W. WILSON.

SARAPH (שָׂרָף; B Σαιά, A Σαράφ).—A descendant of Shelah, 1 Ch 4^{22}.

SARCHEDONUS.—The form in which the name ESAR-HADDON (which see) appears in To $1^{21f.}$. The misspelling 'Sarchedonus' of the AV has been retained, surely inadvertently, by the RV. The correct form is 'Sacherdonus' (Bℵ Σαχερδονός, A Σαχερδάν, in v.^{22} Σαχερδονοσός).

SARDINE.—At Rev 4^{3} AV renders ὅμοιος λίθῳ σαρδίνῳ by 'like a sardine stone.' The reading is that of the TR. It is rightly rejected by modern editors, on the overwhelming authority of ℵAQ, etc., which read σαρδίῳ; RV has 'like a sardius': see, therefore, SARDIUS, below.

SARDIS (Σάρδεις).—The capital of Lydia, when a Lydian kingdom existed before B.C. 549, was one of the greatest and most ancient and famous cities of Asia Minor. It was situated on the northern skirts of Mount Tmolos, at the point where the small river Pactolos issues from a glen in the mountains to join the Hermus, which flows westwards about two or three miles north of Sardis. The acropolis of Sardis was situated on a spur of Tmolos, separated by a depression from the mountains on the south, and rising sharply from the level plain on the north, with the Pactolos washing its western base, and formed an almost impregnable fortress in ancient times. The city, which is naturally the capital of the middle Hermus valley, was still, in the first century after Christ, the metropolis of a group of cities (in the south of the middle Hermus valley and throughout the upper valley), which formed one of the *conventus* into which the province of Asia was divided.

Political circumstances had been as favourable to it as geographical. It was the residence of a satrap, after the Persians conquered Asia Minor, and the burning of the lower town in 501 by the revolted Ionians excited vehement anger in Darius, as an insult to his government and himself. It surrendered willingly to Alexander the Great in 334, and was made by him an autonomous, self-governing city of the Greek type, electing its own magistrates and striking, presumably, its own coins: the Sardian coins of earlier date were not municipal, but regal, and perhaps satrapal coins,* struck by despotic governors resident at Sardis. After the death of Alexander, in 322, it fell under the authority of Antigonus till 301, when after the battle of Ipsus it passed under the domination of Seleucus, and became the residence of the governor of the western part of the Seleucid empire (called, doubtless, satrap). In 190 the battle of Magnesia set Sardis free; and the Romans incorporated it in the Pergamenian realm (in which there was much greater municipal freedom than under Seleucid rule). The known coinage of the city begins under the Pergamenian kings, and continues under Roman rule in increasing quantities.

---

[*] In Gn 24^{67a} the very strange syntax of the existing Heb. text makes it probable that 'of his mother Sarah' is a gloss.

The special religion of Sardis was the worship of Cybele, the ruins of whose temple with two columns standing, partly are seen, partly lie buried in the glen of the Pactolos near the river-bank. Her nature and the character of her worship were very similar to those of DIANA at Ephesus.

The necropolis of Sardis, where its chiefs and kings in early times were buried, was a great group of tumuli, some small, some of very large size, about three miles north of the Hermus, on the south side of the Gygæan Lake (Mermere Giol). There, near the shrine of Gygæan Artemis, beside the Lake, the people of the goddess returned at death to their divine mother.

In A.D. 17 Sardis was destroyed by a great earthquake, and Tiberius remitted all its taxes for five years, and contributed ten million sesterces towards rebuilding the city. Eleven other cities, which had been its partners in ruin, and had shared in the emperor's benefaction, and also two later sufferers, joined with it in erecting at Rome a monument in his honour; and a miniature copy of that monument, constructed in A.D. 30 at Puteoli (the harbour for the Eastern and Asian trade at that time), is still preserved.†

While the three cities, Pergamus, Smyrna, and Ephesus, vied for the title of First City of Asia, Sardis, though still a place of importance, was, beyond any other of the prominent cities of Asia, a town of the past, retaining the name of greatness, but decayed from its former estate. The words addressed to it in Rev 3^{1} are singularly appropriate to its history: 'I know thy works, that thou hast a name that thou livest, and thou art dead.' The words are, of course, addressed to the Church of Sardis, and must be understood as describing its condition about A.D. 90–100, already decaying from its original high promise; but it seems clear that the writer must have been conscious of the historical parallel, and chose his words so as to express it. When he goes on to say, 'Be thou watchful . . . for I have found no works of thine fulfilled: . . . if therefore thou shalt not watch I will come as a thief, and thou shalt not know what hour I will come upon thee,' one's thoughts are carried back to the two occasions when, through careless watching, the impregnable citadel failed to keep up its reputation and name and to fulfil its works, when the Median soldier in 549 and the Cretan Lagoras in 218* climbed the steep hill and stole unobserved into the acropolis. The very hill itself is in ceaseless decay, washed away to an extraordinary extent by the rains and frosts disintegrating the soil and rock.

These historical parallels were not drawn by the writer of the Apocalypse from literature: the story of the Median and the Cretan was doubtless a household word in Sardis, and the character of the city as failing to keep up its ancient greatness and promise would assuredly be very plain. We may fairly infer that the writer was personally familiar with the place; and speaks from what he had learned by eye and ear in Sardis.

When about A.D. 295 the great province Asia was broken up into several smaller provinces, Sardis once more became the capital of Lydia; and in all the Byzantine lists the bishop of Sardis is mentioned as metropolitan and archbishop of Lydia, and as sixth in order of dignity of all the bishops, European and Asiatic, subject to the patriarch of Constantinople. The acropolis on its lofty hill was of a type suited for the frontier warfare of Arab and Turkish raids, and the fortifications remaining on it are all of a late period. It is uncertain when it passed into the hands of the Turks. Lydia was exposed to frequent raids at the end of the 11th cent., and again after the defeat of Manuel Comnenus in 1176. In 1257 the Emperor Theodore II. encamped at Sardis, but after 1267 the raids of the Turks became bolder and more continuous in the Hermus valley (Pach. ii. p. 313 f.), and they swept the country down to Menemen near the sea. Magnesia and Philadelphia were then the two chief cities of the valley (as they still are), and Sardis was quite a secondary town. In 1306 the Turks were admitted to the Sardian acropolis, but shortly after were expelled (Pach. ii. 403 f.); but this success was only temporary, and there can hardly be any doubt that Sardis had fallen into their hands before 1316, when they took Nymphaion.

In 1402 Sardis was captured and destroyed by Tamerlane, and it has never recovered from that crushing blow. It is now only a ruin, with a tiny village called Sart, while the town is Salikli, about five miles east. Sart is a station on the railway from Smyrna to Philadelphia and Kara Hissar. Three miles south are great hot springs.

The bishopric of Sardis is mentioned in even the latest *Notitiæ*, but probably it ceased to have any real existence soon after 1300. The fourth *Notitia Episcopatuum* in Parthey's collection, p. 132, puts the situation plainly. It mentions Sardis in its ancient place as sixth in dignity, but adds that the bishop of Philadelphia has now been substituted in the place of the Sardian exarchos.† The substitution was later than 1284, when Andronicus Chalaza, bishop of Sardis, evidently an influential dignitary, was expelled from the Council of Adramyttium (Pach. ii. p. 65 f.), and may be dated about 1316. With that change Sardis ceased. History had decided against it, and it was dead.

W. M. RAMSAY.

SARDITES.—See SERED.

SARDIUS.—AV uses this word thrice in the OT (Ex 28^{17} 39^{10}, Ezk 28^{13}) and once in the NT (Rev 21^{10}). In the OT passages RVm has 'or *ruby*.' The Heb. in each case is אֹדֶם: see, therefore, RUBY, above.

At Rev 21^{20} the *σάρδιος* of TR or *σάρδιον* of the better MSS is the sixth foundation of the New Jerusalem. Epiphanius (quoted by Alford, *Gr. Test.* iv. 595) derives its name from its resemblance in colour to a salted fish called *sardion.* Theophrastus, with whom King (*Antique Gems*, p. 7) agrees, traces it to the fact that the gem was first imported into Greece from Sardis. Middleton (*Engraved Gems*, p. 143) thinks it comes from a Pers. word meaning 'yellow.' He does not give the word in question, but the *Encyc. Brit.*[9] (art. 'Sardonyx') connects *sard* with the Pers. *sered*, 'yellowish-red.' There does not appear to be any such word: the nearest approach to it is زرد *zerd*= 'yellow.'

---

* No coins, however, are known struck at Sardis either by the satraps under Persian rule or by the city as set free by Alexander. Probably Antigonus deprived it of freedom and the right of coinage, and under Seleucid rule it continued in that oppressed condition.

† See *CIL* x. 1624; Rushforth, *Latin Historical Inscr.*, No. 95.

* In 218 Antiochus the Great, after a year's siege, captured Sardis, where his usurping rival Achæus maintained himself.

† This should have been quoted in vol. iii. p. 831 to complete the account of the bishopric of Philadelphia; the relation of *Notitiæ* iv. and xi. is uncertain, but iv. is later.

The sard is one of the crypto-crystalline gems of the silicon family, identical in chemical composition with the carnelian, but more crystalline, more transparent, and less ruddy. Its colour varies from pale golden-yellow to reddish-orange. Pliny (*HN* 37, 106) justly remarks: *Nec fuit alia gemma apud antiquos usu frequentior.* This was owing to the beauty of the stone, which in the best specimens is brilliantly transparent and very fine in colour, to its toughness, its facility of working, and the high polish of which it is susceptible. It also retains its polish longer than other gems. The finest engravings of ancient times were on sards. Pliny states that the best examples came from Babylon, but that source of supply had failed in his day. Others were obtained from Paros, Assos, India, and Egypt. Theophrastus (*Lap.* 56) speaks of two principal kinds—the *male*, brownish in colour, and the *female*, transparent red: τὸ μὲν διαφανὲς, ἐρυθρότερον δὲ, καλεῖται θῆλυ· τὸ δὲ διαφανὲς μέν, μελάντερον δὲ, καλεῖται ἄρσεν. Considering how largely this gem was used, not only amongst Greeks and Romans but also for Assyrian cylinders and Phœn. scarabs, it is curious that there should be only one verse in the Bible where it is unquestionably mentioned, and that not as an engraved stone. J. TAYLOR.

SARDONYX.—The name indicates the structure of the gem, a layer of sard and one of onyx. Pliny (*HN* 37, 86) says: *Sardonyches olim . . . intelligebantur candore in sarda, hoc est veluti carne ungui hominis imposita et utroque tralucido.* The finest then came from Arabia and India. In the latter country it was found in torrent-beds, some pieces being large enough for sword handles. It is better adapted for cameos than for signets, but was much used by the Romans for both purposes, and it possesses one quality valuable for a seal: wax does not adhere to it. Juvenal twice refers to sardonyx seals—

> 'Arguit ipsorum quos littera gemmaque princeps
> Sardonychum, loculis quæ custoditur eburnis' (*Sat.* xiii. 138),

and

> 'Ideo conducta Paullus agebat
> Sardonyche . . .' (*ib.* vii. 144).

This gem has always been easy to produce artificially, either by joining together layers of different stones or by placing a sard on a red-hot iron, when the surface exposed to the heat becomes of an opaque white colour.

The sardonyx (σαρδόνυξ) is the fifth foundation-stone of the New Jerusalem (Rev 21[20]). RVm gives *sardonyx* as an alternative for *diamond* in translating יַהֲלוֹם at Ex 28[18] 39[11], but at Ezk 28[13] RV contents itself with the *diamond* of the text. There is no sufficient reason for supposing that יַהֲלוֹם means sardonyx. The *Oxf. Heb. Lex.* is inclined to derive יַהֲלוֹם from הלם, and to explain the name as pointing to the hardness of the stone. This would not favour the identification with the sardonyx.

J. TAYLOR.

SAREA.—One of the swift scribes who wrote to the dictation of Ezra (2 Es 14[24]).

SAREPTA.—See ZAREPHATH.

SARGON (סַרְגוֹן, 'Αρνά).—Once mentioned in the Bible (Is 20[1]), when it is said that he sent his TARTAN (*turtannu*) or commander-in-chief against Ashdod (B.C. 711). The name had been borne by a famous king of early Babylonia, who founded an empire which extended to the Mediterranean (B.C. 3800); and as Sargon's two predecessors, Tiglath-pileser III. and Shalmaneser IV., had assumed new names after seizing the Assyr. throne, it seems probable that Sargon also was an assumed name. It is written in cuneiform Sar-gina, as if a compound of the Semitic *sar*, 'king,' and the Sumerian *gina*, 'established,' and is accordingly rendered by the Semitic *Sarru-kinu*, 'the established' or 'legitimate monarch'; but the inscriptions of the elder Sargon show that the name is really a corruption of *Sarganu*, 'the strong one' (cf. the biblical Serug).

When Shalmaneser IV. died or was murdered, during the siege of Samaria (B.C. 722), the crown was usurped (on the 12th of the month Tebet) by the Assyr. general Sargon, who claimed descent from a semi-mythical king of Assyria called Bel-bani. Samaria was captured soon afterwards, and Sargon transported 27,200 of its population into captivity, the city being placed under an Assyr. satrap. Meanwhile Babylon had been seized by the Kaldâ chief, Merodach-baladan, who maintained himself in Chaldæa for 12 years, notwithstanding the defeat of his Elamite allies. In B.C. 720 a certain Ilu-bihdi, also called Yahubihdi, arose at Hamath, and led Arpad, Damascus, and Palestine into revolt. This was easily suppressed, however; Hamath was colonized by 4300 Assyrians, and the Philistines and Egyptians were defeated at Raphia on the borders of Egypt. In B.C. 719 the Minni, east of Ararat, were attacked and defeated, and two years later Sargon gained a great victory over the combined forces of the Hittites of Carchemish and of Mita of the Moschi (Meshech). Carchemish became an Assyrian city, its trade passed into Assyrian hands, and Sargon carried from it to the treasury of Calah 11 talents and 30 manehs of gold and 2100 talents of silver.

In B.C. 716 Sargon was called on to meet a confederacy of the northern nations—Rusas of Ararat or Van, Mita of the Moschi, and many other tribes, the Minni, Tubal, Milid (Malatiyeh), etc. In the course of the campaign he marched into the land of the Medes towards the Caspian Sea, and received tribute from eight of their chiefs. The following year the country of the Minni was overrun, the Minnæan chief Daiukku (Dêiokes) being transported to Hamath, and the Bedâwin of N. Arabia were chastised. In 714 the Minni submitted, and the army of Rusas of Ararat was annihilated. Rusas himself committed suicide. In 713 forty-five Median chiefs, including Arbaku (Arbaces), were made tributary, as well as the kingdom of Ellipi in which the city of Ecbatana was afterwards built. Tubal and Cilicia also submitted, and in 712 Milid was captured and destroyed. In 711 a vassal prince was established at Marqasi (Mer'ash), the capital of Gurgum in N. Syria, and the *turtannu* was sent against Palestine, where a rebellion had broken out. A league had been formed between Merodach-baladan and the princes of the West, including Hezekiah of Judah, but, before the confederates could move, Ashdod, the centre of the revolt, was taken by storm, and Judah, Moab, and Edom paid homage to the conqueror. The turn of Merodach-baladan came in 710–709, when he was driven first from Babylonia and then from his ancestral city, Bit-Yakin in the marshes, and Sargon was crowned at Babylon. After this he sent a statue of himself to the vassal princes of Cyprus, which was set up at Idalion, and is now in the Berlin Museum. Kummukh, or Comagênê, was annexed to Assyria in 708, and a war was commenced with the Elamites in 707. Sargon had already built his palace of Dur-Sargina (now Khorsabad, but called Sarghûn by the Arabic geographers), about 10 miles N. of Nineveh. He was murdered B.C. 705. A. H. SAYCE.

SARID (שָׂרִיד; B Ἐσεδεκγωλά, Σεδδούκ; A Σαρθίδ, Σαρίδ; *Sarid*).—A border town of Zebulun, situated to the west of Chisloth-tabor (*Iksâl*, Jos $19^{10.12}$). Eusebius and Jerome (*Onom. s.* Σαρίθ, *Sarith*) do not identify it. Conder, following the reading Σεδδούκ, and that of the ancient Syriac version, 'Asdod,' reads 'Sadid,' and identifies it with *Tell Shadûd*, an artificial mound with fine springs, on the north side of the great plain of Esdraelon, and about 5 miles to the westward of *Iksâl* (*PEF Mem.* ii. 43, 70). C. W. WILSON.

SAROTHIE (B Σαρωθεί, A Σαρωθιέ), 1 Es 5^{34}.—His sons are named among the sons of Solomon's servants who returned with Zerubbabel. There is no corresponding name in the lists of Ezra and Nehemiah.

SARSECHIM (שַׂרְסְכִים; BAℵ Ναβουσαχάρ, Q Ναβουσαράχ, Q^{mg} Σαρσαχείμ; Vulg. *Sarsachim*).—One of the princes of the king of Babylon who was present at the taking of Jerusalem by Nebuchadnezzar in the 11th year of Zedekiah, Jer 39 [Gr. $46]^{3}$. He seems to have borne the title of RAB-SARIS, 'chief of the heads *or* princes.' There is much doubt as to the original form of the name, and its meaning is, therefore, likewise obscure. Schrader (*COT* ii. p. 110) merely remarks that the first part of the name is quite clear (שַׂר='king'), and queries the reading. In all probability, testimony to its incorrectness is to be found in the fact that the vocalization is practically the same as that of the Hebrew form of Sennacherib (Sanhērîb, Sarsechîm; cf. Nimrod, Nisroch, etc.). If the first element, *sar*, be regarded as certain, the original form may have been *Sar-iskun*, 'he (the god) has made a king,' that is, provided a successor to the throne. In this case the original form of the name would have been שַׂרְסְכֻן,* which would go back to a time when no vowels whatever were written.† In the present state of our knowledge, however, all identifications of this name must be regarded as tentative and unsatisfactory, presenting, as they do, several difficulties, and being unsupported by the monuments. The Greek forms beginning with Ναβου are probably due to the name *Samgar-nebo*, which precedes. If, however, they have any authority—and sometimes the Greek forms are the more correct (cf. NISROCH)—that of Q Ναβουσαράχ would be the best for comparison, as it resembles very closely the *Nabû-šar-âḫê-šu*, 'Nebo is his brothers' king,' of the inscriptions (Strassmaier, *Inschriften von Nabuchodonosor*, 172, 23;‡ 216, 12,§ and elsewhere). See also artt. NERGAL-SHAREZER and SAMGAR-NEBO. T. G. PINCHES.

SATAN (Heb. שָׂטָן, Arab. شَيطَان, Syr. ܣܛܢܐ Greek σατανᾶς [but in 2 Co 12^{7} Σατάν, ℵ*** A** D** EKLP etc.—yet the evidence is doubtful, and the reading Σατανᾶ (genit.) is preferred by Lachm. Tisch.^{8} and WH on the authority of ℵ* A* BD* FG Copt. It. Vulg. Orig. Iren. Tert. On the other hand, the reading Σατάν was preferred by Meyer, though there is no analogy to it in the NT, and in the LXX only in 1 K 11^{14} 23^{25}, and Aq. on Job 1^{6}]. More frequently (especially in the Gospels) the Heb. proper name is simply rendered by ὁ διάβολος, 'the accuser' or 'calumniator.' In Rev 12^{10} ὁ κατήγωρ is the equivalent used).—The name and conception of Satan belong to the post-exilian age of Hebrew development. Probably Zec 3^{1} is the earliest instance of its appearance in our Canonical literature. On the other hand, the roots of the conception can without difficulty be traced in the writing of pre-exilian and exilian times.

i. PRE-EXILIAN PERIOD.—(1) The serpent, who tempts eve and lures man to his doom, is a demon in animal shape, analogous to the Arabic *jinn* which frequently resided in serpents. See art. DEMON and also MAGIC (vol. iii. p. 208, footnote ‡).

(2) The Babylonian *Tiâmat*, the dragon-monster of the great abyss, with whom Marduk, god of light, contended (see art. COSMOGONY), corresponds to the Hebrew Leviathan or Rahab in exilian and post-exilian literature (cf. also Am 9^{3}), with whom Jehovah entered into conflict and whom He destroyed. See artt. RAHAB and SEA MONSTER.

(3) The individual subject might be possessed by an 'evil spirit' (1 S 16^{14}, cf. Jg 9^{23}), which drives him to commit acts of violence in opposition to the Divine will. In 1 S 16^{14} this 'evil spirit' is placed in opposition to the Spirit of the LORD which departed from Saul upon its advent. This evil spirit, which 'distressed' (בִּעֲתַּ) the king, is also spoken of as 'from Jehovah.' Wellhausen draws attention to the curious distinction that, whereas רוּחַ י״ is the good spirit, רוּחַ מֵאֵת י״ (or רוּחַ * אֱלֹהִים) is a bad spirit. The former expression connotes a closer community of mind and purpose between the Deity and His emissary. For the present, however, it is sufficient to take note that evil, whether it be misfortune or sin, is referred to a Divine causality in accordance with the intense feeling of dependence on God which characterized the ancient Hebrew, 1 S 1^{5} 18^{10} 19^{9} 26^{19}, 2 S 24^{1}, 1 K 22^{21}, Jg 9^{23}, Is 6^{10} 63^{17}, Ps 51^{6} (Max Löhr). In the interesting parallel Jg 9^{23} the evil spirit shows itself as a spirit of discord between Abimelech and the Shechemites, just as it exhibited itself in Saul's outbreaks of violent jealousy against David. It is thus somewhat analogous in character to the Homeric Ἄτη, daughter of Zeus. Cf. art. MAGIC in vol. iii. p. 208^{a}.

(4) In Micaiah's vision the emissary who goes forth to execute Jehovah's behest is a lying spirit (רוּחַ שֶׁקֶר) in the mouth of the prophets who lures Ahab to his doom (1 K $22^{22ff.}$). It would lead us beyond the limits of our subject if we were to discuss the OT conceptions of Jehovah's character involved in this naïve portrayal of the relation subsisting between God and the lying spirit. On this passage Kittel's remarks may be studied with advantage in his commentary, This narrative in 1 K 22^{1-37} forms an almost continuous section following on ch. 20, and there are no sufficient grounds for separating vv.$^{19-23}$ or other portions from the narrative as later additions (as Schwally proposes in *ZATW*, 1892, p. 159 ff.; cf. Marti in *SK*, 1892, p. 230).

(5) Of subsidiary significance is the difficult

---

* שַׂרְסְכוּן would also be likely.

† As the Greek form *Saracos* shows, the name of *Sin-šarra-iškun* ('Sin has made a king'), the last king of Assyria, could be pronounced without the name of the deity, and would then be the same as the Sar-iskun here suggested, at the same time furnishing an objection, for any one bearing such a name would probably have been regarded as claiming the throne.

‡ *Nabû-šar-âḫê-šu*, son of *Dikia*, and father of *Nabû-mušêtiḳ-urri*, fifth witness to a contract dated in the 27th year of Nebuchadnezzar.

§ *Nabû-šar-âḫê-šu*, son of *Kinunnâa*, son of *Iddina-Papsukal*, third witness to a contract dated in the 30th year of Nebuchadnezzar.

* אֱלֹהִים is not so distinctive a name for the God of the Hebrews, since it *may* even designate heathen deities.

section Gn 6^{1-4}, in which supernatural causes are assigned to growing human corruption in the fleshly union of angels and women and the rise of a race of *nephîlîm*. Holzinger (*Commentary on Gen.* p. 67) suggests that it contains a fragment of an old cosmogony with a conflict of higher and lower deities, parallel to the Babylonian. Note the influence of the tradition on the Book of Enoch.

We have sufficiently indicated the roots of the conception of Satan which are to be found in pre-exilian and to a certain extent in exilian literature. The word שָׂטָן occurs in pre-exilian literature in the sense of 'opponent' or 'adversary.' It is thus applied to David by the Philistines (1 S 29^{4}), and to Hadad the Edomite whom God raised up as Solomon's adversary (1 K 11^{14}, cf. a like use in Mt 16^{23}). Thus an angel may fulfil this function with good intent (Nu $22^{22\text{ff.}}$).

ii. Post-Exilian (Old Testament) Period.—When we come to post-exilian literature we find the existence of a Satan who is a supernatural adversary of man in an essential sense, whose set purpose it is to work vital injury either to the individual or to the race. The growth of this conception was probably due to the unconscious operation of two tendencies. (1) As the conception of God became freed from the limitations of primitive nationalism and also more ethically exalted, and His sovereignty over the world regarded as universal and transcendent, there gradually arose an inevitable tendency to interpolate mediating angelic agencies between this transcendent Divine sovereign and the world of which He was Lord. (2) By an unconscious logical process an attempt was made to solve the ethical problem of the presence of evil in the world on the one hand and of Divine righteousness and absolute sovereignty on the other. To post-exilian Judaism, as the Books of Psalms and Job clearly testify, it was of supreme moment to vindicate the ways of God to Israel in the presence of dire calamity and persecution. Though the problem of the ultimate origin of evil is not even discussed, evil is ascribed to Satan the opponent of man and, to a certain extent, of God's beneficent purpose. He is a spirit who takes delight in man's misfortune, and is even permitted by God to work his fell designs though they be contrary to the Divine intention. Thus in Zec 3^{2} Jehovah is angered against Satan because the latter is not yet satisfied with all the misfortunes that have befallen Jerusalem, but demands further punishment. In the *Book of Job* the righteous sufferer is made the victim of Satan's malicious purpose. We even find ourselves involved in an apparent contradiction: Satan takes his place in the heavenly court among the other sons of God, and gives an account of his acts, and receives his commands from his Divine Lord. But a contrary spirit is manifest in the Divine Sovereign and in His malignant angel. The former desires to see Job's righteous character vindicated; the latter denies its genuineness, and desires to see it subjected to a strain that will wreck it. Here the characteristic traits of Satan's character are clearly visible, implied in his name and illustrated continually in subsequent literature: (*a*) He is the accuser (διάβολος) and also (*b*) the tempter (ὁ πειράζων) that seeks to entrap piety and work its ruin. It is in this latter rôle that he meets us in 1 Ch 21^{1}, where he tempts David, whereas in the pre-exilian form of the story (2 S 24^{1}) it is God Himself who submits David to the test. We have here an interesting indication that in the time when the Books of Chronicles were written (4th cent. B.C.) the personality of Satan had become distinctly realized. Whereas in the earlier post-exilian writings, Zechariah and Job, the def. article is attached, the form 'Satan' in 1 Ch 21^{1} is anarthrous (Smend).

iii. Later Judaism.—The evolution of the Jewish conception of Satan is marked by an ever-growing tendency to a dualism, which, however, always stops short of being absolute through the all-controlling limitations imposed by Hebrew monotheism. The tendency undoubtedly existed, and was probably fostered by Persian influence; for in Persian religion the dualism of good and evil is more accentuated than in any other ancient system. The extent to which Persian ideas moulded the *Book of Tobit* has been recently made the subject of an interesting study by J. H. Moulton (*Expos. Times*, March 1900). This writer confirms the doubts expressed by the author of the present article (see Apollyon) that the Asmodæus of Tobit (or the Ashmedai of the Talmud) is identical with the Aêshma Daeva of the Bundahesh. This identity is confidently asserted by Holtzmann (*Neutest. Theol.* i. p. 53), but it cannot be accepted without stronger evidence.* His main contention, however, that Persian influence largely affected Jewish satanology, we hold to be well founded. Twelve years ago Cheyne contended for a like influence in the realm of Jewish eschatology (*Expos. Times*, ii. 202, 224, 248; *Bampton Lect.* p. 394 ff.). Cf. Kohut, *Jüd. Angel.* p. 62 f.

The demonology of the *Book of Enoch* is developed with remarkable fulness, and presents striking analogies to that of the NT. Charles, in his art. Apocalyptic Literature in the present work (cf. his edition of the Book of Enoch), would place the dates of the different sections between 180 and 64 B.C.† The demons proceeded, according to 16^{1}, from the giants, who were the offspring of the fallen angels who lusted after the daughters of men. These demons accomplish man's moral ruin until the day of final judgment arrives. Satan, as in the NT, is represented as the ruler of a rival kingdom of evil, which is nevertheless subject to the 'Lord of spirits' (65^{6}). We read, moreover, not only of Satan, but also of Satan*s*; and it should be noted that in the *Similitudes* the Satans and the fallen angels are carefully distinguished. The latter fall in the days of Jared according to chs. 1–36 and 91–104, while in ch. 69, where a catalogue of names is given (cf. 6^{7}), the functions of the two classes are confused (Charles). Jekûn is the first chief 'who led astray all the children of the angels and brought them down to earth.' The names of other tempters follow. The name of the Satan who led Eve astray is Gâdreel (69^{6}). He is third in the hierarchy described in § 3 ff. The Satans are first mentioned in Enoch 40^{7}, where we read that Fanuel, one of the four chief angels, wards off the Satans and forbids them to appear (as Satan in the Book of Job) in the presence of the Lord of spirits to accuse the dwellers on earth. These Satans belong to a counter-kingdom of evil ruled by a chief called Satan (53^{3}). They existed as evil powers before the 'Watchers'‡ fell by corrupting themselves with the daughters of men. The four chief angels, 'Michael, Gabriel, Rafael, and Fanuel will take hold of them on that great day [*i.e.* Judgment Day] and cast them into a burning furnace, that the Lord of spirits may take vengeance on them for their unrighteousness in becoming subject to Satan and leading astray those who dwell on the earth' (54^{6}). These Satans, according to 40^{7}, have the means of access to heaven, which the 'watchers' or other fallen angels did not possess (13^{5} 14^{5}). They have a threefold function: they tempt to evil ($69^{4.\,6}$), they accuse the inhabitants of earth (40^{7}), and they punish the condemned. In this last character they are called 'angels of punishment' (53^{3} 56^{1} 62^{11} 63^{1}) (Charles).

---

* This is also the view of Baudissin in *PRE*^{3} *sub voce* 'Asmodi.'

† Baldensperger (*Selbstbewusstsein Jesu*^{2}, pp. 12–19) would place the dates considerably later. So also Schürer; cf. his *GVI*^{3} iii. pp. 195, 199–201.

‡ Cf. the ἐγρήγοροι of Dn 4^{10}; cf. also *Book of Jubilees* and *Testaments of the XII Patriarchs.*

This multiform activity in the kingdom of evil, expressed in multiplied personalities, is a marked feature of the Book of Enoch; and, viewed from this aspect, there is a close resemblance between the demonology of the Book of Enoch and that of the later Judaism expressed in the treatises of the Talmud, to which attention will presently be called.

In the *Apocrypha*, apart from the Book of Tobit, the references to Satan, though significant, are not numerous. As in the Book of Enoch, we are in the presence of a kingdom of demons. Satan, according to the *Book of Sirach*, so takes possession of the ungodly man's soul that when he curses Satan he may be said to curse himself (Sir 21^{27}). In the *Book of Wisdom* (2^{24}) we see that Satan and the Serpent of Gn 3 are more or less identified. Death entered into the world through the envy of the devil. This identification of the Serpent and Satan is the ever-recurring feature of Judaism and Christianity alike. In the *Book of Baruch* (4$^{7.\,35}$) the deities of the heathen are called demons (cf. Dt 32^{17}, Ps 106^{37}), and Israel suffers punishment for sacrificing to them (cf. Rv 9^{20}); but of Satan there is no express mention. In the *Book of Tobit*, Asmodi (Asmodæus) may be regarded as the equivalent of Satan in being the chief personification of evil. This demon is conjured by the magical prescription described in ch. 6, viz. burning the heart and liver of a fish with the ashes of incense. In its demonology this book stands apart from the other books of the Apocrypha, but in its ascription of lustful qualities to Asmodæus we find a close parallel to later Jewish conceptions. In the *Psalms of Solomon* we have only a slight reference to the supernatural agency of evil. Ryle and James have noted the simplicity of the religious ideas of this book. There is only one clear allusion to angelology (17^{49}). In 4^{9} the prosperous man is compared to 'a serpent speaking with the words of transgressors words of deceit to pervert wisdom.' Here Gn 3 is evidently in the mind of the Psalmist. In *Philo Judæus* demons and Satan fall into the background and disappear. His attitude is exhibited in his Treatise on Giants, c. 4, where his rationalizing tendency is manifest. Note his treatment of Ps 77^{49} LXX. The sources of evil are found in the flesh and its passions, in self-love and ignorance, rather than in supernatural personalities (see Drummond, vol. ii. pp. 297–305).

Some reference may here be made to the interesting *Book of the Secrets of Enoch* recently brought to light in its Slavonic form by Mr. Morfill. It has been supposed that it was originally composed about the beginning of the Christian era. Here again we note the identification of Satan with the Serpent in Gn 3. We read in 31$^{3\text{ff.}}$ 'The devil took thought as if wishing to make another world because things were subservient to Adam on earth . . . He became Satan after he left the heavens. His name was formerly Satanail. He conceived designs against Adam in such a manner that he entered and deceived Eve. But he did not touch Adam.' 29$^{4\text{ff.}}$ graphically portrays how Satanail was hurled from the heights with his angels on the third day of creation: 'One of those in the ranks of the archangels having turned away with the rank below him, entertained an impossible idea that he should make his throne higher than the clouds over the earth, and should be equal in rank to My power. And I hurled him from the heights with his angels. And he was flying in the air continually above the abyss.' Here we have one of the ultimate sources of Milton's conception of Satan's revolt.

The *Jewish ideas* reflected in the *Targums* and *Midrash* present a close resemblance to those just described. The identification of the Serpent with Satan was expressed in Jewish theological writers by the name bestowed on the latter, נָחָשׁ הַקַּדְמוֹן. Thus in *Sifrê* 138*b* the heathen are called the disciples of נָחָשׁ הַקַּדְמֹנִי who seduced Adam and Eve. In *Bereshith* 29 we find the tradition that *Sammael*, the highest angel that stands before God's throne, caused the Serpent to seduce the woman. Thus Satan and Sammael coalesce into one personality. Sammael, according to *Deut. Rabba* 11, is the angel, the wicked one, chief of all Satans. Here again we observe the same divided personalities as in the Book of Enoch, and Satan appears to be a personified generalization. There is an arch-Satan called Sammael, and there are Satans who are subordinate to him, just as the angels who are subject to God as His attendant ministers. According to *Targ. Jerus.* I. on Gn 3^{6} Eve saw, at the moment when the Serpent addressed her, Sammael, 'angel of death,' and became afraid. Envy is made the motive to man's temptation. According to *Sanhedrin* 59, the Serpent was jealous of the services rendered to man by the angels. In *Sota* 9*a* and *Beresh. Rabba* 18, the temptation is ascribed to the motive of lustful jealousy. *Ib.* 24 relates the curious legend that demons held intercourse with Adam and Eve during the first 130 years after the Fall, and other demons (שֵׁדִים, לִילִין, רוּחִין, and רוחות) were the product of the union. *Bereshith* 42 ascribes the birth of Cain to the union of Satan with Eve (Weber).

Freedom of will is ascribed in the Talmud to man even after the Fall. He can therefore choose either good or evil. The evil impulse in man is designated by the term יֵצֶר הָרַע, which works within him like a leaven (*Berakh.* 17*a*). Satan accomplishes his fell purpose by the instrumentality of the יֵצֶר הָרַע (*Bammidbar rabba* 20, *Baba bathra* 15*a*). Moreover, Satan is not only tempter, but also *accuser*, of whom the individual is continually in dread, since he never knows what is his standing before God, whether he is justified in His sight, or liable to condemnation through Satan's accusations. A similar conception underlies 1 Ti 3$^{6.\,7}$ and Rev 12^{10}.—Targums frequently foist Satan into the OT narrative, *e.g.* Targ. Jon. on Ex 32^{19} (Lv 9^{2}). Eisenmenger, *Ent. Jud.* i. p. 845, quotes rabbinic passages in which the angel who wrestled with Jacob is identified with Sammael. Similarly Belial (Beliar), according to *Ascensio Jesaiæ*, enters into Manasseh and accomplishes the martyrdom of the prophet.

iv. NEW TESTAMENT IDEAS RESPECTING SATAN.—These follow the broad outlines of contemporary Judaism, but are without its grosser and more extravagant elements, and are generally characterized by simplicity. The epithets bestowed on Satan are various. He is apparently identified with **Beelzebub** * (Beelzebul) in Mt 12$^{26.\,27}$, cf. 10^{25};

---

* Instead of Βεελζεβούλ the better attested form in Mt 10^{25} 12$^{24.\,27}$, Mk 3^{22}, Lk 11$^{15.\,18}$ is Βεεζεβούλ (sustained by B and partly by א; see WH). The latter is obviously a corruption of the former, and the former (Βεελζεβούλ) arose out of the OT form adopted by Jerome and Aramaized, *Beelzebub.* How did Βεελζεβούλ arise? About this we have three theories—(1) οἰκοδεσπότης in Mt 10^{25} is held to be a rendering based on the Aramaic בְּעֵל זְבוּל. This may be true in reference to בְּעֵל, but that זְבוּל means 'house,' 'dwelling,' is doubtful. In 1 K 8^{13} the reading is uncertain; cf. LXX and Wellh. in Bleek's *Einleitung*^{4}, p. 236. See also Nowack on Hab 3^{11}. (2) בעלזבל is regarded as a purposed variation with a contemptuous meaning, 'lord of filth.' זִיבּוּל (= זֶבֶל Syr. *zeblô*) means *stercus*. Cheyne in *Encycl. Bibl.* argues that superstitious Jews would hardly use such an opprobrious epithet against the prince of the demons. Moreover, such a mode of pronouncing the name is not found anywhere but in the NT. (3) More probable is the view of Baudissin (art. 'Beelzebub' in *PRE*^{3}) that we have a change of final consonant in popular pronunciation parallel to

but this is doubted by Weiss (*Bib. Theol. of NT*, i. p. 103, footnote). He is usually called διάβολος (a literal rendering of the Hebrew name); sometimes ὁ πονηρός, Mt 13$^{19. 38}$, 2 Th 3^{3}, and perhaps in the Lord's Prayer; ὄφις ἀρχαῖος, Rev 12^{9} 20^{2}; ὁ ἐχθρός, Mt 13^{39}; ὁ τοῦ κόσμου ἄρχων, Jn 14^{30} etc.; [ὁ] ἄρχων τῶν δαιμονίων, Mt 12^{24}; ὁ ἄρχων τῆς ἐξουσίας τοῦ ἀέρος, Eph 2^{2}.

(*a*) *The Synoptic tradition.*—Jesus felt Himself in the presence of demons belonging to a kingdom of evil ruled over by a supreme personality, Satan or Beelzebub. These personal agencies work every form of physical and moral calamity. They recognize, however, the might of Jesus the Messiah gifted with the power of God to destroy the works of Satan and all his personal subordinates (Mk 1$^{24. 34}$ 3$^{11. 12. 15. 23\text{-}27}$ 6^{7}, Lk 10$^{17\text{-}20}$ 11$^{14\text{-}22}$ 13^{32}). Jesus on His side fully recognizes the existence and power of the kingdom of Satan, which resists the establishment of the kingdom of God (Mt 12^{26}, Mk 3^{24}). In the narrative of the Temptation the world is regarded as ruled by Satan (cf. Jn 14^{30}); but in the Luke tradition (4$^{6\ \text{(last clause)}}$), Satan, on the other hand, confesses that his authority is not original and fundamental, but is derived (ἐμοὶ παραδέδοται); and this power he is willing to transfer to Jesus upon condition of His allegiance. The narrative illustrates the character of cunning that belongs to Satan as the tempter of mankind (Gn 3^{1}), for he quotes Ps 91$^{11. 12}$ for his own purposes (Mt 4^{6}), and applies the words to the Messiah. Against this subtle deceit Jesus warns His disciples. Satan is eager to sift Simon as wheat (Lk 22^{31}), and enters, like a demon, into Judas (v.^{3}).

The prevailing belief that physical maladies were due to the direct agency of evil spirits (see DEMON) was recognized by Christ. This demonic power that works physical havoc is under the supreme control of Satan, and is ascribed to him in the case of the afflicted woman (Lk 13^{16}). In the expulsion of demons by His disciples Christ sees the overthrow of Satan's power (Lk 10^{18}, in which utterance our Lord recurs to the well-known passage in Is 14$^{12\text{f.}}$). Accordingly the dualistic tendency, to which we have before adverted, is definitely limited by the absolute nature of God's righteous rule, whereby a definite term is set to Satan's sway. Meanwhile the anarchy which prevails works its baleful effects in the rival kingdom which Satan sets up as a *quasi*-god of this world (cf. 2 Co 4^{14}). This evil is intellectual and moral as well as physical. The devil takes the seed of the Divine word out of the heart of man (Mk 4^{15}, Mt 13$^{19. 39}$) and plants the spurious wheat (darnel, ζιζάνια). In other words, to borrow Pauline phraseology, he shows his craft by beclouding the understanding, 'blinding the thoughts of the unbelieving, so that they are unable to behold the gospel light of Christ's glory' (2 Co 4^{4}).

(*b*) *Pauline teaching.*—This stands in perfect continuity with that of Jesus reflected in the Synoptic tradition. We are still in the presence of many of the ideas that prevailed in contemporary Judaism, viz. of the *Book of Enoch* in the more remote past; of the *Book of Wisdom*, the *Testaments of the XII Patriarchs*, and of the *Book of Jubilees* in the age that immediately preceded the time when St. Paul wrote; of the *Assumption of Moses* coeval with the time of his literary activity and of the *Apocalypse of Baruch*, which immediately followed it. The apostle's conceptions respecting angelology and demonology have been carefully examined by Everling in a special treatise, and abundantly illustrated from the literature just mentioned.

In the writings of St. Paul we are confronted by an array of supernatural agencies which are not all definitely evil or good, but some of which stand in relative opposition to God (Ritschl, *Rechtfert. u. Vers.*^{1} ii. p. 251, quoted by Everling). In Ro 8^{38}, 1 Co 15^{24} we find them designated by the names ἀρχαί, ἐξουσίαι, and δυνάμεις. Here the ἀρχαί are perhaps to be identified with the ἄρχοντες τοῦ αἰῶνος τούτου of 1 Co 2^{6}.* The gods of the heathen are not absolutely non-existent (see DEMON), but have a subordinate potency in heathen *sacra* as θεοὶ καὶ κύριοι (1 Co 8$^{4\text{-}6}$, cf. 12^{2}). These supernatural 'rulers of this world' have a certain wisdom of their own (1 Co 2$^{6. 8}$), to which the eternal wisdom revealed by God's Spirit to simple-minded faith appears to be folly. Such wisdom will be brought to nought (cf. 2 Co 10^{5}). To the κύριοι καὶ θεοὶ correspond the στοιχεῖα τοῦ κόσμου, which may be considered to be an abstraction † standing in place of the personal concrete names (cf. ἀρχαί, ἐξουσίαι, θρόνοι, and κυριότητες), or, as Spitta ‡ would interpret the phrase, the στοιχεῖα represent the sphere of their personal activity. These are the κοσμοκράτορες of the dark spiritual world against which the Christian is to arm himself (Eph 6^{12}); over which Jesus triumphed in the Cross (Col 2^{15}, see Lightfoot).

Over all this world of evil energy Satan reigns, and all its collective power for evil is gathered up in his personality. He is the tempter (ὁ πειράζων, 1 Th 3^{5}, 1 Co 7^{5}; cf. Mt 4$^{1\text{-}3}$ and parallels). Bodily diseases are ascribed to him just as in Lk 13^{16}. Indeed, in one remarkable passage, 1 Co 5$^{4. 5}$, we even see Satan utilized for the advantage of the individual and the Church. The offender in a solemn Church assembly is to be delivered over to Satan for the destruction of the flesh, in order that the spirit of the sinner may be saved in the day of the Lord's appearing. Satan, as the inflicter of physical malady, is apparently identified with the destroyer, Ex 12^{23} (LXX ὁ ὀλεθρεύων, see APOLLYON), Nu 16$^{21\text{ff.}}$, to which 1 Co 10^{10} evidently alludes. Compare also the destroying angel of 2 S 24^{16}, 2 K 19^{35}, and also Wis 18^{25}. According to Wis 2^{24} death entered into the world through the devil, an idea which is closely related to the conception which prevails all through biblical literature, that long life is the reward of the righteous (Ex 20^{12} etc.), while the wicked are cut off and their lamp (of life) put out. Thus, according to St. Paul's own belief, surrender to Satan brought death as its ultimate consequence (1 Co 5^{5}, 2 Co 2^{11}); while in Jn 8^{44} Satan is ἀνθρωποκτόνος ἀπ' ἀρχῆς (cf. Gn 3^{19}). This power Jesus destroyed by death (He 2^{14}).

St. Paul ascribed his own physical maladies to Satan's agency. 'The stake (σκόλοψ) in the flesh' he calls 'Satan's messenger' (2 Co 12^{7}). The phrase ἐν ἀσθενείᾳ in v.^{9} followed by ἐν ἀσθενείαις clearly points to some bodily affliction, probably chronic fever (see Ramsay, *Expositor*, July 1899, pp. 20–23). Here again Satan is made subordinate to God's purposes of grace, and becomes a servant of moral discipline which St. Paul was strengthened to bear, though he prayed frequently to be delivered from it. With this passage and 1 Co 5$^{4. 5}$ cf. 1 Ti 1^{20}.

The apostle, like his contemporaries, did not think of the demons as inhabiting subterranean regions (as the Arabs and ancient Babylonians

---

others, *e.g.* Bâb el Mandel (for Mandeb).—The theory supported by Riehm is certainly worthy of consideration, that Beelzebub in the time of Christ was understood as בְּעֵל דְּבָבָא 'lord of enmity'=διάβολος; see Brockelmann's *Lex. Syr. sub voce*, and cf. Assyr. *bêl dabâbi*. Cf. art. BAALZEBUB.

* Heinrici doubts this, and would prefer to identify the ἄρχοντες here with those of Ac 13^{27}.

† Identified with οἱ κοσμοκράτορες in *Test. Salam.*; see Everling, p. 70.

‡ *Der Zweite Brief des Petrus*, etc. p. 270.

did). The angels of God had their residence in the higher regions of the heavens; and even Satan and his retinue dwelt, not beneath the earth (their final destination after the last judgment), but in the lower atmospheric realm. Thus in Eph 2^{2} Satan is called *ὁ ἄρχων τῆς ἐξουσίας τοῦ ἀέρος*. Cf. Eph 6^{12} 'the wicked host of spirits *ἐν τοῖς ἐπουρανίοις*.' An interesting parallel may be found in the *Testaments of the XII Patr.*, Levi 3, where it is stated that 'he who fears God and loves his neighbours cannot be smitten by the spirit of the air (*τοῦ ἀερίου πνεύματος*), Beliar.' Other interesting illustrations may be found in Everling's treatise, p. 107 ff. The most significant is from *Ascension of Isaiah* 10^{29} (ed. Charles, pp. 74, 132), in which we read that Jesus descends through all the seven heavens, assuming at each stage the form of the angels which inhabit that special region. At length He comes to the firmament where dwells the 'prince of this world' (cf. 7^{9} 11^{23}).

Beliar,* the variant of the name Belial (see Belial), is apparently identified by St. Paul in 2 Co 6^{15} with Satan; but about this question of identification we have the greatest divergence in the Jewish and early Christian tradition. The subject is discussed in Bousset's learned monograph, *Der Antichrist*, part II. ch. iv., Anhang i. (p. 99 ff.). Belial seems identical with the 'Man of Sin' in 2 Th 2^{3} (see Man of Sin).

St. Paul follows the Jewish tradition in identifying Satan with the serpent which tempted Eve. This clearly underlies Ro 16^{20} 'The God of peace shall bruise Satan under your feet,' obviously based on Gn 3^{15} (cf. 1 Ti 2^{14}, Rev 12^{9} 20^{2}). This view is again apparent in 2 Co $11^{2.\,3}$, where the apostle speaks of himself as though he were Christ's own *παρανύμφιος* (שׁוֹשְׁבִינָא), to guard the chastity of the Church from the devil's wiles of seduction (on the image, cf. Jn 3^{39}), whereby Satan even transforms himself into an angel of light (v.^{14}).

(*c*) *The Book of Revelation* obviously stands apart from the rest of the New Testament by reason of its strongly-marked Apocalyptic character. Into the recent controversies respecting its original form, suggested by the ingenious theory of Vischer (supported by Harnack's authority), this is not the place to enter. In the Book of Revelation we enter a transcendental region where the world-drama is enacted before us in a series of scenes of conflict between superhuman personalities. It is a *πόλεμος ἐν οὐρανῷ* between God with His angels of light, and Satan or the dragon, the 'old serpent,' the deceiver of the whole world (12^{9}), with his hosts of darkness. Chapter 12 has been the subject of much discussion since Gunkel wrote his stimulating treatise, *Schöpfung u. Chaos* (pp. 171–398). At the foundation of the story he sees Babylonian legend thinly veiled. The dragon is Tiâmat, the woman is Damkina, the mother of Marduk (here expressed by Christ). This primitive Babylonian myth was worked up into Jewish apocalyptic, Chaos or the Dragon (Tiâmat) being interpreted as Rome, and the entire legend transferred to the end of the world. But such a theory raises certain difficulties, though some appear to be solved. Bousset (*Antichrist*, Anhang, p. 169) is by no means disposed to agree to the dictum that no essential trait in the narrative is of Christian origin. After the last great overthrow of the Beast and the kings of the earth (Rev 19), Satan is imprisoned in the bottomless pit a thousand years (20^{2}). After this he is loosed and deceives the nations, but at length is finally cast into the lake of fire and brimstone where the beast and false prophet are (20^{10}, cf. Enoch $54^{5.\,6}$, 2 P 2^{4}).

(*d*) In *St. John's Gospel and Epistles* such legendary features disappear. We move in a serener, clearer atmosphere of sharply-marked antitheses. Satan and Christ are mutually opposed. Satan cannot touch him who is born of God and sinneth not (1 Jn 5^{18}). The devil is the ruler of this world, and has nothing in Christ (Jn 14^{30} 16^{11}, cf. 12^{31}). Sin enslaves through the power of the devil (8^{34}); and this bondage is established, as St. John and St. Paul alike taught, through the flesh, which is the organic point of human attachment to the *κόσμος*. Satan sinned from the beginning (1 Jn 3^{8}), and was the cause of death (Jn 8^{44}). Falsehood is his special realm (8^{44}). Jesus stands outside the world that is ruled by him (8^{23} $17^{14.\,16}$), and gradually wins individuals from him into the kingdom of God. First, Christ's own disciples are rescued from Satan's worldly dominion (15^{19} $17^{12.\,14}$). One only has abandoned himself to the devil to his own ruin (6^{70}). The world is at present in hostility to Jesus and His disciples ($14^{17.\,19.\,22}$ $15^{18.\,19}$ 16^{8} 17^{9}, 1 Jn $2^{15\text{-}17}$ etc.), but we are assured of Christ's final conquest of the world (Jn 16^{33}, cf. $17^{21.\,23}$). For the Son of God was manifested for the express purpose of destroying the works of the devil (1 Jn 3^{8}). This is in harmony with Christ's own teaching respecting Satan's overthrow reported in Lk 10^{18}. In Jn 16^{11} the judgment and condemnation of the devil are regarded, according to the tense usage which frequently occurs in the NT, as already finally accomplished (*κέκριται*, cf. 12^{31}). See the eloquent remarks on this passage in the *Pulpit Commentary* by the late Dr. H. R. Reynolds.

v. General Conclusions.—From the preceding exposition of the biblical conceptions respecting Satan we clearly see that early Christianity shared in the prevailing Jewish belief in demons and Satan. The attempt has been made by Beyschlag to deny the inference to which the Synoptic narratives lead us, that Jesus accepted the belief in a personal Satan. And with the elimination of a personal Satan he would also erase a belief in demons and angels from the inner consciousness of Christ. 'It is certain that Jesus did not recognize as personal devils the demons in whom the popular Jewish belief saw personal angels of Satan.' 'The form of the representation is undoubtedly personifying, but all the passages are poetic in style.' If language is to be manipulated in this fashion, it is difficult to see why Christ's belief in a personal God may not be eliminated also, or why such a process of evaporation might not be successfully applied to all contemporary literature. Jesus used parabolic language, and His discourses are steeped in similitudes; but when He used a symbol, it was understood to be such, or, if not at once so understood, its actual meaning was nearly always disclosed (Jn $3^{4\text{-}8}$ $4^{10\text{-}26.\,32\text{-}34}$ $6^{51\text{ff.}\,63}$ $11^{11\text{f.}}$, but in 2^{19} the enigma was solved by the close of His earthly career). But to suppose that Jesus persistently and consistently used the ordinary language of angelology and demonology, and even acted in accordance with it, and yet all the time held in secret opinions totally at variance with those of all His fellow-countrymen, and never revealed them by a single hint,—surely this is to invalidate Christ's claims to candour. Yet there is not a particle of evidence adduced by Beyschlag to support his monstrous contention that Jesus did not mean by the words Satan, demon, and angel, what His contemporaries meant and understood Him to mean. See Beyschlag, *NT Theol.* vol. i. pp. 93–95.

Our argument by no means implies that Jesus shared in all the current conceptions respecting demons. The problem, as we have already indicated, is a complex one. We have to give due place to two considerations: (1) that Christ's sayings and deeds are necessarily coloured by the representative human media through which they are conveyed to us; (2) that the demonology of Christ's belief is scarcely visible in the Fourth Gospel, though His belief in a personal Satan is clearly apparent. There can, however, be no scientific Christology which does not recognize that Christ's humanity was so genuine and complete that He shared in the cosmic presuppositions of His time. His Deity spoke to us through a true humanity. It was veiled and limited during His earthly ministry by those very conditions which He, in His *κένωσις*, voluntarily assumed when 'He took the form of a slave, and being found in the likeness of man, emptied Himself' (Ph 2^7). Now, demonology was a necessary part of the intellectual apparatus of that period. It was the latest phase of that animistic interpretation of the universe which was destined still to survive for centuries until the gradual growth of our inductive methods has substituted for demonology (as formerly understood) a rationally coordinated nexus of physical causality and law. But the ultimate and fundamental truth of angelology and demonology has not been and never can be destroyed by the march of modern science. Behind and beyond the physical nexus of interrelations there must lie *personality* and, moreover, *personalities*. However complex the material conditions, at both ends—nay, even along the entire path—of the intricate windings of the phenomenal chain there must ever live *personal power*. Our whole life rests upon the presupposition of our own individual initiatives of volition operating upon one another in the phenomenal world and modifying its successions and coexistences. That a supreme transcendent and personal (and, to the Christian consciousness, righteous) reason and will is ever present and potent in the entire realm, is a necessary postulate of any intelligible universe. The assumption that other superhuman as well as subordinate agencies are at work, and that some among these are embodiments of evil influence, adds no fundamental difficulty to those which already exist. No moral world is conceivable except as involving interrelations between personalities. Now, it is matter of historic notoriety that some personalities have lived in this world that might be called incarnations of evil influence. The supposition that other and superhuman personalities may also be *foci* of evil moral energy, and operate like ganglionic centres in a nervous system, presents no fundamental difficulty in addition to the difficulties already involved in the problem of evil. That Satan exists as a personal centre of evil influence, physical as well as moral (for the two are closely associated), is the undoubted teaching of the Bible. He is not represented to us as the absolute origin of evil or the only source of it, but as its most potent superhuman representative. See Dorner, *Christliche Glaubenslehre*, § 86, 3, vol. ii. p. 213 ff.

---

* In *Asc. Is.* 4^{2} he appears as *Beliar*, and in 7^{9} as Sammael. Ges. *Thes.* i. 210 notes the rendering of Belial (Beliar) by *dominus aëris* in Syriac lexicographers. Sense as well as sound (*ἀήρ* corresponds to the ending) contributed to this translation, which accords with tradition respecting Beliar's realm.

LITERATURE.—In addition to the reff. in the article, see art. 'Teufel' in *PRE*² and 'Satan' in Smith's *DB*; also Dorner, *Christliche Glaubenslehre*, Bd. ii. pp. 188–217, and the list of literature on p. 189; Martensen, *Christian Dogmatics*, pp. 186–203; Kaftan, *Dogmatik*, pp. 348 ff. (much to be commended), 478. On *Ecclesiastical* teaching (which does not come within the scope of a Bible Dict.) see esp. Harnack, *Dogmengesch.* (Index, *s.* 'Teufel' and 'Dämonen'); Iren. *adv. Hær.* v. 1. 1; Origen, *c. Celsum*, vii. 17; Nitzsch, *Lehrb. der Evang. Dogm.* p. 333 ff.; Dorner, *ib.* ii. p. 197 ff. Respecting the *Mohammedan* doctrine (based on Jewish), see Hughes, *Dict. of Islam*, *s.v.* 'Devil' (where *Mishkat* i. 3 is cited). Cf. also art. 'Genii,' and on this subject (*Jinn*) E. W. Lane's elaborate note 21 to his Introduction to his translation of the 'Thousand and One (Arabian) Nights.' The Devil was called *Iblis* (*διάβολος*) and identified with Satan (as in NT). There were also Shaiṭâns (plur.), just as in Jewish belief.—In *Ḳorân* see $2^{163f.\,331}$ (on Satan 'driven forth by stoning,' cf. Palmer's note) $4^{42.\,78}$ $5^{92ff.}$ 7^{26} 12^{42} $14^{26ff.}$ 19^{45}. Satan is constantly called man's 'open foe.'

SATHRABUZANES (*Σαθραβουζάνης*), 1 Es $6^{3.\,7.\,27}$ (LXX ^{26}) 7^1=Shethar-Bozenai (cf. Ezr $5^{3.\,6}$ $6^{6.\,13}$).

SATRAP.—See LIEUTENANT.

SATYR.—The Heb. original שָׂעִיר *sâ'îr*, plur. שְׂעִירִים *sĕ'îrîm*, is usually tr^d 'he goat,' its primitive meaning. In two passages (Is 13^{21} 34^{14}) it is tr^d in AV and RV 'satyr,' RVm 'he goat,' LXX in both *δαιμόνια*='demons.' In other two passages (Lv 17^7, 2 Ch 11^{15}) AV renders it 'devils,' RV 'he goats,' RVm 'satyrs,' LXX *μάταια*='foolish things.' Probably in all these passages the intention is to refer to some demon of popular superstition believed to have a goat-like form (cf. art. DEMON). The Greek mythology describes the satyr as a creature the upper part of whose body is that of a gross, sensuous man, the lower that of a goat. He is the ravisher of the wood-nymphs, the drunken companion of Bacchus in his revels (Hesiod, fr. 91). The Roman *faun* is similar, and is represented with horns and pointed ears (cf. Verg. *Ecl.* v. 73; Hor. *Ep.* II. ii. 125, *Ars Poet.* 233). Disgustingly realistic statues and paintings of these creatures are to be seen in the Museum at Naples (cf. W. R. Smith, *RS*¹ 113 f.; Bochart, *Hieroz.* ii. 844, iii. 825).

G. E. POST.

SAUL (שָׁאוּל, Σαοὐλ).—**1.** The first king of Israel. The son of Kish, he belonged to the small but warlike tribe of Benjamin, within which tribe his family had its seat at Gibeah.* During his early years the Philistines had overrun the Southern tribes of Israel, had captured the ark, had destroyed Shiloh, and were so thoroughly masters of Judæa that they maintained an outpost in Benjamin (1 S 13^3). Yet, though the tribes were humbled and separated, they had not entirely lost the sense of belonging to one race or of having a common destiny; and the oppression of the Philistines served to make clear to them that, in order to assert these things, a single leader was an indispensable necessity. To have discovered the unknown Saul, to have recognized his fitness for this task, and to have nerved him for attempting it, is the large service of Samuel, whom every account agrees in connecting with the rise of the new king.

According to one account, the future chief was sent by his father to seek for some strayed asses. Baffled in the search, he turned aside to ask Samuel, an inconspicuous seer in the land of Zuph, for information about their fate. Samuel satisfied this anxiety, but roused in the questioner the conviction of a greater destiny. Commanding him in J"'s name to deliver Israel, he confirmed the message by certain signs, the occurrence of which would serve to remove any hesitation in attempting so grave a task, and bade Saul then wait at home until his opportunity arrived (1 S 9. $10^{1-9.\,14f.}$). The opportunity was not long delayed. Nahash, a chief of Ammon, besieged Jabesh-gilead, and, when the inhabitants offered to surrender, would grant no milder terms than that their right eyes should be put out. So convinced was he of the helpless condition in which Israel lay, that he even allowed them to send messengers asking help from the tribes west of Jordan, for thus would his glory be increased by the disgrace inflicted on all Israel. The news reached Saul as he was driving his cattle home from the plough. He saw in his own wrath at the insult the indignation of Israel, and in the incident the very means needed to stir the pride of his people to a strong effort. Slaying the oxen, he sent a species of fiery cross through the South, and, with the hastily-levied force which obeyed the summons, defeated Nahash. The grateful people at Samuel's bidding brought their newly-found leader to the sacred place at Gilgal, and solemnly crowned him as their king before J″ (1 S 11, omit vv.$^{12. 13. 14c}$).

---

* Unless Gibeon is confused with Gibeah in 1 Ch $8^{29f.}$ the clan had once dwelt in Gibeon. Zela is also mentioned (2 S 21^{14}) as the burial-place of Kish, and as the final burial-place of his son.

The other account represents Samuel as the acknowledged head over Israel, who ruled in Ramah as judge. When the Israelites, dissatisfied with their condition and with the conduct of the judge's sons, desired a king, he at first refused their request, as rejecting God's immediate government in the nation, but at J″'s command consented (1 S 8). A popular assembly was held at Mizpah, where Saul was elected prince by the sacred lot (10^{17-24}). A few opposed the election, and Saul withdrew with his supporters to Gibeah. The Nahash incident offered the new king the occasion which justified his election, and silenced all opposing voices. After it the people, convened at Gilgal, renewed the consecration, while Samuel solemnly resigned his office ($11^{12ff.}$ 12). This account regarded the kingship not only as a novelty, but as a backward step from the older theocracy, an accommodation to the weakness of the people.

It was impossible for the Philistines to view with indifference Saul's election (however it had been brought about), and not to dread the quickened national life which the victory over Nahash was sure to produce among their subject people. Realizing this, and preparing for the inevitable shock, Saul retained about him a small army. He chose 3000 men, placed one-third of them under his son Jonathan at the home of the clan, but kept the other two-thirds under his own orders near Bethel. Probably he intended to rouse the strong tribe of Ephraim to his support. The impatient courage of Jonathan precipitated the struggle. He struck down the garrison or representative (נְצִיב) which the Philistines had in Benjamin.* The Philistines replied by gathering an army, which they marched up the valley of Aijalon in the direction of Michmash. They thus drove themselves like a wedge between the Northern and Southern tribes. Lest they should cut him off from Benjamin, Saul was forced to fall back, especially since the majority of his troops fled, some into hiding, others across Jordan. The king with the 600 men who still clung to him retired on Gilgal,† in which position he secured a safe base on the transjordanic tribes. He left at the head of the wady and opposite the Philistine position a small outpost under Jonathan, who should watch the movements of the enemy and warn the main body (13^{1-7}).

For a time there was hesitation. Probably the Phil. wished to draw the Isr. army from its strong position and from its supports. But the invaders were too proudly confident of their strength. Forming a camp above Michmash, they divided almost their whole force into detachments and sent these northward to forage and to check any rising which Ephraim might attempt ($13^{16-18. 23}$). Jonathan saw his opportunity and seized it. Without delaying to request support from his father, he struck full at the weakened centre, overwhelmed the outpost at Michmash which had been set to watch him, and penetrated to the camp. Thence it would be an easy task to crush the divided detachments in detail. So sudden was the defeat that Saul on hearing the news had no time even to consult the oracle. He followed instantly his son's assault. The Isr. auxiliaries among the enemy deserted. The scattered Philistines were only preserved from utter ruin by the exhaustion of their victors; they streamed back by the same pass by which they had entered, and the South country was for a period free (14^{1-46}).

Here it would appear that the independent record of Saul's reign ceased. Here accordingly ($14^{49ff.}$) have been inserted a brief list of his household, and a statement that the struggle between the young kingdom and the Philistines continued during his entire lifetime. Most of the remaining information about the reign is derived from accounts which relate it as introductory to the appearance of David on the stage of Isr. history; and it is only just to the first king's memory to remember that the rest of his life is narrated from the point of view of an introduction to the life of his greater rival. But the king showed his prowess, and turned the new vigour of his realm against other foes than the Philistines. Men long remembered his victory over the Amalekites, partly because the motive of the war had been such a racial and religious antipathy, as the quickened self-consciousness of the young nation was keener to feel (1 S 15). And something of the same feeling must have prompted the king to crush the Gibeonites, that foreign tribe which had been received into the Isr. nation (cf. 2 S $21^{1f.}$).

About this period, however, Saul lost the support of Samuel, who had done so much to set him on the throne. The accounts differ as to the reason which produced the quarrel. One referred it to the victorious campaign against the Amalekites. These borderers had long troubled the South country of Judah, ravaging it with sudden forays, since the desert offered refuge in defeat or secure retreat with booty. Samuel commanded the king to proclaim a religious war and root them out; and Saul obeying delivered a blow from which the people never again recovered. He spared, however, the best of the spoil, and especially Agag, the captured king. For this disregard of the exact terms of his command Samuel denounced the fall of Saul's house in the very hour of his triumph (1 S 15). The other account dated the strife from the time when Saul had retreated on Gilgal, and was anxiously expecting, with a handful of wavering men, the assault of the Philistines. Samuel had bade him wait there during seven days, with the promise to come down then and offer sacrifice on his behalf. As the prophet's arrival was delayed beyond the set period, and the people were threatening to desert him, the king ventured to sacrifice independently. For this he brought upon himself the prophecy of the fall of his dynasty * (13^{8-15a}).

Certainly, Saul through this quarrel was deprived of a restraining and a strengthening influence. The victory, too, at Michmash could not be final, it was only introductory. The Philistines, with their organized force and their strong cities, could better bear such a defeat than the Israelites such a victory. What was required from the young realm was no longer a vigorous rising followed by a momentary effort, but the patient organization of a steady defence. And this, because it was so novel in Isr. history, must have severely tried the temper of tribes not yet fully weaned from their desert instincts. Intertribal jealousies, further, which played so large a part in that early period (cf. Jg $9^{26ff.}$ 8^{1-3} 12^{1-6} etc.), and which troubled the kingdom even after David's reign had consolidated it (*e.g.* 1 K 12^{16}), could not fail to spring up, especially since the chief belonged to one of the smaller tribes. All these things are enough to account in a sensitive man for the deep melancholy which clouded the king's powers at the very time when those were most needed (1 S 16^{14}).

---

* The exact sense of נְצִיב (1 S 13^{3}) cannot be considered certain, but in this connexion it is enough to know that it represented in some way the Phil. suzerainty.

† See, however, Wellh. *Comp.* 247 f.; Budde, *Richt. u. Sam.* 191 ff., and W. R. Smith, *OTJC*² 134 n., acc. to whom *Gilgal* is an unhistorical interpolation.

* It must always be remembered that there was a theological question debated in these matters. Saul, the heaven-appointed king, failed in his mission and fell on Gilboa. There must therefore have been something in his life which brought upon him the displeasure of J″, who would otherwise have given him victory. Thus the Chronicler (1 Ch 10^{13}) gives as an additional cause for the king's rejection the fact that he had consulted an evil spirit at Endor; and Josephus (*Ant.* VI. xiv. 9) adds also as a cause that he had destroyed 'Ahimelech the high priest and the city of the high priests.'

David's fame as a skilful harp player led to his being brought to the little court, where his music soothed the king's vexed mood. The charm, which made all men whom he met love the future king, laid hold on Saul, and he attached the young man permanently to his person as his armour-bearer (16^{14-23}). By this time the war against Philistia had changed its character. On their side the Philistines, taught by the disaster at Michmash not to despise their foes, and probably considering the subjugation of the barren hill-country scarcely worth the trouble it cost, were content to keep open their trade-route along the coast. On his side Saul recognized the folly of attempting to besiege the five strongly fortified cities in the valley. In the new border warfare which sprang up David soon proved himself an adept, and rose to a trusted position in the army. Recognizing his prowess, Saul gave the young captain his daughter Michal in marriage, and asked as bride gift the present of 100 Phil. foreskins—a gift significant at once of the low culture of the period and the character of the war ($18^{22ff.}$). But the new son-in-law proved dangerously strong. His deeds in the field and the personal magnetism which never forsook him, won him the love of Jonathan and the more perilous applause of the multitude. To the darkened mind of the king it seemed by no means impossible that ambition might prove too strong for gratitude and kinship. By guile and by open force he sought to get David into his hands. Each effort failed: even his daughter deserted him and tricked his messengers, while her husband escaped (ch. 19). After that open rupture David continued to linger in the neighbourhood of the court, while efforts were made, especially by the leal-hearted Jonathan, to heal the breach between Saul and the stoutest of his servants. But this only served to draw upon the prince the suspicion that he had entered into a conspiracy with the son of Jesse to dethrone the king,*—a suspicion which Jonathan was too proud in his integrity even to deny. The proud silence, however, would not appeal to so darkened a mind as Saul's had become. Such a position could not endure. At last David fled to Nob, northward from Jerus., and thence made his way through the country of the Philistines into the familiar South, where his own clan were sure to shelter him (ch. 21).

Saul, 'sitting under the tamarisk-tree at Gibeah,' reproached his own men as traitors because they had not betrayed the plotter, and as fools because they failed to recognize how the first result of setting up this Judahite would be the loss of power and prestige to Benjamin. He forthwith took a fearful vengeance on the priests who had harboured the fugitive, by massacring almost the entire household of Ahimelech at Nob, and then pursued the refugee in his retreat ($22^{6ff.}$).

How far this quarrel was the result of baseless suspicion in the diseased mind of the king, and how far it may have been justified by facts, must always remain uncertain. The fulness of the details which we possess, both over this period and over that in which David was hunted through the Negeb, proves that the hairbreadth escapes of the great king before he came to the throne were a favourite subject with the early historians. But all the accounts were written from a standpoint which regarded David as the divinely appointed king over all Israel. And it is not an impossibility that the active, patriotic mind of the young soldier may have seen the need, if his country were to be delivered, of some stronger hand upon the reins of government at that period. It is also possible that he may have been betrayed into words or acts which wrought with extra power on the morbid mind of Saul.

The first intention of the fugitive seems to have been to settle in a tract still occupied by the Canaanites which lay between Judah and Philistia. It enjoyed the double advantage of lying near the settlements of his own kindred, and of offering the desert for a last retreat. There he might hope to set up an independent principality without going over to the hereditary enemy; and the intermittent war along the western frontier might draw the king's attention away from his escaped captain. Once, therefore, he attempted to settle in a town at Keilah ($23^{1ff.}$). But the district was devoted to the king, and Saul drove him headlong from this refuge. He then betook himself to the pasture country S.E. of Judah and adjoining the Dead Sea. But here also, though he allied himself with the strong clan of the Calebites by his marriage with Abigail, he was unable to maintain himself. Saul's government was powerful enough to expel him even from this corner of the realm (chs. 24–26), and he was finally driven to find refuge under the protection of Achish in Gath (27^{2}). The Philistine princes, recognizing his worth, and especially his aptitude for the border warfare in which he had annoyed themselves, settled the fugitive in Ziklag (v.^{6}), where he might cover their unguarded flank, and keep the 'way of the sea,' the trade-route for Egypt, against the unruly tribes of the desert.

It is a strong proof of the extent to which the kingdom had been consolidated even during these years of war, that Saul was able to drive out of this remote part of his government one who combined with his popularity as captain family ties in that very region. The young realm must also have included much on the eastern side of the Jordan, for the last stand of Saul's house under Ishbosheth was made at Mahanaim (2 S $2^{8f.}$). It now began to creep along the backbone of the hill-country and to aim at overpassing the valley of Jezreel into the Northern tribes. Had this succeeded, it would not only have gained a great accession of strength in linking the Northern tribes more closely with the Southern, it would also have cut the line of communication by which the trade of the Euphrates found its way over Damascus and Philistia to Egypt. This would have meant draining one chief artery of the life-blood in that trading community. (Only on this view of the problem can we understand why the final grapple between the two powers was not fought in the South near the headquarters of them both, but in the comparatively far-off North.)

Threatened in their most vulnerable point, the Philistines roused themselves to action, and marched by Sharon and Megiddo into Esdraelon to clear the threatened route. Saul followed them along the hills, and crossing by En-gannim posted his army on Mt. Gilboa at the opposite side of the valley from Shunem where his adversaries lay.*

---

* This is undoubtedly the meaning and the sting of 1 S $20^{30f.}$

* No reference has been made to the other positions occupied by Saul and the Philistines, because, so long as the position of Aphek depends on nothing better than conjecture, all the rest must remain uncertain also. For a careful discussion of

In this position he commanded both Jordan and Esdraelon. This was no longer a guerilla contest, but a grapple of sheer bodily strength between the two kingdoms. Saul realized it, suspected also that the Philistines were too strong for him. His visit to the witch at Endor (ch. 28) both betrayed and increased the agitation with which he faced the battle. Men said he went into the fight knowing what was before him; that the evening before, Samuel, who had first anointed him to lead the armies of Israel, summoned him to a tryst at the grave. So it fell out. The ground on which the fight befell was not such as could protect the Isr. infantry from the dreaded chariots of the enemy. The Philistines crossed the valley and mounted the hill slopes. Saul saw his army routed, his sons slain, and retained only strength enough to command his own death. The Philistines next day found their great enemy dead, consecrated his armour in the temple of the Ashtaroth, and hung his decapitated body in the public square of Bethshan. But gratitude was as strong as hate, for men of Jabesh-gilead crossed the Jordan in the night, took down the body of the prince to whom they owed so much, and buried it on the site of his first victory (ch. 31).

Saul had been called to the task of freeing Israel from the Philistines, for without that freedom no advance was possible for the nation. And what had prompted him to seat himself on the throne had been no personal ambition, but a recognition of this fact, a very call of J". Because they could not fail to recognize this and the excellence of the deed, his people could not fail to reverence his memory, and even he who had fared worst at the king's hands sang his imperishable lament over him (2 S $1^{19\text{ff.}}$). Yet Saul had failed in his attempt, and died on Mount Gilboa. How that could be possible was the problem which long puzzled men in Israel. May it not be that they did not look widely enough? For Saul had done his work, despite his failure. No one ever questioned but that the kingdom must continue; he had proved its value too well for that. The only question which still remained was as to the man who should succeed and complete the imperfect task. That some one must, was a foregone conclusion. The first king, though outward circumstances had proved too strong for him, and though he had been unable to resolve the many difficulties which the new condition of affairs raised within Israel itself, had done enough to make the way clear for his successor: Saul died on Gilboa, but he made David possible.

Saul was married to Ahinoam, the daughter of Ahimaaz (1 S 14^{50}). Most of his sons died at his side (31^2); but one at least, Ishbaal or Ishbosheth (which see), escaped from Gilboa to meet a sadder fate (2 S 4^6). A son of Jonathan, Mephibosheth (which see), appears in the history of David (2 S $9^{1\text{ff.}}$ $19^{24\text{ff.}}$), and from him the Chronicler (1 Ch $9^{40\text{ff.}}$) derives a long line of descendants. It was one of Dean Stanley's suggestions which requires nothing except proof, that as Zimri appears in that list, the rebellion of 1 K 16^9 may have been the last effort of the fallen house to recover its position. Saul also left issue by a subordinate wife (2 S 21^8), for whose fate see RIZPAH.

It is difficult to accept the computation of Ac 13^{21}, which makes the length of this first reign in Israel 40 years. For, within two years of his father's accession, Jonathan was able to lead troops into battle (1 S $13^{1\text{-}3}$), a fact which argues for Saul an age of 40 years at his 'coronation,' and it is almost impossible to believe that it was a man of 80 years of age who fought at Mount Gilboa. Josephus (*Ant.* x. viii. 4, VI. xiv. 9) gives the length of the reign as 20 years. While this may be merely a guess, it does not present the above difficulties, and agrees with the fact that Ishbaal was 40 years old at his father's death.

See, further, BENJAMIN, DAVID, and the Literature at end of the latter article.

2. Saul of Tarsus. See PAUL.

A. C. WELCH.

SAVARAN.—1 Mac 6^{43} AV. See AVARAN.

SAVE, SAVING.—Both 'save' and 'saving' (from Fr. *sauf*, its force being seen in *sauf mon droit*, 'my right being reserved,' see Skeat, *Etymol. Dict. s.v.*), in the sense of *except*, frequently occur in AV. Thus Ps 18^{31} 'For who is God save the Lord?'; Lk 18^{19} 'None is good, save one, that is God'; Dt 15^4 'Save when there shall be no poor among you'; Ac 20^{23} 'Save that the Holy Ghost witnesseth in every city'; Neh 4^{23} 'None of us put off our clothes, saving that every one put them off for washing'; Ec 5^{11} 'What good is there to the owners thereof, saving (כִּי אִם) the [beholding] of them with their eyes?'

The phrase 'to save one alive' (Gn 12^{12} 50^{20}, Ex $1^{17.18.22}$ etc.) is used synonymously with 'to keep one alive' (Gn $6^{19.20}$ 7^3, Jos 14^{10} etc.), or 'to preserve one alive' (Dt 6^{24}), the Heb. being a causative form of חָיָה 'to be alive.' Cf. Mt 28^{14} Tind. 'If this come to the rulers eares, we wyll pease him, and save you harmeles.'

J. HASTINGS.

SAVIAS (B om., A Σαουίας), 1 Es 8^2=Uzzi, an ancestor of Ezra; cf. Ezr 7^4.

SAVIOUR.—See SALVATION.

SAVOUR, SAVOURY.—Savour comes from Lat. *sapor* taste (from *sapere* to taste) through the Old Fr. *savour* (mod. *saveur*). It was used first of all, in accordance with its derivation, for the taste or relish of a thing; then it passed to the expression of the kindred sense of smell; and from this it was easily used in the fig. sense of name or reputation. All these uses are found in AV.

(1) *Taste:* Mt 5^{13} ‖ Lk 14^{34} 'If the salt have lost his savour (μωρανθῇ), wherewith shall it be salted?' (ἁλισθήσεται; in Lk ἀρτυθήσεται, EV 'be seasoned'). The tr. in both places is from the Geneva version of 1557. The meaning is probably more than mere taste, rather 'virtue,' its power to make food 'savoury' (see the quotation from Udall's *Erasmus* at the end of this art.).

(2) *Smell:* Jl 2^{20} 'His stink shall come up, and his ill savour shall come up' (צַחֲנָתוֹ, Cov. 'his fylthy corrupcion,' Gen. 'his corruption'); elsewhere in OT always 'sweet savour' (Heb. רֵיחַ, except Ezr 6^{10} 'sacrifices of sweet savours,' Aram. נִיחוֹחִין). In the Apocrypha εὐωδία is rendered a 'good savour' in 1 Es 1^{12}, a 'sweet savour' in Sir 35^6 38^{11}; other examples of the word are 2 Es 2^{12} 'for an ointment of sweet savour' (*in odorem unguenti*), Sir 39^{14} 'give ye a sweet savour' (εὐωδιάσατε ὀσμήν), 50^{15} 'a sweet-smelling savour' (ὀσμὴν εὐωδίας). In NT εὐωδία is tr. 'sweet savour' in 2 Co 2^{15}, and ὀσμὴ εὐωδίας is tr. 'a sweet-smelling savour' in Eph 5^2 (but in Ph 4^{18} 'an odour of a sweet smell'); elsewhere we find ὀσμή alone, 2 Co 2^{14} 'the savour of his knowledge,' *i.e.* the sweet smell of the knowledge of God (ὀσμὴν τῆς γνώσεως αὐτοῦ); and 2^{16} 'To one we are the savour of death unto death; and to the other the savour of life unto life' (οἷς μὲν, ὀσμὴ θανάτου εἰς θάνατον· οἷς δὲ, ὀσμὴ ζωῆς εἰς ζωήν; edd. insert ἐκ before θανάτου and before ζωῆς, whence RV 'from death . . . from life'). Cf. Mandeville, *Travels* (in 'Macmillan's Lib. of. Eng. Classics,' p. 113), 'And at the foot of that mount is a fair well and a great, that hath odour and savour of all spices'; Jn 12^3 Wyc. 'the hous was fulfillid of the savour of the oynemente'; Jer 48^{11} Cov. 'hir taist remayneth, and hir savoure is not yet

---

the question and a good statement of its difficulty, see Smith, *HGHL* 400 ff., 675, and cf. APHEK, No. 3. It is just possible that Bethshan was the objective of both forces, and that the Philistines sought to relieve, the Israelites to cover, the siege of the town.

changed'; and the Note to Lv 1^{9} in *Matthew's Bible*, 'This *swete odoure* is: the sacryfyce of fayth and of pure affeccyon, in whych God is as delited, as a man is delited in the good savoure of meates, as it is said of Noe, Gen. viii. d.'

(3) Figuratively, *reputation*, Ex 5^{21} 'Ye have made our savour to be abhorred (AVm 'to stink') in the eyes of Pharaoh.' Cf. also Gn. 34^{30}, 1 S 13^{4}, 2 S 10^{6}, and the Eng. 'to be in (*or* to bring into) bad odour.'

The verb 'to savour' is (1) to taste or smell of, as Pref. to AV, 'Thus to minse the matter, we thought to savour more of curiosity than wisdome.' (2) To seek out by taste or smell, as Cranmer, *Works*, i. 181, 'By this you may soon savour what judgment this man is of.' So in AV Mt 16^{23} ‖ Mk 8^{33} 'thou savourest not the things that be of God' (*οὐ φρονεῖς*), Vulg. *non sapis*, whence Wyc. 'thou saverist not,' and all following versions till RV, 'thou mindest not.' Cf. Bunyan, *Holy War*, p. 25, 'And that which made him yet the more ignoble . . . was, that he never could savour good, but evil.'

The adj. 'savoury' occurs in AV only in Gn 27$^{4. 7. 9. 14. 17. 31}$ of the 'savoury meat' which Isaac loved (Heb. מַטְעַמִּים always plu., from טָעַם to taste). The word is also found in Is 30^{24} marg., and accepted into RV text, AV 'clean,' RVm 'salted,' in reference to the provender of oxen and young asses (Heb. בְּלִיל חָמִיץ, *Oxf. Heb. Lex.* 'provender seasoned with salt or a salt herb, rendering it more tasty'). Cf. Udall, *Erasmus' Paraph.* i. 19 (on Mt 5^{13}), 'It muste nedes bee a lively and a piththie thynge that can be sufficient to sawce and make savourie the life of all mankynde, being so werishe and unsavourye thorowe the desyres and fond opinions of vayne thynges.' J. Hastings.

SAW.—מְגֵרָה 2 S 12^{31}, 1 K 7^{9}, 1 Ch 20^{3} [but in this last the correct text is מְגֵרוֹת 'axes'], מַשּׂוֹר Is 10^{15}; LXX *πρίων*. From 1 K 7^{9} it is evident that saws were used for cutting stone. In Syria, at the present time, long smooth blades of iron are used to cut out columns. These have no handles: a heavy piece of wood is fitted to the back of the saw; this is grasped by two men, who draw it backwards and forwards, sand and water being plentifully used. It seems probable, from the marks on the rocks, that the ancient Egyptians used bronze saws with emery for cutting granite (Wilkinson, *Anc. Egypt.* ii. p. 254 n.). The ancient Egyptian carpenters in cutting wood drew the saw towards them instead of pushing it from them. In India the same custom prevails. English saws are bought eagerly by the Hindu carpenters, but the English handles are removed, and other handles fixed at the narrow end of the blades. In the NT the verb used is *πρίζω*, He 11^{37}. W. Carslaw.

SCALL.—See Medicine, vol. iii. p. 329^{b}. Scall is the AV and RV translation of נֶתֶק (Lv 13. 14^{54}): Wyc. has 'wem,' Tind. 'burning,' Cov. 'skyrfe,' Gen. 'blacke spot,' Dou. 'spotte,' Bish. 'fret.' The Eng. word is of Scand. origin, and signified primarily baldness (Icel. *skalli*, a bald head), but in Middle Eng. (also spelt *scalde*) it is a scab or eruption, generally of the head. Cf. Chaucer, *Scrivener*, 3—

> 'Under thy longe lockes thou maist have the scalle';

Spenser, *FQ* I. viii. 47—

> 'Her craftie head was altogether bald,
> And, as in hate of honourable eld,
> Was over growne with scurfe and filthy scald';

and Tindale, Lv 21^{20} 'Broken handed, or croke backed, or perleyed, or gogeleyed, or maunge, or skaulde'; Dt 28^{27} 'And the Lorde will smyte the with the botches of Egipte and the emorodes, scalle, and maungynesse.' J. Hastings.

SCANDAL.—In Wis 14$^{11\ \mathrm{marg.}}$ the Gr. *σκάνδαλα* is translated 'scandals' (text 'stumbling-blocks'). See Offence, vol. iii. p. 586$^{a. b}$. The Rhem. version uses 'scandal' as the tr. of *σκάνδαλον* (after Vulg. *scandalum*), in Mt 13^{41} 'The Sonne of man shal send his Angels, and they shal gather out of his kingdom al scandals, and them that worke iniquitie'—16^{23} 18^{7}, Ro 14^{14}; and the verb 'scandalize' occurs freq. as the tr. of *σκανδαλίζω*, as Mt 5^{30} 11^{6} 15^{12} 18^{8}, Lk 7^{23}, Jn 16^{1}. J. Hastings.

SCAPE-GOAT.—See Azazel.

SCARLET.—This word is the equivalent in AV of—1. שָׁנִי *shānî*, or הַשָּׁנִי *hashshānî* (the latter in Gn 37^{30}, Ex 28^{5} 35$^{25. 35}$ 38^{23} 39$^{1. 3}$, Jos 2$^{18. 21}$, Ca 4^{3}). 2. שָׁנִים *shānîm* (Is 1^{18} [with art.], Pr 31^{21}). 3. שְׁנִי־תוֹלַעַת *shĕnî-tôla'ath*, and שְׁנִי־הַתּוֹלַעַת *shĕnî-hattôla'ath* (Lv 14$^{4. 6. 49. 51. 52}$ 19^{6}). 4. תּוֹלַעַת־שָׁנִי *tôla'ath-shānî*, and תּוֹלַעַת־הַשָּׁנִי *tôla'ath-hashshānî* (Ex 25–39 *passim*, Nu 4^{8}). 5. תּוֹלָע *tôla'* (La 4^{5}). Once (Jer 4^{30}) only is *shānîm* tr^{d} AV 'crimson,' RV 'scarlet' (see Crimson). In one passage (Is 1^{18}) AV and RV tr. *shānîm* 'scarlet' (LXX *φοινικοῦς*), and *tôla'* 'crimson' (LXX *κόκκινος*). 6. *κόκκινος* (Mt 27^{28}, He 9^{19}, Rev 17$^{3. 4}$ 18$^{12. 16}$). As our Eng. versions do not rigidly preserve the distinction between crimson and scarlet, we cannot wonder that the ancients did not always do so. *Tôla'* originally signifies the worm or insect, and *shānî* the colour. In point of fact, both colours are produced from the same insect. Sometimes one of the two words is omitted, and sometimes the other, and sometimes both are given. The article is inserted or omitted, without an obvious reason. The creature alluded to, which produces the colour, is the cochineal, a hemipterous insect, *Coccus ilicis*, of which the male in the imago state is winged, and the female wingless. This insect attaches itself to the leaves and twigs of *Quercus coccifera*. An allied species, *Coccus cacti*, is raised on the leaf-like branches of *Cactus Ficus Indica*, Haw., and *C. cochillinifera*, Mill., particularly in the neighbourhood of Nâblûs. The female is oval in form, convex at the upper, flat at the lower surface. She is about the size of half a cherry kernel, but dries up to that of a grain of wheat. The Arab. name of this bug is *ḳĭrmĭz*, from which the word *crimson* is derived. Other colours besides scarlet and crimson, as purple and violet, are manufactured from the cochineal. See, further, art. Colours, *s.* 'Scarlet.'

G. E. Post.

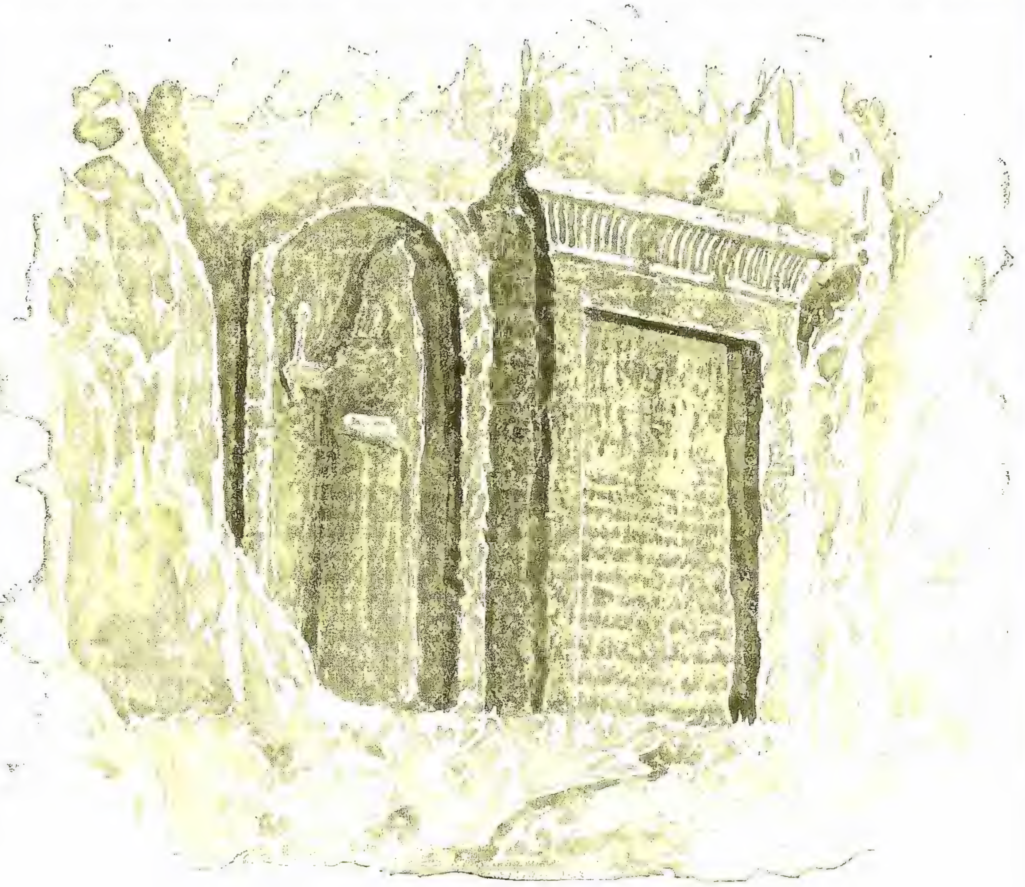
SCEPTRE is AV and RV tr. of 1. שֵׁבֶט *shēbeṭ*: Gn 49^{10} ('The sceptre [LXX *ἄρχων*] shall not depart from Judah,' etc.; on this passage see art. Lawgiver in vol. iii. p. 83, and Shiloh, below, p. 500 f.), Nu 24^{17} ('there shall come forth a star out of Jacob, and a sceptre [LXX *ἄνθρωπος*] shall rise out of Israel,' where sceptre and star [cf., for the latter figure, Is 14^{12}, Rev 22^{16}] are symbolical for a mighty prince *), Ps 45$^{6\,(7)}$ ('a sceptre [LXX and NT *ῥάβδος*] of equity is the sceptre of thy kingdom,' quoted in He 1^{8}), Is 14^{5} (‖ מַטֶּה; 'the Lord hath broken the staff of the wicked, the sceptre [LXX *ζυγός*, which is used also for 'staff' immediately before] of the rulers'), Ezk 19^{11} ('she [the vine symbolizing Israel] had strong rods for the sceptres of them that bare rule'; cf. v.^{14}, where, after her destruction, 'there is in her no longer a strong rod to be a sceptre to rule'), Am 1$^{5. 8}$ ('I will cut off him that holdeth the sceptre' [LXX here and in the two verses in

---

* This appears decidedly preferable to the suggestion of Ball (in *SBOT*, on Gn 49^{10}) that כּוֹכָב ('star') may here mean, like the Sumerian Mulmul, 'a *lance*, or else a *club*, *mace*, or *maul*, with a spiked head.'

Ezekiel has *φυλή*, taking *shēbeṭ* in the sense of 'tribe']), Zec 10^{11} ('the sceptre [LXX *σκῆπτρον*] of Egypt shall depart away'). **2.** שַׁרְבִיט *sharbîṭ*, used of the golden sceptre [LXX *ἡ χρυσῆ ῥάβδος*] of Ahasuerus, Est 4^{11} $5^{2\ bis}$ 8^{4} [all]. *Sharbîṭ* is simply an Aramaism for *shēbeṭ* (cf. the insertion of *r* in Da*r*meseḳ for Dammeseḳ in 1 Ch 18^{5}, and see Siegfried, *Lehrb. d. neuheb. Sprache*, § 18 *c*).

In addition to the above instances, RV in Nu 21^{18} corrects AV 'by direction of the lawgiver' (LXX *ἐν τῇ βασιλείᾳ αὐτῶν*) to 'with the sceptre.' The Heb. is בִּמְחֹקֵק ‖ בְּמִשְׁעֲנֹתָם 'with their staves.' Similarly RV reads in Ps $60^{7\,(9)}=108^{8\,(9)}$ 'Judah is my sceptre' (same Heb. word) for AV 'Judah is my lawgiver' [LXX *βασιλεύς*]. See LAWGIVER, *l.c.* It also substitutes 'sceptre' for 'rod' as tr. of *shēbeṭ* in Ps 125^{3} ('the sceptre [LXX *ῥάβδος*] of wickedness shall not rest upon the lot of the righteous').



ASSYRIAN KING WITH SCEPTRE (DOG-RIVER INSCRIPTIONS).

'Sceptre' is the appropriate rendering of *shēbeṭ*, when this is associated with a *king* or used absolutely,* in which latter instance it probably always designates a *royal* possession (see Driver, *Expos.* July 1885, p. 13). *Shēbeṭ*, in this sense, may stand either for a short ornamental sceptre such as appears in some representations of the Assyrian king (see illustration above, and the figures in Ball, *Light from the East*, pp. 160, 199^{b}, 217), or for a long staff reaching to the ground, which characterizes some portrayals of the Persian monarchs (see Rawlinson, *Anc. Mon.* iii. 203 ff., who describes the Persian sceptre as a rod about five feet long, ornamented with a ball or apple at its upper end, and tapering at its other extremity almost to a point). Probably both forms of 'sceptre' are in view in Gn 49^{10} (where שֵׁבֶט should prob. be taken as a *royal* emblem), the longer one being represented by the מְחֹקֵק (prop. 'commander's staff') of the second clause, and the shorter one by the שֵׁבֶט of the first clause.* The long sceptre is simply an ornamented **staff**, the short one is a development of the *club* or *mace* (cf. art. ROD, and see figures in Ball, *l.c.* pp. 50, 199^{a}, 217). It is this last-named weapon that is called *shēbeṭ* in 2 S 23^{21} = 1 Ch 11^{23} (AV and RV wrongly 'staff') and Ps 2^{9} 23^{4} (AV and RV less clearly 'rod').

The 'golden' (*χρύσεον*) or 'gold-studded' (*χρυσείοις ἥλοισι*) sceptre (*σκῆπτρον*) appears frequently in the pages of Homer in the hands of kings and chiefs (*e.g.* *Il.* i. 15, 246; *Od.* xi. 91, 569). With such a 'sceptre' Ulysses beats Thersites (*Il.* ii. 265 ff.); a sceptre is put by a herald into the hands of Menelaus when he rises to address the Greeks (*ib.* xxiii. 568, cf. *Od.* ii. 37).

On the difficulty of approaching the presence of the Persian kings referred to in Est 4^{11}, cf. also Herod. iii. 118, 140.

J. A. SELBIE.

---

* In instances like Jg 5^{14} (שֵׁבֶט סֹפֵר) 'baton' would be a very suitable rendering.

* Dillm., Ball, Gunkel, *et al.*, make מְחֹקֵק and שֵׁבֶט synonymous here, and understand *both* to refer to a long 'sceptre' or staff; but this is not required by the parallelism. In Ps 110^{2} מַטֵּה is likewise an emblem of rule, and virtually = 'sceptre.

SCEVA (Σκευᾶς, *Sceva*), Ac 19^{14}.—The name (Blass, *ad loc.*) was probably of Latin origin *Scaeva*, but had been assimilated to a Greek form as if derived from σκεῦος; it occurs in an inscription at Miletus (*CIG* ii. 2889. 5). In Ac 19^{11-20}, in the account of St. Paul's preaching at Ephesus, we are told that God wrought special miracles by the hands of Paul, even handkerchiefs carried from his body were sufficient to heal. But some of the wandering Jewish exorcists tried to exorcize in the name of Jesus, saying, 'I adjure you by Jesus, whom Paul preaches.' Then is recorded the special instance of the seven sons of Sceva, described as a Jewish high priest, who attempted this and failed, the evil spirit answering, 'Jesus I know, and Paul I know, but who are ye?' and the man driving two of them[*] naked and wounded out of the house. This caused great fear. Many who had used curious arts came confessing what they had done. Many also burnt magical books amounting in value to 50,000 drachmas (about £2000). 'So mightily grew the word of God and prevailed.'

The whole paragraph must be taken together. It represents St. Paul's miracles and spiritual power in contrast to the magical customs which so widely prevailed. Many Jews especially devoted themselves to sorcery, and Ephesus was noted for, amongst other forms of sorcery, the *Ephesia grammata* (see EPHESUS and MAGIC). St. Paul's power and success led to imitation of him. The name of Jesus evidently seemed to have some special efficacy, and so was adopted by the sorcerers, as every other name in turn was adopted (on the power of names see Frazer, *Golden Bough*, i. 403). The discoveries of papyri made in the last few years have enabled us to realize the very large extent to which magical practices prevailed, and the number of magical books which existed. The name of Jehovah in some form is common, and in the following extract from a magical papyrus at Paris the name of Jesus is used. The papyrus is of the 4th cent., and the original cannot be earlier than Hadrian, who is mentioned by name; it is published by C. Wessely, 'Griechische Zauberpapyrus von Paris und London,' in the *Denkschriften der phil.-hist. Classe der kais. Akad. der Wissenschaften in Wien*, vol. xxxvi. (1888) l. 3007 ff.).[†]

πρὸς δαιμονιζομένους· Πιβηχέως δόκιμον. λαβὼν ἔλαιον ὀμφακίζοντα μετὰ βοτάνης μαστιγίας καὶ λωτομήτρας ἕψει μετὰ γαμψούχου ἀχρωτίστου . . . στήσας ἄντικρυς ὅρκιζε. ἔστιν δὲ ὁ ὁρκισμὸς οὗτος· ὁρκίζω σε κατὰ τοῦ θεοῦ τῶν Ἑβραίων Ἰησοῦ· ιαβα· ιαη· αβρααθ· αια: θωθ· ελε· ελω· αηω· εου· ιιβαεχ· αβαρμας· ιαβαραου· αβελβελ· λωνα· αβρα· μαροια· βρακιων· πυριφανη· ὁ ἐν μέσῃ ἀρούρης καὶ χιόνος καὶ ὁμίχλης· ταννητις· καταβάτω σου ὁ ἄγγελος ὁ ἀπαραίτητος καὶ εἰσκρινέτω τὸν περιττάμενον δαίμονα τοῦ πλάσματος τούτου ὃ ἔπλασεν ὁ θεὸς ἐν τῷ ἁγίῳ ἑαυτοῦ παραδείσῳ [MS *παροδευσω*] . . . *ὁρκίζω σε τὸν σημανθέντα τῷ Ἰσραὴλ ἐν στύλῳ φωτεινῷ καὶ νεφέλῃ ἡμερινῇ κ.τ.λ.*

Both the evidence of papyri and the incident recorded in the Acts imply a conviction, even amongst those who did not believe, that there was power, perhaps special power, in the name of Jesus. It would imply a general impression that miracles were wrought in His name, and bears witness to the force and power of Christianity. It is instructive also to notice how from the beginning Christianity is the resolute foe of all magic.

There are a number of critical questions connected with this narrative. First of all there is a question of text. The RV (Codex B) reads: 'And there were seven sons of one Sceva, a Jew, a chief priest, which did this. And the evil spirit answered and said unto them, Jesus I know, and Paul I know; but who are ye? And the man in whom the evil spirit was leaped upon them, and mastered both of them, and prevailed against them, so that they fled out of that house naked and wounded.' D (supported by the margin of the Philoxenian) reads: 'And among those also the sons of one Sceva, a priest, *wished to do the same thing, who had a custom of exorcizing such; and having gone in unto the man possessed with devils, they began to call upon the name, saying: We command thee in Jesus, whom Paul preaches, to come forth.*' According to Ramsay (*Church in the Roman Empire*, p. 153): 'Codex Bezæ here gives a text which is intelligent, consistent, and possible: the accepted text is badly expressed and even self-contradictory.' This opinion seems to be largely followed. To the present writer the text of D is clearly a bad paraphrase, and its growth can be shown. The statement that Sceva was a Jewish high priest seemed (as it is) very curious, and therefore was altered in various ways. D alters ἀρχιερέως into ἱερέως, and omits Ἰουδαίου, so *Gig.* reads 'sacerdotis,' and Cassiodorius explains by 'principis synagogæ.'

Then again in the text of B, while in v.^{14} we have seven sons, in v.^{16} it is stated that the man 'mastered both of them,' implying only two. *Gig.* therefore substitutes 'duo' for '*septem*,' D leaves out the number altogether, while the majority of later authorities prefer to omit or alter ἀμφοτέρων in v.^{16}, the Sahidic even putting *eorum septem*. The remaining alterations of D are, as is generally the case, mere inept expansions. The narrative of St. Luke is very much abbreviated, and the paraphrast or translator thought that he could make it more clear, but he does not add a single point which could not be guessed. Even in the few words he does add he manages to introduce the form εἶχαν and the word δαιμονιζόμενον which are not Lukan, and the expression ἐπικαλεῖσθαι τὸ ὄνομα which does not occur unqualified in the NT, and betrays a later age. It may be noted that the word ἀμφοτέρων is undoubtedly Lukan (8 or 9 times in Luke and Acts, 6 times elsewhere in NT). The inconsistency may be difficult, but it is quite inconceivable that any one who had the D text before him should have taken the trouble to insert *septem*. On every principle of textual criticism the text of B must be the original.

The statement that Sceva was a Jewish high priest is undoubtedly difficult, but we have no right therefore to correct it away. Yet in the sense of a member of a high priestly family there must have been many who could claim it, and as Zeller (*Acts of the Apostles*, Eng. tr. ii. p. 59) says: 'It is quite possible that a band of exorcists, giving themselves out for sons or disciples of a Jewish high priest, may have made an experience of the futility of their arts in the person of a lunatic who had heard something of Paul and of Christ.' The difficulty about the discrepancy of numbers is more interesting. St. Luke's narrative is obviously very much shortened; only the necessary statements are made, and only what is essential is given. He never tells us that only two out of the seven were engaged in this incident, and it comes out accidentally in ἀμφοτέρων.[*] Does not this small point imply that the writer had here a source, almost necessarily a written one, from which he abbreviated his narrative?

It has been suggested that vv.$^{11-20}$ have been added to the original work. Hilgenfeld ascribes the passage to R. Ramsay, who has taken a dislike to it, says: 'If there were many such contrasts in the book as between vv.$^{11-20}$ and $^{23-41}$, I should be a believer in the composite character of the Acts' (*St. Paul the Traveller*, p. 273). It will be interesting, therefore, to examine the language. It will appear that throughout the passage we find characteristic Lukan expressions.

οὐ τὰς τυχούσας, cf. Ac 28^{2}.
τυγχάνειν, 7 times in Acts and Luke, 6 times elsewhere.
ἐπίσταμαι, 10 t. in Acts, 5 elsewhere.
διὰ χειρός, τῶν χειρῶν, 8 times in Acts.
γνωστόν, 10 t. in Acts, twice in Luke, 3 t. elsewhere.
τοῖς κατοικοῦσιν with acc. 13 t. in Acts, once in Luke.
ἐπιπίπτειν, 10 t. in Acts and Luke, 4 elsewhere.
φόβος ἐπέπεσεν, cf. Lk 1^{12}.
μεγαλύνειν, 5 t. in Acts and Luke, 3 elsewhere.
οἱ πεπιστευκότες, common in Acts.
ἱκανοί, 29 times in Acts and Luke, 12 elsewhere.
τιμή, or τιμαί of price, 5 times in Acts. With v.^{20} cf. 6^{7} 12^{24}.

The whole structure of the paragraph is exactly in the manner of the writer of the Acts, with the final clause summing up the whole, while there are indications that here as elsewhere he has reproduced partly in his own words a written narrative, just in the same way as he reproduces the Synoptic narratives in the Gospels with signs of his own phraseology.

Besides the special point touched on above, the historical character of the narrative has been attacked more generally. Ramsay (*St. Paul the Traveller, loc. cit.*) finds in it a vulgarity of tone compared with the great scene at Paphos. This seems to the present writer purely fanciful. Zeller (*op. cit.* ii. 58) says: 'Even from the standpoint of the miraculous faith presented in our book, such an utterly crass and magical representation of the healing power of the apostle has too much that is offensive.' What he particularly objects to is the story of the healing power in the handkerchiefs of St. Paul, and this is supposed to be a mere parallel to the narrative in Ac $5^{14.15}$. The parallel is too distant to have any weight, and here, as elsewhere, we need only remark about the miracles, that even if the handkerchiefs of St. Paul had no healing power it would certainly be believed that they possessed it, and that if the faith of the recipient was a condition of healing it might surely act equally with those who received a handkerchief in the virtue of which they believed. The whole narrative must be criticised and judged from the point of view of the time and place. The remarks of Conybeare and Howson, ch. xiv., who bring out how exactly the story harmonizes with the atmosphere of Ephesus, are much more valuable. 'The character of miracles was not always the same. They were accommodated to the peculiar forms of sin, superstition, and ignorance they were required to oppose. . . . So on this occasion garments were made the means of communicating a healing power to those who were at a distance . . . such effects thus publicly manifested were a signal refutation of the charms and amulets and mystic letters of Ephesus.' A. C. HEADLAM.

[*] But see footnote on next column.

[†] For this and other information the present writer is indebted to Dr. F. G. Kenyon of the British Museum.

[*] [In *Expos. Times*, Dec. 1900, p. 144, it is argued by Nestle that ἀμφότεροι, like 'both' in English [see editorial note, *ib.*], may include *more than two*, and is at times equivalent to πάντες. It was also discussed by J. B. Bury in the *Classical Rev.* xi. 393 (1897). There are at least two instances in Papyri: *Brit. Mus. Pap.* 336; *Geneva Pap.* 67].

SCHISM.—Only 1 Co 12^{25} 'That there should be no schism in the body': Gr. *σχίσμα*, which means either lit. a *rent* in a garment (Mt 9^{16}=Mk 2^{21}) or fig. a division in a community (Jn 7^{43} 9^{16} 10^{19}, 1 Co 1^{10} 11^{18} 12^{25}). RV retains 'schism' in 1 Co 12^{25}, and in the marg. of 11^{18} points out that the Gr. is 'schisms' (text 'divisions'). See HERESY, vol. ii. p. 351^{a}.

SCHOOL.—See EDUCATION.

SCHOOLMASTER.—Only Gal $3^{24.25}$ AV (Gr. *παιδαγωγός*, which occurs also in 1 Co 4^{15} AV 'instructer'; RV in all places 'tutor'). The *παιδαγωγός* (Lat. *pædagogus*) was a person (generally a slave) who had charge of the Greek or Roman boy till he reached manhood. Tindale's translation 'scholemaster' (Wyc. 'maister') is misleading, as the *παιδαγωγός* was not a schoolmaster or teacher (*διδάσκαλος*). Nor is the apostle thinking of one who conducted to school, though no doubt the *παιδαγωγός* might lead the boy to school if he went there. The contrast in Gal. is between the restraint of boyhood and the liberty of manhood. To be under the Law is to be always under the control of a *παιδαγωγός*, to be in Christ is to be free from that irksome restraint. J. HASTINGS.

SCHOOLS OF THE PROPHETS.—See EDUCATION, vol. i. p. 647^{a}, and PROPHECY, p. 109^{a}.

SCIENCE.—This word, as used in AV, means simply *knowledge*. Wyclif (*Works*, iii. 122) renders 1 Co 8^{1} 'Science blowes men' (AV 'knowledge puffeth up'). Cf. Barlowe, *Dialoge*, 109, 'There is no truthe, no mercye, nor scyence of god in the yerth'; Golding, *Calvin's Job*, 571, 'Thou shalt not run after witchcrafts, and other vaine sciences'; and Ro 2^{20} Rhem. 'Having the forme of science' (AV 'which hast the form of knowledge,' Gr. *τῆς γνώσεως*). The word occurs in AV only Dn 1^{4} 'Children . . . understanding science' (יֹדְעֵי דַעַת, LXX *γραμματικούς*, Theod. *γιγνώσκοντας γνῶσιν*); and 1 Ti 6^{20} 'Avoiding . . . oppositions of science falsely so called' (*ἀντιθέσεις τῆς ψευδωνύμου γνώσεως*, Rhem. 'oppositions of falsely called knowledge'). See KNOWLEDGE and GNOSTICISM.

Science in the modern sense, that is, the discovery and classification of secondary laws, is unknown to the Bible. To the Hebrew mind phenomena were immediately due to the word of Jehovah. See P. Thomson in *Expos.* 2nd ser. vol. i. pp. 161 ff., 241 ff. J. HASTINGS.

SCORPION (עַקְרָב *'aḳrābh*, *σκορπίος*, *scorpio*, Arab. *'aḳrab*).—There has never been any reason to doubt the identity of this animal. It is of the order *Arachnidæ*, resembling in shape a lobster, except that it has a long tail, at the end of which is its venomous sting. Its claws are used for seizing its prey, which it kills with its sting. When the animal runs it holds its tail upward in readiness to strike. It is carnivorous, living on insects and worms. Scorpions swarm under stones and in chinks of walls, and often conceal themselves under beds and mats in houses. Their sting is very painful, frequently causing a night of agony, which nothing but a large dose of morphine will assuage. The wound is dangerous to human life only when in a situation where the swelling obstructs the respiration. Not less than a dozen species are found in Palestine and Syria. The largest is 6 in. long, and black. Others are yellow, brown, white, and red, and variously striped.

The scorpion is frequently mentioned in Scripture. Allusion is made to its residence in the desert (Dt 8^{15}). Rehoboam threatens to chastise his contumacious subjects with scorpions (1 K $12^{11.14}$, 2 Ch $10^{11.14}$). This is prob. figurative (see next art.). Again, scorpions are alluded to figuratively with briers and thorns to designate a rebellious people (Ezk 2^{6}). The offer of a scorpion instead of an egg (Lk 11^{12}) is mentioned in a way that shows the horror which this creature inspired. The figure employed by our Lord in this passage is suggested by the egg-like form of the scorpion when at rest (see Plummer, *ad loc.*). The pain of its sting (Rev 9^{5}), the organ that inflicts it (v.^{10}), and its venomous quality (v.^{3}), are noted. The scorpion is also mentioned in Apocr. (Sir 26^{7} 39^{30}, 4 Mac 11^{10}). G. E. POST.

SCOURGE (שׁוֹט, usually translated 'scourge,' six times [1 K $12^{11.14}$, 2 Ch $10^{11.14}$, Pr 26^{3}, Nah 3^{2}] 'whip'; Gr. nouns and verbs *μάστιξ*, *μαστιγόω*, *μαστίζω*; *φραγέλλιον*, *φραγελλόω*; *flagellum*, *flagellare*).—Among the Hebrews the usual mode of corporal punishment, legal and domestic, was that of beating with the rod, just as the bastinado is still the common method in Eastern countries. The only reference to the scourge as an instrument of punishment is found in 1 K $12^{11.14}$, 2 Ch $10^{11.14}$. Rehoboam signalized his accession to the throne by threatening that, whereas his father had chastised the people with whips (or scourges), he would chastise them with scorpions. The scorpion (עַקְרָב) may have been a more terrible kind of weapon in actual use—either a knotted cudgel or a scourge armed with barbed points, just as the Roman *scorpio* was described by Isidore as *virga nodosa et aculeata*. It is possible, however, that the king was only using a lively figure of speech.

Under the Roman system of scourging, the culprit was stripped and tied in a bending posture to a pillar, or stretched on a frame (*divaricatio*), and the punishment was inflicted with a scourge made of leathern thongs weighted with sharp pieces of bone or lead. This is what Horace calls the *horribile flagellum* (*Sat.* I. iii. 119). Jesus was scourged with it by order of Pilate before being led away to be crucified (Mt 27^{26}, Mk 15^{15}, Jn 19^{1}). He had foreseen and foretold this indignity (Mt 20^{19}, Mk 10^{34}, Lk 18^{33}). The punishment of scourging usually preceded crucifixion (see references in Swete, *St. Mark*, *ad loc.*). The Porcian law forbade the scourging of Roman citizens; and on one occasion St. Paul, after being actually bound in order to be scourged, escaped the infliction by demanding if it was lawful to scourge a man who was a Roman and uncondemned (Ac $22^{24.25}$).

Jesus forewarned His disciples that they would be scourged in the synagogues (Mt 10^{17} 23^{34}). The Jewish method is fully described in the Mishna.

The scourge consisted of three thongs of leather, and the offender received thirteen stripes on the bare breast and thirteen on each shoulder (*Makkoth* iii. 12). St. Paul records that he five times suffered this punishment at the hands of the Jews (2 Co 11^{24}); and 'others had trial of . . . scourgings' (He 11^{36}).

Legal usages apart, Jesus made a scourge (*φραγέλλιον*) of small cords before cleansing the temple (Jn 2^{15}). Opinion differs as to the use He made of it. Meyer thinks He drove out the animals with it, not the persons; Godet, that 'it was not an instrument but an emblem, a sign of authority and judgment.'

'Scourge' is frequently used in a metaphorical sense. The Canaanites were a scourge (שֹׁטֵט) in the side of the Israelites (Jos 23^{13}); Eliphaz spoke of hiding from the scourge of the tongue (Job 5^{21}); the plague was the scourge by pre-eminence (Job 9^{23}, Is 10^{26}); and by a fusion of metaphors an invasion was called an overflowing scourge (Is 28^{15}).

For literature see art. CRIMES AND PUNISHMENTS.

J. STRACHAN.

SCRABBLE.—1 S 21^{13} only, 'And scrabbled on the doors of the gate' (וַיְתָו,* AVm and RVm 'made marks': the subst. תָּו a mark or signature, esp. in the form of a cross, became the name of the Heb. letter ת; see MARK, § 6). The Eng. word comes from the Geneva version, where the marg. is 'by making markes and toyes.'

Though the same in meaning as 'scribble' (from Lat. *scribere* to write), it has no connexion with that word etymologically. Skeat considers it to be a dialectic form of 'scrapple' (a frequentative of 'scrape'), of which 'scramble' is a nasalized form. Bunyan uses 'scrabble' in the sense of 'scramble' (*PP* p. 116, see Venables' note on p. 467), 'Now, after a while, Little-faith came to himself, and getting up, made shift to scrabble on his way.' The modern word 'scrawl,' says Skeat, 'appears to be nothing but a careless form of "scrabble."'

J. HASTINGS.

SCREECH OWL.—See OWL.

SCRIBES.—i. ORIGIN AND CHARACTERISTICS.—In the time of our Saviour Jewish piety was largely legalistic and formal. The whole life of a pious Jew was strictly regulated by the Law. The Law was God's greatest gift to Israel; it was the complete revelation of His will and the basis of the covenant into which He had entered with them at Sinai; in it God had made known the perfect way of life, binding Himself by its terms to reward both in time and eternity the pious Jew in proportion to his observance of its precepts. The Law was therefore the binding norm both of the religious and the moral life. Religion was not a communion of man with God, but a legally correct walk before God. Love of the Law was the essence of piety; conformity to the Law was the standard and source of all righteousness. The aim and motive of this piety was the hope of reward in the present age and in the age to come (cf. Weber, *Jüd. Theol.* 1 ff.).

This legalistic tendency, which dates at least as far back as Ezra and Nehemiah, called into existence a class of men who specially devoted themselves to the study and exposition of the Law. These were the *ṣôphěrîm* or scribes. The earlier scribes, however, must not be identified in all respects with those of NT times. The latter were mainly jurists; the former were men of (sacred) letters: copyists, editors, students, and interpreters of Scripture, and more especially of the Law. Ezra, 'the scribe' *par excellence* according to Jewish tradition, is the great typical form of these earlier scribes or exegetes of the Law (Ezr 7$^{6. 11. 12}$, Neh 8$^{1. 4. 9. 13}$ 12$^{26. 36}$).* He is described as 'a ready scribe in the law of Moses' (Ezr 7^{6}), *i.e.* as a man of letters skilful in the Law, and as having 'set his heart to seek the law of the Lord, and to do it, and to teach in Israel statutes and judgments' (v.^{10}). This description of their activity doubtless applies in the main to Ezra's immediate successors. They occupied themselves in gathering together and elaborating Israel's sacred literature, in interpreting it to the common people, who were largely ignorant of Hebrew, and in making the Law the rule of faith and life.† But down to the Maccabæan period their obedience to the Law was not synonymous with the narrowness of later Judaism (see Wildeboer, *Die Sprüche*, xvi). They were the 'wise,' the 'men of understanding,' the 'just men' of Proverbs and Ecclesiasticus (cf. Sir 6$^{33ff.}$ 9$^{14ff.}$ 14$^{20ff.}$ 38^{24}–39^{15}, Dn 11$^{33. 35}$ 12^{3}). It would seem from 1 Ch 2^{55} that they tended to form themselves into guilds and families.

Like Ezra himself (Ezr 7^{12} etc.), the scribes were originally found among the priests and Levites (cf. Neh 8$^{7. 13}$, 2 Ch 34^{13}). But pious 'laymen' also naturally devoted themselves to the professional study of the Law, so that there was gradually formed, alongside of the priests, who were the official interpreters of the Law, a relatively independent class of scribes. During the Greek period this independence developed into opposition, not indeed to the priesthood generally, but to the priestly aristocracy, several of whom fell away to Hellenism and neglected the laws and customs of the fathers. The attempt of Antiochus Epiphanes to suppress the Jewish religion brought matters to a crisis. It increased the scribes' devotion to the Law, and made them more narrow and exclusive. It also greatly increased their reputation among the people as being the leaders of those who were zealous for the Law (cf. 1 Mac 7$^{12f.}$ for their connexion with the Hasidæans), and as men who were ready to suffer martyrdom for their faith, 'welcoming death with renown rather than life with pollution' (2 Mac 6$^{18-31}$). The issue of the Maccabee rising in the Hasmonæan State intensified their narrowness and exclusiveness; they became Pharisees. Under John Hyrcanus (Kuenen), or more probably under Alexandra Salome (Wellhausen), their leaders received a seat in the Sanhedrin, as a separate class, alongside of the chief priests and elders. They thus gained a kind of official position, and assumed a new character. From being men of sacred letters, they became mainly jurists. Amid all the changes that followed the downfall of the Hasmonæan dynasty down to the destruction of Jerusalem, although they were never in possession of political power, they were the real leaders of the people, such as we find them in the time of our Saviour.

In the NT they are usually called *γραμματεῖς* ('scribes,' 'men of letters'), occasionally also *νομικοί* ('lawyers') and *νομοδιδάσκαλοι* ('doctors,' 'teachers of the law'). These three terms are used almost synonymously (see art. LAWYER).* They practically formed the same party as the Pharisees, though such expressions as 'the scribes of the Pharisees' (Mk 2^{16}) and 'the Pharisees and their scribes' (Lk 5^{30}, cf. Ac 23^{9}) show that some of the scribes were Sadducees (see art. PHARISEES, § ii. (1)). The main seat of their activity was Judæa; but we find them also in Galilee (*e.g.* Lk 5^{17}); and they were probably to be found even in the Diaspora. They were indispensable wherever there was living zeal for the Law. Though any one qualified might be called on by the ruler of the synagogue to read and expound the Scriptures in the synagogues, the scribes, when present, were naturally most frequently invited to do so (cf. Mk 1^{22}).

---

* We should probably emend to וַיְתֹף, 'and he drummed on (the doors).' So Driver, Budde, Löhr, *et al.*, following the LXX *ἐτυμπάνιζεν* and Vulg. *impingebat.*

* Scribes are mentioned in Jer 8^{8}, where the prophet accuses them of falsifying the Law (cf. Giesebrecht, *ad loc.*). The term *ṣôphēr* occurs frequently in the OT in other significations, *e.g.* Jg 5^{14}, 2 K 25^{19}, 2 Ch 26^{11}, Jer 37$^{15. 20}$ 52^{25} 'muster-master, an officer who had charge of the enumeration and enrolment of the troops; a kind of adjutant-general' (Moore on Jg 5^{14}); Is 33^{18} the official that rated the tribute or war-tax that had to be paid to the oppressor; Ezr 4$^{8f.}$ [סָפְרָא], Ps 45^{1} [Heb. ^{2}], Jer 36$^{26. 32}$, Ezk 9$^{2. 3}$ writer; 2 S 8^{17} 20^{25}, 1 K 4^{3}, 2 K 12^{10} [Heb. ^{11}] 18$^{18. 37}$ 19^{2} 22$^{3. 8ff.}$, 1 Ch 18^{16} 24^{6} 27^{32}, 2 Ch 34$^{15. 18. 20}$, Est 3^{12} 8^{9}, Is 36$^{3. 22}$ 37^{2}, Jer 36$^{10. 12. 20. 21}$ secretary of the king, secretary of State. In 1 Mac 5^{42} the 'scribes of the people' are also military officers, the 'captains of thousands, and captains of hundreds, and captains of fifties, and captains of tens' of 3^{55}. In Sir 10^{5} 'scribe' probably means prefect of the people. Cf. Deissmann [Eng. tr.], 110 ff.

† The tradition regarding the Great Synagogue, which is said to have fixed the Canon of Scripture, has no historical foundation; see Kuenen, *Gesammelte Abhandlungen*, 125 ff.; Montet, *Essai sur les origines des partis saducéen et pharisien*, 91 ff. and art. SYNAGOGUE (THE GREAT).

The scribes were very ambitious of honour (Mt 23^{5-11}, Mk $12^{38f.}$, Lk $11^{43.45}$ 20^{46}), which they demanded more especially from their pupils. 'Let the honour of thy disciple be dear unto thee as the honour of thine associate; and the honour of thine associate as the fear of thy master; and the fear of thy master as the fear of Heaven' (*Aboth* iv. 17 in Taylor, *Sayings of the Jewish Fathers*^{2}). The claims of one's teacher were to be preferred to those of one's father, unless the latter were also one of the learned. If one's father and one's teacher had lost anything, or were bearing burdens, or were in captivity, the teacher was to be assisted first (*Baba meẓia* ii. 11 in Schürer, *GJV*^{3} ii. 317, and Taylor, *op. cit.* 71). The honour which they demanded was freely accorded to them. They enjoyed a great reputation not only among their pupils, but also among the people generally. They were usually addressed as *Rabbi* (רַבִּי, literally 'my lord'; it also meant 'master' in the sense of 'teacher,' Jn 1^{38}),† occasionally also as *Rabban* or *Rabbon* (cf. *Rabboni*, addressed to Christ in Mk 10^{51}, Jn 20^{16}), *father* (=*abba*) and *master* (=teacher, Mt $23^{9.10}$).

ii. FUNCTIONS.—It was mainly, though not exclusively, with the Law that the scribes occupied themselves. In respect of it their functions were threefold: (1) they had theoretically to develop the Law itself; (2) they had to teach the Law to their pupils; and (3) they had to act as judges in the Sanhedrin and in the various local courts.‡

(1) *The theoretical development of the Law.*—Theoretically, the written Law, contained in the Pentateuch, was the absolute norm of life, the religious, civil, and penal code of Israel. The pious Jew was required to observe it in its minutest details. But it was impossible for an average man to do so without special guidance. For this guidance they looked to the scribes. One of their chief functions was to study the exact letter of the Law, to harmonize and develop its various precepts into the minutest details, so as to secure its complete fulfilment, and to show how its precepts were to be observed in daily life. This they did also with the great mass of unwritten legal traditions, which in course of time had grown up alongside of the written Law. Cases, however, were of frequent occurrence, in regard to which both the written Law and tradition were silent, while the changes that were taking place in the national life rendered some of the old enactments highly inconvenient, if not obsolete. How, under these changed conditions, was it possible to live in accordance with the general principles of the Law? How were these new cases to be met? The solution of these difficulties was one of the leading occupations of the scribes. By means of an exegesis which was frequently very artificial, they not only based existing legal tradition more or less directly on the written Law, but also deduced from it rules that would meet the new case; or they met it by giving to some saying or recent custom of the 'wise' the value of fixed legal tradition. They were not satisfied, however, with expounding the Law and tradition so as to meet actually occurring cases. They busied themselves in providing for all conceivable cases that might occur, and especially in making a hedge or fence round the Law, *i.e.* in so expanding the compass of legal precept beyond what was laid down in the Pentateuch and in the oldest form of tradition, that it might be impossible for a man, if he observed all their traditional rules, to be even tempted to transgress the Law.* From being 'exegetes of the Law' the scribes thus became legislators; they not only made the Law more precise, but also introduced into it many innovations, supplementing and, in some cases, abolishing it, by their inferences and traditions. Still they had no intention of innovating; they were great sticklers for antiquity; they only meant to say what was old (cf. Wellhausen, *IJG*^{3} 284).

This ever-accumulating mass of legal traditions and of legal determinations was called **Hălāchā.**† It was equally binding with the written Law, the two together constituting the absolute rule of life. It was given by God to Moses at Sinai; Moses delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue (*Aboth* i. 1, where Torah=the oral law; cf. Weber, *op. cit.* 88 ff.). It was the authentic interpretation and supplement of the Torah; Jehovah not only taught Moses the Torah, but also its authentic interpretation, or the *lex oralis* (*Pesikta* 38*a*, in Weber, 89). In theory the written Law was the highest norm; but in practice the scribes assigned greater importance to the oral law (cf. Mt $15^{2ff.}$, Mk $7^{5ff.}$). They interpreted the Law by tradition, which was 'the fence to Torah' (*Aboth* iii. 20). 'The Bible was understood by the help of the Halacha, quite as much as the Halacha was based upon the Bible' (W. R. Smith, *op. cit.* 64). It was more necessary to learn and teach tradition than Scripture. The transgression of Rabbinic precepts was sin. Whoever transgressed the words of the wise was worthy of death. 'An offence against the sayings of the scribes is worse than one against those of Scripture' (*Sanh.* xi. 3, quoted in Edersheim, *The Life and Times of Jesus the Messiah*, i. 98; cf. also Weber, *op. cit.* 102 ff.). They nevertheless maintained that tradition was essentially nothing more than the interpretation and more specific determination of the Torah, from which, they alleged, all legal decisions were derived (cf.

---

* '"Scribe" (Latt. *scriba*) unfortunately lays stress on the etymological sense of the word (γραμματεῖς = סֹפְרִים); "lawyer" (νομικός) is scarcely better; Lc.'s νομοδιδάσκαλος is perhaps the most exact title' (Swete on Mk 1^{22}). Josephus occasionally calls them σοφισταί (*BJ* I. xxxiii. 2, II. xvii. 8, 9). 'The word σοφός, which in earlier times had been applied to one who was skilled in any of the arts of life . . . had come to be applied, if not exclusively, yet at least chiefly, to one who was shrewd with practical wisdom, or who knew the thoughts and sayings of the ancients' (Hatch's *Hibbert Lectures*, 26). Hatch also reminds us (p. 28) that 'by Grammar was meant the study of literature.'

† According to Schürer it was not till after the time of Christ that 'Rabbi' became a *title*; in the Gospels it is not a title, but a respectful form of address.

‡ Cf. *Aboth* i. 1: The men of the Great Synagogue 'said three things: Be deliberate in judgment; and raise up many disciples; and make a fence to the Torah.'

* Cf. W. R. Smith, *OTJC*^{1} 61 [^{2} 47]; Taylor, *op. cit.* 11: 'to make a fence to the Torah means to impose additional restrictions so as to keep at a safe distance from forbidden ground.' Streane, *The Age of the Maccabees*, 22: 'The term means the prohibition of things innocent in themselves, but bordering too closely for safety on things forbidden.' Weber, *op. cit.* 133, gives the following example: It was forbidden to drink the wine of the Gentiles, because they were never certain that they did not thereby come into contact with idolatry.

† *Hălāchā* means literally 'going,' 'way,' hence fig. 'custom,' 'usage,' 'rule,' esp. one *fixed traditionally, jus a majoribus traditum* (Weber^1, 93); 'Halacha was legal teaching, systematized legal precept . . . the system of rules applying the Pentateuchal law to every case of practice and every detail of life' (W. R. Smith, *op. cit.* 58).

Weber, 96 ff.). Whether an inference or a custom should become a binding *hălāchā* was determined by the majority of those distinguished for learning. It was thus also that they decided the differences between the rival schools of Hillel and Shammai. Theoretically, the *hălāchôth* were unchangeable; but for various reasons it was impossible to maintain this principle in practice. But a *hălāchā* could be changed or abolished only with the consent of a majority of the Wise. 'One Sanhedrin cannot abrogate the decision of another Sanhedrin, unless it be superior in wisdom and in number' (*Eduyoth* i. 5, quoted in Montet, *op. cit.* 231).

As expositors and guardians of the Law the scribes occupied themselves mainly with precepts regarding sacrifices, the festival celebrations, the observance of the Sabbath, the payments to be made to the priests and the temple, and more especially with those relating to levitical purity in the matter of foods, purifications, etc. They laid the greatest stress on these ascetic elements because they thereby kept Israel separate from the Gentiles. 'Their ideal was not righteousness, but holiness' (Wellhausen, *op. cit.* 150). The marks of a religious Jew were fasting (cf. Lk 18^{12}), almsgiving (Mt 6$^{1ff.}$), and prayer, as the fulfilment of statutory duties (cf. Mt 6$^{5ff.}$; *Aboth* ii. 17: 'be careful in reading the *Shĕma*',' *i.e.* Dt 6$^{4-9}$). Really ethical duties were assigned a subordinate place (Mt 15$^{4ff.}$, Mk 7$^{8ff.}$, Mt 23$^{23ff.}$). A distinction was drawn between greater and lesser commandments; but they were enjoined 'to be attentive to a light precept as to a grave' (*Aboth* ii. 1). Great stress was laid on the idea of reward (*Aboth* iv. 13 ff.: 'whosoever fulfils the Torah in poverty will at length fulfil it in wealth'; 'if thou labourest in the Torah, He hath much reward to give unto thee'; 'he who performs one precept has gotten to himself one advocate; and he who commits one transgression has gotten to himself one accuser.' Cf. v. 11 ff., where seven kinds of punishment are shown to come on account of seven main transgressions, such as dearth from failure to tithe).

Piety was thus reduced to an external and mechanical formalism. Nothing was of value, if not strictly regulated by an external law; no room was left for moral originality or spontaneity; uniformity and formal exactness were all-important. Life under the Law was felt to be a heavy burden; the scribes themselves had to devise methods whereby to evade some of their own precepts (Lk 11^{46}, Mt 23$^{16ff.}$). Instead of proving a help to men in their moral and religious life, the Law had become a means whereby access to God was cut off (Lk 11^{52}).*

(2) *The teaching of the Law.*—With a view to 'raising up many disciples' (*Aboth* i. 1), the more famous rabbins gathered round them studious young men, to whom they expounded the Law (cf. Josephus, *Ant.* XVII. vi. 2, *BJ* I. xxxiii. 2). Seeing that the oral law was the main theme of their instruction, their teaching consisted in a constant repetition of its numerous precepts, so that their pupils might have them imprinted on their memory. They also put concrete cases, real or imaginary, before their pupils, in order to train them in the application of legal principles. Their pupils were also allowed to put questions to them, and to attend the disputations which they held among themselves over difficult questions. The pupils had only two duties: (*a*) to retain everything faithfully in their memory, and (*b*) never to teach otherwise, even in expression, than they had been taught by their master (cf. *Aboth* v. 18, of the four characters in scholars, 'quick to hear, and slow to forget, is wise'; iii. 12, 'when a scholar of the wise sits and studies, and has forgotten a word of his Mishna, they account it unto him as if he were guilty of death'; ii. 10, 'Eliezer ben Hyrcanus is a plastered cistern, which loseth not a drop'). Both teachers and pupils adhered rigidly to tradition. On any subject whatever, the fact that the rabbis had said so and so was decisive (cf. Mk 9^{11}).

Both for the disputations of the scribes among themselves and for the instruction of their pupils there were special academies (*beth hammidrash*), distinct from the synagogues. In Jerusalem their lectures were delivered also in the temple (cf. Lk 2^{46}, Mt 21^{23} 26^{55}, Mk 14^{49}, Lk 20^{1} 21^{37}, Jn 18^{20}), *i.e.* in the outer court. The scholars sat on the ground, the teachers on a raised bench (cf. Lk 2^{46}, Ac 22^{3}, Mt 26^{55}, *Aboth* i. 4, v. 21).

(3) *As judges.*—Although in NT times a professional knowledge of the Law was not requisite on the part of a judge, the scribes would naturally be called upon to fill that office. In the Sanhedrin at Jerusalem the 'chief priests' had the first place; but scribes also had a seat in it (cf. Mk 14$^{43.53}$ 15^{1}, Lk 22^{66} 23^{10}, Ac 4^{5}), and exercised the greatest influence (*Ant.* XVIII. i. 4). See art. SANHEDRIN.

Their whole professional activity both as teachers and judges was understood to be gratis. 'R. Zadok said, Make them [*i.e.* words of Torah] not a crown, to glory in them; nor an axe, to live by them. And thus was Hillel wont to say, And he who serves himself with the tiara [the crown of the Law] perishes. Lo, whosoever makes profit from words of Torah removes his life from this world' (*Aboth* iv. 9; cf. Taylor, *op. cit.* 68). They had therefore to earn the means of living in other ways. Those of them who were not possessed of private means carried on a trade in addition to the study of the Law (cf. Ac 18^{3}). But they had to make the study of the Law supreme (Sir 38^{24}–39^{11}; *Aboth* ii. 6, Hillel said, 'He that has much traffic will not become wise'; iv. 14, 'R. Meir said, Have little business, and be busied in Torah').

It is probable, however, that they received payment for their *teaching* (cf. our Lord's saying, Mt 10^{10}, Lk 10^{7}, and St. Paul's assertion of his right, seldom exercised, of being supported by those to whom he preached the gospel, 1 Co 9$^{3-18}$, 2 Co 11$^{8f.}$, Ph 4$^{10-18}$), and that they knew how to enrich themselves at the expense of the people (cf. Mk 12^{40}, Lk 20^{47} 16^{14}).

Though it was mainly with the Law that the scribes occupied themselves, they also turned their attention to the historical and didactic contents of their sacred writings. These they treated with far greater freedom than the legal contents, amplifying and embellishing them in the most arbitrary manner. The teaching that was thus derived from Scripture was called Haggādā. 'Haggada was doctrinal and practical admonition, mingled with parable and legend.' 'It was recognized as a rule of faith and life, and embraced doctrinal topics, practical exhortation, embellishments and fabulous developments of Bible narratives' (W. R. Smith, *op. cit.* 58, 168; cf. Driver, *LOT*^{7} 487).

Of historical *haggādā* we have an example in the Books of Chronicles, an idealization and amplification of the history in Samuel and Kings (see art. CHRONICLES, vol. i. 395 ff.). Later haggadists treated mainly of the history of creation and of the lives of the great men of the past.* They also elaborated the ethical and religious contents of Scripture in an altogether unhistorical and fantastic manner, devoting attention especially to angelology, theosophy, and eschatology. Unlike legal tradition (*hălāchā*), historical and doctrinal tradition (*haggādā*) was not binding, save on a few points such as the creation and government of the world by God, the Divine origin of the Law, and the resurrection of the dead.

D. EATON.

SCRIP.—Scrip occurs once as the tr. of יַלְקוּט *yalkût* (from לקט to glean), a shepherd's bag, in its single occurrence, 1 S 17^{40}; and six times as the tr. of πήρα, a traveller's leathern bag for holding provisions (cf. LXX, 2 K 4^{42}, Jth 10^{5} $13^{10.15}$), Mt 10^{10}, Mk 6^{8}, Lk 9^{3} 10^{4} $22^{35.36}$, all the examples of that word. RV retains 'scrip' in OT, but changes into 'wallet' in NT. The Eng. word has nothing to do with 'scrip' (formerly spelt 'script,' from *scriptum*), a schedule: it is of Scand. origin (Icel. *skreppa*), and is allied to, if not derived from, 'scrap' (Icel. *skrap*), as made from a scrap of skin, or as used for holding scraps of food. See BAG. J. HASTINGS.

SCRIPTURE.—The words so translated in EV are—

1. כְּתָב, only Dn 10^{21} 'I will show thee that which is noted in the scripture of truth' (RV 'writing'), where the reference is to 'the book in which God has inscribed beforehand, as truly as they will be fulfilled, the destinies of mankind'—Driver. Elsewhere this word is tr^d 'writing,' except Ezr 2^{62}, Neh 7^{64} (EV 'register').

This idea of a *Book of God*, in which are recorded men's names or deeds, runs through OT, the Apocalyptic lit., and NT. It appears that burgess-rolls of cities were kept, in which were enrolled the names of the citizens, with their families (Jer 22^{30} 'Write ye this man childless') and their vocations (the priests' roll or 'register' in Ezr 2^{62}, Neh 7^{64}). Such rolls suggested the figure of a roll or book kept by God, containing the names of the covenant people of Israel. In Is 4^{3} ('he that remaineth in Jerusalem shall be called holy, even every one that is written among the living [RVm 'unto life'] in Jerusalem') and Ezk 13^{9} ('neither shall they be written in the writing [RVm 'register'] of the house of Israel') we see the transition from the civil to the religious use, or at least from the actual to the ideal. From the roll or book the name of the citizen was removed at death; so in Ex 32^{32} Moses says, 'Blot me, I pray thee, out of thy book which thou hast written,' and v.^{33} Jehovah answers, 'Whosoever has sinned against me, him will I blot out of my book.' See Charles, *Book of Enoch*, p. 131 ff.

2. γράμμα: this word is used in NT in the foll. senses—(1) A letter of the alphabet, a written character, Gal 6^{11} (where AV follows Tind. in rendering 'how large a letter,' but RV, according to the usage of γράμματα γράφειν, 'how large letters,' Wyc. and Rhem. already had 'what manner of letters'). In AV, after TR, this sense is found also in Lk 23^{38}, but omitted from RV, after the best MSS. (2) Any written document, Lk $16^{6.7}$ AV 'bill,' RV 'bond' (TR τὸ γράμμα, edd. τὰ γράμματα). (3) An epistle, Ac 28^{21} (γράμματα, EV 'letters'). (4) The law of Moses, Jn 5^{47} (τὰ ἐκείνου γράμματα, EV 'his writings'); in St. Paul as written and judicial in opposition to the liberty of the law of life in Christ, Ro $2^{27.29}$ 7^{6}, 2 Co $3^{6.6.7}$. (5) The sacred Scriptures of the OT, 2 Ti 3^{15} (TR τὰ ἱερὰ γράμματα, edd. omit τά, AV 'the holy Scriptures,' RV 'the sacred writings'). (6) Learning, Jn 7^{15}, Ac 26^{24}.

3. γραφή. Once this word refers to NT writings, viz. the Epp. of St. Paul, 2 P 3^{16}; elsewhere the reference is to a passage of the OT,* or to the OT Scriptures in general. In Gal 3^{8} 'the Scripture' is personified.

The question whether γραφή in the sing. is ever used of the OT as a whole is much disputed. In a note to Gal 3^{22} Lightfoot lays down the rule that 'the sing. γραφή in the NT always means *a particular passage* of Scripture.' But in a subsequent note to Ro 4^{3} he somewhat modifies this statement: 'Dr. Vaughan,' he says, 'takes a different view, and instances examples from St. John. The usage of St. John may admit of a doubt, though, personally, I think not; St. Paul's practice, however, is absolute and uniform.' Hort (on 1 P 2^{6}) says that in St. John and St. Paul ἡ γραφή 'is capable of being understood as approximating to the collective sense.' See Westcott, *Hebrews*, p. 474 ff.; Deissmann, *Bibelstudien*, 108 ff., Eng. tr. 112 ff.; and esp. Warfield in *Pres. and Ref. Review*, x. (July 1899) p. 472 ff. J. HASTINGS.

SCYTHIANS (Σκύθαι, Jg 1^{27}, Jth 3^{10}, 2 Mac 4^{47} 12^{29}, 3 Mac 7^{5}; Gn $14^{1.9}$ Σκ. in Symm. = עֵילָם).—A nomadic tribe of Indo-European origin who lived between the Danube and the Don, and spread over the region between the Caucasus and the Caspian. In the time of the elder Pliny the name Scythia was applied vaguely to the remote regions of Central Asia and S.E. Europe. The cruelty of the Scythians was proverbial (Herod. iv. 64), and their injustice (2 Mac 4^{47}, cf. 3 Mac 7^{5}). Herodotus mentions (i. 103–105) that a horde of Scythians invaded Media, became masters of Asia, and intended to attack Egypt. Psammetichus, the king of Egypt, met them in Palestine, where he was besieging Azotus, and prevailed on them by bribes to retreat. It is not improbable that the description of the foe from the north in Jer 4^{3}–6^{30} was suggested by the ravages of these Scythian hordes, and that the imagery of Ezk $38^{4\text{ff.}}$ had a similar origin. Zephaniah's description of the 'Day of the Lord' may also reflect the impression produced upon the prophet's mind by the news of the advance of these formidable hosts (see Driver, *LOT*^{6} 252, 291 f., 342, and cf. art. JEREMIAH in vol. ii. p. 570^b). Thuc. (ii. 96) connects the Scythians with the Getæ, their neighbours, with whom they afterwards coalesced. Horace (*Od.* III. xxiv. 9 ff.) praises their simplicity and describes their nomadic habits. In Col 3^{11} (cf. Gal 3^{28}), where it is said that Christianity does away with all ethnical distinctions, Scythians are mentioned in connexion with, and probably as a synonym for, barbarians. C. H. PRICHARD.

SCYTHOPOLIS.—See BETHSHEAN. Its inhabitants are called **Scythopolitans** (Σκυθοπολ(ε)ῖται) in 2 Mac 12^{30}.

SEA (Heb. יָם; Gr. ἡ θάλασσα; only twice τὸ πέλαγος, Mt 18^{6}, Ac 27^{5}).—Besides the literal use, either generally or specially, with often a descriptive epithet, of the Mediterranean (Ex 23^{31}, Nu 34^{6}, Dt 11^{24}), the Dead Sea (Nu 34^{3}, Jos 3^{16}, Zec 14^{8}), the Red Sea (Ex 10^{19}, Ac 7^{36}, 1 Co 10^{1}, He 11^{29}), the Sea of Galilee (Nu 34^{11}, Jos 12^{3}, Mt 4^{18} 15^{29}, Mk 1^{16} 7^{31}, Jn 21^{1} 6^{1}), and even the Nile (Is 18^{2} 19^{5}, Ezk 32^{2}, Nah 3^{8}) and Euphrates (Is 21^{1}, Jer 51^{36}), and the figurative use in OT for *west*, because the Mediterranean was the western limit of Palestine (Gn 28^{14}, Ex 10^{19} 27^{12}, Jos 8^{9} 11^{2}), there are poetical,

---

contending with the devil for his body (Jude ^{9}); Salma or Salmon, the father of Boaz (1 Ch 2^{11}, Ru $4^{20\text{f.}}$), was the husband of Rahab (Mt 1^{5}); the drought and famine of 1 K 17^{1} $18^{1\text{ff.}}$ were known to have lasted three and a half years (Lk 4^{25}, Ja 5^{17}; see also Gal 4^{29}, cf. under ISHMAEL).

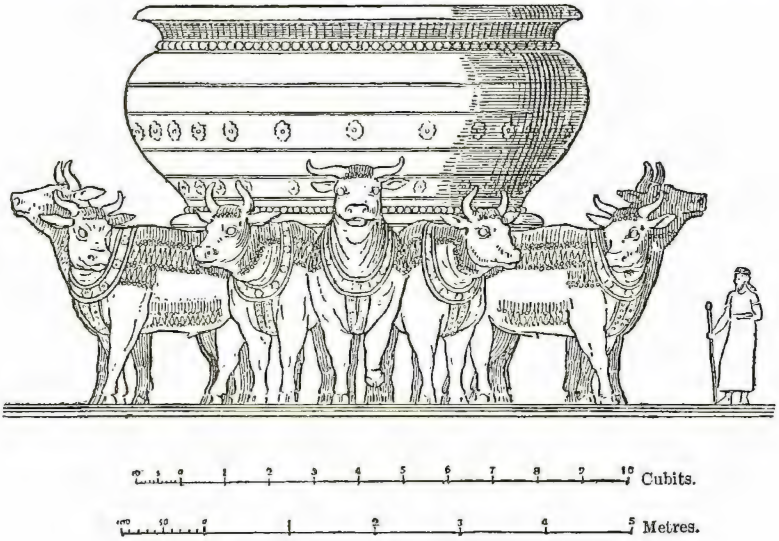
* Hort, however, holds that in 1 P 2^{6} ἐν γραφῇ cannot mean 'in Scripture,' nor even 'in a passage of Scripture,' but must mean simply 'in writing,' as Sir 39^{32} 42^{7} 44^{5} etc.

mythological, and apocalyptic references to the sea, which in several passages give to the word a theological significance. In this use the word 'sea' is closely allied with the word 'deep' (תְּהוֹם LXX and NT ἡ ἄβυσσος), which means (1) the primeval sea, from which all arose (Gn 1^{2}, Ps 24^{2}); (2) the ocean stream and subterranean waters (Gn 7^{11} 8^{2} 49^{25}, Dt 33^{13} 8^{7}); (3) any mass of waters (Ex 15^{1}, Ps 42^{7} 107^{26}); (4) the depths, the deep places of the underworld (Ps 71^{20}; see Cheyne on Ps 88^{6} and 148^{7}), as the abode of the dead generally (Ro 10^{7}), and specially of demons (Lk 8^{31}, Rev 9$^{1.11}$ 11^{7} 17^{8} 20^{1}). While generally used only in the third sense, the word 'sea' seems in some passages to borrow the fourth sense also (Rev 13^{1}, Dn 7^{3}). Either by poetical personification or as a mythological survival, the sea is spoken of as a monster over which God sets a watch, and with which He wages war (Job 7^{12}, see Davidson, *Job*, p. 54; Is 27^{1}, see Cheyne, *Isaiah*, i. p. 158; Is 51^{10}). The image of the sea is used regarding man and his ways: the wicked are as the sea casting up mire and dirt (Is 57^{20}), man's grief is as the unquiet sea (Jer 49^{23}), the doubtful man is as a wave tossed by the wind (Ja 1^{6}), wicked men are raging waves of the sea foaming out their own shame (Jude ^{13}), invading hosts are compared to overflowing streams (Is 8^{7}, Jer 47^{2}) and the noisy sea (Is 17^{12}). In Rev 13^{1} the beast rises out of the sea (as in Dn 7^{3} the four beasts rise), because (1) the sea as a wild, terrible power (Ps 107$^{23-30}$; see G. A. Smith, *HGHL* bk. ii. ch. vii.) represents heathenism (Reuss on Dn 7^{3}); or (2) the Roman power actually came from the sea, or the west (Holtzmann, *Handcom.* on Rev 13^{1}); or (3) the sea is but a synonym for the abyss (cf. Rev 11^{7} 17^{8}); or (4) the sea represents humanity, as in the passages noted above (so in Rev 17^{15} the many waters of v.^{1} are explained as 'peoples, and multitudes, and nations, and tongues'; see Carpenter on Rev 13^{1} and 17^{15} in Ellicott's *NT Commentary*, xii. pp. 167, 207). The words in Rev 21^{1} 'the sea is no more' (RV) will mean accordingly that powers hostile to God, whether men or demons, shall be brought to nought.

See also art. SEA OF GLASS, and for 'brazen sea' and 'molten sea' next article.

A. E. GARVIE.

SEA, BRAZEN (יָם הַנְּחשֶׁת 2 K 25^{13}, 1 Ch 18^{8}, Jer 52^{17}; called in 1 K 7^{23}=2 Ch 4^{2} **Molten Sea** [יָם מוּצָק]; also called in 1 K 7^{24} *et al.* absolutely 'The Sea' [הַיָּם]).—The large basin* of copper or bronze (see BRASS) which stood S.E.S. of the house, and, as in the case of the corresponding laver (כִּיּוֹר) of the tabernacle, was situated between the altar and the porch.† The metal of which it was made is said to have been taken by David from the cities Tibhath and Cun.‡ The basin was itself 5 cubits high, with a diameter of 10 cubits and a circumference of 30.§ It was a handbreadth in thickness. Its rim was bent outward as in that of many cups, being of the shape of a lily. That is all we are told of its shape, but from these *data* Josephus concluded that it was a hemisphere: others have thought of it as cylinder-shaped. Winer,‖ Riehm,¶ and Thenius** hold it to have been a kind of cylinder, in which the lower part bulged out. Thenius, Keil, and others object to Josephus' view that, if the basin were a hemisphere, it could not hold 2000, much less 3000 baths of water. The same might be said of the cylinder form which some give it. Benzinger†† points out that 2000 baths are equivalent to 72,800 litres, and that a hemisphere of the dimensions of the brazen sea could contain but 32,707 litres, while a cylinder of these dimensions would contain, at the utmost, 49,062 litres. It is possible that the diameter and circumference are taken at the narrowest part, say immediately beneath the rim; but it is more probable that the measurements apply to the rim, and that lower down the vessel bulged out very much.



10 5 0 1 2 3 4 5 6 7 8 9 10 Cubits.
100 50 0 1 2 3 4 5 Metres.

THE BRAZEN SEA (AFTER STADE).

According to 2 Ch 4^{5} and Josephus, *Ant.* VIII. iii. 5, the sea held not 2000, but 3000 baths. Keil and Thenius trace the error to a transcriber, and accordingly alter 3000 to 2000. There is, however, no external support for the change, and it is exceedingly likely that we owe the larger number to the fondness of the Chronicler for exaggeration—a fondness equalled at least by the Jewish historian.

Below the rim, somewhere near the middle of the vessel, probably two rows of colocynths[*] were figured, these being cast with the basin, and not subsequently carved. Stade[†] has shown on grammatical and other grounds that the numeral 'ten' must go with 'cubits' and not with 'colocynths,' and that, in short, the words constitute a clumsy gloss, and had far better be left out.

§ LXX 33.

‖ *RWB*^{3} ii. 69.

¶ *HWB*^{2} ii. 985.

** *Com.*

†† *Com.* on 1 K 7^{26}.

The Brazen Sea rested upon 12 brazen oxen, with their heads turned towards the four cardinal points, 3 looking in each direction. All of them probably stood upon one basement of metal.

It is likely that the space between the several groups was greater than that between the several members of the group; but we have no information on this, or concerning the height of the oxen or their other dimensions.

Josephus[‡] says that in making them Solomon broke the law of Moses which forbade the making of any graven image,[§] as he did also in making the lions that were about his throne. He might surely have added the cherubim, which come under the same category. Riehm says the figures of oxen were chosen to form a rest for the basin, because oxen formed so large a part of the offerings. This may also supply a reason for the horns at the four corners, as Franz Delitzsch suggests.[‖] Stade, Benzinger, Nowack, and others hold that the oxen have a connexion with the worship of Jehovah in the form of a bull, which prevailed in the North; the horns of the altar are traced to the same source. Kosters[¶] tries to prove that the 'Sea' stands for the תְּהוֹם—'the deep,' one source of water supply, and that the lavers[**] represent the clouds, the source of the rain supply. Benzinger gives his approval to this theory,[††] and so did Smend[‡‡] before him. On these matters the Bible is silent.

We are not told how the basin was supplied with water, nor how the water was got out.

As to the first, Keil thinks it was filled by means of a crane which raised the water from the fountain close to the altar and transferred it by means of some vessel to the 'Sea' whenever it was wanted. With regard to the second, there must have been some apertures low enough to be reached; possibly the water came out of the mouths of the oxen through pipes supplied with taps. For the opinions of leading rabbinical writers, see Lundius, *Jüd. Heilig.*, Hamburg, 1738, p. 356.

Not a word is said in the older and soberer account of Kings of the *purpose* served by the Brazen Sea. But in 2 Ch 4^{6} it is said to be for the priests to wash in: that is, if we take the account of the כִּיּוֹר or laver[§§] of the tabernacle to guide us, the priests washed their hands and feet with its water before they proceeded to offer sacrifices.

The next point at which we meet the Brazen Sea is in 2 K 16^{17}, where it is narrated that Ahaz, for the sake of their value, took away the brazen oxen, and laid the 'Sea' on the stone pavement. The Chaldæans at a later time, led by Nebuchadnezzar, broke the 'Sea' into pieces and carried away these pieces to Babylon.[‖‖]

After this we read no more about it. Yet Sir 50^{3}[¶¶] seems to show that in the mind of the writer the second temple had its Brazen Sea too, though apart from the vague hint contained in this verse of the Apocrypha we read nothing about a Brazen or Molten Sea in any temple except Solomon's.

LITERATURE.—Reland, *Antiq. Sacr.* i. 6 ff.; Keil, *Tempel Salomos*, 118 ff.; the Bible Dictionaries of Winer^{3}, Riehm^{2}, and the works on Biblical Archæology by Lundius, Benzinger, and Nowack; Stade's *Geschichte des Volkes Israel*, i. 335 f.; the Commentaries of Thenius, Kittel, Benzinger on 'Kings'—the first very full and able, the last two short, compact, and up to date.

T. W. DAVIES.

SEA OF CHINNERETH, SEA OF GALILEE.—See GALILEE, SEA OF.

SEA OF GLASS (AV), **GLASSY SEA** (RV), *θάλασσα ὑαλίνη*, occurring Rev 4^{6} $15^{2\ bis}$, has no exact parallel in previous or contemporary literature. But, as the scene in Rev 4 attaches itself to Ezk 1, it is natural to find in the 'glassy sea before the throne' a reproduction of the picture in Ezk 1^{22} 'the likeness of a firmament (Heb. רָקִיעַ = 'expanse'; LXX *στερέωμα* = 'solid structure,' whence Vulg. *firmamentum*) like the colour of the terrible crystal' (LXX *ὡς ὅρασις κρυστάλλου*, 'having the look of crystal'), extending over the head of the living creatures and under 'the likeness of a throne, as the appearance of a sapphire stone' (Ezk 1^{26}). We are reminded also of Ex $24^{9.\ 10}$, where it is said that, when Moses and Aaron and the elders of Israel ascended the mount and 'saw the God of Israel,' 'there was under his feet as it were a paved work of sapphire stone, and as it were the very heaven (LXX *εἶδος στερεώματος τοῦ οὐρανοῦ*, 'the appearance of the heaven's firmament') for clearness.' And just as there was 'fire on the top of the mount' (Ex 24^{17}), so also in Ezk 1^{27} we are told that 'there was an appearance of fire . . . round about,' and again in Rev 15^{2} the glassy sea is 'mingled with fire.' Another imperfect parallel is found in Enoch 14^{9}. The walls of the heavenly house from which Enoch saw in vision a second house and a throne in it and the great glory thereon, were 'like a mosaic crystal floor, and its groundwork was of crystal . . . and its floor was fire.' Perhaps the most nearly exact parallel occurs in the *Book of the Secrets of Enoch* (the Slavonic fragment of the Enoch literature, probably composed in its present form in the first half of the 1st cent. A.D.).[*] In 3^{3} Enoch tells how the angels had taken him up into the first heaven, next above the æther: 'and they showed me (he adds) a very great sea, greater than the earthly (*i.e.* the Mediterranean), and they brought before my face the elders.' Afterwards, in a higher heaven (the seventh in Enoch) he saw the throne and the glory. In *Test. xii. Patr.*, Levi 2, this sea is said to lie between the first and second heavens, and is called the 'water hanging' between the two. It is to be noted, further, that just as we have, in connexion with the crystal appearance, 'living creatures' in Ezekiel, and 'holy ones' in Enoch, and, in connexion with the great sea, 'elders' in the *Secrets of Enoch*, so also in Rev. we have, in connexion with the glassy sea, 'living creatures' (ch. 4) and victorious saints (ch. 15).

It is not necessary to harmonize all these apocalyptic images. But it is clear that the writer of Revelation is in contact at various points with previous apocalyptic literature when he conceives of a wide expanse of water in heaven, stretching away in front of the throne, smooth, clear, bright with a golden sheen[†] (21^{18}), like a fire, upon it, that flashes from the seven burning lamps; while hard by (or upon) this sea stand types of created life (ch. 4), and a triumphant host of those whose life has been created anew (ch. 15), glorifying the

---

[*] The addition 'ten colocynths to every cubit' has no support in the MT, nor in the LXX, though Thenius and Keil defend this rendering.

Lord God Almighty. It is possible that the idea of the glassy sea may have come from the temple pavement of ornamental polished stones (2 Ch 7^{3}; Jos. *BJ* VI. i. 8 and iii. 2) on which the people bowed themselves in thanksgiving to the Lord, and the gleam of which the Rabbis compared to the gleam of crystal.* The suggested relation to the 'molten sea' (*θάλασσα χαλκῆ*), the large copper reservoir of Solomon's temple used for the ablutions of the priests (2 S 8^{8} [LXX], 1 K 7^{23}), seems to be more remote, if not quite imaginary.

SEA OF TIBERIAS.—See GALILEE, SEA OF.

SEAH.—See WEIGHTS AND MEASURES.

SEAL, SEALING (subst. חוֹתָם; *σφραγίς*, *ἀποσφράγισμα* [LXX twice]; specifically *signet-ring*, חֹתֶמֶת, טַבַּעַת, in Aramaic עִזְקָא, *δακτύλιος*. Verb, חָתַם; *σφραγίζω* [all voices], *κατασφραγίζομαι* [act. and pass.], *ἐπισφραγίζω* [act. and mid.]).—These words are used (1) in a literal, (2) in a figurative sense.

i. LITERAL SENSE.—(*a*) *Use of Seals.*—There is evidence of the general use of seals in the early ages 'extending from the mists of Babylonian antiquity to the decline of Roman civilization' (*Encyc. Brit.* art. 'Gems'). We know from the OT that seals were used at an early date by the Hebrews (Gn 38$^{18.25}$ Judah's signet), by the Egyptians (Gn 41^{42} Pharaoh), and by the Persians (Est 3^{10} 8^{2} Ahasuerus). Herodotus tells us (i. 195) that the accoutrement of a Babylonian was incomplete without a staff and a ring, but this ring was probably a talisman more frequently than a signet. And the literary evidence is supported by that of gems and inscriptions dating as far back as B.C. 2000 and 3000, and showing that the practice extended to other nations (see Riehm, *HWB*, quoting Levy's *Tables*, and de Vogüé's *Mélanges d'Archéologie orientale*). Arabs and Persians of to-day wear similar seals. In the NT we have the *σφραγίς* upon the stone closing the mouth of the Lord's tomb (Mt 27^{66}), and the *δακτύλιος* (probably a signet-ring containing the father's name) put upon the finger of the prodigal (Lk 15^{22}); probably also the gold ring of the rich worshipper in Ja 2^{2} was not only an ornament but a signet-ring, indicating in itself that he was a person of consequence.

(*b*) *Structure of seals.*—If we may judge from the seals and signet-rings that have come down to us, seals were of two kinds: (1) the small seal of precious stone or precious metal in a signet-ring; (2) the more ample cone-shaped or round seals, some of metal (occasionally set in stone), some of porcelain or terra-cotta† (some even of wood are in vogue to-day in the East), large enough to contain inscriptions and animal figures, such as figures of oxen or antelopes, and intended to be hung by a cord from the neck or from the arm (Gn 38$^{18.25}$, Ca 8^{6}) or attached to the thing sealed (a door or a document, for example) when the impression was not made in the material of the thing itself.‡

(*c*) *The material used as the medium.*—Beckmann (*Hist. of Inventions*, i. 140, Bohn's tr., quoted in Smith's *Christian Antiquities*, art. 'Seals') gives it as his opinion that 'in Europe wax has been everywhere used for sealing since the earliest ages.' But in the East it was not wax but clay (Job 38^{14}), sealed when soft and then made hard by burning. When a door or a stone was to be sealed, a clay seal was put at each end of the cord stretched across it (cf. *Evang. Pet.* 8, *ἐπέχρισαν ἑπτὰ σφραγῖδας*, with Jn 9$^{6.11}$). Some stones so sealed still retain the cord marks. But, like the Arabs and the Persians, the Hebrews also seem to have dipped seals or stamps in a black pigment, a paint or an ink. The picture which Ezekiel draws (9^{4}) of the man 'with the writer's inkhorn by his side,' marking the foreheads of the men that sighed and cried for the abominations in Jerusalem, is doubtless the source of the sealing picture in Rev 7.

(*d*) *Purposes of sealing.*—Sealing was sometimes a *substitute for signature* (and conveniently so in days when writing was not a general accomplishment), if a letter had to be authenticated or a document to be ratified. So Jezebel forged Ahab's signature (1 K 21^{8}); and in Neh 9^{38} 10^{1} the sealing signified adherence to the contents of the covenant there and then made with God. At other times it denoted an *inalienable possession*, the signet itself being also the type of all that was most precious and inviolable (Ca 8^{6}, Jer 22^{24}). This comes out in the figurative application 2 Ti 2^{19} 'Having this seal, the Lord knoweth them that are his.' (In the same sense, perhaps, are the *στίγματα*, the 'brands' of the Lord Jesus, Gal 6^{17}). Akin to this idea was that of *security and permanency*, as when the stone of the lions' den was sealed by the king with his own signet and those of his lords, 'that nothing might be changed concerning Daniel' (Dn 6^{17}, cf. also Bel ^{14}, Mt 27^{66}). These ideas of *ownership and security* are often combined with that of *destination*, as in Ezk 9^{4} and Rev 7^{3}, where the persons sealed were, as God's people, secured from imminent destruction and designated for future reward. Finally, connected with the ideas of security and destination was the idea of *secrecy* or *postponement of disclosure*, as when the words of a roll, more particularly if prophetic, were sealed up for the uninitiated, or till the time came to publish them (Is 29^{11}, Dn 12^{9}, Rev 10^{4}). Quite in harmony with all these ideas was the idea of *authority* in the seal or signet, so that when a king bestowed his signet he thereby invested the recipient with royal authority, lending him, in fact, the royal name (Gn 41^{42}, Pharaoh and Joseph).

ii. FIGURATIVE SENSE.—In illustrating the scope of the literal, it has been unavoidable to trench upon the figurative, literal sealing being emblematic of one idea or another. But we have still to deal with the religious, the spiritual sense of *seal* and *sealing*, where there is nothing literal at all, even in vision. This comes out principally in the NT.

The idea of *authentication* is prominent when converts are called the seal of apostleship (1 Co 9^{2}), and when circumcision is named a seal, *i.e.* an authentication, of that righteousness by faith which existed before the rite was performed (Ro 4^{11}). The solemn *authentication* of human experience lies in the expression that he who has received the witness of the Son 'hath set seal to this that God is true' in what He promised through the Son (Jn 3^{33}); while the saying 'Him hath God the Father sealed' signifies *authentication* and *destination* to convey eternal life (Jn 6^{27}). The figurative sense of *seal* in the passage (2 Ti 2^{19}), 'The firm foundation of God (God's foundation of firm believers) standeth, having this seal, The Lord knoweth them that are his,' includes *ownership, authentication, security, and destination.* All these ideas, but especially *destination*, are present when it is said that believers are sealed with the Holy Spirit of promise (Eph 1^{13}); sealed unto the day of redemption (4^{30}); sealed and having, in the Spirit within us, the earnest of what we shall be (2 Co 1^{22}).

---

* See Bousset, *Offenbarung, in loco.*

† It is very doubtful, however, whether the 'great mass of existing (Babylonian) cylinders' could have been used as seals.

‡ Mr. Bernard Grenfell tells the present writer that sealings are not at all uncommon on Egyptian papyri, sometimes large, more frequently small. He believes that the practice of sealing *documents* went back in Egypt to the earliest times, though the date of the earliest papyrus seal is as yet uncertain. Jar-stoppers, however, were stamped in the time of the First Dynasty (earlier than B.C. 4000, according to Brugsch), and papyri of the Fourth and Fifth Dynasties, extant in fragments, probably, in their original state, contained sealings.

Working back from the early assimilation of baptism to circumcision as a seal (Hermas, *Sim.* viii. 6; 2 Clem. vii.), some have interpreted the sealings just mentioned as directly referring to the baptismal rite. But Lightfoot seems to be justified in questioning (2 Clem. vii.) whether 'St. Paul or St. John (*e.g.* Rev 9^{4}) used the image with any direct reference to baptism.' Hatch (*Hibbert Lectures*, p. 295) and Harnack (*Dogmengesch.* I. i. 151) trace the baptism sense of *σφραγίς* to the Greek mysteries; but Anrich (*Mysterienwesen*, p. 120 ff.) gives in his adherence to the belief that the origin of the use is the Jewish view of circumcision as a seal (see Anrich for illustr., and Sanday-Headlam on Ro 4^{11}).

One peculiar figurative use remains to be noticed. St. Paul, in speaking (Ro 15^{28}) of handing over the collection to the saints at Jerusalem, describes his act as 'sealing to them this fruit' (of his efforts, or of the spiritual blessings that had gone forth from the Jews). The simplest explanation seems to be that of Theodore of Mopsuestia: that the apostle is referring to the solemn and exact formalities of the transaction—a view which Deissmann supports from the papyri of Fayyûm, where such sealing of wheat-sacks and the like stands for a guarantee that they contain the amount they profess to contain. St. Paul desires to act like a conscientious merchant, and to guarantee formally that he hands over the amount due from him. The suspicions which some of his enemies had set afloat, that he helped himself from the collection, must be definitely and completely foreclosed. J. MASSIE.

SEAL, SEAL SKINS.—See BADGER.

SEAMEW (RV Lv 11^{16}, Dt 14^{15}).—See CUCKOW.

SEA-MONSTER.—This Eng. term occurs only twice in RV (text): Gn 1^{21} 'God created the great sea-monsters' (AV 'great whales,' LXX *τὰ κήτη*), and Job 7^{12} 'Am I a sea or a sea-monster (AV 'whale,' LXX *δράκων*), that thou settest a watch over me?' The Heb. in both these passages is תַּנִּין (plur. תַּנִּינִם and תַּנִּינִים), which has been supposed to come from an (unused) root תנן='stretch,' 'extend,' and so to signify properly an *elongated* animal (see Ges. *Thes.* 1511). The word תַּנִּין, in addition to these two occurrences, is used of serpents or serpent-like creatures in Ex $7^{9ff.}$ [P; JE and R use נָחָשׁ, LXX *ὄφις*, in the similar passages 4^{3} and 7^{15}], Dt 32^{33}, Ps 91^{13}; perhaps the crocodile is in view in Is 27^{1} 51^{9}, Ezk 29^{3} 32^{2} (see small type below), Ps 74^{13}; large water animals[*] of some kind are designated by it in Jer 51 [Gr. 28]^{34}, Ps 148^{7}. In all these passages the LXX tr. תַּנִּין by *δράκων*, RV has 'dragon,' except in Ex $7^{9ff.}$ 'serpent' (RVm, 'Heb. *tannin*, any large reptile'); and Ps 91^{13} 'serpent'; in Ps 74^{13} RVm has 'sea-monsters,' in 148^{7} '*or* sea-monsters *or* waterspouts.'

In Neh 2^{13} we hear also of the *'ên hattannîn* ('well of the dragon,' LXX *πηγὴ τῶν συκῶν*, 'fountain of the figs,' evidently confusing תַּנִּין with תְּאֵנִים 'figs').

Quite a different term, although it has sometimes been confused[†] with it both by copyists [תַּנִּין, LXX *δράκοντες*, of La 4^{3} is a textual error for תַּנִּים, while, conversely, תַּנִּים of Ezk 29^{3} 32^{2} (LXX in all *δράκων*) should be תַּנִּין] and by interpreters, is תַּנִּים (once Mal 1^{3}, if the text is correct, תַּנּוֹת, LXX *δόματα*=Heb. נאות; cf. Jer $9^{9\ (10)}$, Ps 65^{13}), the plur. of (unused) תַּן, which means some beast that haunts solitary places, probably the *jackal*. Its occurrences are Is 13^{22} 34^{13} 35^{7} 43^{20}, Jer $9^{10\ (11)}$ 10^{22} 14^{6} 49^{33} 51^{37}, Mic 1^{8}, Ps $44^{20\ (19)}$ (if the text is correct, but see Cheyne or Wellh.), Job 30^{22} [in all these passages AV has 'dragons,'[*] RV 'jackals'], La 4^{3} (AV [wrongly] 'sea-monsters,'[†] m. 'sea-calves,' RV 'jackals').

Another monster, belonging to the same category as *tannîn*, is LEVIATHAN (לִוְיָתָן *liwyāthān*, prob.='wreathed,' 'coiled'), which appears as a denizen of the waters in Ps 104^{26} '*liwyāthān* whom thou hast formed (יָצַרְתָּ) to play therein' (or 'with him,' לְשַׂחֶק־בּוֹ, LXX *ἐμπαίζειν αὐτῷ*), and Job $41^{1ff.}$ [Heb. $40^{25ff.}$]. In the first of these passages the whale is often supposed to be referred to, in the second the crocodile, which last may be the reference also in Ps 74^{14}, where *liwyāthān* is apparently symbolical of Egypt. In Job 3^{8} [where it is not necessary to read, with Gunkel, יָם 'sea' for יוֹם 'day'] magicians are supposed to be able to 'rouse up' (עֹרֵר; B *χειρώσασθαι*) this monster. On Is 27^{1} see below. [LXX in all these passages tr. לִוְיָתָן by *δράκων*, except in Job 3^{8}, where it has *τὸ μέγα κῆτος*; Aq., Symm., and Theod., where they are extant, always transliterate *λευιαθάν*, except in this same passage in Job, where Theod. has *δράκων*]. Leviathan is referred to also in Enoch 60^{7-9}, 2 Es 6^{49-52}; cf. Apoc. Bar 29^{4}.
